## ING (L) Renta Fund Emerging Markets Debt (Hard Currency) - I Cap USD

ISIN: LU0555020998

A sub-fund (hereafter referred to as the fund) of ING (L)

This fund is managed by ING Investment Management Luxembourg S.A.

### Objectives and Investment Policy

The fund invests in debt instruments (i.e. notes, bonds, certificates, mortgages, etc) denominated in currencies of economically developed and politically stable countries which are members of the OECD (Organisation for Economic Cooperation and Development). We invest in countries where we are able to assess specific political and economic risks and in countries that have undertaken certain economic reforms. The issuers of the debt instruments are established in low and middle income developing countries (emerging markets). We invest in South and Central American

(including the Caribbean), Central and Eastern European, Asian, African and Middle Eastern debt instruments. We aim to beat the performance of the benchmark JP Morgan EMBI Global Diversified. This fund is for investors capable of assessing the risks linked to this fund. You can sell your participation in this fund on each (working) day on which the value of the units is calculated, which for this fund occurs daily. The fund does not aim to provide you with a dividend. It will reinvest all earnings.

### Risk and Reward Profile

Higher risk - Typically Higher rewards

Historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this fund. There is no guarantee that the risk indicator will remain unchanged, it may shift over time. The lowest category of risk does not mean that the investment is risk-free.

This fund is in category 6 because the market risk associated with bonds used to reach investment objectives is considered high. These instruments are impacted by various factors. These include, but are

not limited to, the development of the financial market, the economic development of issuers of bonds who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers, of underlying investments is high. The fund's liquidity risk is set to medium. Liquidity risks arise when a specific underlying investment is difficult to sell, causing possible difficulty to redeem your investment from the fund. Moreover, currency fluctuation may impact highly on the fund's performance. Investments in specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of your initial investment.

### Charges

All charges paid by the investor are used to pay the running costs of the fund, including the cost of marketing and distributing it. These charges reduce the potential growth of your investment.

#### One-off charges taken before or after you invest:

Entry charge	2%
Exit charge	0%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.
