

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Multicooperation SICAV - GAM Commodity

a sub-fund of the Multicooperation SICAV

(ISIN: LU0984247097, share class: C - EUR)

Fund management company: Carne Global Fund Managers (Luxembourg) S.A., a company of Carne Group

Objectives and investment policy

- The aim of the sub-fund ("Fund") is to participate indirectly in the growth potential of the international commodity markets. The Fund strives to achieve higher capital growth over the long term than that of the benchmark index.
- The Fund invests at least 2/3 of its assets in a broadly diversified set of commodities or commodity classes using complex financial instruments. These complex financial instruments offer the same returns as the underlying commodities. As a result, there is no direct investment in physical commodities. The Fund may invest its assets in various currencies, the fluctuation in which is hedged against the base currency.
- The obligations of the Fund arising out of its investments in complex financial instruments are covered by debt securities, money market instruments or cash. The debt securities are issued or guaranteed by governments or companies and offer a very high likelihood of being repaid on maturity.
- The Fund may use complex financial instruments to hedge the Fund assets and to profit from promising investments.
- The Fund also has the following characteristics of importance to investors:
- The Fund follows the Bloomberg Commodity Index as a benchmark index, on the basis of which investment decisions are made. The Fund is actively managed and, in order to achieve an excess return, overweights or underweights individual commodities or categories of commodity with respect to the benchmark index. Most commodities can be part of the benchmark index. The investment manager can, at its discretion and in accordance with the prospectus, also invest in commodities that are not included in the benchmark index in order to take advantage of specific investment opportunities.
- Investors may buy or sell the Fund on any bank working day in Luxembourg.
- The Fund has several share classes. These may differ with regard to fees, minimum investment, currency, use of revenues and investor qualification.
- Income is reinvested in the share class.

Risk and reward profile

The above indicator shows what risk and reward characteristics the Fund has, based on the Fund's historical performance over the last 5 years. Where a 5-year performance history is not available, the history has been simulated on the basis of an appropriate benchmark index.

- The indicator helps investors to have a better understanding of the potential gains and losses related with the Fund. In this context, even the lowest category does not represent a risk-free investment.
- The past performance of the Fund provides no indication of its current or future performance.
- This allocation to a risk category may change over time because the future performance of the Fund may fluctuate differently than in the past.

- The Fund does not offer the investor a guaranteed return. Nor does it guarantee the fixed repayment of the money invested in the Fund by the investor.

The indicator takes account of those risks which are entailed in the Fund's net asset value. These mainly involve fluctuations in the value of investments. In addition to the risks expressed through the indicator, the Fund's net asset value may also be significantly affected by the following factors:

- The Fund invests in assets which are generally easy to trade and may therefore be sold at their market value under normal circumstances. However, it cannot be ruled out that in certain extreme situations (e.g. market turbulence) the tradeability of the assets in the Fund may be limited. In such situations, it may be possible to sell the assets in the Fund only at a loss, which will reduce the value of the Fund.
- The Fund invests in debt securities which are exposed to the risk that the borrower will be unable to meet its payment obligations.
- The Fund invests in complex financial instruments (e.g. derivatives), the value of which is connected to underlying assets. Certain of these financial instruments may produce a leverage effect which may have a sharp impact on the Fund's net asset value.
- If the Fund invests in non-standardised complex financial instruments, it is exposed to the risk that its counterparty will default.
- The Fund is assigned to the above category based on its historical fluctuations in value.

Charges

The costs borne by you are used to pay for the management of the Fund and its distribution and marketing. These costs reduce the Fund's performance.

One-off charges taken before or after you invest

Subscription fee	5.00%
Redemption fee	3.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charges	1.15%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

Both the subscription and redemption fees and the conversion fees are maximum rates. You may be charged less than this. Your advisor will be able to provide you with further information.

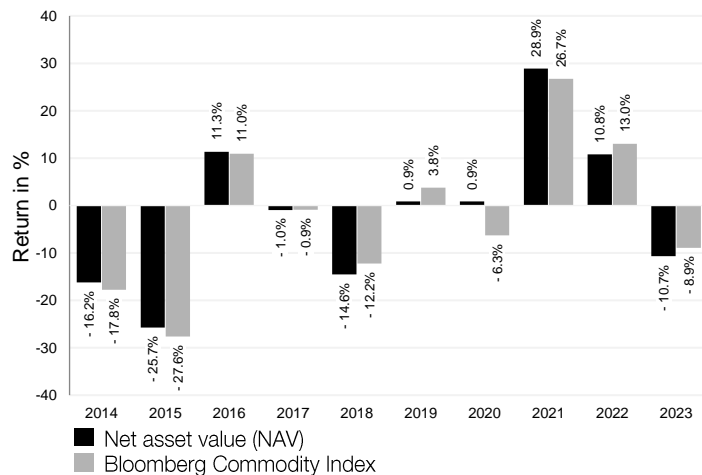

The ongoing charges are calculated at the end of the financial year. The figure may differ from year to year. It does not include:

Fees dependent on performance.

Transaction costs, except if the Fund has to pay issue and redemption fees to buy or sell other collective investments.

Further information on costs is provided in the full prospectus. This can be downloaded from the websites www.carnegroup.com and www.fundinfo.com.

Past performance

- Activation year of the share class: 2006
- Past performance provides no indication of current or future performance.
- The performance data refer to the net asset value. Fees incurred on issue, redemption or exchange (e.g. transaction and custody charges incurred by the investor) are not included.
- Past performance has been calculated in EUR.
- As of 24 November 2016, the COMMODITY FUND was renamed the JULIUS BAER COMMODITY FUND. However, the investment policy remained unchanged. As of 30 June 2017, the JULIUS BAER COMMODITY FUND was renamed the GAM Commodity. However, the investment policy remained unchanged.
- The performance data for the period prior to 24 January 2014 correspond to the performance data for the Multicooperation SICAV – COMMODITY FUND (EUR), a fund with the same investment objectives and the same investment policy, and which was merged with the fund on 24 January 2014. The EUR shareclass itself was launched upon this merger and did not have any previous performance history.
