MANAGEMENT'S REPORT

Economic Context

Economic growth was higher than expected in the United States, Eurozone, and China in the fourth quarter of 2022. The US economy grew by 2.6% quarter-on-quarter annualized, while that of the eurozone remained unchanged on a quarterly basis. Europe managed to avert an energy crisis and gas prices fell significantly, tempering fears about growth. In China, economic growth slowed to 2.9% year-on-year in the fourth quarter and it was flat quarter-on-quarter. However, the Chinese government abandoned its zero-COVID approach during the quarter. While this led to soaring infections, it resulted in expectations of economic rebound. The Chinese government also announced further measures to boost its struggling property sector. Inflation fell over the quarter, with headline inflation in the United States down every month between July and December, signaling that near-term price pressures had begun to abate. However, the December figure of 6.5% was still high by historical standards. The decline in headline inflation was mainly driven by lower energy prices and further moderation in global goods price inflation as supply bottlenecks continued to ease.

The first quarter of 2023 got off to an encouraging start, with optimism about China's reopening, a further fall in gas prices in Europe and moderating inflation and wage growth in the United States in January. However, better-than-expected macro data and higher-than-expected inflation readings in February led to concerns that the Federal Reserve (Fed) might have to tighten more than had been anticipated, increasing the risk of a hard landing for the economy. Oil prices fell from the second half of the quarter onwards. All eyes then turned to the banking sector in early March, with the rapid collapse of Silicon Valley Bank in the United States. It failed in part because its large investments in long-dated US Treasuries had fallen in value due to the considerable rise in interest rates over the previous year. Two days later Signature Bank also collapsed, while Swiss bank Credit Suisse was taken over by its rival UBS amid fears about systemic risk. The US economy grew by 2.2% annualized over the quarter.

Inflation was gradually falling by the start of the second quarter. However, there was another banking collapse in the US, with First Republic Bank being sold to JPMorgan Chase. There was also considerable disquiet among investors about the looming US debt ceiling deadline, although eventually Congress passed legislation that averted a US default. US economic data improved in May, but European and Chinese data showed signs of weakening. Manufacturing PMIs continued to weaken, whereas services PMIs improved, leading to record divergence between the two. Tighter financial conditions, an ongoing rotation from goods to services consumption and weaker Chinese industrial activity were the main reasons for the divergence. Inflation continued to fall in most economies in June, and there was hope of better relations between the United States and China as US Secretary of State Antony Blinken became the most senior US official to visit China in five years. There were further signs that the US economy was proving resilient, and that consumer sentiment was improving.

The third quarter began with lower-than-expected inflation readings across developed markets and resilient activity data in the United States. The US economy had grown by 2.1% quarter-on-quarter annualized in the second quarter, which was more than expected. However, activity data from the euro area and China were weaker, as was global manufacturing. Nonetheless, there were tentative signs of optimism in China as policymakers stepped up measures to boost growth. The macroeconomic backdrop in August was of regional growth divergence, with the United States and Japan holding up well but the euro area and China showing continued weakness in economic activity. Inflation was still coming down across the major economies, albeit at different rates. The US labor market continued to rebalance gradually, in line with the notion that the US economy could achieve a soft landing. On the negative side, there was continued weakness in Chinese trade and the country's real estate sector, a depressed euro area manufacturing cycle and a surprise downgrade of the US's credit rating from AAA to AA+ by Fitch. Chinese data came in better than expected in September after months of weakness, and there was further good news as inflation in the euro area and US continued to moderate. There was once again concern about a potential US government shutdown, but this was averted in a timely manner.

Monetary Policy

Central banks started to moderate the pace of monetary tightening during the fourth quarter of 2022, even though inflation remained well above target levels. The Fed made a final 50 basis point (bps) rate hike for the year in December after four previous 75 bps increases. This was widely expected, but the Fed's strong signal that rates would not only have to rise more, but also that they would remain high for longer, surprised the markets. The European Central Bank (ECB) did the same, raising rates by 50 bps in December after making prior hikes of 75 bps. ECB President Christine Lagarde sent a very hawkish message, saying for the first time that the ECB needed to move rates into restrictive territory for inflation to come down again. The announcement that the ECB would start to unwind its asset purchase program as soon as March by no longer replacing all maturing bonds came as another surprise. Meanwhile, the Bank of Japan surprised the markets by adapting its yield-curve control policy, widening the band in which it allows 10-year Japanese government bond yields to remain. It was no longer able to sustain this policy against a backdrop of ever-rising global yields. The interventions it had to make to prevent sharp moves in the government bond and currency markets were becoming too costly.

In early January 2023 there were fears that the Bank of Japan might make more changes to its yield-curve control policy as 10-year bond yields approached their new upper limit, but in the end it left the policy unchanged. The Fed raised rates by 25 bps in February, marking a further slowdown in the pace of hikes. It did the same in March, even though some market participants believed the turbulence in the banking system might compel it to pause to ensure the financial system remained stable. However, the Fed noted the US banking system was sound and resilient and that recent developments were likely to result in tighter credit conditions for households and businesses and to weigh on economic activity, hiring and inflation. It was a similar story in Europe, with the ECB hiking rates by 50 bps in February and again in March despite Credit Suisse's troubles. Christine Lagarde made it clear that she believed inflation in the Eurozone was too high, and that the region's banking sector was resilient.

The Fed increased rates by 25 bps in early May, taking the Fed Funds Rate to 5.00-5.25%. However, it hinted that this would be the last hike in the current tightening cycle. The ECB slowed the pace of rate hikes to 25 bps at its May meeting, taking the deposit rate to 3.25%, and also ended its asset purchase program reinvestments. The ECB's Governing Council made it clear that it continued to see significant upside risks to inflation and indicated that it was not yet ready to pause. The Bank of England also hiked by 25 bps at its meeting in May, taking the Bank Rate to 4.50%. It left the door open to future rate increases if warranted by the data. Meanwhile, the People's Bank of China hinted that it would keep monetary policy supportive, prompting expectations it might cut the reserve requirement ratio for banks or cut interest rates in the coming months. The Fed paused at its June meeting after 10 consecutive hikes to wait and see how higher rates were affecting the economy. Despite this it revised the path of expected rate hikes upwards. The ECB raised rates by another 25 bps and the Bank of England hiked by a surprise 50 bps in response to persistent inflation in the UK.

Both the Federal Reserve and European Central Bank (ECB) hiked rates by 25 basis points (bps) in July, in line with market expectations. Interestingly, both central banks avoided providing forward guidance, stating that further policy action would be data-dependent. The Bank of Japan kept its target for 10-year Japanese government bond yields at 0%, but effectively increased the maximum level they can reach from 0.5% to 1.0%. This change was seen as an initial step towards policy normalization in Japan, although Bank of Japan Governor Kazuo Ueda said he did not expect long-term yields to actually rise to 1%. The Jackson Hole Economic Symposium was the most eagerly anticipated event in August, but Fed Chair Jerome Powell struck a balanced tone, stating his intent to continue to follow a data-dependent approach to monetary policy. The People's Bank of China surprised the markets by cutting interest rates in August, lowering the one-year medium-term lending facility by 15 bps and the seven-day reverse repo rate by 10 bps. These cuts were followed up with a 10 bps cut to the one-year loan prime rate. At its September meeting, the Federal Reserve kept policy rates unchanged, as expected, but revised its median forecast for the policy rate at the end of 2024 up by 50 bps. The ECB increased interest rates by 25 bps, in line with market expectations, while the Bank of England surprised the market by keeping rates on hold when a 25 bps raise had been expected. In Asia, both the People's Bank of China and the Bank of Japan kept their monetary policy unchanged.

Fixed Income Markets

Government bond yields rose somewhat towards the end of the fourth quarter of 2022, reflecting market participants' reaction to the generally hawkish tone adopted by the major central banks, even though it was becoming clear that economic growth was slowing down. However, credit spreads tightened over the quarter on improved risk sentiment. US and European investment-grade and high-yield credit rose in value over the period, outperforming government bonds. There was pronounced yield-curve flattening and even curve inversion during the quarter, with short-term yields exceeding long-term yields. This suggested that investors were beginning to price in waning inflation and more benign central banks. This changed in December, with central banks becoming more hawkish once again.

Government bond yields fell in January 2023 on expectations that interest rate rises would slow amid signs of falling inflation and inflation expectations. However, they rose again in February, with the unanticipated resurgence of inflation figures around the middle of the month sparking a flurry of volatility as traders reassessed the central bank action that would be needed to get prices back to target levels. Yields plummeted during the banking turbulence in March as sentiment towards the global economy worsened. They rose somewhat later on but still ended the month well below where they began it.

Global bond yields were little changed in April as calm returned to the markets following the turbulence of March, while corporate bonds rebounded. US yields rebounded sharply in May on hopes of a resolution of the debt ceiling issue, while UK gilt yields rose significantly due to an upwards repricing of Bank of England rate policy. There was much less upwards pressure on government bond yields elsewhere in Europe. There was a noticeable increase in short-term bond yields in June as markets repriced their assessments of central bank policy rates in the coming months upwards. However, well-anchored medium-term inflation expectations and some concerns about the economic outlook meant that the rise in longer-term yields was less pronounced. US Treasury yields hit a three-month high late in the month as stronger-than-expected economic data increased expectations that the Fed would have to raise rates once again in a bid to curb inflation. Meanwhile, the German bond yield was at its most inverted level since 1992 by near the end of the quarter as two-year yields, which are most sensitive to rate expectations, had risen sharply. UK bond yields also jumped over the month, particularly at the short end of the curve.

Bond performance was mixed in July. The US 10-year yield rose by 15 bps even though inflation was down, as strong activity data pushed yields higher. In the UK, the 10-year yield fell by 12 bps on the back of lower-than-expected inflation, while the German 10-year yield rose by a modest 6 bps. At the short end, the US two-year yield was flat. August was quite a volatile month for bonds, especially in the US, where they were relentlessly sold off, resulting in yields hitting their highest level in years. The US 10-year yield hit an intra-day peak of 4.36% on 22 August – its highest level since 2007. However, it moderated somewhat towards the end of the month, ending August up 13 bps. It was a similar story in the UK, where the 10-year yield was up 40 bps at one point but finished the month up just 5 bps. German and Japanese 10-year yields were essentially flat. Short-end rates were much less volatile, with the US two-year flat. In September, the US 10-year yield rose by 50 bps due to the Fed's higher-for-longer stance, while German 10-year yields were up by 40 bps. Japanese and UK 10-year yields moved up more modestly – by 13 bps and 5 bps respectively – as their central banks were less hawkish than the Fed. The US two-year yield rose by 20 bps.

Equity Markets

Global equities rose by 0.9% in euro terms in the fourth quarter of 2022. Europe (+9.6%), the UK (+7.4%) and Asia Pacific ex-Japan (+6.2%) posted the strongest returns at the regional level, with the appreciation of their currencies against the US dollar playing a key role. US equities rose over the quarter in dollar terms but fell by 1.7% in euros. Energy was the best-performing sector in the fourth quarter posting a gain of almost 10% in euro terms. Industrials (+8.3%), materials (+7.7%) and financials (+6.5%) also rose strongly. Consumer discretionary suffered the most, losing 10.3% over the quarter, followed by telecom (-7.7%) and IT (-3.5%).

Global equities rose by 6.0% in euro terms in the first quarter of 2023. Eurozone equities posted much the strongest return, gaining 12.3%, with US equities posting the next-best return of 5.8%. Japanese equities rose by 4.5% over the quarter, UK equities by 4.2% and emerging equities by 2.2%. Pacific ex-Japan equities lagged, eking out a 0.4% gain. There was considerable dispersion of returns at the sector level over the quarter. IT led the way, gaining 19.1%, followed by telecommunication services (+16.1%) and consumer discretionary (+14.5%). At the other end of the spectrum, energy (-4.9%) and financials and health care (both -3.2%) all fell in value over the quarter.

Global developed market equities rose by 6.6% in euro terms in the second quarter, whereas emerging market equities gained just 0.6%. The US was the best-performing market over the quarter, rising by 8.3%, followed by Japanese equities, which were up by 6.0%. Eurozone equities rose by 3.3% and UK equities by 1.8%. Pacific ex-Japan was the only region to fall, down by 2.2% over the quarter. There was once again considerable dispersion of returns at the sector level, with IT leading the way with a 14.3% gain. Consumer discretionary was the only other sector to post a double-digit return, gaining 10.2%. By contrast, the energy and utilities sectors both fell by 0.7% over the quarter, and materials also fell slightly.

Global developed-market equities fell by 0.4% in the third quarter, while emerging-market equities rose by 0.2%. Japan was the best-performing market over the quarter, rising by 1.6%, with the UK not far behind, up by 1.5%. Eurozone equities were the worst performers, falling by 4.3%, while US equities were little changed, down by 0.1%. There was considerable dispersion at the sector level over the quarter. Energy was the best performer from a sector perspective, gaining 15%, followed by communication services, which rose by 4.7%. Utilities posted the worst return, losing 6.3%, while consumer staples was down by 3.4% and IT by 3.2%. All of these figures are in euro terms.

The SFDR related disclosure can be found in the "Other Information to shareholders (unaudited)" section.

Outlook

We continue to see the US as a late cycle economy, but growth has so far this year surprised to the upside, driven by temporary tailwinds (further drawdown of excess savings, declining inflation which raises real wages). We expect that the combination of fading tailwinds and monetary restraint (which is still in the pipeline) will slowdown US growth in Q4'23 and there remains a risk of this inducing a mild recession in 2024. Survey data (e.g. the composite PMI index) suggest growth momentum in the Eurozone may be stabilising around zero where we expect it to remain in Q4'23. Going forward growth will be the outcome of a tug of war between still building monetary restraint, on the one hand, and rising support from household real income growth, on the other. Provided the labour market does not break, Eurozone growth should gradually recover somewhat in 2024.

Also in Asia we see diverging growth trends. In Japan growth momentum seems robust, driven by strong labour market, improving business sentiment and easy monetary policy. In China, overall growth momentum remains weak, as the important real estate and export sectors keep struggling. Due to the increased stimulus momentum since July, we're currently seeing some cautious signs of a pick-up in Chinese activity, mainly in manufacturing, while real estate transactions have improved modestly. Medium-term growth risks continue to come from low business confidence due to state interventionism and regulatory uncertainty.

Inflation should continue to moderate but higher commodity prices and tight labour market (esp. in the US) are key upside risks. For US inflation to come down towards target on a sustainable basis, we need to see somewhat weaker labour market, moderation in wage growth towards 3% - 3.5%, and continued weakness in home prices and rents.

In terms of monetary policy we don't expect the US Federal Reserve to hike further as the US labour market eases gradually. However, risk is tilted towards one more 25bps hike later in 2023. The Fed reinforced the higher-for-longer narrative as it raised its 2024 median dot forecast by 50bps, implying only a 50bps rate cut in 2024. The ECB hiked by 25 bps to 4% in September and gave a strong signal it has now likely reached the sufficiently

restrictive rate. The ECB remains in data dependent mode but this now mostly applies to the duration for which rates will remain high.

The sub-funds remain constructive for equities. Resilient US and Japanese growth can support earnings, which is visible in improving earnings dynamics. Corporate margins are stabilizing at a higher level as input cost pressure lowers, while US Q3 earnings growth is expected to turn positive and to accelerate into 2024. At the same time, investor sentiment turned bearish in September. However, valuations do not leave much room for disappointment on earnings or higher bond yields.

The bond yields' uptrend accelerated in recent weeks, potentially driven by higher for longer Fed narrative and the lower US recession risk. Given the backdrop of a late cycle economy and the recent rise of US real yields, we find US government bonds attractive. While the Fed is likely done with hiking, we see some risk of a final rate hike later this year. As a result, we prefer to gradually scale in the exposure to US treasuries. We expect Eurozone bond yields to be range bound in the near-term as the tussle between elevated core inflation and weaker growth continues. Still we consider current levels as attractive for the medium-term given the weakening macro-outlook. As we see a strong correlation with US rate moves, we look for some stabilization in US bond yields to turn more constructive on EUR rates as well.

In general credit spreads are not discounting a recession nor the tightening of credit standards. Despite a medium-term caution for corporate credit, the sub-funds stick to a small preference for high quality corporate bonds denominated in euro, as US resilience and disinflation provide short-term support and IG spreads in EUR remain above their long-term average.

Investment process

Goldman Sachs Patrimonial Defensive, Goldman Sachs Patrimonial Balanced and Goldman Sachs Patrimonial Aggressive

The sub-funds are fund of funds and invest primarily in a diversified international portfolio of equity and fixed income funds (funds that invest in either stocks or fixed income instruments). To achieve the investment objective, we use active management to respond to changing market conditions. Here the funds aim to benefit from tactical asset allocation decisions in a risk aware manner and from bottom-up security selection using both ESG and financial criteria. The view generation is driven by both quantitative (fundamental and behavioural) signals as well as qualitative judgment, resulting in dynamic asset allocations over time. The funds positioning can therefore materially deviate from the index. Furthermore, the sub-funds integrate ESG factors and ESG risks in the investment process alongside traditional financial factors.

Goldman Sachs Patrimonial Balanced Europe Sustainable

The sub-fund mainly invests in a diversified portfolio of Eurozone fixed income instruments, including green bonds, denominated in Euro and European stocks from companies and issuers pursuing policies of sustainable development observing environmental, social and governance principles. To achieve the investment objective, we use active management to respond to changing market conditions. Here we aim to benefit from tactical positioning in a risk aware and robust manner and from bottom-up security selection using both ESG and financial criteria. Our view generation is driven by both quantitative (fundamental and behavioural) signals as well as qualitative judgment. This dynamic asset allocation process enables us to exploit attractive investment opportunities when they arise. The Sub-Fund promotes environmental and/or social characteristics, as described in Article 8 of the SFDR, but does not have sustainable investment as its objective. Nevertheless, it will have a minimum proportion of 30% of sustainable investments, it aims to have a lower carbon intensity and a better average weighted ESG Rating compared to benchmark.

Performance

Goldman Sachs Patrimonial Defensive

In the volatile market context described above, Goldman Sachs Patrimonial Defensive printed a return of +2.68% (gross of fees) between October 2022 and September 2023. In relative terms (and gross of fees), the sub-fund slightly outperformed its reference index, which gained 2.41% over the last 12 months. Net return of the I Cap EUR share class of Goldman Sachs Patrimonial Defensive was 1.79% over the reporting period.

The tactical decisions on asset class level added little value over the reporting period. The sub-fund benefitted from a cautious stance towards bonds in the first months of the reporting period, as inflation continued to surprise to the upside and central banks reacted by aggressively hiking its policy rate. But the decision in the third quarter of 2023 to increase the (government) bond exposure weighed, as the Federal Reserve surprised markets with its high for longer message in September'23. The tactical equity allocation cost some value last year, as equity markets performed better than expected. In the first half of the reporting period, the sub-fund had a quite cautious equity stance, resulting mostly in small equity underweights. For most of the second half of the reporting period, the sub-fund maintained a fairly neutral equity weight. The timing to implement a small equity overweight mid-September was unfortunate, as equity markets sold off.

The equity component lagged its reference index during the reporting period. Especially the regional equity allocations cost some value. For instance the underweight in Eurozone stocks didn't work in Q1'23, as the energy crisis on the European continent weighed less on economic growth than anticipated. The top-down sector calls were quite limited over the reporting period. Equity fund selection cost performance, despite a positive effect in Q4'22.

The fixed income part of the portfolio outperformed its reference index during the reporting period. It turned out to be a good decision to gradually increase the weight in risky bonds throughout the fourth quarter of 2022. In March'23 the sub-funds reduced the credit allocations in high yield corporate bonds and Emerging Market Debt as concerns around the US banking sector took center stage. Since then the sub-funds had a small preference for high-quality corporate bonds, which also contributed positively. The country allocation and duration management weighed on performance over the reporting period.

Goldman Sachs Patrimonial Balanced

In the volatile market context described above, Goldman Sachs Patrimonial Balanced printed a return of +4.86% (gross of fees) between October 2022 and September 2023. Net return of the I Cap EUR share class of Goldman Sachs Patrimonial Balanced was 3.95% over the reporting period. In relative terms, the sub-fund lagged its reference index, which gained 5.50% over the last 12 months.

The tactical decisions on asset class level added little value over the reporting period. The sub-fund benefitted from a cautious stance towards bonds in the first months of the reporting period, as inflation continued to surprise to the upside and central banks reacted by aggressively hiking its policy rate. But the decision in the third quarter of 2023 to increase the (government) bond exposure weighed, as the Federal Reserve surprised markets with its high for longer message in September'23. The tactical equity allocation cost some value last year, as equity markets performed stronger than expected. In the first half of the reporting period, the sub-fund had a quite cautious equity stance, resulting mostly in small equity underweights. For most of the second half of the reporting period, the sub-fund maintained a fairly neutral equity weight. The timing to implement a small equity overweight mid-September was unfortunate, as equity markets sold off.

The equity component lagged its reference index during the reporting period. Especially the regional equity allocations cost some value. For instance the underweight in Eurozone stocks didn't work in Q1'23, as the energy crisis on the European continent weighed less on economic growth than anticipated. The top-down sector calls

were quite limited over the reporting period. Equity fund selection cost performance, despite a positive effect in Q4'22.

The fixed income part of the portfolio outperformed its reference index during the reporting period. It turned out to be a good decision to gradually increase the weight in risky bonds throughout the fourth quarter of 2022. In March'23 the sub-funds reduced the credit allocations in high yield corporate bonds and Emerging Market Debt as concerns around the US banking sector took center stage. Since then the sub-funds had a small preference for high-quality corporate bonds, which also contributed positively. The country allocation and duration management weighed on performance over the reporting period.

Goldman Sachs Patrimonial Aggressive

In the volatile market context described above, Goldman Sachs Patrimonial Aggressive printed a return of +7.27% (gross of fees) between October 2022 and September 2023. Net return of the I Cap EUR share class of Goldman Sachs Patrimonial Aggressive was 6.34% over the reporting period. In relative terms, the sub-fund lagged its reference index, which gained 8.62% over the last 12 months.

The tactical decisions on asset class level added little value over the reporting period. The sub-fund benefitted from a cautious stance towards bonds in the first months of the reporting period, as inflation continued to surprise to the upside and central banks reacted by aggressively hiking its policy rate. But the decision in the third quarter of 2023 to increase the (government) bond exposure weighed, as the Federal Reserve surprised markets with its high for longer message in September'23. The tactical equity allocation cost some value last year, as equity markets performed stronger than expected. In the first half of the reporting period, the sub-fund had a quite cautious equity stance, resulting mostly in small equity underweights. For most of the second half of the reporting period, the sub-fund maintained a fairly neutral equity weight. The timing to implement a small equity overweight mid-September was unfortunate, as equity markets sold off.

The equity component lagged its reference index during the reporting period. Especially the regional equity allocations cost some value. For instance the underweight in Eurozone stocks didn't work in Q1'23, as the energy crisis on the European continent weighed less on economic growth than anticipated. The top-down sector calls were quite limited over the reporting period. Equity fund selection cost performance, despite a positive effect in Q4'22.

The fixed income part of the portfolio outperformed its reference index during the reporting period. It turned out to be a good decision to gradually increase the weight in risky bonds throughout the fourth quarter of 2022. In March'23 the sub-funds reduced the credit allocations in high yield corporate bonds and Emerging Market Debt as concerns around the US banking sector took center stage. Since then the sub-funds had a small preference for high-quality corporate bonds, which also contributed positively. The country allocation and duration management weighed on performance over the reporting period.

Goldman Sachs Patrimonial Balanced Europe Sustainable

In the volatile market context described above, Goldman Sachs Patrimonial Balanced Europe Sustainable printed a return of +7.84% (gross of fees) between October 2022 and September 2023. Net return of the P Cap EUR share class of Goldman Sachs Patrimonial Balanced Europe Sustainable was 6.31% over the reporting period. In relative terms, the sub-fund lagged its reference index, which gained 9.01% over the last 12 months.

The tactical decisions on asset class level cost performance over the reporting period. In the first half of the reporting period, the sub-fund had a quite cautious equity stance, which weighed on the overall result as European equities rallied at that time. In the second half of the reporting period, the sub-fund maintained a fairly neutral equity weight. The sub-fund benefitted from a cautious stance towards bonds in the first months of the reporting period, as inflation continued to surprise to the upside and central banks reacted by aggressively hiking its policy rate. In Q1'23 and Q2'23, bond exposure and duration moved closer to neutral. But the decision in the third

quarter of 2023 to increase the (government) bond exposure weighed, as high for longer message of central banks surprised markets in September'23.

The equity component lagged its reference index during the reporting period, as security selection effects were negative. Both the growth oriented sustainable equity strategy as well as the more value oriented sustainable equity strategy underperformed the benchmark. The growth oriented sustainable equity strategy struggled especially in the first months of the reporting period, while the value oriented sustainable equity strategy was hindered by the exclusion of fossil fuels for sustainability reasons, as oil prices rallied sharply in recent months.

The fixed income part of the portfolio outperformed its reference index during the reporting period. Especially the preference for high-quality sustainable corporate bonds contributed positively. The country allocation and duration management added also some value, especially in the first months of the reporting period.

Benchmark

Goldman Sachs Patrimonial Defensive, Goldman Sachs Patrimonial Balanced and Goldman Sachs Patrimonial Aggressive are diversified multi-asset strategies, similar in set-up but with a different investment profile. The funds' benchmarks are a mix of global equities (MSCI All Country World Index NR) and fixed income (Bloomberg Euro Aggregate) in line with their specific investment profile. The sub-funds use active management to respond to changing market conditions by using amongst others fundamental and behavioural analysis resulting in dynamic asset allocations over time. Positioning can therefore materially deviate from the benchmark.

Goldman Sachs Patrimonial Balanced Europe Sustainable mainly invests in a diversified portfolio of Eurozone fixed income instruments, including green bonds, denominated in Euro and European stocks from companies and issuers pursuing policies of sustainable development observing environmental, social and governance principles. The equity portfolio has a European investment universe, mainly investing in equities of companies that are part of the MSCI Europe (NR) Index. Within the fixed income portfolio, the corporate bonds portfolio has a European investment universe, mainly investing in bonds of companies that are part of the Bloomberg Euro-Aggregate. The fund is actively managed against an investment profile of 50% bonds denominated in euro and 50% European stocks. The benchmark is composed as follows: 50% MSCI Europe Index (Net), 50% Bloomberg Euro Aggregate.

1 Year Performance as of 30 September 2023						
Sub-Fund name	Share Class Name	Gross Performance %	Net Performance %	Bench Mark 1 Year	Gross Relative Performance % ^(1,2)	Net Relative Performance % ^(1,3)
Goldman Sachs Patrimonial Aggressive	I Cap EUR	7.27	6.34	8.62	-1.34	-2.28
Goldman Sachs Patrimonial Balanced	I Cap EUR	4.86	3.95	5.50	-0.64	-1.55
Goldman Sachs Patrimonial Defensive	I Cap EUR	2.68	1.79	2.41	0.27	-0.63
Goldman Sachs Patrimonial Balanced Europe Sustainable	P Cap EUR	7.84	6.31	9.01	-1.17	-2.71

⁽¹⁾ The relative performance is shown against the official benchmark of the fund. In some cases the benchmark is only used for performance measurement purposes. The official benchmark is disclosed in the prospectus.

⁽²⁾ Gross Relative performance is the Gross performance of the share class minus the benchmark of the share class, whereby the gross performance of the share class is calculated as the net performance based on the Net Asset Value (NAV) per share plus the Ongoing Charges Figure (OCF).

⁽³⁾ Net Relative Performance is the Net performance of the share class minus the benchmark of the share class, whereby the net performance of the share class is calculated as the net performance based on the Net Asset Value (NAV) per share.

Source: Goldman Sachs Asset Management B.V. Performance Measurement Department The Hague, MSCI.

Benchmark (BM) Goldman Sachs Patrimonial Defensive: 25% MSCI AC World (NR), 75% Bloomberg Euro Aggregate, benchmark Goldman Sachs Patrimonial Balanced: 50% MSCI AC World (NR), 50% Bloomberg Euro Aggregate and benchmark Goldman Sachs Patrimonial Aggressive: 75% MSCI AC World (NR), 25% Bloomberg Euro Aggregate and benchmark Goldman Sachs Patrimonial Balanced Europe Sustainable: 50% MSCI Europe (NR), 50% Bloomberg Euro Aggregate.

Returns are presented after all transaction costs, but before Ongoing Charges (consisting of Management Fee + Fixed Service Fee + Tax d'abonnement). Returns include the reinvestment of income. Goldman Sachs Patrimonial Balanced was launched on 18 July 1991, Goldman Sachs Patrimonial Defensive and Aggressive were launched on 25 July 1994 and Goldman Sachs Patrimonial Balanced Europe Sustainable was launched on 20 October 1995.

Past performance does not predict future returns and does not guarantee future results, which may vary.

Luxembourg, 3 November 2023

Audit report

To the Shareholders of
Goldman Sachs Funds V

Our opinion

In our opinion, the accompanying annual accounts give a true and fair view of the financial position of Goldman Sachs Funds V (the “Fund”) and of each of its sub-funds as at 30 September 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the annual accounts.

What we have audited

The Fund’s annual accounts comprise:

- the statement of net assets as at 30 September 2023;
- the statement of operations for the year then ended;
- the statement of changes in net assets for the year then ended;
- the schedule of investments as at 30 September 2023; and
- the notes to the annual accounts, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the annual accounts” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the annual accounts. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the annual accounts and our audit report thereon.

Our opinion on the annual accounts does not cover the other information and we do not express any form of assurance conclusion thereon.

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg
T : +352 494848 1, F : +352 494848 2900, www.pwc.lu*

*Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256)
R.C.S. Luxembourg B 65 477 - TVA LU25482518*

In connection with our audit of the annual accounts, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the annual accounts or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the annual accounts

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the annual accounts in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the annual accounts, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the annual accounts

The objectives of our audit are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the annual accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the annual accounts or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the annual accounts, including the disclosures, and whether the annual accounts represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

NOTES TO THE FINANCIAL STATEMENTS

1 Organisation

Goldman Sachs Funds V (the "Fund" or the "Company") is a "Société d'Investissement à Capital Variable" ("SICAV") incorporated on June 9, 1986 for an unlimited period as a société anonyme (public limited company), governed by Part I of the Luxembourg law of December 17, 2010 as amended, on undertakings for collective investment. It arose from the conversion, on that date, of the collective investment fund Patrimonial created in May 1960.

The Memorandum and Articles of Association of the Company were published in the "Mémorial C, Recueil Spécial des Sociétés et Associations" of the Grand Duchy of Luxembourg and filed with the Register of the Luxembourg District Court where they may be consulted and copies may be obtained upon payment of registry fees.

The Fund is registered with the Luxembourg Register of Companies under number B 24 401.

The Fund currently offers the following share classes to the investors:

Share class name	Description
Capitalisation I	Capitalisation shares reserved to institutional investors.
Capitalisation N	Capitalisation shares that do not pay any rebates and are intended for individual investors in the Dutch market. The maximum management fee for Share-Class "N" is lower than the maximum management fee for Share-Class "P". The fixed service fee for Share-Class "N" is equal to the fixed service fee for Share-Class "P". Subscription and conversion fees are not applicable for this Share-Class type.
Capitalisation P	Capitalisation shares intended for individual investors.
Capitalisation P Hedged*	Capitalisation shares intended for individual investors and denominated in a currency other than the reference currency of the sub-fund. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Capitalisation R	Capitalisation shares intended for individual investors who are clients of Distributors which provide investment advisory services based on separate fee arrangements. No retrocessions or rebates are paid. The maximum management fee for Share-Class "R" is lower than the maximum management fee for Share-Class "P". The fixed service fee for Share-Class "R" is equal to the fixed service fee for Share-Class "P". The maximum subscription and conversion fees for Share-Class "R" are equal to those of Share-Class "P".
Capitalisation R Hedged*	Capitalisation shares intended for individual investors who are clients of Distributors which provide investment advisory services based on separate fee arrangements and denominated in a currency other than the reference currency of the sub-fund. No retrocessions or rebates are paid. The maximum management fee for Share-Class "R" is lower than the maximum management fee for Share-Class "P". The fixed service fee for Share-Class "R" is equal to the fixed service fee for Share-Class "P". The maximum subscription and conversion fees for Share-Class "R" are equal to those of Share-Class "P". These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Capitalisation X	Capitalisation shares intended for individual investors yet differing from Share-Class "P" in that they attract a higher management fee and are distributed in certain countries where market conditions require a higher fee structure.

Share class name	Description
Capitalisation X Hedged*	Capitalisation shares intended for individual investors yet differing from Share-Class "P" in that they attract a higher management fee and are distributed in certain countries where market conditions require a higher fee structure and denominated in a currency other than the reference currency of the sub-fund. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Capitalisation Z	Capitalisation shares dedicated to institutional investors that, at the discretion of the Management Company, have signed a special management agreement ("Special Agreement") in addition to their subscription agreement in relation to their investment in the Fund. For this Share-Class, the management fee is levied and collected by the Management Company directly from the Shareholder as determined in the Special Agreement. The investment in this Share-Class requires a minimum holding amount of EUR 5,000,000 or the equivalent in another currency.
Distribution P	Distribution shares intended for individual investors.
Distribution P Hedged*	Distribution shares intended for individual investors and denominated in a currency other than the reference currency of the sub-fund. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Distribution R	Distribution shares intended for individual investors who are clients of Distributors which provide investment advisory services based on separate fee arrangements. No retrocessions or rebates are paid. The maximum management fee for Share-Class "R" is lower than the maximum management fee for Share-Class "P". The fixed service fee for Share-Class "R" is equal to the fixed service fee for Share-Class "P". The maximum subscription and conversion fees for Share-Class "R" are equal to those of Share-Class "P".
Distribution R Hedged*	Distribution shares intended for individual investors who are clients of Distributors which provide investment advisory services based on separate fee arrangements and denominated in a currency other than the reference currency of the sub-fund. No retrocessions or rebates are paid. The maximum management fee for Share-Class "R" is lower than the maximum management fee for Share-Class "P". The fixed service fee for Share-Class "R" is equal to the fixed service fee for Share-Class "P". The maximum subscription and conversion fees for Share-Class "R" are equal to those of Share-Class "P". These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Distribution X	Distribution shares intended for individual investors yet differing from Share-Class "P" in that they attract a higher management fee and are distributed in certain countries where market conditions require a higher fee structure.

*The intention is to hedge full or part of the value of the net assets in the reference currency of the sub-fund or the currency exposure of certain (but not necessarily all) assets of the relevant sub-fund into either the reference currency of the currency hedged share class, or into an alternative currency. It is generally intended to carry out such hedging through the use of various derivative financial instruments including, but not limited to over-the-counter currency forward contracts and foreign exchange swap agreements. Profits and losses associated with such hedging transactions are allocated to the applicable currency hedged share class or classes.

The techniques used for share class hedging may include:

- i. hedging transactions to reduce the effect of fluctuations in the exchange rate between the currency in which the share class is denominated and the reference currency of the relevant sub-fund ("Base Currency Hedging");
- ii. hedging transactions to reduce the effect of fluctuations in the exchange rate between the currency exposure arising from the holdings of the relevant sub-fund and the currency in which the share class is denominated ("Portfolio Hedging at Share-Class Level");

- iii. hedging transactions to reduce the effect of fluctuations in the exchange rate between the currency exposure arising from the holdings of the relevant benchmark and the currency in which the share class is denominated ("Benchmark Hedging at Share-Class Level");
- iv. hedging transactions to reduce the effect of fluctuations in the exchange rate based on correlations between currencies arising from the holdings of the relevant sub-fund and the currency in which the share class is denominated ("Proxy Hedging at Share-Class Level").

As at 30 September 2023, only "Base Currency Hedging" was used. During the reporting year ended 30 September 2023, only "Base Currency Hedging" was used.

The investors must be aware that every share class is not offered by every sub-fund of the Company.

Investment Objective Policies

Shareholders are advised that detailed investment policies of each sub-fund are described in the prospectus, which is made available to the shareholders at the Company's website and at the Company's registered office identified in this report. The prospectus will also be sent free of charge to anyone who so requests.

Name change as of 6 March 2023

On 6 March 2023, the name of the sub-funds as well as that of NN (L) Patrimonial were changed. The name of the legal entity NN Investment Partners B.V. was also changed. In the annual report as at 30 September 2023, the new name has been used as it applies from 6 March 2023.

Name from 6 March 2023	Name till 5 March 2023
Goldman Sachs Funds V	NN (L) Patrimonial
Goldman Sachs Patrimonial Aggressive	NN (L) Patrimonial Aggressive
Goldman Sachs Patrimonial Balanced	NN (L) Patrimonial Balanced

2 Significant Accounting Policies

2.1 Basis of Preparation of Financial Statements

The financial statements are prepared under a going concern basis of accounting and presented in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

2.2 Investment Transactions and Related Investment Income

Investment transactions are recorded on a trade date basis in accounting. Realised gains and losses are based on the average cost method.

Discounts are accreted and premiums are amortised as adjustments to interest on bonds and other debt instruments.

2.3 Operating Expenses

Operating expenses are recognised on an accrual basis.

2.4 Dividend Income and Interest Income

Dividends are accounted for on the ex-date, net of withholding tax.

Interest is accrued on a daily basis.

Interest income includes accretion of market discount, original issue discounts and amortisation of premiums and is recorded into income over the life of the underlying investment.

2.5 Transaction Costs

The sub-funds of the Fund incurred transaction costs which have been defined as brokerage fees relating to purchases or sales of transferable securities, money market instruments and financial derivative instruments (or other eligible assets traded in by the sub-funds) and/or commissions relating to subscriptions or redemptions of UCITS/UCI shares/units, if applicable.

In case of cross-investments or investments in the shares/units of other UCITS and/or other UCIs that are managed directly or by delegation by the Management Company (the "GSAM funds"), no transaction costs are applicable.

Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

Please refer to Note 11 for details of the sub-funds that incurred separately identifiable transaction costs. Transaction costs for fixed income investments, forward currency contracts and other derivative contracts are not separately identifiable. For these investments, transaction costs are included in the purchase and sales price and are part of the gross investment performance of each sub-fund.

2.6 Financial Investment in Securities and Valuation

2.6.1 Recognition

The sub-funds recognise financial assets and financial liabilities on the date they become a party to the contractual provisions of the investment. Purchases and sales of financial assets and financial liabilities are recognised using trade date accounting. From trade date, any gains and losses arising from changes in value of the financial assets or financial liabilities are recorded in the Statement of Operations.

2.6.2 Value Measurement Principles

The value of all securities and derivatives is determined according to the following policies:

Exchange Listed Assets and Liabilities

The value of exchange traded financial investments, including transferable securities admitted to an official listing or to any other regulated market are valued at the last known prices. If these transferable securities are traded on several markets, the valuation is made on the basis of the last known price on the main market on which the transferable securities are listed.

Debt Securities

Debt securities, comprising Bonds, are valued clean (excluding interest receivable). The last known price used for the Bonds is the bid price.

Shares in Collective Investment Schemes

The value of investments in open ended investment funds are valued based upon the official net asset values per share as at the last available date as supplied by the funds, in accordance with the valuation policy of the applicable fund as outlined in its prospectus.

If the SICAV had calculated the NAV's solely with a view to the presentation in these financial statements, the NAV

per share/unit used to value the investments would have been the closing prices on 30 September 2023.

The value of investments in open-ended investment funds, comprising Mutual Funds, are valued based upon the official net asset values per share as at the last available date as supplied by the funds, in accordance with the valuation policy of the applicable fund as outlined in its prospectus.

Realised gains and losses on securities portfolio are calculated on the basis of the average cost of securities sold.

Derivatives

A derivative is an instrument whose fair value is derived from an underlying instrument, index reference rate or a combination of these factors. Derivative instruments may be privately negotiated contracts which are often referred to as over the counter ("OTC") derivatives or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments or commodities at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount.

Derivative contracts are stated at fair value and recognized as financial assets and financial liabilities on the Statements of Net Assets. Gains and losses resulting from the change in the fair value are reflected on the Statements of Operations as a component of change in unrealized gain/(loss). Realized gains or (losses) are recorded on termination or from periodic cash flow payments.

Forward Foreign Currency Contracts

The forward foreign exchange contracts represent obligations of purchase or the sale of foreign currency on the basis of future exchange rates determined at a fixed price at the time of conclusion of the contracts. The unexpired forward foreign exchange contracts are valued at the last "forward" rate available on the valuation dates or at the balance sheet date and unrealised appreciation or (depreciation) are recorded. Positive fair values of forward foreign exchange contracts are disclosed as assets and negative fair values as liabilities in the Statement of Net Assets. Realized gains or (losses) and changes in unrealized results are recorded in the Statement of Operations.

Futures Contracts

Futures contracts are valued based on the last available market price. Initial margin deposits are made upon entering into futures contracts. Variation margin payments are made or received, depending on the daily fluctuation in market value of the contract and are recorded by the fund as unrealized appreciation and depreciation. Positive fair values of futures instruments are disclosed as assets and negative fair values as liabilities in the Statement of Net Assets. Realized gains or (losses) and changes in unrealized results are recorded in the Statement of Operations. For the calculation of net holdings by currency on financial instruments, the holdings are converted at the exchange rate prevailing at the year-end.

All Securities and Derivatives

If a quoted market price is not available from a third party pricing service or a dealer, or a quotation is believed to be materially inaccurate, the market value of the investment is determined by using valuation techniques. Valuation techniques include the use of recent market transactions, reference to the current market value of another investment that is substantially the same, discounted cash flow analyses or any other techniques that provides a reliable estimate of prices obtained in actual market transactions. Such securities and derivatives shall be valued at their fair value as determined by the Valuer. The Valuer is appointed by the Management Company. The Valuer also has direct responsibilities to the Board of Directors for certain valuation functions, which are ultimately reflected in the financial statements. The Valuer during the year ended 30 September 2023 was GSAM BV Product Controllers Division ("Controllers").

The investments have been valued in accordance with Luxembourg legal and regulatory requirements that may require the use of certain estimates and assumptions to determine value. Although these estimates and assumptions are based on the best available information, actual results could be materially different from these estimates.

2.7 Cash

Cash is valued at cost, which approximates market value.

Cash in currencies other than the reference currency of the sub-fund is converted into reference currency at the foreign exchange rate prevailing on the date of valuation. Foreign currency exchange differences arising on translation are recognised in the Statement of Operations and Changes in Net Assets as realised gains or (losses) on currency.

2.8 Foreign Currency Translation

The books and records of all sub-funds are maintained in their base currency. Transactions in foreign currencies are translated at the foreign currency exchange rate in effect at the date of the transaction. Assets and liabilities denominated in foreign currencies are translated into base currency at the foreign currency closing exchange rate in effect at the year end date.

Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of assets and liabilities are recognised in the Statement of Operations. Foreign currency exchange gains or losses relating to investments, derivative financial investments, and all other foreign currency exchange gains or losses relating to monetary items, including cash and cash equivalents, are reflected in the net realised gain/(loss) or net change in unrealised gain/(loss) in the Statement of Operations.

2.9 Other liabilities

This account mainly includes transaction expense payables.

2.10 Other Income

This account mainly includes of Central Securities Depositories Regulations (CSDR) cash penalties income and income on cash held away.

2.11 Swinging Single Pricing

A sub-fund may suffer "dilution" of its net asset value per share because the price at which investors subscribe or redeem shares of the sub-fund, does not reflect the dealing and other costs that arise when trading is undertaken by the Investment Manager to accommodate the cash inflows or outflows related to these subscriptions or redemptions.

In order to counter this impact, a Swinging Single Pricing mechanism (SSP) may be applied to compensate expected transaction costs resulting from the difference between capital inflows and outflows. If on any valuation day, the aggregate net transactions in shares of a sub-fund exceed a pre-determined threshold, the net asset value per share may be adjusted upwards or downwards to compensate expected transaction costs related to these net capital inflows or outflows respectively by a pre-determined swing factor. The net inflows and net outflows will be determined by the Board of Directors based on the latest available information at the time of calculation of the net asset value per share.

Such predetermined threshold and swing factors are reviewed on a regular basis and may be adjusted. The maximum Swing Factor is 1.50% of the respective sub-fund's Net Asset Value except for sub-funds investing in fixed income instruments which may apply a maximum Swing Factor of 3.00%.

In exceptional market circumstances, in the case of large volumes of subscription, redemption or conversion requests that may have an adverse effect on the interests of Shareholders, the Board of Directors may, at its own discretion, authorize a temporary increase of a Swing Factor beyond the maximum Swing Factor. Exceptional market circumstances can be characterized among others as periods of increased market volatility, lack of liquidity, challenges in dealer intermediation, disorderly trading conditions, dislocated markets, disconnect between market pricing and valuations and could be the result of force majeure (acts of war, industrial action, civil unrest or cyber sabotage, among others).

The current levels of thresholds and Swing Factors for each sub-fund are disclosed and updated on the website: www.gsam.com/responsible-investing.

The sub-funds have not applied the swinging single pricing mechanism through the reporting year ended 30 September 2023.

As at 30 September 2023, no swing pricing adjustment was applied.

3 Taxation

The Company is liable in Luxembourg to a subscription tax ("Taxe d'abonnement") of 0.05% per annum of its net assets, such tax being payable quarterly and calculated on the net asset value at the end of the relevant calendar quarter. However, this tax is reduced to 0.01% per annum on the net assets of money market Sub-Funds and on the net assets of Sub-Funds and/or Share-Classes reserved for Institutional Investors as prescribed by Article 174 (II) of the Law of 2010.

No subscription tax is paid on the assets held by the Company in other UCIs already subject to that tax in Luxembourg.

The Company may be subject to withholding taxes at varying rates on dividends, interest and capital gains, in accordance with the tax laws applicable in the countries of origin of such income. The Company may in certain cases benefit from reduced tax rates under double tax treaties which Luxembourg has concluded with other countries.

4 Distributions

The Fund intends that substantially all the net investment income, if any, of each sub-fund will be declared as a dividend and paid at least annually to the Shareholders of the Distribution Share Classes of the sub-funds. Net capital and currency gains realised on each sub-fund's investments and/or capital attributable to certain Share Classes may also be distributed to Shareholders of certain Distribution Share Classes of the sub-funds.

Please refer to the Prospectus for further details about distribution policies.

5 Management Fees

In accordance with the terms and conditions of the "Collective Portfolio Management Agreement" between Goldman Sachs Asset Management B.V. and the SICAV, the sub-funds pay Goldman Sachs Asset Management B.V. an annual management fee calculated on the average net assets of each class of shares as described in the table below. This fee is payable monthly in arrears.

As at 30 September 2023 the effective management fees rates are as follows:

Sub-funds	Management fees rate (p.a.)					
	Class I (in %)	Class N (in %)	Class P (in %)	Class R (in %)	Class X (in %)	Class Z* (in %)
Goldman Sachs Patrimonial Aggressive	0.60	-	1.20	0.60	2.00	-
Goldman Sachs Patrimonial Balanced	0.60	-	1.20	0.60	2.00	0.00
Goldman Sachs Patrimonial Defensive	0.60	-	1.20	0.60	2.00	0.00
Goldman Sachs Patrimonial Balanced Europe Sustainable	0.60	0.50	1.20	0.60	2.00	-

* for this share class, the management fee is not charged to the share class. Instead, a specific management fee is levied and collected by the Management Company directly from the shareholders.

In the case where the sub-funds invest in the units/shares of other UCITS and/or other UCIs that are managed directly or by delegation by the Management Company or by any other company with which the Management Company is linked by common management or control or by a substantial direct or indirect holding, the management fees paid by the UCITS and/or UCIs will be deducted from the management fees paid to the Management Company.

The sub-funds Goldman Sachs Patrimonial Aggressive, Goldman Sachs Patrimonial Balanced and Goldman Sachs Patrimonial Defensive have more than 50% of their respective net assets invested in other UCITS/UCI, managed directly or by delegation by the same Management Company. The maximum management fee rate charged to these sub-funds and the UCITS/UCIs in which they are invested are as follows:

Sub-funds	Maximum management fee rate %
Goldman Sachs Emerging Markets Enhanced Index Sustainable Equity - Z Cap EUR*	-
Goldman Sachs Emerging Markets Hard Currency Sovereign Debt Optimised Index - I Cap EUR (hedged i)	0.25
Goldman Sachs Emerging Markets Hard Currency Sovereign Debt Optimised Index - Z Cap EUR (hedged i)*	-
Goldman Sachs Enhanced Index Sustainable Pacific Equity Fund - Z Dis EUR	-
Goldman Sachs Euro Bond - I Cap EUR	0.36
Goldman Sachs Euro Credit - I Cap EUR	0.36
Goldman Sachs Euro Long Duration Bond - I Cap EUR	0.36
Goldman Sachs Euro Sustainable Credit - I Cap EUR	0.36
Goldman Sachs Euromix Bond - I Cap EUR	0.36
Goldman Sachs Europe Enhanced Index Sustainable Equity - I Cap EUR	0.08
Goldman Sachs Europe Equity - I Cap EUR	0.48
Goldman Sachs Europe Sustainable Equity - Z Cap EUR*	-
Goldman Sachs Global Enhanced Index Sustainable Equity - I Cap USD	0.08
Goldman Sachs Global Sustainable Equity - I Cap EUR	0.60
Goldman Sachs Green Bond Short Duration - I Cap EUR	0.36
Goldman Sachs Japan Equity (Former NN) - Z Cap EUR*	-
Goldman Sachs North America Enhanced Index Sustainable Equity - Z Cap EUR*	-

Sub-funds	Maximum management fee rate %
Goldman Sachs Sovereign Green Bond - I Cap EUR	0.36
Goldman Sachs Sustainable Yield Opportunities - Z Cap EUR*	-

* for this share class the management fee is not charged to the share class. Instead a specific management fee is levied and collected by the Management Company directly from the shareholders.

In the case where the management fees paid by the investee funds exceed the management fees to be paid by the sub-funds of the Fund, the balance ("management fees excess") is recorded in the item "Other income" in the statement of operations and changes in net assets.

6 Fixed Service Fees

A fixed service fee is charged at the level of the share classes of each sub-fund. The fixed service fee is paid to the Management Company and used by the latter to pay in the name of the Company the administration fees, the depositary fees, the transfer agent fees, the Belgian subscription tax and other on-going operating and administrative expenses billed to the Company.

The fixed service fee is fixed in the sense that the Management Company will bear the excess of any expenses above the paid fixed service fee for each share class of each sub-fund.

Conversely, the Management Company will be entitled to retain any amount of service fee charged to the share class which exceeds the actual related expenses incurred by the respective share class.

This fee, calculated on the average net assets of each share class and is payable monthly in arrears.

As at 30 September 2023, the effective fixed service fees rates for the active share classes are as follows:

Sub-funds	Fixed services fees rate (p.a.)					
	Class I (in %)	Class N (in %)	Class P (in %)	Class R (in %)	Class X (in %)	Class Z* (in %)
Goldman Sachs Patrimonial Aggressive	0.15	-	0.15	0.15	0.15	0.15
Goldman Sachs Patrimonial Balanced	0.15	-	0.15	0.15	0.15	0.15
Goldman Sachs Patrimonial Defensive	0.15	-	0.15	0.15	0.15	0.15
Goldman Sachs Patrimonial Balanced Europe Sustainable	0.20	0.20	0.20	0.20	0.20	-

* for this share class, a service fee is charged to cover the administration and safe-keeping of assets and other on-going operating and administrative expenses.

7 Tax Enhanced Service Fees

In an effort to optimise the performance of the Company and/or the relevant sub-funds, the Management Company may in certain circumstances pursue tax reclaim or relief opportunities that are not processed by the Depositary and that would otherwise be foregone. The provision of these specific services must be considered an additional service of the Management Company to the relevant sub-funds. In case of positive outcome, the Management Company may be entitled to receive a fee as consideration for such services. Such fee is a set percentage of the amounts of tax recovered or otherwise saved as a consequence of performing the service and

amounts to maximum 15% of tax recovered or saved. In case the recovery is unsuccessful, the Company and/or the relevant sub-funds shall not be charged for the services provided to them.

8 Exchange Rates

As at 30 September 2023, the exchange rates used were as follows:

1 EUR =	1.6405	AUD
	1.4314	CAD
	0.9685	CHF
	24.3555	CZK
	7.4570	DKK
	0.8674	GBP
	4.0307	ILS
	157.9920	JPY
	11.2660	NOK
	11.5025	SEK
	1.0588	USD

9 Statement of Changes in each Portfolio

These changes are made available to the shareholders at the Company's registered office as well as at the distributors identified in this report. They will also be sent free of charge to anyone who so requests.

10 Cash Collateral Information

In order to reduce the counterparty risk linked to over-the-counter financial derivative instruments, the Company received/delivered cash collateral from/to the counterparty as listed below.

The table below provides the cash collateral balances due from / due to brokers in relation to the following investments held as at 30 September 2023:

Sub-funds	Currency	Due from / Due to brokers	Investment type	Cash collateral balances
Goldman Sachs Patrimonial Aggressive	EUR	Due from	OTC Derivatives	902,000.00
Goldman Sachs Patrimonial Aggressive	EUR	Due to	OTC Derivatives	526,000.00
Goldman Sachs Patrimonial Balanced Europe Sustainable	EUR	Due to	OTC Derivatives	417,000.00

11 Transaction Costs

For the year ended 30 September 2023, the amount of transaction costs incurred by each sub-fund is detailed in the following table:

Sub-fund	Currency	Transaction costs
Goldman Sachs Patrimonial Aggressive	EUR	34,794.15
Goldman Sachs Patrimonial Balanced	EUR	81,729.43
Goldman Sachs Patrimonial Defensive	EUR	36,345.70
Goldman Sachs Patrimonial Balanced Europe Sustainable	EUR	587,541.29

12 Overlay Fees

The Management Company may be entitled to receive a uniform Share-Class Overlay fee of maximum 0.04% which is to be paid from the assets of the applicable Share-Class and based on actual costs. The Share-Class Overlay Fee is accrued at each calculation of the Net Asset Value and is set as a maximum in the sense that the Management Company may decide to lower the Overlay Fee charged to the respective Share-Class if economies of scale will allow.

The Overlay Fee will be applicable to all the currency hedged share-classes. In case of Z share-classes those fees may be specified in the Special Agreement which will be levied and collected by the Management Company directly from the Shareholder and not charged directly to the respective Share-Class.

As at 30 September 2023, the overlay fee is 0.021%.

13 Subsequent Events

There have been no significant events to be reported.

14 Approval of Financial Statements

The Board of Directors approved the Annual Financial Statements on 6 December 2023.

OTHER INFORMATION TO SHAREHOLDERS (unaudited)

Sustainable Finance Disclosures Regulation (SFDR) Classification

EU Taxonomy

The investments underlying the sub-funds do not take into account the EU criteria for environmentally sustainable economic activities.

Article 8 sub-funds

Under the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (the "SFDR"), the following sub-funds are categorized under SFDR Article 8 as at 30 September 2023:

Goldman Sachs Patrimonial Aggressive
Goldman Sachs Patrimonial Balanced
Goldman Sachs Patrimonial Defensive
Goldman Sachs Patrimonial Balanced Europe Sustainable

The required Periodic Disclosures (PD) have been incorporated into the SFDR Note in the "Other information to shareholders" of the annual report for all Funds categorized as Art. 8. Please note that the information in these PD contain information which is mainly sourced from the front office systems of the fund manager (Investment Book of Records) and therefore could slightly deviate from the information in the audited section which is based on the administration of fund administrator, Brown Brothers Harriman (Luxembourg) S.C.A. (Accounting Book of Records).

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Goldman Sachs Patrimonial Aggressive

Legal entity identifier: 549300JGZFTRRZ578258

Environmental and/or social characteristics

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: __%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: __%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 42.36% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and social characteristics during the reporting period. The Sub-Fund effectuated the characteristics during the reporting period by investing in investment funds managed by a party affiliated to the Management Company that applied these criteria and by investing directly in underlying securities. The characteristics that were promoted during the reporting period are:

1. Limited investments in companies involved in controversial activities. During the reporting period, the Sub-Fund did not invest in issuers that realised a certain percentage of their revenue from activities related to:
 - the development, production, maintenance or trade in controversial weapons (0%);

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- the controversial supply of weapons (0%);
- the production of tobacco ($\geq 50\%$);
- the production of oil sands and controversial pipelines ($>20\%$);
- the extraction of thermal coal ($>20\%$).

This was checked daily in the Aladdin portfolio management system. Within the Management Company, the Risk Management department is responsible for these daily checks on investment restrictions. The assessment of whether companies carry out the aforementioned activities is determined on the basis of external information from ESG data providers.

The performance of this characteristic was measured with the indicator 'Excluding investments in issuers involved in controversial activities'.

2. Excluding countries.

During the reporting period, no investments have been made in countries against which arms embargoes have been imposed by the United Nations Security Council. Similarly, investments are not made in countries included in the Financial Action Task Force list, which are subject to a "Call for Action".

The performance of this characteristic was measured with the indicator 'Excluding investments in countries subject to country-wide arms embargo sanctions imposed by the United Nations Security Council, and countries on the Financial Action Task Force list, that are subject to a "Call for Action"'.

3. Adhered to good corporate governance, compliance with human and labour rights, protection of the environment and prevention of bribery and corruption.

The Sub-Fund met this characteristic by assessing the extent to which the investee companies act in accordance with relevant legislation and internationally recognised standards: the OECD Guidelines for Multinational Enterprises, the UN Principles for Business and Human Rights and the UN Global Compact.

This was done based on a proprietary approach that sought to identify, review, evaluate and monitor companies that were flagged by external data providers as being in violation of, or otherwise not aligned with the aforementioned Global Standards as well companies that received high controversy scores (including significant governance controversies, severe labour rights controversies and severe tax compliance controversies).

Following review of these external data inputs, companies that the Management Company believed to have an on-going and serious violation and/or were considered to not be following good governance practices with insufficient remediation were excluded from the Sub-Fund.

The performance of this characteristic was measured with the indicator 'Limiting investments in material violators of internationally recognized standards, for example: OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and UN Global Compact'.

4. Screening carbon intensity

The Sub-Fund applied screening regarding the carbon intensity of investee companies. In line with the ambition of the Sub-Fund the carbon intensity of the Sub-Fund was better than the carbon intensity of the Benchmark.

The performance of this characteristic was measured with the indicator 'Average weighted carbon intensity score - ISS Scope 1 + 2 + 3'.

5. Allocating partly to Sustainable Investments

The Sub-Fund invested partly in companies or projects that contributed to an environmental or social objective based on the product contribution or operational contribution.

The performance of this characteristic was measured with the indicator 'Percentage of Sustainable Investments'.

● **How did the sustainability indicators perform?**

Indicator	Portfolio	Benchmark
Average weighted carbon intensity score against the universe - ISS Scope 1 + 2 + 3	313.58	749.04
Number of issuers against which arms embargoes have been issued by the UN Security Council and subject to a Call for Action on the Financial Action Task Force list	These investments have been excluded in line with the description provided in the previous question	Not applicable
Number of issuers excluded from the investment universe based on the Exclusion List	These investments have been excluded in line with the description provided in the previous question	Not applicable
Number of issuers involved in material violations of internationally recognised standards, for example: OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and UN Global Compact	These investments have been avoided in line with the description provided in the previous question	Not applicable
Percentage of Sustainable Investments	42.36%	Not applicable

● ...and compared to previous periods?

Indicator	Reference period		Previous reference period	
	Portfolio	Benchmark	Portfolio	Benchmark
Average weighted carbon intensity score - ISS Scope 1 + 2	Not applicable	Not applicable	100.42	205.07
Average weighted carbon intensity score against the universe - ISS Scope 1 + 2 + 3	313.58	749.04	Not applicable	Not applicable
Number of issuers against which arms embargoes have been issued by the UN Security Council and subject to a Call for Action on the Financial Action Task Force list	These investments have been excluded in line with the description provided in the previous question	Not applicable	These investments have been excluded in line with the description provided in the previous question	Not applicable
Number of issuers excluded from the investment universe based on the Exclusion List	These investments have been excluded in line with the description provided in the previous question	Not applicable	These investments have been excluded in line with the description provided in the previous question	Not applicable
Number of issuers involved in material violations of internationally recognised standards, for example: OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and UN Global Compact	These investments have been avoided in line with the description provided in the previous question	Not applicable	These investments have been avoided in line with the description provided in the previous question	Not applicable
Percentage of Sustainable Investments	42.36%	Not applicable	Not applicable	Not applicable
Number of issuers engaged with as a result of controversy engagement	Not applicable	Not applicable	Due to the structure of the Fund it was not possible to report on this indicator.	Not applicable

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Investments are defined as sustainable investments based on the management companies sustainable investment framework. Under this framework, an investment may contribute to an environmental or social objective through a product or an operational contribution.

For a product contribution, we looked at:

- i. the part of a company's revenue that focuses on a sustainable environmental and/or social impact category;
- ii. the alignment of a company's products with a sustainable development goal (SDG) in the field of the environment and/or society;
- iii. a company's best-in-class score against environmental and/or social opportunity themes defined by a third-party data provider.

An operational contribution is approached thematically, looking at the promotion of the climate transition (environment) within a company's operational framework, inclusive growth within a company's operational framework, operational alignment with an environmental or social SDG, and the application of a best-in-class own environmental and social score.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Investments that contributed to an environmental or social objective in accordance with the management companies sustainable investment framework also had to meet the 'Do No Significant Harm' criteria (DNSH) of the sustainable investment framework of the management company. Investments that did not meet the DNSH criteria did not qualify as sustainable investments. These criteria consisted of two parts. Firstly, each principal adverse impact indicator on sustainability factors had its own quantitative or qualitative threshold. The threshold differed per principal adverse impact indicator. In addition, all companies involved in very serious controversies were deemed to cause significant harm and therefore excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

As indicated above, the principal adverse impact indicators on sustainability factors were also assessed in the assessment of the DNSH criteria. These are indicators included in Table 1 of Annex I of the SFDR RTS as applicable during the reference period. These are the principal adverse impact indicators. For each indicator (there are 14 for companies), a threshold has been set to determine whether other sustainable objectives have been seriously undermined. These thresholds are set on a relative or absolute basis, depending on the indicator. Where no data were available for a specific indicator, a suitable replacement measure was identified. If no (proxy) data were available on the indicator or on the replacement measure, an investment is generally excluded from qualification as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Sub-fund leveraged a proprietary approach to identifying and evaluating global norms violators and borrowers/issuers that may be engaged in poor governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance. This proprietary approach sought to identify, review, evaluate and monitor companies that were flagged by external data providers as being in violation of, or otherwise not aligned with, the United Nation Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as well companies that received high controversy scores (including significant governance

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters.

controversies, severe labour rights controversies and severe tax compliance controversies). Following review of these external data inputs, companies that the Management Company believed to have an ongoing and serious violation and/or were considered to not be following good governance practices with insufficient remediation were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significantly harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the reporting period, elements pertaining to PAIs were taken into account as part of the investment process of the Sub-Fund. This was done mainly via restriction criteria and stewardship. In this process, the following PAIs were taken into account:

- PAI 3: GHG intensity of investee companies (via portfolio construction);
- PAI 4: exposure to companies active in the fossil fuel sector (via restriction criteria, engagement and voting);
- PAI 7: activities negatively affecting biodiversity sensitive areas (via engagement);
- PAI 10: violations of UN Global Compact principles and OECD Guidelines on Multi National Enterprises (via restriction criteria, voting and engagement);
- PAI 11: lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises (via engagement);
- PAI 13: board gender diversity (via voting and engagement);
- PAI 14: exposure to controversial weapons (via restriction criteria);
- PAI 16: Investee countries subject to social violations (via restriction criteria).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 9/30/2023

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES - Financial service activities, except insurance and pension funding	14.06

REAL ESTATE ACTIVITIES - Buying & selling of own real estate	0

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reporting period reported Taxonomy alignment data was not available to the Management Company. We continue to assess third-party data providers and internal solutions to data challenges on an ongoing basis.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

- Yes
- In fossil gas
- In nuclear Energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
- Taxonomy-aligned: Nuclear
- Taxonomy-aligned (no gas and nuclear)
- Non Taxonomy-aligned

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
- Taxonomy-aligned: Nuclear
- Taxonomy-aligned (no gas and nuclear)
- Non Taxonomy-aligned

This graph represents 92.22% of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

0%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

26.09%

What was the share of socially sustainable investments?

16.27%

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under 'other' were cash used for liquidity purposes, derivatives for efficient portfolio management/investment purposes and investments in UCITS and UCIs needed to achieve the investment objective of the Sub-Fund that did not adhere to the promoted characteristics of the Sub-Fund. These investments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub Fund promoted environmental and social characteristics during the reporting period via the following actions:

1. Limited investments in issuers involved in controversial activities;
2. Excluded countries;
3. Took ESG factors of each issuer into account in the investment decision-making process. This was a documented process but no binding outcomes were intended;
4. Adhered to good governance, compliance with human and labour rights, protection of the environment and prevention of bribery and corruption;
5. Screened carbon intensity;
6. Allocated part of its investments to sustainable investments;
7. Preferred inclusion over exclusion through engagement.

The Sub-Fund effectuated the characteristics during the reporting period by investing in investment funds managed by a party affiliated to the Management Company that applied these criteria and by investing directly in underlying securities.

How did this financial product perform compared to the reference benchmark?

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

● ***How did this financial product perform compared with the broad market index?***

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Goldman Sachs Patrimonial Balanced

Legal entity identifier: 549300MI166WN54MZP81

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: __%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: __%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 39.86% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and social characteristics during the reporting period. The Sub-Fund effectuated the characteristics during the reporting period by investing in investment funds managed by a party affiliated to the Management Company that applied these criteria and by investing directly in underlying securities. The characteristics that were promoted during the reporting period are:

1. Limited investments in companies involved in controversial activities.

During the reporting period, the Sub-Fund did not invest in issuers that realised a certain percentage of their revenue from activities related to:

- the development, production, maintenance or trade in controversial weapons (0%);

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- the controversial supply of weapons (0%);
- the production of tobacco ($\geq 50\%$);
- the production of oil sands and controversial pipelines ($>20\%$);
- the extraction of thermal coal ($>20\%$).

This was checked daily in the Aladdin portfolio management system. Within the Management Company, the Risk Management department is responsible for these daily checks on investment restrictions. The assessment of whether companies carry out the aforementioned activities is determined on the basis of external information from ESG data providers.

The performance of this characteristic was measured with the indicator 'Excluding investments in issuers involved in controversial activities'.

2. Excluding countries.

During the reporting period, no investments have been made in countries against which arms embargoes have been imposed by the United Nations Security Council. Similarly, investments are not made in countries included in the Financial Action Task Force list, which are subject to a "Call for Action".

The performance of this characteristic was measured with the indicator 'Excluding investments in countries subject to country-wide arms embargo sanctions imposed by the United Nations Security Council, and countries on the Financial Action Task Force list, that are subject to a "Call for Action"'.

3. Adhered to good corporate governance, compliance with human and labour rights, protection of the environment and prevention of bribery and corruption.

The Sub-Fund met this characteristic by assessing the extent to which the investee companies act in accordance with relevant legislation and internationally recognised standards: the OECD Guidelines for Multinational Enterprises, the UN Principles for Business and Human Rights and the UN Global Compact.

This was done based on a proprietary approach that sought to identify, review, evaluate and monitor companies that were flagged by external data providers as being in violation of, or otherwise not aligned with the aforementioned Global Standards as well companies that received high controversy scores (including significant governance controversies, severe labour rights controversies and severe tax compliance controversies).

Following review of these external data inputs, companies that the Management Company believed to have an on-going and serious violation and/or were considered to not be following good governance practices with insufficient remediation were excluded from the Sub-Fund.

The performance of this characteristic was measured with the indicator 'Limiting investments in material violators of internationally recognized standards, for example: OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and UN Global Compact'.

4. Screening carbon intensity

The Sub-Fund applied screening regarding the carbon intensity of investee companies. In line with the ambition of the Sub-Fund the carbon intensity of the Sub-Fund was better than the carbon intensity of the Benchmark.

The performance of this characteristic was measured with the indicator 'Average weighted carbon intensity score - ISS Scope 1 + 2 + 3'.

5. Allocating partly to Sustainable Investments

The Sub-Fund invested partly in companies or projects that contributed to an environmental or social objective based on the product contribution or operational contribution.

The performance of this characteristic was measured with the indicator 'Percentage of Sustainable Investments'.

● **How did the sustainability indicators perform?**

Indicator	Portfolio	Benchmark
Average weighted carbon intensity score against the universe - ISS Scope 1 + 2 + 3	383.04	695.21
Number of issuers against which arms embargoes have been issued by the UN Security Council and subject to a Call for Action on the Financial Action Task Force list	These investments have been excluded in line with the description provided in the previous question	Not applicable
Number of issuers excluded from the investment universe based on the Exclusion List	These investments have been excluded in line with the description provided in the previous question	Not applicable
Number of issuers involved in material violations of internationally recognised standards, for example: OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and UN Global Compact	These investments have been avoided in line with the description provided in the previous question	Not applicable
Percentage of Sustainable Investments	39.85%	Not applicable

● **...and compared to previous periods?**

Indicator	Reference period		Previous reference period	
	Portfolio	Benchmark	Portfolio	Benchmark
Average weighted carbon intensity score against the universe - ISS Scope 1 + 2 + 3	383.04	695.21	Not applicable	Not applicable
Average weighted carbon intensity score - ISS Scope 1 + 2	Not applicable	Not applicable	117.1	192.68
Number of issuers against which arms embargoes have been issued by the UN Security Council and subject to a Call for Action on the Financial Action Task Force list	These investments have been excluded in line with the description provided in the previous question	Not applicable	These investments have been excluded in line with the description provided in the previous question	Not applicable
Number of issuers excluded from the investment universe based on the Exclusion List	These investments have been excluded in line with the description provided in the previous question	Not applicable	These investments have been excluded in line with the description provided in the previous question	Not applicable
Number of issuers involved in material violations of internationally recognised standards, for example: OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and UN Global Compact	These investments have been avoided in line with the description provided in the previous question	Not applicable	These investments have been avoided in line with the description provided in the previous question	Not applicable
Percentage of Sustainable Investments	39.85%	Not applicable	Not applicable	Not applicable
Number of issuers engaged with as a result of controversy engagement	Not applicable	Not applicable	Due to the structure of the Fund it was not possible to report on this indicator.	Not applicable

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Investments are defined as sustainable investments based on the management companies sustainable investment framework. Under this framework, an investment may contribute to an environmental or social objective through a product or an operational contribution.

For a product contribution, we looked at:

- i. the part of a company's revenue that focuses on a sustainable environmental and/or social impact category;
- ii. the alignment of a company's products with a sustainable development goal (SDG) in the field of the environment and/or society;
- iii. a company's best-in-class score against environmental and/or social opportunity themes defined by a third-party data provider.

An operational contribution is approached thematically, looking at the promotion of the climate transition (environment) within a company's operational framework, inclusive growth within a company's operational framework, operational alignment with an environmental or social SDG, and the application of a best-in-class own environmental and social score.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Investments that contributed to an environmental or social objective in accordance with the management companies sustainable investment framework also had to meet the 'Do No Significant Harm' criteria (DNSH) of the sustainable investment framework of the management company. Investments that did not meet the DNSH criteria did not qualify as sustainable investments. These criteria consisted of two parts. Firstly, each principal adverse impact indicator on sustainability factors had its own quantitative or qualitative threshold. The threshold differed per principal adverse impact indicator. In addition, all companies involved in very serious controversies were deemed to cause significant harm and therefore excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

As indicated above, the principal adverse impact indicators on sustainability factors were also assessed in the assessment of the DNSH criteria. These are indicators included in Table 1 of Annex I of the SFDR RTS as applicable during the reference period. These are the principal adverse impact indicators. For each indicator (there are 14 for companies), a threshold has been set to determine whether other sustainable objectives have been seriously undermined. These thresholds are set on a relative or absolute basis, depending on the indicator. Where no data were available for a specific indicator, a suitable replacement measure was identified. If no (proxy) data were available on the indicator or on the replacement measure, an investment is generally excluded from qualification as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Sub-fund leveraged a proprietary approach to identifying and evaluating global norms violators and borrowers/issuers that may be engaged in poor governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance. This proprietary approach sought to identify, review, evaluate and monitor companies that were flagged by external data providers as being in violation of, or otherwise not aligned with, the United Nation Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as well companies that received high controversy scores (including significant governance

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters.

controversies, severe labour rights controversies and severe tax compliance controversies). Following review of these external data inputs, companies that the Management Company believed to have an ongoing and serious violation and/or were considered to not be following good governance practices with insufficient remediation were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significantly harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the reporting period, elements pertaining to PAIs were taken into account as part of the investment process of the Sub-Fund. This was done mainly via restriction criteria and stewardship. In this process, the following PAIs were taken into account:

- PAI 3: GHG intensity of investee companies (via portfolio construction);
- PAI 4: exposure to companies active in the fossil fuel sector (via restriction criteria, engagement and voting);
- PAI 7: activities negatively affecting biodiversity sensitive areas (via engagement);
- PAI 10: violations of UN Global Compact principles and OECD Guidelines on Multi National Enterprises (via restriction criteria, voting and engagement);
- PAI 11: lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises (via engagement);
- PAI 13: board gender diversity (via voting and engagement);
- PAI 14: exposure to controversial weapons (via restriction criteria);
- PAI 16: Investee countries subject to social violations (via restriction criteria).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 9/30/2023

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reporting period reported Taxonomy alignment data was not available to the Management Company. We continue to assess third-party data providers and internal solutions to data challenges on an ongoing basis.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

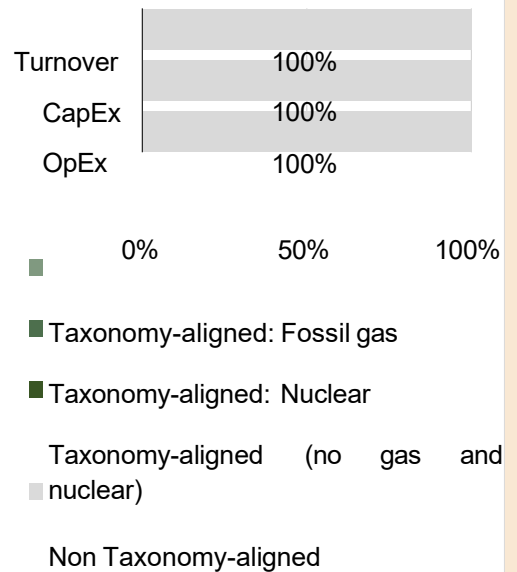

- Yes
 In fossil gas In nuclear Energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 76.97% of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

0%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

27.84%

● **What was the share of socially sustainable investments?**

12.02%

● **What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments included under 'other' were cash used for liquidity purposes, derivatives for efficient portfolio management/investment purposes and investments in UCITS and UCIs needed to achieve the investment objective of the Sub-Fund that did not adhere to the promoted characteristics of the Sub-Fund. These investments were not subject to any minimum environmental or social safeguards.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Sub Fund promoted environmental and social characteristics during the reporting period via the following actions:

1. Limited investments in issuers involved in controversial activities;
2. Excluded countries;
3. Took ESG factors of each issuer into account in the investment decision-making process. This was a documented process but no binding outcomes were intended;
4. Adhered to good governance, compliance with human and labour rights, protection of the environment and prevention of bribery and corruption;
5. Screened carbon intensity;
6. Allocated part of its investments to sustainable investments;
7. Preferred inclusion over exclusion through engagement.

The Sub-Fund effectuated the characteristics during the reporting period by investing in investment funds managed by a party affiliated to the Management Company that applied these criteria and by investing directly in underlying securities.

● **How did this financial product perform compared to the reference benchmark?**

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

● ***How did this financial product perform compared with the broad market index?***

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

Disclaimer

This document is accurate as at 30/09/2023.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Goldman Sachs Patrimonial Defensive

Legal entity identifier: 549300B7KBL6SLILAM62

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: __%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: __%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 39.82% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and social characteristics during the reporting period. The Sub-Fund effectuated the characteristics during the reporting period by investing in investment funds managed by a party affiliated to the Management Company that applied these criteria and by investing directly in underlying securities. The characteristics that were promoted during the reporting period are:

1. Limited investments in companies involved in controversial activities.

During the reporting period, the Sub-Fund did not invest in issuers that realised a certain percentage of their revenue from activities related to:

- the development, production, maintenance or trade in controversial weapons (0%);

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- the controversial supply of weapons (0%);
- the production of tobacco (≥50%);
- the production of oil sands and controversial pipelines (>20%);
- the extraction of thermal coal (>20%).

This was checked daily in the Aladdin portfolio management system. Within the Management Company, the Risk Management department is responsible for these daily checks on investment restrictions. The assessment of whether companies carry out the aforementioned activities is determined on the basis of external information from ESG data providers.

The performance of this characteristic was measured with the indicator 'Excluding investments in issuers involved in controversial activities'.

2. Excluding countries.

During the reporting period, no investments have been made in countries against which arms embargoes have been imposed by the United Nations Security Council. Similarly, investments are not made in countries included in the Financial Action Task Force list, which are subject to a "Call for Action".

The performance of this characteristic was measured with the indicator 'Excluding investments in countries subject to country-wide arms embargo sanctions imposed by the United Nations Security Council, and countries on the Financial Action Task Force list, that are subject to a "Call for Action"'.

3. Adhered to good corporate governance, compliance with human and labour rights, protection of the environment and prevention of bribery and corruption.

The Sub-Fund met this characteristic by assessing the extent to which the investee companies act in accordance with relevant legislation and internationally recognised standards: the OECD Guidelines for Multinational Enterprises, the UN Principles for Business and Human Rights and the UN Global Compact.

This was done based on a proprietary approach that sought to identify, review, evaluate and monitor companies that were flagged by external data providers as being in violation of, or otherwise not aligned with the aforementioned Global Standards as well companies that received high controversy scores (including significant governance controversies, severe labour rights controversies and severe tax compliance controversies).

Following review of these external data inputs, companies that the Management Company believed to have an on-going and serious violation and/or were considered to not be following good governance practices with insufficient remediation were excluded from the Sub-Fund.

The performance of this characteristic was measured with the indicator 'Limiting investments in material violators of internationally recognized standards, for example: OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and UN Global Compact'.

4. Allocating partly to Sustainable Investments

The Sub-Fund invested partly in companies or projects that contributed to an environmental or social objective based on the product contribution or operational contribution.

The performance of this characteristic was measured with the indicator 'Percentage of Sustainable Investments'.

● **How did the sustainability indicators perform?**

Indicator	Portfolio	Benchmark
Number of issuers against which arms embargoes have been issued by the UN Security Council and subject to a Call for Action on the Financial Action Task Force list	These investments have been excluded in line with the description provided in the previous question	Not applicable
Number of issuers excluded from the investment universe based on the Exclusion List	These investments have been excluded in line with the description provided in the previous question	Not applicable
Number of issuers involved in material violations of internationally recognised standards, for example: OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and UN Global Compact	These investments have been avoided in line with the description provided in the previous question	Not applicable
Percentage of Sustainable Investments	39.82%	Not applicable

● **...and compared to previous periods?**

Indicator	Reference period		Previous reference period	
	Portfolio	Benchmark	Portfolio	Benchmark
Number of issuers against which arms embargoes have been issued by the UN Security Council and subject to a Call for Action on the Financial Action Task Force list	These investments have been excluded in line with the description provided in the previous question	Not applicable	These investments have been excluded in line with the description provided in the previous question	Not applicable
Number of issuers excluded from the investment universe based on the Exclusion List	These investments have been excluded in line with the description provided in the previous question	Not applicable	These investments have been excluded in line with the description provided in the previous question	Not applicable

Percentage of Sustainable Investments	39.82%	Not applicable	Not applicable	Not applicable
Number of issuers engaged with as a result of controversy engagement	Not applicable	Not applicable	Due to the structure of the Fund it was not possible to report on this indicator.	Not applicable

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Investments are defined as sustainable investments based on the management companies sustainable investment framework. Under this framework, an investment may contribute to an environmental or social objective through a product or an operational contribution.

For a product contribution, we looked at:

- i. the part of a company's revenue that focuses on a sustainable environmental and/or social impact category;
- ii. the alignment of a company's products with a sustainable development goal (SDG) in the field of the environment and/or society;
- iii. a company's best-in-class score against environmental and/or social opportunity themes defined by a third-party data provider.

An operational contribution is approached thematically, looking at the promotion of the climate transition (environment) within a company's operational framework, inclusive growth within a company's operational framework, operational alignment with an environmental or social SDG, and the application of a best-in-class own environmental and social score.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Investments that contributed to an environmental or social objective in accordance with the management companies sustainable investment framework also had to meet the 'Do No Significant Harm' criteria (DNSH) of the sustainable investment framework of the management company. Investments that did not meet the DNSH criteria did not qualify as sustainable investments. These criteria consisted of two parts. Firstly, each principal adverse impact indicator on sustainability factors had its own quantitative or qualitative threshold. The threshold differed per principal adverse impact indicator. In addition, all companies involved in very serious controversies were deemed to cause significant harm and therefore excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

As indicated above, the principal adverse impact indicators on sustainability factors were also assessed in the assessment of the DNSH criteria. These are indicators included in Table 1 of Annex I of the SFDR RTS as applicable during the reference period. These are the principal adverse impact indicators. For each indicator (there are 14 for companies), a threshold has been set to determine whether other sustainable objectives have been seriously undermined. These thresholds are set on a relative or absolute basis, depending on the indicator. Where no data were available for a specific indicator, a suitable replacement measure was identified. If no (proxy) data were available on the indicator or on the replacement measure, an investment is generally excluded from qualification as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Sub-fund leveraged a proprietary approach to identifying and evaluating global norms violators and borrowers/issuers that may be engaged in poor governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance. This proprietary approach sought to identify, review, evaluate and monitor companies that were flagged by external data providers as being in violation of, or otherwise not aligned with, the United Nation Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as well companies that received high controversy scores (including significant governance controversies, severe labour rights controversies and severe tax compliance controversies). Following review of these external data inputs, companies that the Management Company believed to have an ongoing and serious violation and/or were considered to not be following good governance practices with insufficient remediation were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significantly harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the reporting period, elements pertaining to PAIs were taken into account as part of the investment process of the Sub-Fund. This was done mainly via restriction criteria and stewardship. In this process, the following PAIs were taken into account:

- PAI 4: exposure to companies active in the fossil fuel sector (via restriction criteria, engagement and voting);
- PAI 7: activities negatively affecting biodiversity sensitive areas (via engagement);
- PAI 10: violations of UN Global Compact principles and OECD Guidelines on Multi National Enterprises (via restriction criteria, voting and engagement);
- PAI 11: lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises (via engagement);
- PAI 13: board gender diversity (via voting and engagement);
- PAI 14: exposure to controversial weapons (via restriction criteria);
- PAI 16: Investee countries subject to social violations (via restriction criteria).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 9/30/2023

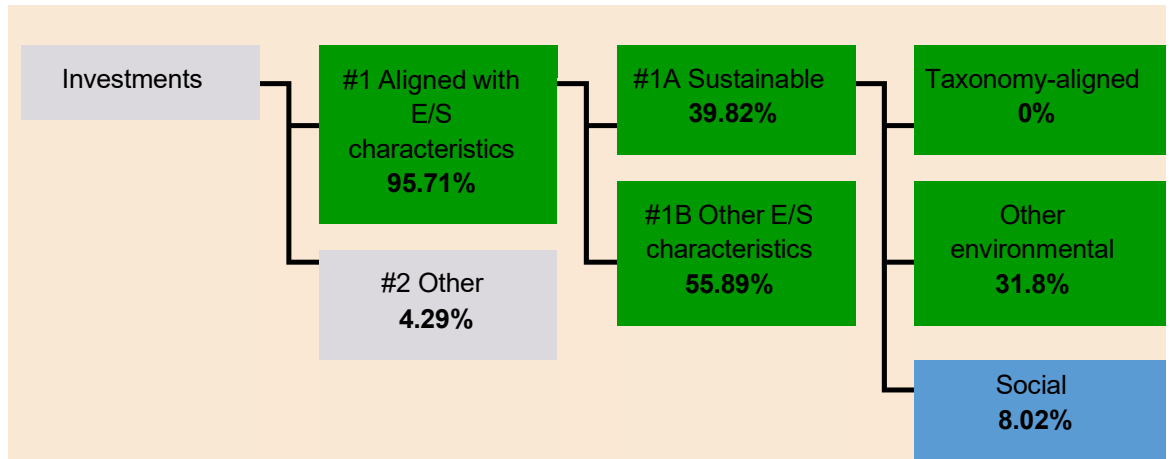

Largest investments	Sector	% Assets	Country

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Sector	% Assets
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY - Administration of the State, the economic/social policy	31.29
FINANCIAL AND INSURANCE ACTIVITIES - Financial service activities, except insurance and pension funding	22.16
Other	6.34
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY - Electric power generation, transmission and distribution	4.41

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reporting period reported Taxonomy alignment data was not available to the Management Company. We continue to assess third-party data providers and internal solutions to data challenges on an ongoing basis.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

- Yes
 In fossil gas In nuclear Energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 62.76% of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

0%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

31.80%

What was the share of socially sustainable investments?

8.02%

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under 'other' were cash used for liquidity purposes, derivatives for efficient portfolio management/investment purposes and investments in UCITS and UCIs needed to achieve the investment objective of the Sub-Fund that did not adhere to the promoted characteristics of the Sub-Fund. These investments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub Fund promoted environmental and social characteristics during the reporting period via the following actions:

1. Limited investments in issuers involved in controversial activities;
2. Excluded countries;
3. Took ESG factors of each issuer into account in the investment decision-making process. This was a documented process but no binding outcomes were intended;
4. Adhered to good governance, compliance with human and labour rights, protection of the environment and prevention of bribery and corruption;
5. Allocated part of its investments to sustainable investments;
6. Preferred inclusion over exclusion through engagement.

The Sub-Fund effectuated the characteristics during the reporting period by investing in investment funds managed by a party affiliated to the Management Company that applied these criteria and by investing directly in underlying securities.

How did this financial product perform compared to the reference benchmark?

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Goldman Sachs Asset Management B.V., Goldman Sachs Asset Management Holdings B.V. or any other company within The Goldman Sachs Group Inc. may be held liable solely on the basis of any statement contained in this document if such statement is misleading, inaccurate or inconsistent with either the relevant parts of the prospectus for the fund or the investment management agreement for the mandate. This document is accurate as at 30/09/2023.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Goldman Sachs Patrimonial Balanced Europe Sustainable

Legal entity identifier: 549300Y8L5JGBRL3RC73

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes **No**

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: __%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: __%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.01% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and social characteristics during the reporting period. More specifically:

- Limited investments in companies involved in controversial activities. During the reporting period, the Sub-Fund did not invest in issuers that realised a certain percentage of their revenue from activities related to:
 - the development, production, maintenance or trade in controversial weapons (0%);
 - the controversial supply of weapons (0%);
 - Small arms and military contracting (>5%);
 - the production of tobacco (≥5%) and retail (>10%);

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- the production of oil sands and controversial pipelines (>10%);
- the extraction of thermal coal (>5%);
- adult entertainment (>5% for production and >10% for distribution);
- fur & specialty leather (>5% for production and >10% for distribution);
- gambling operations (>5%) and supporting products and services (50%);
- nuclear energy (0%, when the issuer is constructing additional nuclear-based power production installations);
- shale oil & gas and arctic drilling (combined ≤10%).

This was checked daily in the Aladdin portfolio management system. Within the Management Company, the Risk Management department is responsible for these daily checks on investment restrictions. The assessment of whether companies carry out the aforementioned activities is determined on the basis of external information from ESG data providers.

The performance of this characteristic was measured with the indicator 'Excluding investments in issuers involved in controversial activities'.

2. Excluding countries.

During the reporting period, no investments have been made in countries against which arms embargoes have been imposed by the United Nations Security Council. Similarly, investments are not made in countries included in the Financial Action Task Force list, which are subject to a "Call for Action".

The performance of this characteristic was measured with the indicator 'Excluding investments in countries subject to country-wide arms embargo sanctions imposed by the United Nations Security Council, and countries on the Financial Action Task Force list, that are subject to a "Call for Action"'.

3. Took ESG factors of each issuer into account in the investment decision-making process.

The Sub-Fund met this characteristic by applying a proprietary approach to ESG integration. The Sub-Fund ensured during the reporting period that it had a better average weighted ESG score than the benchmark of the Sub-Fund. The Sub-Fund integrates the information on environmental, social and governance factors for its investments based on a proprietary ESG Integration approach. ESG Integration involves incorporating the ESG analysis into investment decision making, which takes into account not just the financial, but also the environmental, social and governance factors of the issuer.

The performance of this characteristic was measured with the indicator 'average weighted ESG Rating versus the benchmark'.

4. Adhered to good corporate governance, compliance with human and labour rights, protection of the environment and prevention of bribery and corruption.

The Sub-Fund met this characteristic by assessing the extent to which the investee companies act in accordance with relevant legislation and internationally recognised standards: the OECD Guidelines for Multinational Enterprises, the UN Principles for Business and Human Rights and the UN Global Compact.

This was done based on a proprietary approach that sought to identify, review, evaluate and monitor companies that were flagged by external data providers as being in violation of, or otherwise not aligned with the aforementioned Global Standards as well companies that received high controversy scores (including significant governance controversies, severe labour rights controversies and severe tax compliance controversies).

Following review of these external data inputs, companies that the Management Company believed to have an on-going and serious violation and/or were considered to not be following good governance practices with insufficient remediation were excluded from the Sub-Fund.

The performance of this characteristic was measured with the indicator 'Limiting investments in

material violators of internationally recognized standards, for example: OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and UN Global Compact’.

5. Screening carbon intensity

The Sub-Fund applied screening regarding the carbon intensity of investee companies. In line with the ambition of the Sub-Fund the carbon intensity of the Sub-Fund was better than the carbon intensity of the Benchmark.

The performance of this characteristic was measured with the indicator ‘Average weighted carbon intensity score - ISS Scope 1 + 2 + 3’.

6. Allocating partly to Sustainable Investments

The Sub-Fund invested partly in companies or projects that contributed to an environmental or social objective based on the product contribution or operational contribution.

The performance of this characteristic was measured with the indicator ‘Percentage of Sustainable Investments’.

● **How did the sustainability indicators perform?**

Indicator	Portfolio	Benchmark
Average weighted ESG Rating against the universe - Sustainalytics Risk Rating	17.27	19.81
Average weighted carbon intensity score against the universe - ISS Scope 1 + 2 + 3	231.87	548.72
Number of issuers against which arms embargoes have been issued by the UN Security Council and subject to a Call for Action on the Financial Action Task Force list	These investments have been excluded in line with the description provided in the previous question	Not applicable
Number of issuers excluded from the investment universe based on the Exclusion List	These investments have been excluded in line with the description provided in the previous question	Not applicable
Number of issuers involved in material violations of internationally recognised standards, for example: OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and UN Global Compact	These investments have been avoided in line with the description provided in the previous question	Not applicable
Percentage of Sustainable Investments	51.01%	Not applicable

● ...and compared to previous periods?

Indicator	Reference period		Previous reference period	
	Portfolio	Benchmark	Portfolio	Benchmark
Average weighted carbon intensity score - ISS Scope 1 + 2	Not applicable	Not applicable	98.11	155.68
Average weighted ESG Rating against the universe - Sustainalytics Risk Rating	17.27	19.81	17.17	19.82
Average weighted carbon intensity score against the universe - ISS Scope 1 + 2 + 3	231.87	548.72	Not applicable	Not applicable
Number of issuers against which arms embargoes have been issued by the UN Security Council and subject to a Call for Action on the Financial Action Task Force list	These investments have been excluded in line with the description provided in the previous question	Not applicable	These investments have been excluded in line with the description provided in the previous question	Not applicable

Number of issuers involved in material violations of internationally recognised standards, for example: OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and UN Global Compact	These investments have been avoided in line with the description provided in the previous question	Not applicable	These investments have been avoided in line with the description provided in the previous question	Not applicable
Percentage of Sustainable Investments	51.01%	Not applicable	Not applicable	Not applicable
Number of issuers engaged with as a result of controversy engagement	Not applicable	Not applicable	Due to the structure of the Fund it was not possible to report on this indicator.	Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Investments are defined as sustainable investments based on the management companies sustainable investment framework. Under this framework, an investment may contribute to an environmental or social objective through a product or an operational contribution.

For a product contribution, we looked at:

- i. the part of a company's revenue that focuses on a sustainable environmental and/or social impact category;
- ii. the alignment of a company's products with a sustainable development goal (SDG) in the field of the environment and/or society;
- iii. a company's best-in-class score against environmental and/or social opportunity themes defined by a third-party data provider.

An operational contribution is approached thematically, looking at the promotion of the climate transition (environment) within a company's operational framework, inclusive growth within a company's operational framework, operational alignment with an environmental or social SDG, and the application of a best-in-class own environmental and social score.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Investments that contributed to an environmental or social objective in accordance with the management companies sustainable investment framework also had to meet the 'Do No Significant Harm' criteria (DNSH) of the sustainable investment framework of the management company. Investments that did not meet the DNSH criteria did not qualify as sustainable investments. These criteria consisted of two parts. Firstly, each principal adverse impact indicator on sustainability factors had its own quantitative or qualitative threshold. The threshold differed per principal adverse impact indicator. In addition, all companies involved in very serious controversies were deemed to cause significant harm and therefore excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

As indicated above, the principal adverse impact indicators on sustainability factors were also assessed in the assessment of the DNSH criteria. These are indicators included in Table 1 of Annex I of the SFDR RTS as applicable during the reference period. These are the principal adverse impact indicators. For each indicator (there are 14 for companies), a threshold has been set to determine whether other sustainable objectives have been seriously undermined. These thresholds are set on a relative or absolute basis, depending on the indicator. Where no data were available for a specific indicator, a suitable replacement measure was identified. If no (proxy) data were available on the indicator or on the replacement measure, an investment is generally excluded from qualification as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Sub-fund leveraged a proprietary approach to identifying and evaluating global norms violators and borrowers/issuers that may be engaged in poor governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance. This proprietary approach sought to identify, review, evaluate and monitor companies that were flagged by external data providers as being in violation of, or otherwise not aligned with, the United Nation Global Compact (UNGC) principles, the OECD

Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as well companies that received high controversy scores (including significant governance controversies, severe labour rights controversies and severe tax compliance controversies). Following review of these external data inputs, companies that the Management Company believed to have an ongoing and serious violation and/or were considered to not be following good governance practices with insufficient remediation were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significantly harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the reporting period, elements pertaining to PAIs were taken into account as part of the investment process of the Sub-Fund. This was done mainly via restriction criteria and stewardship. In this process, the following PAIs were taken into account:

- PAI 3: GHG intensity of investee companies (via portfolio construction);
- PAI 4: exposure to companies active in the fossil fuel sector (via restriction criteria, engagement and voting);
- PAI 7: activities negatively affecting biodiversity sensitive areas (via engagement);
- PAI 10: violations of UN Global Compact principles and OECD Guidelines on Multi National Enterprises (via restriction criteria, voting and engagement);
- PAI 11: lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises (via engagement);
- PAI 13: board gender diversity (via voting and engagement);
- PAI 14: exposure to controversial weapons (via restriction criteria);
- PAI 16: Investee countries subject to social violations (via restriction criteria).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 9/30/2023

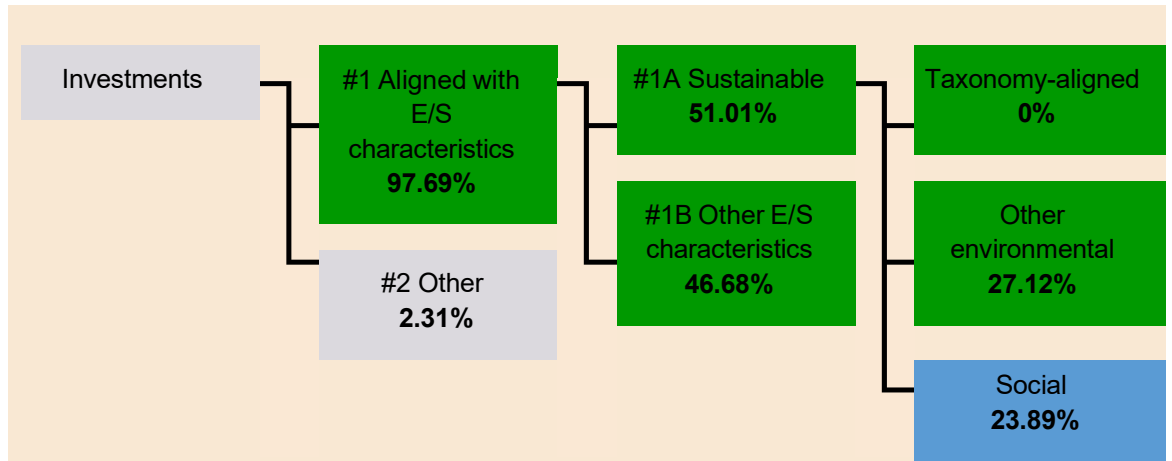

Largest investments	Sector	% Assets	Country
NESTLE SA	MANUFACTURING	3.07	Switzerland
ROCHE HOLDING PAR AG	MANUFACTURING	2.1	Switzerland
SAP	INFORMATION AND COMMUNICATION	1.9	Germany
ALLIANZ	FINANCIAL AND INSURANCE ACTIVITIES	1.82	Germany
NOVO NORDISK CLASS B	MANUFACTURING	1.53	Denmark
RELX PLC	INFORMATION AND COMMUNICATION	1.52	United Kingdom
INTESA SANPAOLO	FINANCIAL AND INSURANCE ACTIVITIES	1.51	Italy
ASML HOLDING NV	MANUFACTURING	1.18	Netherlands
ZURICH INSURANCE GROUP AG	FINANCIAL AND INSURANCE ACTIVITIES	1.18	Switzerland
LOREAL SA	MANUFACTURING	1.07	France

COMPAGNIE DE SAINT GOBAIN SA	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	0.91	France
ASSA ABLOY CLASS B	ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	0.9	Sweden
SCHNEIDER ELECTRIC	MANUFACTURING	0.88	France
UNILEVER PLC	MANUFACTURING	0.87	United Kingdom

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES - Financial service activities, except insurance and pension funding	22.18
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY - Administration of the State, the economic/social policy	15.06
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY - Electric power generation, transmission and distribution	6.99
MANUFACTURING - Manufacture of basic pharmaceutical products and pharmaceutical preparations	6.15
MANUFACTURING - Manufacture of beverages	5.25
MANUFACTURING - Manufacture of chemicals and chemical products	5.08
FINANCIAL AND INSURANCE ACTIVITIES - Insurance, reinsurance and pension funding, except compulsory social security	4.62
INFORMATION AND COMMUNICATION - Publishing activities	4.01
INFORMATION AND COMMUNICATION - Telecommunications	2.72
Other	2.51
MANUFACTURING - Manufacture of machinery and equipment n.e.c.	2.2
MANUFACTURING - Other manufacturing	2.14
FINANCIAL AND INSURANCE ACTIVITIES - Activities auxiliary to financial services and insurance activities	2.05
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES - Retail trade, except of motor vehicles and motorcycles	1.89
MANUFACTURING - Manufacture of computer, electronic and optical products	1.42
CONSTRUCTION - Civil engineering	1.29
MANUFACTURING - Manufacture of electrical equipment	1.11
TRANSPORTATION AND STORAGE - Warehousing and support activities for transportation	1.07
INFORMATION AND COMMUNICATION - Computer programming, consultancy and related activities	0.99
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES - Wholesale trade, except of motor vehicles and motorcycles	0.99

MANUFACTURING - Manufacture of wearing apparel	0.97
MANUFACTURING - Manufacture of paper and paper products	0.87
TRANSPORTATION AND STORAGE - Land transport and transport via pipelines	0.85
MANUFACTURING - Manufacture of motor vehicles, trailers and semi-trailers	0.85
ACCOMMODATION AND FOOD SERVICE ACTIVITIES - Food and beverage service activities	0.84
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES - Security and investigation activities	0.84
TRANSPORTATION AND STORAGE - Postal and courier activities	0.82
INFORMATION AND COMMUNICATION - Information service activities	0.69
ACTIVITIES OF EXTRATERRITORIAL ORGANISATIONS AND BODIES -	0.63
REAL ESTATE ACTIVITIES - Renting & operating of own or leased real estate	0.54
INFORMATION AND COMMUNICATION - Motion picture, video and television programme production, sound recording and m	0.46
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES - Scientific research and development	0.45
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY - Manufacturer of gas; distribution of gaseous fuels through mains	0.44
MINING AND QUARRYING - Mining of metal ores	0.32
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES - Rental and leasing activities	0.24
MANUFACTURING - Manufacture of leather and related products	0.16
MANUFACTURING - Manufacture of basic metals	0.11
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES - Services to buildings and landscape activities	0.07
REAL ESTATE ACTIVITIES - Other	0.05
MANUFACTURING - Manufacture of food products	0.05
MANUFACTURING - Manufacture of other transport equipment	0.03

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the reporting period reported Taxonomy alignment data was not available to the Management Company. We continue to assess third-party data providers and internal solutions to data challenges on an ongoing basis.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

- Yes
 In fossil gas In nuclear Energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy-aligned: Fossil gas
- Taxonomy-aligned: Nuclear
- Taxonomy-aligned (no gas and nuclear)
- Non Taxonomy-aligned

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy-aligned: Fossil gas
- Taxonomy-aligned: Nuclear
- Taxonomy-aligned (no gas and nuclear)
- Non Taxonomy-aligned

This graph represents 77.02% of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

0%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

27.12%

● **What was the share of socially sustainable investments?**

23.89%

● **What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments included under 'other' were cash used for liquidity purposes, derivatives for efficient portfolio management/investment purposes and investments in UCITS and UCIs needed to achieve the investment objective of the Sub-Fund. These investments were not subject to any minimum environmental or social safeguards.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Sub Fund promoted environmental and social characteristics during the reporting period via the following actions:

1. Limited investments in issuers involved in controversial activities;
2. Excluded countries;
3. Took ESG factors of each issuer into account in the investment decision-making process;
4. Adhered to good governance, compliance with human and labour rights, protection of the environment and prevention of bribery and corruption;
5. Screened carbon intensity;
6. Allocated part of its investments to sustainable investments;
7. Preferred inclusion over exclusion through engagement.

● **How did this financial product perform compared to the reference benchmark?**

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

● **How does the reference benchmark differ from a broad market index?**

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

Reference benchmarks are indexes to measure whether the financial products attain the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

- ***How did this financial product perform compared with the broad market index?***

Not applicable. This Sub-Fund was actively managed and therefore did not have a specific index designated as a reference benchmark to determine whether this financial product was aligned with the environmental or social characteristics that it promoted.

Disclaimer

Goldman Sachs Asset Management B.V., Goldman Sachs Asset Management Holdings B.V. or any other company within The Goldman Sachs Group Inc. may be held liable solely on the basis of any statement contained in this document if such statement is misleading, inaccurate or inconsistent with either the relevant parts of the prospectus for the fund or the investment management agreement for the mandate. This document is accurate as at 30/09/2023.

ALFI Code of Conduct

It is hereby confirmed that Goldman Sachs Funds V adheres and complies to the principles of the ALFI "Code of Conduct for Luxembourg Investment Funds".

Remuneration Report - 2022 - Goldman Sachs Asset Management B.V. (Management Company)

In relation to the remuneration governance, GSAM made use of the existing remuneration governance for the first part of 2022 and transitioned to the Goldman Sachs (GS) governance 2022-2023.

Until 10 April 2022 GSAM was part of NN Group and therefore followed the NN Group Remuneration Framework (the "Framework"). This Framework, was also applicable for the rest of 2022 as GSAM continues to follow the Framework until full integration into GS as part of the ongoing Transitional Services Agreement. The Framework is an overarching remuneration policy applicable to all staff working in all countries and business units, which incorporates relevant remuneration and performance management legislation and regulations, as applicable, throughout the company. The aim is to apply a clear and transparent remuneration policy that is adequate to attract and retain expert leaders, senior staff and other highly qualified employees. The remuneration policy is also designed to support employees to act with integrity and to carefully balance the interests of our stakeholders, including the future of our customers and of the company.

Remuneration may consist of both fixed and variable remuneration. Most employees who qualify for variable remuneration, will be eligible for variable remuneration by achieving a number of qualitative and quantitative objectives. These objectives are set at the beginning of the performance year. The qualitative objectives may include objectives related to environment, society, governance and personnel. For certain employees, the quantitative objectives include achieving the investment objectives of the funds of GSAM. In addition, a comparison is made with the Return achieved versus comparable funds of competitors, the so-called "peer ranking". For other employees who qualify for variable remuneration, there is no direct dependency on the Returns achieved by the fund. In that case an assessment is made of the result of a representative portfolio of the shares of GSAM funds, bonds and multi-asset funds.

Clear financial and non-financial performance objectives are set which are aligned with the overall strategy of the company, both in the short term and the long term, to ensure that remuneration is properly linked to individual, team and company performance. Specifically for portfolio managers for GSAM the performance is directly linked to the 1-, 3- and 5- year relative performance of the funds managed by GSAM which creates alignment with our clients' interests. Furthermore, the remuneration policy supports a focus on the company's long term interests and the interests of its customers and various stakeholders by ensuring that there is careful management of risk and that staff are not encouraged, via remuneration, to take excessive risk.

In addition to variable remuneration payable in cash, GSAM awards deferred compensation in the form of Funds managed by GSAM to create further alignment of the employees interests with those of our clients. These awards are granted under the Phantom Investment Plan for employees of GSAM B.V., adopted on December 21, 2022. And as part of the purchase/take over by GS, shares or Goldman Sachs Restricted Stock Units (GS RSUs) will now be awarded under the Goldman Sachs Amended and Restated Stock Incentive Plan¹. GSAM has a deferral policy which is in place for all staff. The general practice for staff employed by GSAM exceeding the deferral thresholds, not being Identified Staff, is to deliver 50% of the deferred variable remuneration in Funds managed by GSAM, and the remaining 50% of the deferred variable remuneration in RSUs. GSAM/GS applies hold back (by way of malus) and clawback as per the Forfeiture and Recapture Provisions establishing a longer-term horizon that ensures that variable remuneration continues to remain 'at risk' due to any issues or staff behaviours that were not apparent (or foreseen) at the time variable remuneration was awarded.

European and national legal requirements among others, including the Wft, Alternative Investment Funds Management Directive (AIFMD) and/or the Undertakings for Collective Investments in Transferable Securities Directive (UCITS) have been incorporated when drafting the remuneration policy for staff who perform activities for the funds as required under any such regulations and/or Goldman Sachs Asset Management B.V. (the Management Company).

¹ Documents referenced within this report are subject to their own individual ownership and approval by the GS Board Compensation Committee and approval of this document does not give authority to change the documents referenced.

GSAM operates a Compensation Committee responsible for (among others) setting, monitoring and reviewing the remuneration policies, plans and overall remuneration spend globally for GSAM. The GSAM Compensation Committee (formerly NN IP Compensation Committee) comprises of the CEO GSAM, the Head of Human Resources GSAM, the Chief Risk Officer GSAM, the Head of Compliance GSAM and the Head of Reward GSAM.

GSAM selects Identified Staff (staff whose professional activities have material impact on the risk profile of GSAM) on the basis of both AIFMD and UCITS (being staff whose professional activities have a material impact on the Dutch licensed AIF(s), and/or the UCITS and/or GSAM based in The Hague) and on the basis of the Regulatory Technical Standards on Identified Staff under IFD.

AIFMD and UCITS Identified Staff are selected in accordance with ESMA guidelines 2013/232 and 2016/575 and the Regulatory Technical Standards on Identified Staff under IFD. The applied selection methodology and selection criteria were approved by the GSAM Compensation Committee.

The performance management principles applied to Identified Staff ensure that there is focus on financial and non-financial performance and on leadership behavior. In addition, the company's strategy (both long and short term objectives), client interests, as well as the companies values are reinforced. The principles also create alignment with the AIF and UCITS risk profile. Control functions Identified Staff have a maximum of 15% financial (e.g. departmental budget responsibility) and a minimum of 85% non-financial performance objectives. Control functions will only have financial performance objectives that are not linked to the performance of the business unit they control. Non-control functions Identified Staff have a maximum of 50% financial and a minimum of 50% non-financial performance objectives.

GSAM promotes robust and effective risk management. This includes risk management of sustainability risks (such as environment, society, governance and personnel related matters). It supports balanced risk-taking and long-term value creation. This will be supported, among others, by the processes related to determining performance targets that can be linked to variable remuneration. It differs per department and position which performance targets have been or can be agreed. There are no specific criteria related to sustainability objectives that are applicable to the entire GSAM population, on the basis of which (variable) remuneration is paid. However, during the performance objectives setting process, guidelines are provided with examples of different qualitative objectives related to sustainability that can be used. Specific objectives apply for investment professionals, aimed at responsible investing. The performance objectives are subject to minimum standards formulated within the company, such as limitations on financial targets.

As deferral periods apply to variable remuneration of Identified Staff, it is ensured that variable remuneration is "at risk" during the entire deferral period. Variable remuneration is linked to risk and non-financial performance and takes into account the company performance at group level, business line performance and individual performance. Any undesired risk taking or breaches of compliance that were not apparent at the time the variable remuneration was awarded, will be taken into account at every (deferred) vesting of variable remuneration.

Variable remuneration for Identified Staff is performance-based and risk-adjusted and is partly paid upfront and partly deferred. Deferred variable remuneration is subject to the assessment of undesired risk-taking, as well as non-compliant behavior in view of past performance. If deemed necessary by the GSAM Supervisory Compensation Committee, (deferred) compensation is adjusted downwards via hold back or claw back.

At least 40% of the variable remuneration as awarded to Identified Staff is deferred, and for control function Identified Staff a stricter regime applies as a minimum of 50% is deferred.

For all selected Identified Staff members, the variable remuneration comprises the following components: phantom unit awards, managed by GS, GS RSUs and upfront cash.

Remuneration over 2022

Over 2022, GSAM has awarded a total amount of € 100,23 mln. to all employees. This amount consists of fixed remuneration of € 78,33 mln. and variable remuneration of € 21,90 mln. Per 31st of December 2022 GSAM had 712 employees, of which 6 board members. The majority of employees spend their time on activities that are directly or indirectly related to the management of the funds. There is no remuneration in the form of carried interest.

From the above mentioned amounts, total remuneration for the board members is € 4,37 mln., of which fixed remuneration is € 2,48 mln. and variable remuneration is € 1,88 mln.

The below table presents a summary of the remuneration awarded to GSAM employees.

Over 2022, the Management Company awarded remuneration above € 1 mln to 2 employees.

Quantitative information

The table below provides aggregated information on the remuneration of all active staff members employed on 31 December 2022 and performing activities for Goldman Sachs Asset Management International Holdings B.V. in The Netherlands during the year 2022, and includes all Identified Staff selected on the basis of AIFMD and/or UCITS.

A significant proportion of the amounts listed below can be attributed to Goldman Sachs Asset Management B.V. (Management Company), as Goldman Sachs Asset Management B.V. is the main operating entity held by Goldman Sachs Asset Management International Holdings B.V.

With regard to the management of the funds, a management fee is charged if applicable and in line with the prospectus. It is converted to a percentage on a daily basis (for Dutch Residential Mortgage funds this takes place on a monthly basis), which is calculated on the total equity of the share or participation class at the end of each day. In addition, operating costs are charged to the AIFs/UCITS, in line with the prospectus. These costs are not directly attributable and are charged to the share or participation class by means of an allocation key.

The costs regarding share classes or participation classes with an all-in fee or Fixed Miscellaneous Fee (the so-called "Vaste Overige Kostenvergoeding" or "VOK") are included in the all-in fee or VOK. More information on whether an all-in fee or VOK applies per share class or participation class can be found in the 'Structure' paragraph in the management report of the annual report.

Information of fixed remuneration and variable remuneration is not administered on fund level, resulting in the costs in below table to be disclosed on aggregated total management company level.

Aggregated fixed and variable remuneration for the performance year 2022

Fixed and variable remuneration awarded in relation to the performance year 2022			
Amounts in EUR 1,000 and gross	Identified Staff qualified as Executives	Other Identified Staff	All staff – excluding Identified Staff
Number of employees (#)	6	23	683
Fixed remuneration (1)	2,482	5,832	70,012
Variable remuneration (2)	1,885	3,512	16,506
Aggregate of fixed and variable remuneration	4,367	9,344	86,518

Note 1) Fixed remuneration per ultimo 2022 for contractual working hours. The Fixed remuneration includes collective fixed allowances, which includes elements such as holiday pay, and pension allowance and excludes benefits.

Note 2) Variable remuneration includes all conditional and unconditional awards in relation to the performance year 2022 as approved by the relevant committees and authorized per 28 October 2022. This includes all

payments to be processed through payroll per January 2023, and phantom unit awards (Fund-of-Fund with a one year holding period) as awarded to Identified Staff as well as all conditional deferred GS RSUs and phantom unit awards. A reference to the allocated Funds is not available.

Aggregated fixed remuneration and variable remuneration for the performance year 2021

Fixed and variable remuneration awarded in relation to the performance year 2021			
Amounts in EUR 1,000 and gross	Identified Staff qualified as Executives	Other Identified Staff	All staff – excluding Identified Staff
Number of employees (#)	6	27	674
Fixed remuneration (1)	2,865	6,416	67,123
Variable remuneration (2)	1,750	4,334	19,298
Aggregate of fixed and variable remuneration	4,615	10,750	86,421

Note 1) Fixed remuneration per ultimo 2021 for contractual working hours. The Fixed remuneration includes collective fixed allowances, which includes elements such as holiday pay, and pension allowance and excludes benefits.

Note 2) Variable remuneration includes all conditional and unconditional awards in relation to the performance year 2021 as approved by the relevant committees and authorized per 18 February 2022. This includes all payments to be processed through payroll per March/April 2022, upfront and NN IP Investment Entitlements (Fund-of-Fund with a one year holding period) as awarded to Identified Staff as well as all conditional deferred NN Group shares and NN IP Investment Entitlements. A reference to the allocated Funds is not available.

Remuneration information third parties

Goldman Sachs Asset Management (GSAM) has (partly) outsourced its portfolio management activities to third parties. For each of these parties a Portfolio Management Agreement (PMA) has been arranged. The PMA guarantees efficient and effective services in accordance with the set agreements with these third parties. The services offered by these third parties based on the PMA are evaluated annually by GSAM.

The transparency that GSAM maintains with regard to the applied remuneration policy also includes transparency regarding the remuneration policy of third parties who carry out portfolio management activities for GSAM. By doing this GSAM is aligned with the guidance from the European regulator (ESMA).

GSAM annually requests information from third parties in order to be able to evaluate the services and information about the applied remuneration policy by the third party is included in this request. For more information about the remuneration policies of these third parties, please refer to: <https://www.gsam.com/responsible-investing/en-INT/professional/about/policies-and-governance> – Remuneration policy - Remuneration information delegates.

Global Exposure Calculation Method in Accordance with the Provisions of CSSF Circular 11/512

For all sub-funds, the commitment approach is used to monitor and measure the global exposure.

Portfolio Turnover Ratio

The Portfolio Turnover Ratio is an indicator of the relevance of the additional costs incurred by a fund when buying and selling investments according to its investment policy.

The Portfolio Turnover Ratio is calculated using the method described below:

$$\text{Turnover} = \frac{(\text{Total 1} - \text{Total 2})}{M} \times 100$$

Total 1 = Total securities transactions during the period = X + Y

X = purchases

Y = sales

Total 2 = Total capital transactions during the period = S + R

S = subscriptions

R = redemptions

M = Average Net Assets

The Portfolio Turnover Ratio is expressed as a percentage. The Portfolio Turnover calculation excludes the trades instructed into Goldman Sachs Funds VI which are linked to cash facility management.

As at 30 September 2023, the Portfolio Turnover Ratio is as follows:

Sub-funds	Portfolio Turnover Ratio (%)
Goldman Sachs Patrimonial Aggressive	33.80%
Goldman Sachs Patrimonial Balanced	30.87%
Goldman Sachs Patrimonial Defensive	32.15%
Goldman Sachs Patrimonial Balanced Europe Sustainable	72.75%

Ongoing Charges

The ongoing charges are calculated for the last twelve months. The ongoing charges are annualised for periods less than one year.

As at 30 September 2023, the Ongoing charges are as follows:

Sub-funds	Share classes	Ongoing charges (%)
Goldman Sachs Patrimonial Aggressive	Capitalisation I (EUR)	0.87
Goldman Sachs Patrimonial Aggressive	Capitalisation P (EUR)	1.49
Goldman Sachs Patrimonial Aggressive	Capitalisation R (EUR)	0.89
Goldman Sachs Patrimonial Aggressive	Capitalisation X (EUR)	2.29
Goldman Sachs Patrimonial Aggressive	Capitalisation X Hedged (i) (CZK)	2.31
Goldman Sachs Patrimonial Aggressive	Capitalisation Z (EUR)	0.25
Goldman Sachs Patrimonial Aggressive	Distribution P (EUR)	1.49
Goldman Sachs Patrimonial Aggressive	Distribution R (EUR)	0.89
Goldman Sachs Patrimonial Aggressive	Distribution X (EUR)	2.29
Goldman Sachs Patrimonial Balanced	Capitalisation I (EUR)	0.86
Goldman Sachs Patrimonial Balanced	Capitalisation P (EUR)	1.47
Goldman Sachs Patrimonial Balanced	Capitalisation R (EUR)	0.87
Goldman Sachs Patrimonial Balanced	Capitalisation X (EUR)	2.27
Goldman Sachs Patrimonial Balanced	Capitalisation Z (EUR)	0.35
Goldman Sachs Patrimonial Balanced	Distribution P (EUR)	1.47
Goldman Sachs Patrimonial Balanced	Distribution R (EUR)	0.87
Goldman Sachs Patrimonial Balanced	Distribution X (EUR)	2.27

Sub-funds	Share classes	Ongoing charges (%)
Goldman Sachs Patrimonial Defensive	Capitalisation I (EUR)	0.85
Goldman Sachs Patrimonial Defensive	Capitalisation P (EUR)	1.46
Goldman Sachs Patrimonial Defensive	Capitalisation P Hedged (i) (CZK)	1.48
Goldman Sachs Patrimonial Defensive	Capitalisation R (EUR)	0.86
Goldman Sachs Patrimonial Defensive	Capitalisation X (EUR)	2.26
Goldman Sachs Patrimonial Defensive	Capitalisation Z (EUR)	0.32
Goldman Sachs Patrimonial Defensive	Distribution P (EUR)	1.46
Goldman Sachs Patrimonial Defensive	Distribution R (EUR)	0.86
Goldman Sachs Patrimonial Defensive	Distribution X (EUR)	2.26
Goldman Sachs Patrimonial Balanced Europe Sustainable	Capitalisation I (EUR)	0.81
Goldman Sachs Patrimonial Balanced Europe Sustainable	Capitalisation N (EUR)	0.75
Goldman Sachs Patrimonial Balanced Europe Sustainable	Capitalisation P (EUR)	1.44
Goldman Sachs Patrimonial Balanced Europe Sustainable	Capitalisation P Hedged (ii) (EUR)	1.47
Goldman Sachs Patrimonial Balanced Europe Sustainable	Capitalisation R Hedged (ii) (EUR)	0.85
Goldman Sachs Patrimonial Balanced Europe Sustainable	Capitalisation X Hedged (i) (CZK)	2.27
Goldman Sachs Patrimonial Balanced Europe Sustainable	Capitalisation X Hedged (ii) (EUR)	2.27
Goldman Sachs Patrimonial Balanced Europe Sustainable	Distribution P (EUR)	1.45
Goldman Sachs Patrimonial Balanced Europe Sustainable	Distribution P Hedged (ii) (EUR)	1.47
Goldman Sachs Patrimonial Balanced Europe Sustainable	Distribution R Hedged (ii) (EUR)	0.87

Information to Shareholders

Under the Belgian Finance Act of December 22, 2003, that came into effect on January 1, 2004, a 0.06% yearly tax was applied on all money originating from Belgium included in the Company at December 31 of the prior year. This tax rate has been increased to 0.07% in 2005, to 0.08% in 2007, to 0.0965% in 2013 and decreased to 0.0925% from 2014 onwards.

The Company has lodged a complaint with the European Commission against the Belgian State for this tax to be recognized as contravening the Community law. That complaint has been rejected by the European Commission. Following another complaint introduced by the Company before the Belgian Courts, the Brussels Court of First Instance has delivered a positive judgement condemning the Belgian State to refund the amounts unduly paid. The Belgian State has, however, appealed against that decision. On November 29, 2018, the Court of Appeals of Brussel rendered its decision. The decision of the Court upheld the judgement of the Brussels Court of First Instance which had ordered the Belgian State to reimburse the Belgian yearly tax levied on the Luxembourg fund. The Belgian State has filed an appeal before the Belgian Supreme Court. On April 13, 2022 the decision of the Belgium Supreme Court was published: the Supreme Court annulled the Brussels' Court of Appeal positive decision, so basically denying a refund to claimants. The Liege Court of Appeal now has to take a final decision which is currently pending. We, as AIFM of the Fund, have provided additional arguments to the Court of Appeal.
