Risk and Reward Profile

The indicator above indicates the position of the Sub-Fund on a standard risk/reward category scale.

The risk/return indicator suggests the relationship between risk and potential returns when investing in the Sub-Fund.

The Sub-Fund is in category 5, indicating higher risk but with the potential for higher reward, because it can invest a large part of its assets in equities, the values of which can fluctuate significantly.

Historical data, such as are used in calculating the synthetic indicator, may not be reliable indication of the future risk profile of the Sub-Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean a risk-free investment.

The following risks are materially relevant to the Sub-Fund but are not adequately captured by the indicator:

Liquidity Risk

The Sub-Fund may not be able to sell a security at the time and price that is most beneficial to the Sub-Fund and may be unable to raise cash to meet redemption requests.

Regulatory Risk

Investment through the Stock Connect and Bond Connect schemes is subject to the risk that the rules of the schemes may change in a way that is unfavourable to the Sub-Fund. The Sub-Fund may also be unable to enforce its ownership over investments held through the schemes. This may cause loss or damage to the value of the Sub-Fund.

Credit Risk

The Sub-Fund may lose money if an issuer is unable to meet its financial obligations or goes bankrupt.

Counterparty Risk

The Sub-Fund may invest in OTC contracts and may find itself exposed to risk arising from the solvency of its counterparties and from their ability to respect the conditions of these contracts.
