Report of the Directors

The Board of Directors (the "Board" or the "Directors") submit their report together with the audited financial statements for the financial year ended 30 June 2024.

Principal Activities

GAM Star Fund p.l.c. (the "Company") was incorporated and registered in Ireland under the Companies Act 2014 as an investment company with variable capital on 20 February 1998 and is authorised by the Central Bank of Ireland ("the Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and is subject to the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations").

It is an umbrella type company, in that shares may be issued in relation to different funds (the "Funds") from time to time. A separate portfolio of assets will be maintained for each Fund and will be invested in accordance with the investment objective and policies applicable to such a Fund as set out in "Investments Objectives". Segregated liability exists between Funds.

Certain Funds are authorised for sale in Austria, Bahrain, Belgium, Bulgaria, Chile, Denmark, Finland, France, Germany, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, the Netherlands, Norway, Portugal, Singapore, Spain, Switzerland, Sweden, Taiwan and the United Kingdom.

Risk Management Objectives

Details of risk management objectives are shown in note 3.

Results and Distributions

The results and distributions for the financial year are stated in the Profit and Loss Account.

Significant events during the Financial Year

Please refer note 21 for further details.

Review of the Business and Future Developments

Please refer to the commentary of each Fund on the following pages for a review of each Fund's activities during the financial year.

Events since Financial Year End

Please refer note 22 for further details.

Directors

The Directors of the Company during the financial year ended 30 June 2024 were:

Andrew Bates Kishen Pattani Deborah Reidy

Directors' fees for the financial year are stated in note 9.

Directors' and Secretary's Interests

None of the Directors or Secretary or their families held any beneficial interest in the share capital of the Company during the financial year ended 30 June 2024.

Transactions Involving Directors

The Board are not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any interest as defined in the Companies Act 2014 at any time during the financial year from 1 July 2023 to 30 June 2024, other than as disclosed in note 9.

Transactions with Connected Persons (for the purposes of Central Bank of Ireland UCITS Regulation 43(1))

The Board are satisfied:

- (i) that there are arrangements (evidenced by written procedures) in place to ensure that all transactions with connected persons (for the purposes of the Central Bank of Ireland UCITS Regulation 43(1)) are conducted at arm's length and in the best interest of shareholders and
- (ii) that any transactions with connected persons entered into during the financial year complied with the obligation of (i) above as attested by GAM Fund Management Limited (the "Manager") through regular updates to the Board.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' Report and the financial statements in accordance with Irish law.

Irish law requires the Directors to prepare financial statements for each financial year. The Directors have prepared the financial statements in accordance with Financial Reporting Standard ("FRS") 102 and the UCITS Regulations.

Under Irish law the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with FRS 102 and ensure that they contain the additional information required by the Companies Act 2014; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the Company;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy; and
- enable the Directors to ensure that the financial statements comply with the Companies Act 2014 and enable those financial statements to be audited.

Statement of Directors' Responsibilities, continued

The Directors believe that they have complied with the requirement to maintain adequate accounting records through the Manager's engagement of the services of an experienced Delegate Administrator for the purpose of maintaining adequate accounting records.

The Directors are responsible for safeguarding the assets of the Company. In this regard they have entrusted the assets of the Company to the Depositary pursuant to the terms of a Depositary Agreement. The Directors have a general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

Corporate Governance

The Company is subject to and complies with Irish Statute comprising the Companies Act 2014, and the UCITS Regulations. The Company does not apply additional requirements in addition to those required by the above. Each of the service providers engaged by the Company is subject to their own corporate governance requirements.

Financial Reporting Process – Description of Main Features

The Board has delegated to the Manager the responsibility for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process whilst maintaining effective oversight of this process. Such systems are designed to manage rather than eliminate the risk of failure to achieve the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss. This includes appointing the Manager to maintain the accounting records of the Company independently of each of the Co-Investment Managers, Delegate Investment Managers and State Street Custodial Services (Ireland). The Manager has delegated this responsibility to the Delegate Administrator.

The Manager is contractually obliged to maintain adequate accounting records as required by the Amended and Restated Management Agreement dated 11 July 2017 as may be amended from time to time and in compliance with local laws. The Delegate Administrator is contractually obliged to maintain adequate accounting records as required by the Administration Agreement dated 6 March 2016 as may be amended from time to time and in compliance with local laws. To that end the Delegate Administrator performs regular reconciliations of its records to those of the Depositary. The Delegate Administrator is also contractually obliged to prepare for review and approval by the Board the annual report including financial statements intended to give a true and fair view.

The Board evaluates and discusses significant accounting and reporting issues as the need arises. The Board also assesses and evaluates the Delegate Administrator's financial accounting and reporting routines and further assesses and evaluates the external auditors' performance, qualifications and independence. The Manager has operating responsibility for internal control in relation to the financial reporting process and the Manager's report to the Board.

Risk Assessment

The Board is responsible for assessing the risk of irregularities whether caused by fraud or error in financial reporting and ensuring the processes are in place for the timely identification of internal and external matters with a potential effect on financial reporting. The Board has also put in place processes to identify changes in accounting rules and to ensure that these changes are accurately reflected in the Company's financial statements.

The Management of the Company acknowledges the military actions engaged by Russia in Ukraine and its potential to negatively impact the markets in which the Company's assets are invested. The ultimate impact on the Company remains uncertain and can vary according to the countries, asset classes, industry sectors and securities they are invested in. For the sub-fund GAM Sustainable Emerging Equity, the value of two Russian securities have been written off to 0(Nil) during the 2023 accounting period. These positions remained valued at nil during the 2024 accounting period. The decision has been taken as the securities were not listed on any regulated markets. This decision is in line with other market participants. The Manager and Co-Investment Managers are closely monitoring the impact of the war in Ukraine on the Company including any impact on liquidity and liquidity management, fair valuation procedures and investment compliance breaches.

Control Activities

The Manager and Delegate Administrator are contractually obliged to design and maintain control structures to manage the risks which the Board judges to be significant for internal control over financial reporting. These control structures include appropriate division of responsibilities and specific control activities aimed at detecting or preventing the risk of significant deficiencies in financial reporting for every significant account in the financial statements and the related notes in the Company's annual report. Examples of control activities exercised by the Manager and Delegate Administrator include approval of transactions, analytical procedures, reconciliations and automatic controls in IT systems. In the event that prices are not available from external independent sources, the Manager has approved the use of a pricing committee, comprised of certain Directors of the Manager and other members of GAM, to review and make decisions on the value of any securities that the Pricing department of the Delegate Administrator cannot determine. Any decisions are notified to the Board.

Information and Communication

The Company's policies and the Board's instructions with relevance for financial reporting are updated and communicated via appropriate channels, such as e-mail correspondence and meetings to ensure that all financial reporting information requirements are met in a complete and accurate manner.

Monitoring

The Board receives periodic presentations and review reports from the Depositary, each of the Co-Investment and Delegate Investment Managers, the Manager and the Delegate Administrator as appropriate. The Board also has an annual process to ensure that appropriate measures are taken to consider and address the shortcomings identified and measures recommended by the independent auditors.

Given the contractual obligations on the Manager and the Delegate Administrator, the Board has concluded that there is currently no need for the Company to have a separate internal audit function or an audit committee in order for the Board to perform effective monitoring and oversight of the internal control and risk management systems of the Company in relation to the financial reporting process.

Shareholder Meetings

The General Meetings of the Company are held in Ireland. Twenty one days notice is given in respect of each general meeting. A proxy may attend on behalf of any shareholder. An ordinary resolution is a resolution passed by a plurality of votes cast and a special resolution is a resolution passed by a majority of 75% or more of the votes cast.

Each of the shares entitles the holder to attend and vote at meetings of the Company. Matters may be determined by a meeting of shareholders on a show of hands unless a poll is requested. Each shareholder has one vote on a show of hands. Each share gives the holder one vote in relation to any matters relating to the Company which are submitted to shareholders for a vote by poll.

No class of shares confers on the holder thereof any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other share class or any voting rights in relation to matters relating solely to any other share class.

Any resolution to alter the class rights of the shares requires the approval of three quarters of the holders of the shares represented or present and voting at a general meeting of the class. The quorum for any general meeting of the class convened to consider any alteration to the class rights of the shares shall be such number of shareholders being two or more persons whose holdings comprise one third of the shares.

Each of the shares other than subscriber shares entitles the shareholder to participate equally on a pro-rata basis in the dividends and net assets of the fund in respect of which the shares have been issued, save in the case of dividends declared prior to becoming a shareholder.

Subscriber shares entitle the shareholders holding them to attend and vote at all general meetings of the Company but do not entitle the holders to participate in the dividends or net assets of the Company.

Composition and Operation of Board and Committees

There are currently two directors who are non-executive and one independent non executive. None of the Directors have entered into an employment or service contract with the Company. The Articles of Association do not provide for retirement of Directors by rotation. However, the Directors may be removed by the shareholders by ordinary resolution in accordance with the procedures established under the Companies Act 2014. Currently the Board meets at least quarterly. There are no standing sub-committees of the Board however sub committees of 2 Directors can convene on an ad hoc basis if required to do so.

Accounting Records

The measures taken by the Board to secure compliance with the Company's obligations to keep adequate accounting records are the use of appropriate systems and procedures and the employment of competent persons. The Board have appointed the Manager for the purpose of maintaining accounting records. The Manager has delegated these responsibilities effective from 7 March 2016 to State Street Fund Services (Ireland) Limited as Delegate Administrator. Accordingly, the books of account are kept at 78 Sir John Rogerson's Quay, Dublin 2, Ireland.

The integrity of these financial statements published on www.gam.com remain the responsibility of the Board.

Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Relevant Audit Information

In accordance with section 330 and 332 of the Companies Act 2014, the Directors confirm that all audit information relating to the Company has been made available to PricewaterhouseCoopers.

In accordance with section 330 of the Companies Act 2014, the Directors have taken all steps that ought to have been taken by the Board in order to make themselves aware of any relevant audit information and to establish that PricewaterhouseCoopers are aware of that information.

Directors Compliance Statement

In accordance with Section 225 of the Companies Act 2014, the Directors:

- (a) acknowledge that they are responsible for securing the Company's compliance with its relevant obligations, as defined by the Companies Act 2014; and
- (b) confirm that
 - a compliance policy statement has been prepared setting out the Company's policies (that, in the Directors' opinion, are appropriate to the Company) for ensuring compliance by the Company with its relevant obligations;
 - adequate structures are in place, that in the Directors' opinion, are designed to secure material compliance with the Company's relevant obligations; and
 - iii) an annual review procedure has been put in place to review the Company's relevant obligations and ensure a structure is in place to comply with these obligations.

Independent Auditors

The independent auditors, PricewaterhouseCoopers, have indicated their willingness to remain in office in accordance with section 383(2) of the Companies Act 2014.

Approval of Financial Statements

These financial statements were approved by the Board of Directors on 24 October 2024.

On behalf of the Board of Directors:

Subser

Director 24 October 2024

Director

Investment Objectives (unaudited)

The investment objectives of each Fund are set out below.

GAM Star Alpha Spectrum

The investment objective of the Fund is to seek to achieve an attractive return on capital while simultaneously attempting to limit the risk of capital loss. The Fund aims to achieve this investment objective by gaining exposure to equity, equity hedge, fixed income and trading strategies. Such exposure may be achieved directly and/or through financial derivative instruments and/or investment in open - ended collective investment schemes deploying equity long only, equity hedge, fixed income and trading strategies.

GAM Star Alpha Technology

The investment objective of the Fund is to achieve long term capital appreciation. The Fund seeks to achieve this objective by taking long and short positions primarily in equities or equity related derivative contracts of technology related companies. Such companies will be listed on or dealt in Recognised Markets globally (including in Emerging Markets as described in the Prospectus) and up to 10% of its Net Asset Value ("NAV") may be invested in unlisted equities of such companies.

GAM Star Asian Equity

The investment objective of the Fund is to achieve capital appreciation through investment primarily in quoted securities which are issued by public companies with principal offices or significant business activities in the Asian region, excluding Japan.

GAM Star Global Balanced

The investment objective of the Fund is to seek to achieve an attractive return on capital while simultaneously attempting to limit the risk of capital loss. This investment objective may be achieved primarily through investment in open-ended collective investment schemes which gain exposure to equities, fixed income securities, property, commodities and currencies as set out in the Prospectus. The Fund will not invest in closed-ended collective investment schemes. The Fund will not invest directly in property or commodities and such indirect exposure shall be generated as described in the Prospectus.

GAM Star Capital Appreciation US Equity

The investment objective of the Fund is to achieve long-term capital appreciation. It will be the policy of the Fund to invest primarily in equities and other equity related securities (including preferred shares, convertible bonds, American Depositary Receipts and exchange traded funds) which are issued by companies with principal offices in the United States of America, which exercise their primary economic activity in the United States of America, or which are listed on or dealt in a Recognised Market in the United States of America.

GAM Star Cat Bond

The investment objective of the Fund is to seek to generate returns through selective investment in a global portfolio of catastrophe bonds ("Cat Bonds"). Cat Bonds are debt securities that transfer the risk of catastrophic events from insurance companies, reinsurance companies, corporations, governments, etc. to the capital markets.

GAM Star Global Cautious

The investment objective of the Fund is to seek to achieve long term capital growth with lower volatility than a fund which invests solely in equities. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, fixed income securities, property, commodities and currencies as set out in the Prospectus. The Fund will not invest in closed-ended collective investment schemes.

GAM Star China Equity

The investment objective of the Fund is to achieve capital appreciation through investment primarily in quoted equity securities listed on or dealt in any Recognised Market and which are issued by companies with principal offices or significant business activities in the People's Republic of China and Hong Kong.

GAM Star Composite Global Equity

The investment objective of the Fund is to achieve long term capital appreciation with the aim of generating a capital return in excess of global equity markets over the medium to long term. The Fund intends to pursue its investment objective by gaining exposure principally to equity and equity related strategies. Such exposure may be achieved directly by investing in equities and equity related securities and/or indirectly through financial derivative instruments and/or investment in open ended collective investment schemes deploying equity long only and equity hedge strategies. The Fund may also invest in exchange traded funds which are listed or traded on Recognised Markets worldwide in order to gain exposure to such strategies. The Fund may also invest in unlisted collective investment schemes in accordance with the provisions of the UCITS Regulations.

GAM Star Continental European Equity

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity and equity related securities (including but not limited to warrants), listed on or dealt in Recognised Markets within the EU which are issued by companies with principal offices in Europe other than the United Kingdom.

GAM Star Credit Opportunities (EUR)

The investment objective of the Fund is to achieve long-term capital gain in Euro. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

GAM Star Credit Opportunities (GBP)

The investment objective of the Fund is to achieve long-term capital gain in Sterling. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

GAM Star Credit Opportunities (USD)

The investment objective of the Fund is to achieve long-term capital gain in US dollars. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

GAM Star Global Defensive

The investment objective of the Fund is to seek to achieve long term capital growth. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, fixed income securities, property, commodities and currencies as set out in the Prospectus. The Fund will not invest in closed-ended collective investment schemes.

GAM Star Global Dynamic Growth

The investment objective of the Fund is to seek to achieve long term capital growth. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, fixed income securities, property, commodities and currencies as set out in the terms of the Prospectus. The Fund will not invest in closed-ended collective investment schemes. The Fund will not invest directly in property or commodities and such indirect exposure shall be generated as described in the terms of the Prospectus.

GAM Sustainable Emerging Equity

The investment objective of the Fund is to achieve long term capital appreciation. The Fund seeks to achieve this objective through investing primarily in equity and equity related securities (such as warrants and rights issues) of companies listed on or dealt in Recognised Markets in Emerging Markets or which are listed on or dealt in Recognised Markets outside of the Emerging Markets but which generate the bulk of their earnings in Emerging Markets.

GAM Star Emerging Market Rates

The investment objective of the Fund is to achieve an attractive risk-adjusted return, whilst actively managing downside risk (such as bond market and currency risk), through investment in a portfolio of local and hard currency bonds and other fixed income securities from emerging markets (as hereinafter defined) worldwide.

GAM Star European Equity

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity securities issued by companies with principal offices in Europe, including Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Russia, Spain, Sweden, Switzerland, Turkey and the United Kingdom. It will be the policy of the Fund to invest primarily in equities.

GAM Star Flexible Global Portfolio

The investment objective of the Fund is to achieve capital appreciation by gaining exposure to one or more of the following asset classes: financial indices, open-ended collective investment schemes, exchange traded funds, exchange traded commodities, property, fixed income securities, equities, equity related securities, derivative instruments, cash, cash equivalents, money market instruments and closed-ended funds. Allocations will be made at the Co-Investment Manager's discretion, both within each asset class and among the asset classes. The Fund need not be invested in any or all of the asset classes at any one time.

GAM Star GAMCO US Equity

(Merged into GAM Star Capital Appreciation US Equity on 12 December 2018, and is no longer available for investment.)

The investment objective of the Fund was to achieve long-term capital appreciation. It was the policy of the Fund to invest primarily in a diversified portfolio of equities (i) issued by companies with principal offices in the United States of America and/or (ii) which were listed on Recognised Markets in the United States of America. Whilst the Fund primarily invested in the equities described above, it could also invest in other equities listed on Recognised Markets worldwide.

GAM Star Global Rates

The investment objective of the Fund is to achieve absolute returns. The Fund employs a process of economic analysis to identify fundamental trends within both the fixed income and global currency markets. There are both medium term and short term based themes involved in the Fund's strategy.

GAM Star Global Selector

(Merged into GAM Star Worldwide Equity on 22 January 2020, and is no longer available for investment.)

The investment objective of the Fund was to achieve long term capital appreciation by investing primarily in a focused, concentrated portfolio of worldwide quoted equity and equity related securities (including, but not limited to warrants), listed on or dealt in Recognised Markets on a worldwide basis.

GAM Star Global Growth

The investment objective of the Fund is to seek to achieve long term capital growth. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, fixed income securities, property, commodities and currencies as set out in the Prospectus. The Fund will not invest in closed-ended collective investment schemes. The Fund will not invest directly in property or commodities and such indirect exposure shall be generated as described in the terms of the Prospectus.

GAM Star Interest Trend

The investment objective of the Fund is to achieve long-term capital appreciation in US dollars. The Fund aims to achieve its investment objective through investment principally in income bearing securities which are expected to generate fixed income payments and also selectively make capital gains from trends in interest rates. Such instruments include government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent convertible notes.

GAM Star Japan Leaders

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity securities in Japan issued by companies with principal office in Japan. It will be the policy of the Fund to invest primarily in equities.

GAM Star MBS Total Return

The Fund's primary investment objective is to seek to generate returns through selective investment in a diversified portfolio of mortgage-backed debt securities ("MBS") and asset-backed debt securities ("ABS"). The Fund may also invest to a lesser extent in debt securities (such as bonds and notes) issued by corporations and governments. Such debt securities may pay fixed, floating and inverse floating rates of interest and may include zero coupon obligations.

GAM Systematic Alternative Risk Premia

(Terminated 6 April 2023, and is no longer available for investment.) The investment objective of the Fund was to provide consistent above-average, risk-adjusted returns on capital with a low long term correlation with traditional asset classes such as equities and bonds. The investment objective was achieved by the Co-Investment Manager by gaining exposure directly or indirectly using financial derivatives instruments to the following four asset classes i.e. equities (which will be listed or traded worldwide), fixed income (i.e. fixed income securities), Currencies and Commodities.

GAM Star Tactical Opportunities

The investment objective of the Fund is to seek to achieve capital appreciation via unconstrained tactical asset allocation. The Fund aims to achieve this investment objective by gaining exposure either directly or indirectly through the use of derivatives to a range of asset classes including equities, fixed income securities, currencies, commodities and property as described in the Prospectus. The Fund will not invest directly in property or commodities.

GAM Star Disruptive Growth

The investment objective of the Fund is to achieve long-term capital appreciation. It will be the policy of the Fund to invest primarily in a globally diversified portfolio of technology related companies. The Fund seeks to achieve this objective through investing primarily in equity and equity related securities (such as warrants and rights issues) of companies listed on or dealt in Recognised Markets worldwide, and up to 10% of its net assets in unlisted equities, in each case which demonstrate long term growth opportunities within the broader technology sector or whose business models are driven by new technologies. The Fund may also seek to gain exposure to such companies through the use of financial derivative instruments described in the Prospectus.

GAM Star US All Cap Equity

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted securities in the United States of America issued by companies with principal offices in the United States of America. The Fund will invest in a broad spread of equities, and may invest in fixed income securities and preferred stock listed on or dealt in a Recognised Market in the United States of America. It will be the policy of the Fund to invest primarily in equities.

GAM Star Worldwide Equity

The investment objective of the Fund is to provide capital appreciation primarily through investment in quoted securities on a worldwide basis. It will be the normal policy of the Fund to invest primarily in equities.

GAM Sustainable Climate Bond

The investment objective of the Fund is to achieve long-term income and capital gain in Euro, by investing in "Impact Bonds" with a positive environmental or social impact. Impact Bonds are bonds which have a specific environmental, social and governance ("ESG") purpose. The Fund will seek to achieve its investment objective through investment principally in such Impact Bonds issued by companies in the financial sector which aim to generate social and/or environmental impact alongside a financial return. The Fund may invest in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred Shares, convertible securities and contingent capital notes, provided such fulfil the definition of an Impact Bond.

GAM Star Fund p.l.c.

General

In addition, please note the following in relation to the investment objectives and policies of the Funds:

(i) any Fund, the name of which contains a reference to a specific type of security, country or region will invest at least two thirds of its non-liquid assets* in that specific type of security, country or region;

(ii) any Fund, the name of which contains a specific reference to a specific currency, will invest at least two thirds of its non-liquid assets in securities denominated in that specific currency;

(iii) where the investment policy of a Fund states that investments are made "primarily" in a specific type of security, country or region, that Fund will invest either directly or indirectly (through the use of financial derivative instruments) at least two thirds of its non-liquid assets in that specific type of security, country or region;

(iv) where the investment policy of a Fund refers to investments in companies of a specific country or region, this means (in the absence of any other definition) that these companies will have their registered office in the specific country or region stated, notwithstanding their being listed on any stock exchange mentioned in the investment policy of the Fund.

* Non-liquid assets refers to all assets of any Fund other than cash.

GAM Star Alpha Spectrum

30 June 2024

Commentary (Unaudited)

Market backdrop

Global stock markets delivered robust returns over the year under review. US equities were the star performers, driven by encouraging corporate earnings and the easing of inflation, with leading technology stocks recording very strong gains, in part due to Artificial Intelligence-related optimism. European, Asia-Pacific and Emerging Market equities also generated solid gains over the review year.

However, bond markets produced more muted returns; during H2 2023 optimism grew over the prospect for interest rate cuts, although expectations were broadly scaled back in H1 2024. Over the review year, the yield on the benchmark US 10-year Treasury note rose from 3.9% to 4.4%. However, credit markets outperformed their government counterparts, with confidence in the corporate earnings outlook supporting a narrowing of credit spreads.

Performance

The GAM Star Alpha Spectrum EUR Fund rose in value by 16.4%, compared to a 3.9% gain in the Average EUR one-month Deposit Rate Return.

Portfolio positioning

Over the period we sought to structurally position the portfolio to take advantage of the superior real returns that stocks can offer over time, offset by sensible diversifying allocations sized correctly according to each investor's long-term risk appetite. We are broadly engaged in equities across our strategies given the aforementioned tailwinds the US market enjoys. combined with the fact that it dominates global equity indices (66% of MSCI AC World). Within the equity allocation our starting point is simple, transparent exposure to global stocks. This could be in the form of index funds, thematic groupings of direct securities or carefully selected active security selection managers as we see appropriate. Our regional emphasis within the equity sleeves is unashamedly on the US versus most other markets. While we take a more 'neutral' view on emerging markets and accept the long-term opportunity in China, we also note the potential disruption from trade wars, geopolitical risks including around Taiwan as well as structural economic challenges in the world's second largest economy. As such, we have taken advantage of the limited stabilisation in the Chinese stock market seen in the last couple of months to trim our position there and re-allocate to liquidity in the short term. We are also less enthused with Europe (and the UK) given the political turbulence described and the way that said turbulence is driving volatility in a way that it simply is not in the US.

Away from stocks, we continue to focus on short-dated government bills across the main currency classes given the unbeatable risk-adjusted returns versus nearly all other alternatives. Allocations to longer-dated government bonds also serve as additional 'crash protection' in the event of an extreme geopolitical or market event while also offering the prospect of capital appreciation given already-high yields. The 10-year US Treasury bond, for example, offers a relatively high (by the standards of the last 15 years at least) yield of approximately 4.4%. Exposure to these risk-free assets is complemented by selective allocations to insurance-linked securities, mortgage-backed securities, ultra short-dated investment grade bonds and well-researched subordinated financial bonds. We are also looking to potentially include further corporate bond structures in the coming months. In alternative investments, where we are slightly more wary of the possibility of inconsistency at the wrong moment, we hold a single well risk-managed US equity long/short fund. Finally, in tactical asset allocation we continue to hold US Treasury bills, partly as a defence against the possibility of a market correction but also to keep powder dry for re-engaging in stocks in the aftermath of such an event.

Outlook

Looking ahead, the upcoming November US Presidential election poses a significant challenge to America's exceptionalism amid a deeply divided culture. Despite some political uncertainty, historical data shows that US presidential elections have generally not impacted the S&P 500 Index significantly, except during extreme events like the 2000 and 2008 elections. Currently, strong consumer spending, improving productivity, and good corporate profitability suggest that the US stock market will focus on fundamentals. Although the US budget deficit is high, the country benefits

from unique financing and currency privileges. In contrast, Europe and the UK face challenges due to lack of fiscal and banking union and productivity issues, respectively. Emerging markets must navigate China-specific risks and a strong US dollar, which attracts global capital. Despite global economic diversity, the prospect of another American decade remains strong.

Commentary (Unaudited)

Market backdrop

Technology equities posted strong gains over the 12 months under review, boosted by optimism that falling global inflation could herald interest rate cuts, and broader enthusiasm for the theme of Artificial Intelligence (AI). Against the backdrop of robust gains in the US stock market, with megacaps at the forefront of the rally, US technology stocks, especially those most closely associated with AI, performed very strongly amid a clamour to acquire the latest, most powerful AI chipsets, including those facilitating applications such as corporate chatbots. The effects of Al-related fervour were also reflected in strong demand for memory, with a range of Korean and Taiwan-based companies also enjoying healthy share price gains over the period. Meanwhile, amid ongoing Al-adoption, both semiconductor producers and semiconductor equipment manufacturers benefited from positive demand trends. Software stocks generally delivered solid gains, reflecting revenue growth from the Software as a Service (or SaaS) cloud model amid buoyant customer demand for the integration of new features to improve productivity. Following the broad selloff during 2022, enthusiasm for cryptocurrencies returned in late 2024, prompting an upturn in interest in the wider crypto ecosystem, including trading platforms and payment processors.

Performance

The GAM Star Alpha Technology Fund (USD Z class) rose by 19.3% over the review period, compared to the 5.6% gain in the Average One-Month USD Deposit Rate Return and 20.2% rise in the MSCI World Index (USD).

Portfolio

Having largely followed wider global equities' swings during the third quarter of 2023, the portfolio participated in the powerful tech-led rally in world markets into the turn of the calendar year. Our decentralised finance (DeFi) strategy was a key driver of the portfolio's returns during the fourth quarter amid market expectation that Bitcoin ETFs could gain imminent approval from the US Securities and Exchange Commission (SEC). However, taking the view that the market's anticipation of good news had left the shares fully valued, we took profits at the end of December in both Coinbase and MicroStrategy, bringing the portfolio weightings closer to a neutral level relative to the benchmark.

The market's positive tone extended into early 2024, with much-improved sentiment towards Chinese equities - driven in part by optimism over measures to address the woes of the real estate sector - helping to drive gains in Full Truck Alliance, Trip.com and PDD, all of which were overweight holdings in the portfolio. Taking the view that valuations remained attractive in the Chinese market, we added exposure to JD,com and Tencent. We also re-established a holding in trading platform Plus 500, taking the view that strong results and a robust outlook statement pointed to strong momentum across the main business lines. On the sales side, among hardware stocks, we took some profits in Dell following a robust rally in the wake of its full-year results and what we regarded as some over-excitement on Al server momentum. We also trimmed AMD and Marvell as the revenue growth gap with Nvidia has proved slower to close than we anticipated.

Outlook

Markets have shown us that they can behave in apparently irrational ways. This may well be one such period. Although there are positive signals from technical indicators - volatility has spiked sharply to levels not seen since the pandemic and the Global Financial Crisis which often pre-signals a bottom in markets and key index futures have bounced off 200-day moving averages - the road may not yet be all-clear. We believe that if we get a harder economic landing, then the market can well pull back further - there is still a lot of excess in the most popular trades that needs to be washed out. In our opinion, the most likely H2 outcome is that rotation will continue, and the best performing portfolios will be those built on a combination of strong fundamentals, valuation and technical analysis of the rotation impact. The 2024 first half winners may not be those of the second half.

GAM Star Asian Equity

Fund Manager: Jian Shi Cortesi

30 June 2024

Commentary (Unaudited)

Market backdrop

The MSCI Asia ex-Japan Index (USD net) delivered a good return from 30 June 2023 to 30 June 2024, with a growth of 12.9%. The index drifted lower in the second half of 2023, and then rallied in the spring of 2024. Expectations of US interest rate cuts, supportive Chinese economic policies and Al-driven technology demand boosted investor sentiment for Asian equity. Taiwan and India led the gain, while Thailand, Indonesia and the Philippines lagged the most. Among sectors, information technology, energy and utilities were particularly strong during this period, while real estate was the weakest sector.

Performance/Portfolio

The GAM Star Asian Equity Fund (USD Accumulation class) rose 5.8% from 30 June 2023 to 30 June 2024, but underperformed the MSCI Asia ex-Japan Index. The fund's overweight in China and underweight in India contributed negatively to the fund's performance. On the other side, the underweight in southeast Asian markets added value. In terms of stock selection, there was positive contribution from Taiwan and Southeast Asian markets. Stock selection in China, India and South Korea detracted from the fund's performance. In terms of sectors, the overweight in information technology and the underweight in consumer staples and real estate added value. However, stock selection detracted, particularly in financials and consumer discretionary. During the reporting period, the fund took advantage of sector and stock rotation and made adjustment to stock positions on an on-going basis. In this process, the fund reduced exposure to financials and healthcare, and increased exposure to consumer discretionary and utilities.

Outlook

Emerging Asia equity trades at considerable valuation discount to developed markets, despite better economic growth and earnings growth outlook. We expect further Chinese stimulus to support economic recovery and stock price performance. Weak external demand remains a key risk. But the rise of Al is expected to boost demand for Asia technology hardware. The fund is positioned in recovery names as well as beaten-down growth stocks in consumer and innovation.

GAM Star Global Balanced

Fund Manager: Andrea Quapp/Fabio Di Grezia/Daniel Rossacher/Sandra Wolfensberger

30 June 2024

Commentary (Unaudited)

Market backdrop

Global stock markets delivered robust returns over the year under review. US equities were the star performers, driven by encouraging corporate earnings and the easing of inflation, with leading technology stocks recording very strong gains, in part due to Artificial Intelligence-related optimism. European, Asia-Pacific and Emerging Market equities also generated solid gains over the review year.

However, bond markets produced more muted returns; during H2 2023 optimism grew over the prospect for interest rate cuts, although expectations were broadly scaled back in H1 2024. Over the review year, the yield on the benchmark US 10-year Treasury note rose from 3.9% to 4.4%. However, credit markets outperformed their government counterparts, with confidence in the corporate earnings outlook supporting a narrowing of credit spreads.

Performance

The GAM Star Global Balanced Fund (GBP II Accumulation class) rose in value by 10.8%, compared to a 9.2% gain in the Lipper Global Mixed Asset GBP Balanced benchmark.

Portfolio positioning

Over the period we sought to structurally position the portfolio to take advantage of the superior real returns that stocks can offer over time, offset by sensible diversifying allocations sized correctly according to each investor's long term-risk appetite. We are broadly engaged in equities across all our strategies given the aforementioned tailwinds the US market enjoys, combined with the fact that it dominates global equity indices (66% of MSCI AC World). Within the equity allocation our starting point is simple, transparent exposure to global stocks. This could be in the form of index funds, thematic groupings of direct securities or carefully selected active security selection managers as we see appropriate. Our regional emphasis within the equity sleeves is unashamedly on the US versus most other markets. While we take a more 'neutral' view on emerging markets and accept the long-term opportunity in China, we also note the potential disruption from trade wars, geopolitical risks including around Taiwan as well as structural economic challenges in the world's second largest economy. As such, we have taken advantage of the limited stabilisation in the Chinese stockmarket seen in the last couple of months to trim our position there and re-allocate to liquidity in the short term. We are also less enthused with Europe (and the UK) given the political turbulence described and the way that said turbulence is driving volatility in a way that it simply is not in the US. Away from stocks, we continue to focus on short-dated government bills across the main currency classes given the unbeatable risk-adjusted returns versus nearly all other alternatives. Exposure to these risk-free assets is complemented by selective allocations to mortgage-backed securities, ultra short-dated investment grade bonds and well-researched subordinated financial bonds. In alternative investments, where we are slightly more wary of the possibility of inconsistency at the wrong moment, we hold a single well risk-managed US equity long/short fund.

Outlook

Looking ahead, the upcoming November US Presidential election poses a significant challenge to America's exceptionalism amid a deeply divided culture. Despite some political uncertainty, historical data shows that US presidential elections have generally not impacted the S&P 500 Index significantly, except during extreme events like the 2000 and 2008 elections. Currently, strong consumer spending, improving productivity, and good corporate profitability suggest that the US stock market will focus on fundamentals. Although the US budget deficit is high, the country benefits from unique financing and currency privileges. In contrast, Europe and the UK face challenges due to lack of fiscal and banking union and productivity issues, respectively. Emerging markets must navigate China-specific risks and a strong US dollar, which attracts global capital. Despite global economic diversity, the prospect of another American decade remains strong.

30 June 2024

Commentary (Unaudited)

Market backdrop

US equities (+24.6%) surged during the one-year period ending 30 June 2024 as the S&P 500 Index registered a series of record highs, driven by better-than-expected corporate earnings, an encouraging economic outlook and the anticipation of interest rate cuts. Sizable gains in a select group of mega-cap technology companies resulted in a significant performance differential between the market-cap weighted S&P 500 Index and the equal-weighted version of the index, as well as the considerable outperformance of growth stocks versus their value counterparts. Latest economic data released during the second quarter of 2024 suggested that the economy continued to gradually moderate.

Performance

During the one-year period, the GAM Star Capital Appreciation US Equity Fund (USD Accumulation class) rose by 22.3% compared to a gain of 24.6% in the S&P 500 Gross Total Return Index.

Portfolio

Security selection was the primary driver of relative outperformance as strong selection within the information technology and financials sectors was partially offset by weaker selection within the health care and energy sectors. At the issuer level, the top relative contributors to benchmark-relative performance during the period included our overweight exposures to Qualcomm and Micron Technology. We increased our overweight exposures to both Qualcomm and Micron Technology as of the end of the period. The top relative detractors from benchmark-relative performance during the period included our overweight exposures to Schlumberger and Humana. We increased our overweight exposures to both Schlumberger and Humana as of the end of the period. Sector allocation, a residual of our bottom-up stock selection process, detracted from relative performance. Our overweight exposures to consumer discretionary and financials contributed.

Sector exposure is an indication of where the portfolio managers are finding compelling investment ideas with changes often modest. The fund was most overweight consumer staples and energy and most underweight consumer discretionary and financials at the end of the period.

Outlook

Looking ahead to the second half of 2024, we expect macroeconomic uncertainties such as evolving inflation data, central bank decisions, global election cycles and geopolitical tensions to drive investor sentiment. As these developments unfold, we seek to balance risk in the portfolio across diversifying strategic exposures, and we look to the underlying idea sponsors who conduct fundamental company research to distinguish stock-level opportunities. As the financial landscape shifts, we believe our edge lies in our long-lived commitment to comprehensive risk management.

30 June 2024

Commentary (Unaudited)

Market backdrop

The 2023-2024 period might best be described as a year of payback to insurance-linked securities (ILS) investors and the reinsurance market. ILS market returns in 2022 were down due to spread widening and Hurricane Ian, but those losses were largely recouped in 2023 and the positive performance continued into 2024. Of course, returns were aided by an absence of any major catastrophes during the period: that absence is not unusual, but it has not felt that way over the past few years.

Performance

The Fund's NAV (as measured by the USD Accumulation Class) saw performance from June 2023 to June 2024 rise by 12.5%, compared with the EurekaHedge ILS Index's return being a rise of 12.0% over the same period. The returns were primarily driven by i) reinvestment of maturity proceeds into a much more favourable spread environment and, ii) the portfolio benefiting from spread tightening at certain points in the period.

Portfolio changes

As one would expect from such an active year, there were a significant number of changes to the underlying holdings in the portfolio. Over the last few years, the risk profile of the portfolio had been fairly stable. By risk contribution, Florida Hurricane remains the dominant exposure of the fund, while Texas Hurricane took over from California Earthquake as the second biggest exposure. However, throughout 2023 and into 2024, we continued to reduce our exposure to Florida Hurricane risk. All this was achieved while reducing the expected loss of the fund and keeping portfolio spreads generally at, or above 1000 bps.

Outlook

Portfolio spreads will likely tighten as investors receive coupon interest and seek to put that money to work in the secondary markets (which typically have low supply in summer). There is talk of investors profit taking ahead of the heart of the hurricane season since forecasters are calling for severe activity, so this could offset the coupon driven demand. Either way, spread changes during the summer have little impact on post-hurricane spreads in a normal season.

GAM Star Global Cautious

Fund Manager: Andrea Quapp/Fabio Di Grezia/Daniel Rossacher/Sandra Wolfensberger

30 June 2024

Commentary (Unaudited)

Market backdrop

Global stock markets delivered robust returns over the year under review. US equities were the star performers, driven by encouraging corporate earnings and the easing of inflation, with leading technology stocks recording very strong gains, in part due to Artificial Intelligence-related optimism. European, Asia-Pacific and Emerging Market equities also generated solid gains over the review year.

However, bond markets produced more muted returns; during H2 2023 optimism grew over the prospect for interest rate cuts, although expectations were broadly scaled back in H1 2024. Over the review year, the yield on the benchmark US 10-year Treasury note rose from 3.9% to 4.4%. However, credit markets outperformed their government counterparts, with confidence in the corporate earnings outlook supporting a narrowing of credit spreads.

Performance

The GAM Star Global Cautious Fund (GBP Accumulation class) rose in value by 10.1%, compared to a 7.5% gain in the Lipper Global Mixed Asset GBP Conservative benchmark.

Portfolio positioning

Over the period we sought to structurally position the portfolio to take advantage of the superior real returns that stocks can offer over time, offset by sensible diversifying allocations sized correctly according to each investor's long term-risk appetite. We are broadly engaged in equities across all our strategies given the aforementioned tailwinds the US market enjoys, combined with the fact that it dominates global equity indices (66% of MSCI AC World). Within the equity allocation our starting point is simple, transparent exposure to global stocks. This could be in the form of index funds, thematic groupings of direct securities or carefully selected active security selection managers as we see appropriate. Our regional emphasis within the equity sleeves is unashamedly on the US versus most other markets. While we take a more 'neutral' view on emerging markets and accept the long-term opportunity in China, we also note the potential disruption from trade wars, geopolitical risks including around Taiwan as well as structural economic challenges in the world's second largest economy. As such, we have taken advantage of the limited stabilisation in the Chinese stockmarket seen in the last couple of months to trim our position there and re-allocate to liquidity in the short term. We are also less enthused with Europe (and the UK) given the political turbulence described and the way that said turbulence is driving volatility in a way that it simply is not in the US. Away from stocks, we continue to focus on short-dated government bills across the main currency classes given the unbeatable risk-adjusted returns versus nearly all other alternatives. Exposure to these risk-free assets is complemented by selective allocations to mortgage-backed securities, ultra short-dated investment grade bonds and well-researched subordinated financial bonds. In alternative investments, where we are slightly more wary of the possibility of inconsistency at the wrong moment, we hold a single well risk-managed US equity long/short fund.

Outlook

Looking ahead, the upcoming November US Presidential election poses a significant challenge to America's exceptionalism amid a deeply divided culture. Despite some political uncertainty, historical data shows that US presidential elections have generally not impacted the S&P 500 Index significantly, except during extreme events like the 2000 and 2008 elections. Currently, strong consumer spending, improving productivity, and good corporate profitability suggest that the US stock market will focus on fundamentals. Although the US budget deficit is high, the country benefits from unique financing and currency privileges. In contrast, Europe and the UK face challenges due to lack of fiscal and banking union and productivity issues, respectively. Emerging markets must navigate China-specific risks and a strong US dollar, which attracts global capital. Despite global economic diversity, the prospect of another American decade remains strong.

Fund Manager: Jian Shi Cortesi

30 June 2024

Commentary (Unaudited)

Market backdrop

The MSCI China 10/40 Gross Total Return Index (USD) had a lacklustre performance from 30 June 2023 to 30 June 2024, with a decline of 2.4%. The index drifted lower in the second half of 2023, and then bottomed out in January and recovered most of the lost ground in the spring of 2023. A series of favourable Chinese economic policies offered support for the stock market. However, many investors were still waiting for stronger market momentum before buying into China. Energy, utilities and financials were particularly strong during this period, while healthcare, real estate and consumer staples declined significantly.

Performance and Portfolio

The GAM Star China Equity Fund (USD Accumulation class) saw a small decline of 5.6% during the reporting period, underperforming the MSCI China 10/40 Index. The fund focuses on opportunities in sectors related to China's new growth model, including technology, consumer, healthcare, and environmental protection. As a result, the fund was overweight in consumer and healthcare, and underweight in energy and utilities. Such positioning contributed negatively during the reporting period. Stock selection in consumer discretionary added considerable value to the fund's performance, offset by the negative impact from stock selection in financials and information technology. During the reporting period, the fund took advantage of sector and stock rotation and made adjustment to stock positions on an on-going basis. In this process, the fund reduced exposure to consumer discretionary, information technology and utilities.

Outlook

Low valuations remain positive to Chinese equity, at the end of June 2024, the MSCI China Index is still more than 50% below the previous peak seen in 2021. Company shares buybacks and government measures to support the property market are positive drivers. We expect further government stimulus to support stock prices. The fund is positioned in recovery names as well as beaten-down growth stocks in consumer and innovation.

GAM Star Composite Global Equity

Fund Manager: Andrea Quapp/Fabio Di Grezia/Daniel Rossacher/Sandra Wolfensberger

30 June 2024

Commentary (Unaudited)

Market backdrop

Global stock markets delivered robust returns over the year under review. US equities were the star performers, driven by encouraging corporate earnings and the easing of inflation, with leading technology stocks recording very strong gains, in part due to Artificial Intelligence-related optimism. European, Asia-Pacific and Emerging Market equities also generated solid gains over the review year.

However, bond markets produced more muted returns; during H2 2023 optimism grew over the prospect for interest rate cuts, although expectations were broadly scaled back in H1 2024. Over the review year, the yield on the benchmark US 10-year Treasury note rose from 3.9% to 4.4%.

Performance

The GAM Star Composite Global Equity Fund USD (USD Accumulation class) rose in value by 18.6%, compared to a 19.9% gain in the MSCI AC World USD Gross Total Return benchmark.

Portfolio positioning

Over the period we sought to structurally position the portfolio to take advantage of the superior real returns that stocks can offer over time, offset by sensible diversifying allocations sized correctly according to each investor's long term risk appetite. We are broadly engaged in equities across all our strategies given the aforementioned tailwinds the US market enjoys, combined with the fact that it dominates global equity indices (66% of MSCI AC World). Within the equity allocation our starting point is simple, transparent exposure to global stocks. This could be in the form of index funds, thematic groupings of direct securities or carefully selected active security selection managers as we see appropriate. Our regional emphasis within the equity sleeves is unashamedly on the US versus most other markets. While we take a more 'neutral' view on emerging markets and accept the long-term opportunity in China, we also note the potential disruption from trade wars, geopolitical risks including around Taiwan as well as structural economic challenges in the world's second largest economy. As such, we have taken advantage of the limited stabilisation in the Chinese stock market seen in the last couple of months to trim our position there and re-allocate to liquidity in the short term. We are also less enthused with Europe (and the UK) given the political turbulence described and the way that said turbulence is driving volatility in a way that it simply is not in the US.

Outlook

Looking ahead, the upcoming November US Presidential election poses a significant challenge to America's exceptionalism amid a deeply divided culture. Despite some political uncertainty, historical data shows that US presidential elections have generally not impacted the S&P 500 Index significantly, except during extreme events like the 2000 and 2008 elections. Currently, strong consumer spending, improving productivity, and good corporate profitability suggest that the US stock market will focus on fundamentals. Although the US budget deficit is high, the country benefits from unique financing and currency privileges. In contrast, Europe and the UK face challenges due to lack of fiscal and banking union and productivity issues, respectively. Emerging markets must navigate China-specific risks and a strong US dollar, which attracts global capital. Despite global economic diversity, the prospect of another American decade remains strong.

Fund Manager: Niall Gallagher/Christopher Sellers/Chris Legg

30 June 2024

Commentary (Unaudited)

Market backdrop

European stock markets generated solid returns over the review period. The gains were largely driven by strong corporate earnings updates from many of Europe's leading companies, notably in the financial, energy and auto sectors, Meanwhile, optimism that the ongoing decline in eurozone inflation – from 5.3% in June 2023 to 2.6% in May 2024 - would foster interest rate cuts by the European Central Bank (ECB) also supported market sentiment. Having raised interest rates to a peak of 4.5% in September, as evidence mounted that high borrowing costs were weighing on economic activity, ECB policymakers lowered interest rates to 4.25% in June 2024.

While geopolitics continued to occupy investors' minds amid ongoing conflict in Ukraine and the Middle East, domestic political uncertainty came into focus towards the end of the review year. France's unpopular President Macron unexpectedly called a snap election in June, heightening concerns that a hung parliament, or a weak and potentially unstable coalition government, could extend political uncertainty. Over the review year as a whole, in country terms, French equities lagged their wider European counterparts. However, Dutch and German equities outperformed, boosted by significant gains in selected technology, industrial and retail stocks.

Performance

The GAM Star Continental European Equity Fund (EUR Accumulation share class) rose in value by 20.6%, significantly outperforming the 13.5% gain in the MSCI Europe ex UK EUR Net Total Return benchmark.

Portfolio

During the period we maintained our emphasis on financials, taking the view that the robust earnings backdrop for European banks had yet to be adequately reflected in valuations. Given the normalisation of interest rates and the healthy state of balance sheets across the sector, we raised exposure to companies such as UniCredit, CaixaBank and ING, with the portfolio subsequently benefited from price gains among our favoured franchises.

Our positive stance towards energy stocks was another key theme across the portfolio, reflecting our view that during the ambitious global push towards net zero, energy companies such as Shell and TotalEnergies would have a significant role to play in the transition, and would continue to generate stronger-than-expected amounts of cash in the meantime.

The digitalisation theme was another feature of our investment decisions during the period, as our relatively large allocation to the information technology sector, implemented as a result of our overweight positions in favoured stocks, such as ASM International and BE Semiconductor, helped to drive the fund's outperformance.

Meanwhile, we continued to take advantage of what we regarded as attractive valuations in sectors such as consumer discretionary, healthcare and industrials, with our large stakes in companies such as Inditex, Novo Nordisk and Prysmian generating valuable performance contributions.

Outlook

We remain positive on the prospects for European markets with an improving economy and strong earnings growth, combined with attractive valuations, likely to drive further gains.

Interest in European equities appears to be picking up, although somewhat nascently, with overseas (non-European) and global investors allocating more to the asset class, recognising the far greater value available in European equities versus US equities and the greater consistency / duration in European earnings growth. We continue to recognise the significant absolute and relative value in European equities, which is far more than just a mix effect (more fast-growing tech in the US market) but reflected in almost every single European sector, with 'value' sectors trading at a larger discount to their US comparators than 'growth' sectors.

Furthermore, the discount that exists between Europe and the US cannot be attributed solely to superior growth in the US as, on a growth-adjusted basis, US equities still trade on higher valuations. In our view, this reflects a strong valuation argument for European equities. A final, general point is that an

additional, new buyer of European shares has emerged in the last 18 months, namely European corporates themselves; the level of buybacks in Europe (largely from banks and oil stocks) is unprecedented and larger than the US market.

Commentary (Unaudited)

Market backdrop

We saw markets perform strongly following the central banks pivot at the end of 2023. However, interest rates did not come down in 2024 as much as investors expected, but the anticipation for lower interest rates going forward has led sentiment to remain strong within credit markets. As such, spreads on our securities tightened significantly during the year. For instance, spreads within EUR Additional Tier 1 (AT1) Contingent Convertibles (CoCos) tightened by approximately 250 basis points (bps) during the year. Nevertheless, spreads on subordinated debt of financials remain wide, especially when compared to high-yield bonds. As an example, spreads on EUR AT1 CoCos are still close to 400 bps.

On top of that, market technicals remain very strong. First of all, within AT1 CoCos, we saw a number of new issuances met with very strong investor demand, evidenced by demand in primary markets in 2024 of nearly USD 100 billion against an issuance size of USD 20 billion. Moreover, we have continued seeing AT1 CoCos being called at the first call date, leading to a considerable repricing of extension risk.

Finally, we have been seeing some bondholder-friendly gestures by issuers. As an example, Banco Santander tendered an AT1 at par, which was previously trading at 97%, and refinanced it with a subsequent new issue. This was taken very positively by the AT1 market since Banco Santander has historically been known as a less accommodating issuer. Despite that, approximately 28% of the AT1 CoCos market is priced to perpetuity, which is a stark contrast to the historical trend where less than 10% of the AT1s were not called. As such, our expectation is that the AT1 CoCos market should have less than 10% of the bonds priced as perpetuals, compared to the current 28%.

During risk-off environments such as in 2022 and early 2023, callable perpetual bonds tend to reprice to maturity, creating a double-negative effect on prices. However, the reverse is true when markets are stronger, and we expect to see further price appreciation in the coming quarters. Fundamentals remain very solid, as demonstrated by Q1 earnings, with European and UK banks and insurers delivering strong results. The banks, in particular, continue to benefit from the current higher interest rate environments.

Income

The fund captured 4.02% of income during the year. With a yield to maturity of 5.70% and a yield to call of 6.05%, we believe we are going to continue capturing high income going forward.

Performance

Compared to the benchmark, the Bloomberg Euro Aggregate Corporate Total Return index in EUR terms, which rose by 6.6%, the fund (EUR Accumulation share class) was up 13.0% during the year, having captured 4.02% of income. As stated above, spreads within AT1 CoCos tightened significantly during the year.

Positioning

We believe the fund remains extremely robust and well positioned in term of credit/interest rate/liquidity risk: Tactical changes were made across the capital structure depending on market conditions. During summer 2023, we had significantly increased our allocation on AT1 CoCos and Restricted Tier 1 bonds (RT1s), as valuations were very compelling. However, as spreads tightened, we have been gradually taking profits within AT1 CoCos and RT1s. The proceeds were largely put into Tier 2 and senior unsecured bonds.

Outlook

Following a strong nine months since the central banks' pivot, spreads within our securities remain at attractive levels, especially on a relative basis. Moreover, technical conditions within subordinated debt of financials remain very positive, especially following some of the bondholder friendly gestures by issuers. This was also demonstrated by the strong demand for new supply. The anticipation is still for lower interest rates going forward, which should be supportive for credit markets. Credit fundamentals of European financials remain very strong, as we have seen during earnings season. While valuations remain attractive on subordinated debt and there is further scope for spread tightening and re-pricing of AT1s to call, we have been reducing our exposure to AT1 CoCos gradually following the strong rally in Q4 2023 and H1 2024. We

feel that we are well positioned going forward, capturing an attractive yield of circa 6% with a very conservative portfolio, mitigating the potential downside risk, with significant ability to take advantage of potential market volatility.

Commentary (Unaudited)

Market backdrop

We saw markets perform strongly following the central banks' pivot at the end of 2023. However, interest rates did not come down in 2024 as much as investors expected, but the anticipation for lower interest rates going forward has led sentiment to remain strong within credit markets. As such, spreads on our securities tightened significantly during the year. For instance, spreads within GBP Additional Tier 1 (AT1) Contingent Convertibles (CoCos) tightened by approximately 250 basis points (bps) during the year. Nevertheless, spreads on subordinated debt of financials remain wide, especially when compared to high -yield bonds. As an example, spreads on GBP AT1 CoCos are still close to 450 bps. On top of that, market technicals remain very strong. First of all, within AT1 CoCos, we saw a number of new issuances met with very strong investor demand, evidenced by demand in primary markets in 2024 of nearly USD 100 billion against an issuance size of USD 20 billion. Moreover, we have continued seeing AT1 CoCos being called at the first call date, leading to a considerable repricing of extension risk.

Finally, we have been seeing some bondholder friendly gestures by issuers. As an example, Banco Santander tendered an AT1 at par, which was previously trading at 97%, and refinanced it with a subsequent new issue. This was taken very positively by the AT1 market since Banco Santander has historically been known as a less accommodating issuer. Despite that, approximately 28% of the AT1 CoCos market is priced to perpetuity, which is a stark contrast to the historical trend where less than 10% of the AT1s were not called. As such, our expectation is that the AT1 CoCos market should have less than 10% of the bonds priced as perpetuals, compared to the current 28%.

During risk-off environments such as in 2022 and early 2023, callable perpetual bonds tend to reprice to maturity, creating a double-negative effect on prices. However, the reverse is true when markets are stronger, and we expect to see further price appreciation in the coming quarters. Fundamentals remain very strong, as demonstrated by Q1 earnings, with European and UK banks and insurers delivering strong results. The banks, in particular, continue to benefit from higher interest rate environments.

Income

The fund captured 4.68% of income during the year. With a yield to maturity of 7.01% and a yield to call of 6.99%, we believe we are going to continue capturing high income going forward.

Performance

Compared to the 10.6% gain in the Bloomberg Sterling Aggregate Corporate Total Return index benchmark, the fund's GBP Ordinary Accumulation share class was up 15.0% during the year, having captured 4.68% of income. As stated above, spreads within AT1 CoCos tightened significantly during the year.

Positioning

We believe the fund remains extremely robust and well positioned in term of credit/interest rate/liquidity risk: tactical changes were made across the capital structure depending on market conditions. During summer 2023, we had significantly increased our allocation on AT1 CoCos and Restricted Tier 1 bonds (RT1s), as valuations were very compelling. However, as spreads tightened, we have been gradually taking profits within AT1 CoCos and RT1s. The proceeds were largely put into Tier 2 and senior unsecured bonds.

Outlook

Following a strong nine months since the central banks pivot, spreads within our securities remain at attractive levels, especially on a relative basis. Moreover, technical conditions within subordinated debt of financials remain very positive, especially following some of the bondholder friendly gestures by issuers. This was also demonstrated by the strong demand for new supply. The anticipation is still for lower interest rates going forward, which should be supportive for credit markets. Credit fundamentals of European financials remain very strong, as we have seen during earnings season. While valuations remain attractive on subordinated debt and there is further scope for spread tightening and re-pricing of AT1s to call, we have been reducing our exposure to AT1 CoCos gradually following the strong rally in Q4 2023 and H1 2024. We

feel that we are well positioned going forward, capturing an attractive yield of circa 7% with a very conservative portfolio, mitigating the potential downside risk, with significant ability to take advantage of potential market volatility.

Commentary (Unaudited)

Market backdrop

We saw markets perform strongly following the central banks' pivot at the end of 2023. However, interest rates did not come down in 2024 as much as investors expected, but the anticipation for lower interest rates going forward has led sentiment to remain strong within credit markets. As such, spreads on our securities tightened significantly during the year. For instance, spreads within USD Additional Tier 1 (AT1) Contingent Convertibles (CoCos) tightened by approximately 250 basis points (bps) during the year. Nevertheless, spreads on subordinated debt of financials remain wide, especially when compared to high yield bonds. As an example, spreads on USD AT1 CoCos are still close to 350 bps. On top of that, market technicals remain very strong. First of all, within AT1 CoCos, we saw a number of new issuances met with very strong investor demand, evidenced by demand in primary markets in 2024 of nearly USD 100 billion against an issuance size of USD 20 billion. Moreover, we have continued seeing AT1 CoCos being called at the first call date, leading to a considerable repricing of extension risk.

Finally, we have been seeing some bondholder friendly gestures by issuers. As an example, Banco Santander tendered an AT1 at par, which was previously trading at 97%, and refinanced it with a subsequent new issue. This was taken very positively by the AT1 market since Banco Santander has historically been known as a less accommodating issuer. Despite that, approximately 28% of the AT1 CoCos market is priced to perpetuity, which is a stark contrast to the historical trend where less than 10% of the AT1s were not called. As such, our expectation is that the AT1 CoCos market should have less than 10% of the bonds priced as perpetuals, compared to the current 28%.

During risk-off environments such as in 2022 and early 2023, callable perpetual bonds tend to reprice to maturity, creating a double-negative effect on prices. However, the reverse is true when markets are stronger, and we expect to see further price appreciation in the coming quarters. Fundamentals remain solid, as demonstrated by Q1 earnings, with European and UK banks and insurers delivering strong results. The banks, in particular, continue to benefit from the current higher interest rate environments.

Income

The fund captured 4.40% of income during the year. With a yield to maturity of 6.74% and a yield to call of 6.72%, we believe we are going to continue capturing high income going forward.

Performance

Compared to the 6.3% rise in the Bloomberg US Aggregate Corporate Total Return index (USD) benchmark, the fund (USD Ord Accumulation share class) was up 13.3% during the year, having captured 4.40% of income. As stated above, spreads within AT1 CoCos tightened significantly during the year.

Positioning

We believe the fund remains extremely robust and well positioned in term of credit/interest rate/liquidity risk: tactical changes were made across the capital structure depending on market conditions. During summer 2023, we had significantly increased our allocation on AT1 CoCos and Restricted Tier 1 (RT1s), as valuations were very compelling. However, as spreads tightened, we have been gradually taking profits within AT1 CoCos and RT1s. The proceeds were largely put into Tier 2 and senior unsecured bonds.

Outlook

Following a strong nine months since the central banks pivot, spreads within our securities remain at attractive levels, especially on a relative basis. Moreover, technical conditions within subordinated debt of financials remain very positive, especially following some of the bondholder friendly gestures by issuers. This was also demonstrated by the strong demand for new supply. The anticipation is still for lower interest rates going forward, which should be supportive for credit markets. Credit fundamentals of European financials remain very strong, as we have seen during earnings season. While valuations remain attractive on subordinated debt and there is further scope for spread tightening and re-pricing of AT1s to call, we have been reducing our exposure to AT1 CoCos gradually following the strong rally in Q4 2023 and H1 2024. We feel that we are well positioned going forward, capturing an attractive yield of circa 6.75% with a very conservative portfolio, mitigating the potential downside risk, with significant ability to take advantage of potential market volatility.

GAM Star Global Defensive

Fund Manager: Andrea Quapp/Fabio Di Grezia/Daniel Rossacher/Sandra Wolfensberger

30 June 2024

Commentary (Unaudited)

Market backdrop

Global stock markets delivered robust returns over the year under review. US equites were the star performers, driven by encouraging corporate earnings and the easing of inflation, with leading technology stocks recording very strong gains, in part due to Artificial Intelligence-related optimism. European, Asia-Pacific and Emerging Market equities also generated solid gains over the review year.

However, bond markets produced more muted returns; during H2 2023 optimism grew over the prospect for interest rate cuts, although expectations were broadly scaled back in H1 2024. Over the review year, the yield on the benchmark US 10-year Treasury note rose from 3.9% to 4.4%. However, credit markets outperformed their government counterparts, with confidence in the corporate earnings outlook supporting a narrowing of credit spreads.

Performance

The GAM Star Global Defensive Fund (GBP U Accumulation class) rose in value by 8.0%, compared to a 7.5% gain in the Lipper Global Mixed Asset GBP Conservative benchmark.

Portfolio positioning

Over the period we sought to structurally position the portfolio to take advantage of the superior real returns that stocks can offer over time, offset by sensible diversifying allocations sized correctly according to each investor's long term-risk appetite. We are broadly engaged in equities across all our strategies given the aforementioned tailwinds the US market enjoys, combined with the fact that it dominates global equity indices (66% of MSCI AC World). Within the equity allocation our starting point is simple, transparent exposure to global stocks. This could be in the form of index funds, thematic groupings of direct securities or carefully selected active security selection managers as we see appropriate. Our regional emphasis within the equity sleeves is unashamedly on the US versus most other markets. While we take a more 'neutral' view on emerging markets and accept the long-term opportunity in China, we also note the potential disruption from trade wars, geopolitical risks including around Taiwan as well as structural economic challenges in the world's second largest economy. As such, we have taken advantage of the limited stabilisation in the Chinese stockmarket seen in the last couple of months to trim our position there and re-allocate to liquidity in the short term. We are also less enthused with Europe (and the UK) given the political turbulence described and the way that said turbulence is driving volatility in a way that it simply is not in the US. Away from stocks, we continue to focus on short-dated government bills across the main currency classes given the unbeatable risk-adjusted returns versus nearly all other alternatives. Exposure to these risk-free assets is complemented by selective allocations to mortgage-backed securities, ultra short-dated investment grade bonds and well-researched subordinated financial bonds. In alternative investments, where we are slightly more wary of the possibility of inconsistency at the wrong moment, we hold a single well risk-managed US equity long/short fund.

Outlook

Looking ahead, the upcoming November US Presidential election poses a significant challenge to America's exceptionalism amid a deeply divided culture. Despite some political uncertainty, historical data shows that US presidential elections have generally not impacted the S&P 500 Index significantly, except during extreme events like the 2000 and 2008 elections. Currently, strong consumer spending, improving productivity, and good corporate profitability suggest that the US stock market will focus on fundamentals. Although the US budget deficit is high, the country benefits from unique financing and currency privileges. In contrast, Europe and the UK face challenges due to lack of fiscal and banking union and productivity issues, respectively. Emerging markets must navigate China-specific risks and a strong US dollar, which attracts global capital. Despite global economic diversity, the prospect of another American decade remains strong.

Commentary (Unaudited)

Market backdrop

Global stock markets delivered robust returns over the year under review. US equities were the star performers, driven by encouraging corporate earnings and the easing of inflation, with leading technology stocks recording very strong gains, in part due to Artificial Intelligence-related optimism. European, Asia-Pacific and Emerging Market equities also generated solid gains over the review year.

However, bond markets produced more muted returns; during H2 2023 optimism grew over the prospect for interest rate cuts, although expectations were broadly scaled back in H1 2024. Over the review year, the yield on the benchmark US 10-year Treasury note rose from 3.9% to 4.4%. However, credit markets outperformed their government counterparts, with confidence in the corporate earnings outlook supporting a narrowing of credit spreads.

Performance

The GAM Star Global Dynamic Growth Fund (GBP Institutional Accumulation class) rose in value by 12.3%, compared to a 11.7% gain in the Lipper Global Mixed Asset GBP Aggressive benchmark.

Portfolio positioning

Over the period we sought to structurally position the portfolio to take advantage of the superior real returns that stocks can offer over time, offset by sensible diversifying allocations sized correctly according to each investor's long term risk appetite. We are broadly engaged in equities across all our strategies given the aforementioned tailwinds the US market enjoys, combined with the fact that it dominates global equity indices (66% of MSCI AC World). Within the equity allocation our starting point is simple, transparent exposure to global stocks. This could be in the form of index funds, thematic groupings of direct securities or carefully selected active security selection managers as we see appropriate. Our regional emphasis within the equity sleeves is unashamedly on the US versus most other markets. While we take a more 'neutral' view on emerging markets and accept the long-term opportunity in China, we also note the potential disruption from trade wars, geopolitical risks including around Taiwan as well as structural economic challenges in the world's second largest economy. As such, we have taken advantage of the limited stabilisation in the Chinese stockmarket seen in the last couple of months to trim our position there and re-allocate to liquidity in the short term. We are also less enthused with Europe (and the UK) given the political turbulence described and the way that said turbulence is driving volatility in a way that it simply is not in the US. Away from stocks, we continue to focus on short-dated government bills across the main currency classes given the unbeatable risk-adjusted returns versus nearly all other alternatives. Exposure to these risk-free assets is complemented by selective allocations to mortgage-backed securities, ultra short-dated investment grade bonds and well-researched subordinated financial bonds. In alternative investments, where we are slightly more wary of the possibility of inconsistency at the wrong moment, we hold a single well risk-managed US equity long/short fund. Allocations to longer-dated government bonds also serve as additional 'crash protection' in the event of an extreme geopolitical or market event while also offering the prospect of capital appreciation given already-high yields. The 10-year US Treasury bond, for example, offers a relatively high (by the standards of the last 15 years at least) yield of approximately 4.4%. Exposure to these risk-free assets is complemented by selective allocations to insurance-linked securities, mortgage-backed securities, ultra short-dated investment grade bonds and well-researched subordinated financial bonds. We are also looking to potentially include further corporate bond structures in the coming months. In alternative investments, where we are slightly more wary of the possibility of inconsistency at the wrong moment, we hold a single well risk-managed US equity long/short fund. convertible arbitrage fund for now. Finally, in tactical asset allocation we continue to hold US Treasury bills, partly as a defence against the possibility of a market correction but also to keep powder dry for re-engaging in stocks in the aftermath of such an event.

Outlook

Looking ahead, the upcoming November US Presidential election poses a significant challenge to America's exceptionalism amid a deeply divided culture. Despite some political uncertainty, historical data shows that US presidential elections have generally not impacted the S&P 500 Index significantly, except during extreme events like the 2000 and 2008 elections. Currently, strong consumer spending, improving productivity, and good corporate profitability suggest that the US stock market will focus on fundamentals. Although the US budget deficit is high, the country benefits from unique financing and currency privileges. In contrast, Europe and the UK face challenges due to lack of fiscal and banking union and productivity issues, respectively. Emerging markets must navigate China-specific risks and a strong US dollar, which attracts global capital. Despite global economic diversity, the prospect of another American decade remains strong.

Fund Manager: GAM Emerging Markets Equities Team

30 June 2024

Commentary (Unaudited)

Market backdrop

Emerging market (EM) equities ended the review period higher but lagged behind the US-led gains in wider global equities.

Despite ending the 12 months under review with solid gains, EMs experienced a volatile period, with geopolitical tensions and the broad firmness of the US dollar suppressing investors' appetite for higher risk EMs. Swings in investor expectations over the prospect of US interest rate cuts also influenced EMs. Around the turn of the calendar, consensus expectations suggested as many as five cuts were in prospect for 2024, although by the end of the review period as few as one or two cuts were priced in amid ongoing strength in the world's biggest economy. Other key drivers of sentiment towards EMs included election results and fervour around the US tech sector, driven chiefly by Artificial Intelligence (AI). China's economy remained a concern amid ongoing worries over the health of the real estate sector, with many investors hoping from more decisive stimulus measures. However, in 2024 optimism over new measures to support the property sector and hopes of wider reform helped Chinese equites to end the period on a firm note. Meanwhile, positive political developments in South Africa and India lent support to those markets. Although European EMs performed strongly, Latin American markets generally lagged.

Performance

The GAM Star Sustainable Emerging Equity Fund (Ordinary USD Accumulation class) rose by 28.0% over the review period, far outperforming the 12.6% gain in the MSCI Emerging Markets Index (USD Net Total Return) benchmark.

Portfolio

During the period we continued to capitalise on what we identified as attractive opportunities among EM financials. We maintained significant overweight holdings in India-based companies, such as strongly performing Indian Renewable Energy Development Agency, Aadhar Housing Finance and HDFC Bank, while our favouring of Romania-based lender Banca Transilvania also delivered good returns for the portfolio.

We maintained relatively large exposure to selected consumer discretionary companies over the period, including South Africa-based online retail and multimedia firm Naspers.

Among information technology companies, we held overweight exposure to South Korea-based memory chip producer SK Hynix which has benefitted from increase demand as clients invest heavily in infrastructure to support AI. Meanwhile, although we maintained a broadly underweight stance towards the communication services sector, we held a relatively large stake in India-based mobile, fixed-line and broadband services provider Bharti Airtel, a holding that generated good returns for the fund over the period.

Similarly, although we maintained a generally cautious approach to utility companies, Indian hydropower generator NHPC delivered good returns for the fund, helped by the company's push into solar, geothermal, tidal and wind power.

While our slight favouring of Brazil acted as a drag on performance towards the end of the period amid concerns over the fiscal discipline of President Lula, we believe that the recent currency weakness has been overdone. We therefore maintained our relatively large allocations to Brazil on the basis of the potential for a sharp reversal in the current oversold conditions and extreme under-valuations.

At the end of the period, key areas of positioning for the portfolio include EM travel across platforms, airlines and airports. We hold a significant weighting to energy transition, including in India, Brazil and Eastern Europe. The fund also remains weighted in select frontier markets such as Vietnam.

Outlook

The gentle easing in US economic trends has continued over recent months, with the recent Institute for Supply Management (manufacturing and services) data leading to a further downshift in the US economic surprise indicators. The ongoing softening gives further support to the view that the US Federal Reserve could cut interest rates during the second half of 2024, a development that has lent support to EM equities.

The US 'Goldilocks' outlook is likely to remain helpful towards emerging markets where we have seen delays to interest rate cuts with the aim to protect currencies, while in some countries such as Taiwan and Indonesia, we have even seen rate hikes. The 'higher for longer' interest rate outlook has lowered some forecasts for domestic consumption, although this has been offset by the strong export data we have seen so far in 2024. Nevertheless, in our view, the starting gun for US rate cuts is likely to be a positive catalyst an extension of the strength in EM equities that we witnessed during the final weeks of the review period.

While we have seen some marginal weakening in US data overall, the economic growth outlook remains strong. We believe this should be supportive of export-orientated markets, including North Asia and Eastern Europe.

GAM Star Emerging Market Rates

Fund Manager: Paul McNamara/Michael Biggs/Markus Heider

30 June 2024

Commentary (Unaudited)

Market backdrop

The global market environment represented a mixed backdrop for emerging market (EM) bonds during the 12-month review period, one that featured swings in investors' expectations over the direction of US interest rates. With the US Federal Reserve (Fed) having raised rates to a 23-year high of 5.25% in July, by the end of 2023, optimism rose that inflation was coming under control. By the turn of the calendar year, investors had priced in around five US rate cuts for 2024. However, signs of ongoing strength in the US jobs market and the resilience of price pressures in the services sector prompted a dramatic rethink, with many investors scaling back expectations to just a single cut in US rates by the end of the review period.

In EMs, the Chinese authorities continued their efforts to stimulate economic activity and address the ongoing crisis in the real estate sector, with the People's Bank of China implementing two 0.1% interest rate cuts during the period, taking rates to 3.35%. Meanwhile, Brazil continued to grapple with the effect of the weak Brazilian real, political concerns amid doubts over President Lula's fiscal discipline and sky-high interest rates. Having begun the period at 13.75%, multiple cuts took borrowing costs to 10.50% by the end of June. Among European EMs, Turkish bond yields soared over the period as the central bank ramped up interest rates, reversing President Erdogan's previous unorthodox economic policies as policymakers battled rampant inflation. Despite signs that the medicine was working, with Turkey's credit ratings upgraded in early 2024, 10-year Turkish bond yields hit 26.5% at the end of June 2024, compared to circa 16.8% a year earlier.

Performance

The GAM Star Emerging Market Rates Fund (Ordinary USD Accumulation class) fell by 4.5% over the 12 months under review, compared to the 5.50% gain in the US SOFR Secured Overnight Financing Compounded rate.

Portfolio

The portfolio had a mixed start to the review period, as gains from our long Czech Republic rates positions were largely offset by losses in some FX exposures, including shorts in Australia and longs in Mexico. However, our strategies came under some pressure during a challenging month for EM debt in September, with the main performance detractors on the duration side coming in countries that suffered most from the rise in US bond yields, such as Mexico and the Czech Republic.

During the final quarter of 2023, our developed market (DM) yield curve trades – steepeners in the US and Europe – underpinned returns. Into the turn of the calendar year, we had positioned the portfolio for a strong duration rally, emphasising the front end of the curve. However, although the subsequent rally was concentrated on longer-dated bonds, the portfolio benefitted from long FX and rates positions in Mexico and Brazil, as well as long rates positions in the eurozone and the Czech Republic.

Nevertheless, despite us paring back risk after December's rally, the portfolio faced some headwinds in early 2024 as the firmer US dollar weighed on the asset class. Although our FX hedges - shorts in the euro, Australian dollar and the Canadian dollar - underpinned returns, long positions in FX and rates in South Africa and Chile proved costly.

The challenging environment extended into the second quarter of 2024 as the strengthening US dollar and rising bond yields extended a tough period for the asset class, with Latin American debt performing particularly poorly. Our long rates exposure in Mexico, Brazil and Columbia worked against us. However, a decline in both US yields and the US dollar over the final weeks of the review period provided some respite, helped by our long rates position in Hungary and long FX exposure in Chile and Turkey amid strong capital inflows in the latter, reflecting more orthodox domestic economic policies.

Outlook

We expect a moderation in inflation in both EMs and DMs, supported by softer but nevertheless resilient Gross Domestic Product (GDP) growth, taking the view that consensus forecasts have yet to adjust for the position for lower inflation and cuts in interest rates. As a result, the strategy continues to hold long positions in FX and rates in some of the higher-yielding countries. Meanwhile, our USD risks are hedged by shorts in DM currencies such as the EUR, AUD and CAD, and lower-yielding EM currencies such as China's CNY/CNH.

GAM Star European Equity

Fund Manager: Niall Gallagher/Christopher Sellers/Chris Legg

30 June 2024

Commentary (Unaudited)

Market backdrop

European stock markets generated solid returns over the review period. The gains were largely driven by strong corporate earnings updates from many of Europe's leading companies, notably in the financial, energy and auto sectors. Meanwhile, optimism that the ongoing decline in eurozone inflation - from 5.3% in June 2023 to 2.6% in May 2024 - would foster interest rate cuts by the European Central Bank (ECB) also supported market sentiment. Having raised interest rates to a peak of 4.5% in September, as evidence mounted that high borrowing costs were weighing on economic activity, ECB policymakers lowered interest rates to 4.25% in June 2024.

While geopolitics continued to occupy investors' minds amid ongoing conflict in Ukraine and the Middle East, domestic political uncertainty came into focus towards the end of the review year. France's unpopular President Macron unexpectedly called a snap election in June, heightening concerns that a hung parliament, or a weak and potentially unstable coalition government, could herald a period of political uncertainty. Political winds of change also affected the UK, as the Labour Party swept to power in June's General Election, ending a 14-year period of Conservative-led government. Over the review year as a whole, in country terms, French and UK equities lagged their wider European peers. However, Dutch and German equities outperformed, boosted by significant gains in selected technology, industrial and retail stocks.

Performance

The GAM Star European Equity Fund (EUR accumulation class) rose in value by 18.7%, significantly outperforming the 13.7% gain in the MSCI Europe EUR Net Total Return benchmark.

Portfolio

During the period we maintained our emphasis on financials, taking the view that the robust earnings backdrop for European banks had yet to be adequately reflected in valuations. Given the normalisation of interest rates and the healthy state of balance sheets across the sector, we raised exposure to companies such as UniCredit, CaixaBank and ING, with the portfolio subsequently benefited from price gains among our favoured franchises.

Our positive stance towards energy stocks was another key theme across the portfolio, reflecting our view that during the ambitious global push towards net zero, energy companies such as Shell and TotalEnergies would have a significant role to play in the transition, and would continue to generate stronger-than-expected amounts of cash in the meantime.

The digitalisation theme was another feature of our investment decisions during the period, as our relatively large allocation to the information technology sector, implemented as a result of our overweight positions in favoured stocks, such as ASM International and BE Semiconductor, helped to drive the fund's outperformance.

Meanwhile, we continued to take advantage of what we regarded as attractive valuations in sectors such as consumer discretionary, healthcare and industrials, with our large stakes in companies such as Inditex, Novo Nordisk and Prysmian generating valuable performance contributions.

Outlook

We remain positive on the prospects for European markets with an improving economy and strong earnings growth, combined with attractive valuations, likely to drive further gains.

Interest in European equities appears to be picking up, although somewhat nascently, with overseas (non-European) and global investors allocating more to the asset class, recognising the far greater value available in European equities versus US equities and the greater consistency / duration in European earnings growth. We continue to recognise the significant absolute and relative value in European equities, which is far more than just a mix effect (more fast-growing tech in the US market) but reflected in almost every single European sector, with 'value' sectors trading at a larger discount to their US comparators than 'growth' sectors.

Furthermore, the discount that exists between Europe and the US cannot be attributed solely to superior growth in the US as, on a growth-adjusted basis, US equities still trade on higher valuations. In our view, this reflects a strong valuation argument for European equities. A final, general point is that an additional, new buyer of European shares has emerged in the last 18 months, namely European corporates themselves; the level of buybacks in Europe (largely from banks and oil stocks) is unprecedented and larger than the US market.

GAM Star Flexible Global Portfolio

Fund Manager: Andrea Quapp/Fabio Di Grezia/Daniel Rossacher/Sandra Wolfensberger

GAM Investments

30 June 2024

Commentary (Unaudited)

Market backdrop

Global stock markets delivered robust returns over the year under review. US equites were the star performers, driven by encouraging corporate earnings and the easing of inflation, with leading technology stocks recording very strong gains, in part due to Artificial Intelligence-related optimism. European, Asia-Pacific and Emerging Market equities also generated solid gains over the review year.

However, bond markets produced more muted returns; during H2 2023 optimism grew over the prospect for interest rate cuts, although expectations were broadly scaled back in H1 2024. Over the review year, the yield on the benchmark US 10-year Treasury note rose from 3.9% to 4.4%. However, credit markets outperformed their government counterparts, with confidence in the corporate earnings outlook supporting a narrowing of credit spreads.

Performance

The GAM Star Flexible Global Portfolio Fund (Ordinary EUR Accumulation class) rose in value by 9.8%, compared to the 9.0% gain in the Lipper Global Mixed Asset EUR Flex - Global EUR Price Total Return benchmark.

Portfolio positioning

Over the period we sought to structurally position the portfolio to take advantage of the superior real returns that stocks can offer over time, offset by sensible diversifying allocations sized correctly according to each investor's long term risk appetite. We are broadly engaged in equities across all our strategies given the aforementioned tailwinds the US market enjoys, combined with the fact that it dominates global equity indices (66% of MSCI AC World). Within the equity allocation our starting point is simple, transparent exposure to global stocks. This could be in the form of index funds, thematic groupings of direct securities or carefully selected active security selection managers as we see appropriate. Our regional emphasis within the equity sleeves is unashamedly on the US versus most other markets. While we take a more 'neutral' view on emerging markets and accept the long-term opportunity in China, we also note the potential disruption from trade wars, geopolitical risks including around Taiwan as well as structural economic challenges in the world's second largest economy. As such, we have taken advantage of the limited stabilisation in the Chinese stock market seen in the last couple of months to trim our position there and re-allocate to liquidity in the short term. We are also less enthused with Europe (and the UK) given the political turbulence described and the way that said turbulence is driving volatility in a way that it simply is not in the US.

Away from stocks, we continue to focus on short-dated government bills across the main currency classes given the unbeatable risk-adjusted returns versus nearly all other alternatives. Allocations to longer-dated government bonds also serve as additional 'crash protection' in the event of an extreme geopolitical or market event while also offering the prospect of capital appreciation given already-high yields. The 10-year US Treasury bond, for example, offers a relatively high (by the standards of the last 15 years at least) yield of approximately 4.4%. Exposure to these risk-free assets is complemented by selective allocations to insurance-linked securities, mortgage-backed securities, ultra short-dated investment grade bonds and well-researched subordinated financial bonds. We are also looking to potentially include further corporate bond structures in the coming months. In alternative investments, where we are slightly more wary of the possibility of inconsistency at the wrong moment, we hold a single well risk-managed US equity long/short fund. convertible arbitrage fund for now. Finally, in tactical asset allocation we continue to hold US Treasury bills, partly as a defence against the possibility of a market correction but also to keep powder dry for re-engaging in stocks in the aftermath of such an event.

Outlook

Looking ahead, the upcoming November US Presidential election poses a significant challenge to America's exceptionalism amid a deeply divided culture. Despite some political uncertainty, historical data shows that US presidential elections have generally not impacted the S&P 500 Index significantly, except during extreme events like the 2000 and 2008 elections. Currently, strong consumer spending, improving productivity, and good corporate profitability suggest that the US stock market will focus on

fundamentals. Although the US budget deficit is high, the country benefits from unique financing and currency privileges. In contrast, Europe and the UK face challenges due to lack of fiscal and banking union and productivity issues, respectively. Emerging markets must navigate China-specific risks and a strong US dollar, which attracts global capital. Despite global economic diversity, the prospect of another American decade remains strong.

30 June 2024

Commentary (Unaudited)

Market backdrop

The review period was dominated by major shifts in expectations over the outlook for US interest rates. While the Federal Reserve (Fed) raised rates to a peak of 5.25% in July 2023, by the turn of the calendar year investors had priced in as many as five cuts for 2024 amid hope that the battle against inflation had been largely won. However, unexpected resilience in the US economy in early 2024, driven to a major extent by the robust jobs market, and signs that pricing pressures, particularly core inflation, were proving stubborn, prompted a rethink. By the end of the review period, investors had scaled back expectations, anticipating only one or two 25 basis point cuts by the Fed this year.

Although the eurozone experienced more muted economic activity, and some investors remained vigilant over the risks that inflation could revive, the European Central Bank (ECB) projected a stabilisation of inflation close to its 2.0% target. Having raised interest rates twice early in the review period, to a peak of 4.5%, the ECB announced a cut, to 4.25% in June. Meanwhile, political change influenced the outlook in both France and the UK; in France, a left-wing coalition won June's snap legislative election, while in the UK, the left-of-centre Labour party won power at June's general election, ending 14 years of Conservative government.

The Bank of Japan finally ended its negative interest rate policy in March, raising official rates from -0.1% to +0.1%, and ended its yield curve control, emboldened by news that the Japanese Trade Union Confederation had secured average pay increases of 5.3%, the largest in over three decades.

In emerging markets, the Chinese authorities continued their efforts to stimulate economic activity and address the ongoing crisis in the real estate sector, with the People's Bank of China implementing two 0.1% rate cuts during the period, taking rates to 3.35%. Meanwhile, Brazil continued to grapple with the effect of the weak Brazilian real, political concerns amid doubts over President Lula's fiscal discipline and sky-high interest rates. Having begun the period at 13.75%, multiple cuts took borrowing costs to 10.50% by the end of June.

Over the review period, US 10-year government bond yields rose from 3.9% to 4.4%. In the eurozone, German bund yields rose from 2.5% to 2.6%, French yields rose from 3.0% to 3.3%, while UK gilt yields eased from 4.5% to 4.2%. Meanwhile, Japanese bond yields jumped from 0.4% to 1.1%, Brazilian yields climbed from 10.7% to 12.3%.

In currency markets, the period was largely characterised by the firm tone of the US dollar; the 'safe haven' appeal was underpinned by geopolitical uncertainties amid fears of escalating conflict in the Middle East. The Japanese yen showed weakness versus the US dollar, shedding around 12%. Meanwhile, the Brazilian real lost around 14% versus the US currency.

Performance

The GAM Star Global Rates Fund (Institutional USD Accumulation share class) fund rose in value by 2.7%, compared to the 5.5% gain in the US SOFR Secured Overnight Financing Compounded Index.

Portfolio

The portfolio enjoyed solid gains over much of the review period, albeit that a disappointing second quarter of 2024 reversed some of the previous progress.

During the third quarter of 2023, we continued to add to bullish structures in the UK versus Europe, reaping the rewards of curve steepener and front-end curve trades. Long exposure to the Norwegian krone versus the Swedish krona also delivered valuable gains. In the final quarter of 2023, the portfolio benefitted from our longs in Brazilian and Mexican rates, as well as our longs in US index-linked bonds. We initiated a long US interest rates futures position versus the UK.

The strategy enjoyed a very strong start to 2024, driven by the long US front end exposure against the UK, which the short Swedish krona versus the euro stance also produced good results. In terms of positioning, we added to our long Brazilian rates exposure. However, the second quarter of 2024 was a more challenging period for the portfolio, notably in April when our long Brazilian rates stance worked against us. We initiated a further long position in Brazilian rates versus the UK, although this, and the outright long, detracted from returns into the closing weeks of the review period. On the plus side, the effect was partly offset by curve steepening trades across developed markets. During the closing weeks of the review period we initiated a short position in UK rates versus Europe through interest rate swaps and interest rate futures.

Outlook

The wide variation in output gaps and core inflation dynamics continue to explain most of the cross-country dispersion in the outlook for policy rates. Among our highest-conviction views, we continue to believe that there is considerably more scope for easing in Brazil given the exceptional extent of policy tightening priced in over the next 12 months, combined with elevated real rates, headline inflation within the central bank's tolerance band, core inflation close to target, signs of fiscal spending restraint and a low and stable external deficit. In Australia, a rising unemployment rate, decelerating employment growth and hours worked, and softening inflation should temper expectations of additional rate hikes from the Reserve Bank. At the other end of the spectrum, market expectations for multi-year, gradual policy easing in the UK, the US and Europe presume that the disinflation processes in these economies is likely to be continuous, with little distinction between the cyclical drivers of lower inflation in the near term and the risk of structurally higher inflation over the medium term. The implied path of interest rates also precludes the possibility that easing cycles may be shorter and faster than markets anticipate.

The bulk of the portfolio's risk (66%) remains in interest rates, around 27% is in currency and 7% in inflation trades.

Commentary (Unaudited)

Market backdrop

Global stock markets delivered robust returns over the year under review. US equites were the star performers, driven by encouraging corporate earnings and the easing of inflation, with leading technology stocks recording very strong gains, in part due to Artificial Intelligence-related optimism. European, Asia-Pacific and Emerging Market equities also generated solid gains over the review year.

However, bond markets produced more muted returns; during H2 2023 optimism grew over the prospect for interest rate cuts, although expectations were broadly scaled back in H1 2024. Over the review year, the yield on the benchmark US 10-year Treasury note rose from 3.9% to 4.4%. However, credit markets outperformed their government counterparts, with confidence in the corporate earnings outlook supporting a narrowing of credit spreads.

Performance

The GAM Star Global Growth Fund (GBP Institutional Accumulation share class) rose in value by 12.2%, compared to a 9.7% gain in the Lipper Global Mixed Asset GBP Flex benchmark.

Portfolio positioning

Over the period we sought to structurally position the portfolio to take advantage of the superior real returns that stocks can offer over time, offset by sensible diversifying allocations sized correctly according to each investor's long term-risk appetite. We are broadly engaged in equities across all our strategies given the aforementioned tailwinds the US market enjoys, combined with the fact that it dominates global equity indices (66% of MSCI AC World). Within the equity allocation our starting point is simple, transparent exposure to global stocks. This could be in the form of index funds, thematic groupings of direct securities or carefully selected active security selection managers as we see appropriate. Our regional emphasis within the equity sleeves is unashamedly on the US versus most other markets. While we take a more 'neutral' view on emerging markets and accept the long-term opportunity in China, we also note the potential disruption from trade wars, geopolitical risks including around Taiwan as well as structural economic challenges in the world's second largest economy. As such, we have taken advantage of the limited stabilisation in the Chinese stockmarket seen in the last couple of months to trim our position there and re-allocate to liquidity in the short term. We are also less enthused with Europe (and the UK) given the political turbulence described and the way that said turbulence is driving volatility in a way that it simply is not in the US. Away from stocks, we continue to focus on short-dated government bills across the main currency classes given the unbeatable risk-adjusted returns versus nearly all other alternatives. Exposure to these risk-free assets is complemented by selective allocations to mortgage-backed securities, ultra short-dated investment grade bonds and well-researched subordinated financial bonds. In alternative investments, where we are slightly more wary of the possibility of inconsistency at the wrong moment, we hold a single well risk-managed US equity long/short fund.

Outlook

Looking ahead, the upcoming November US Presidential election poses a significant challenge to America's exceptionalism amid a deeply divided culture. Despite some political uncertainty, historical data shows that US presidential elections have generally not impacted the S&P 500 Index significantly, except during extreme events like the 2000 and 2008 elections. Currently, strong consumer spending, improving productivity, and good corporate profitability suggest that the US stock market will focus on fundamentals. Although the US budget deficit is high, the country benefits from unique financing and currency privileges. In contrast, Europe and the UK face challenges due to lack of fiscal and banking union and productivity issues, respectively. Emerging markets must navigate China-specific risks and a strong US dollar, which attracts global capital. Despite global economic diversity, the prospect of another American decade remains strong.

Commentary (Unaudited)

Market backdrop

We saw markets perform strongly following the central banks' pivot at the end of 2023. However, interest rates did not come down in 2024 as much as investors expected, but the anticipation for lower interest rates going forward has led sentiment to remain strong within credit markets. As such, spreads on our securities tightened significantly during the year. For instance, spreads within USD Additional Tier 1 (AT1) Contingent Convertibles (CoCos) tightened by approximately 250 basis points (bps) during the year. Nevertheless, spreads on subordinated debt of financials remain wide, especially when compared to high-yield bonds. As an example, spreads on USD AT1 CoCos are still close to 350 bps.

On top of that, market technicals remain very strong. First of all, within AT1 CoCos, we saw a number of new issuances met with very strong investor demand, evidenced by demand in primary markets in 2024 of nearly USD 100 billion against an issuance size of USD 20 billion. Moreover, we have continued seeing AT1 CoCos being called at the first call date, leading to a considerable repricing of extension risk.

Finally, we have been seeing some bondholder friendly gestures by issuers. As an example, Banco Santander tendered an AT1 at par, which was previously trading at 97%, and refinanced it with a subsequent new issue. This was taken very positively by the AT1 market since Banco Santander has historically been known as a less accommodating issuer. Despite that, approximately 28% of the AT1 CoCos market is priced to perpetuity, which is a stark contrast to the historical trend where less than 10% of AT1s were not called. As such, our expectation is that the AT1 CoCos market should have less than 10% of the bonds priced as perpetuals, compared to the current 28%.

During risk-off environments such as in 2022 and early 2023, callable perpetual bonds tend to reprice to maturity, creating a double-negative effect on prices. However, the reverse is true when markets are stronger, and we expect to see further price appreciation in the coming quarters. Fundamentals remain solid, as demonstrated by Q1 earnings, with European and UK banks and insurers delivering strong results. The banks, in particular, continue to benefit from the current higher interest rate environment.

Income

The fund captured 4.71% of income during the year. With a yield to maturity of 6.69% and a yield to call of 6.88%, we believe we are going to continue capturing high income going forward.

Performance

The Fund's Non-UK RFS USD Accumulation share class was up 15.4% during the year, having captured 4.40% of income, compared to the 4.6% gain by the Bloomberg US Aggregate Corporate Total Return USD benchmark.

Positioning

We believe the fund remains extremely robust and well positioned in term of credit/interest rate/liquidity risk: tactical changes were made across the capital structure depending on market conditions. During summer 2023, we had significantly increased our allocation on AT1 CoCos and Restricted Tier 1 bonds (RT1s), as valuations were very compelling. However, as spreads tightened, we have taken small profits within AT1 CoCos and RT1s.

Outlook

Following a strong nine months since the central banks' pivot, spreads within our securities remain at attractive levels, especially on a relative basis. Moreover, technical conditions within subordinated debt of financials remain very positive, especially following some of the bondholder friendly gestures by issuers. This was also demonstrated by the strong demand for new supply. The anticipation is still for lower interest rates going forward, which should be supportive for credit markets. Credit fundamentals of European financials remain very strong, as we have seen during earnings season. While valuations remain attractive on subordinated debt and there is further scope for spread tightening and re-pricing of AT1s to call, we have been reducing our exposure to AT1 CoCos gradually following the strong rally in Q4 2023 and H1 2024. We feel that we are well positioned going forward, capturing an attractive yield of circa 7% with a very conservative portfolio, mitigating the potential downside risk, with significant ability to take advantage of potential market volatility.

GAM Star Japan Leaders

Fund Manager: Ernst Glanzmann/Lukas Knueppel

30 June 2024

Commentary (Unaudited)

Market backdrop

During the 12 months under review, the Japanese market was affected by monetary policy changes and geopolitical factors. In autumn 2023, the Bank of Japan (BoJ) adjusted its yield curve control policy, while the Federal Reserve (Fed) raised interest rates, leading to a preference for undervalued stocks. Volatility was heightened by geopolitical risks and US inflation data. Towards the end of the year, the BoJ's continued policy adjustment and expectations of an end to US rate hikes shifted the focus towards growth stocks. In early 2024, gains were driven by foreign investors and the end of negative interest rates by the BoJ, which benefited mega-cap stocks. Despite uncertainties in the spring, the yen's depreciation spurred a rally, with financials leading the way.

Performance

The GAM Star Japan Leaders Fund (JPY Ordinary Accumulation share class) rose in value by 11.2% over the review period, underperforming the 25.6% gain in the Tokyo Stock Exchange (TOPIX) 1st section (Gross Total Return JPY) index.

Portfolio Positioning

Throughout the year, our best relative performers were materials and communication services. These sectors contributed positively to the return of our portfolio. However, these gains were more than offset by significant detractors in healthcare, industrials and financials, which ultimately led to the fund underperforming its benchmark. At a stock level, Tokyo Electron stood out as a top performer. The semiconductor equipment manufacturer reported improved business performance, which was favourably received by investors. Recruit Holdings also performed well. Despite a less dynamic US labour market, the owner of Indeed and a leading HR technology group reported a solid performance. Conversely, there were negative contributions from M3 Inc, which provides medical information services, and Sysmex, a diagnostics systems company. Both companies faced challenges in the post-pandemic environment, which affected their performance. In July we decided to exit Honda Motor, Shiseido, and LY Corp. This strategic move allowed us to focus on other opportunities. By October, we had established a full position in GMO Payment Gateway, a company specialising in payment processing solutions. At the end of the period, we carried out our annual rebalancing of position weights to ensure that our portfolio remained in line with our investment strategy. We continue to hold 20 to 30 carefully selected stocks in leading Japanese companies, with the aim of achieving above-average earnings growth over the long term, which should lead to above-market returns.

Outlook

Despite the recent market turbulence, we remain optimistic about the Japanese equity market over the medium term. Our positive outlook is driven by several key factors, including potential US interest rate cuts, a new monetary easing cycle and the BoJ's plan to gradually reduce its Japanese government bond holdings by 8% by spring 2026, along with moderate policy rate hikes. In addition, slower-than-expected core inflation in both the US and Japan should stabilise the yen and support a global economic recovery next year and beyond. Several notable positives are contributing to this outlook. Rising machinery orders from Asia and a boost to Japanese retail sales from tourism, combined with a stronger yen and controlled inflation, should boost Japanese consumers' purchasing power and encourage higher consumption. In addition, global semiconductor sales driven by IT and AI developments. mainly in the US and to a lesser extent in Asia, point to robust growth potential despite concerns about the elevated valuations of related stocks. In this environment, we expect the market to shift towards stocks that would benefit from the Fed's new easing stance and the associated economic recovery scenario. This shift should favour our portfolio, as we expect our holdings to deliver above-average earnings growth. In our view, the combination of these factors should provide a solid foundation for the medium-term performance of the Japanese equity market, making it a promising area for investment.

GAM Star MBS Total Return

Fund Manager: Gary Singleterry/Tom Mansley/Chen Chien-Chung

30 June 2024

Commentary (Unaudited)

Market backdrop

Financial markets generally saw poor performance in the third quarter of 2023. Growing concerns that central banks might keep rates higher for longer weighed on the bond markets. Weakening economic data and a sharp rise in oil prices resulted in negative performance for most equity markets. However, remarkable rallies emerged in the fourth quarter. Increased expectations for a 'soft landing' drove many markets higher, and in December 2023, the Federal Reserve (Fed) signalled an end to rising rates, which further fuelled market dains.

During the first quarter of 2024, the equity markets benefitted from positive surprises in economic data. However, negative surprises in higher-than-expected inflation data caused sell-offs in the sovereign debt markets as investors pushed back expectations for central bank rate cuts. The second quarter of 2024 was mixed for equity and fixed-income assets. At the beginning of the quarter, stronger US inflation data weighed on US Treasuries and risk assets. However, signs of easing US inflation later in the quarter helped sentiment in risk assets, as US Treasuries rallied with Fed rate cuts being priced into the curve.

During the 12-month reporting period, the S&P 500 Total Return gained 24.5% and reached a new record high in the first half of 2024. The US 10-year Treasury rate finished the period 56 basis points (bps) higher at 4.4%. The 30-year fixed mortgage rate in the US rose slightly, finishing at around 6.9%.

As at the end of May 2024, US housing prices experienced a 0.9% month-over-month increase and grew 5.9% on a year-over-year basis, according to the most recent Case-Shiller Home Price Index release.

Performance

Over the past 12 months, the GAM Star MBS Total Return Fund (USD Ordinary Accumulation share class) has delivered a return of 5.4%, outperforming the ICE BofA US Mortgage-Backed Securities in USD which rose by 2.1%.

Positioning

The majority of the fund is invested in non-agency residential mortgage-backed securities issued prior to the 2008-2009 credit crisis (Legacy RMBS), resulting in a more substantial home equity buffer than recently issued mortgages. Approximately 10% of the fund is invested in commercial mortgages. These investments focus on apartment complexes that are currently benefiting from low vacancy rates. We continue to avoid large retail shopping malls and office buildings, anticipating further market adjustments due to unresolved problem loans in these areas.

Approximately 95% of the securities in the fund hold the most senior position in the capital structure. We feel that this defensive positioning is appropriate given that we can still achieve an attractive yield even with a conservative portfolio. In terms of duration, we continue to maintain a low effective duration of around one year.

Outlook

The outlook for the US housing market remains positive. Home prices continue to increase due to the persistent lack of supply. Mortgage credit is still fundamentally sound, as mortgage foreclosure rates are still low and the increase in home prices gives homeowners a cushion of additional equity in their houses. We believe the US housing market will be stable going forward.

In the non-agency RMBS space, we continue to see relatively stable spreads during the second quarter. Net issuance in the non-agency RMBS sector has also been slightly negative this year, so this supply and demand dynamic has helped spread stability. The low supply of homes available for sale has limited the supply of new mortgages from purchase activity, and higher mortgage rates have resulted in muted refinancing, also limiting the supply of new mortgages.

GAM Star Tactical Opportunities

Fund Manager: Andrea Quapp/Fabio Di Grezia/Daniel Rossacher/Sandra Wolfensberger

30 June 2024

Commentary (Unaudited)

Market backdrop

While global stock markets delivered robust returns over the year under review, with US equities the star performers, bond markets produced more muted returns. During H2 2023 optimism grew over the prospect for interest rate cuts, although expectations were broadly scaled back in H1 2024. Over the review year, the yield on the benchmark US 10-year Treasury note rose from 3.9% to 4.4%. However, credit markets outperformed their government counterparts, with confidence in the corporate earnings outlook supporting a narrowing of credit spreads.

Performance

The GAM Star Tactical Opportunities Fund (USD Institutional Accumulation share class) rose in value by 4.3%, compared to the 5.5% gain in the US SOFR Secured Overnight Financing Rate Compounded Index benchmark.

Portfolio positioning

Reflecting the fund's unconstrained tactical allocation strategy of focusing on high-quality, stable assets, the portfolio's allocation maintained a concentration on non-UK bonds and cash during the review year. In particular, the fund held significant levels of investment in short-dated US Treasury notes on the basis of their combination of ultra-low risk and attractive levels of yield.

Outlook

Looking ahead, the upcoming November US Presidential election poses a significant challenge to America's exceptionalism amid a deeply divided culture. Despite some political uncertainty, historical data shows that US presidential elections have generally not impacted US equities significantly, except during extreme events like the 2000 and 2008 elections. Although the US budget deficit is high, the country benefits from unique financing and currency privileges. In contrast, we believe that Europe and the UK face challenges due to lack of fiscal and banking union and productivity issues, respectively. Emerging markets must navigate China-specific risks and a strong US dollar, which attracts global capital. Despite global economic diversity, in our view, the prospect of another American decade remains strong.

Fund Manager: Paul Markham

30 June 2024

Commentary (Unaudited)

Market backdrop

Global equity markets have shown resilience, with the GAM Star Disruptive Growth Fund adjusting to the financial landscape's shifts. Strategic responses to global political events and monetary policy changes have kept the fund well-positioned. The global economic recovery and technological advancements have contributed to the fund's robust performance, with the MSCI World Growth Index (USD) rising by 26.6%. The fund's journey through the year highlights its resilience and strategic adaptability in the face of economic indicators and market volatility.

Performance

Over the past 12 months, the Fund (USD Ordinary Accumulation share class) has delivered an impressive return of 29.7%, surpassing the MSCI World Growth Index (USD Gross Total Return) which rose 26.6% as stated above. This performance is particularly noteworthy given the volatility encountered in the software and services sector. Despite facing challenges, such as the significant price drop of Fastly following their earnings announcement, the fund's diversified holdings have effectively mitigated setbacks.

Positioning

Upon my arrival at GAM Investments in February 2024, I initiated a strategic realignment of the portfolio to reflect our investment convictions. With market multiples appearing stretched, we pivoted away from stocks at the higher end of the valuation spectrum, particularly as we neared the anniversary of the AI-led growth surge in 2023. Our objective has been to strike a balance between risk and reward, and we've been diligently reshaping the portfolio accordingly.

We have identified and capitalised on more favourable risk-reward opportunities, particularly in the semiconductor sector. We have strengthened our position in Micron and initiated a stake in Apple during a period of significant underperformance. It has since become one of our top five holdings on an absolute basis.

Outlook

Despite the mixed economic data from the US, the market is leaning towards a positive outlook for global markets, buoyed by the anticipation of rate cuts and generally favourable corporate earnings. However, the volatility observed in the last earnings season is expected to persist, exacerbated by reduced liquidity in summer and heightened focus on the US elections. For investors, this volatility is not necessarily a prompt for excessive trading but rather an opportunity to adjust positions in favoured names when market movements seem irrational in the context of long-term investment cases.

We remain committed to a disciplined approach in evaluating our portfolio's positioning, with an emphasis on broadening exposure to sectoral disruption and maintaining strict valuation discipline. This strategy positions us to navigate the current market dynamics effectively, capitalising on opportunities while mitigating risks.

Market backdrop

The US equity market has shown resilience, with the GAM Star US All Cap Equity Fund adjusting to the financial landscape's shifts. Strategic responses to global political events and monetary policy changes have kept the fund well-positioned. The global economic recovery and technological advancements have contributed to the fund's robust performance, with the S&P 500 Index (USD) rising by 24.5%. The fund's journey through the year highlights its resilience and strategic adaptability in the face of economic indicators and market volatility.

Performance

Over the past 12 months, the fund (USD Ordinary Accumulation share class) has delivered an impressive return of 40.0%, surpassing the S&P 500 Index (USD Gross Total Return) which rose 24.6%. This performance is particularly noteworthy given the volatility encountered in the software and services sector. Despite facing challenges, the fund's diversified holdings have effectively mitigated setbacks.

Positioning

Upon my arrival at GAM Investments in February 2024, I initiated a strategic realignment of the portfolio to reflect our investment convictions. With market multiples appearing stretched, we pivoted away from stocks at the higher end of the valuation spectrum, particularly as we neared the anniversary of the Al-led growth surge in 2023. Our objective has been to strike a balance between risk and reward, and we've been diligently reshaping the portfolio accordingly.

We have identified and capitalised on more favourable risk-reward opportunities, particularly in the semiconductor sector. We have strengthened our position in Micron and initiated a stake in Apple during a period of significant underperformance. It has since become one of our top five holdings on an absolute basis.

Outlook

Despite the mixed economic data from the US, the market is leaning towards a positive outlook for the US market, buoyed by the anticipation of rate cuts and generally favourable corporate earnings. However, the volatility observed in the last earnings season is expected to persist, exacerbated by reduced liquidity in summer and heightened focus on the US elections. For investors, this volatility is not necessarily a prompt for excessive trading but rather an opportunity to adjust positions in favoured names when market movements seem irrational in the context of long-term investment cases.

We remain committed to a disciplined approach in evaluating our portfolio's positioning, with an emphasis on broadening exposure to sectoral disruption and maintaining strict valuation discipline. This strategy positions us to navigate the current market dynamics effectively, capitalising on opportunities while mitigating risks.

GAM Star Worldwide Equity

Fund Manager: Paul Markham

30 June 2024

Commentary (Unaudited)

Market backdrop

Global equity markets have shown resilience, with the GAM Star Worldwide Equity Fund adjusting to the financial landscape's shifts. Strategic responses to global political events and monetary policy changes have kept the fund well-positioned. The global economic recovery and technological advancements have contributed to the fund's robust performance, with the MSCI World Gross Index (USD) rising by 20.8%. The fund's journey through the year highlights its resilience and strategic adaptability in the face of economic indicators and market volatility.

Performance

Over the past 12 months, the fund (USD Ordinary Accumulation share class) has delivered an impressive return of 31.4%, surpassing the MSCI World Gross Index (USD) which rose 20.8% as stated above. This performance is particularly noteworthy given the volatility encountered in the software and services sector. Despite facing challenges, such as the significant price drop of Fastly following their earnings announcement, the fund's diversified holdings have effectively mitigated setbacks.

Positioning

Upon my arrival at GAM Investments in February 2024, I initiated a strategic realignment of the portfolio to reflect our investment convictions. With market multiples appearing stretched, we pivoted away from stocks at the higher end of the valuation spectrum, particularly as we neared the anniversary of the AI-led growth surge in 2023. Our objective has been to strike a balance between risk and reward, and we've been diligently reshaping the portfolio accordingly.

We have identified and capitalised on more favourable risk-reward opportunities, particularly in the semiconductor sector. We have strengthened our position in Micron and initiated a stake in Apple during a period of significant underperformance. It has become one of our top five holdings on an absolute basis.

Additionally, we have invested in Tencent, the world's leading video gaming company by revenue, and Novo Nordisk, a specialist in diabetes and weight-loss drugs. These moves are indicative of our proactive investment approach, positioning the portfolio for sustained growth in a dynamic market landscape. Novo Nordisk, in particular, has become one of our top 10 holdings, representing 4.2% of the portfolio as of 30 June 2024, reflecting our confidence in its growth trajectory within the expanding markets for obesity and diabetes treatments.

Outlook

Despite the mixed economic data from the US, the market is leaning towards a positive outlook for the US market, buoyed by the anticipation of rate cuts and generally favourable corporate earnings. However, the volatility observed in the last earnings season is expected to persist, exacerbated by reduced liquidity in summer and heightened focus on the US elections. For investors, this volatility is not necessarily a prompt for excessive trading but rather an opportunity to adjust positions in favoured names when market movements seem irrational in the context of long-term investment cases.

We remain committed to a disciplined approach in evaluating our portfolio's positioning, with an emphasis on broadening exposure to sectoral disruption and maintaining strict valuation discipline. This strategy positions us to navigate the current market dynamics effectively, capitalising on opportunities while mitigating risks.

30 June 2024

Commentary (Unaudited)

Market backdrop

Market sentiment was strong over the past year, leading to a large tightening of European (EUR) investment grade (IG) corporate spreads by 44 basis points (bps). Credit has performed well against a backdrop of gradually declining inflation and resilient growth data, pointing to a soft-landing scenario. Risk-off events were short-lived and small in magnitude, as geopolitical tensions in the middle east at the end of 2023 and French political uncertainty in June 2024 did not derail the bullish tone. Rates ended the last twelve months slightly higher in the eurozone, with 10-year German Bund yield up 11 bps, with a more material move higher in the US (10-year US treasury yields up 56 bps). Markets have remained very resilient despite a material re-pricing of rate cuts on both sides of the pond in 2024, as investors shifted from embracing the central bank 'pivot' narrative in Q4 to pricing in a 'higher for longer' scenario and more visibility on rate cuts starting in 2024 (despite landing' scenario and more visibility on rate cuts starting in 2024 (despite fewer of those priced in), risk assets have performed well.

Technicals have remained supportive, as fund flows into credit funds were strong over the quarter.

The Bloomberg Euro Aggregate Corporate Total Return Index (EUR) were positive during the year (+6.4%), driven mainly by tighter spreads.

Performance

The Fund's NAV (EUR Z Accumulation share class) increased by 9.6% during the year. The fund's performance during the year was mainly driven by the tightening of spreads and the income captured. Financials outperformed non-financials over the past year, as EUR IG financial bonds tightened by 67 bps on average compared to 25 bps for non-financials. Subordinated debt performed very well, as IG-rated Tier 2s from European banks and insurers were 80 bps tighter and EUR-denominated Additional (AT1) Contingent Convertible bonds (CoCos) 175 bps tighter.

Performance contributors & detractors

The aggregate contribution of the top 10 contributors was around 430 bps over the quarter. Top contributors were mainly insurance Tier 2s that benefitted from spread tightening as well as bank Tier 2s and AT1 CoCos.

The bottom 10 detractors had a marginal positive impact.

Positioning

In terms of positioning, we reduced our holdings in AT1 CoCos following the strong rally that started in November/December 2023. The exposure of the fund to AT1s now stands at 0% compared to 8.9% in end-June 2023, reflecting tighter spreads and the somewhat less attractive risk return. As spreads have tightened materially and EUR AT1 CoCos have returned 18.2%, we have reallocated a large part of our exposure to Tier 2s and senior bonds where we see better risk/reward. The allocation to Tier 2s and seniors have both increased while our cash allocation has declined as well, taking advantage of new issues and market opportunities.

We also added some duration over the year, from 4.1 to 4.4 reflecting the rise in rates in the first half of 2024.

Outlook

We remain positive going forward, with attractive spreads against a backdrop of very strong credit quality. We continue to see financials as the most attractive part of the market, with rock-solid fundamentals and earnings that have benefitted from the normalisation of interest rates. With a yield to next call of 4.4% and an average spread (G-spread) of circa 160 bps on the fund (compared to 3.8% / 119 bps for the EUR IG corporate market), we see this as an opportunity to capture high income with upside potential from tightening spreads. This positive perspective is maintained despite the fund's high-quality bias, with an average bond rating of BBB+ and an average issuer rating of A, and similar duration compared to EUR IG corporates.

August 2024

GAM Sustainable Climate Bond	Euro

The Company is an umbrella fund with segregated liability between Funds. Accordingly any liability incurred on behalf of or attributable to any Fund of the Company shall be discharged solely out of the assets of that Fund, and neither the Company nor any director, receiver, examiner, liquidator, provisional liquidator or other person shall apply, nor be obliged to apply, the assets of any such Fund in satisfaction of any liability incurred on behalf of or attributable to any other Fund of the Company, irrespective of when such liability was incurred.

2. Accounting policies

The significant accounting policies and estimations techniques adopted by the Company are as follows:

(a) Basis of preparation of financial statements

These financial statements have been prepared in accordance with FRS 102: the Financial Reporting Standard applicable in the Republic of Ireland, Irish Statute comprising the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and under the Central Bank

(Supervision and Enforcement) Act, 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). Accounting standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those published by the Institute of Chartered Accountants in Ireland and issued by the Financial Reporting Council ("FRC").

The Companies Act 2014 prescribed formats for financial statements have been adapted to make them more applicable to investment funds. The Company has availed of the exemption available to open ended investment funds that hold a substantial proportion of highly liquid and fair valued investments under FRS 102 and is not presenting cash flow statement. The information required by FRS 102 to be included in a statement of comprehensive income, is in the opinion of the Directors, contained in the Profit and Loss Account of each Fund.

On initial application of FRS 102, in accounting for its financial instruments, a reporting entity is required to apply either a) the full requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments Issues, b) the recognition and measurement provisions of IAS 39 Financial Instruments: Recognition and Measurement and only the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments or c) the recognition and measurement provisions of IFRS 9 Financial Instruments and only the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments or c) the recognition and measurement provisions of IFRS 9 Financial Instruments and only the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments.

The Company has elected to apply the recognition and measurement provisions of IAS 39 and only the disclosure requirements of FRS 102.

In arriving at the results for the financial year, all amounts in the Profit and Loss Account related to continuing activities for all open Funds. The open Funds noted within note 1 are prepared on a going concern basis, with the exception of GAM Star Alpha Technology and GAM Star US All Cap Equity which are prepared on a basis other than going concern. In early November it is planned that the GAM Star US All Cap Equity Fund will be merged into the GAM Star Worldwide Equity Fund. In January 2025, it is planned that the GAM Star Alpha Technology will merge into Liontrust Global Funds -Global Alpha Long Short Fund.

In the opinion of the Directors, the financial statements disclose the information required by the Companies Act 2014.

The financial statements have been prepared for all open Funds under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

GAM has entered into a definitive agreement to transfer its Management Company activities to Apex Group Ltd. The transaction is expected to close during the fourth quarter of 2024 which will lead to a change in Manager, Registrar, Transfer Agent and Global Distributor for the Fund. This transaction is subject to applicable regulatory approvals and other operational implementation and customary conditions for such transactions.

2. Accounting policies, continued

(b) Investments at fair value

Classification

This category has two sub-categories: financial assets and liabilities held for trading, and those designated at fair value through profit or loss at inception. Financial assets or liabilities held for trading are acquired or incurred principally for the purpose of selling or repurchasing in the short term. Derivatives are also categorised as held for trading, as the Company does not designate any derivatives as hedges in a hedging relationship.

Recognition/Derecognition

Purchases and sales are recognised on trade date – the date on which the Company commits to purchase or sell the asset. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

Measurement

Financial assets and liabilities are initially recognised at fair value, and transaction costs for all financial assets/liabilities carried at fair value through profit or loss are expensed as incurred. Subsequent to initial recognition, all financial assets and liabilities at fair value through profit or loss are measured at fair value.

The computation of realised gains and losses on sales of financial assets and liabilities at fair value through profit or loss is made on the basis of average cost and accounted for in the Profit and Loss Account.

Gains and losses arising from changes in the fair value of the 'financial assets and financial liabilities at fair value through profit or loss' category are included in the Profit and Loss Account in the financial period in which they arise.

Fair value estimation

The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets and liabilities held by the Company is the last traded price. GAM Star Cat Bond fund positions are fair valued using average of multiple broker quotes, single broker quote or a pricing service.

In the case of any security not listed, quoted or dealt with on a regulated market or for which no quotation or value is readily available which would provide a fair valuation, or in respect of which the price is unrepresentative, the fair value of such security is determined by the Directors or other competent person appointed by the Directors and approved for the purpose by the Depositary, using the market approach which consists of estimating the fair value of these securities using a comparable multiple of revenue for similar guideline public companies.

Shares or units in any collective investment scheme which provides for those shares or units to be redeemed at the option of their holder out of the assets of the undertaking shall be valued at the last published unaudited NAV per share.

The Company may from time to time invest in financial instruments that are not traded in an active market (for example in over the counter derivatives). The fair value is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Valuation techniques used include the use of comparable recent arm's length transactions, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants. Any such securities are disclosed in the portfolio statements.

Critical accounting estimates and assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition seldom equal the actual related results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the financial year are Debt securities as noted below and Level 3 positions as disclosed in note 4 Fair value hierarchy.

Debt securities

Debt securities are valued on the basis of dealer supplied quotations or by using a pricing service selected by the Manager. The fair value of the instrument is estimated using valuation techniques if a quoted market price is not available from a broker/dealer or a third party pricing service. Valuation methods include the use of recent unaffiliated market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Financial derivatives

Funds may hold derivatives for investment purposes and/or efficient portfolio management purposes as described in the relevant Supplement to the Prospectus.

(i) Forward foreign currency exchange contract

When entering into a forward foreign currency exchange contract, the Funds agree to receive or deliver a fixed quantity of foreign currency for an agreed price upon an agreed future date. These contracts are valued daily at the forward rate and the Fund's equity therein, representing unrealised gains or losses on the contracts, is included in the Balance Sheet. The unrealised gain/(loss) on open forward exchange contracts is calculated by reference to the difference between the contracted rate and the rate to close out the contract. Realised and changes in unrealised gains and losses are included in the Profit and Loss Account.

(ii) Futures contract

A futures contract obligates one party to sell and the other party to purchase a specific instrument for an agreed price on an agreed future date. Initial margin deposits made with respect to futures contacts are recognised as assets due from the Fund's broker agent in acquiring the futures position. Subsequent changes in the daily valuation of open contacts are recognised as changes in unrealised gains and losses. Variation margin payments are made or received on traded futures as appreciation or depreciation occurs. Futures contracts are valued using quoted daily settlement prices established by the exchange on which they trade. Realised gains or losses are recorded when a contract is closed and are included in the Profit and Loss Account. Futures contracts are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

- 2. Accounting policies, continued
- (b) Investments at fair value, continued

Financial derivatives, continued

(iii) Contracts for difference

Contracts for difference are Over the Counter ("OTC") derivatives which take advantage of the economic benefits which are not afforded through investing directly in certain securities markets. Funds may purchase equity contracts for difference as a means of gaining exposure to the economic performance and cash flows of an equity security without the need for taking or making physical delivery of the security. A contract for difference is a financial instrument linked to an underlying share price. Consequently, no rights are acquired or obligations incurred relating to the underlying share and the Fund may buy or sell depending on the fund manager's view of a company's share price. Contracts for difference are highly leveraged instruments and for a small deposit it is possible for Fund to hold a position much greater than would be possible with a traditional investment. These are valued daily based on quoted market prices at the balance sheet date. Contracts for difference are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

The fair value of contracts for differences is the difference between the opening price and the volume weighted average price of the financial instrument multiplied by the number of shares specified within the contract.

(iv) Interest rate swaps

Interest rate swaps may be used as a substitute for a physical security or a less expensive or more liquid way of obtaining desired exposures. These are valued on the valuation date using either market vendors or central counterparty clearing house prices and any realised and changes in unrealised gains and losses are included in the Profit and Loss Account. Interest rate swaps are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

Some of the interest rate swaps are centrally cleared positions. In a centrally cleared swap, immediately following execution of the swap agreement, the swap contract is novated to a clearing counterparty and the Funds faces the clearing counterparty through a broker. Upon entering into a centrally cleared swap the Funds are required to deposit initial margin with the broker in the form of cash in an amount that varies depending on the size and risk profile of the swap.

(v) Options contract

An option contract gives the buyer the right, but not the obligation, to buy (call) or sell (put) a financial instrument. Options held by the Funds which are dealt on a recognised market are valued using a settlement price as determined by the recognised market in question. Where a settlement price is not available, the value is the probable realisation value estimated with care and good faith by the Manager. Exchange traded options are valued at the settlement price determined by the relevant exchange. These are valued daily. Options contracts are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

(c) Income from Investments

Dividend income is recognised on the ex-dividend date. All dividends on investments quoted ex dividend up to the Balance Sheet date are included in the Profit and Loss Account.

Bank and other interest receivable is accrued up to this date. Income is shown gross of any non-recoverable withholding taxes, which is disclosed separately in the Profit and Loss Account, and net of attributable tax credits.

Bond interest income on investments on debt securities is recognised when earned using the effective interest method and is shown in the Profit and Loss Account. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to the net carrying amount of the financial asset or liability.

Cash inflows relating to interest payments on swaps are treated as swap income and are shown in the Net gains/(losses) on investments at fair value in the Profit and Loss Account.

(d) Gains and losses on financial assets and financial liabilities

The net gains and losses from trading in financial assets and financial liabilities shown in the Profit and Loss Account are analysed in note 11 to the financial statements

(e) Foreign Currency Translation – Functional currency and Presentation currency

The financial statements of the individual Funds are prepared in the functional currency of the respective Fund which is also the presentation currency. The functional currency of each Fund is listed in note 1. The functional currency of the Company is US dollar as this reflects the global exposure of the Funds, their shareholders and the markets in which the Funds are available.

The aggregated financial statements of the Company are prepared in the presentation currency of the Company, the US dollar. Amounts of the individual Funds in overseas currencies are translated for the purpose of the aggregation as follows:

- (i) Using average exchange rates (as an approximation of actual) for the financial year for the Profit and Loss Account.
- (ii) Using average exchange rates (as an approximation of actual) for the financial year for the proceeds and cost of issue and redemption of shares for the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders.
- (iii) Using financial year end exchange rates for the Balance Sheet.

For the purposes of producing the aggregated financial statements, the notional currency gain or loss on the re-translation of the opening net assets attributable to redeemable participating shareholders into US dollar, the presentation currency of the Company, is included in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This figure also includes the notional gain or loss from use of average rates as noted above compared to the financial year end exchange rates for the Balance Sheet.

Transactions and balances

Foreign currency transactions are translated into the functional currency of the individual Funds using the average exchange rates (as an approximation of actual).

GAM Star Fund p.l.c.

Notes to the Financial Statements

2. Accounting policies, continued

(e) Foreign Currency Translation – Functional currency and Presentation currency, continued

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at financial year end rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Profit and Loss Account. Translation differences on non-monetary assets and liabilities are recognised in the Profit and Loss Account within net gains/(losses) on investments at fair value line.

(f) Fees and expenses

Fees and expenses are accounted for on an accruals basis and are charged against income and used in determining the distribution.

(g) Allocation of income

All the income of the Funds after deduction of expenses, will be allocated between holders of Accumulation Shares and holders of Income Shares in accordance with their respective interests.

(h) Equalisation

An equalisation account is maintained by each Fund so that the amount distributed is the same for all shares of the same type notwithstanding different dates of issue. A sum equal to that part of the price of a share which reflects the net income at the date of issue or redemption is booked to the equalisation account and added or deducted to/from the first dividend or accumulation in the same accounting period as that in which the shares are issued or redeemed.

(i) Redeemable participating shares

The issued redeemable participating share capital is at all times equal to the NAV of the Company. Redeemable participating shares are redeemable at the shareholders option and are classified as financial liabilities. Redeemable shares can be put back to the Company at any time for cash equal to a proportionate share of the Company's NAV. The redeemable share is carried at the redemption amount that is payable at the balance sheet date if the holder exercises the right to put the share back to the Company. The movement in the number of participating shares is set out in note 15. Each Fund's NAV per share is calculated by dividing the NAV of each Fund being the value of its assets less its liabilities by the numbers of shares of each Fund then in issue.

(j) Distributions

Dividend distributions to redeemable participating shareholders are classified as finance costs in the Profit and Loss Account in the financial year in which they are declared. Where both Income Shares and Accumulation Shares in a Fund are in issue, all income of a Fund after deduction of expenses will be allocated between holders of Accumulation Shares and holders of Income Shares in accordance with their respective interests.

(k) Sundry income

Sundry income includes amounts received by the Company in respect of litigation payments, fee rebates received and in respect of securities lending income. These amounts are recorded on an accruals basis.

(I) Taxes

Liabilities relating to uncertain tax positions are accrued only when such liabilities are probable and can be estimated with reasonable accuracy. This figures are recognised in the Balance Sheet within capital gains tax payable line.

(m) Bond interest receivable on financial assets at fair value through profit or loss

Bond interest receivable on investments in debt securities is recognised when earned using the effective interest method.

(n) Bank interest expense

Bank interest expenses relate to a bank overdraft which is repayable on demand. These figures are recognised in the Profit and Loss Accounts within bank interest.

(o) Amounts receivable for subscriptions and payable for redemptions

Amounts receivable for subscriptions and payable for redemptions relates to subscription in the Company which are not yet paid by the investors and redemptions from the Company that are still to be paid by the Company to the investors.

(p) Amounts receivable from brokers for sales of securities and payable to brokers for purchases of securities

Amounts receivable from brokers for sales of securities and payable to brokers for purchases of securities represent amounts receivable and payable respectively, for transactions contracted for but not yet delivered at the end of the financial year. These amounts are included in the Balance Sheet.

(q) Cash and cash equivalents and bank overdraft

Cash and cash equivalents comprise deposits with banks and highly liquid financial assets with maturities of three months or less from the date of acquisition, that are subject to an in significant risk of changes in their fair value and are used by the Sub-Funds in the management of short-term commitments, other than cash collateral provided in respect of derivatives and securities borrowing transactions.

3. Financial risk management

The investment objectives of the Funds may expose the Company to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk (including cash flow risk) both directly through its own assets and liabilities and indirectly through the assets and liabilities of the funds ("investee funds") that some of the Funds invest in.

As outlined in the Prospectus, the Funds are subject to certain investment restrictions and may also use certain derivative financial instruments for both investment purposes and also in an attempt to moderate certain risk exposures. Further, the Board of Directors of the Company have the power to borrow on a temporary basis. Such borrowing will not exceed 10 per cent of a respective Fund's net assets.

Financial risk management of the Company has been delegated by the Board of Directors (which however remains ultimately responsible) to the Manager. The Board of Directors review the performance of the Company on a quarterly basis and can confirm that there have been no significant changes to risk management procedures since the prior financial year.

3. Financial risk management, continued

(a) Market price risk

The Funds' investments are susceptible to market price risk arising from uncertainties about future prices. It represents the potential loss the Company might suffer through holding market positions in the face of price movements caused by factors specific to the individual investment or factors affecting all instruments traded in the market.

For those Funds, which do not use the Value at Risk ("VaR") approach, the Co-Investment, and Delegate Investment Managers use the analysis of the Funds Investments by Strategy, Sector and Asset Type which show the concentrations of risk and are disclosed in the relevant Portfolio Statement of each Fund.

The Co-Investment Managers and Delegate Investment Managers manage market risk on an ongoing basis by implementing a set of procedures and controls, for those Funds which use the VaR approach, the purpose of which is to manage risk within defined parameters. The Co-Investment Manager regularly review and evaluate each Fund's VaR to assess exposure to market risk. Risk can be calculated using either the commitment approach or VaR method.

Market price sensitivity analysis

At 30 June 2024 and 30 June 2023, if the fair value of investments had changed by 10% with all other variables held constant, this would have resulted in a change of net assets attributable to holders of redeemable shares and would amount to the following:

	30 June 2024	30 June 2023
GAM Star Alpha Spectrum	€7,378,695	€6,533,548

(b) Currency risks

The Funds may hold assets and liabilities denominated in currencies other than their respective functional currency. Therefore they may be exposed to currency risk, as the value of the assets and liabilities denominated in other currencies may fluctuate due to changes in exchange rates.

The Co-Investment Managers and Delegate Investment Managers monitor the currency exposure each dealing day whether used for hedging or investment purposes in accordance with the Prospectus. Currency exposure used for hedging techniques is normally done in order to remove or reduce currency risks within the relevant Fund where appropriate.

Currency risk sensitivity analysis

At 30 June 2024 and 30 June 2023, had the exchange rate between the functional currency and the non functional currencies arising from changes in the value of monetary assets/(liabilities) and hedging positions of the Funds changed by 5%, with all other variables held constant, the impact on net assets attributable to holders of redeemable shares would be as per the overleaf table. Other Funds may not be listed below as they did not hold monetary assets/(liabilities) in non functional currencies at 30 June 2024 and 30 June 2023.

GAM Star Fund p.l.c.

* Fund terminated during the financial year ended 30 June 2023.

(c) Net currency hedging

The following tables sets out the Funds' exposure to foreign currency risk, the notional value of the forward foreign currency exchange contracts designed to hedge this exposure and the resulting net unhedged amounts invested in assets denominated in foreign currency.

In addition to currency risk on a Funds' assets, a class of shares of a Fund may be designated in a currency other than the functional currency of the Fund. Changes in the exchange rate between the functional currency and such designated currency may lead to a depreciation of the value of such shares as expressed in the designated currency. Depreciation of that nature may also occur as a result of changes in the exchange rate between the currency of denomination of the assets of the Fund attributable to that class.

The Fund's Co-Investment Manager and Delegate Investment Manager may or may not try to mitigate these risks by using financial instruments such as forward foreign currency exchange contracts. Although hedging strategies may not necessarily be used in relation to each class of share within a Fund, the financial instruments used to implement such strategies shall be assets/liabilities of the Fund as a whole. However the gains/losses on and the costs of the relevant financial instruments will accrue solely to the relevant class of shares of the Fund.

For those Funds not shown below, all assets/liabilities are in the functional currency of the Fund and are therefore not subject to foreign currency risk.

(d) Interest rate risk

At 30 June 2024 and 30 June 2023 had the interest rates changed by +/-0.75%, with all other variables held constant, the impact on net asset attributable to holders of redeemable shares would be +/- US\$18,969,388 (2023: US\$37,781,040) of the total interest rate sensitivity gap figures presented in the tables below.

The Funds not included in the following tables did not hold interest bearing securities in their porfolios as at 30 June 2024 and therefore were not exposed to material interest rate risk at the financial year end.

The tables below show the expected maturity of Assets and Liabilities held as at 30 June 2024.

The majority of the assets of the other Funds are equity shares and other investments which neither pay interest nor have a maturity date. As a result, these Funds are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

The majority of the cash positions of the Company were held with State Street Bank and Trust, earning interest rates which are based on current, most appropriate rates, less a spread as determined by the Depositary. This interest rate risk is not actively managed.

(e) Credit risk

The Company may be exposed to credit risk, which is the risk that a counterparty to a financial transaction with the Company will be unable to pay amounts in full when due.

For Funds which hold equities, transactions are in exchange traded securities and are settled/paid for upon delivery (DVP Trades) and the risk of default is considered minimal, as security delivery and payment are simultaneous. The trade will fail if either party fails to meet its obligation.

The Company, through the investment in investee funds, may also be exposed to any credit risk which these investee funds have at any point in time. The maximum credit risk which the Company may have in relation to these investments is the value of its investment in the Funds.

Investments in bonds and debt income securities are subject to risk (generally lower where securities are rated above investment grade) that payments may not be made by issuers on due dates or at all.

The Co-Investment Managers and Delegate Investment Managers manage credit risk for cash and derivatives by only using approved counterparties that belong to an internationally recognised financial services firm or alternatively command a high market share in a given market segment. The Company's intention would be to net its liabilities due to any counterparty against any asset due from the same counterparty. Details of investments and cash held with various brokers are disclosed in the relevant Portfolio Statement of each Fund and in note 13. The Company participated in securities lending as disclosed in note 5. The Company ensures that collateral received in respect of securities lent must equal or exceed, in value, at all times, the value of the securities loaned.

The majority of the investments and cash held by each Fund are with the Depositary. Cash and bank balances and margin cash balances are unsecured balances held with the Depositary and counterparties as set out in note 13. Bankruptcy or insolvency of the Depositary or brokers it uses may cause the Company's rights with respect to its cash and investments held by the Depositary or brokers to be delayed or limited. Please refer to note 5 for amounts held as collateral for stock lending as 30 June 2024 and 30 June 2023.

The Company's investments held with the Depositary are held within segregated accounts. Any profit (net of margin held by the Company) on over the counter derivatives due from counterparties is unsecured. At 30 June 2024 and 30 June 2023, the credit rating of the Depositary was equal to A according to Standard & Poor's.

(f) Liquidity risk

The majority of Funds are exposed to daily cash redemptions of redeemable shares and therefore may be exposed to liquidity risk and cash flow risk which is the risk that they will encounter difficulty in liquidating assets to fund redemptions. However, as the Funds invest the majority of their assets in investments that are traded in active markets and can be readily disposed of, liquidity risk and cash flow risk is considered low. The Co-Investment Managers and Delegate Investment Managers manage liquidity risk and cash flow risk through the diversification of investments and investment strategies and through their overall investment approach.

The Directors are entitled to limit the number of Shares of a Fund redeemed on any Dealing Day to 10% of the total number of Shares of that Fund in issue or equal to 10% or more of the Net Asset Value of a particular Fund. In this event, the limitation will apply pro rata so that all Shareholders wishing to have their Shares of that Fund redeemed on that Dealing Day will realise the same proportion of such Shares for which a redemption request has been accepted by the Manager and any Shares not redeemed, but which would otherwise have been redeemed, will be carried forward to be

3. Financial risk management, continued

(f) Liquidity risk, continued

redeemed on the next Dealing Day. If requests for the redemption of Shares are so carried forward, the Directors will inform the Shareholders affected.

The Articles contain special provisions where redemption requests received from any one Shareholder would result in more than 5% of the Net Asset Value of Shares of the relevant Fund being redeemed by the Shareholders of the Company on any Dealing Day. In such a case, the Company may, without the consent of the Shareholder, satisfy the redemption request by a distribution of investments in specie and may, elect by notice in writing to the Shareholder to appropriate and transfer to him such assets in satisfaction or part satisfaction of the redemption price or any part of the said redemption price, provided that any such distribution will cause no material prejudice to the interests of remaining Shareholders. Where a notice of election is served on a Shareholder, the Shareholder may, by a further notice served on the Company, require the Company instead of transferring the assets in question to arrange for a sale of the assets on behalf of the Applicant after the repurchase has been effected in a method and at a price to be chosen at the Company's sole discretion and for payment to the Shareholder of the net proceeds of sale.

Termination of a Fund or Share Class

The Manager may close or terminate a Fund or a Share class of a Fund or a Series of Shares at its absolute discretion through the return of capital to the Shareholders in the circumstances set out in the Articles of Association which includes inter alia, where after the date of first issue of Shares in the Fund, Share class or Series, the Net Asset Value of the Fund or Share Class or Series is less than US\$ 50,000,000 (or its foreign currency equivalent).

Suspension of Determination of NAV and or issue, redemption and switching

The Directors may at any time declare a temporary suspension of the calculation of the Net Asset Value of any Fund and the issue/redemption of Shares of any Fund and the switching of Shares in one Fund for those of another or between classes or Series in the one Fund.

Any such suspension of the determination of the NAV of any Fund and/or issue, redemption and/or switching of the Shares shall be notified immediately (without delay) to the Central Bank and to the competent authorities in the Member States in which the relevant class of Shares or Series is marketed. It shall also be notified if applicable to Euronext Dublin and to Shareholders requesting the issue or redemption of Shares of the relevant class or Series by the Directors at the time of application or the making of the irrevocable request to redeem. Any such redemption request which is not withdrawn shall be dealt with on the first Dealing Day after the suspension is lifted at the relevant redemption price prevailing on that day.

Any such suspension of switching of Shares shall be notified to the Shareholders requesting such a switch and, where the relevant switch notice is not withdrawn, any such switch shall be dealt with on the first Dealing Day after such suspension is lifted.

Where the Directors declare a temporary suspension of the determination of the NAV of the Fund, no Shares will be issued (except where an application for Shares was previously received), redeemed or switched on any Dealing Day during the financial

period of suspension. Where the Directors only declare a temporary suspension of the issue, redemption and/or switching of Shares, the determination of the NAV of the relevant Fund, class of Shares and Series and the NAV per Share shall continue to be calculated.

The Company may from time to time invest in derivative contracts traded over the counter and certain other investments, which are not traded in an organised market and may be illiquid. As a result, the Company may not be able to liquidate quickly its investments in these instruments at an amount close to their fair value to meet its liquidity requirements or to respond to specific events such as deterioration in the credit worthiness of any particular issuer. Details of open derivative contracts are disclosed in the relevant Portfolio Statement of each Fund.

The tables overleaf analyses the Company's financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to contractual maturity date. The amounts in the tables are the contractual undiscounted cash flows.

* Fund terminated during the financial year ended 30 June 2023.

In the event of liquidity issues, the Company may borrow to meet redemptions. The Directors are also entitled to limit the number of shares of a Fund redeemed on any dealing day to 10% of the total number of shares of that Fund in issue.

4. Fair value hierarchy

The Company is required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The guidance establishes three levels of the fair value hierarchy as follows:

Level 1: Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date:

Level 2: Inputs other than quoted prices from active markets that are observable for the asset or liability either directly or indirectly, including inputs from markets that are not considered to be active;

Level 3: Inputs that are unobservable and are significant to the valuation.

The Company uses the "market approach" valuation technique to value its investments. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" may require significant judgement but can generally be considered as that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorisation of a financial As at 30 June 2024

instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the risk of that instrument.

Investments typically classified within level 1 include active listed equities, exchange traded derivatives and certain government bonds. Investments typically classified within level 2 include investments in corporate bonds, certain government bonds, certain listed equities and over the counter derivatives. Investment funds are also considered level 2 investments if there is evidence that redemptions occurred during the financial year and there were no restrictions preventing redemptions at the financial year end. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability. Such adjustments are generally based on available market information.

Investments typically classified within level 3 include positions priced by single broker quote, certain corporate bonds, private equities and investment funds that have suspended redemptions, created side pocket classes or imposed gates. Within level 3, the use of the market approach generally consists of using comparable market transactions.

GAM Star Composite Global Equity	US\$	52,457	55,082	4,861,671	5,065,170
GAM Star Flexible Global Portfolio	€	-	-	8,586,386	8,957,446
GAM Star Japan Leaders	¥	1,872,600,770	2,251,389,164	3,681,683,709	3,860,335,738
GAM Star Disruptive Growth	US\$	2,041,455	2,579,846	4,461,837	4,573,356

* The Fund no longer participates in the securities lending programme from the end of March 2024.

The collateral noted above, consisted of sovereign bonds issued by the government of the United States of America (30 June 2023: sovereign bonds issued by the governments of Belgium, Canada, France, Germany, Sweden, Switzerland, the Netherlands, the United Kingdom and the United States of America).

6. Taxation

Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997 (as amended). It is not chargeable to Irish tax on its income and gains. However, tax can arise on the happening of a "Chargeable Event" in the Company. A Chargeable Event includes any distribution payments to shareholders or any encashment, cancellation, redemption or transfer of shares.

No Irish tax will arise on the Company in respect of Chargeable Events in respect of a shareholder who is not an Irish Resident and not Ordinarily Resident for tax purposes in Ireland at the time of the Chargeable Event provided that the appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act 1997, (as amended), are held by the Company; and certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations. Following changes introduced by Finance Act 2010, investment undertakings will no longer be required to obtain relevant declarations from shareholders who are neither Irish Resident nor Ordinarily Resident in Ireland where the investment undertaking is not actively marketed to Irish investors and the Irish Revenue have given the investment undertaking the appropriate approval. With effect from 3 April 2010 a chargeable event will not arise if at the time of the chargeable event appropriate equivalent measures have been put in place by the Company to ensure that shareholders in the Company are neither Irish Resident nor Ordinarily Resident in Ireland and the Company has received approval from the Irish Revenue Commissioners to this effect and the approval has not been withdrawn.

6. Taxation, continued

Dividends, interest and capital gains (if any) which the Company receives with respect to its investments may be subject to taxes, including withholding taxes, in the countries in which the issuers of the investments are located and such taxes may not be recoverable by the Company or its shareholders.

7. Exchange rates

The average exchange rates used to convert the Statement of Comprehensive Income and Statement of Changes in Net Assets Attributable to Holders of Redeemable Share into US dollars were:

	30 June 2024	30 June 2023
Euro	0.9231	0.9552
Pound sterling	0.7933	0.8289
Japanese yen	149.7065	137.9604

UAE dirham	3.6730	3.6731
Vietnamese dong	25,455.0000	23,585.0000

8. Use of derivatives for Efficient Portfolio Management

For UCITS which have engaged in efficient portfolio management techniques, disclosures are required under the Central Bank UCITS Regulations. Subject to the conditions and within the limits from time to time laid down by the Central Bank of Ireland, and except as otherwise stated in the investment objective and policies of a Fund, the Co-Investment Managers and/or Delegate Investment Managers may employ, for certain Funds, investment techniques and instruments such as futures, options, forward foreign currency exchange contracts and other derivatives for investment purposes or efficient portfolio management. Furthermore, new techniques and instruments may be developed which may be suitable for use by a Fund in the future, and a Fund may employ such techniques and instruments subject to the prior approval of, and any restrictions imposed by, the Central Bank of Ireland.

The Co-Investment Managers and/or Delegate Investment Managers of the Funds have identified that all financial derivative instruments are transactions designed to deliver additional returns through efficient portfolio management.

Details of all open transactions at the financial year end are disclosed in the Portfolio of Investments.

Securities lending transactions

Certain Funds may also utilise stock lending agreements for efficient portfolio management purposes as described above. All revenues from these arrangements entered into by a Fund, net of direct and indirect operational costs, will be returned to the relevant Fund. In such transactions the Fund may temporarily transfer its securities to a borrower, with agreement by the borrower to return equivalent securities to the Fund at a pre-agreed time. The identities of the entities to which any direct and indirect costs and fees are paid are disclosed in note 5. For further information on securities lending please refer to note 5.

9. Significant agreements and transactions with related parties

The Company and the Directors

Deborah Reidy and Andrew Bates each received a fee at the annual rate of €30,000 (2023: €30,000) gross subject to income tax deductions for their services as Directors to the Company for the year ended 30 June 2024. Kishen Pattani waived his fee for acting as a Director of the Company.

See note 12(b) for legal fees and directors fees incurred by the Company.

The Company and the Manager, the Global Distributor and the Investment Managers

At the financial year end, accrued expenses included amounts owing to the Manager, the Global Distributor and the Co-Investment Managers of US\$5,005,395 (2023: US\$6,115,885).

See note 12(b) for the Manager, the Global Distributor and the Investment Manager fees incurred by each Fund.

During the year, the Company sold securities to another entity managed by the Delegate Investment Manager from GAM Star Cat Bond with a sales proceeds of approximately US\$80 million. The sale of securities gave rise to realised loss of US\$0.2 million.

On 12 February 2024, securities with a fair value of US\$261,262,031 were transferred by inspecie redemption to another entity managed by the Delegate Investment Manager from GAM Star Cat Bond. A further amount of US\$6,997,530 in cash was also transferred.

Any such transactions have been entered into the ordinary course of business.

GAM Star Fund p.l.c.

Notes to the Financial Statements

9. Significant agreements and transactions with related parties, continued

See note 10 for performance fees incurred by the Company.

During financial year ended 30 June 2023 and 30 June 2024 the following GAM Star funds: GAM Star Alpha Spectrum, GAM Star Composite Global Equity, GAM Star Flexible Global Portfolio, invested in other GAM Fund: GAM Multistock - Emerging Markets Equity. Please refer to Portfolio Statements for more details.

See note 14 for holdings in other GAM Star Funds.

The Directors are not aware of any other related party transactions except for those disclosed in these financial statements.

The Company invests in other funds that are also managed by the Co-Investment Managers of the Company. There are no management fees charged on these investments at the Company level.

10. Performance fee

The Co–Investment Managers may be entitled to receive an annual performance fee on certain classes of some Funds. Any performance fee is accrued on each valuation day and paid annually in arrears at the end of June each financial year and is based on net realised and net unrealised gains and losses of the relevant classes subject to a high water mark only or a combination of high water mark and a benchmark where relevant. The performance fee rates applied to the Funds may differ within the range of 10% to 20%. Dividend distributions paid out shall not be deemed to impact the performance of the share classes within the Funds. Therefore the amount outstanding for the performance fee at the end of each financial year is the same as the amount expensed for that financial year.

The following table discloses the list of Funds entitled to an annual performance fee. Details of Performance fees per share class are shown in Additional Information and Regulatory Requirements (Unaudited) Section of these Financial Statements.

Calculation Basis

Fund	High Water Mark	Benchmark	Performance fee %	Performance fee 2024	Performance fee 2023

15. Share capital

As at 30 June 2024

Authorised

The authorised share capital of the Company is \in 60,000 divided into 30,000 subscriber shares of \in 2.00 each and 10,000,000,000 shares of no par value initially designated as unclassified shares.

Subscriber shares

The issued share capital of the Company as at 30 June 2024 is \in 60,000 divided into 30,000 subscriber shares of \in 2.00 each, of which \in 9,529.70 has been paid up and which are beneficially owned by the Manager. The subscriber shares do not form part of the net asset value of the Company and are thus disclosed in the financial statements by way of this note only.

In the opinion of the Directors, this disclosure reflects the nature of the Company's business as an investment fund.

Redeemable participating shares

463,557,083 (2023: 603,241,211) redeemable participating shares of no par value designated in different classes in different Funds have been issued as shares at the discretion of the Manager. The issue price is payable in full on acceptance. The shares carry no preferential or pre-emptive rights.

15. Share capital, continued

As at 30 June 2024

The movement in the number of redeemable shares for the financial years ended 30 June 2024 and 30 June 2023 are as follow:

17. Dividend distribution

The tables below include Dividend distribution detail of each share class in each Fund as at 30 June 2024 and 30 June 2023. The declared dividend distributions with a record date of 30 June 2024 are accounted for within the Annual Report. The dates referred to in the table below relate to the next NAV calculation date per the prospectus. The columns "Gross Amount", "Income received", "Income deducted" and "Net Distribution" presented in the below tables disclose these amounts in each Fund's base currency.

*Figures are shown before Value Added Tax.

There were no other non audit services provided to the Company.

Notes to the Financial Statements

20. Soft commissions

There were no soft commissions agreement during the year.

21. Significant events during the financial year

With effect from 11 August 2023, there has been a second addendum to the Prospectus issued on 1 December 2022.

With effect from 29 August 2023, the share class M USD Acc of GAM Star Disruptive Growth has been renamed to N USD Acc and the N USD Acc share class has been renamed M USD Acc.

With effect from 22 September 2023, there has been a third addendum to the Prospectus issued on 1 December 2022.

With effect from 27 October 2023, there has been a fourth addendum to the Prospectus issued on 1 December 2022.

With effect from 7 December 2023 a new Prospectus was issued.

With effect from 15 December 2023 a new Prospectus was issued.

With effect from 15 February 2024 Tages Capital LLP was added as Delegated Investment Manager to GAM Star Global Rates.

With effect from 15 February 2024, there has been a first addendum to the Prospectus issued on 15 December 2023.

On 4 May 2023, the Company's Investment Manager ultimate parent company, GAM Holding AG, agreed with Liontrust Asset Management Plc (Liontrust) to enter into a transaction agreement (Agreement) for a public share exchange offer by Liontrust for 100% of the equity share capital of GAM Holding AG. On 29 August 2023, Liontrust officially declared the offer as unsuccessful.

Following the above, GAM Holding AG entered discussions with representatives of the investor group "NewGAMe". Throughout the year, NewGAMe invested in shares of GAM Holding AG through the primary market and by completing a tender offer. Further to this, an ordinary capital increase by way of a rights issue was approved by shareholders during the GAM Holding AG AGM. Following these transactions, NewGAMe is now the largest shareholder of GAM Holding AG.

With effect from 8 May 2024, there has been a second addendum to the Prospectus issued on 15 December 2023.

With effect from 8 May 2024, Liontrust Investment Partners LLP was added as Delegate Investment Manager to GAM Star Alpha Technology.

With effect from 9 May 2024, there has been a third addendum to the Prospectus issued on 15 December 2023.

Further details on these addendums can be found within the Additional Information on page 341.

There were no other significant events affecting the Company during the financial year.

22. Events since financial year end

With effect from 19 July 2024, there has been a fourth addendum to the Prospectus issued on 15 December 2023.

With effect from 29 July 2024, there has been a fifth addendum to the Prospectus issued on 15 December 2023.

With effect from 25 September 2024, GAM Star Worldwide Equity will change its name to GAM Star Global Equity. The investment policy of fund will be updated to provide up to 40% of fund's NAV and may be exposed to emerging markets. The benchmark will transition from MSCI World / USD average 1 month deposit rate to the MSCI AR World NDR.

In early November it is planned that the GAM Star US All Cap Equity Fund will be merged into the GAM Star Worldwide Equity Fund.

GAM has entered into a definitive agreement to transfer its Management Company activities to Apex Group Ltd. The transaction is expected to close during the fourth quarter of 2024 which will lead to a change in Manager, Registrar, Transfer Agent and Global Distributor for the Company. This transaction is subject to applicable regulatory approvals and other operational implementation and customary conditions for such transactions.

It is planned that the following funds names will change and the investment policies will be amended in the coming month:

- GAM Star Global Balanced to GAM Star Global Flexible. The revised investment objective of the Fund will be to "achieve capital preservation accompanied by stable returns via a dynamic asset allocation, using a flexible approach".

- GAM Star Global Growth to GAM Star Global Aggressive. The revised investment objective of the Fund will be to "achieve capital preservation accompanied by stable returns via a dynamic asset allocation, using an aggressive approach".

- GAM Star Global Defensive to GAM Star Global Moderate. The revised investment objective of the Fund will be to "achieve capital preservation accompanied by stable returns via a dynamic asset allocation, using a moderate approach".

- GAM Star Global Cautious will change its investment policy. The revised investment objective of the Fund will be to "achieve capital preservation accompanied by stable returns via a dynamic asset allocation, using a cautious approach".

In January 2025, it is planned that the GAM Star Alpha Technology will merge into Liontrust Global Funds - Global Alpha Long Short Fund.

There have been no other significant events affecting the Company since the financial year end.

GAM Star Fund p.l.c.

Notes to the Financial Statements

23. Approval of Financial Statements

The financial statements were approved by the Board on 24 October 2024.

Statement of Depositary Responsibilities

The Depositary is required under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended), and under the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (together the "UCITS Regulations and the Central Bank UCITS Regulations") to:

- 1. ensure that the sale, issue, repurchase, redemption and cancellation of shares effected by or on behalf of the Company are carried out in accordance with the UCITS Regulations and Central Bank UCITS Regulations and in accordance with Constitution (the "Constitution").
- 2. ensure that the value of shares is calculated in accordance with the UCITS Regulations and Central Bank UCITS Regulations and the Constitution.
- 3. carry out the instructions of the Company unless they conflict with the UCITS Regulations and Central Bank UCITS Regulations or the Constitution.
- 4. ensure that in transactions involving the Company's assets, any consideration is remitted to it within time limits which are acceptable market practice in the context of a particular transaction.
- 5. ensure that the Company's income is applied in accordance with the UCITS Regulations and Central Bank UCITS Regulations and the Constitution.
- 6. enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders. The Depositary's report shall be delivered to the Company in good time to enable the Company to include a copy of the report in its Annual Report. The Depositary's Report shall state whether in the Depositary's opinion the Company has been managed in that financial period:
 - (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Constitution and the UCITS Regulations and Central Bank UCITS Regulations; and
 - (ii) otherwise in accordance with the provisions of the Constitution and the UCITS Regulations and Central Bank UCITS Regulations.

If the Company does not comply with (i) or (ii) above, the Depositary must state why this is the case and outline the steps which the Depositary has taken to rectify the situation.

7. notify the Central Bank of Ireland promptly of any material breach of the UCITS Regulations and Central Bank UCITS Regulations, conditions imposed by the Central Bank of Ireland or provisions of the prospectus with regard to the Company.

The duties provided for above may not be delegated by the Depositary to a third party. These duties must be carried out in the State.

The Depositary also takes into its custody or under its control all the assets of the Company and holds them in safekeeping for the shareholders.

Report of the Depositary to the Shareholders for the financial year ended 30 June 2024.

We have enquired into the conduct of GAM Star Fund p.l.c. ('the Company') for the financial year ended 30 June 2024, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that financial period in accordance with the provisions of the Company's Memorandum and Articles of Association (the "Constitution") and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Constitution and the UCITS Regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the financial year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Constitution, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ('the Central Bank UCITS Regulations'); and
- (ii) otherwise in accordance with the provisions of the Constitution, the UCITS Regulations and the Central Bank UCITS Regulations.

State Street Custodial Services (Ireland) Limited 78 Sir John Rogerson's Quay Dublin 2 Ireland

Date: 24 October 2024

Independent auditors' report to the members of GAM Star Fund p.l.c.

Report on the audit of the financial statements

Opinion

In our opinion, GAM Star Fund p.l.c.'s financial statements:

- give a true and fair view of the Company's and Funds' assets, liabilities and financial position as at 30 June 2024 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Balance Sheet as at 30 June 2024;
- the Profit and Loss Account for the year then ended;
- the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders for the year then ended;
- the Portfolio Statement for each of the Funds as at 30 June 2024; and
- the notes to the financial statements for the Company and for each of its Funds, which include a description of the accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard as applicable to listed entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Emphasis of matter - financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 2(a) to the financial statements which describes the reasons why the financial statements of GAM Star Alpha Technology and GAM Star US All Cap Equity have been prepared on a basis other than going concern.

Our audit approach

Overview

	 Materiality Overall materiality: 50 basis points (2023: 50 basis points) of Net Assets Value ("NAV") at 30 June 2024 (2023: 30 June 2023) for each of the Company's Funds. Performance materiality: 75% of overall materiality.
Materiality	Audit scope
Audit scope	• The Company is an open-ended investment Company with variable capital and engages GAM Fund Management Limited (the "Manager") to manage certain duties and responsibilities with regards to the day-to-day management of the Company. We tailored the scope of our audit taking into account the types of investments within the Funds, the involvement of the third parties referred to overleaf, the accounting processes and controls, and the industry in which the Company operates. We look at each of the Funds at an individual level.
Key audit matters	 Key audit matters Valuation of financial assets at fair value and financial liabilities at fair value. Existence of financial assets at fair value and financial liabilities at fair value.

The scope of our audit

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we looked at where the directors made subjective judgements, for example the selection of pricing sources to value the investment portfolio. As in all of our audits, we also addressed the risk of management override of internal controls, including evaluating whether there was evidence of bias by the directors that represented a risk of material misstatement due to fraud.

Key audit matters

Key audit matters are those matters that, in the auditors' professional judgement, were of most significance in the audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by the auditors, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters, and any comments we make on the results of our procedures thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. This is not a complete list of all risks identified by our audit.

Key audit matter	How our audit addressed the key audit matter
Valuation of financial assets at fair value and financial liabilities at fair value Refer to the Portfolio Statement for each of the Funds, the accounting policies set out in note 2 and the Fair Value hierarchy set out in note 4. The financial assets at fair value and financial liabilities at fair value included in the Balance Sheet of the Funds as at 30 June 2024 are valued at fair value in line with Generally Accepted Accounting Practice in Ireland. We considered the valuation of financial assets at fair value and financial liabilities at fair value to be a key audit matter as it represents the principal element of the financial statements.	We obtained an understanding of the controls in place at the Company's Delegate Administrator in relation to the valuation of financial assets at fair value and financial liabilities at fair value. We tested the valuation of the financial assets at fair value and financial liabilities at fair value as at 30 June 2024 to third party vendor sources where available. In the absence of third party vendor sources being available, we tested the valuation of these investments by performing the following procedures: For investments valued using multiple or single broker quotes, we independently obtained the broker quote and compared the fair value to the fund accounting records. We assessed the reliability of the brokers by performing back testing, review of recent trading activity and other alternative procedures.

	For investments valued by a management expert, we
	engaged our internal valuation expert to review the reasonability of the management expert's model and we
	verified the accuracy of the significant inputs used in the model.
	For investments valued by the valuer of the bond, we obtained the valuation report and assessed the reliability of the fair values by performing back testing, review of recent trading activity and other alternative procedures.
	For Funds with investments in other underlying funds where a third party vendor price was not available, we compared the net asset value per share used by the Fund to the independently obtained audit confirmation from the underlying funds' transfer agents. Furthermore, we obtained the latest available audited financial statements for these underlying funds and read the underlying independent auditors' report within the audited financial statements. No modifications to these auditors' reports were noted.
	We tested the valuation of financial derivative instruments by obtaining vendor prices, independent counterparty confirmations or through the use of our internal valuation expert.
	No material unresolved matters were noted upon completion of these procedures
<i>Existence of financial assets at fair value and financial liabilities at fair value</i> Refer to the Portfolio Statement for each of the Funds and the accounting policies set out in note 2.	We obtained an understanding of the controls in place at the Company's Delegate Administrator in relation to the existence of financial assets at fair value and financial liabilities at fair value.
The financial assets at fair value and financial liabilities at fair value in the Balance Sheet of each Fund are held in each Fund's name as at 30 June 2024. We considered the existence of financial assets at fair value and financial liabilities at fair value to be a key audit matter as it represents the principal element of the financial statements.	We obtained independent confirmation of the existence of the investments from the Depositary, the underlying funds' transfer agents, the counterparties or the Registrars of the investments held as at 30 June 2024, agreeing the amounts confirmed to the accounting records and resolving any material reconciling items noted.
	In respect of open forward contracts held at the year end date we liquidated material positions to post year end bank statements.
	No material misstatements were noted from the performance of these procedures.

How we tailored the audit scope

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the Company, the accounting processes and controls, and the industry in which it operates.

As at 30 June 2024 there are 29 Funds operating. The Company's Balance sheet, Profit and Loss Account and Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders are an aggregation of the positions and results of the Funds.

The directors control the affairs of the Company and are responsible for the overall investment policy which is determined by them. The Company engages the Manager to manage certain duties and responsibilities with regards to the day to day management of the Company. The Manager has delegated certain responsibilities to the Co- Investment Managers and Delegate Investment Managers (the "Investment Manager") and to State Street Fund Services (Ireland) Limited (the "Delegate Administrator"). The financial statements, which remain the responsibility of the directors, are prepared on their behalf by the Delegate Administrator. The Company has appointed State Street Custodial Services (Ireland) Limited (the "Depositary") to act as Depositary of the Company's assets. In establishing the overall approach to our audit we assessed the risk of material misstatement at a Fund level, taking into account the nature, likelihood and potential magnitude of any misstatement. As part of our risk assessment, we considered the Company's interaction with the Delegate Administrator, and we assessed the control environment in place at the Delegate Administrator.

Materiality

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures on the individual financial statement line items and disclosures and in evaluating the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements of each of the Company's Funds as follows:

Overall materiality and how we determined it	50 basis points (2023: 50 basis points) of Net Assets Value ("NAV") at 30 June 2024 (2023: 30 June 2023) for each of the Company's Funds.
	We have applied this benchmark because the main objective of the Company and Funds is to provide investors with a total return taking account of the capital and income returns.

We use performance materiality to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds overall materiality. Specifically, we use performance materiality in determining the scope of our audit and the nature and extent of our testing of account balances, classes of transactions and disclosures, for example in determining sample sizes. Our performance materiality was 75% of overall materiality.

In determining the performance materiality, we considered a number of factors - the history of misstatements, risk assessment and aggregation risk and the effectiveness of controls - and concluded that an amount at the upper end of our normal range was appropriate.

We agreed with the Board of Directors that we would report to them misstatements identified during our audit above 5 basis points of each Fund's NAV, for NAV per share impacting differences (2023: 5 basis points of each Fund's NAV, for NAV per share impacting differences) as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

Conclusions relating to going concern

With the exception of GAM Star Alpha Technology and GAM Star US All Cap Equity where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, our evaluation of the directors' assessment of the Company's and Funds' ability to continue to adopt the going concern basis of accounting included:

Obtaining an understanding of the key indicators that are monitored with respect to the going concern assumption and management's future plans for the Company and its Funds over the going concern period (being 12 months from the date of approval of the financial statements);

- Reviewing available board minutes during the period under audit and those available up to the date of this report;
- Considering post year end capital activity as recorded in the underlying accounting records;
- Making enquiries of management with respect to any planned significant redemptions of which they have been informed of; and
- Considering the liquidity risk management techniques which are available to the Company and Funds.

With the exception of GAM Star Alpha Technology and GAM Star US All Cap Equity where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company or Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

With the exception of GAM Star Alpha Technology and GAM Star US All Cap Equity where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, in auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's and Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Report of the Directors, we also considered whether the disclosures required by the Companies Act 2014 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

- In our opinion, based on the work undertaken in the course of the audit, the information given in the Report of the Directors for the year ended 30 June 2024 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.
- Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Report of the Directors.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities set out on pages 2 and 3, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's and Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company and it's Funds and the industry, we identified that the principal risks of noncompliance with laws and regulations related to breaches of the Central Bank of Ireland regulations applicable to the Company and its Funds and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended). We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to risk of management override of control.

Audit procedures performed by the engagement team included:

- Enquiry of management to identify any instances of non-compliance with laws and regulations;
- Identifying and testing journal entries that met our specific risk based criteria;
- Testing accounting estimates and judgements and considered potential for management bias;
- Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing ; and
- Reviewing minutes of the meetings of the Board of Directors.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8fa98202dc9c3a/Description of auditors responsibilities for audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Companies Act 2014 exception reporting

Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

Fet D'comell.

Jonathan O'Connell for and on behalf of PricewaterhouseCoopers Chartered Accountants and Statutory Audit Firm Dublin 24 October 2024

Remuneration Disclosures

Qualitative disclosures

Decision-making process to determine remuneration policies

Under the GAM Group's framework ultimate responsibility in compensation matters is held by the Board of Directors. The Board is supported in compensation-related issues by the Compensation Committee ("CompC").

- The Board is responsible for establishing the Group Compensation Policy, and with support of the CompC regularly reviewing the Group Compensation Policy in order to meet any important regulatory developments and the objectives of the Group.
- The CompC is delegated with the role of supporting the Board in setting compensation guidelines, establishing share-based compensation plans and approving the aggregate variable compensation expenditure of the Group as well as determining and proposing to the Board the individual total compensation payable to the members of the Board (other than its Chairman) for approval. The CompC regularly reports to the Board on the status of its activities, the development of the compensation architecture within the Group as well as on the operational implementation of this Policy. The CompC consists of at least three members of the Board all of whom are Non-Executive Directors.
- The Compensation Management Committee ('CMC') has delegated authority from the CompC to provide support and advice to the CompC to ensure that the compensation policy and practices across GAM Holding AG Group operate in line with EU regulations that apply to its regulated entities and delegates. The CMC's member are appointed by the Group CEO including senior members from the Risk, Compliance and Human Resources functions of the Group.

GAM Group's compensation philosophy is aligned with the Group's overall long-term objective of sustainable growth and profitability as well as its tolerance for risk. The Group's approach provides for compensation that attracts and retains employees in a given local market and motivates them to contribute to the development and growth of our business. The policy promotes sound and effective risk management and does not encourage inappropriate risk taking.

Link between pay and performance

As described above, GAM Group operates a Group-wide remuneration policy, which applies to all employees across the Group including the above entities. The compensation structure is designed to incentivise delivery of strong investment performance within a sound risk and control environment, and safeguard the long-term success and prosperity of the customer and the Manager's shareholders. A robust performance management system forms part of the compensation process and enables us to reward success and minimise the possibility of payment for failure.

The composition of the elements within an individual's overall compensation is the result of the function and performance of the individual, including alignment with the Group's risk tolerances, market competitiveness and overall profitability. The Group's total compensation approach comprises fixed and variable compensation.

Fixed compensation includes base salary, which reflects seniority, experience, skills and market conditions, together with fixed allowances for certain employees in Switzerland consistent with customary local practice.

Variable compensation is awarded annually and is dependent on Group, business area and individual performance. Cash bonuses that are driven by activities that leave meaningful amounts of future risk with the Group, either via direct balance sheet exposure or through the potential for other negative income events are prohibited.

For members of the Group Management Board, a portion of variable compensation is paid in the form of deferred, share-based awards, reflecting their accountability for the operating results achieved and the impact of their decisions on the Group's future development.

In addition to members of the Group Management Board, other senior employees of the Group have a portion of their variable compensation deferred to provide alignment with long-term interest of clients and shareholders.

Discretionary compensation decisions are based on individual's achievement of pre-set targets and contributions to the Group's development. This fosters a work ethic that is driven by high performance and tangible results.

Remuneration Disclosures, continued

Identified Staff

The categories of staff for inclusion as Identified staff for GAM Fund Management Limited include:

- Executive and non-executive members of the Board
- Other members of senior management
- Staff responsible for control functions

Directors of this regulated entity do not receive any kind of variable remuneration linked to their role. Should any variable remuneration be granted to directors in the future, such remuneration will be fixed and not linked to the short-term results of the entity.

The Identified Staff are identified and reviewed on an annual basis by the CMC in line with the criteria set out under EU regulations, specifically that if, in the performance of their professional activities certain staff of a delegate portfolio manager can have a material impact on the risk profiles of the funds they manage, these employees are considered as "Identified Staff". For this purpose the Group considers the respective delegate portfolio manager as subject to equally effective regulation if they are required by law and regulations or in accordance to internal standards to put in place a remuneration policy, which in accordance to the ESMA Remuneration Guidelines 2013/232 and 2016/575 is considered equivalent in its objectives. The Group's UCITS regulated entities will only delegate its portfolio management to firms, whose remuneration policy complies with the 'equivalence standard' as described.

Quantitative disclosures

The remuneration data provided below reflects amounts paid in respect of the performance financial year 2023 in relation to the UCITS funds managed by GAM Fund Management Limited.

GAM Fund Management Limited manages funds with a combined AUM of €9,779m at 31 December 2023.

Notes

In the figures above, fixed remuneration relates to salary and pension benefits and variable remuneration includes the annual bonus including any long-term incentive awards.

Where relevant, the remuneration information provided in the table above relates to a proportion of the amount of total fixed and variable remuneration paid to employees in the Management Company and its delegate(s) that relates to their fund's activities.

Additional Market Risk Notes

Market Risk

i) Funds which calculate risk using VaR

The VaR model is an estimate of the maximum loss each Fund may experience over any 20 day period, with a probability of 99%. The VaR is calculated by an external service provider using the historical simulation method using three years of weekly historical price data for the underlying securities. The VaR of the portfolio is stress tested on a fortnightly basis by running the VaR using current holdings against historical events. The VaR cannot take into account the fact that future market price movements may bear no relation to historical patterns as future market conditions could vary significantly from those experienced in the past.

VaR is an estimate of the maximum loss a Fund may suffer over a defined period and calculated with a specified confidence level. It is calculated for the investment pool of each Fund.

As at 30 June 2024

	Value at Risk (over 20 day period with 99% confidence level)				Utilisation of VaR Limit

Additional Market Risk Notes, continued

Market Risk, continued

i) Funds which calculate risk using VaR, continued

The level of leverage may be calculated in a number of ways:

Sum of the notionals

This calculation has been disclosed in accordance with Central Bank requirements but it does not take into account any netting and hedging arrangements that a fund has in place. It is a "simple and easy to compute" formula of adding notional amounts without taking account of whether each derivative is used for risk reduction or otherwise, the disclosed sum of the notional amounts represents, in many cases, an inflated figure that fails to indicate the risk levels in a fund. For example, positions that economically offset risk, such as currency hedges, are required to be included in the gross notional calculation even though such transactions would reduce risk in a portfolio, thereby increasing the gross notional amount but actually creating a less risky product for the investor.

10 year equivalents

This is more relevant for fixed income funds and has been provided as a more appropriate leverage calculation for those type of funds. It measures the marginal impact on position value of a small change in interest rates such as a 1 basis point ("bp") move, and then to express that impact in terms of the quantity of the current 10-year note that would have the same sensitivity to rate moves.

	Leverage calculated at 30 June 2024 using		Leverage calculated at 30 June 2023 using	
	Sum of the nationals %	10 Year Equivalent unless otherwise indicated %	Sum of the nationals %	10 Year Equivalent unless otherwise indicated %

Changes to the Prospectus

The Second Addendum to the Prospectus was issued on 11 August 2023:

AMENDMENTS TO THE MAIN BODY OF THE PROSPECTUS

- In the Directory the list of directors set out under the sub-section "Directors of the Manager" has been updated.

- In the Directory GAM Japan Limited has been added and GAM Systematic LLP has been deleted under the sub section 'Co-Investment Manager'.

- In the section "Emerging Market Risk" for Funds investing in securities located in countries with emerging securities markets, where risks additional to the normal risk are disclosed, additional wording has been added for "Risks associated with investment in India".

AMENDMENTS AS A RESULT OF THE CENTRAL BANK CONFIRMING ITS WITHDRAWAL OF APPROVAL OF

- The revoke of the below Funds:

- GAM Star China A Equity,
- GAM Star UK Equity Income,
- GAM Systematic Dynamic Multi Asset,
- GAM Systematic Core Macro,
- GAM Systematic Dynamic Credit.

- The reference to "GAM Systematic LLP" (including its address), as set out under the sub-section "Co-Investment Managers" under the section entitled "Directory" in the Prospectus, shall be deleted in its entirety.

- In the section "How to Buy Shares - Minimum Initial Subscription" the deletion of current wording under the sub-section of Minimal Initial Subscription and replaced with alternative wording.

AMENDMENTS TO APPENDIX II TO THE PROSPECTUS

- Changes to the list of funds GAM International Management Limited Co-Manages to remove reference to GAM Star UK Equity Income.

- Changes to the list of funds GAM Hong Kong Limited Co-Manages to remove reference to GAM Star Asian Equity, GAM Star China A and GAM Star China Equity.

- The reference to "GAM Systematic LLP" (including its address), as set out under the sub-section "Co-Investment Managers" shall be deleted in its entirety.

- Changes to the list of funds GAM Investment Management (Switzerland) AG Co-Manages to add GAM Systematic Alternative Risk Premia.

- The details for GAM Japan Limited to be added under the sub-section "Co-Investment Managers".

AMENDMENT TO THE SUPPLEMENT IN RESPECT

GAM Star Emerging Market Rates – The Investment Objective to be updated to be: "The investment objective of the Fund is to achieve an attractive risk-adjusted return, whilst actively managing downside risk (such as bond market and currency risk), through investment in a portfolio of local and hard currency bonds and other Fixed Income Securities from emerging markets (as hereinafter defined) worldwide".

GAM Star Japan Leaders - within the Risk Factors there has been some updates in relation to this section.

The Third Addendum to the Prospectus was issued on 22 September 2023:

AMENDMENT TO THE SUPPLEMENT IN RESPECT

GAM Star Global Rates

- Change to shareholder service fee from 0.50% pa to up to 0.50% pa of the NAV of the selling agent shares in the Fund.

- Change to sales distribution charge from 0.45% pa to up to 0.45% pa of the NAV of the relevant class shares in the Fund.

The fourth Addendum to the Prospectus was issued on 27 October 2023:

AMENDMENT TO THE SUPPLEMENT IN RESPECT

GAM Star Alpha Spectrum GAM Star Composite Global Equity

The section entitled "Investment Objectives and Policies" is amended by the insertion of the following wording as a new sub-section entitled "Other Efficient Portfolio Management Techniques".

The Fund may also use the following techniques for efficient portfolio management purposes such as hedging and performance enhancement (i.e. reduction of cost, generation of additional capital or income, etc.) in accordance with the terms and conditions set out by the Central Bank from time to time in relation to any such techniques:

Changes to the Prospectus, continued

Stock lending Agreements: Stock lending is the temporary transfer of securities by a lender to a borrower, with agreement by the borrower to return equivalent securities to the lender at pre-agreed time. These agreements will generally be used to increase and enhance overall returns to the Fund through finance charges. The maximum proportion of the Fund's assets under management that can be subject to stock lending agreements is 30% (based on the value of collateral that may be posted with counterparties). It is anticipated that between 0% - 5% will be subject to stock lending agreements.

The Central Bank's current terms and conditions in relation to stock lending agreements and information relating to the operational costs and/or fees which shall be deducted from the revenue delivered to the Fund as a result of these techniques are set out in Appendix V of the Prospectus.

GAM Star Asian Equity GAM Star China Equity GAM Star Japan Leaders

The section entitled "Investment Objectives and Policies" is amended by the insertion of the following wording as a new sub-section entitled "Other Efficient Portfolio Management Techniques".

Same as above with exception of amount subject to stock lending "It is anticipated that between 5% - 15% will be subject to stock lending agreements.

With effect 7 December 2023 a new prospectus was issued:

- Removing the supplement of and all references to GAM Star Absolute Return Macro,

- Inserting the following wording on the cover page of Systematic Alternative Risk Premia: "GAM Systematic Alternative Risk Premia is no longer available for investment".

In the third paragraph "It is anticipated that the Fund will typically have exposure of between 0% and 480% of net assets in long positions and between 0% and 320% of net assets in short positions based on the sum of the notionals methodology outlined above." the exposure updated to be between 0% and 1,620% and between 0% and 1,080% respectively.

In Investment Objectives and Policies - "Global Exposure and Leverage" section there has been a change to the "Leverage and exposure range".

Securities Financing Transactions

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions ("SFTs") and of reuse and amending Regulation (EU). No. 648/2012, requires UCITS investment companies to provide the following information on the use made of SFTs.

Securities lending

The below table details the value of securities on loan as a proportion of the Funds' total lendable assets and NAV as at 30 June 2024 and the income/returns earned for the financial year ended 30 June 2024. Total lendable assets are those assets held within the portfolio of the Funds that utilise security lending.

		Securities on loan	
Fund	Currency	% of lendable assets	% of NAV
GAM Star Alpha Spectrum	€	0.12	0.08
GAM Star Asian Equity	US\$	7.75	3.39
GAM Star China Equity	US\$	1.52	1.00
GAM Star Composite Global Equity	US\$	0.06	0.04
GAM Star Japan Leaders	¥	15.97	12.98
GAM Star Disruptive Growth	US\$	1.05	0.97

Please refer to note 5 for details on how the total income earned on securities lending transactions is split between the Company and the Securities Lending Agent and how much income was earned by each party during the financial year ended 30 June 2024.

The following tables detail the value of securities on loan and associated collateral received, analysed by borrowing counterparty as at 30 June 2024:

GAM Star Alpha Spectrum

GAM Star Disruptive Growth

Counterparty	Country of establishment	Securities on loan US\$	Non-cash Collateral received US\$
JP Morgan Securities Plc	United States	2,041,455	2,579,846
		2,041,455	2,579,846

Barclays Bank, BNP Paribas, HSBC, JP Morgan Securities Plc, Merrill Lynch International and Morgan Stanley and Co International were the counterparties in use for securities lending purposes as at 30 June 2024. All securities lending contracts are settled on a bi-lateral basis. Non-cash collateral received in relation to securities lending transactions cannot be sold, re-invested or pledged.

The following table provides an analysis of the type, quality and maturity tenor of non-cash collateral received and posted by the Funds in respect of securities lending transactions as at 30 June 2024.

				Maturity Tenor					
Fund	Collateral type	Currency	Less than one year	One to five years	Greater than five years	Total			
GAM Star Alpha Spectrum	Sovereign debt	€	-	-	64,386	64,386			
GAM Star Asian Equity	Sovereign debt	US\$	-	-	588,748	588,748			
GAM Star China Equity	Sovereign debt	US\$	-	-	773,422	773,422			
GAM Star Composite Global Equity	Sovereign debt	US\$	-	-	55,082	55,082			
GAM Star Japan Leaders	Sovereign debt	¥	-	-	2,251,389,164	2,251,389,164			
GAM Star Disruptive Growth	Sovereign debt	US\$	-	-	2,579,846	2,579,846			

The maturity tenor analysis for Sovereign Debt securities received as collateral is based on the contractual maturity date. All non-cash collateral received by the Funds is held by the Depositary (or through its delegates) as at 30 June 2024.

The following table lists the ten largest issuers* by value of non-cash collateral received by the Funds across securities lending transactions as at 30 June 2024.

Fund	Collateral issuer	Value	% of NAV
GAM Star Alpha Spectrum	US Government	64,386	0.08
GAM Star Asian Equity	US Government	588,748	3.67
GAM Star China Equity	US Government	773,422	1.05
GAM Star Composite Global Equity	US Government	55,082	0.04
GAM Star Japan Leaders	US Government	2,251,389,164	15.60
GAM Star Disruptive Growth	US Government	2,579,846	1.23

* There were no other issuers of non-cash collateral as at 30 June 2024.

All derivative instruments are entered into by the Funds under an International Swaps and Derivatives Associations, Inc. Agreement ("ISDA Agreement") or similar agreement. An ISDA Agreement is a bilateral agreement between the Funds and a counterparty that governs all derivative instruments entered into by the parties. The parties' exposures under the ISDA Agreement are netted and collateralised together, therefore any collateral disclosures provided are in respect of all derivative instruments entered into by the Funds under the ISDA Agreement. All collateral received/posted by the Funds in relation to the ISDA Agreement is cash as at 30 June 2024. All of the cash balances have an open maturity. The cash collateral received and disclosed above is custodied with the depositary. Cash collateral received may be reinvested in accordance with the requirements of the Central Bank at the discretion of the Investment Manager.

General Information

The Company

GAM Star Fund p.I.c. (the "Company"), an investment company with variable capital and segregated liability between Funds, is authorised by the Central Bank of Ireland ("the Central Bank") as an undertaking for collective investment in transferable securities ("UCITS") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (S.I. No. 211 of 2011) as amended and under the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019).

The Manager

The Manager of the Company is GAM Fund Management Limited.

Dealing days

Shares may be purchased or sold on any day which is a business day in Dublin or alternatively such business day as stated in the Prospectus. In the case of all Funds, dealing will be at least twice a month. The Net Asset Value per share of each Fund will be determined on each Dealing Day at 23:00 hours (UK time) or such other time as the Manager may determine in the base currency of the relevant Fund.

Application for shares

All applications should be made directly to the Manager or via the German information and distribution agent of the Company, the Austrian paying agent of the Company, or via the Swiss representative of the Company. Shares will be purchased on the relevant Dealing Day and a contract note will be sent to the purchaser. Prospective shareholders should note that the price of shares may go down as well as up.

Redemption of shares

Requests for redemption of shares and requests for the switch of shares can be submitted via the German paying agent of the Company, the Austrian paying agent of the Company, the Swiss representative of the Company or directly to the Manager. This should be done in writing by post, by facsimile, by email or by telephone.

Income distributions

Income distributions are normally made within two months of year end.

Availability of Prices

Prices are available from GAM Fund Management Limited, on www.gam.com.

Reports

Annual and semi-annual reports are issued.

Purchases and Sales

Please contact the Manager, the Swiss representative or other local GAM Contacts to obtain a complete list of all purchases and sales for any Fund free of charge.

Prospectus

Further details concerning the Funds are contained in the Prospectus and Prospectus Addendum, the Key Investor Information Documents of the Company and the Articles of Incorporation. Copies of these, as well as copies of the annual and semi–annual reports, are available on application to the Manager, to the UK facilities agent, the German and Austrian information agent as well as to the Swiss representative free of charge.

Place of performance and forum in Switzerland

In the case of shares which are distributed in Switzerland or from Switzerland, the place of performance and the forum are at the domicile of the Swiss representative of the Fund in Zürich.

Reporting Fund Status (relevant to UK Shareholders only)

It is the policy of the Company to apply to HM Revenue and Customs ("HMRC") for certification of all Share classes (with the exception of GAM Star Alpha Spectrum and the non UK RFS Classes of the relevant Funds) as reporting funds as defined in the Offshore Funds (Tax) Regulations 2009.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Asian Equity (the "Fund" or "Financial Product") Legal entity identifier: 549300WNU0GQXM1IPO65

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No × It made sustainable investments with It promoted Environmental/Social (E/S) an environmental objective: ___% characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any × sustainable investments a social objective: %

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

Indicators relating to Sustainability Exclusion Criteria 1)

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2024	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 26th July 2024.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

¹⁰ Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data covera ge	Data estimated	Output⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2024	97.28%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equivalent	MSCI	30 June 2024	98.96%	6.76%	698.9
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI	30 June 2024	98.32%	0%	3.87%
Gender diversity on the Board (also related to good	Weighted average %	MSCI	30 June 2024	97.28%	0%	18.89%

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found <u>here</u>.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCI's 'SFDR Point-in-Time PASI Statement'. More information on MSCI's approach to Principal Adverse Impacts can be found <u>here</u>.

governance): percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.						
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--	--	--	--	--

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence : the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weighted average %	MSCI	30 June 2024	96.14%	0%	63.18%

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration
	1. GHG emissions 2. Carbon footprint	A range of indicators in relation to company GHG emissions and carbon emission reduction
Greenhouse	3. GHG Intensity of investee companies	initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part
gas emissions	4. Exposure to companies active in the fossil fuel sector	of the investment process, and were primarily addressed in a qualitative way, for example
	5. Share of non-renewable energy consumption and production	through engagement with selected investee companies on reduction targets and initiatives or voting on resolutions to support greater

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

	6. Energy consumption intensity per high impact climate sector	transparency on climate-related risks. Investeee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,
Water	8. Emissions to water	water and waste, were reviewed as part of the
Waste	9. Hazardous waste and radioactive waste ratio	investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.
Social and employee matters	 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons) 	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2024

What were the top investments of this financial product?

The table above provides a snapshot of the largest investments as at 30 June 2024. This snapshot is reflective of the general portfolio composition throughout the reporting period.

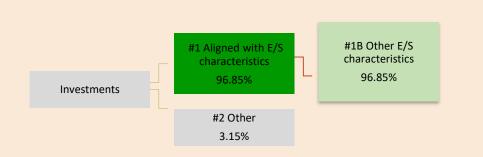

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2024 (snapshot at year-end), 96.85% of the Fund attained the environmental and social characteristics promoted by the Fund, while 3.15% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
INFORMATION TECHNOLOGY	30.11%
FINANCIALS	24.95%
CONSUMER DISCRETIONARY	16.54%
COMMUNICATION SERVICES	13.21%
ENERGY	3.78%
INDUSTRIALS	3.18%
UTILITIES	2.70%
HEALTH CARE	1.91%
CONSUMER STAPLES	0.84%

describes the share of investments in specific assets.

Asset allocation

Taxonomy-aligned activities are expressed as a share of:

- turnover
- reflecting the share of revenue from green activities of investee companies.

capital expenditure

(CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.

- operational expenditure (OpEx) reflecting the green operational

activities of investee

companies.

environmental objective.

Transitional activities are

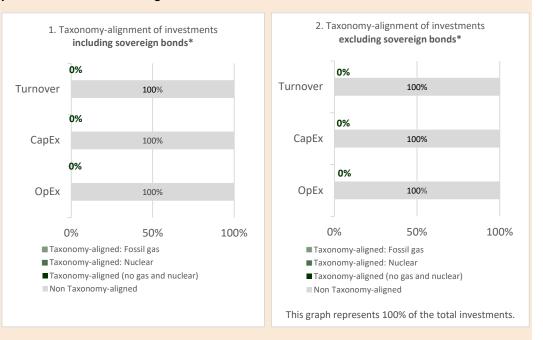

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" investments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as

having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2023 to 30/06/2024, the investment team engaged with 8 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and/or social characteristics:

- 1) The Delegate Investment Manager applied a proprietary rating methodology to support the promotion of high ESG characteristics in the Fund. The Fund primarily invests in securities assessed to have positive ESG ratings, while securities assessed as negative are not eligible for inclusion. The rating methodology is described in the Investment Strategy section the Fund's Propectus under the heading "Analysis of ESG Factors" and the Delegate Investment Manager's ESG Policy, which is available by accessing the link detailed in response to the question "Where can I find more product specific information online?" in the Prospectus;
- Excluded insurance-linked securities ("ILS") from sponsors involved in specific activities 2) considered to cause negative environmental and social impact, as described in the Sustainability Exclusion Criteria within the Prospectus; and
- 3) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact ("UN Global Compact"), by exclusion of ILS from sponsors that violate these principles.

The environmental and social characteristics were promoted in line with the binding elements of the Investment Strategy of the Fund, as outlined in the Fund's Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

Sustainable

The EU Taxono a classification system laid dov Regulation (EU) 2020/852, establishing a li environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to the analysis of ESG factors

The Fund invested in ILS with only positive or neutral ESG ratings, as assessed by the Delegate Investment Manager's proprietary ESG rating methodology, and excluded investments that are rated as negative. This assessment is conducted at the investment and sponsor level and reported as % of the Fund's ILS investments in each category.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date ¹	Data coverage ²	Proportion of data estimated ³	Output ⁴
Investments with POSITIVE ESG ratings: proportion of securities within the Fund with a POSITIVE sponsor ESG rating based on the Delegate Investment Manager's proprietary scoring framework.	% of Fund	Delegate Investment Manager internal ESG Score	30 June 2024	100%	Not applicable	91.24%
Investments with NEUTRAL ESG ratings: proportion of securities within the Fund with a NEUTRAL sponsor ESG rating based on the Delegate Investment Manager's proprietary scoring framework.	% of Fund	Delegate Investment Manager internal ESG Score	30 June 2024	100%	Not applicable	8.76%

¹ Data snapshot taken at the Fund's year end.

² Calculated as the proportion of ILS investments (by NAV) that are assigned ESG ratings. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus.

³ Not applicable as the ESG Scores are assessed internally.

⁴ Calculated as the proportion of ILS investments (by NAV) that are rated ESG positive or neutral. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus.

2) Indicators relating to Sustainability Exclusion Criteria

Involvement by the sponsor in the following activities, beyond the revenue threshold specified, would result in the investment being ineligible (other than where outlined in the Sustainability Exclusion Criteria within the Prospectus). This assessment is conducted at the sponsor level and reported as % of the Fund's investment sponsored by entities failing the criteria.

No exceptions were made during the reporting period.

Given the nature of sponsors in the ILS market, which are predominantly (re)insurance entities and where are a large percentage of sponsors are privately held companies or government-related entities, product involvement assessments are based on internal research drawing on information made available by the sponsors as well as from public third-party sources.

Sustainability Indicator	Units	Data source	Date ⁵	Data coverage ⁶	Proportion of data estimated ⁷	Output ⁸			
ILS sponsored by non-sovereigns									
Involvement in controversial weapons: share of investments in ILS sponsored by companies involved in the manufacture or selling of controversial weapons.	% of Fund	Internal research	30 June 2024	100%	Not applicable	0%			
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in ILS sponsored by companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Internal research	30 June 2024	100%	Not applicable	0%			
Involvement in tobacco manufacturing: share of investments in ILS sponsored by companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Internal research	30 June 2024	100%	Not applicable	0%			

⁵ Data snapshot taken at the Fund's year end.

⁶ Calculated as the proportion of ILS investments (by NAV) from ILS sponsors that are assessed Sustainability Exclusion Criteria. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus.

⁷ Not applicable as compliance with the Sustainability Exclusion Criteria is assessed internally by the Delegate Investment Manager.

⁸ Calculated as the proportion of ILS investments (by NAV) from ILS sponsors that fail the criteria. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus.

Involvement in tobacco retail and distribution: share of investments in ILS sponsored by companies involved in the distribution and/or retail sale of tobacco products (above 5% revenue threshold).	% of Fund	Internal research	30 June 2024	100%	Not applicable	0%
Involvement in oil sands extraction: share of investments in ILS sponsored by companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Internal research	30 June 2024	100%	Not applicable	0%
Involvement in thermal coal mining: Share of investments in ILS sponsored by companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Internal research	30 June 2024	100%	Not applicable	0%
		Sovereign sp	onsored IL	S	·	
"Not Free" Sovereign Sponsors: share of investments in ILS sponsored by countries which have been assessed as "Not Free" by the Freedom House Global Freedom Score.	% of Fund	Freedom House	30 June 2024	100%	Not applicable	0%

3) <u>Indicators relating to international norms and standards ILS sponsored by non-</u> sovereigns

Companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact. Companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations. This assessment is conducted at the sponsor level and reported as % of the Fund's investment sponsored by entities failing the criteria.

No exceptions were made during the reporting period.

RepRisk and Sustainalytics are used as independent third-party assessments of current severe UN Global Compact violations of sponsors. If only one assessment is available for a sponsor, that assessment is used as the final assessment of a sponsor's compliance with the UN Global Compact. If a sponsor is not covered by either third-party data provider, internal research based on third-party data sources and engagement with the sponsor, if appropriate, are used to form an assessment.

Sustainability Indicator	Units	Data source	Date ⁹	Data coverage	Proportion of data estimated	Output ¹²
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	RepRisk/ Sustainalytics /Internal research	30 June 2024	94.67%	5.33%	0%

...and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

⁹ Data snapshot taken at the Fund's year end.

¹⁰ Calculated as the proportion of ILS investments (by NAV) from non-sovereign ILS sponsors that are covered by at least one third-party data provider. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus nor ILS from sovereign sponsors.

¹¹ Calculated as the proportion of ILS investments (by NAV) from non-sovereign ILS sponsors that are not by at least one third-party data provider. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus nor ILS from sovereign sponsors.

¹² Calculated as the proportion of ILS investments (by NAV) from non-sovereign ILS sponsors that fail the criteria. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus nor ILS from sovereign sponsors.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the principal adverse impacts (PAIs)—as detailed in Table 1, and noting the additional indicators in Tables 2 and 3, of Annex 1 of the SFDR Delegated Act—on sustainability factors in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Non-Sovereign Issuers

Advers	e Sustainability Indicator	Fund Considerations				
Table 1						
Social & Employee Matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	No investments in the Fund were sponsored by entities that violate any of the UN Global Compact principles, including on social and employee matters, throughout the reporting period.				
	14. Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)	No investments in the Fund were sponsored by entities that have any direct involvement in controversial weapons throughout the reporting period.				

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

	Table 2								
Emissions Energy performance	 4. Investments in companies without carbon emission reduction initiatives 5. The table above provides a snapshot of the largest investments as at 30 June 2024. This snapshot is reflective of the general portfolio composition throughout the reporting period.

Investments typically support the (re)insurance industry, the sponsor type (e.g. insurer, reinsurer, corporate, government) is reflected in the columns "Sector" as this is most appropriate for the Fund. Government sponsors of ILS within the Fund include local municipalities, transit authorities, state insurance entities and residual insurance pools formed by statute, national insurance programs (that can be classified as sovereign) and public-private reinsurance pools, as well as international organizations (that can also facilitate ILS issuance for sovereigns). During the reporting period there were six ILS sovereign sponsors within in the Fund.

What was the proportion of sustainability-related investments?

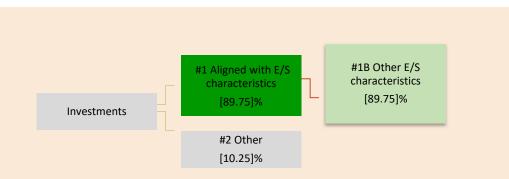

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding ILS that are rated NEUTRAL, cash, cash-equivalents, and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2024 (snapshot at year-end), 89.75% of the Fund was aligned with E/S characteristics, while 10.25% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is

Asset allocation describes the share of investments in specific assets.

set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Investments typically support sponsors in the (re)insurance industry and the sponsor type (e.g. insurer, reinsurer, corporate, government) is reflected in the table below as it is most appropriate for the asset class. Allocations are shown as a % ILS-only NAV of the Fund as at 30 June 2024.

Sponsor Type	Allocation
Insurer	61.58%
Reinsurer	10.49%
Corporate	2.91%
Government	25.02%

Sponsors are classified as an insurer, reinsurer, corporate or government by the Delegate Investment Manager on a best-efforts basis. If a sponsor is involved in both insurance and reinsurance, it is classified according to the line of business that contributes the most by premium. Government sponsors of ILS within the Fund include local municipalities, transit authorities, state insurance entities and residual insurance pools formed by statute, national insurance programs (that can be classified as sovereign) and public-private reinsurance pools, as well as international organizations.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, the minimum proportion of the Fund's investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, is 0%.

- Taxonomy-aligned activities are expressed as a share of:
- turnover
- reflecting the share of revenue from green activities of investee companies. - capital

expenditure

(CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.

operational
 expenditure
 (OpEx) reflecting
 the green
 operational
 activities of
 investee
 companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

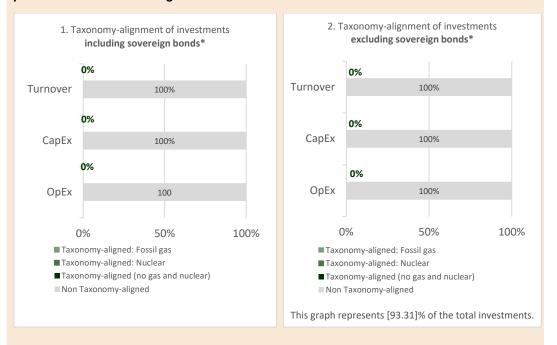

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Appendix – Sustainable Finance Disclosure Regulation (SFDR) (Unaudited)

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy¹³?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all ILS sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

¹³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The following investments were included under "2 Other":

- ILS rated NEUTRAL
- Cash
- Cash equivalents (including US Treasury Bills)
- Currency hedges for non-US dollar assets
- ILS repo positions

The non-ILS "other" investments listed above were used for currency and cash management purposes for the Fund.

All ILS investments in the Fund have the same investment rationale outlined above, including ILS with a neutral ESG rating.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to analysis of ESG factors

The Fund invested in ILS with only positive or neutral ESG ratings, based on a proprietary ESG rating methodology, and excluded investments that are rated as negative. This assessment was conducted at the investment and sponsor level.

2. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using internal research drawing on information from sponsors, independent ESG rating providers where available and other recognised public third-party sources. There were no breaches of the Sustainability Exclusion Criteria during the reporting period.

3. Indicators relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Delegate Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star China Equity (the "Fund" or "Financial Product") **Legal entity identifier:** 5493003USMRCW7XRBC44

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No × It made sustainable investments with It promoted Environmental/Social (E/S) an environmental objective: ___% characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any × sustainable investments a social objective: ___%

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2024	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 26th July 2024.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found <u>here</u>. Information on Sustainalytics product involvement can be found <u>here</u>.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

¹⁰Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

(above 10% revenue threshold).

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2024. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2024 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

¹¹GAM's definition of engagement can be found in our Engagement Policy on our website.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration		
Greenhouse	1. GHG emissions	A range of indicators in relation to company GHG		
	2. Carbon footprint	emissions and carbon emission reduction		
gas emissions	3. GHG Intensity of investee	initiatives (including Scope 1 & Scope 2 GHG		
61115510115	companies	emissions among others) were reviewed as part		

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

	 4. Exposure to companies active in the fossil fuel sector 5. Share of non-renewable energy consumption and production 6. Energy consumption intensity per high impact climate sector 	of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected investee companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Investeee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,
Water	8. Emissions to water	water and waste, were reviewed as part of the
Waste	9. Hazardous waste and radioactive waste ratio	investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.
Social and employee matters	 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons) 	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

The table above provides a snapshot of the largest investments as at 30 June 2024. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 30 June 2024

The Global Industry Classification Standard is used to determine economic sectors.

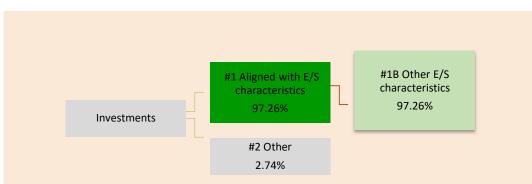

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2024 (snapshot at year-end), 97.26% of the Fund attained the environmental and social characteristics promoted by the Fund, while 2.74% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
CONSUMER DISCRETIONARY	36.61%
COMMUNICATION SERVICES	22.08%
FINANCIALS	16.31%
INFORMATION TECHNOLOGY	7.33%
HEALTH CARE	5.29%
INDUSTRIALS	3.92%
UTILITIES	3.58%
CONSUMER STAPLES	1.55%
REAL ESTATE	0.91%

Taxonomy-aligned activities are expressed as a share of:

- turnover
- reflecting the share of revenue from green activities of investee companies.

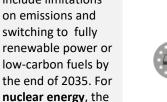

capital expenditure

(CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.

 operational expenditure (OpEx) reflecting the green operational

activities of investee

companies.

To comply with the

EU Taxonomy, the

criteria include

comprehensive

safety and waste

management rules.

Enabling activities

other activities to

make a substantial contribution to an

environmental objective.

Transitional activities are

criteria for fossil gas include limitations on emissions and switching to fully

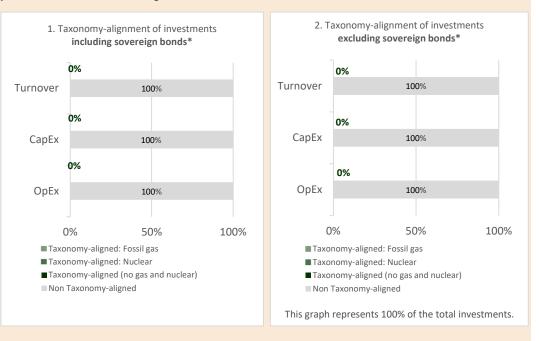

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy9?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2023 to 30/06/2024, the investment team engaged with 13 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Continental European Equity (the "Fund" or "Financial Product") **Legal entity identifier:** 549300YSCWDIOZ2LA130

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No × It made sustainable investments with It promoted Environmental/Social (E/S) an environmental objective: ___% characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally in economic activities that do sustainable under the EU Taxonomy not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any × sustainable investments a social objective: ___%

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2024	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor- made components of these weapons systems, and/or tailor- made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 26th July 2024.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

¹⁰Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found <u>here</u>.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found <u>here</u>. Information on Sustainalytics product involvement can be found <u>here</u>.

Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%

Sustainability Indicator	Units	Data source	Date	Data cover age	Data estimated	Output ⁸
Engagement activity : Number of ESG-related engagement activities the Investment Manager was involved in as part of regular interactions with management, such as engagements following sustainability controversies and thematic engagement relating to the Fund ¹¹ .	Number of engagements	Internal Log	1 st July 2023 – 30 th June 2024	100%	0%	23

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2023. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2023 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

¹¹GAM's definition of engagement can be found in our Engagement Policy on our website.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below: **Indicators applicable to investments in investee companies**

Adverse sust	ainability indicator	Fund consideration
Greenhouse gas emissions	1. GHG emissions 2. Carbon footprint 3. GHG Intensity of investee companies 4. Exposure to companies active in the fossil fuel sector 5. Share of non-renewable energy consumption and production 6. Energy consumption intensity per high impact climate sector	A range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected investee companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Investeee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,
Water	8. Emissions to water	water and waste, were reviewed as part of the investment process and were primarily
Waste	9. Hazardous waste and radioactive waste ratio	addressed in a qualitative way, for example through engagement with selected companies.
Social and employee matters	 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons) 	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

What were the top investments of this financial product?

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 30 June 2024

Largest Investments	Sector	% Assets	Country
NOVO NORDISK A/S	HEALTH CARE	7.45%	DENMARK
GERMAN TREASURY BILL	FOREIGN	4.45%	GERMANY
INDUSTRIA DE DISENO TEXTIL	CONSUMER DISCRETIONARY	4.12%	SPAIN

The table above provides a snapshot of the largest investments as at 30 June 2024. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

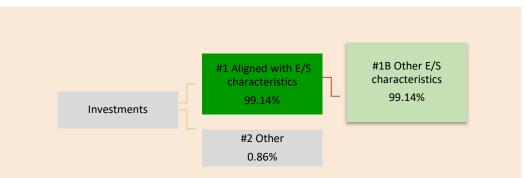

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2024 (snapshot at yearend), 99.14% of the Fund attained the environmental and social characteristics promoted by the Fund, while 0.86% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
FINANCIALS	22.64%
INDUSTRIALS	18.67%
INFORMATION TECHNOLOGY	15.02%
HEALTH CARE	11.51%
CONSUMER DISCRETIONARY	6.91%
ENERGY	6.50%
CONSUMER STAPLES	6.18%
MATERIALS	5.63%
FOREIGN	4.45%
COMMUNICATION SERVICES	1.84%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Taxonomy-aligned activities are expressed as a share of:

- turnover
- reflecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
- green economy. - operational expenditure
- (OpEx) reflecting the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation

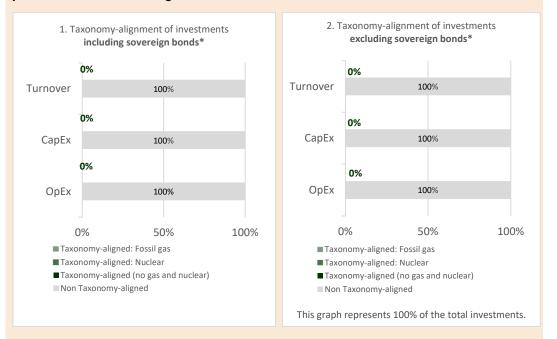

(EU) 2020/852.

Appendix – Sustainable Finance Disclosure Regulation (SFDR) (Unaudited)

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable.

		_	
1	10		
	W _	2	

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator.

This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2023 to 30/06/2024, the investment team engaged with 23 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Credit Opportunities (EUR) (the "Fund" or "Financial Product") **Legal entity identifier:** 549300Q70671NUXGIL66

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No × It made sustainable investments with It promoted Environmental/Social (E/S) an environmental objective: ___% characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any × sustainable investments a social objective: %

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure

environmental or

characteristics promoted by the financial product are attained.

how the

social

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2024	98.34%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, awnd/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	95.93%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 26th July 2024.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found <u>here</u>.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found <u>here</u>. Information on Sustainalytics product involvement can be found <u>here</u>.

¹⁰Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	95.93%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	95.93%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	95.93%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	95.93%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	95.93%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2024	95.93%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equivalent	MSCI	30 June 2024	82.54%	1.50%	31,299.5 0
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI	30 June 2024	94.11%	0%	1.05%
Gender diversity on the Board (also related to good governance):	Weighted average %	MSCI	30 June 2024	94.42%	0%	41.40%

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found <u>here</u>.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCI's 'SFDR Point-in-Time PASI Statement'. More information on MSCI's approach to Principal Adverse Impacts can be found <u>here</u>.

percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.						
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--	--	--	--	--

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 June 2024	84.03%	0%	84.04%

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

Sustainability Indicator	Units	Dat a sou rce	Date	Data covera ge	Data estimated	Output ⁸
Engagement activity: Number of ESG-related engagement activities the Investment Manager was involved in as part of regular interactions with management, such as engagements following sustainability controversies and thematic engagement relating to the Fund ¹¹ . What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Principal adverse

The table above provides a snapshot of the largest investments as at 30 June 2024. This snapshot is reflective of the general portfolio composition throughout the reporting period.

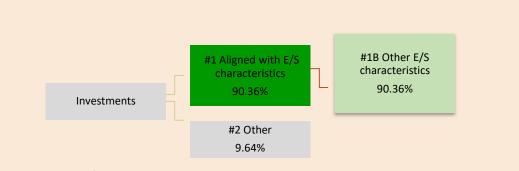

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2024 (snapshot at year-end), 90.36% of the Fund attained the environmental and social characteristics promoted by the Fund, while 9.64% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers: - The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

specific assets.

Sector	Allocation
Financials	85.21%
Others	9.90%
Real Estate	2.41%
Communication Services	1.25%

Taxonomy-aligned activities are expressed as a share of:

turnover

reflecting the share of revenue from green activities of investee companies. - capital

expenditure

(CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.

- operational expenditure (OpEx) reflecting the green operational

activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities

under Regulation (EU) 2020/852.

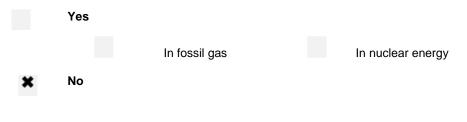

Appendix – Sustainable Finance Disclosure Regulation (SFDR) (Unaudited)

Utilities	1.04%
Consumer Staples	0.19%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

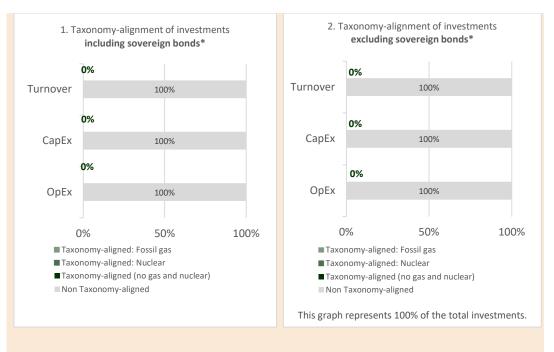

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2023 to 30/06/2024, the investment team engaged with 31 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social

characteristics that

they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Credit Opportunities (GBP) (the "Fund" or "Financial Product") **Legal entity identifier:** 549300DRHJ355WDGEG06

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No × It made sustainable investments with It promoted Environmental/Social (E/S) an environmental objective: ___% characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any × sustainable investments a social objective: %

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable investment means

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability

how the

social

indicators measure

environmental or

characteristics

promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 Jun 2024	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 Jun 2024	94.11%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 26th July 2024.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found <u>here</u>.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found <u>here</u>. Information on Sustainalytics product involvement can be found <u>here</u>.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

¹⁰Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 Jun 2024	94.11%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 Jun 2024	94.11%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 Jun 2024	94.11%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 Jun 2024	94.11%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 Jun 2024	94.11%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 Jun 2024	94.11%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equiv alent	MSCI	30 Jun 2024	86.50%	1.48%	7,920.80
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI	30 Jun 2024	94.04%	0%	0%
Gender diversity on the Board (also related to good governance): percentage of board members who are female. For companies with a two- tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 Jun 2024	94.67%	0%	42.07%

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found <u>here</u>.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCI's 'SFDR Point-in-Time PASI Statement'. More information on MSCI's approach to Principal Adverse Impacts can be found <u>here</u>.

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence : the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weighted average %	MSCI	30 Jun 2024	83.79%	0%	83.70%

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

Sustainability Indicator	Units	Data sourc e	Date	Data coverage	Data estimated	Output ⁸
Engagement activity : Number of ESG-related engagement activities the Investment Manager was involved in as part of regular interactions with management, such as engagements following sustainability controversies and thematic engagement relating to the Fund ¹¹ .	Number of engagements	Intern al Log	1 st July 2023 – 30 th June 2024	100%	0%	25

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2024. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2024 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

¹¹GAM's definition of engagement can be found in our Engagement Policy on our website.

...and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

-Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration		
Greenhouse gas emissions	1. GHG emissions 2. Carbon footprint 3. GHG Intensity of investee companies 4. Exposure to companies active in the fossil fuel sector 5. Share of non-renewable energy consumption and production 6. Energy consumption intensity per high impact climate sector	A range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected investee companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Investeee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.		
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,		
Water	8. Emissions to water	water and waste, were reviewed as part of the		
Waste	9. Hazardous waste and radioactive waste ratio	investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.		
Social and employee matters	 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons) 	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.		

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 30 June 2024 What were the top investments of this financial product?

The table above provides a snapshot of the largest investments as at 30 June 2024. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

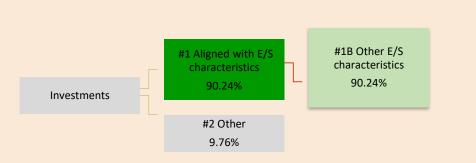

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2024 (snapshot at year-end), 90.24% of the Fund attained the environmental and social characteristics promoted by the Fund, while 9.76% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Financials	96.43%
Utilities	1.06%
Real Estate	1.05%
Communication Services	0.85%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

turnover

reflecting the share of revenue from green activities of investee companies. capital

expenditure

(CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.

operational expenditure (OpEx) reflecting the green operational activities of investee

companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation

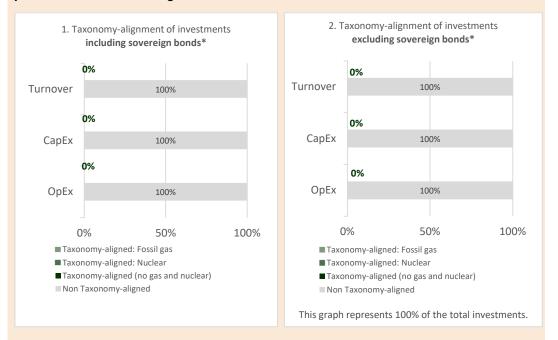

(EU) 2020/852.

Appendix – Sustainable Finance Disclosure Regulation (SFDR) (Unaudited)

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable.

(III)	
12	IJ

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator.

This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2023 to 30/06/2024, the investment team engaged with 25 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Credit Opportunities (USD) (the "Fund" or "Financial Product") **Legal entity identifier:** 5493004R2B7PEULBN196

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No × It made sustainable investments with It promoted Environmental/Social (E/S) an environmental objective: ___% characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any × sustainable investments a social objective: %

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable investment means

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure

environmental or

characteristics promoted by the financial product are attained.

how the

social

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 Jun 2024	95.41%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 Jun 2024	92.43%	0%	0%
Involvement in assault weapons	% of Fund	Sustainalytics	30 Jun 2024	92.43%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 26th July 2024.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found <u>here</u>. Information on Sustainalytics product involvement can be found <u>here</u>.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

¹⁰Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our <u>Sustainability Exclusion Policy</u> for further details.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found <u>here</u>.

for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).						
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 Jun 2024	92.43%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 Jun 2024	92.43%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 Jun 2024	92.43%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 Jun 2024	92.43%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 Jun 2024	91.76%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equivalent	MSCI	30 Jun 2024	83.75%	2.31%	19,565.1 0
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI	30 Jun 2024	89.85%	0%	0%
Gender diversity on the Board (also related to good	Weighted average %	MSCI	30 Jun 2024	90.05%	0%	41.56%

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found <u>here</u>.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCI's 'SFDR Point-in-Time PASI Statement'. More information on MSCI's approach to Principal Adverse Impacts can be found <u>here</u>.

governance): percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.						
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--	--	--	--	--

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 Jun 2024	78.43%	0%	85.71%

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

Sustainability Indicator	Units	Data sourc e	Date	Data covera ge	Data estimated	Output ⁸
Engagement activity: Number of ESG-related engagement activities the Investment Manager was involved in as part of regular interactions with management, such as engagements following sustainability controversies and thematic engagement relating to the Fund*. Involvement in oil sands extraction	88.42%	0%	92.43%	0%
Involvement in thermal coal	88.42%	0%	92.43%	0%

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2024. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2024 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

^{*}GAM's definition of engagement can be found in our Engagement Policy on our website.

Violations of UN Global Compact principles	88.42%	0%	91.67%	0%
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions	99.99%	5,734.1	83.75%	19,565. 10
Investments in companies active in fossil fuel sector	99.99%	1.62%	89.85%	0%
Gender diversity on the board	99.9%	40%	90.05%	41.56%
Board Independence	82.48%	83.94%	78.43%	85.71%
Engagement Activity	100%	31	100%	23

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration
Greenhouse gas emissions	1. GHG emissions2. Carbon footprint3. GHG Intensity of investee companies4. Exposure to companies active in the fossil fuel sector5. Share of non-renewable energy consumption and production	A range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected investee companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Investeee
	6. Energy consumption intensity per high impact climate sector	companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,
Water	8. Emissions to water	water and waste, were reviewed as part of the
Waste	9. Hazardous waste and radioactive waste ratio	investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.
Social and employee matters	 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons) 	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

What were the top investments of this financial product?

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 30 June 2024

The table above provides a snapshot of the largest investments as at 30 June 2024. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2024 (snapshot at year-end), 91.57% of the Fund attained the environmental and social characteristics promoted by the Fund, while 8.43% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Financials	88.07%
Others	9.80%
Communication Services	0.87%
Real Estate	0.83%
Consumer Staples	0.42%
Utilities	0.01%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover

reflecting the share of revenue from green activities of investee companies. - capital

expenditure

(CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.

operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

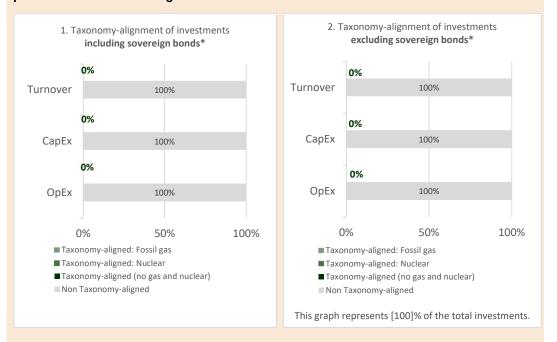

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Appendix – Sustainable Finance Disclosure Regulation (SFDR) (Unaudited)

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity.

This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2023 to 30/06/2024, the investment team engaged with 23 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Susta	aina	ble

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did thi	is financial product have a sustainable	investment objective?
••	Yes	🔹 🗶 No
	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmental objective in economic activities that do not qualify as environmental provide activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
	made sustainable investments with social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

GAM Sustainable Emerging Equity (the "Financial Product" or "Fund") promoted the following environmental and social characteristics:

- 1. Selection of companies with lower carbon intensity relative to their sector to contribute to the Fund's target of weighted average carbon intensity that is 30% lower than the Fund's benchmark, namely the MSCI Emerging Markets (the "Benchmark"),
- Tilt towards companies with best-in-class ESG scores (focused on the management of ESG risks and opportunities) relative to sector peers to contribute to a target MSCI ESG Fund Rating of A or above,
- Exclusion of companies involved in specific activities considered to cause negative environmental and social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus"),
- 4. Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact ("UNGC"),
- Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 6. Investments in companies assessed to follow good governance practices, and

7. Engagement with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

The environmental and social characteristics were promoted in line with the binding elements of the Investment Strategy of the Fund, as outlined in the Fund's Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to carbon intensity

All investments in the Fund are reviewed with respect to their carbon intensity. The Fund's investments are selected such that the weighted average carbon intensity of the Fund's portfolio is materially lower than that of the Benchmark.

Sustainability Indicator	Units	Source	Date	Data coverage ²	Data estimated ³	Output ^₄
Weighted Average Carbon Intensity – calculated as the Fund portfolio's exposure to carbon-intensive companies, expressed in tons CO2e / \$M revenue. Scope 1 and Scope 2 GHG emissions are allocated based on portfolio weights (the current value of the investment relative to the current portfolio value).	tCO2e / \$M revenue	MSCI	30 June 2024	91.43%	6.38%	109.1

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 26th July 2024.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found <u>here</u>.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found <u>here</u>. Information on Sustainalytics product involvement can be found <u>here</u>.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include assets defined under "#2 Other" in the Prospectus.

¹¹Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

2) Indicators relating to ESG Scores

The Co-Investment Manager targets an overall MSCI ESG Fund Rating of A or above. The MSCI ESG Fund Rating is designed to assess the resilience of a fund's aggregate holdings to long-term ESG risks; highly rated funds consist of issuers with leading or improving management of key ESG risks.

Sustainability Indicator	Units	Source	Date	Data coverage	Data estimated	Output⁵
Fund ESG Rating– overall MSCI ESG Fund Rating. A higher ESG Rating indicates the Fund's holdings are leaders in the management of long-term ESG risks.	Score	MSCI	30 June 2024	99.03%	0%	AA

3) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the Sustainability Exclusion Criteria within the Prospectus). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2024	99.03%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor- made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalyt ics	30 June 2024	94.03%	0%	0%
Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalyt ics	30 June 2024	94.03%	0%	0%

⁵ MSCI Fund Rating Methodology can be found <u>here</u>.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include assets defined under "#2 Other" in the Prospectus.

Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalyt ics	30 June 2024	94.03%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalyt ics	30 June 2024	94.03%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalyt ics	30 June 2024	94.03%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalyt ics	30 June 2024	94.03%	0%	0%

4) Indicators relating to international norms and standards

Companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact. Companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2024	91.43%	0%	0%

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found <u>here</u>.

5) Indicators relating to Principal Adverse Impacts

The Co-Investment Manager applied an internal systematic framework to consider and take action of to mitigate of principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁸
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tCO2 e	MSCI	30 June 2024	91.43%	6.38%	2,379.5
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund = Yes	MSCI	30 June 2024	90.68%	0%	4.67%
Gender diversity on the Board (also related to good governance): percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Nume ric value (ratio %)	MSCI	30 June 2024	91.43%	0%	21.01%

6) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Co-Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

⁸ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCI's 'SFDR Point-in-Time PASI Statement'. More information on MSCI's approach to Principal Adverse Impacts can be found <u>here</u>.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁹
Board independence : the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Nume ric value (ratio %)	MSCI	30 June 2024	90.29%	0%	60.98%

7) Indicators relating to engagement activities

Engagement with investee companies on environmental, social and governance issues as part of interactions with management, engagements following sustainability controversies or other significant events and Thematic engagements with issuers, for example on climate-related topics.

Sustainability Indicator	Units	Data sourc e	Date	Data coverage	Data estimated	Output ¹⁰
Engagement activity: Number of ESG-related engagement activities the Co- Investment Manager was involved in as part of regular interactions with management, such as engagements following sustainability controversies and thematic engagement relating to the Fund ¹² .	Number of engagements	Intern al monit oring	30 June 2024	100%	0%	27

⁹ Calculated as the proportion of investment (by NAV). The calculation does not include assets defined under "#2 Other" in the Prospectus.

¹⁰ This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2024. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2024 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

¹²GAM's definition of engagement can be found in our Engagement Policy on our website.

...and compared to previous periods?

	2023		2024

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration
	1. GHG emissions	A range of indicators in relation to company GHG
	2. Carbon footprint	emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG
	3. GHG Intensity of investee	emissions among others) were reviewed as part
	companies	of the investment process, and were primarily
	4. Exposure to companies active in the fossil fuel sector	addressed in a qualitative way, for example
Greenhouse	5. Share of non-renewable	through engagement with selected companies
gas	energy consumption and	on reduction targets and initiatives or voting on
emissions	production	resolutions to support greater transparency on
	6. Energy consumption intensity per high impact climate sector	climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to a company's impact on biodiversity, including deforestation, water and
Water	8. Emissions to water	waste, were reviewed as part of the investment
Waste	9. Hazardous waste and radioactive waste ratio	process and were primarily addressed in a qualitative way, for example through engagement with selected companies.
	10. Violations of UNGC principles	A range of PAI indicators were reviewed as part
	and OECD Guidelines for	of the investment process. Companies assessed
	Multinational Enterprises	as severely violating UN Global Compact
Social and	11. Lack of processes and	principles or assessed as having exposure to
employee	compliance mechanisms to	controversial weapons are excluded from the
matters	monitor compliance with UNGC	Fund. Board gender diversity was considered
	priniples and OECD Guidelines	primarily within engagement and voting
	for Multinational Enterprises	decisions.
	12. Unadjusted gender pay gap	

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Appendix – Sustainable Finance Disclosure Regulation (SFDR) (Unaudited) 13. Board gender diversity 14. Exposure to controversial

weapons (anti- personnel mines, Asset allocation cluster munitions, chemical describes the weapons and biological weapons) investments in specific assets.

The table above provides a snapshot of the largest investments as at 30 June 2024. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

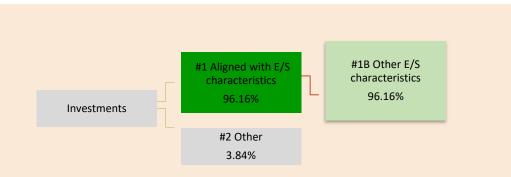

What was the asset allocation?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2024

share of

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2024 (snapshot at year-end), 96.16% of the Fund was aligned with the E/S characteristics of the Fund, while 3.84 % was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
INFORMATION TECHNOLOGY	25.22%
FINANCIALS	21.29%
CONSUMER DISCRETIONARY	15.24%
INDUSTRIALS	5.47%
PRIVATE PLACEMENT	5.11%
CASH EQUIVALENT	5.01%
REAL ESTATE	3.69%
HEALTH CARE	3.44%
COMMUNICATION SERVICES	3.23%
ENERGY	3.18%
MATERIALS	2.49%
UTILITIES	1.58%
CONSUMER STAPLES	1.42%

The Global Industry Classification Standard is used to determine economic sectors.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- Taxonomy-aligned activities are expressed as a share of:
- turnover
- reflecting the share of revenue from green activities of investee companies. - capital

expenditure

(CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.

operational expenditure (OpEx) reflecting the green operational activities of investee

companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

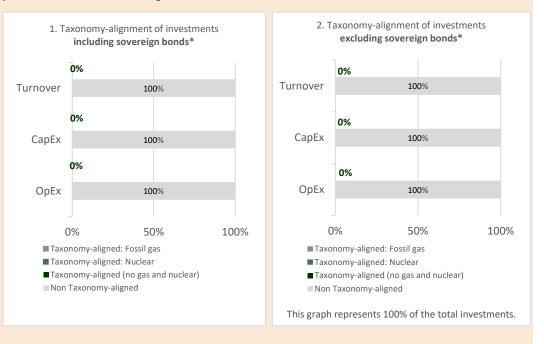

Appendix – Sustainable Finance Disclosure Regulation (SFDR) (Unaudited)

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

0		Ü	5	4	λ
16	P	4	4	t	
1	4			1	/
	-		5	/	

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Coner" invvestments of the Fund included cash / cash equivalents and / or certain derivatives for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1) Actions relating to carbon intensity

Assessments of carbon intensity of investee companies were conducted quarterly using third-party data. Carbon intensity values were also assessed as part of the stock selection process, ongoing Fund monitoring and to inform engagement.

2) Actions relating to ESG Fund Rating

The Co-Investment Manager assessed ESG Scores as part of the stock selection process, ongoing Fund monitoring, and to inform engagement.

3) Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

4) Indicators relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

5) Indicators relating to Principal Adverse Impacts

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

6) Indicators relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Co-Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

7) Indicators relating to engagement activities

The Co-investment Manager engaged with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement

The investment team maintains a record of all their key ESG engagement activities during the year and also upload its engagement activities as Bloomberg notes – as part of GAM general engagement recording process. During the year, there was 27 companies that were engaged with on ESG-related matters.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared with the reference benchmark? Not applicable.

How did this financial product perform compared with the broad market index? Not applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star European Equity (the "Fund" or "Financial Product") **Legal entity identifier:** 549300TME4JJDOP4H631

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No × It made sustainable investments with It promoted Environmental/Social (E/S) an environmental objective: ___% characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any × sustainable investments a social objective: %

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable investment means

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2024	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 26th July 2024.

Sustainability indicators measure how the

environmental or social characteristics promoted by the

financial product

are attained.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found <u>here</u>.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found <u>here</u>. Information on Sustainalytics product involvement can be found <u>here</u>.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

¹⁰Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our <u>Sustainability Exclusion Policy</u> for further details.

Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2024	100%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 June 2024	100%	0%	83.27%

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration			
	1. GHG emissions	A range of indicators in relation to company GHG			
	2. Carbon footprint	emissions and carbon emission reduction			
	3. GHG Intensity of investee	initiatives (including Scope 1 & Scope 2 GHG			
	companies	emissions among others) were reviewed as part			
Greenhouse	4. Exposure to companies active	of the investment process, and were primarily			
gas	in the fossil fuel sector	addressed in a qualitative way, for example			
emissions	5. Share of non-renewable	through engagement with selected investee			
	energy consumption and	companies on reduction targets and initiatives or			
	production	voting on resolutions to support greater			
	6. Energy consumption intensity	transparency on climate-related risks. Investeee			
	per high impact climate sector	companies assessed to derive over 25% of			

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

		revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,
Water	Emissions to water	water and waste, were reviewed as part of the
Waste	9. Hazardous waste and radioactive waste ratio	investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.
Social and employee matters	 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons) 	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 30 June 2024

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country

Asset allocation describes the share of investments in specific assets.

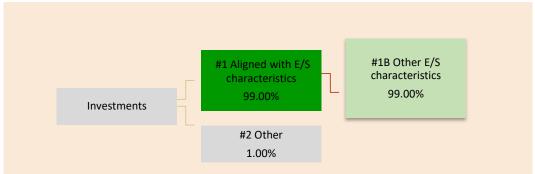

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments? N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2024 (snapshot at year-end), 99.00% of the Fund attained the environmental and social characteristics promoted by the Fund, while 1.00% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:

turnover

reflecting the share of revenue from green activities of investee companies. - capital

expenditure

(CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.

operational expenditure (OpEx) reflecting the green operational

activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Appendix – Sustainable Finance Disclosure Regulation (SFDR) (Unaudited)

In which economic sectors were the investments made?

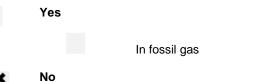

Sector	Allocation
FINANCIALS	22.50%
INDUSTRIALS	21.02%
INFORMATION TECHNOLOGY	13.73%
HEALTH CARE	11.17%
ENERGY	8.56%
CONSUMER DISCRETIONARY	7.04%
CONSUMER STAPLES	5.67%
MATERIALS	5.35%
UTILITIES	2.07%
COMMUNICATION SERVICES	1.92%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

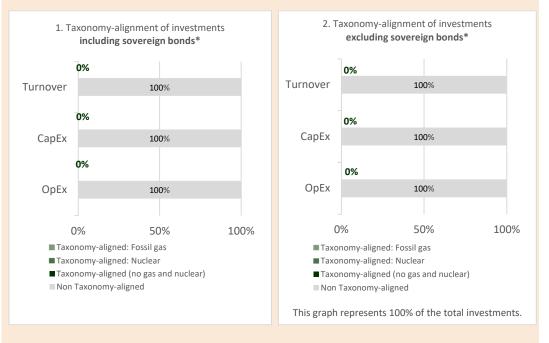

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

In nuclear energy

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2023 to 30/06/2024, the investment team engaged with 24 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are

indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Global Rates (the "Fund") Legal entity identifier: ZVIMWIFXTC2J79D70175

Sustainable

investment means Did this financial product have a sustainable investment objective? an investment in an economic activity Yes No ¥ that contributes to It made sustainable investments with It promoted Environmental/Social (E/S) an environmental or characteristics and an environmental objective: ___% social objective, while it did not have as its objective a sustainable provided that the investment, it had a proportion of 0% of sustainable in economic activities that investment does not investments qualify as environmentally significantly harm sustainable under the EU any environmental or with an environmental objective in economic Taxonomy activities that qualify as environmentally social objective and sustainable under the EU Taxonomy in economic activities that do that the investee not qualify as environmentally companies follow with an environmental objective in economic sustainable under the EU good governance activities that do not qualify as Taxonomy practices. environmentally sustainable under the EU Taxonomy The EU Taxonomy is with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any × sustainable investments a social objective: ___%

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

- 1) Environmental characteristics a minimum threshold as measured by the Yale Environmental Performance Index (EPI) which assesses factors, including:
 - Climate change (relating to mitigation efforts);
 - Environmental health (including waste management; heavy metals; sanitation and drinking water; air quality);
 - Ecosystem vitality (biodiversity and habitat; ecosystem services; fisheries; acid rain; agriculture; water resources).

More information on the Yale Environmental Performance Index (EPI) can be found on <u>https://epi.yale.edu/</u>

- 2) Social characteristics a minimum threshold as measured by the Freedom House Global Freedom Score, which assesses factors including:
 - Political rights (including electoral process; political pluralism and participation; functioning of government);
 - civil liberties (including freedom of expression and belief; associational and organisational rights; rule of law; personal autonomy and individual rights).

More information on the Freedom House Global Freedom Score can be found on https://freedomhouse.org/

Environmental and/or social characteristics

a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

- 3) Social characteristics a minimum threshold as measured by the Social Progress Index, which assess factors including:
 - Health (including nutrition and basic medical care; water and sanitation; shelter; and personal safety);
 - Foundations of wellbeing (including access to basic knowledge; access to information & communications; health & wellness; and environmental quality);
 - Opportunity (including personal rights; personal freedom & choice; inclusiveness; access to advanced education).

More information on the Social Progress Index can be found on https://www.socialprogress.org/

4) Governance – a minimum threshold as measured by the Financial Action Task Force, which assesses adherence to internationally recognized and approved standards to counter money laundering and terrorist financing at a country level.

More information on the Financial Action Task Force can be found on fatf-gafi.org

 Consideration of Principal Adverse Impacts on sustainability factors relevant to sovereigns and supranationals from selected indicators outlined in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act").

The environmental and social characteristics were promoted in line with the binding elements of the Investment Strategy of the Fund, as outlined in the Fund's Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to the Exclusion Criteria

The Exclusion Criteria were programmed, on a best-efforts basis, into the investment controls, using information from independent ESG rating providers, NGO sources and recognised third party sources. There were no breaches of the Exclusion Criteria during the year. No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Environmental Performance Index >= 35: Proportion of investments from	% of Fund	Yale Environmental	30 th June 2024	100%	0%	100%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 26th August 2024.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found <u>here</u>. More information about Sustainalytics coverage can be found <u>here</u>.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found <u>here</u>. Information on Sustainalytics product involvement can be found <u>here</u>.

⁴ The calculation does not include assets defined under "#2 Other" in the Prospectus. Calculations are performed based on net positive exposure to each sovereign, by combining fixed income and global currency exposures on a re-weighted basis to 100% of the portfolio meaning that net negative currency and sovereign fixed income exposure is not reflected in the data reported. Global currencies are mapped to the relevant sovereign (e.g. BRL currency exposure is mapped to the Brazil sovereign)

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

countries with an Environmental Performance Index >= 35		Performance Index (EPI)				
Global Freedom Score (Total Score & Status) >= 10: Proportion of investments from countries with a Global Freedom Score (Total Score & Status) >= 10	% of Fund	Freedom House Global Freedom Score	30 th June 2024	100%	0%	100%
Social Progress Index Tier < Tier 6: Proportion of investments from countries with a Social Progress Index Tier < Tier 6	% of Fund	Social Progress Index	30 th June 2024	100%	0%	100%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

——Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the principal adverse impacts (PAIs), as detailed in Table 1 and 3 of Annex 1 of the SFDR Delegated Act, on sustainability factors in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

An assessment of the PAI indicators was conducted quarterly between the Investment Team and Governance and Responsible Investment team within GAM. The indicators are assessed against a set of internally developed thresholds, constructed to flag where investments may be involved in material adverse impacts and prioritise appropriate action.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Adverse sustainability indicator		Actions				
		Table 1				
Environmental 15. GHG Inten		A range of indicators in relation to country-level GHG emissions and GHG intensity are embedded into the EPI Index (including projected GHG emissions in 2050; CO2 Growth Rate; CH4 Growth Rate; CO2 from Land Cover; GHG Intensity Trend; F-Gas Growth Rate; Black Carbon Growth Rate; GHG Emissions per Capita; and N2O Growth Rate). These indicators contribute to the EPI score for each country which is used in the selection of eligible countries for the Financial Product. In addition, investments were monitored against a set of internally				
		developed thresholds constructed to flag excessive GHG Intensity levels. No investments were flagged during the year.				
Social	16. Investee countries subject to social violations	A range of issues in relation to potential social violations are embedded in the Freedom House Global Freedom Score (including safeguards against corruption; protection of civil liberties; equity of opportunity; freedom from economic exploitation; rule of law).				

R.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

		In addition, investments were monitored against a set of internally developed thresholds constructed to flag material instances of countries subject to social violations. No investments were flagged during the year. Table 3
Governance	21. Average corruption score	Corruption is integrated within the Freedom House Global Freedom Score. Sovereign issuers that receive a "Not Free" score on the Freedom House Global Freedom Score are not eligible for investment. Supranational institutions, such as the World Bank, the United Nations, a regional development bank or another body with robust and transparent sustainability safeguards are considered based on the issuing entity. In addition, investments were monitored against a set of internally developed thresholds constructed to flag instances where a country's corruption score is deemed to be excessively low.
Governance	23. Average political stability score	Political stability is integrated with the Freedom House Global Freedom Score. Sovereign issuers that receive a "Not Free" score on the Freedom House Global Freedom Score are not eligible for investment. Supranational institutions, such as the World Bank, the United Nations, a regional development bank or another body with robust and transparent sustainability safeguards are considered based on the issuing entity. In addition, investments were monitored against a set of internally developed thresholds constructed to flag instances where a country's political score is deemed to be excessively low.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
NOK - Norwegian Krone		34.40%	Norway
JPY - Japanese Yen		20.12%	Japan
USD - United States Dollar		18.04%	United States
EUR - Euro		16.09%	European Union
AUD – Australian Dollar		11.17%	Australia
MXN – Mexican Peso		0.18%	Mexico

The table above provides a snapshot of the largest investments as at 30 June 2024. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The largest investments are calculated on the basis of reweighted net positive currency exposure.

What was the proportion of sustainability-related investments?

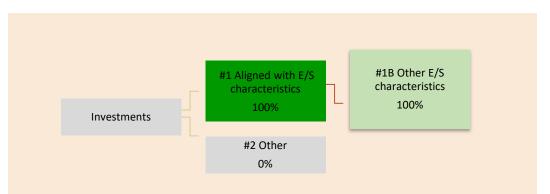

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 30

June 2024

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets are aligned with the environmental and social characteristics of the Fund since all investments, including cash and currency allocations, are subject to country-level binding elements of the investment strategy to promote environmental and social characteristics. During the period, investments aligned with E/S characteristics remained at 100% as all investments, including cash, are aligned with these characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Sovereign	100%

The Fund invested in government bonds, cash, interest rate swaps, interest rates options, interest rate futures, and forward foreign exchange contracts during the year. We disclosure asset type rather than sector as this is most relevant to the Fund.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

- Taxonomy-aligned activities are expressed as a share of:
- turnover
- reflecting the share of revenue from green activities of investee companies. - capital

expenditure

(CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.

 operational expenditure

 (OpEx) reflecting the green
 operational
 activities of
 investee
 companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation

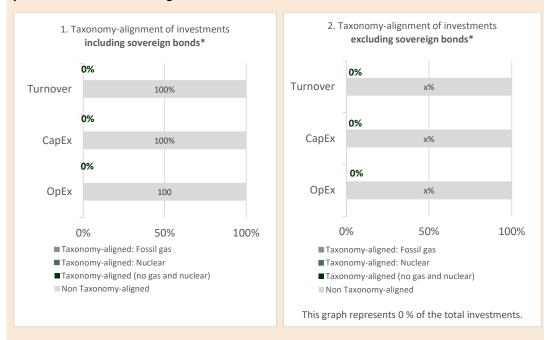

(EU) 2020/852.

Appendix – Sustainable Finance Disclosure Regulation (SFDR) (Unaudited)

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁵?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

⁵ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1) Actions relating to the Exclusion Criteria

The Exclusion Criteria are programmed, on a best-efforts basis, into the investment controls, using information from independent ESG rating providers, NGO sources and recognised third party sources. These data sources and outputs are reviewed and/or updated at least quarterly. There were no breaches of the Exclusion Criteria during the year.

2) Indicators relating to Principal Adverse Impacts

The indicators are assessed quarterly against a set of internally developed thresholds, constructed to flag where investments may be involved in material adverse impacts and prioritise appropriate action.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Japan Leaders (the "Fund" or "Financial Product") **Legal entity identifier:** 549300WSXYGYCMCU1B08

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No × It made sustainable investments with It promoted Environmental/Social (E/S) an environmental objective: ___% characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any × sustainable investments a social objective: %

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

Sustainable investment means

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

Indicators relating to Sustainability Exclusion Criteria 1)

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2024	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%
Involvement in assault weapons for civilian customers: share	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 26th July 2024.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

¹⁰Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).						
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	100%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2024	100%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equiv alent	MSCI	30 June 2024	100%	17.25%	1,828.40
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI	30 June 2024	100%	0%	0%
Gender diversity on the Board (also related to good governance): percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the	Weig hted avera ge %	MSCI	30 June 2024	100%	0%	18.67%

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found <u>here</u>.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCI's 'SFDR Point-in-Time PASI Statement'. More information on MSCI's approach to Principal Adverse Impacts can be found <u>here</u>.

Supervisory Board only.			

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 June 2024	100%	0%	43.42%

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

Sustainability Indicator	Units	Data sourc e	Date	Data cover age	Data estimated	Output ⁸
Engagement activity: Number of ESG-related engagement activities the	Number of engagements	Intern al Log	1 st July 2023 – 30 th June 2024	100%	0%	12

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2024. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2024 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

¹¹GAM's definition of engagement can be found in our Engagement Policy on our website.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration
Greenhouse gas emissions	1. GHG emissions 2. Carbon footprint 3. GHG Intensity of investee companies 4. Exposure to companies active in the fossil fuel sector 5. Share of non-renewable energy consumption and production 6. Energy consumption intensity per high impact climate sector	A range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected investee companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Investeee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,
Water	8. Emissions to water	water and waste, were reviewed as part of the
Waste	9. Hazardous waste and radioactive waste ratio	investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.
Social and employee matters	10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global

Asset allocation describes the share of investments in specific assets.

11. Lack of processes and	Compact princi
compliance mechanisms to	exposure to cont
monitor compliance with UNGC	from the Fund.
priniples and OECD Guidelines	considered prim
for Multinational Enterprises	voting decisions.
12. Unadjusted gender pay gap	
13. Board gender diversity	
14. Exposure to controversial	
weapons (anti- personnel mines,	
cluster munitions, chemical	
weapons and biological	
weapons)	

Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
SUZUKI MOTOR CORP	CONSUMER DISCRETIONARY	4.41%	JAPAN
FANUC CORP	INDUSTRIALS	4.39%	JAPAN
ORIX CORP	FINANCIALS	4.37%	JAPAN

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 30 June 2024

The table above provides a snapshot of the largest investments as at 30 June 2024. This snapshot is reflective of the general portfolio composition throughout the reporting period.

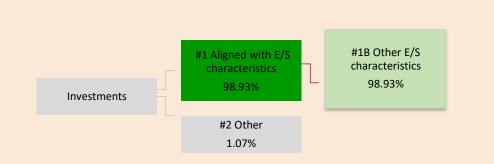

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2024 (snapshot at year-end), 98.93% of the Fund attained the environmental and social characteristics promoted by the Fund, while 1.07% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
INDUSTRIALS	30.23%
CONSUMER DISCRETIONARY	17.37%
INFORMATION TECHNOLOGY	12.92%
FINANCIALS	12.89%
HEALTH CARE	12.83%
CONSUMER STAPLES	8.45%
MATERIALS	4.33%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Taxonomy-aligned activities are expressed as a share of:

turnover

reflecting the share of revenue from green activities of investee companies. - capital

expenditure

(CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.

- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities

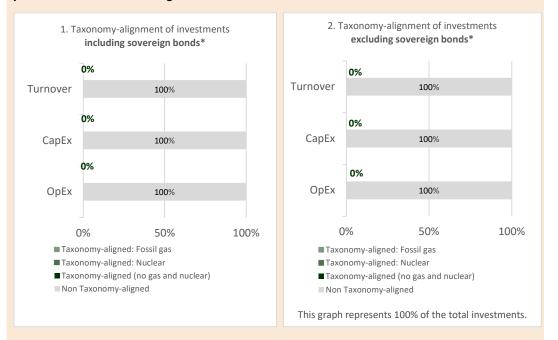

under Regulation (EU) 2020/852.

Appendix – Sustainable Finance Disclosure Regulation (SFDR) (Unaudited)

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable.

(III)	
12	IJ

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator.

This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2023 to 30/06/2024, the investment team engaged with 12 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

ence marks are

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means Did this financial product have a sustainable investment objective? an investment in an Yes No ¥ It made sustainable investments with It promoted Environmental/Social (E/S) characteristics and an environmental objective: ___% while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy The EU Taxonomy is with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any × sustainable investments a social objective: ___%

> All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Given the unique structure of these securities, and absence of a prescribed asset class specific approach to such securities within the SFDR framework, this Fund promotes environmental and social characteristics at the issuer level and/or at the level of the parent company of the issuer (hereinafter referred to collectively as "Issuer"), rather than at the level of the underlying assets.

The Fund promoted the following environmental and social characteristics at the issuer level:

- 1) Exclusion of securities from Issuers that are assessed as R(ed) as part of the internal MBS Sustainability Due Diligence framework as detailed in the GAM Star Fund Plc Prospectus (the "Prospectus"). This framework incorporates an assessment of sustainability issues (including corruption, bribery, money laundering, executive compensation issues, fraud, tax evasion, anticompetitive practices, violation of international standards, predatory lending, among others),
- 2) Exclusion of securities from Issuers involved in specific activities considered to cause negative environmental and social impact, and
- 3) Assessed adherence to generally accepted international norms and standards, as set by the United Nations Global Compact ("UNGC").

The environmental and social characteristics were promoted in line with the binding elements of the Investment Strategy of the Fund, as outlined in the the Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. **That Regulation** does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainability

how the

social

indicators measure

environmental or

characteristics

promoted by the

financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to the MBS Sustainability Due Diligence

The internal MBS Sustainability Due Diligence is an internal assessment applied at the Issuer level and uses a flagging approach to assess entities flagged in very severe risk incidents relating to sustainability issues that are considered most relevant to the MBS/ABS asset class. The due diligence process uses third-party ESG data (RepRisk), and internal qualitative analysis and is applied to all securities in the Fund. This framework incorporates an assessment of 'very severe risk incidents' for material sustainability issues (including corruption, bribery, money laundering, executive compensation issues, fraud, tax evasion, anti-competitive practices, violation of international standards, and predatory lending, among others).

R(ed) Issuers are associated with severe incidents related to the sustainability issues outlined in the Prospectus and where insufficient actions have been taken to address the issue. These issuers may have also been involved in breaches of the Sustainability Exclusions Criteria and/or the UN Global Compact and insufficient actions have been taken to address these issues.

A(mber) issuers are associated with very severe incidents related to the sustainability issues outlined in the Prospectus, but material actions have been taken to address the issue. These issuers may also have been involved in a serious breach of the UN Global Compact but material actions have been taken to address the issue.

G(reen) issuers have not been flagged for 'very severe' sustainability risk incidents related to sustainability issues outlined in the Prospectus, involvement in the ineligible activities under the Sustainability Exclusion Criteria or serious breaches of the United Nations Global Compact.

The proportion of the fund invested in securities issued by R(ed) or A(mber) issuers is shown in the following table.

Sustainability Indicator	Units	Data source ¹	Date ²	Data coverage ³	Data estimated ⁴	Output⁵
MBS Sustainability Due Diligence assessment: share of investments issued by entities that have been classified R(ed) in the MBS Sustainability Due Diligence.	% of Fund	MBS Sustainability Due Diligence RepRisk, MSCI	30 June 2024	93 %	0 %	0 %

¹ The data is mapped from issuance level to issuer level and/or at the issuer parent company level using Bloomberg formulas or direct MSCI mapping.

² Data snapshot taken at the Fund's year end. RepRisk and MSCI data as at 25th July 2024.

³ Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include assets defined under "#2 Other" in the Prospectus.

⁴ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include assets defined under "#2 Other" in the Prospectus.

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include assets defined under "#2 Other" in the Prospectus.

3) Indicators relating to international norms and standards

Issuers are expected to adhere to minimum international norms and standards as defined by the UN Global Compact. Issuers assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations. This assessment is conducted at the issuer level and reported as % of the Fund's investment issued by entities failing the criteria.

No exceptions were made during the reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Advers	e sustainability indicator	Fund Considerations		
	Tab	le 1		
Social & Employee Matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Issuers with any violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises were excluded from investment.		
	14. Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)	Issuers with exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons, and biological weapons) were excluded from investment

The table above provides a snapshot of the largest investments as at 30 June 2024. This snapshot is reflective of the general portfolio composition throughout the reporting period.

What was the proportion of sustainability-related investments?

Not applicable. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

The Co-Investment Manager targets a minimum of 70% (or above) of the net asset value of the Fund to be to be aligned with environmental/social characteristics promoted by the Fund. The Fund does not commit to holding sustainable investments. As at 30 June 2024, 86% of the net asset value of the Fund was aligned with the E/S characteristics promoted by the Fund, and 14% was allocated to investments categorised as "#2 Other" per the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

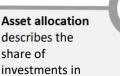

In which economic sectors were the investments made?

Sector (NACE)	Allocation
Financial service activities, except insurance and pension funding	93 %
Not Covered	7 %

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

specific assets.

Taxonomy-aligned activities are expressed as a share of: - turnover

reflecting the

share of revenue from green activities of investee companies.

capital expenditure

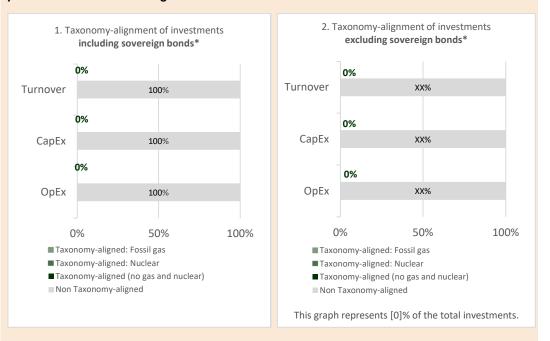

(CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.

operational expenditure (OpEx) reflecting the green operational activities of investee companies.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁶?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental obiective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To comply with the

EU Taxonomy, the criteria for **fossil gas**

investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

⁶ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable.

Reference benchmarks are indexes to

measure whether

product attains the environmental or

characteristics that

they promote.

the financial

social

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments under #2 Other includes cash and certain derivatives, Issuers assessed as A(mber) as part of the MBS Sustainability Due Diligence process, and Issuers where there is a lack of sustainability data coverage. We do not deem an assessment of minimum environmental and social safeguards to be relevant for cash by nature of the asset class, nor derivatives where full look through is not possible. The Co-Investment Manager continuously seeks to engage with data providers to improve coverage. A(mber) Issuers are monitored on an ongoing basis and the Co-Investment Manager engaged with these Issuers to remediate the incident and prevent further harm.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1) Actions relating to the MBS Due Diligence

The MBS Sustainability Due Diligence framework was applied at the Issuer level. The framework incorporates an assessment of "very severe risk incidents" relating to material sustainability issues, which are considered most relevant to the MBS, ABS, or other debt security issued. An assessment of good governance at the Issuer level is integrated into the framework.

We updated the MBS Sustainability Due Diligence assessment on a quarterly basis, and used third-party ESG data, company reports, and other sources as appropriate. The due diligence was reviewed by the investment manager and internal oversight committee.

2) Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

3) Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis. The Co-Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 1) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- Assessed adherence to generally accepted international norms and standards set by the United 2) Nations Global Compact (UNGC),
- 3) Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- Investments in companies assessed to follow good governance practices, and 4)
- Engagement with investee companies on environmental, social and governance issues as 5) described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

Indicators relating to Sustainability Exclusion Criteria 1)

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2024	99.84%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	99.84%	0%	0%
Involvement in assault weapons for civilian customers: share	% of Fund	Sustainalytics	30 June 2024	99.84%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 26th Jul 2024.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

¹⁰Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).						
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	99.84%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	99.84%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	99.84%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2024	99.84%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output⁵

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found <u>here</u>.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCI's 'SFDR Point-in-Time PASI Statement'. More information on MSCI's approach to Principal Adverse Impacts can be found <u>here</u>.

percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.						
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--	--	--	--	--

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 June 2024	96.67%	0%	79.79%

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

Sustainability Indicator	Units	Data sourc e	Date	Data cover age	Data estimated	Output ⁸
Engagement activity: Number of ESG-related engagement activities the Investment Manager was involved in as part of regular interactions with management, such as engagements following sustainability controversies and thematic engagement relating to the Fund ¹¹ . ⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2024. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2024 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

¹¹GAM's definition of engagement can be found in our Engagement Policy on our website.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

impacts are the most significant negative impacts of investment decisions on

sustainability factors

social and employee

matters, respect for human rights, anti-

corruption and antibribery matters.

relating to environmental,

Principal adverse

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Adverse sust	ainability indicator	Fund consideration
Greenhouse	1. GHG emissions2. Carbon footprint3. GHG Intensity of investee companies4. Exposure to companies active in the fossil fuel sector5. Share of non-renewable	A range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected investee
gas emissions	 energy consumption and production 6. Energy consumption intensity per high impact climate sector 	companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Investee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,
Water	8. Emissions to water	water and waste, were reviewed as part of the
Waste	9. Hazardous waste and radioactive waste ratio	investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.
Social and employee matters	 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons) 	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

Indicators applicable to investments in investee companies Adverse sustainability indicator Fund consideration

What were the top investments of this financial product?

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 30 June 2024

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	INFORMATION TECHNOLOGY	9.62%	UNITED STATES OF AMERICA
NVIDIA CORP	INFORMATION TECHNOLOGY	8.78%	UNITED STATES OF AMERICA
AMAZON.COM INC	CONSUMER DISCRETIONARY	7.05%	UNITED STATES OF AMERICA
ALPHABET INC CL A	COMMUNICATION SERVICES	6.78%	UNITED STATES OF AMERICA
APPLE INC	INFORMATION TECHNOLOGY	4.38%	UNITED STATES OF AMERICA
INTUITIVE SURGICAL INC	HEALTH CARE	3.78%	UNITED STATES OF AMERICA
TAIWAN SEMICONDUCTOR SP ADR	INFORMATION TECHNOLOGY	3.47%	TAIWAN
NOVO NORDISK A/S B	HEALTH CARE	3.42%	DENMARK
META PLATFORMS INC CLASS A	COMMUNICATION SERVICES	3.40%	UNITED STATES OF AMERICA

The table above provides a snapshot of the largest investments as at 30 June 2024. This snapshot is reflective of the general portfolio composition throughout the reporting period.

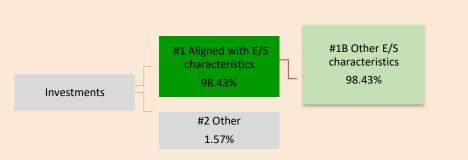

The Global Industry Classification Standard is used to determine economic sectors.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2024 (snapshot at year-end), 98.43% of the Fund attained the environmental and social characteristics promoted by the Fund, while 1.57% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
INFORMATION TECHNOLOGY	47.97%
CONSUMER DISCRETIONARY	16.95%
COMMUNICATION SERVICES	14.19%
HEALTH CARE	8.85%
INDUSTRIALS	5.46%
FINANCIALS	3.19%
CONSUMER STAPLES	1.79%
PRIVATE PLACEMENT	0.16%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Taxonomy-aligned activities are expressed as a share of:

Asset allocation

describes the

investments in

specific assets.

share of

- turnover

reflecting the share of revenue from green activities of investee companies. - capital

expenditure

(CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.

operational expenditure (OpEx) reflecting the green operational activities of investee

companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation

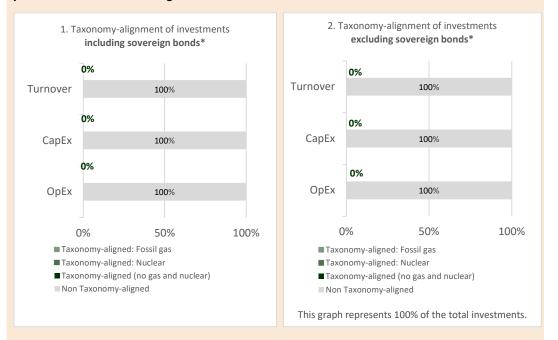

(EU) 2020/852.

Appendix – Sustainable Finance Disclosure Regulation (SFDR) (Unaudited)

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Texonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable.

		_	-	_	
/		æ	ų	2	
()	1	₽.	1	3	
U		12	-	91	

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" investments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator.

This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2023 to 30/06/2024, the investment team engaged with 9 companies relating to ESG and sustainability concerns or opportunities.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Sustainable Climate Bond (the "Fund")

Legal entity identifier: 5493007KJSYSWBPW5518

Sustainable investment objective

Did this financial product have a sustainable investment objective? Yes No × It made sustainable investments with It promoted Environmental/Social (E/S) × an environmental objective: 93% characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable in economic activities that × investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do × not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any × a social objective: 5% sustainable investments

> All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2024 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. **That Regulation** does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Fund is to contribute to the environmental objectives of climate change mitigation/climate change adaptation. 87% of the Fund invested in climate change mitigation and climate change adaptation projects.¹

The Fund achieved its investment objective through investment principally in Green Bonds (or Sustainability Bonds, Social Bonds, and Transition Bonds) that contributed to positive environmental or social impact issued by companies in the financial sector which aimed to generate environmental and/or social impact alongside a financial return. A range of green projects were financed including projects for renewable energy production; green buildings; sustainable transport; water and waste management; eco-efficient and circular economy solutions; and such other environmental projects that Atlanticomnium SA (the "Delegate Investment Manager") determined as relevant. There were also social projects as a result of investment in Sustainability and/or Social bonds. The Fund is invested in green bonds at 86% and sustainability bonds at 14%.

The sustainable objective was targeted in line with the binding elements of the investment strategy of the Fund, as outlined in the Fund's Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the attainment of the sustainable investment objectives of the Fund. The coverage excludes assets classified as "#Not sustainable".

1) Indicators relating to climate change mitigation/climate change adaptation

The following indicators relate to the environmental objective of the Fund, which is achieved through the investment in Green Bonds (or Sustainability Bonds, Social Bonds, and Transition Bonds).

Sustainability Indicator	Units	Source	Date ²	Cove rage ³	Proportio n of data estimated 4	Output
Alignment with ICMA Green Bond Principles, Sustainability Bond Guidelines and/ Social Bond Principles, or equivalent: proportion of investments aligned to these principles.	% of Fund	Bloomberg ⁵	30 June 2024	100%	NA	86% of the Fund in green bonds, 14% in sustainabilit y bonds

¹Investments attributed to projects classified as green buildings, renewable energy, sustainable transport and energy efficiency.

² Data snapshot taken at the Fund's year end.

³ Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include assets defined under "#2 Other" in the Prospectus.

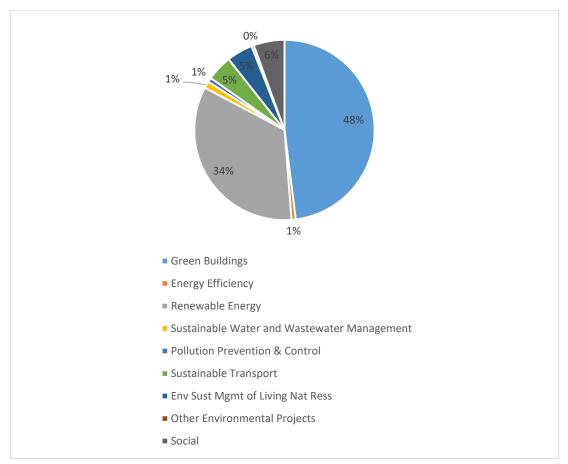

⁴ Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include assets defined under "#2 Other" in the Prospectus.

⁵ Data snapshot taken at the Fund's year end (30 June 2024). Bloomberg Data (Bloomberg classifications) accessed on 26th July 2024.

Alignment with EU Taxonomy: proportion of sustainable investments with an environmental objective that is aligned with the EU Taxonomy.	% of Fund	Internal Analysis ⁶	30 June 2024	100%	NA	28%
Type of project : split by green and/social activity aligned with ICMA principles or equivalent	Categor y	Internal Analysis⁵	30 June 2024	95%	NA	See chart below
CO ₂ Emissions Avoided: avoided emissions from projects financed	tCO ₂ e	Carbon4 Finance, Internal Analysis ⁷	30 June 2024	87%	9%	547
MW/MWh of renewable capacity installed/generated: renewable energy capacity from projects financed	MWh	Carbon4 Finance, Internal Analysis ⁵	30 June 2024	87%	9%	Generated: 1881
M ² of green buildings financed/refurbished: square meters of green buildings financed and renovated	M ²	Carbon4 Finance, Internal Analysis ⁵	30 June 2024	87%	9%	Financed: 1624 Refurbishe d: 925

⁶ Data snapshot taken at the Fund's year end (30 June 2024). Internal analysis was carried out by the Designated Investment Manager.

⁷ Data snapshot taken at the Fund's year end (30 June 2024), using data provided by Carbon4Finance for end 2023 analysis. Data is based on 96% of holdings (excluding cash). 87% of the data covered is based on Carbon4Finance average whereas for 9 % coverage the data was estimated based on the project types and data from the same issuers. 4 % of the portfolio includes new issuers that were not covered in the end December 2023 holdings analysed by Carbon4Finance and hence not able to be included in this report. Where several green bonds from the same issuer are allocated to the same pool of projects, data was extrapolated from other bonds of the same issuer where possible.

The projects were selected based on the green bond assessment framework that is designed to identify green bonds and other 'impact' bonds that will deliver meaningful impact. The Delegate Investment Manager's framework recognizes the ICMA Green Bond Principles (June 2021) and builds on an approach consistent with our investment philosophy – bottom-up research-intensive and adding value through engagement.

The Fund (excluding cash & others of c1%), is mainly invested in green bonds (86%) and sustainability bonds (14%). This reflects the objective of the Fund to generate a positive environmental impact by investing in labelled bonds and providing visibility on the 'use of proceeds' and key metrics associated with these bonds. The largest categories financed are Green Buildings (48%) and Renewable Energy (34%). Through the investment in sustainability bonds, 6% of proceeds relate to projects with a positive social impact. The project breakdown is based on the portfolio holdings as at 30.06.2024 and based on Delegate Investment Manager's internal data and company documents.

2) Indicators relating to Sustainability Exclusion Criteria at issuer level

Involvement by the issuer in the following activities, beyond the revenue threshold specified, would result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). The following exclusion criteria strengthens the avoidance of significant harm to other sustainability factors ("DNSH" criteria).

Sustainability Indicator	Units	Source	Date	Coverage	Proportion of data estimated	Output
Involvement in controversial weapons (also related to Principal Adverse Impacts): share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	Sustainalytics, MSCI ⁸	30 th June 2024	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 th June 2024	96.24%	0%	0%
Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 th June 2024	96.24%	0%	0%

⁸ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 26th July 2024.

Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 th June 2024	96.24%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 th June 2024	96.24%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 th June 2024	96.24%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 th June 2024	96.24%	0%	0%
Involvement in gambling: share of investments in companies involved in operation of gambling establishment, manufacturing specialised equipment exclusively for gambling, or providing products / services gambling operations (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 th June 2024	96.24%	0%	0%

Involvement in alcohol (production): share of investments in companies involved in production of alcoholic beverages as well as the supply of alcohol-related products and or services (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 th June 2024	96.24%	0%	0%
Involvement in alcohol (retail): share of investments in companies involved in retail sales of alcoholic beverages or alcohol- related products (above 10% revenue threshold)	% of Fund	Sustainalytics ⁷	30 th June 2024	96.24%	0%	0%
Involvement in nuclear energy: share of investments in companies involved in the production of nuclear power, the manufacture and supply of essential components for nuclear power plants, and uranium mining (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 th June 2024	96.24%	0%	0%
Involvement in adult entertainment production and distribution: share of investments in investee companies involved in the production of adult entertainment and/or owns/operates adult entertainment establishments, or are involved in the distribution of adult entertainment materials (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 th June 2024	96.24%	0%	0%

Involvement in arctic oil & gas	% of Fund	Sustainalytics ⁷	30 th June 2024	96.24%	0%	0%

exploration extraction: share of investments in companies involved in arctic oil and gas exploration (above 5% revenue threshold).				
---------------------------------------------------------------------------------------------------------------------------------------------------------	--	--	--	--

3) Indicators relating to international norms and standards at issuer level

Companies are expected to adhere to minimum international norms and standards as defined by the United Nations Global Compact (the "UN Global Compact"). Companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations. UN Global Compact adherence strengthens the avoidance of significant harm to other sustainability factors ("DNSH" criteria) and alignment with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Sustainability Indicator	Units	Source	Date	Coverage	Proportion of data estimated	Output
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI ⁹	30 th June 2024	100%	0%	0%

4) Indicators relating to Principal Adverse Impacts at issuer level

The following indicators for adverse impacts, from Tables 1 of Annex I of Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"), are reported as a minimum. This list may be expanded over time. These indicators are reported for the issuers of green, sustainability and/or social bonds and thus not at the bond/project level.

Sustainability Indicator	Units	Source	Date	Coverage	Proportion of data estimated	Output
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent.	tCO2e	MSCI 10	30 th June 2024	`	1.78%	5.6
Investments in companies active in fossil fuel sector : share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI ⁹	30 th June 2024	98.96%	0%	0%
Gender diversity on the Board (also included in good governance): percentage of board members who are	Numeric value	MSCI ⁹	30 th June 2024	98.96%	0%	42.94%

⁹ Data snapshot taken at the Fund's year end. MSCI data as at 26th July 2024.

¹⁰ Data snapshot taken at the Fund's year end. MSCI data as at 26th July 2024.

female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	(ratio %)			
--------------------------------------------------------------------------------------------------------------------------	--------------	--	--	--

Based on the values of the three principal adverse impact indicators in the table above, we consider the portfolio holdings meet the 'do no significant harm' provision. These values are collected and will be compared with next year's Fund data for a year-on-year comparison. The absolute emissions at Scope 1 and 2 are relatively low due to the Fund's focus on the financial sector. The gender diversity on the boards of the Fund's investee companies is more than 1.5 times higher than the average of 25% (based on OECD¹¹ report on 50 jurisdictions)

5) Indicators relating to good governance at issuer level

The investment strategy of the Fund incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Delegate Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. This assessment is at the issuer level and not at the bond/project level.

Sustainability Indicator	Units	Source	Date	Coverage	Proportion of data estimated	Output
Board independence : the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Numeric value (ratio %)	MSCI ⁹	30 th June 2024	100%	0%	87.81%

*Type of project, 2023:

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Delegate Investment Manager's internal Green Bond Assessment Framework ("the Framework") considers 'do no significant harm' as a minimum criteria in the context of projects financed by the Green, Sustainability Bonds, Social Bonds, and Transition Bonds invested at the green bond and issuer level. These processes are intended to mitigate the risk that that investments in the Fund are not in contradiction with the sustainable investment objectives.

An analysis of each issuing entity's ESG profile was performed to avoid issuers contributing to significant harm. The analysis of an issuer's ESG credentials included consideration and monitoring of the principal adverse impacts (PAIs), as detailed in Table 1 of Annex 1 of the SFDR Delegated Act and in some cases involved consideration of those in Tables 2 and 3. This was done both with an in-depth analysis of the indicators and on an ongoing basis through the monitoring of controversies.

The Sustainability Exclusion Criteria and assessed adherence to the UN Global Compact detailed principles strengthened the avoidance of harmful impacts through the avoidance of certain sectors and activities.

At the green bond level, the Framework included an analysis of the governance and processes surrounding the selection of green projects by the issuer. This included an analysis of processes in place to assess and mitigate potential harmful impact on sustainability factors.

The Delegate Investment Manager engaged with issuers on strengthening transparency around taxonomy and 'do no significant harm' requirements, within their green, sustainable, social and/or transition bond frameworks and post-issuance reporting.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund considered the indicators for principal adverse impacts on sustainability factors, within the ESG scoring framework and Sustainability Exclusion Criteria at the issuer level, and within the overall impact of the green, social and /or transition projects financed.

For issuer-level ESG quality, the particular focus was on climate impact, employee issues, governance and other PAIs, as detailed in Table 1 of Annex 1 of the SFDR Delegated Act. These were taken into account within the Framework used by the Delegate Investment Manager.

The Fund applied Sustainability Exclusion Criteria and exclusions relating to UN Global Compact violations to restrict investment into issuers whose conduct may result in negative impacts on sustainability factors.

At the green bond level, the Framework included an analysis of the governance and processes surrounding the selection of green projects by the issuer. This included an analysis of processes in place to assess and mitigate potential harmful impact on sustainability factors.

The specific PAIs considered are disclosed in the table below in response to question "How did this financial product consider principal adverse impacts on sustainability factors?".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund was aligned with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

This was achieved through the exclusion of issuers involved in serious violation of the UN Global Compact and other fundamental conventions outlined above, the application of internal ESG analysis according to GAM's internal Framework, investment due diligence and issuer engagement.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs), as detailed in Table 1, and the additional indicators in Tables 2 and 3 of Annex 1 of the SFDR Delegated Act, on sustainability factors in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data. The PAI indicators were taken into account within the ESG analysis used to assess potential investments and determine whether there were potential negative impacts associated with the investment, both at the issuer and project level.

The Delegate Investment Manager excluded companies involved in the manufacturing of controversial weapons (anti-personnel mines, cluster munitions, biological and chemical weapons), certain types of fossil fuel exposure and any serious breaches of the ten UN Global Compact principles (see Sustainability Exclusions).

The table above provides a snapshot of the largest investments as at 30 June 2024. This snapshot is reflective of the general portfolio composition throughout the reporting period including assets classified as "#Not sustainable" (i.e. all investments of the Fund).

The Global Industry Classification Standard is used to determine economic sectors.

third party, transparency on project and geography breakdown.

A range of indicators in relation to company social and employee matters (including gender diversity, accident rate and gender pay gap among others) were reviewed as part of the investment process

In addition, companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons were excluded from the Fund.

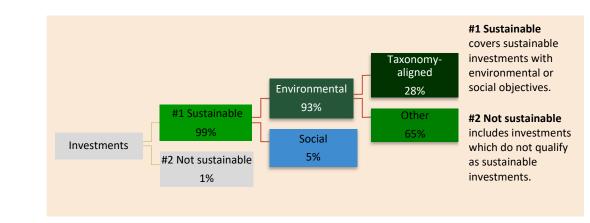

-7

What was the proportion of sustainability-related investments?

Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period (30 June 2024) is provided below. 87 % of the Fund invested n adaptation and mitigation projects¹²

What was the asset allocation?

The Fund allocated 93% of its investments to sustainable investments with an environmental objective and 5% to sustainable investments with a social objective. It was calculated that 28% of investments of the Fund were aligned with the EU Taxonomy on such basis as further detailed below.

See reponse below to the Question titled "What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards" for information on the non-sustainable investments of the Fund.

In which economic sectors were the investments made?

The Fund primarily invests in bonds from issuers within the financial services sector.

Sector	Allocation		
Banks	73.96%		
Insurance	24.83%		
Cash and Hedges	1.21%		

Transitional activities are economic activities for which low-carbon Given the

alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Given the very recent introduction of taxonomy, data availability on taxonomy alignment is currently challenging. While some issuers have started reporting, overall data on taxonomy alignment remains limited. Nevertheless, given the nature of the portfolio and our regulatory obligation to disclose a proportion of investments that are taxonomy aligned we have conducted an initial analysis of the portfolio.

While data on taxonomy alignment is limited, and noting the challenges outlined in this section, we have calculated that the proportion of investments in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) is 28% of the portfolio based on currently available data.

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

¹²Investments attributed to projects classified as green buildings, renewable energy, sustainable transport and energy efficiency.

Moreover, we have conducted a detailed review of green bond reporting and documentation to assess alignment to the EU taxonomy.

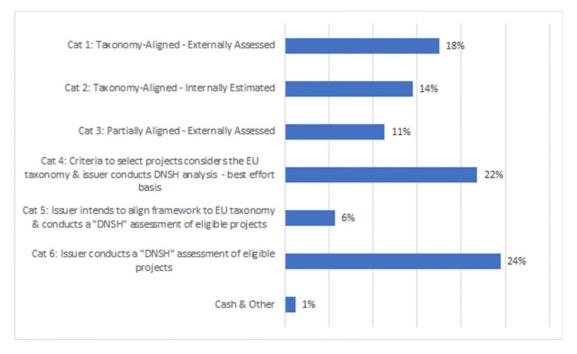

These have been split into six categories:

Category 1: For 18% of holdings, the issuer's criteria for project selection and do no significant harm assessment are fully aligned with the EU taxonomy and alignment is externally assessed as part of preissuance verification/review (typically by a recognized ESG provider such as Sustainalytics or ISS).

Category 2: For 14% of holdings, proceeds are taxonomy-aligned, based on internal analysis conducted. Taxonomy alignment has been estimated using 2023-end taxonomy disclosures of issuers and mapping the volume of taxonomyaligned assets on the issuers' balance sheet (for each category of assets), to green bond proceeds. Based on the assumption that the majority of taxonomy-aligned assets on issuers' balance sheets will be those allocated to issuers' green bonds, we estimate the percentage alignment of the green bond. The assessment is done only where data availability allows to map project types and ensure geographic overlap. As a result this has only been done only for green mortgages and renewable energy projects for a small number of issuers (8 issuers).

As an example, Devolksbank's green bonds are allocated to a pool of EUR 5.6 billion of green mortgages according to its latest green bond allocation and impact report. This is materially lower than the EUR 7.9 billion of EU taxonomy-aligned mortgages on the bank's balance sheet according to its 2023 year-end disclosures. Therefore, we assume that the majority of the EUR 5.6 billion of green mortgages will be taxonomy aligned, overlapping with the EUR 7.9 billion of taxonomy aligned mortgages. The issuer has confirmed our assumption is correct and that green mortgages in the green bond asset pool are part of the broader EU taxonomy aligned green mortgages on the bank's balance sheet

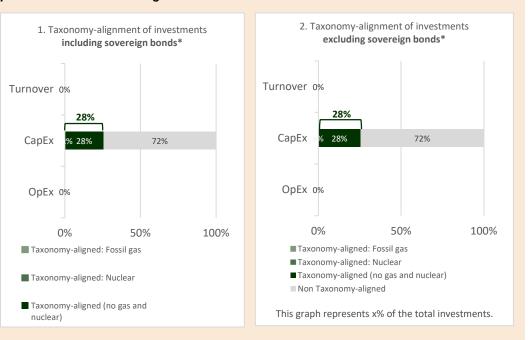

Based on the above analysis, 100% of the proceeds of holdings in category 1 would be aligned to the EU taxonomy given that there has been an external verification on the alignment to the EU taxonomy either at the pre- or post-issuance level. Moreover, we conservatively estimate that 75% of the proceeds of holdings in category 2 would be aligned to the EU taxonomy based on our internal analysis. This implies that taxonomy alignment of the fund would be at least 28% (18% in category 1 and 75% of 14% in category 2), above the estimated 25% share stated above. For the rest of the projects, although we believe a material share would be aligned with the taxonomy, data limitations prevent us from estimating percentage aligned. Note that we expect taxonomy alignment to be materially above the 25% level, as the majority of proceeds financed by green bonds in the portfolio are in scope of the EU taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Information on taxonomy alignment based on investee company turnover and OpEx is not relevant as the Fund assesses taxonomy alignment based on the level of the use of proceeds (project level), not the investee company / issuer level.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹³?

None of the taxonomy aligned investments are related to fossil gas or nuclear energy.

What was the share of investments made in transitional and enabling activities?

It is estimated that <5% of the Fund invests in projects in transitional and enabling activities. Data availability on taxonomy alignment is currently challenging. While some issuers have started reporting, overall data on taxonomy alignment remains limited.

¹³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

	2023		2024	
EU Taxonomy Alignment	Including Sovereign Bonds	Exclusing Sovereign Bonds	Including Sovereign Bonds	Exclusing Sovereign Bonds
Percentage of investments aligned with the EU Taxonomy	26%	26%	28%	28%

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

65% on the basis of the calculation detailed above for determing the percentage of investments of the Fund that were taxonomy aligned.

What was the share of socially sustainable investments?

The share of socially sustainable investments is 5% of the Fund's AUM. These investments include projects such as Affordable Basic Infrastructure, Social & Affordable Housing and Access to Essential Services.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The Fund only allocates to securities to cash deposits, cash equivalents, certificates of deposits, Money Market Instruments and / or derivatives, at the discretion of the Delegate Investment Manager.

Cash deposits, cash equivalents, certificates of deposits, money market instruments and/or derivatives were used for liquidity and hedging purposes, and are included under #2 Not Sustainable. All investments are aligned with the Fund's sustainable investment objective and the Fund's Green Bond Assessment Framework.

What actions have been taken to attain the sustainable investment objective during the reference period?

1) Actions relating to the sustainable objective

The investment objective of the Fund is to achieve long term income and capital gain in Euro, by investing in "Impact Bonds" with a positive environmental or social impact. The Fund sought to achieve this investment objective through investment principally in Impact Bonds issued by companies in the financial sector which aim to generate social and/or environmental impact alongside a financial return. Impact Bonds are defined in the Fund's Supplement as bonds which have a specific environmental, social and governance purpose and include, but are not limited to, Green Bonds, Social Bonds, Sustainability Bonds and Transition Bonds that contribute to positive environmental or social impact.

Positive environmental impact was generated by investing in green and impact bonds where proceeds could only be allocated to green projects such as renewable energy or green buildings. Green bonds provide investors with visibility on the use of proceeds and a measurable impact.

The Fund invested mainly in green bonds from the financial sector, namely banks and insurers. This is based on a conviction that the financial sector has a pivotal role to play in the environmental transition.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The European banking sector has tremendous impact potential as it finances the bulk of the economy, at around 80% of corporates.

The Fund sought to offer attractive returns by investing across the capital structure, in both senior and subordinated green bonds of financials. This may allow pickup in spread and yield compared to the Euro Investment Grade Corporate Bond market. The Fund was conservatively managed, aiming for a strong investment grade rating.

2) Actions relating to avoidance of significant harm

a. Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were programmed, on a best-efforts basis, into the investment controls, using information from independent ESG rating providers and recognised third party sources There were no breaches of the Sustainability Exclusion Criteria during the period.

b. International norms and standards

UN Global Compact compliance was programmed, on a best-efforts basis, into the investment controls, drawing on information from independent ESG rating providers and recognised third party sources and internal research as necessary. The Delegate Investment Manager used a third-party data provider's framework and data to categorise serious breaches, which are intended to identify credible allegations of a violation of global norms.

c. Principal Adverse Impacts

The Fund considered principal adverse impacts (PAIs), as detailed in Table 1, and the additional indicators in Tables 2 and 3 of Annex 1 of the SFDR Delegated Act, on sustainability factors in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data. The PAI indicators were taken into account within the ESG analysis used to assess potential investments and determine whether there are potential negative impacts associated with the investment, both at the issuer and project level.

The Delegate Investment Manager excluded companies involved in the manufacturing of controversial weapons (anti-personnel mines, cluster munitions, biological and chemical weapons), certain types of fossil fuel exposure and any serious breaches of the ten UN Global Compact principles (see Sustainability Exclusions).

3) Actions relating to good governance

The governance practices of issuers were examined as part of the Issuer ESG Quality assessment, which is part of the Green Bond Assessment Framework in relation to the management and oversight of the bond proceeds. The assessment informed investment decisions and was used by the Delegate Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund.

The Issuer ESG Quality assessment included consideration of board structure and organization, risk management and oversight, remuneration, auditors, ethics, transparency and controversies. Issuers are rated from Very Low Risk to Very High Risk, and issuers rated as High Risk or Very High Risk would not be eligible for investment.

4) Actions relating to engagement activities

Engagement underpins the Delegate Investment Manager's Green Bond Framework Assessment. Issuers were selected for engagement as a result of sustainability controversies, PAI review and/or other thematic review.

Where issuers did not meet the minimum requirements of the Green Bond Assessment Framework the Designated Investment Manager engaged with the issuers. These engagements aimed to improve the robustness, transparency and accuracy of issuers in alignment with the objective of the Fund.
