OBJECTIVES AND INVESTMENT POLICY

The fundamental investment objective of the fund is to provide significant long-term capital appreciation by investing primarily in a well-diversified portfolio of quality U.S. common stocks.

The fund pursues an active, conservative and long-term (five to ten years) investment policy, independent of any sector orientation or other restrictive methodologies and without reflecting benchmark weightings. The fund primarily invests in worldwide equities of listed companies with an emphasis on investments in the economic area of the USA.

Investors may demand to redeem their units every bank business day in Switzerland.

Reference currency is USD. There are no distributions. The net proceeds are retained in the fund or reinvested. The net income of the Fund will be added on an annual basis to the fund assets for reinvestment, subject to any taxes and duty charged on the reinvestment.

No derivative financial instruments are used and securities are not borrowed to any third party.

Transaction costs or fees for the purchase and sale of securities are charged to the fund. They are in addition to the fees described under "Charges" and reduce the fund's returns.

GUTZWILLER ONE is suitable for investors who have an investment horizon of at least five years.

RISK & REWARD PROFILE

This risk indicator is based on the historical value fluctuations of the fund. The past performance is not a reliable indicator of future performance. The lowest risk category does not mean "no risk".

GUTZWILLER ONE is assigned to category 6. The reason for this is the generally affiliated risk with equity investments, greater fluctuations in value and the specific investment focus of the fund.

The risk profile of GUTZWILLER ONE is not guaranteed. It is subject to fluctuations and may change over time. The fund offers neither a capital protection nor a capital guarantee.

Significant risks of this collective investment scheme:

GUTZWILLER ONE invests in liquid assets and markets only. However difficult or exceptional market conditions may lead to a limitation of the redemption possibilities of fund units.

GUTZWILLER ONE invests in USD. The fund's units are therefore also exposed to currency risk.

By avoiding the use of derivative financial instruments, the counterparty risk of GUTZWILLER ONE is limited.

The Custodian Bank may transfer the safekeeping of the fund assets to third-party custodians and collective securities depositories in Switzerland or abroad, provided this is in the interests of proper safekeeping. The associated risks are reduced by careful selection, instruction and supervision of the third parties.
