

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

### NN (L) Commodity Enhanced - N Cap EUR (hedged i)

ISIN: LU0800559196

A sub-fund (hereafter referred to as the fund) of NN (L)

This fund is managed by NN Investment Partners B.V.

### Objectives and Investment Policy

The fund provides diversified exposure to commodity sectors such as Energy, Agriculture, Industrial Metal, Precious Metals and Live Cattle. The fund uses active management with deviation limits maintained relative to the benchmark. Measured over a period of several years we aim to beat the performance of the benchmark Bloomberg Commodity (TR) (hedged to EUR). The benchmark is a broad representation of our investment universe. The fund also include investments into securities that are not part of the benchmark universe. Investors should be aware that the index's investment universe is concentrated and, as a result, the fund is concentrated. This will typically result in a comparable composition and return profile of the fund and its benchmark. The fund's positions to the individual commodities are approximately equal to those of the benchmark. However the end date of the commodity contracts may deviate from the contract dates of which the benchmark is composed. The reason for this is that the fund aims to minimize the "roll" loss, or maximize the "roll" return, with "roll" referring to renewing expiring commodity contracts. It also aims to benefit from holding earlier the futures contracts that passive

products and traditional indices will buy during the next period as well as from the relative price differences of certain commodities that are part of the same value chain. The positions are determined by a mathematical model built along two factors Carry and Flow. There are strict risk controls in place to limit the risk of the fund. The fund mainly invests in short term US treasuries and instruments that generate the performance of the commodities. The sub-fund's base currency is US dollar (USD) and the sub-fund can be exposed to non-US dollar currencies. By hedging this share class we aim to exchange the base currency of the sub-fund (USD) with the currency of this share class – Euro (EUR). The exposure towards non-EUR currencies in the sub-fund remains in this share class. A currency hedge consists of taking an offsetting position in another currency. You can sell your participation in this fund on each (working) day on which the value of the units is calculated, which for this fund occurs daily. The fund does not aim to provide you with a dividend. It will reinvest all earnings.

### Risk and Reward Profile

Lower risk - Typically lower rewards

Higher risk - Typically Higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this fund. There is no guarantee that the risk indicator will remain unchanged, it may shift over time. The lowest category of risk does not mean that the investment is riskfree.

This fund is in category 5 because of the behaviour of the product during the measuring period. The overall market risk, taking into account past performances and future potential evolution of the markets, associated with financial instruments used to reach the investment objective is considered high.

These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. Hedging share classes, a method to try to manage specific currency risk, may lead to additional credit risk and to residual market risk depending on the effectiveness of the hedging performed.

## Charges

All charges paid by the investor are used to pay the running costs of the fund, including the cost of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest:

Entry charge	0%
Exit charge	0%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from the fund over a year:

Ongoing charge	0.87%
----------------	-------

### Charges taken from the fund under certain specific conditions:

Performance fee	0%
-----------------	----

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 12/2021. This figure may vary from year to year.

It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the funds when buying or selling units in another collective investment undertaking.

You can find more detail about the charges in the chapter "Subscriptions, redemptions and conversions" and "Fees, expenses and taxation" of the prospectus which is available on our website <https://www.nnip.com/library>.

## Past Performance

- Performance in the past is not a reliable indicator of future results.
- The past performance shown here takes account of all charges and costs, excluding entry and exit costs and fund switching costs.
- This sub-fund was launched in 2010.
- This share class was launched in 2013.
- The past performance is calculated in EUR.

# Performance prior to the launch date has been simulated on the basis of the past performance of another, comparable share class of the fund.
