GIB AM SUSTAINABLE WORLD FUND - I2 USD (C) A sub-fund of AMUNDI UCITS FUND PARTNERS ICAV

ISIN code: (A) IE0002KLYJ93

This ICAV has appointed Amundi Ireland Limited, an entity part of Amundi group, as its Management Company

Objectives and Investment Policy

The sub-fund seeks to achieve capital growth through investment in a portfolio of global equities issued by companies that have the potential to create value while having a positive impact on global sustainability in accordance with Article 9 of Regulation (EU) 2019/2088 ("Sustainable Finance Disclosures Regulation").

The sub-fund invests mainly in equities and equity related securities (such as common stock, depositary receipts and preferred shares) listed or traded on a permitted market that are issued by companies that seek to create value from products, services or operations which have a positive impact on particular sustainability themes (as listed below in the Management Process). These companies will represent a broad range of sectors and industries and may be located anywhere in the world.

A maximum of 30% of the sub-fund's net asset value may be invested in the equities of companies that are domiciled, listed or traded in an emerging market country defined as an "Emerging Market" by the MSCI World Index (the "Index"), and up to 10% of sub-fund's net asset value may be invested in securities listed or traded on the Moscow Exchange.

The sub-fund may hold cash and instruments that may be readily converted to cash (such as cash deposits, treasury bills and investment grade government bonds). In normal market conditions, such investment shall not exceed 20% of the sub-fund's net asset value.

The sub-fund may use derivatives such as futures, forward and options for efficient portfolio management purposes only.

Benchmark : The sub-fund is actively managed. The Index serves only as an indicator for assessing the sub-fund's performance. The sub-fund's portfolio is not limited to, or constrained by, the constituents of the Index. The sub-fund has not designated the Index as a reference benchmark for the purpose of the Sustainable Finance Disclosures Regulation.

Management Process : Firstly, companies operating in areas such as weapons production, fossil fuels, tobacco and gambling are excluded from the sub-fund's investment universe. Following these exclusions, Gulf International Bank (UK) Limited, the sub-fund's investment manager (the "Investment Manager"), uses a bottom-up analysis in order to integrate fundamental environmental, social, and governance ("ESG") factors to identify companies that have a positive impact on particular sustainability themes such as healthcare, education, nutrition, transport safety, clean energy, e-mobility, resource efficiency and water.

The Investment Manager will rely on its own proprietary research and 3rd party research to identify recognised global sustainability challenge such as those contained in the United Nations Sustainability Development Goals, these are the "sustainability drivers". The sustainability drivers are used to identify particular sustainability themes and are then integrated into the sub-fund's management process.

The above ESG analysis in addition to other factors such as governance practices are used to complete the analysis of each company which allows the Investment Manager to produce its own forecast of the company's future earnings and valuation, together (where possible) with an assessment of the positive ESG impacts associated with those forecasts.

This is a non-distributing share class. Investment income is re-invested.

The minimum recommended holding period is 5 years.

Investors may sell on demand on any business day in Ireland.

Risk and Reward Profile

The risk level of this Sub-Fund mainly reflects the market risk arising from investments in international equity markets.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your investment does not benefit from any guarantee or protection.

For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the share class.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.
- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Emerging Markets risk : Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.
