The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

Following weekly strategy of KBC AM

2.1.9. Summary risk indicator (SRI)

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

There is no capital protection.

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 12 217 444.44 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Defensive Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	165,560,124.73	66,397,496.42	231,957,621.15
Sales	190,955,757.56	86,568,511.57	277,524,269.13
Total 1	356,515,882.29	152,966,007.99	509,481,890.28
Subscriptions	29,647,140.67	19,561,478.32	49,208,618.99
Redemptions	51,792,520.76	39,155,959.74	90,948,480.50
Total 2	81,439,661.43	58,717,438.06	140,157,099.49
Monthly average of total assets	713,528,124.29	702,151,311.68	707.747.223.57
Turnover rate	38.55%	13.42%	52.18%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Turnover on the portfolio is as a result of weekly / adhoc changes to strategy in anticipation of, and response to, financial markets movements.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Comfort Portfolio Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 11,0279 net (15,7541 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering of the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
Horizon KBC Defensive Responsible Investing

Legal entity identifier:
5493002U4QB03PO8CC97

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: %</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: %</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 77.84% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments) by preferring issuers with a better ESG (risk)score;
- has promoted climate change mitigation by preferring issuers with lower carbon intensity, with the objective of meeting a predetermined carbon intensity target;
- has supported sustainable development by including issuers that contribute towards achieving the UN Sustainable Development Goals;
- has supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The specific objectives of the sub-fund can be found in the table under title 'How did the

sustainability indicators perform?' of this annex.

The sub-fund invested 77.84% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 20.49% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmarks MSCI All Countries World - Net Return Index en iBoxx Euro Corporate bonds Total Return Index are used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	10% better than the following benchmarks: MSCI All Countries World - Net Return Index and iBoxx Euro Corporate bonds Total Return Index.	18.8	17.72	Yes
Carbon Intensity	A reduction of 50% by 2030 based on the following benchmarks: MSCI All Countries World - Net Return Index and iBoxx Euro Corporate bonds Total Return Index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	116.5	47.55	Yes
Bonds financing green and/or social projects	A minimum of 10% of corporate bonds invested in should qualify as bonds financing green and/or social projects.	10	17.80	Yes
Instruments issued by governments, supranational debtors and/or agencies linked to governments				
ESG Score	10% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	0.77	0.82	Yes
Carbon Intensity	25% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	422.53	343.61	Yes
Bonds financing green and/or social projects	A minimum of 10% of the investments in bonds issued by governments, supranational debtors and/or agencies linked to governments should qualify as bonds financing green and/or social projects.	10	27.63	Yes
Minimum % Sustainable Investments	A minimum of 30% of sustainable investments.	30	77.84	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology. As of April 28, 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals were classified as "sustainable investments," which triggered a change in these objectives. The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the objectives and results achieved described in this chapter only reflect the situation at the end of sub-fund's financial year and, for this reason, are not a reliable indicator for future results.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the situation at the end of the financial year as shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

● **... and compared to previous periods?**

Sustainability indicators	Achieved result	Achieved result
	31/12/2022	31/12/2023
Instruments issued by companies		
ESG risk score		17.72
Carbon Intensity		47.55
Bonds financing green and/or social projects		17.80
Instruments issued by governments, supranational debtors and/or agencies linked to governments		
ESG Score		0.82
Carbon Intensity		343.61
Bonds financing green and/or social projects		27.63
Sustainable Investments	84.88	77.84

For both reporting periods, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2022 - 31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 77.84% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this chapter only reflect the situation at the end of the financial year of the sub-fund and, for that reason, are not a reliable indicator for future results.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a part of its portfolio in issuers that contribute to the UN Sustainable Development Goals (including both social and environmental objectives).

Instruments of companies that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals, were designated as 'sustainable investments'.

As of 28 April 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN Sustainable Development Goals, were also classified as "sustainable investments".

Governments were assessed on five pillars which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scored sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies were considered to be instruments that contribute to UN Sustainable Development Goals.

- The country is aligned with the ESG criteria: it has a score of at least 80 for one of the five pillars and does not score lower than 50 for any of the other pillars;
- The country is not excluded: it does not rank among the 50% most controversial regimes AND it does meet the criteria on respecting the sustainable principles AND it does not rank

among the 10% worst scoring countries of the universe.

Supranational government bonds were considered to contribute to the UN Sustainable Development Goals if either of the following criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst-scoring half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the 'sustainable development' label to instruments of companies and governments.

(2) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund invested a part of its portfolio in bonds financing green and/or social projects (that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds). Instruments that meet these requirements were labelled 'sustainable investments'. The percentage of the portfolio invested in bonds financing green and/or social projects can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of issuers from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded, and companies active in the palm oil industry are subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

How were the indicators for adverse impacts on sustainability factors taken into account?

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies that deviate significantly (score of -10) from any of the UN's first 15 Sustainable Development Goals (based on MSCI SDG Net Alignment Score), as well as companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

For investments in instruments issued by countries, the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account by excluding countries in the worst 10%

according to the ESG score model, and by excluding countries that do not comply with sustainability principles and are exposed to controversial regimes.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on carbon intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the carbon intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.
- **Indicator 15:** GHG intensity of investee countries was taken into account through the carbon intensity reduction target for sovereign related investments.
- **Indicator 16:** Investee countries subject to social violations was taken into account as the sub-fund did not invest in (i) Countries that do not comply with sustainability principles and (ii) countries exposed to controversial regimes. More information can be found in the exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV. As part of its commitment to responsible investment, KBC Asset Management NV exercised the voting rights of the shares it manages in accordance with its proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on the KBC Asset Management NV website.

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies. As part of its commitment to responsible investment, KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting. More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the greatest proportion of the financial product during the reference period which is:
01/01/2023-31/12/2023

Largest investments	Sector	% assets	Country
KBC Part. Corporate Bds Responsible Investing -ISB	Financial Services	13.54%	Belgium
KBC Renta Eurorenta Responsible Investing - ISB	Financial Services	12.48%	Luxembourg
KBC Bonds Strategic Broad 50/50 RI -ISB	Financial Services	12.47%	Luxembourg
KBC Bonds Strategic Broad 25/75 RI -ISB	Financial Services	12.46%	Luxembourg

What was the proportion of sustainability-related investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the year, the proportion of sustainable investments was 77.84%.

What was the asset allocation?

Asset allocation describes the

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar

share of investments in specific assets.

as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund KBC Defensive Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 98.33% in assets that promote environmental or social characteristics and 1.67% in other investments. The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Defensive Responsible Investing' of the prospectus.

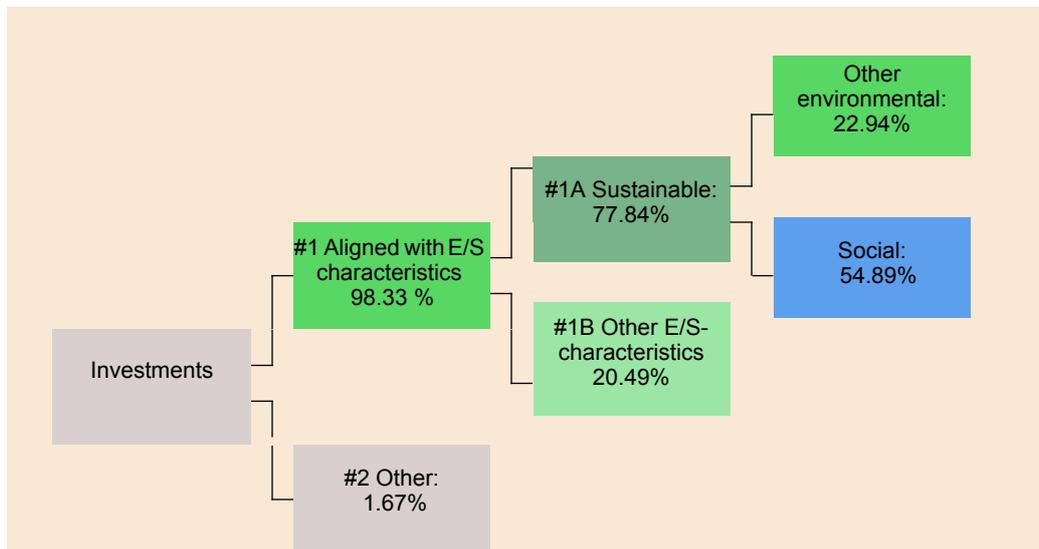

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

22.94% of the sustainable investments are environmentally sustainable investments and 54.89% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus investments in bonds that can be considered as bonds financing green and/or social projects, plus instruments that are considered "sustainable" by the Responsible Investing Advisory Board.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2023 the investments were made in the following sectors:

Sector	%Assets
National	27.87%
Banking	12.29%
Health Care	7.10%
Financial Services	6.36%
Software & Tech Services	6.18%
Materials	4.64%
Tech Hardware & Semiconductors	4.26%
Consumer Staple Products	3.62%
Telecommunications	3.32%
Insurance	3.27%
Retail & Wholesale - Discretionary	3.13%
Real Estate	3.13%
Media	3.04%
Supranationals	2.72%
Unclassifiable	2.17%
Utilities	2.03%
Consumer Discretionary Products	1.91%
Consumer Discretionary Services	1.29%
Industrial Services	0.59%
Industrial Products	0.43%
Retail & Wholesale - Staples	0.38%
Regional & Local	0.21%
Renewable Energy	0.04%
Not specified	0.02%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

However, an exception is provided in the exclusion policy for investments in green bonds of these companies, which promote the energy transition. Consequently, for the portion invested in green bonds, there may be exposure to these sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage invested in EU Taxonomy-aligned investments was set at 31 December 2023. KBC Asset Management NV determined that insufficient reliable, timely and verifiable data from issuers or investee companies were available at that time for consistent reporting, and this based on its own research and services from data suppliers. The percentage invested in investments aligned with the EU Taxonomy was therefore set at 0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?**

Yes:

In fossil gas

In nuclear energy

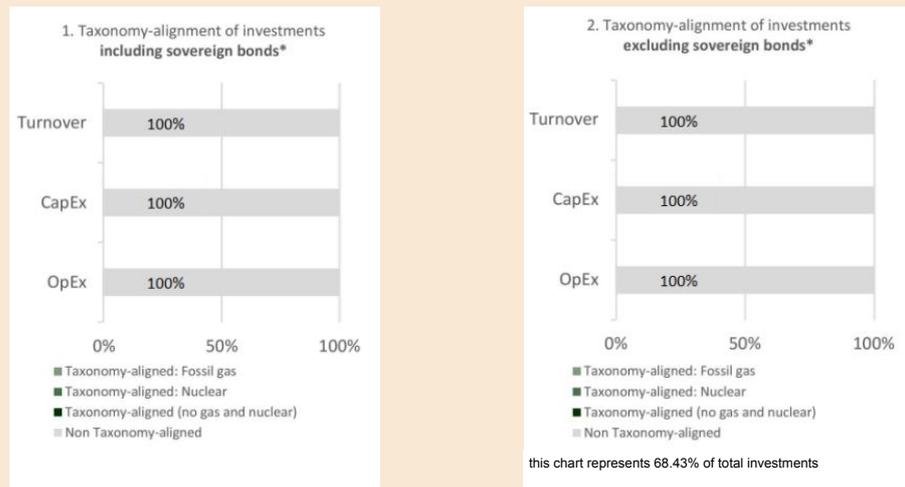

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy--alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The previous reference period (which ran from 1 January 2022 tot 31 December 2022) also reported 0% on EU taxonomy-aligned investments.

KBC Asset Management NV determined, based on its own research and services from data suppliers, that insufficient reliable, timely and verifiable data of issuers in which investments were made were available for the previous and current financial year. The percentage of investments aligned with the EU taxonomy was therefore set at 0% for both reference periods.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

The sub-fund invested 77.84% in sustainable investments as defined by art. 2.17 SFDR. At the end of the financial year of the sub-fund, the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 22.94%.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities

funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of socially sustainable investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the financial year of the sub-fund, the share of socially sustainable investments was 54.89%,

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

At the end of the financial year, the "not sustainable" category may include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Defensive Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under "#2 not sustainable", there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better ESG (risk)score;
- promoted climate change mitigation, by preferring issuers with lower Carbon Intensity, with the objective of meeting a predetermined carbon intensity target;
- supported sustainable development , by including issuers that contribute to the UN Sustainable Development Goals;
- supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The sub-fund excluded issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded, and companies active in the palm oil industry were subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) were excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement

initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmarks MSCI All Countries World - Net Return Index en iBoxx Euro Corporate bonds Total Return Index were used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

More information can be found in the table under the "How did the sustainability indicators perform" section of this annex.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund sets out to achieve the highest possible return by investing in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-view). To this end, the fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ('stock component'), bonds and/or bond-related investments ('bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

The target allocation for the asset classes is 30% for the stock component and 70% for the bond component. This allocation may be significantly deviated from in line with the investment view of KBC Asset Management, as illustrated below. Therefore, the sub-fund may invest a sizeable portion of its assets in asset classes that are not included in the target allocation (such as money market instruments and cash). The stock component can amount to a maximum of 45% of the sub-fund.

When applying KBC Asset Management NV's investment view, the managers base their investment decisions on the analysis of the financial and economic developments and prospects for specific regions, sectors and themes. If conditions on the financial markets are uncertain, volatile or both, part of the portfolio can also be converted into investments with a lower level of risk (such as money market instruments and cash). If the stock component outperforms the bond component, or vice versa, the managers can likewise use part of the portfolio to buy additional assets in the best-performing of these two classes and sell assets in the worst-performing one.

When applying KBC Asset Management NV's investment view, the managers pay one-and-a-half times as much attention to the downside risk as to the upside potential. The more attention that is paid to downside risk, the larger the portion of the portfolio that can be converted into investments with a lower level of risk, such as cash and money market instruments, in times of uncertain and/or volatile markets. This part of the portfolio will ultimately amount to between 5% and 40% of the assets. This limit is indicative and may be reviewed annually based on the long-term trend of the financial markets. Any change to this indicative limit does not imply a change in the strategy of the sub-fund. However, under certain market conditions, the sub-fund's assets will not be invested in these asset classes in accordance with the pre-set target allocation.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below. The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

The investment objective of the fund is to generate the highest possible return while adapting to changing market environments. The asset allocation adapts to these environments using a dynamic model, utilising three diversifying investment techniques. An Opportunities Inspiration that overweight's the best performing asset class, providing a momentum effect. A Protection Inspiration providing a floor protection technique and Long Term Inspiration, which provides a balanced asset allocation. The weight of each in the fund is dependent on the investor's risk and loss profile, while the asset allocation between more risky assets and less risky assets is determined by the aggregate result of the three inspirations. The suggested overall target allocation change daily. The allocation to Fixed Income at the beginning of 2023 was about 50% rising to 55% by the end of 2023, the allocation to Equity rose significantly from about 26% at the beginning of the year to 44% where it has mostly stayed during the second half of the year until the end; finally, Cash allocation has significantly fallen, from 23% of the beginning of 2023 to less than 1% at the end of the year. In 2023, the fund has returned approximately 7.45%.

2.1.8. Future policy

Future investment and the allocation to risky assets will be determined by the ExpertEase model.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG BGN: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Bulgarian Leva, there is a considerable chance that the value of an investment will be affected by movements in exchange rates
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG EUR: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Plus Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Prime Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.2. Balance sheet

Balance sheet layout		31/12/2023 (in Euro)	31/12/2022 (in Euro)
	TOTAL NET ASSETS	352,755,967.87	344,551,463.26

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Defensive Tolerant (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	163,880,857.94	36,855,995.05	200,736,853.00
Sales	175,367,696.93	51,662,952.17	227,030,649.09
Total 1	339,248,554.87	88,518,947.22	427,767,502.09
Subscriptions	7,160,213.51	5,818,070.31	12,978,283.83
Redemptions	13,165,047.34	15,737,383.55	28,902,430.89
Total 2	20,325,260.86	21,555,453.86	41,880,714.71
Monthly average of total assets	348,745,721.22	344,837,320.52	346,758,950.86
Turnover rate	91.45%	19.42%	111.28%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund targets change daily based on the Experteas model and realignment to target is carried out whenever current allocation deviates from targets by more than a pre-established threshold. Also, futures are used structurally and closed periodically triggering a full rebalance. Finally, turnover is also caused by the need to periodically reflect changes in the underlying bond/equity models composition and by the need to cover subscriptions and redemptions.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

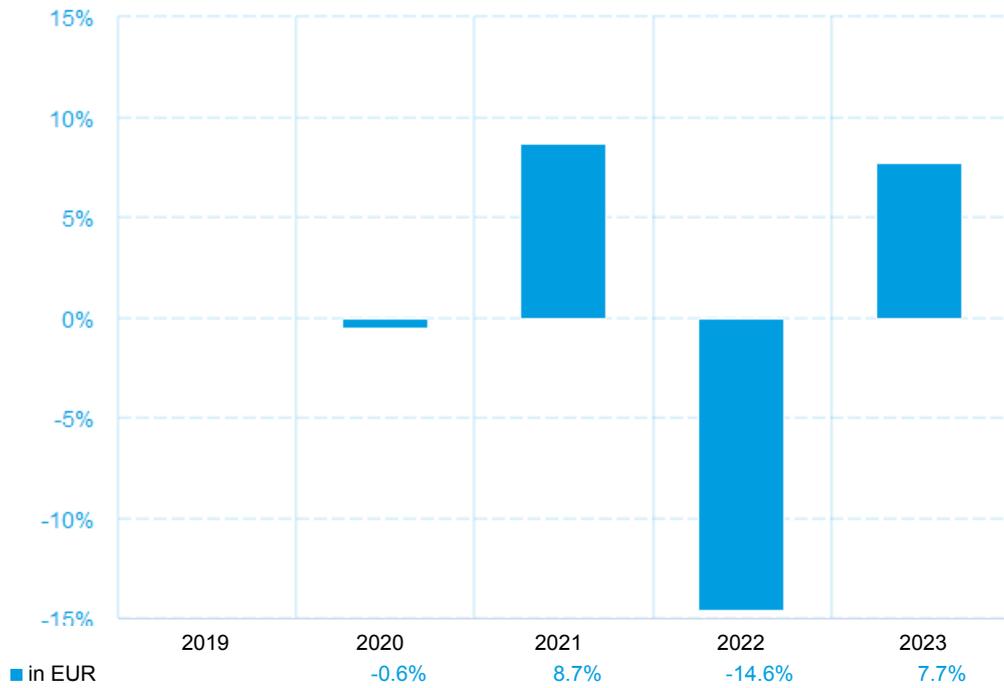

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 11,9319 net (17,0455 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund sets out to achieve the highest possible return by investing in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-view). To this end, the fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments (the 'equity component'), bonds and/or bond-related investments (the 'bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

The assets are assigned the following target allocation: 30% in the equity component and 70% in the bond component. The target allocation may be significantly deviated from in line with the investment view of KBC Asset Management NV, as explained below. Therefore, the fund may invest a sizeable portion of its assets in asset classes that are not included in the target allocation, such as money market instruments and cash. The equity component can amount to a maximum of 45% of the fund.

When applying KBC Asset Management NV's investment view, the management bases their investment decisions on the analysis of the financial and economic trends and prospects for specific regions, sectors and themes. If conditions on the financial markets are uncertain, volatile or both, part of the portfolio can also be converted into investments with a lower level of risk, such as money market instruments and cash. If the equity component outperforms the bond component, or vice versa, the managers can likewise use part of the portfolio to buy additional assets in the best-performing of these two classes and sell assets in the worst-performing one.

When applying the investment view of KBC Asset Management NV, the management pays one-and-a-half times as much attention to the downside risk as to the upside potential. The more attention that is paid to downside risk, the larger the portion of the portfolio that can be converted into investments with a lower level of risk, such as cash and money market instruments, in times of uncertain and/or volatile markets. This part of the portfolio will ultimately amount to between 5% and 40% of the assets. This limit is indicative and may be reviewed annually based on the long-term trend of the financial markets. Any change to this indicative limit does not imply a change in the strategy of the sub-fund.

However, under certain market conditions, the assets of the sub-fund will not be invested in cash or money market instruments in line with the predefined target allocation.

Within the above limits, the sub-fund pursues (directly or indirectly) responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The issuers in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for Horizon KBC Defensive Tolerant Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes issuers in advance from the Responsible Investment universe which fall foul of the exclusion policies available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that issuers involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that issuers who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better **ESG score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring issuers with lower **Carbon Intensity**, with the objective of meeting a predetermined carbon intensity target;
- (3) support sustainable development, by including issuers that contribute to the **UN Sustainable Development Goals** and

(4) support sustainable development by encouraging the transition to a more sustainable world via **bonds financing green and/or social projects**.

The sub-fund's targets are available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-score

The contribution to the integration of sustainability into policy decisions of the issuers is measured based on an ESG score. This score represents the aggregated performance assessment of a given entity against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- In the case of instruments issued by companies:
 - respect for the environment (e.g., reduction in greenhouse gas emissions);
 - attention to society (e.g., employee working conditions); and
 - corporate governance (e.g., independence and diversity of the board of directors).

The ESG score for companies is an ESG risk score supplied by a data provider.

- In the case of instruments issued by national governments, supranational debtors and/or agencies linked to governments, the following five pillars are used
 - overall economic performance and stability (e.g., quality of institutions and government);
 - socio-economic development and health of the population (e.g., education and employment);
 - equality, freedom and the rights of all citizens;
 - environmental policy (e.g., climate change); and
 - security, peace and international relations.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG score of the portfolio for companies is compared to a reference portfolio determined on the basis of the above-mentioned target spread

The ESG score for countries of the portfolio is compared to a reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).

More information on the ESG Score and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets can be revised upwards or downwards.

(2) Carbon Intensity

The objective to promote climate change mitigation, by favoring lower carbon intensity issuers, with the goal of meeting a predetermined carbon intensity target covers at least 90% of the portfolio. The objective does not apply to issuers for which data is not available.

The contribution of issuers to climate change mitigation is measured based on their carbon intensity. For companies, carbon intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD). For countries, it is defined as the greenhouse gas emissions (in tonnes CO₂ equivalent), divided by the Gross Domestic Product (in current prices, in mln USD).

The targets for instruments issued by companies are different from those for instruments issued by national governments, supranational debtors and/or government-linked agencies.

More information on Carbon Intensity and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to investing a minimum proportion of the portfolio in issuers that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives. Instruments of issuers that meet these requirements are designated as "sustainable investments," according to Article 2.17 of the SFDR.

Companies that contribute to the UN Sustainable Development Goals are defined as those that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals.

Governments are assessed on the five pillars as described in the ESG score, which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scores sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies are considered to be instruments that contribute to sustainable development. Bonds of supranational governments contribute to the UN's Sustainable development goals if one of the two criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. More information about this and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds .
The targets may be revised upwards or downwards.

(4) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund commits to invest a minimum proportion of the portfolio in bonds financing green and/or social projects. Bonds whose proceeds will be used exclusively to finance (a combination of) green and social projects that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds are considered bonds financing green and/or social projects. Instruments that meet these requirements are labelled 'sustainable investments', in line with article 2(17) SFDR.

More information on bonds financing green and/or social projects and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which an issuer can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible issuer based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets issued by issuers that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

Taxonomy related information

At the date of this prospectus, the sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. The percentage invested in environmentally sustainable activities within the meaning of the EU Taxonomy Framework at all times is 0%. The underlying investments of this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or investee companies is available and final regulatory technical standards are published providing more detailed guidance on the Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability disclosure in the financial services sector and on how Taxonomy information should be made public, the prospectus will be updated.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. The principal adverse impacts on sustainability factors that were taken into account through the exclusion policies can be found in the 'Annex for Horizon KBC Defensive Tolerant Responsible Investing'.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy. The principal adverse impacts on sustainability factors that were taken into account

through the Proxy Voting and Engagement Policy can be found in the 'Annex for Horizon KBC Defensive Tolerant Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for Horizon KBC Defensive Tolerant Responsible Investing'.

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

Following weekly strategy of KBC AM

2.1.9. Summary risk indicator (SRI)

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.

If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Defensive Tolerant Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	367,243,568.02	75,802,544.16	443,046,112.17
Sales	379,147,821.85	101,449,549.43	480,597,371.28
Total 1	746,391,389.86	177,252,093.59	923,643,483.46
Subscriptions	22,702,067.78	14,515,755.29	37,217,823.07
Redemptions	26,323,246.13	27,427,795.51	53,751,041.64
Total 2	49,025,313.91	41,943,550.80	90,968,864.71
Monthly average of total assets	744,656,862.21	747,608,882.12	746,157,472.33
Turnover rate	93.65%	18.10%	111.59%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Active asset management may result in high turnover rates (monthly percentage >50%), reason; Model driven funds that trade based on market movements in addition to regular strategy changes and subscriptions and redemptions.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

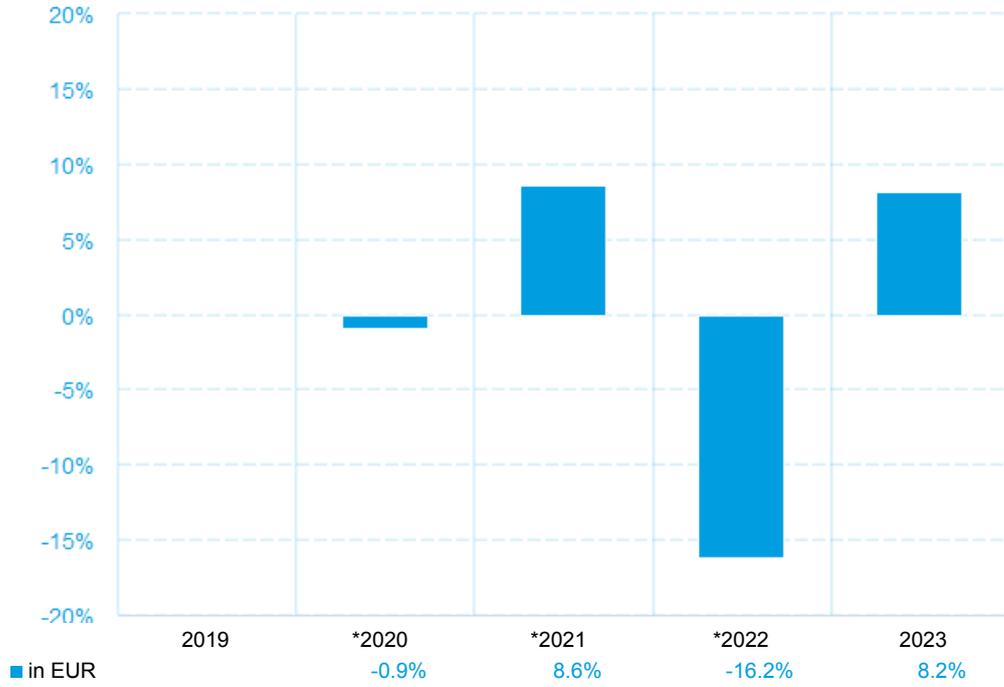

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 11,5028 net (16,4326 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
Horizon KBC Defensive Tolerant Responsible Investing

Legal entity identifier:
875500SARPACMWKSUY75

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: %</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: %</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.99% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments) by preferring issuers with a better ESG (risk)score;
- has promoted climate change mitigation by preferring issuers with lower carbon intensity, with the objective of meeting a predetermined carbon intensity target;
- has supported sustainable development by including issuers that contribute towards achieving the UN Sustainable Development Goals;
- has supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The specific objectives of the sub-fund can be found in the table under title 'How did the

sustainability indicators perform?' of this annex.

The sub-fund invested 76.99% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 21.17% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	10% better than the target allocation as described in the prospectus under the title 'information concerning the sub-fund KBC Defensive Tolerant Responsible Investing'.	18.80	17.99	Yes
Carbon Intensity	A reduction of 50% by 2030 compared to the target allocation described in the prospectus under the title 'information concerning the sub-fund KBC Defensive Tolerant Responsible Investing' at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	116.5	46.61	Yes
Bonds financing green and/or social projects	A minimum of 10% of corporate bonds invested in should qualify as bonds financing green and/or social projects.	10	17.69	Yes
Instruments issued by governments, supranational debtors and/or agencies linked to governments				
ESG Score	10% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	0.77	0.82	Yes
Carbon Intensity	25% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	422.53	343.61	Yes
Bonds financing green and/or social projects	A minimum of 10% of the investments in bonds issued by governments, supranational debtors and/or agencies linked to governments should qualify as bonds financing green and/or social projects.	10	27.08	Yes
Minimum % Sustainable Investments	A minimum of 30% of sustainable investments.	30	76.99	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology. As of April 28, 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals were classified as "sustainable investments," which triggered a change in these objectives. The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the objectives and results achieved described in this chapter only reflect the situation at the end of sub-fund's financial year and, for this reason, are not a reliable indicator for future results.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the situation at the end of the financial year as shown in the table above and

section 2.1.7 of the general annual report.
No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result
	31/12/2022	31/12/2023
Instruments issued by companies		
ESG risk score		17.99
Carbon Intensity		46.61
Bonds financing green and/or social projects		17.69
Instruments issued by governments, supranational debtors and/or agencies linked to governments		
ESG Score		0.82
Carbon Intensity		343.61
Bonds financing green and/or social projects		27.08
Sustainable Investments	80.82	76.99

For both reporting periods, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2022 - 31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 76.99% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this chapter only reflect the situation at the end of the financial year of the sub-fund and, for that reason, are not a reliable indicator for future results.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a part of its portfolio in issuers that contribute to the UN Sustainable Development Goals (including both social and environmental objectives).

Instruments of companies that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals, were designated as 'sustainable investments'.

As of 28 April 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN Sustainable Development Goals, were also classified as "sustainable investments".

Governments were assessed on five pillars which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scored sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies were considered to be instruments that contribute to UN Sustainable Development Goals.

- The country is aligned with the ESG criteria: it has a score of at least 80 for one of the five pillars and does not score lower than 50 for any of the other pillars;
- The country is not excluded: it does not rank among the 50% most controversial regimes AND it does meet the criteria on respecting the sustainable principles AND it does not rank among the 10% worst scoring countries of the universe.

Supranational government bonds were considered to contribute to the UN Sustainable

Development Goals if either of the following criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst-scoring half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the 'sustainable development' label to instruments of companies and governments.

(2) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund invested a part of its portfolio in bonds financing green and/or social projects (that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds). Instruments that meet these requirements were labelled 'sustainable investments'. The percentage of the portfolio invested in bonds financing green and/or social projects can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of issuers from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded, and companies active in the palm oil industry are subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

How were the indicators for adverse impacts on sustainability factors taken into account?

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies that deviate significantly (score of -10) from any of the UN's first 15 Sustainable Development Goals (based on MSCI SDG Net Alignment Score), as well as companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

For investments in instruments issued by countries, the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account by excluding countries in the worst 10% according to the ESG score model, and by excluding countries that do not comply with sustainability principles and are exposed to controversial regimes.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on carbon intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the carbon intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.
- **Indicator 15:** GHG intensity of investee countries was taken into account through the carbon intensity reduction target for sovereign related investments.
- **Indicator 16:** Investee countries subject to social violations was taken into account as the sub-fund did not invest in (i) Countries that do not comply with sustainability principles and (ii) countries exposed to controversial regimes. More information can be found in the exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV. As part of its commitment to responsible investment, KBC Asset Management NV exercised the voting rights of the shares it manages in accordance with its proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on the KBC Asset Management NV website.

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies. As part of its commitment to responsible investment, KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting. More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the greatest proportion of the financial product during the reference period which is:
01/01/2023-31/12/2023

What was the proportion of sustainability-related investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the year, the proportion of sustainable investments was 76.99%.

What was the asset allocation?

Asset allocation describes the

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar

share of investments in specific assets.

as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund KBC Defensive Tolerant Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 98.15% in assets that promote environmental or social characteristics and 1.85% in other investments. The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Defensive Tolerant Responsible Investing' of the prospectus.

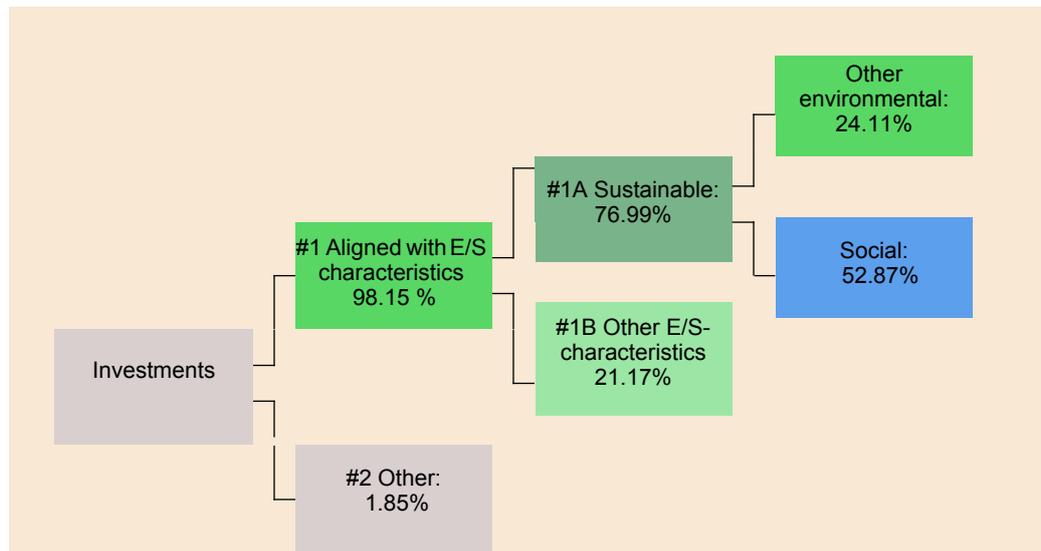

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

24.11% of the sustainable investments are environmentally sustainable investments and 52.87% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus investments in bonds that can be considered as bonds financing green and/or social projects, plus instruments that are considered "sustainable" by the Responsible Investing Advisory Board.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2023 the investments were made in the following sectors:

Sector	%Assets
National	21.52%
Banking	11.40%
Health Care	8.85%
Software & Tech Services	8.65%
Financial Services	7.52%
Tech Hardware & Semiconductors	6.55%
Consumer Staple Products	4.25%
Materials	3.97%
Retail & Wholesale - Discretionary	3.85%
Media	3.63%
Insurance	3.61%
Telecommunications	3.04%
Real Estate	2.96%
Consumer Discretionary Products	2.24%
Supranationals	2.06%
Utilities	1.70%
Consumer Discretionary Services	1.24%
Industrial Services	0.93%
Industrial Products	0.68%
Unclassifiable	0.66%
Retail & Wholesale - Staples	0.46%
Regional & Local	0.16%
Renewable Energy	0.04%
Not specified	0.03%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

However, an exception is provided in the exclusion policy for investments in green bonds of these companies, which promote the energy transition. Consequently, for the portion invested in green bonds, there may be exposure to these sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage invested in EU Taxonomy-aligned investments was set at 31 December 2023. KBC Asset Management NV determined that insufficient reliable, timely and verifiable data from issuers or investee companies were available at that time for consistent reporting, and this based on its own research and services from data suppliers. The percentage invested in investments aligned with the EU Taxonomy was therefore set at 0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

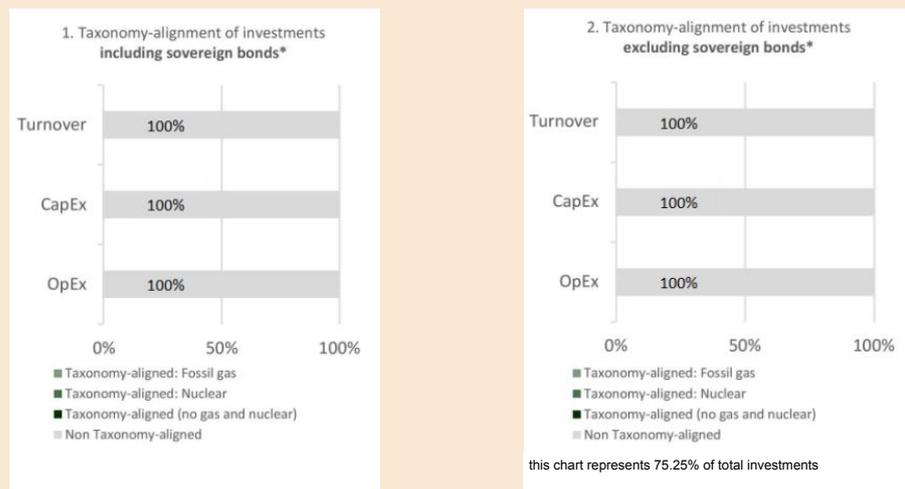

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy--alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The previous reference period (which ran from 1 January 2022 tot 31 December 2022) also reported 0% on EU taxonomy-aligned investments.

KBC Asset Management NV determined, based on its own research and services from data suppliers, that insufficient reliable, timely and verifiable data of issuers in which investments were made were available for the previous and current financial year. The percentage of investments aligned with the EU taxonomy was therefore set at 0% for both reference periods.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

The sub-fund invested 76.99% in sustainable investments as defined by art. 2.17 SFDR. At the end of the financial year of the sub-fund, the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 24.11%.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities

funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of socially sustainable investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the financial year of the sub-fund, the share of socially sustainable investments was 52.87%,

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

At the end of the financial year, the "not sustainable" category may include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Defensive Tolerant Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under "#2 not sustainable", there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better ESG (risk)score;
- promoted climate change mitigation, by preferring issuers with lower Carbon Intensity, with the objective of meeting a predetermined carbon intensity target;
- supported sustainable development , by including issuers that contribute to the UN Sustainable Development Goals;
- supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The sub-fund excluded issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded, and companies active in the palm oil industry were subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) were excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement

initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the described reference portfolio was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

More information can be found in the table under the "How did the sustainability indicators perform" section of this annex.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments, bonds and/or bond-related investments, money market instruments, cash and/or alternative investments (including real estate, and financial instruments that are linked to price movements on the commodity market,...).

The target allocation for the asset classes is 55% shares and/or share-related investments ('the stock component') and 45% bonds and/or bond-related investments ('the bond component').

The target allocation may be deviated from in line with the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy). It is therefore possible for the sub-fund to invest in asset classes that are not included in the target allocation. The portfolio is generally balanced between equities and bonds.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed with reference to the following benchmark: 55% MSCI All Countries World - Net Return Index, 22.5% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index, 22.5% iBoxx Euro Corporate bonds Total Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The long-term expected tracking error for this fund is 2.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM.

The position in KBC Renta Strategic Accents 1 represented more than 25% of the number of units outstanding of that sub-fund (33.41%).

In accordance with answer 4(a) of the European Securities and Markets Authority (ESMA) document 'Questions and Answers on the Application of the UCITS Directive', the management company shall assess a rebalancing of the investment portfolio in the best interests of investors, always with a normal prudent management of the investment portfolio in mind.

2.1.8. Future policy

The future investment policy of the fund will be determined by the KBCAM NV investment strategy in anticipation of, and response to, financial markets movements

2.1.9. Summary risk indicator (SRI)

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Classic Shares CSOB Private Banking: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an

- investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

Comfort Plus Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Prime Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 311 613 286.60 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Dynamic (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	979,477,100.72	567,409,111.46	1,546,886,212.19
Sales	1,026,297,876.95	647,014,403.34	1,673,312,280.29
Total 1	2,005,774,977.68	1,214,423,514.80	3,220,198,492.48
Subscriptions	95,080,782.93	78,228,852.14	173,309,635.07
Redemptions	143,707,161.39	139,092,407.03	282,799,568.42
Total 2	238,787,944.32	217,321,259.17	456,109,203.49
Monthly average of total assets	4,184,804,938.41	4,224,052,578.10	4,204,755,821.92
Turnover rate	42.22%	23.61%	65.74%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Turnover on the portfolio is as a result of weekly / adhoc changes to strategy in anticipation of, and response to, financial markets movements.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives

 Annual performance compared to the benchmark on 31/12/2023 (in EUR)

* These performances were achieved under circumstances that no longer apply

Comfort Portfolio Shares

BE6258739083
 Horizon KBC Dynamic Comfort Portfolio Shares DIS
 Annual performance compared to the benchmark on 31/12/2023 (in EUR)

There is insufficient data for this year to give investors a useful indication of past performance.

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Starting date	Share classes						
CAP	BE6258738077	EUR	10.54%	13.35%	2.08%	3.44%	3.90%	6.12%	3.55%	5.54%	11/12/2013	3.68%
DIS	BE6258739083	EUR	10.53%	13.35%	2.08%	3.44%	3.89%	6.12%			23/09/2015	2.95%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Comfort Portfolio Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

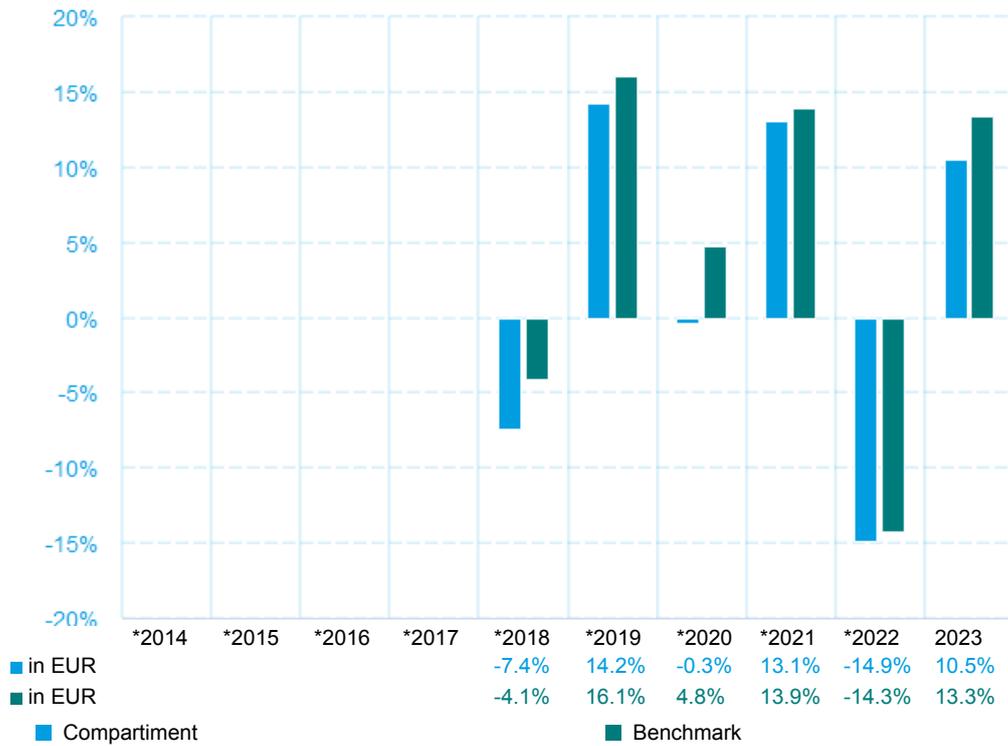

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 14,0988 net (20,1411 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering of the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund sets out to achieve the highest possible return by investing in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-view). To this end, the fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ('equity component'), bonds and/or bond-related investments ('bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

The target allocation for the asset classes is 55% for the equity component and 45% for the bond component.

This allocation may be significantly deviated from in line with the investment view of KBC Asset Management NV, as illustrated below.

Therefore, the sub-fund may invest a sizeable portion of its assets in asset classes that are not included in the target allocation (such as money market instruments and cash). The equity component can amount to maximum 70% of the sub-fund.

When applying KBC Asset Management NV's investment view, the management bases their investment decisions on the analysis of the financial and economic developments and prospects for specific regions, sectors and themes. If conditions on the financial markets are uncertain, volatile or both, part of the portfolio can also be converted into investments with a lower level of risk (such as money market instruments and cash). If the equity component outperforms the bond component, or vice versa, the managers can likewise use part of the portfolio to buy additional assets in the best-performing of these two classes and sell assets in the worst-performing one.

When applying the investment view of KBC Asset Management NV, the management pays twice as much attention to the downside risk as to the upside potential. The more attention that is paid to downside risk, the larger the portion of the portfolio that can be converted into investments with a lower level of risk, such as cash and money market instruments, in times of uncertain and/or volatile markets. This part of the portfolio will ultimately amount to between 25% and 65% of the assets. This limit is indicative and may be reviewed annually based on the long-term trend of the financial markets. Any change to this indicative limit does not imply a change in the strategy of the sub-fund. However, under certain market conditions, the sub-fund's assets will not be invested in these asset classes in accordance with the pre-set target allocation.

The equity component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Mutisignal ExpertEase strategy investing into KBC AM strategy funds

2.1.8. Future policy

Future investment and the allocation to risky assets will be determined by the ExpertEase model.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG BGN: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Bulgarian Leva, there is a considerable chance that the value of an investment will be affected by movements in exchange rates
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG EUR: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Plus Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Prime Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 108 381 324.30 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Dynamic Balanced (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	575,804,688.29	253,960,871.40	829,765,559.69
Sales	621,461,864.99	308,301,697.03	929,763,562.02
Total 1	1,197,266,553.28	562,262,568.43	1,759,529,121.71
Subscriptions	20,571,468.87	15,729,850.04	36,301,318.91
Redemptions	41,110,745.84	57,470,866.04	98,581,611.89
Total 2	61,682,214.71	73,200,716.09	134,882,930.80
Monthly average of total assets	1,371,102,438.63	1,369,421,126.16	1,370,247,771.45
Turnover rate	82.82%	35.71%	118.56%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund targets change daily based on the Experteas model and realignment to target is carried out whenever current allocation deviates from targets by more than a pre-established threshold. Also, futures are used structurally and closed periodically triggering a full rebalance. Finally, turnover is also caused by the need to periodically reflect changes in the underlying bond/equity models composition and by the need to cover subscriptions and redemptions.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.5. Performance figures

Classic Shares

Classic Shares

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Starting date	Share classes						
CAP	BE6290509593	EUR	8.50%		1.63%		2.19%				31/01/2017	0.82%
DIS	BE6290510609	EUR	8.50%		1.63%		2.18%				31/01/2017	0.82%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

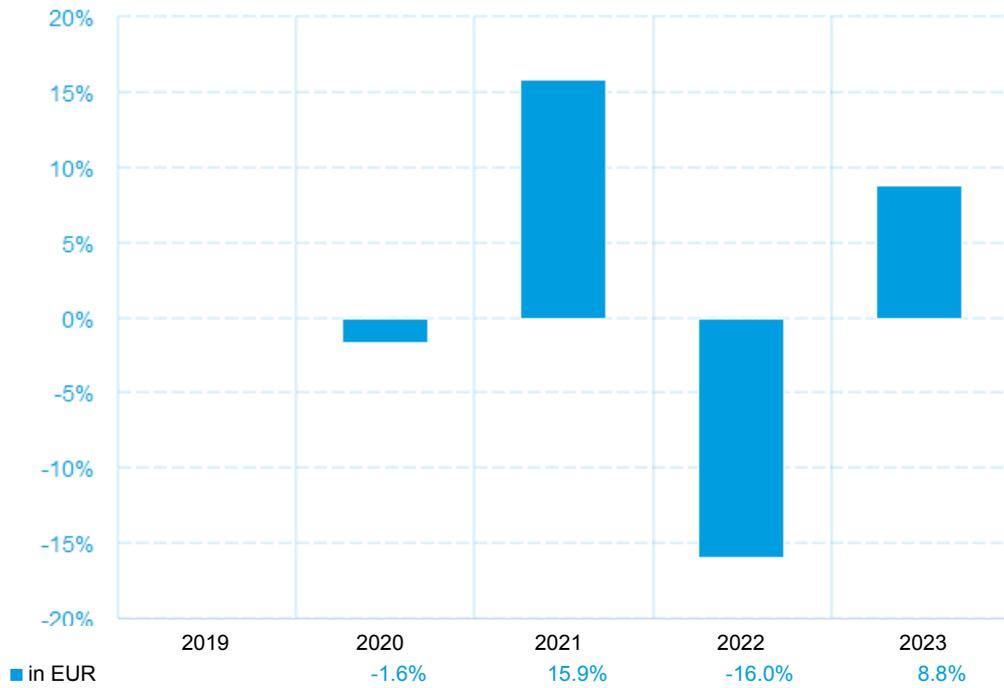

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 11,6328 net (16,6183 gross).

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Comfort Portfolio Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

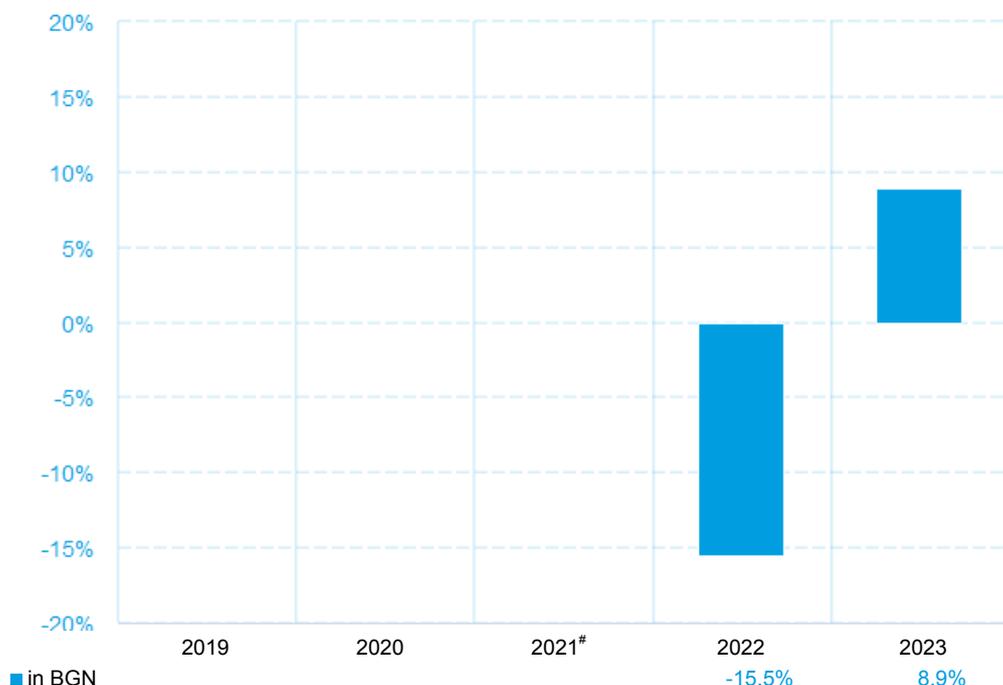

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 15,4972 net (22,1388 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The EURO STOXX 50® (Bloomberg code: SX5E Index) is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Horizon KBC Dynamic Balanced. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **FTSE 100** is an equity index computed by the Financial Times Ltd. The dividend is not reinvested. It comprises 100 shares. The FTSE 100 serves primarily as a continuous indicator of market trends on the UK stock market. The value of the FTSE 100 is based on the market value of the shares of 100 companies listed on the London Stock Exchange. These are the companies with the biggest market capitalisation, and the shares are weighted accordingly. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 3 January 1984.

The FTSE 100 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Financial Times Ltd has all proprietary rights with respect to the index. In no way Financial Times Ltd endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Financial Times Ltd disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **Nikkei 225** is an equity index computed by Nikkei, Inc. The dividend is not reinvested. It comprises 225 shares. The Nikkei 225 serves primarily as a continuous indicator of market trends on the Japanese stock market. The value of the Nikkei 225 is based on the market value of the shares of 225 companies. These are the 225 leading and most liquid shares on the first section of the Tokyo Stock Exchange. The index was launched on 16 May 1949, with a base value of 176.21.

The Nikkei 225 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Nikkei, Inc has all proprietary rights with respect to the index. In no way Nikkei, Inc endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Nikkei, Inc. disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund sets out to achieve the highest possible return by investing in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-view). To this end, the fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ('stock component'), bonds and/or bond-related investments ('bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

The target allocation for the asset classes is 55% for the stock component and 45% for the bond component.

This allocation may be significantly deviated from in line with the investment view of KBC Asset Management NV, as illustrated below.

Therefore, the sub-fund may invest a sizeable portion of its assets in asset classes that are not included in the target allocation (such as money market instruments and cash). The stock component may comprise up to 70% of the sub-fund.

When applying KBC Asset Management NV's investment view, the management bases their investment decisions on the analysis of the financial and economic developments and prospects for specific regions, sectors and themes. If conditions on the financial markets are uncertain, volatile or both, part of the portfolio may also be converted into investments with a lower level of risk (such as money market instruments and cash). If the stock component outperforms the bond component, or vice versa, the managers may likewise use part of the portfolio to buy additional assets in the best-performing of these two classes and sell assets in the worst-performing one.

When applying KBC Asset Management NV's investment view, the managers pay twice as much attention to the downside risk as to the upside potential. The more attention that is paid to downside risk, the larger the portion of the portfolio that may be converted into investments with a lower level of risk, such as cash and money market instruments, in times of uncertain and/or volatile markets. This part of the portfolio will ultimately amount to between 25% and 65% of the assets. This limit is indicative and may be reviewed annually based on the long-term trend of the financial markets. Any change to this indicative limit does not imply a change in the strategy of the sub-fund. However, under certain market conditions, the sub-fund's assets will not be invested in these asset classes in accordance with the pre-set target allocation.

Within the above limits, the sub-fund pursues (directly or indirectly) responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The issuers in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for Horizon KBC Dynamic Balanced Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes issuers in advance from the Responsible Investment universe which fall foul of the exclusion policies available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that issuers involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that issuers who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better **ESG score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring issuers with lower **Carbon Intensity**, with the objective of meeting a predetermined carbon intensity target;
- (3) support sustainable development, by including issuers that contribute to the **UN Sustainable Development Goals** and

(4) support sustainable development by encouraging the transition to a more sustainable world via **bonds financing green and/or social projects**.

The sub-fund's targets are available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-score

The contribution to the integration of sustainability into policy decisions of the issuers is measured based on an ESG score. This score represents the aggregated performance assessment of a given entity against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- In the case of instruments issued by companies:
 - respect for the environment (e.g., reduction in greenhouse gas emissions);
 - attention to society (e.g., employee working conditions); and
 - corporate governance (e.g., independence and diversity of the board of directors).

The ESG score for companies is an ESG risk score supplied by a data provider.

- In the case of instruments issued by national governments, supranational debtors and/or agencies linked to governments, the following five pillars are used
 - overall economic performance and stability (e.g., quality of institutions and government);
 - socio-economic development and health of the population (e.g., education and employment);
 - equality, freedom and the rights of all citizens;
 - environmental policy (e.g., climate change); and
 - security, peace and international relations.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG score of the portfolio for companies is compared to a reference portfolio determined on the basis of the above-mentioned target spread

The ESG score for countries of the portfolio is compared to a reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).

More information on the ESG Score and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets can be revised upwards or downwards.

(2) Carbon Intensity

The objective to promote climate change mitigation, by favoring lower carbon intensity issuers, with the goal of meeting a predetermined carbon intensity target covers at least 90% of the portfolio. The objective does not apply to issuers for which data is not available.

The contribution of issuers to climate change mitigation is measured based on their carbon intensity. For companies, carbon intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD). For countries, it is defined as the greenhouse gas emissions (in tonnes CO₂ equivalent), divided by the Gross Domestic Product (in current prices, in mln USD).

The targets for instruments issued by companies are different from those for instruments issued by national governments, supranational debtors and/or government-linked agencies.

More information on Carbon Intensity and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to investing a minimum proportion of the portfolio in issuers that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives. Instruments of issuers that meet these requirements are designated as "sustainable investments," according to Article 2.17 of the SFDR.

Companies that contribute to the UN Sustainable Development Goals are defined as those that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals.

Governments are assessed on the five pillars as described in the ESG score, which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scores sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies are considered to be instruments that contribute to sustainable development. Bonds of supranational governments contribute to the UN's Sustainable development goals if one of the two criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. More information about this and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds .
The targets may be revised upwards or downwards.

(4) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund commits to invest a minimum proportion of the portfolio in bonds financing green and/or social projects. Bonds whose proceeds will be used exclusively to finance (a combination of) green and social projects that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds are considered bonds financing green and/or social projects. Instruments that meet these requirements are labelled 'sustainable investments', in line with article 2(17) SFDR.

More information on bonds financing green and/or social projects and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which an issuer can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible issuer based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets issued by issuers that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

Taxonomy related information

At the date of this prospectus, the sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. The percentage invested in environmentally sustainable activities within the meaning of the EU Taxonomy Framework at all times is 0%. The underlying investments of this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or investee companies is available and final regulatory technical standards are published providing more detailed guidance on the Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability disclosure in the financial services sector and on how Taxonomy information should be made public, the prospectus will be updated.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. The principal adverse impacts on sustainability factors that were taken into account through the exclusion policies can be found in the 'Annex for Horizon KBC Dynamic Balanced Responsible Investing'.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy. The principal adverse impacts on sustainability factors that were taken into account

through the Proxy Voting and Engagement Policy can be found in the 'Annex for Horizon KBC Dynamic Balanced Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for Horizon KBC Dynamic Balanced Responsible Investing'.

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM.

In addition, note that this fund was involved in a merger during the previous reporting period.

2.1.8. Future policy

Following weekly strategy of KBC AM

2.1.9. Summary risk indicator (SRI)

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 124 700 909.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Dynamic Balanced Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	641,694,605.40	250,741,022.18	892,435,627.58
Sales	672,036,847.30	317,717,864.43	989,754,711.73
Total 1	1,313,731,452.70	568,458,886.61	1,882,190,339.31
Subscriptions	58,844,316.43	23,896,245.13	82,740,561.56
Redemptions	59,234,075.23	65,901,965.57	125,136,040.80
Total 2	118,078,391.66	89,798,210.70	207,876,602.36
Monthly average of total assets	1,471,800,495.30	1,506,154,734.30	1,489,263,900.12
Turnover rate	81.24%	31.78%	112.42%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Active asset management may result in high turnover rates (monthly percentage >50%), reason; Model driven funds that trade based on market movements in addition to regular strategy changes and subscriptions and redemptions.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.5. Performance figures

Classic Shares

* These performances were achieved under circumstances that no longer apply

Classic Shares

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Starting date	Share classes						
CAP	BE6290496460	EUR	9.38%		1.13%		2.05%				31/01/2017	0.74%
DIS	BE6290497476	EUR	9.31%		1.10%		2.02%				31/01/2017	0.73%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

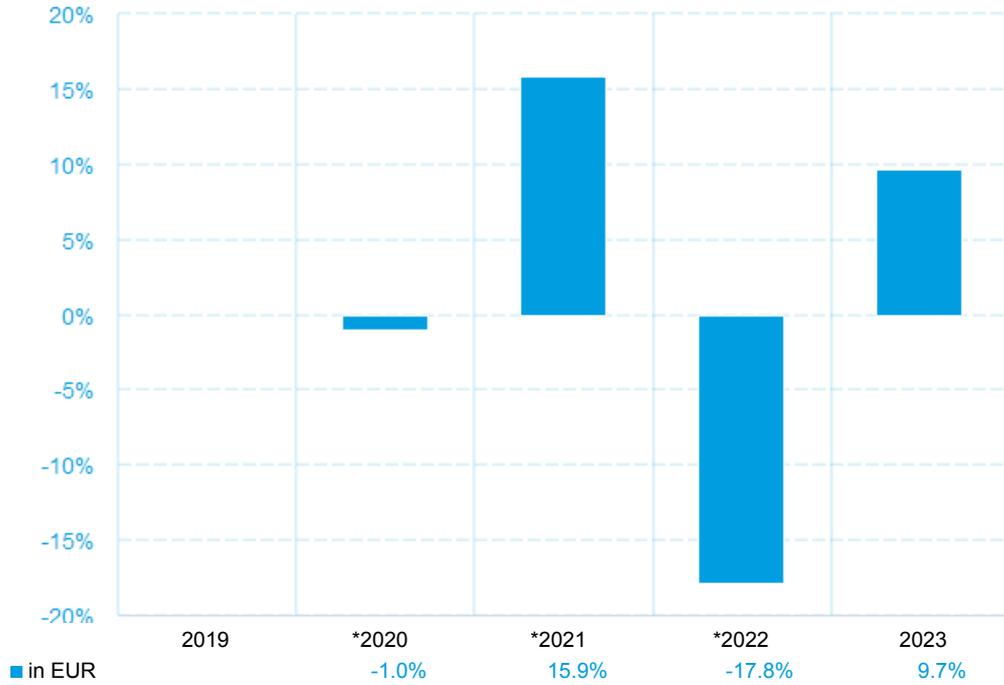

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 11,1826 net (15,9751 gross).

Percentage calculated at reporting date: 31 December 2023 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Fee for managing the investment portfolio

The management fee amounts to 19,881,001.03 EUR. An additional fee of 82,097.48 EUR was charged regarding commissions and charges for allocating the assets.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 52,97% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.69%	<p>per year calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,69% of .00% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The EURO STOXX 50® (Bloomberg code: SX5E Index) is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Horizon KBC Dynamic Balanced Responsible Investing. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **FTSE 100** is an equity index computed by the Financial Times Ltd. The dividend is not reinvested. It comprises 100 shares. The FTSE 100 serves primarily as a continuous indicator of market trends on the UK stock market. The value of the FTSE 100 is based on the market value of the shares of 100 companies listed on the London Stock Exchange. These are the companies with the biggest market capitalisation, and the shares are weighted accordingly. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 3 January 1984.

The FTSE 100 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Financial Times Ltd has all proprietary rights with respect to the index. In no way Financial Times Ltd endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Financial Times Ltd disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **Nikkei 225** is an equity index computed by Nikkei, Inc. The dividend is not reinvested. It comprises 225 shares. The Nikkei 225 serves primarily as a continuous indicator of market trends on the Japanese stock market. The value of the Nikkei 225 is based on the market value of the shares of 225 companies. These are the 225 leading and most liquid shares on the first section of the Tokyo Stock Exchange. The index was launched on 16 May 1949, with a base value of 176.21.

The Nikkei 225 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Nikkei, Inc has all proprietary rights with respect to the index. In no way Nikkei, Inc endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Nikkei, Inc. disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained

from the branches providing the financial service.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
Horizon KBC Dynamic Balanced Responsible Investing

Legal entity identifier:
549300WPWR26VZN0FC41

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76.59% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments) by preferring issuers with a better ESG (risk)score;
- has promoted climate change mitigation by preferring issuers with lower carbon intensity, with the objective of meeting a predetermined carbon intensity target;
- has supported sustainable development by including issuers that contribute towards achieving the UN Sustainable Development Goals;
- has supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The specific objectives of the sub-fund can be found in the table under title 'How did the

sustainability indicators perform?' of this annex.

The sub-fund invested 76.59% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 22.22% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	10% better than the target allocation as described in the prospectus under the title 'information concerning the sub-fund KBC Dynamic Balanced Responsible Investing'.	19.15	18.24	Yes
Carbon Intensity	A reduction of 50% by 2030 compared to the target allocation described in the prospectus under the title 'information concerning the sub-fund KBC Dynamic Balanced Responsible Investing' at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	117.66	45.79	Yes
Bonds financing green and/or social projects	A minimum of 10% of corporate bonds invested in should qualify as bonds financing green and/or social projects.	10	17.74	Yes
Instruments issued by governments, supranational debtors and/or agencies linked to governments				
ESG Score	10% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	0.77	0.82	Yes
Carbon Intensity	25% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	422.53	343.62	Yes
Bonds financing green and/or social projects	A minimum of 10% of the investments in bonds issued by governments, supranational debtors and/or agencies linked to governments should qualify as bonds financing green and/or social projects.	10	27.39	Yes
Minimum % Sustainable Investments	A minimum of 30% of sustainable investments.	30	76.59	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology. As of April 28, 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals were classified as "sustainable investments," which triggered a change in these objectives. The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the objectives and results achieved described in this chapter only reflect the situation at the end of sub-fund's financial year and, for this reason, are not a reliable indicator for future results.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the situation at the end of the financial year as shown in the table above and

section 2.1.7 of the general annual report.
No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result
	31/12/2022	31/12/2023
Instruments issued by companies		
ESG risk score		18.24
Carbon Intensity		45.79
Bonds financing green and/or social projects		17.74
Instruments issued by governments, supranational debtors and/or agencies linked to governments		
ESG Score		0.82
Carbon Intensity		343.62
Bonds financing green and/or social projects		27.39
Sustainable Investments	78.34	76.59

For both reporting periods, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2022 - 31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 76.59% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this chapter only reflect the situation at the end of the financial year of the sub-fund and, for that reason, are not a reliable indicator for future results.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a part of its portfolio in issuers that contribute to the UN Sustainable Development Goals (including both social and environmental objectives).

Instruments of companies that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals, were designated as 'sustainable investments'.

As of 28 April 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN Sustainable Development Goals, were also classified as "sustainable investments".

Governments were assessed on five pillars which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scored sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies were considered to be instruments that contribute to UN Sustainable Development Goals.

- The country is aligned with the ESG criteria: it has a score of at least 80 for one of the five pillars and does not score lower than 50 for any of the other pillars;
- The country is not excluded: it does not rank among the 50% most controversial regimes AND it does meet the criteria on respecting the sustainable principles AND it does not rank among the 10% worst scoring countries of the universe.

Supranational government bonds were considered to contribute to the UN Sustainable

Development Goals if either of the following criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst-scoring half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the 'sustainable development' label to instruments of companies and governments.

(2) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund invested a part of its portfolio in bonds financing green and/or social projects (that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds). Instruments that meet these requirements were labelled 'sustainable investments'. The percentage of the portfolio invested in bonds financing green and/or social projects can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of issuers from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded, and companies active in the palm oil industry are subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

How were the indicators for adverse impacts on sustainability factors taken into account?

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies that deviate significantly (score of -10) from any of the UN's first 15 Sustainable Development Goals (based on MSCI SDG Net Alignment Score), as well as companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

For investments in instruments issued by countries, the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account by excluding countries in the worst 10% according to the ESG score model, and by excluding countries that do not comply with sustainability principles and are exposed to controversial regimes.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on carbon intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the carbon intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.
- **Indicator 15:** GHG intensity of investee countries was taken into account through the carbon intensity reduction target for sovereign related investments.
- **Indicator 16:** Investee countries subject to social violations was taken into account as the sub-fund did not invest in (i) Countries that do not comply with sustainability principles and (ii) countries exposed to controversial regimes. More information can be found in the exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV. As part of its commitment to responsible investment, KBC Asset Management NV exercised the voting rights of the shares it manages in accordance with its proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on the KBC Asset Management NV website.

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies. As part of its commitment to responsible investment, KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting. More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
01/01/2023-31/12/2023

Largest investments	Sector	% assets	Country
KBC Equity Fund World Responsible Investing -ISB	Financial Services	11.81%	Belgium
KBC Eq Fd USA & Canada Responsible Investing -ISB	Financial Services	9.92%	Belgium
KBC Eq Fd North America Responsible Investing -ISB	Financial Services	9.92%	Belgium
KBC Eq F N.Am.Cont. Responsible Investing - ISB EUR	Financial Services	9.92%	Belgium
KBC Part. Corporate Bds Responsible Investing -ISB	Financial Services	6.95%	Belgium
KBC Bonds Strategic Broad 25/75 RI -ISB	Financial Services	6.40%	Luxembourg

What was the proportion of sustainability-related investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the year, the proportion of sustainable investments was 76.59%.

What was the asset allocation?

Asset allocation

The sub-fund could invest in securities, money market instruments, units in undertakings for

describes the share of investments in specific assets.

collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund KBC Dynamic Balanced Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 98.80% in assets that promote environmental or social characteristics and 1.20% in other investments. The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Dynamic Balanced Responsible Investing' of the prospectus.

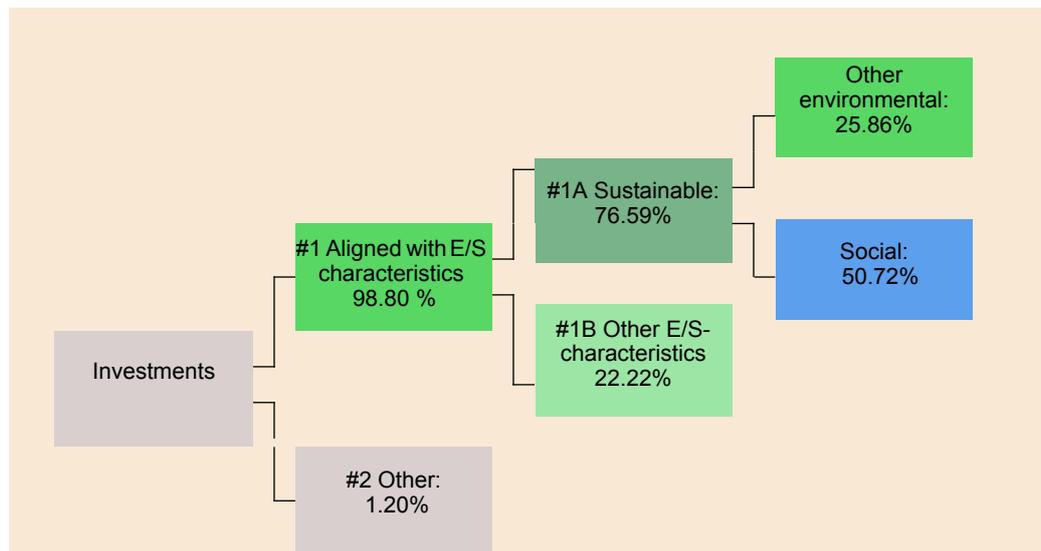

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

25.86% of the sustainable investments are environmentally sustainable investments and 50.72% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus investments in bonds that can be considered as bonds financing green and/or social projects, plus instruments that are considered "sustainable" by the Responsible Investing Advisory Board.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2023 the investments were made in the following sectors:

Sector	%Assets
Software & Tech Services	11.53%
National	11.19%
Health Care	10.96%
Banking	10.64%
Tech Hardware & Semiconductors	9.20%
Consumer Staple Products	5.03%
Unclassifiable	4.91%
Financial Services	4.80%
Retail & Wholesale - Discretionary	4.72%
Media	4.35%
Insurance	4.06%
Materials	3.32%
Real Estate	2.84%
Telecommunications	2.79%
Consumer Discretionary Products	2.65%
Utilities	1.39%
Supranationals	1.39%
Industrial Services	1.33%
Consumer Discretionary Services	1.22%
Industrial Products	0.97%
Retail & Wholesale - Staples	0.54%
Regional & Local	0.11%
Renewable Energy	0.05%
Not specified	0.01%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

However, an exception is provided in the exclusion policy for investments in green bonds of these companies, which promote the energy transition. Consequently, for the portion invested in green bonds, there may be exposure to these sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage invested in EU Taxonomy-aligned investments was set at 31 December 2023. KBC Asset Management NV determined that insufficient reliable, timely and verifiable data from issuers or investee companies were available at that time for consistent reporting, and this based on its own research and services from data suppliers. The percentage invested in investments aligned with the EU Taxonomy was therefore set at 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

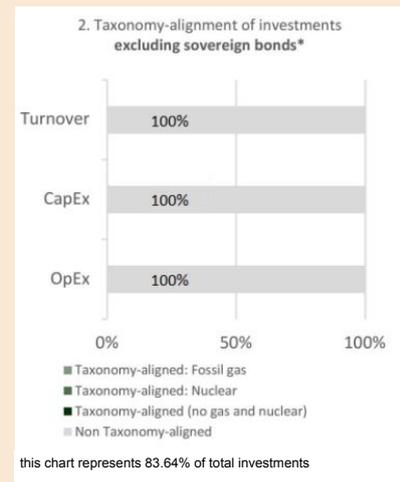

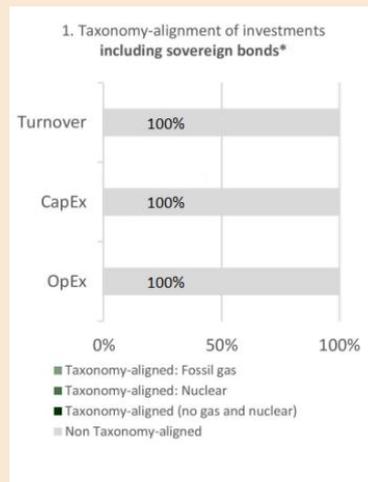

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy--alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The previous reference period (which ran from 1 January 2022 tot 31 December 2022) also reported 0% on EU taxonomy-aligned investments.

KBC Asset Management NV determined, based on its own research and services from data suppliers, that insufficient reliable, timely and verifiable data of issuers in which investments were made were available for the previous and current financial year. The percentage of investments aligned with the EU taxonomy was therefore set at 0% for both reference periods.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

The sub-fund invested 76.59% in sustainable investments as defined by art. 2.17 SFDR. At the end of the financial year of the sub-fund, the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 25.86%.

are sustainable investments with an environmental objective that do not take into account the criteria for

environmentally sustainable economic activities under Regulation (EU) 2020/852.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of socially sustainable investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the financial year of the sub-fund, the share of socially sustainable investments was 50.72%,

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

At the end of the financial year, the "not sustainable" category may include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Dynamic Balanced Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 not sustainable”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better ESG (risk)score;
- promoted climate change mitigation, by preferring issuers with lower Carbon Intensity, with the objective of meeting a predetermined carbon intensity target;
- supported sustainable development , by including issuers that contribute to the UN Sustainable Development Goals;
- supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The sub-fund excluded issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded, and companies active in the palm oil industry were subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) were excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund

according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the described reference portfolio was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

More information can be found in the table under the "How did the sustainability indicators perform" section of this annex.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund sets out to achieve the highest possible return by investing in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-strategy). To this end, the fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments (the 'equity component'), bonds and/or bond-related investments (the 'bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

When applying KBC Asset Management NV's investment strategy, the management bases their investment decisions on the analysis of the financial and economic developments and prospects for specific regions, sectors and themes.

The target allocation for the asset classes is 55% shares and/or share-related investments and 45% bonds and/or bond-related investments. The target allocation may be deviated from in line with the investment view of KBC Asset Management NV. It is therefore possible for the sub-fund to invest in asset classes that are not included in the target allocation. The portfolio is generally evenly allocated between shares and bonds.

Within the above limits, the sub-fund pursues (directly or indirectly) responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

This approach will be gradually implemented in the portfolio, starting 2 september 2022. KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The issuers in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for Horizon KBC Dynamic Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes issuers in advance from the Responsible Investment universe which fall foul of the exclusion policies available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that issuers involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that issuers who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better **ESG score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring issuers with lower **Carbon Intensity**, with the objective of meeting a predetermined carbon intensity target;
- (3) support sustainable development, by including issuers that contribute to the **UN Sustainable Development Goals** and
- (4) support sustainable development by encouraging the transition to a more sustainable world via **bonds financing green and/or social projects**.

The sub-fund's targets are available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-score

The contribution to the integration of sustainability into policy decisions of the issuers is measured based on an ESG score. This score represents the aggregated performance assessment of a given entity against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- In the case of instruments issued by companies:
 - respect for the environment (e.g., reduction in greenhouse gas emissions);
 - attention to society (e.g., employee working conditions); and
 - corporate governance (e.g., independence and diversity of the board of directors).

The ESG score for companies is an ESG risk score supplied by a data provider.

- In the case of instruments issued by national governments, supranational debtors and/or agencies linked to governments, the following five pillars are used
 - overall economic performance and stability (e.g., quality of institutions and government);
 - socio-economic development and health of the population (e.g., education and employment);
 - equality, freedom and the rights of all citizens;
 - environmental policy (e.g., climate change); and
 - security, peace and international relations.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG score of the portfolio for companies is compared to following benchmarks: MSCI All Countries World - Net Return Index en iBoxx Euro Corporate bonds Total Return Index.

The ESG score for countries of the portfolio is compared to a reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).

More information on the ESG Score and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets can be revised upwards or downwards.

(2) Carbon Intensity

The objective to promote climate change mitigation, by favoring lower carbon intensity issuers, with the goal of meeting a predetermined carbon intensity target covers at least 90% of the portfolio. The objective does not apply to issuers for which data is not available.

The contribution of issuers to climate change mitigation is measured based on their carbon intensity. For companies, carbon intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD). For countries, it is defined as the greenhouse gas emissions (in tonnes CO₂ equivalent), divided by the Gross Domestic Product (in current prices, in mln USD).

The targets for instruments issued by companies are different from those for instruments issued by national governments, supranational debtors and/or government-linked agencies.

More information on Carbon Intensity and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to investing a minimum proportion of the portfolio in issuers that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives. Instruments of issuers that meet these requirements are designated as "sustainable investments," according to Article 2.17 of the SFDR.

Companies that contribute to the UN Sustainable Development Goals are defined as those that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals.

Governments are assessed on the five pillars as described in the ESG score, which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scores sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies are considered to be instruments that contribute to sustainable development. Bonds of supranational governments contribute to the UN's Sustainable development goals if one of the two criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments.

More information about this and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds .

The targets may be revised upwards or downwards.

(4) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund commits to invest a minimum proportion of the portfolio in bonds financing green and/or social projects. Bonds whose proceeds will be used exclusively to finance (a combination of) green and social projects that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds are considered bonds financing green and/or social projects. Instruments that meet these requirements are labelled 'sustainable investments', in line with article 2(17) SFDR.

More information on bonds financing green and/or social projects and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which an issuer can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible issuer based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets issued by issuers that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed with reference to the following benchmark: 55% MSCI All Countries World - Net Return Index, 22.5% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index, 22.5% iBoxx Euro Corporate bonds Total Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 2.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. The percentage invested in environmentally sustainable activities within the meaning of the EU Taxonomy Framework at all times is 0%. The underlying investments of this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or investee companies is available and final regulatory technical standards are published providing more detailed guidance on the Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability disclosure in the financial services sector and on how Taxonomy information should be made public, the prospectus will be updated.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. The principal adverse impacts on sustainability factors that were taken into account through the exclusion policies can be found in the 'Annex for Horizon KBC Dynamic Responsible Investing'.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy. The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy can be found in the 'Annex for Horizon KBC Dynamic Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for Horizon KBC Dynamic Responsible Investing'.

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

2.1.9. Summary risk indicator (SRI)

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 77 449 871.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Dynamic Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	1,039,545,545.21	568,938,870.39	1,608,484,415.60
Sales	883,364,404.14	482,623,119.85	1,365,987,523.99
Total 1	1,922,909,949.35	1,051,561,990.24	2,974,471,939.59
Subscriptions	294,384,549.67	231,788,243.78	526,172,793.45
Redemptions	121,193,177.37	131,336,948.46	252,530,125.83
Total 2	415,577,727.04	363,125,192.24	778,702,919.28
Monthly average of total assets	4,076,064,593.94	4,303,699,825.70	4.191.779.170.08
Turnover rate	36.98%	16.00%	52.38%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Turnover on the portfolio is as a result of weekly / adhoc changes to strategy in anticipation of, and response to, financial markets movements.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

* Return on annual basis.

Comfort Portfolio Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes No

<input type="checkbox"/> It made sustainable investments with an environmental objective : %	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.35% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : %	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics but did not make any sustainable investments	

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments) by preferring issuers with a better ESG (risk)score;
- has promoted climate change mitigation by preferring issuers with lower carbon intensity, with the objective of meeting a predetermined carbon intensity target;
- has supported sustainable development by including issuers that contribute towards achieving the UN Sustainable Development Goals;
- has supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The specific objectives of the sub-fund can be found in the table under title 'How did the

sustainability indicators perform?' of this annex.

The sub-fund invested 76.35% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 21.55% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmarks MSCI All Countries World - Net Return Index en iBoxx Euro Corporate bonds Total Return Index are used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	10% better than the following benchmarks: MSCI All Countries World - Net Return Index and iBoxx Euro Corporate bonds Total Return Index.	19.15	18.12	Yes
Carbon Intensity	A reduction of 50% by 2030 based on the following benchmarks: MSCI All Countries World - Net Return Index and iBoxx Euro Corporate bonds Total Return Index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	117.66	46.19	Yes
Bonds financing green and/or social projects	A minimum of 10% of corporate bonds invested in should qualify as bonds financing green and/or social projects.	10	17.71	Yes
Instruments issued by governments, supranational debtors and/or agencies linked to governments				
ESG Score	10% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	0.77	0.82	Yes
Carbon Intensity	25% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	422.53	343.61	Yes
Bonds financing green and/or social projects	A minimum of 10% of the investments in bonds issued by governments, supranational debtors and/or agencies linked to governments should qualify as bonds financing green and/or social projects.	10	27.20	Yes
Minimum % Sustainable Investments	A minimum of 30% of sustainable investments.	30	76.35	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology. As of April 28, 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals were classified as "sustainable investments," which triggered a change in these objectives. The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the objectives and results achieved described in this chapter only reflect the situation at the end of sub-fund's financial year and, for this reason, are not a reliable indicator for future results.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the situation at the end of the financial year as shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result
	31/12/2022	31/12/2023
Instruments issued by companies		
ESG risk score		18.12
Carbon Intensity		46.19
Bonds financing green and/or social projects		17.71
Instruments issued by governments, supranational debtors and/or agencies linked to governments		
ESG Score		0.82
Carbon Intensity		343.61
Bonds financing green and/or social projects		27.20
Sustainable Investments	81.00	76.35

For both reporting periods, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2022 - 31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 76.35% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this chapter only reflect the situation at the end of the financial year of the sub-fund and, for that reason, are not a reliable indicator for future results.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a part of its portfolio in issuers that contribute to the UN Sustainable Development Goals (including both social and environmental objectives).

Instruments of companies that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals, were designated as 'sustainable investments'.

As of 28 April 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN Sustainable Development Goals, were also classified as "sustainable investments".

Governments were assessed on five pillars which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scored sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies were considered to be instruments that contribute to UN Sustainable Development Goals.

- The country is aligned with the ESG criteria: it has a score of at least 80 for one of the five pillars and does not score lower than 50 for any of the other pillars;
- The country is not excluded: it does not rank among the 50% most controversial regimes AND it does meet the criteria on respecting the sustainable principles AND it does not rank

among the 10% worst scoring countries of the universe.

Supranational government bonds were considered to contribute to the UN Sustainable Development Goals if either of the following criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst-scoring half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the 'sustainable development' label to instruments of companies and governments.

(2) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund invested a part of its portfolio in bonds financing green and/or social projects (that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds). Instruments that meet these requirements were labelled 'sustainable investments'. The percentage of the portfolio invested in bonds financing green and/or social projects can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of issuers from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded, and companies active in the palm oil industry are subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

How were the indicators for adverse impacts on sustainability factors taken into account?

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies that deviate significantly (score of -10) from any of the UN's first 15 Sustainable Development Goals (based on MSCI SDG Net Alignment Score), as well as companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

For investments in instruments issued by countries, the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account by excluding countries in the worst 10%

according to the ESG score model, and by excluding countries that do not comply with sustainability principles and are exposed to controversial regimes.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on carbon intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the carbon intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.
- **Indicator 15:** GHG intensity of investee countries was taken into account through the carbon intensity reduction target for sovereign related investments.
- **Indicator 16:** Investee countries subject to social violations was taken into account as the sub-fund did not invest in (i) Countries that do not comply with sustainability principles and (ii) countries exposed to controversial regimes. More information can be found in the exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV. As part of its commitment to responsible investment, KBC Asset Management NV exercised the voting rights of the shares it manages in accordance with its proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on the KBC Asset Management NV website.

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies. As part of its commitment to responsible investment, KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting. More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:
01/01/2023-31/12/2023

Largest investments	Sector	% assets	Country
KBC Equity Fund World Responsible Investing -ISB	Financial Services	9.99%	Belgium
KBC Part. Corporate Bds Responsible Investing -ISB	Financial Services	8.69%	Belgium
KBC Eq Fd North America Responsible Investing -ISB	Financial Services	8.39%	Belgium
KBC Eq Fd USA & Canada Responsible Investing -ISB	Financial Services	8.39%	Belgium
KBC Eq F N.Am.Cont. Responsible Investing -ISB EUR	Financial Services	8.39%	Belgium
KBC Renta Eurorenta Responsible Investing -ISB	Financial Services	8.01%	Luxembourg

What was the proportion of sustainability-related investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the year, the proportion of sustainable investments was 76.35%.

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund KBC Dynamic Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 97.91% in assets that promote environmental or social characteristics and 2.09% in other investments. The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Dynamic Responsible Investing' of the prospectus.

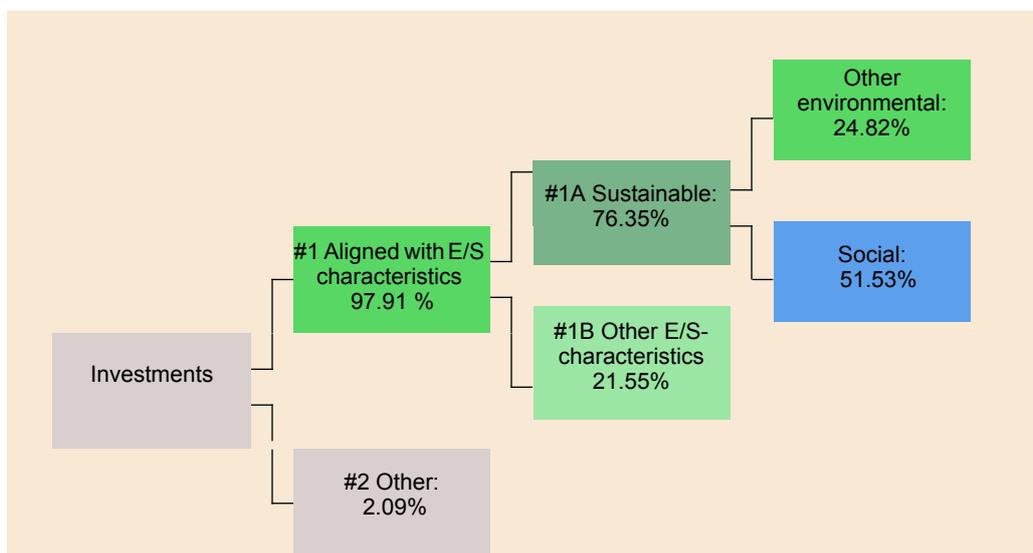

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

24.82% of the sustainable investments are environmentally sustainable investments and 51.53% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus investments in bonds that can be considered as bonds financing green and/or social projects, plus instruments that are considered "sustainable" by the Responsible Investing Advisory Board.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2023 the investments were made in the following sectors:

Sector	%Assets
National	17.96%
Banking	10.96%
Software & Tech Services	9.99%
Health Care	9.81%
Tech Hardware & Semiconductors	7.79%
Financial Services	5.71%
Consumer Staple Products	4.60%
Retail & Wholesale - Discretionary	4.24%
Media	3.96%
Insurance	3.80%
Materials	3.63%
Telecommunications	2.90%
Real Estate	2.89%
Consumer Discretionary Products	2.43%
Unclassifiable	2.20%
Supranationals	1.73%
Utilities	1.54%
Consumer Discretionary Services	1.23%
Industrial Services	1.12%
Industrial Products	0.81%
Retail & Wholesale - Staples	0.50%
Regional & Local	0.13%
Renewable Energy	0.05%
Not specified	0.02%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

However, an exception is provided in the exclusion policy for investments in green bonds of these companies, which promote the energy transition. Consequently, for the portion invested in green bonds, there may be exposure to these sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage invested in EU Taxonomy-aligned investments was set at 31 December 2023. KBC Asset Management NV determined that insufficient reliable, timely and verifiable data from issuers or investee companies were available at that time for consistent reporting, and this based on its own research and services from data suppliers. The percentage invested in investments aligned with the EU Taxonomy was therefore set at 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

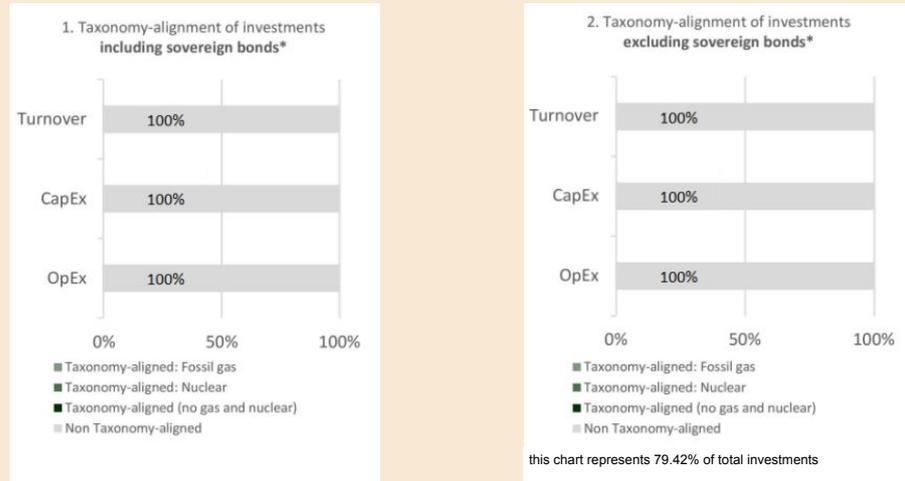

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The previous reference period (which ran from 1 January 2022 tot 31 December 2022) also reported 0% on EU taxonomy-aligned investments.

KBC Asset Management NV determined, based on its own research and services from data suppliers, that insufficient reliable, timely and verifiable data of issuers in which investments were made were available for the previous and current financial year. The percentage of investments aligned with the EU taxonomy was therefore set at 0% for both reference periods.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

The sub-fund invested 76.35% in sustainable investments as defined by art. 2.17 SFDR. At the end of the financial year of the sub-fund, the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 24.82%.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of socially sustainable investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

At the end of the financial year of the sub-fund, the share of socially sustainable investments was 51.53%,

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

At the end of the financial year, the "not sustainable" category may include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Dynamic Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 not sustainable”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better ESG (risk)score;
- promoted climate change mitigation, by preferring issuers with lower Carbon Intensity, with the objective of meeting a predetermined carbon intensity target;
- supported sustainable development , by including issuers that contribute to the UN Sustainable Development Goals;
- supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The sub-fund excluded issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded, and companies active in the palm oil industry were subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) were excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference

No reference benchmark has been designated for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by this sub-fund.

For investments issued by companies the benchmarks MSCI All Countries World - Net Return Index en iBoxx Euro Corporate bonds Total Return Index were used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

More information can be found in the table under the "How did the sustainability indicators perform" section of this annex.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund sets out to achieve the highest possible return by investing in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-view). To this end, the fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ('stock component'), bonds and/or bond-related investments ('bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

The target allocation for the asset classes is 55% for the stock component and 45% for the bond component. This allocation may be significantly deviated from in line with the investment view of KBC Asset Management, as illustrated below. Therefore, the sub-fund may invest a sizeable portion of its assets in asset classes that are not included in the target allocation (such as money market instruments and cash). The stock component can amount to a maximum of 70% of the sub-fund.

When applying KBC Asset Management NV's investment view, the management bases their investment decisions on the analysis of the financial and economic developments and prospects for specific regions, sectors and themes. If conditions on the financial markets are uncertain, volatile or both, part of the portfolio can also be converted into investments with a lower level of risk (such as money market instruments and cash). If the stock component outperforms the bond component, or vice versa, the managers can likewise use part of the portfolio to buy additional assets in the best-performing of these two classes and sell assets in the worst-performing one.

When applying the investment view of KBC Asset Management NV, the management pays one-and-a-half times as much attention to the downside risk as to the upside potential. The more attention that is paid to downside risk, the larger the portion of the portfolio that can be converted into investments with a lower level of risk, such as cash and money market instruments, in times of uncertain and/or volatile markets. This part of the portfolio will ultimately amount to between 5% and 35% of the assets. This limit is indicative and may be reviewed annually based on the long-term trend of the financial markets. Any change to this indicative limit does not imply a change in the strategy of the sub-fund. However, under certain market conditions, the sub-fund's assets will not be invested in these asset classes in accordance with the pre-set target allocation.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an

investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG BGN: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Bulgarian Leva, there is a considerable chance that the value of an investment will be affected by movements in exchange rates
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG EUR: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Plus Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by

movements in exchange rates.

- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Prime Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 27 843 906.19 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Geographic breakdown (as a % of securities portfolio)

The geographical distribution of the sub-fund's investments is calculated based on the geographical distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

Total 2	33,269,316.61	33,810,089.76	67,079,406.37
Monthly average of total assets	631,619,352.85	638,089,478.73	634.908.333.51
Turnover rate	126.76%	5.21%	131.34%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund targets change daily based on the Experteas model and realignment to target is carried out whenever current allocation deviates from targets by more than a pre-established threshold. Also, futures are used structurally and closed periodically triggering a full rebalance. Finally, turnover is also caused by the need to periodically reflect changes in the underlying bond/equity models composition and by the need to cover subscriptions and redemptions.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

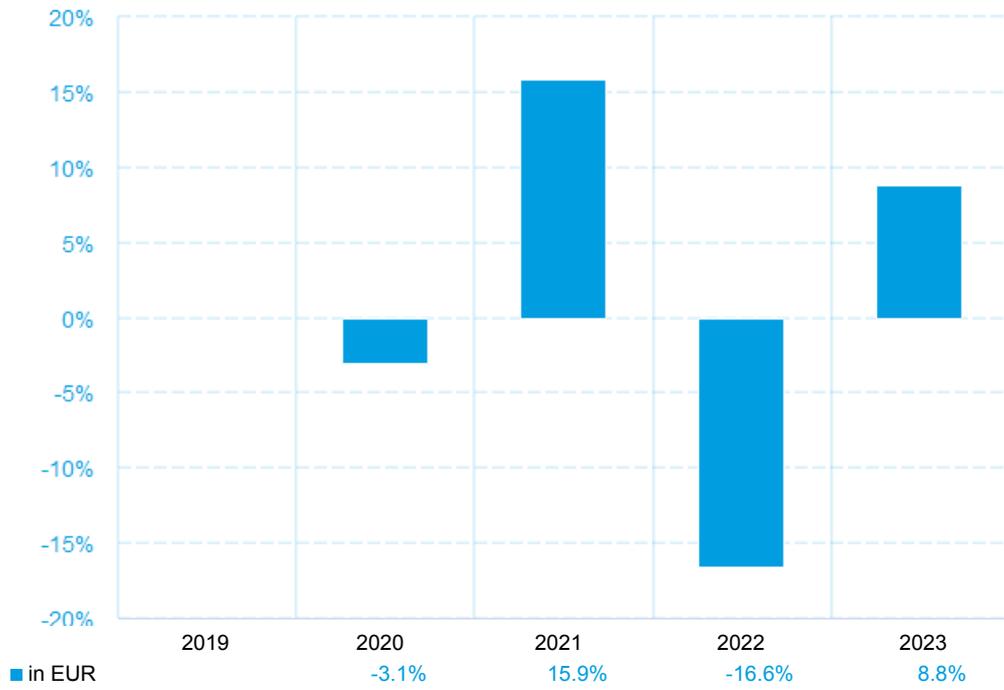

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 12,5187 net (17,8838 gross).

* Return on annual basis.

Comfort Portfolio Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

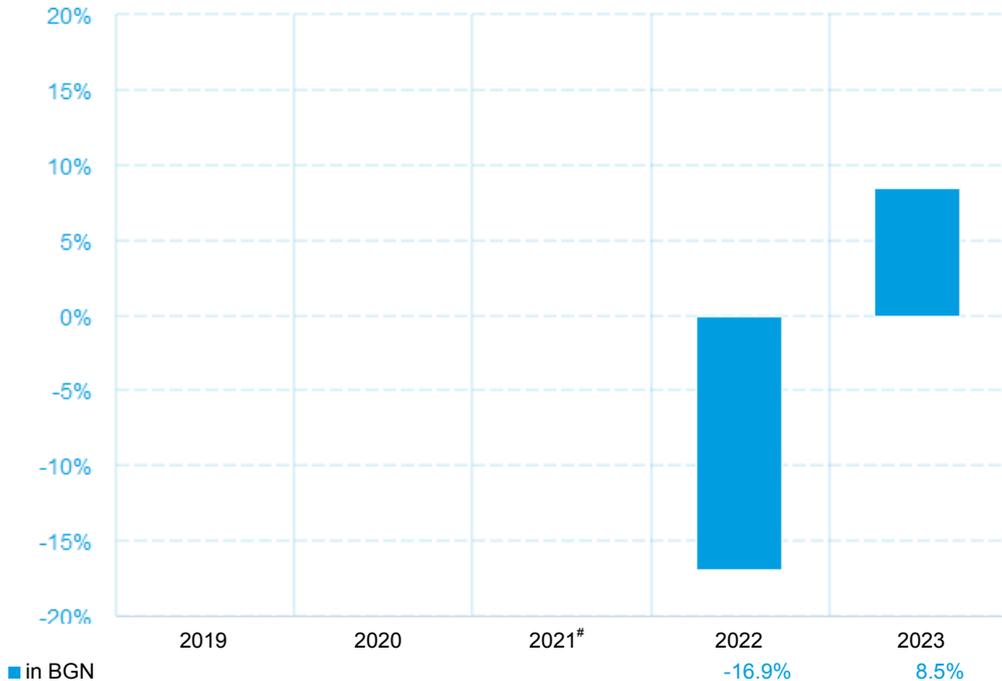

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 13,4489 net (19,2127 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The EURO STOXX 50® (Bloomberg code: SX5E Index) is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Horizon KBC Dynamic Tolerant. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund aims to achieve the highest possible return by making investments in accordance with the investment view of KBC Asset Management NV (see www.kbc.be/investment-view). To this end, the fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ('stock component'), bonds and/or bond-related investments ('bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

The target allocation for the asset classes is 55% for the stock component and 45% for the bond component. This allocation may be significantly deviated from in line with the investment view of KBC Asset Management, as illustrated below. Therefore, the sub-fund may invest a sizeable portion of its assets in asset classes that are not included in the target allocation (such as money market instruments and cash). The stock component can amount to a maximum of 70% of the sub-fund.

When applying KBC Asset Management NV's investment view, the management bases their investment decisions on the analysis of the financial and economic developments and prospects for specific regions, sectors and themes. If conditions on the financial markets are uncertain, volatile or both, part of the portfolio can also be converted into investments with a lower level of risk (such as money market instruments and cash). If the stock component outperforms the bond component, or vice versa, the managers can likewise use part of the portfolio to buy additional assets in the best-performing of these two classes and sell assets in the worst-performing one.

When applying the investment view of KBC Asset Management NV, the management pays one-and-a-half times as much attention to the downside risk as to the upside potential. The more attention that is paid to downside risk, the larger the portion of the portfolio that can be converted into investments with a lower level of risk, such as cash and money market instruments, in times of uncertain and/or volatile markets. This part of the portfolio will ultimately amount to between 5% and 35% of the assets. This limit is indicative and may be reviewed annually based on the long-term trend of the financial markets. Any change to this indicative limit does not imply a change in the strategy of the sub-fund. However, under certain market conditions, the sub-fund's assets will not be invested in these asset classes in accordance with the pre-set target allocation.

Within the above limits, the sub-fund pursues (directly or indirectly) responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The issuers in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for Horizon KBC Dynamic Tolerant Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes issuers in advance from the Responsible Investment universe which fall foul of the exclusion policies available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that issuers involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that issuers who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better **ESG score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring issuers with lower **Carbon Intensity**, with the objective of meeting a predetermined carbon intensity target;
- (3) support sustainable development, by including issuers that contribute to the **UN Sustainable Development Goals** and
- (4) support sustainable development by encouraging the transition to a more sustainable world via **bonds financing**

green and/or social projects.

The sub-fund's targets are available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-score

The contribution to the integration of sustainability into policy decisions of the issuers is measured based on an ESG score. This score represents the aggregated performance assessment of a given entity against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- In the case of instruments issued by companies:
 - respect for the environment (e.g., reduction in greenhouse gas emissions);
 - attention to society (e.g., employee working conditions); and
 - corporate governance (e.g., independence and diversity of the board of directors).

The ESG score for companies is an ESG risk score supplied by a data provider.

- In the case of instruments issued by national governments, supranational debtors and/or agencies linked to governments, the following five pillars are used
 - overall economic performance and stability (e.g., quality of institutions and government);
 - socio-economic development and health of the population (e.g., education and employment);
 - equality, freedom and the rights of all citizens;
 - environmental policy (e.g., climate change); and
 - security, peace and international relations.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG score of the portfolio for companies is compared to a reference portfolio determined on the basis of the above-mentioned target spread

The ESG score for countries of the portfolio is compared to a reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).

More information on the ESG Score and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets can be revised upwards or downwards.

(2) Carbon Intensity

The objective to promote climate change mitigation, by favoring lower carbon intensity issuers, with the goal of meeting a predetermined carbon intensity target covers at least 90% of the portfolio. The objective does not apply to issuers for which data is not available.

The contribution of issuers to climate change mitigation is measured based on their carbon intensity. For companies, carbon intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD). For countries, it is defined as the greenhouse gas emissions (in tonnes CO₂ equivalent), divided by the Gross Domestic Product (in current prices, in mln USD).

The targets for instruments issued by companies are different from those for instruments issued by national governments, supranational debtors and/or government-linked agencies.

More information on Carbon Intensity and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to investing a minimum proportion of the portfolio in issuers that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives. Instruments of issuers that meet these requirements are designated as "sustainable investments," according to Article 2.17 of the SFDR.

Companies that contribute to the UN Sustainable Development Goals are defined as those that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals.

Governments are assessed on the five pillars as described in the ESG score, which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scores sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies are considered to be instruments that contribute to sustainable development. Bonds of supranational governments contribute to the UN's Sustainable development goals if one of the two criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments.

More information about this and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds .

The targets may be revised upwards or downwards.

(4) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund commits to invest a minimum proportion of the portfolio in bonds financing green and/or social projects. Bonds whose proceeds will be used exclusively to finance (a combination of) green and social projects that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds are considered bonds financing green and/or social projects. Instruments that meet these requirements are labelled 'sustainable investments', in line with article 2(17) SFDR.

More information on bonds financing green and/or social projects and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which an issuer can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible issuer based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets issued by issuers that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

Taxonomy related information

At the date of this prospectus, the sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. The percentage invested in environmentally sustainable activities within the meaning of the EU Taxonomy Framework at all times is 0%. The underlying investments of this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or investee companies is available and final regulatory technical standards are published providing more detailed guidance on the Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability disclosure in the financial services sector and on how Taxonomy information should be made public, the prospectus will be updated.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. The principal adverse impacts on sustainability factors that were taken into account through the exclusion policies can be found in the 'Annex for Horizon KBC Dynamic Tolerant Responsible Investing'.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy. The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy can be found in the 'Annex for Horizon KBC Dynamic Tolerant

Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for Horizon KBC Dynamic Tolerant Responsible Investing'.

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

2.1.9. Summary risk indicator (SRI)

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 80 911 685.66 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Dynamic Tolerant Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	1,023,218,527.93	33,708,032.15	1,056,926,560.09
Sales	1,008,774,968.15	56,211,451.61	1,064,986,419.77
Total 1	2,031,993,496.08	89,919,483.77	2,121,912,979.85
Subscriptions	74,529,978.86	43,167,492.71	117,697,471.57
Redemptions	33,117,109.76	43,071,350.87	76,188,460.63
Total 2	107,647,088.62	86,238,843.58	193,885,932.20
Monthly average of total assets	1,504,746,796.42	1,557,213,972.47	1.531.417.610.91
Turnover rate	127.89%	0.24%	125.90%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Active asset management may result in high turnover rates (monthly percentage >50%), reason; Model driven funds that trade based on market movements in addition to regular strategy changes and subscriptions and redemptions.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.5. Performance figures

Classic Shares

* These performances were achieved under circumstances that no longer apply

Classic Shares

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Starting date	Share classes						
CAP	BE6307334068	EUR	9.42%		0.70%						01/02/2019	1.24%
DIS	BE6307335073	EUR	9.41%		0.70%						01/02/2019	1.24%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

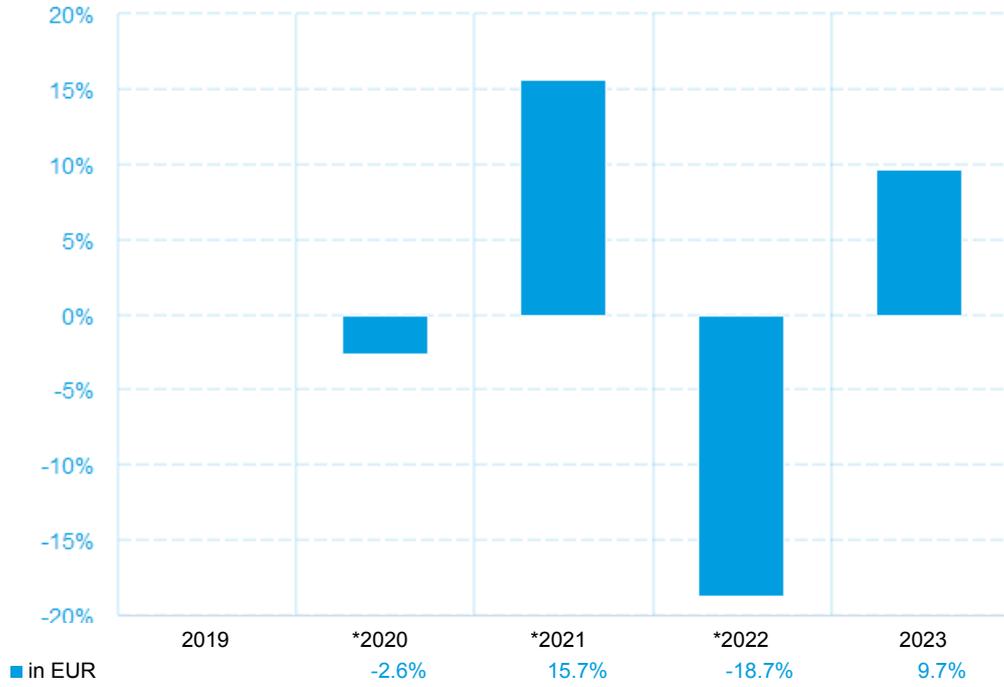

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 11,8090 net (16,8700 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The EURO STOXX 50® (Bloomberg code: SX5E Index) is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering of the shares of Horizon KBC Dynamic Tolerant Responsible Investing. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **FTSE 100** is an equity index computed by the Financial Times Ltd. The dividend is not reinvested. It comprises 100 shares. The FTSE 100 serves primarily as a continuous indicator of market trends on the UK stock market. The value of the FTSE 100 is based on the market value of the shares of 100 companies listed on the London Stock Exchange. These are the companies with the biggest market capitalisation, and the shares are weighted accordingly. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 3 January 1984.

The FTSE 100 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Financial Times Ltd has all proprietary rights with respect to the index. In no way Financial Times Ltd endorses, sponsors or is otherwise involved in the issue and offering of the shares of this undertaking for collective investment. Financial Times Ltd disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **Nikkei 225** is an equity index computed by Nikkei, Inc. The dividend is not reinvested. It comprises 225 shares. The Nikkei 225 serves primarily as a continuous indicator of market trends on the Japanese stock market. The value of the Nikkei 225 is based on the market value of the shares of 225 companies. These are the 225 leading and most liquid shares on the first section of the Tokyo Stock Exchange. The index was launched on 16 May 1949, with a base value of 176.21.

The Nikkei 225 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Nikkei, Inc has all proprietary rights with respect to the index. In no way Nikkei, Inc endorses, sponsors or is otherwise involved in the issue and offering of the shares of this undertaking for collective investment. Nikkei, Inc. disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering of the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained

from the branches providing the financial service.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
Horizon KBC Dynamic Tolerant Responsible Investing

Legal entity identifier:
875500QSHY9YXRJHD353

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes No

<input type="checkbox"/> It made sustainable investments with an environmental objective : %	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.69% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : %	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics but did not make any sustainable investments	

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments) by preferring issuers with a better ESG (risk)score;
- has promoted climate change mitigation by preferring issuers with lower carbon intensity, with the objective of meeting a predetermined carbon intensity target;
- has supported sustainable development by including issuers that contribute towards achieving the UN Sustainable Development Goals;
- has supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The specific objectives of the sub-fund can be found in the table under title 'How did the

sustainability indicators perform?' of this annex.

The sub-fund invested 76.69% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 22.39% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	10% better than the target allocation as described in the prospectus under the title 'information concerning the sub-fund KBC Dynamic Tolerant Responsible Investing'.	19.15	18.27	Yes
Carbon Intensity	A reduction of 50% by 2030 compared to the target allocation described in the prospectus under the title 'information concerning the sub-fund KBC Dynamic Tolerant Responsible Investing' at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	117.66	45.69	Yes
Bonds financing green and/or social projects	A minimum of 10% of corporate bonds invested in should qualify as bonds financing green and/or social projects.	10	17.73	Yes
Instruments issued by governments, supranational debtors and/or agencies linked to governments				
ESG Score	10% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	0.77	0.82	Yes
Carbon Intensity	25% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	422.53	343.61	Yes
Bonds financing green and/or social projects	A minimum of 10% of the investments in bonds issued by governments, supranational debtors and/or agencies linked to governments should qualify as bonds financing green and/or social projects.	10	27.28	Yes
Minimum % Sustainable Investments	A minimum of 30% of sustainable investments.	30	76.69	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology. As of April 28, 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals were classified as "sustainable investments," which triggered a change in these objectives. The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the objectives and results achieved described in this chapter only reflect the situation at the end of sub-fund's financial year and, for this reason, are not a reliable indicator for future results.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the situation at the end of the financial year as shown in the table above and

section 2.1.7 of the general annual report.
No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result
	31/12/2022	31/12/2023
Instruments issued by companies		
ESG risk score		18.27
Carbon Intensity		45.69
Bonds financing green and/or social projects		17.73
Instruments issued by governments, supranational debtors and/or agencies linked to governments		
ESG Score		0.82
Carbon Intensity		343.61
Bonds financing green and/or social projects		27.28
Sustainable Investments	78.01	76.69

For both reporting periods, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2022 - 31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 76.69% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this chapter only reflect the situation at the end of the financial year of the sub-fund and, for that reason, are not a reliable indicator for future results.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a part of its portfolio in issuers that contribute to the UN Sustainable Development Goals (including both social and environmental objectives).

Instruments of companies that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals, were designated as 'sustainable investments'.

As of 28 April 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN Sustainable Development Goals, were also classified as "sustainable investments".

Governments were assessed on five pillars which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scored sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies were considered to be instruments that contribute to UN Sustainable Development Goals.

- The country is aligned with the ESG criteria: it has a score of at least 80 for one of the five pillars and does not score lower than 50 for any of the other pillars;
- The country is not excluded: it does not rank among the 50% most controversial regimes AND it does meet the criteria on respecting the sustainable principles AND it does not rank among the 10% worst scoring countries of the universe.

Supranational government bonds were considered to contribute to the UN Sustainable

Development Goals if either of the following criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst-scoring half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the 'sustainable development' label to instruments of companies and governments.

(2) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund invested a part of its portfolio in bonds financing green and/or social projects (that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds). Instruments that meet these requirements were labelled 'sustainable investments'. The percentage of the portfolio invested in bonds financing green and/or social projects can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of issuers from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded, and companies active in the palm oil industry are subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

How were the indicators for adverse impacts on sustainability factors taken into account?

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies that deviate significantly (score of -10) from any of the UN's first 15 Sustainable Development Goals (based on MSCI SDG Net Alignment Score), as well as companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

For investments in instruments issued by countries, the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account by excluding countries in the worst 10% according to the ESG score model, and by excluding countries that do not comply with sustainability principles and are exposed to controversial regimes.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on carbon intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the carbon intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.
- **Indicator 15:** GHG intensity of investee countries was taken into account through the carbon intensity reduction target for sovereign related investments.
- **Indicator 16:** Investee countries subject to social violations was taken into account as the sub-fund did not invest in (i) Countries that do not comply with sustainability principles and (ii) countries exposed to controversial regimes. More information can be found in the exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV. As part of its commitment to responsible investment, KBC Asset Management NV exercised the voting rights of the shares it manages in accordance with its proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on the KBC Asset Management NV website.

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies. As part of its commitment to responsible investment, KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting. More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What was the proportion of sustainability-related investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the year, the proportion of sustainable investments was 76.69%.

What was the asset allocation?

Asset allocation describes the

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar

share of investments in specific assets.

as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund KBC Dynamic Tolerant Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 99.08% in assets that promote environmental or social characteristics and 0.92% in other investments. The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Dynamic Tolerant Responsible Investing' of the prospectus.

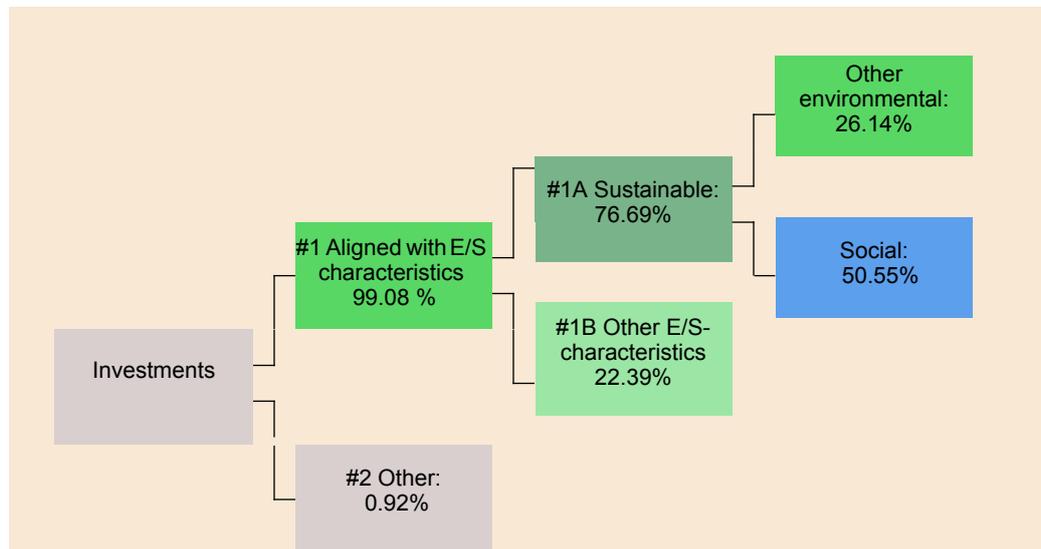

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

26.14% of the sustainable investments are environmentally sustainable investments and 50.55% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus investments in bonds that can be considered as bonds financing green and/or social projects, plus instruments that are considered "sustainable" by the Responsible Investing Advisory Board.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2023 the investments were made in the following sectors:

Sector	%Assets
Software & Tech Services	11.98%
Health Care	11.28%
National	11.09%
Banking	10.52%
Tech Hardware & Semiconductors	9.60%
Financial Services	5.39%
Consumer Staple Products	5.15%
Retail & Wholesale - Discretionary	4.85%
Media	4.47%
Insurance	4.13%
Materials	3.22%
Unclassifiable	3.06%
Real Estate	2.82%
Telecommunications	2.76%
Consumer Discretionary Products	2.71%
Industrial Services	1.39%
Utilities	1.34%
Supranationals	1.29%
Consumer Discretionary Services	1.22%
Industrial Products	1.01%
Retail & Wholesale - Staples	0.56%
Regional & Local	0.10%
Renewable Energy	0.05%
Not specified	0.01%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

However, an exception is provided in the exclusion policy for investments in green bonds of these companies, which promote the energy transition. Consequently, for the portion invested in green bonds, there may be exposure to these sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage invested in EU Taxonomy-aligned investments was set at 31 December 2023. KBC Asset Management NV determined that insufficient reliable, timely and verifiable data from issuers or investee companies were available at that time for consistent reporting, and this based on its own research and services from data suppliers. The percentage invested in investments aligned with the EU Taxonomy was therefore set at 0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?**

Yes:

In fossil gas

In nuclear energy

funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of socially sustainable investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the financial year of the sub-fund, the share of socially sustainable investments was 50.55%,

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

At the end of the financial year, the "not sustainable" category may include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Dynamic Tolerant Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under "#2 not sustainable", there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better ESG (risk)score;
- promoted climate change mitigation, by preferring issuers with lower Carbon Intensity, with the objective of meeting a predetermined carbon intensity target;
- supported sustainable development , by including issuers that contribute to the UN Sustainable Development Goals;
- supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The sub-fund excluded issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded, and companies active in the palm oil industry were subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) were excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement

initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the described reference portfolio was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

More information can be found in the table under the "How did the sustainability indicators perform" section of this annex.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund sets out to achieve the highest possible return by investing directly or indirectly in various asset classes, such as shares and/or share-related investments ("the stock component"), bonds and/or bond-related investments ("the bond component"), money market instruments, cash and/or alternative investments (including real estate and financial instruments that are linked to price movements on the commodity market).

The target allocation for the asset classes is 55% shares and/or share-related investments ('the stock component') and 45% bonds and/or bond-related investments ('the bond component').

The target allocation may be deviated from in line with the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy). It is therefore possible for the sub-fund to invest in asset classes that are not included in the target allocation. The portfolio is generally evenly allocated between shares and bonds.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section, below.

The fund is actively managed with reference to the following benchmark: 22.5% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index, 55% MSCI All Countries World - Net Return Index, 22.5% iBoxx Euro Corporate bonds Total Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 2.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

2.1.8. Future policy

Following weekly strategy of KBC AM

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 38 254 664.49 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC ExpertEase Dynamic (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	121,855,281.29	66,836,289.85	188,691,571.14
Sales	119,468,872.68	72,355,407.60	191,824,280.28
Total 1	241,324,153.97	139,191,697.44	380,515,851.42
Subscriptions	18,916,025.31	12,375,697.45	31,291,722.76
Redemptions	14,865,268.42	18,559,810.60	33,425,079.02
Total 2	33,781,293.73	30,935,508.05	64,716,801.78
Monthly average of total assets	503,826,620.86	516,025,323.55	510,027,628.06
Turnover rate	41.19%	20.98%	61.92%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Fund follows KBC AM weekly strategy.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.5. Performance figures

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Starting date	Share classes						
CAP	BE6290507571	EUR	10.28%	13.35%	1.89%	3.44%	3.61%	6.12%			31/01/2017	1.97%
DIS	BE6290508587	EUR	10.28%	13.35%	1.89%	3.44%	3.60%	6.12%			31/01/2017	1.96%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
Distribution units (DIV)
Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$
i = 1 ... N
from which C = C0 * ... * CN.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 13,1679 net (18,8113 gross).

2.4.6. Costs

Ongoing Charges and Transaction costs:

Capitalisation :

Ongoing charges : 1,665%

Transaction costs: 0,053%

Distribution :

Ongoing charges : 1,666%

Transaction costs: 0,053%

Percentage calculated at reporting date: 31 December 2023 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 52,97% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.44%	<p>per year calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,44% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund sets out to achieve the highest possible return by investing in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-strategy). To this end, the fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments (the 'equity component'), bonds and/or bond-related investments (the 'bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

When applying KBC Asset Management NV's investment strategy, the management bases their investment decisions on the analysis of the financial and economic developments and prospects for specific regions, sectors and themes.

The target allocation for the asset classes is 55% shares and/or share-related investments and 45% bonds and/or bond-related investments. The target allocation may be deviated from in line with the investment view of KBC Asset Management NV. It is therefore possible for the sub-fund to invest in asset classes that are not included in the target allocation. The portfolio is generally evenly allocated between shares and bonds.

Within the above limits, the sub-fund pursues (directly or indirectly) responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The issuers in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for Horizon KBC ExpertEase Dynamic Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes issuers in advance from the Responsible Investment universe which fall foul of the exclusion policies available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that issuers involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that issuers who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better **ESG score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring issuers with lower **Carbon Intensity**, with the objective of meeting a predetermined carbon intensity target;
- (3) support sustainable development, by including issuers that contribute to the **UN Sustainable Development Goals** and
- (4) support sustainable development by encouraging the transition to a more sustainable world via **bonds financing green and/or social projects**.

The sub-fund's targets are available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-score

The contribution to the integration of sustainability into policy decisions of the issuers is measured based on an ESG score. This score represents the aggregated performance assessment of a given entity against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- In the case of instruments issued by companies:
 - respect for the environment (e.g., reduction in greenhouse gas emissions);
 - attention to society (e.g., employee working conditions); and
 - corporate governance (e.g., independence and diversity of the board of directors).

The ESG score for companies is an ESG risk score supplied by a data provider.

- In the case of instruments issued by national governments, supranational debtors and/or agencies linked to governments, the following five pillars are used
 - overall economic performance and stability (e.g., quality of institutions and government);
 - socio-economic development and health of the population (e.g., education and employment);
 - equality, freedom and the rights of all citizens;
 - environmental policy (e.g., climate change); and
 - security, peace and international relations.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG score of the portfolio for companies is compared to following benchmarks: MSCI All Countries World - Net Return Index en iBoxx Euro Corporate bonds Total Return Index.

The ESG score for countries of the portfolio is compared to a reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).

More information on the ESG Score and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets can be revised upwards or downwards.

(2) Carbon Intensity

The objective to promote climate change mitigation, by favoring lower carbon intensity issuers, with the goal of meeting a predetermined carbon intensity target covers at least 90% of the portfolio. The objective does not apply to issuers for which data is not available.

The contribution of issuers to climate change mitigation is measured based on their carbon intensity. For companies, carbon intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD). For countries, it is defined as the greenhouse gas emissions (in tonnes CO₂ equivalent), divided by the Gross Domestic Product (in current prices, in mln USD).

The targets for instruments issued by companies are different from those for instruments issued by national governments, supranational debtors and/or government-linked agencies.

More information on Carbon Intensity and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to investing a minimum proportion of the portfolio in issuers that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives. Instruments of issuers that meet these requirements are designated as "sustainable investments," according to Article 2.17 of the SFDR.

Companies that contribute to the UN Sustainable Development Goals are defined as those that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals.

Governments are assessed on the five pillars as described in the ESG score, which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scores sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies are considered to be instruments that contribute to sustainable development. Bonds of supranational governments contribute to the UN's Sustainable development goals if one of the two criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. More information about this and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds .

The targets may be revised upwards or downwards.

(4) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund commits to invest a minimum proportion of the portfolio in bonds financing green and/or social projects. Bonds whose proceeds will be used exclusively to finance (a combination of) green and social projects that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds are considered bonds financing green and/or social projects. Instruments that meet these requirements are labelled 'sustainable investments', in line with article 2(17) SFDR.

More information on bonds financing green and/or social projects and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which an issuer can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible issuer based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets issued by issuers that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed with reference to the following benchmark: 55% MSCI All Countries World - Net Return Index, 22.5% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index, 22.5% iBoxx Euro Corporate bonds Total Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into

account when compiling the portfolio.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 2.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. The percentage invested in environmentally sustainable activities within the meaning of the EU Taxonomy Framework at all times is 0%. The underlying investments of this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or investee companies is available and final regulatory technical standards are published providing more detailed guidance on the Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability disclosure in the financial services sector and on how Taxonomy information should be made public, the prospectus will be updated.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. The principal adverse impacts on sustainability factors that were taken into account through the exclusion policies can be found in the 'Annex for Horizon KBC ExpertEase Dynamic Responsible Investing'.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy. The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy can be found in the 'Annex for Horizon KBC ExpertEase Dynamic Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for Horizon KBC ExpertEase Dynamic Responsible Investing'.

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

Following weekly strategy of KBC AM

2.1.9. Summary risk indicator (SRI)

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in

currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.

- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 13 308 287.69 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC ExpertEase Dynamic Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	178,933,507.65	97,436,288.20	276,369,795.85
Sales	145,635,977.67	81,039,894.22	226,675,871.89
Total 1	324,569,485.32	178,476,182.42	503,045,667.74
Subscriptions	53,787,260.24	46,409,961.39	100,197,221.63
Redemptions	17,910,526.39	27,142,812.63	45,053,339.02
Total 2	71,697,786.63	73,552,774.02	145,250,560.65
Monthly average of total assets	697,317,581.24	742,574,842.81	720.323.355.87
Turnover rate	36.26%	14.13%	49.67%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Turnover on the portfolio is as a result of weekly / adhoc changes to strategy in anticipation of, and response to, financial markets movements.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 12,3208 net (17,6012 gross).

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,660%
Transaction costs: 0,047%

Classic Shares Distribution :

Ongoing charges : 1,658%

Fee for managing the investment portfolio	Max 1.44%	<p>per year calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,44% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes No

<input type="checkbox"/> It made sustainable investments with an environmental objective : %	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.46% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : %	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments) by preferring issuers with a better ESG (risk)score;
- has promoted climate change mitigation by preferring issuers with lower carbon intensity, with the objective of meeting a predetermined carbon intensity target;
- has supported sustainable development by including issuers that contribute towards achieving the UN Sustainable Development Goals;
- has supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The specific objectives of the sub-fund can be found in the table under title 'How did the

sustainability indicators perform?' of this annex.

The sub-fund invested 76.46% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 21.59% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmarks MSCI All Countries World - Net Return Index en iBoxx Euro Corporate bonds Total Return Index are used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	10% better than the following benchmarks: MSCI All Countries World - Net Return Index and iBoxx Euro Corporate bonds Total Return Index.	19.15	18.12	Yes
Carbon Intensity	A reduction of 50% by 2030 based on the following benchmarks: MSCI All Countries World - Net Return Index and iBoxx Euro Corporate bonds Total Return Index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	117.66	46.19	Yes
Bonds financing green and/or social projects	A minimum of 10% of corporate bonds invested in should qualify as bonds financing green and/or social projects.	10	17.71	Yes
Instruments issued by governments, supranational debtors and/or agencies linked to governments				
ESG Score	10% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	0.77	0.82	Yes
Carbon Intensity	25% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	422.53	343.61	Yes
Bonds financing green and/or social projects	A minimum of 10% of the investments in bonds issued by governments, supranational debtors and/or agencies linked to governments should qualify as bonds financing green and/or social projects.	10	27.20	Yes
Minimum % Sustainable Investments	A minimum of 30% of sustainable investments.	30	76.46	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology. As of April 28, 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals were classified as "sustainable investments," which triggered a change in these objectives. The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the objectives and results achieved described in this chapter only reflect the situation at the end of sub-fund's financial year and, for this reason, are not a reliable indicator for future results.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the situation at the end of the financial year as shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result
	31/12/2022	31/12/2023
Instruments issued by companies		
ESG risk score		18.12
Carbon Intensity		46.19
Bonds financing green and/or social projects		17.71
Instruments issued by governments, supranational debtors and/or agencies linked to governments		
ESG Score		0.82
Carbon Intensity		343.61
Bonds financing green and/or social projects		27.20
Sustainable Investments	80.92	76.46

For both reporting periods, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2022 - 31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 76.46% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this chapter only reflect the situation at the end of the financial year of the sub-fund and, for that reason, are not a reliable indicator for future results.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a part of its portfolio in issuers that contribute to the UN Sustainable Development Goals (including both social and environmental objectives).

Instruments of companies that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals, were designated as 'sustainable investments'.

As of 28 April 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN Sustainable Development Goals, were also classified as "sustainable investments".

Governments were assessed on five pillars which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scored sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies were considered to be instruments that contribute to UN Sustainable Development Goals.

- The country is aligned with the ESG criteria: it has a score of at least 80 for one of the five pillars and does not score lower than 50 for any of the other pillars;
- The country is not excluded: it does not rank among the 50% most controversial regimes AND it does meet the criteria on respecting the sustainable principles AND it does not rank

among the 10% worst scoring countries of the universe.

Supranational government bonds were considered to contribute to the UN Sustainable Development Goals if either of the following criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst-scoring half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the 'sustainable development' label to instruments of companies and governments.

(2) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund invested a part of its portfolio in bonds financing green and/or social projects (that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds). Instruments that meet these requirements were labelled 'sustainable investments'. The percentage of the portfolio invested in bonds financing green and/or social projects can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of issuers from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded, and companies active in the palm oil industry are subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

How were the indicators for adverse impacts on sustainability factors taken into account?

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies that deviate significantly (score of -10) from any of the UN's first 15 Sustainable Development Goals (based on MSCI SDG Net Alignment Score), as well as companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

For investments in instruments issued by countries, the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account by excluding countries in the worst 10%

according to the ESG score model, and by excluding countries that do not comply with sustainability principles and are exposed to controversial regimes.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on carbon intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the carbon intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.
- **Indicator 15:** GHG intensity of investee countries was taken into account through the carbon intensity reduction target for sovereign related investments.
- **Indicator 16:** Investee countries subject to social violations was taken into account as the sub-fund did not invest in (i) Countries that do not comply with sustainability principles and (ii) countries exposed to controversial regimes. More information can be found in the exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV. As part of its commitment to responsible investment, KBC Asset Management NV exercised the voting rights of the shares it manages in accordance with its proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on the KBC Asset Management NV website.

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies. As part of its commitment to responsible investment, KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting. More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
01/01/2023-31/12/2023

Largest investments	Sector	% assets	Country
KBC Equity Fund World Responsible Investing -ISB	Financial Services	10.04%	Belgium
KBC Part. Corporate Bds Responsible Investing -ISB	Financial Services	8.69%	Belgium
KBC Eq Fd North America Responsible Investing -ISB	Financial Services	8.44%	Belgium
KBC Eq Fd USA & Canada Responsible Investing -ISB	Financial Services	8.44%	Belgium
KBC Eq F N.Am.Cont. Responsible Investing -ISB EUR	Financial Services	8.44%	Belgium
KBC Renta Eurorenta Responsible Investing -ISB	Financial Services	8.00%	Luxembourg

What was the proportion of sustainability-related investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the year, the proportion of sustainable investments was 76.46%.

Asset allocation
describes the
share of
investments
in
specific assets.

● **What was the asset allocation?**

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund KBC ExpertEase Dynamic Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 98.05% in assets that promote environmental or social characteristics and 1.95% in other investments. The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC ExpertEase Dynamic Responsible Investing' of the prospectus.

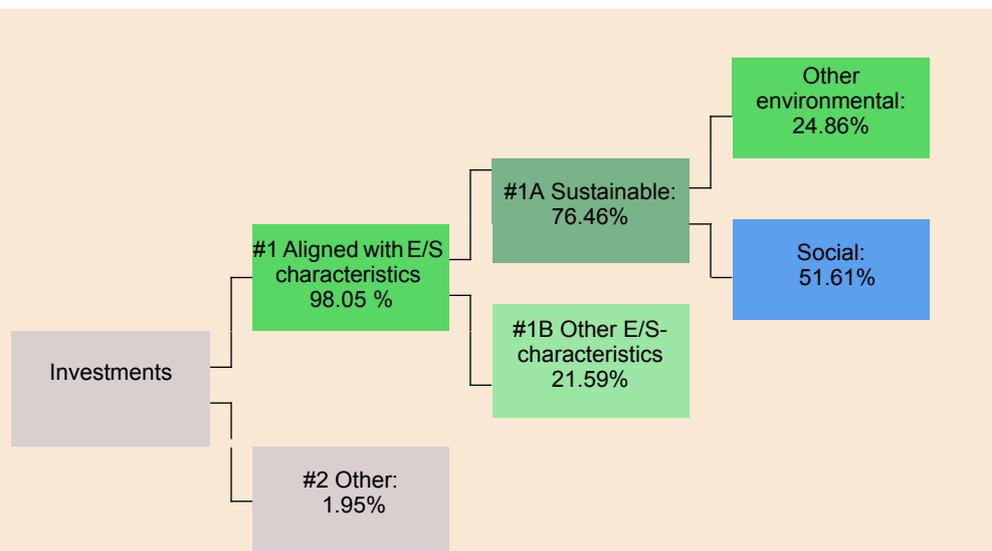

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

24.86% of the sustainable investments are environmentally sustainable investments and 51.61% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus investments in bonds that can be considered as bonds financing green and/or social projects, plus instruments that are considered "sustainable" by the Responsible Investing Advisory Board.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2023 the investments were made in the following sectors:

Sector	%Assets
National	17.97%
Banking	10.98%
Software & Tech Services	10.00%
Health Care	9.83%
Tech Hardware & Semiconductors	7.80%
Financial Services	5.58%
Consumer Staple Products	4.61%
Retail & Wholesale - Discretionary	4.25%
Media	3.96%
Insurance	3.81%
Materials	3.64%
Telecommunications	2.91%
Real Estate	2.89%
Consumer Discretionary Products	2.43%
Unclassifiable	2.19%
Supranationals	1.73%
Utilities	1.55%
Consumer Discretionary Services	1.23%
Industrial Services	1.12%
Industrial Products	0.82%
Retail & Wholesale - Staples	0.50%
Regional & Local	0.13%
Renewable Energy	0.05%
Not specified	0.02%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

However, an exception is provided in the exclusion policy for investments in green bonds of these companies, which promote the energy transition. Consequently, for the portion invested in green bonds, there may be exposure to these sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage invested in EU Taxonomy-aligned investments was set at 31 December 2023. KBC Asset Management NV determined that insufficient reliable, timely and verifiable data from issuers or investee companies were available at that time for consistent reporting, and this based on its own research and services from data suppliers. The percentage invested in investments aligned with the EU Taxonomy was therefore set at 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

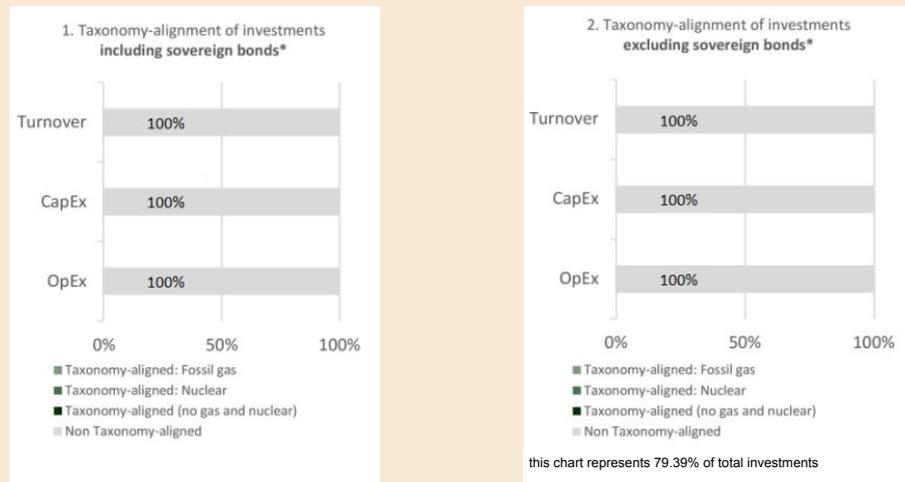

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The previous reference period (which ran from 1 January 2022 tot 31 December 2022) also reported 0% on EU taxonomy-aligned investments.

KBC Asset Management NV determined, based on its own research and services from data suppliers, that insufficient reliable, timely and verifiable data of issuers in which investments were made were available for the previous and current financial year. The percentage of investments aligned with the EU taxonomy was therefore set at 0% for both reference periods.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

The sub-fund invested 76.46% in sustainable investments as defined by art. 2.17 SFDR. At the end of the financial year of the sub-fund, the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 24.86%.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of socially sustainable investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

At the end of the financial year of the sub-fund, the share of socially sustainable investments was 51.61%,

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

At the end of the financial year, the "not sustainable" category may include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC ExpertEase Dynamic Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 not sustainable”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better ESG (risk)score;
- promoted climate change mitigation, by preferring issuers with lower Carbon Intensity, with the objective of meeting a predetermined carbon intensity target;
- supported sustainable development , by including issuers that contribute to the UN Sustainable Development Goals;
- supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The sub-fund excluded issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded, and companies active in the palm oil industry were subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) were excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference

No reference benchmark has been designated for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by this sub-fund.

For investments issued by companies the benchmarks MSCI All Countries World - Net Return Index en iBoxx Euro Corporate bonds Total Return Index were used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

More information can be found in the table under the "How did the sustainability indicators perform" section of this annex.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments, bonds and/or bond-related investments, money market instruments, cash and/or alternative investments (including real estate, and financial instruments that are linked to price movements on the commodity market).

The target allocation for the asset classes is 75% shares and/or share-related investments (stock component) and 25% bonds and/or bond-related investments (bond component).

It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy). It is therefore possible for the sub-fund to invest in asset classes that are not included in the target allocation.

The portfolio typically contains more stocks than bonds.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed with reference to the following benchmark: 75% MSCI All Countries World - Net Return Index, 12.5% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index, 12.5% iBoxx Euro Corporate bonds Total Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 2.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

The future investment policy of the fund will be determined by the KBCAM NV investment strategy in anticipation of, and response to, financial markets movements

2.1.9. Summary risk indicator (SRI)

Comfort Portfolio Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies

other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.

- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Classic Shares CSOB Private Banking: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 26 631 503.09 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Highly Dynamic (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	87,129,207.60	52,022,877.14	139,152,084.74
Sales	78,579,777.16	48,099,944.34	126,679,721.50
Total 1	165,708,984.77	100,122,821.48	265,831,806.25
Subscriptions	40,437,817.92	16,883,214.57	57,321,032.49
Redemptions	27,495,227.85	16,021,339.74	43,516,567.59
Total 2	67,933,045.77	32,904,554.31	100,837,600.08
Monthly average of total assets	335,314,246.10	357,799,004.60	346,743,998.34
Turnover rate	29.16%	18.79%	47.58%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Comfort Portfolio Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

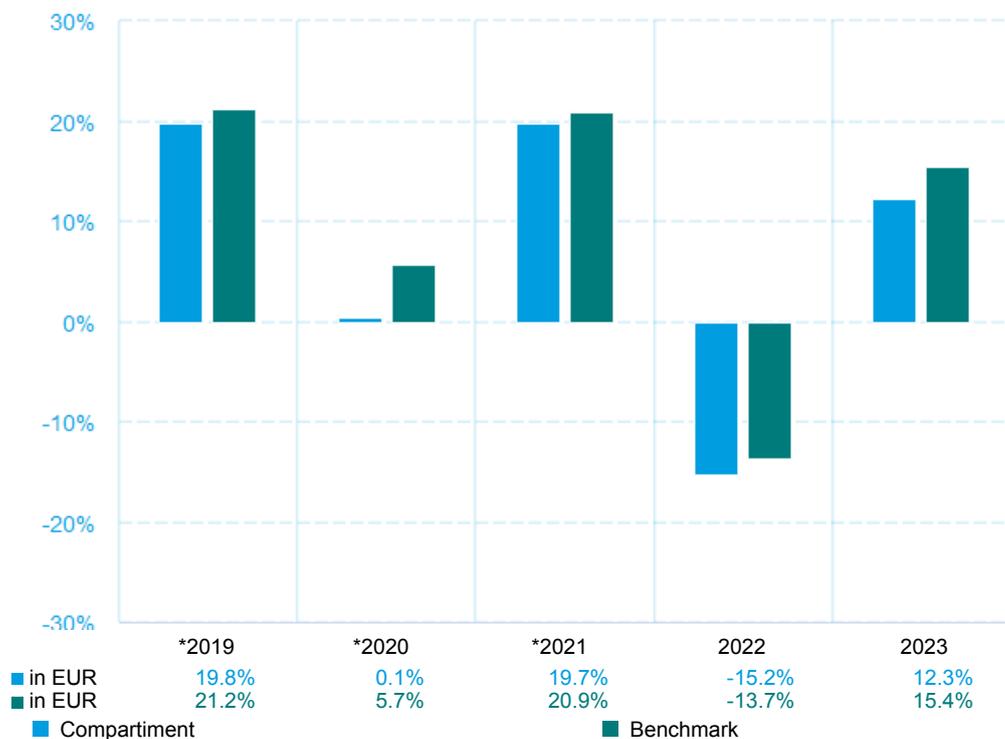

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 16,0275 net (22,8964 gross).

Classic Shares CSOB Private Banking

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering of the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its unit holders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund sets out to achieve the highest possible return by investing in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-view). To this end, the fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ('stock component'), bonds and/or bond-related investments ('bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

When applying KBC Asset Management NV's investment view, the managers base their investment decisions on the analysis of the financial and economic developments and prospects for specific regions, sectors and themes.

The target allocation for the asset class is 75% shares and/or share-related investments (stock component) and 25% bonds and/or bond-related investments (bond component). The target allocation may be deviated from in line with the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-view). It is therefore possible for the fund to invest in asset classes that are not included in the target allocation. The portfolio can generally contain more shares than bonds, whereby the stock component is limited to 85%.

Within the above limits, the sub-fund pursues (directly or indirectly) responsible investment objectives based on a

dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The issuers in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and social characteristics can be found in the ‘Annex for Horizon KBC Highly Dynamic Responsible Investing’ of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes issuers in advance from the Responsible Investment universe which fall foul of the exclusion policies available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that issuers involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that issuers who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better **ESG score**, where ESG stands for ‘Environmental, Social and Governance’, and
- (2) promote climate change mitigation, by preferring issuers with lower **Carbon Intensity**, with the objective of meeting a predetermined carbon intensity target;
- (3) support sustainable development, by including issuers that contribute to the **UN Sustainable Development Goals** and
- (4) support sustainable development by encouraging the transition to a more sustainable world via **bonds financing green and/or social projects**.

The sub-fund's targets are available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-score

The contribution to the integration of sustainability into policy decisions of the issuers is measured based on an ESG score. This score represents the aggregated performance assessment of a given entity against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- In the case of instruments issued by companies:
 - respect for the environment (e.g., reduction in greenhouse gas emissions);
 - attention to society (e.g., employee working conditions); and
 - corporate governance (e.g., independence and diversity of the board of directors).

The ESG score for companies is an ESG risk score supplied by a data provider.

- In the case of instruments issued by national governments, supranational debtors and/or agencies linked to governments, the following five pillars are used
 - overall economic performance and stability (e.g., quality of institutions and government);
 - socio-economic development and health of the population (e.g., education and employment);
 - equality, freedom and the rights of all citizens;
 - environmental policy (e.g., climate change); and
 - security, peace and international relations.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG score of the portfolio for companies is compared to following benchmarks: MSCI All Countries World - Net Return Index en iBoxx Euro Corporate bonds Total Return Index.

The ESG score for countries of the portfolio is compared to a reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).

More information on the ESG Score and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets can be revised upwards or downwards.

(2) Carbon Intensity

The objective to promote climate change mitigation, by favoring lower carbon intensity issuers, with the goal of meeting a predetermined carbon intensity target covers at least 90% of the portfolio. The objective does not apply to issuers for which data is not available.

The contribution of issuers to climate change mitigation is measured based on their carbon intensity. For companies, carbon intensity is defined as absolute greenhouse gas emissions (in tonnes CO2 equivalent), divided by revenues (in mln USD). For countries, it is defined as the greenhouse gas emissions (in tonnes CO2 equivalent), divided by the Gross Domestic Product (in current prices, in mln USD).

The targets for instruments issued by companies are different from those for instruments issued by national governments, supranational debtors and/or government-linked agencies.

More information on Carbon Intensity and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to investing a minimum proportion of the portfolio in issuers that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives. Instruments of issuers that meet these requirements are designated as "sustainable investments," according to Article 2.17 of the SFDR.

Companies that contribute to the UN Sustainable Development Goals are defined as those that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals.

Governments are assessed on the five pillars as described in the ESG score, which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scores sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies are considered to be instruments that contribute to sustainable development. Bonds of supranational governments contribute to the UN's Sustainable development goals if one of the two criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments.

More information about this and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds .

The targets may be revised upwards or downwards.

(4) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund commits to invest a minimum proportion of the portfolio in bonds financing green and/or social projects. Bonds whose proceeds will be used exclusively to finance (a combination of) green and social projects that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds are considered bonds financing green and/or social projects. Instruments that meet these requirements are labelled 'sustainable investments', in line with article 2(17) SFDR.

More information on bonds financing green and/or social projects and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which an issuer can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible issuer based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but

which the management company chooses to refrain from selling immediately in the best interest of the customer;

- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets issued by issuers that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed with reference to the following benchmark: 75% MSCI All Countries World - Net Return Index, 12.5% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index, 12.5% iBoxx Euro Corporate bonds Total Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 2.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. The percentage invested in environmentally sustainable activities within the meaning of the EU Taxonomy Framework at all times is 0%. The underlying investments of this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or investee companies is available and final regulatory technical standards are published providing more detailed guidance on the Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability disclosure in the financial services sector and on how Taxonomy information should be made public, the prospectus will be updated.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. The principal adverse impacts on sustainability factors that were taken into account through the exclusion policies can be found in the 'Annex for Horizon KBC Highly Dynamic Responsible Investing'.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy. The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy can be found in the 'Annex for Horizon KBC Highly Dynamic Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for Horizon KBC Highly Dynamic Responsible Investing'.

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

2.1.9. Summary risk indicator (SRI)

Comfort Portfolio Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 12 871 950.39 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

Redemptions	23,116,419.23	145,114,619.60	168,231,038.83
Total 2	148,471,741.42	218,500,519.75	366,972,261.17
Monthly average of total assets	723,716,954.28	749,918,058.88	737.035.849.12
Turnover rate	35.17%	14.21%	48.98%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Turnover on the portfolio is as a result of weekly / adhoc changes to strategy in anticipation of, and response to, financial markets movements.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.5. Performance figures

Comfort Portfolio Shares

* These performances were achieved under circumstances that no longer apply

Comfort Portfolio Shares

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Starting date	Share classes						
CAP	BE6319267082	EUR	13.46%	15.44%	3.91%	6.41%					27/04/2020	6.45%
DIS	BE6319268098	EUR	13.46%	15.44%	3.90%	6.41%					27/04/2020	6.44%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Comfort Portfolio Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

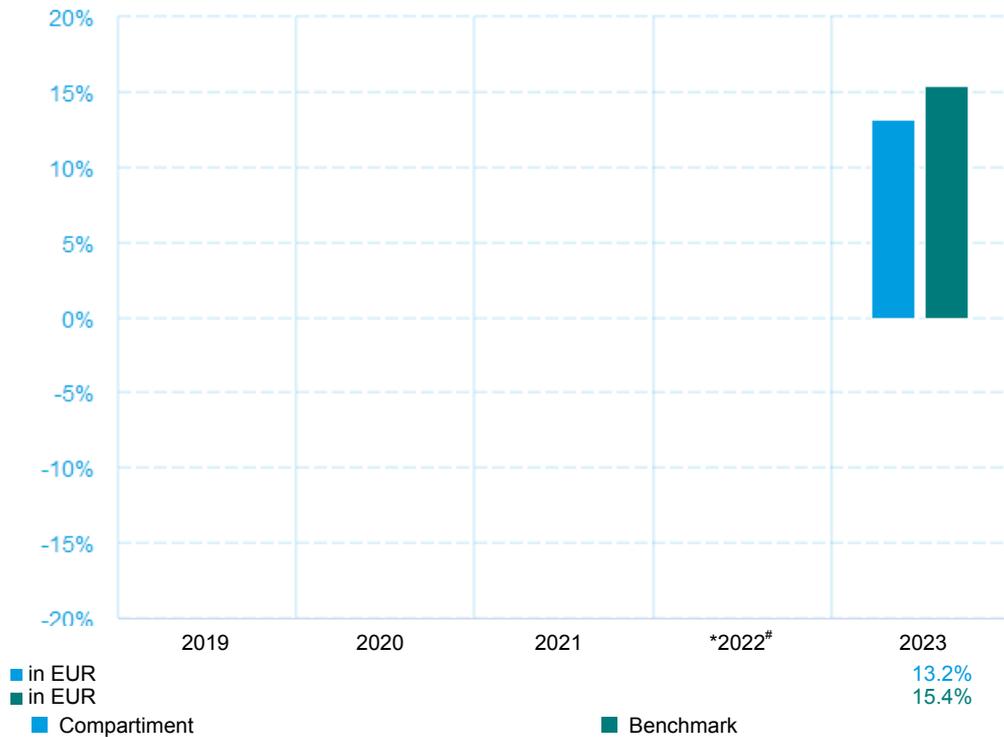

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 15,0819 net (21,5456 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering of the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
Horizon KBC Highly Dynamic Responsible Investing

Legal entity identifier:
875500A2AHK2YOR7O895

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: %</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: %</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 75.48% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments) by preferring issuers with a better ESG (risk)score;
- has promoted climate change mitigation by preferring issuers with lower carbon intensity, with the objective of meeting a predetermined carbon intensity target;
- has supported sustainable development by including issuers that contribute towards achieving the UN Sustainable Development Goals;
- has supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The specific objectives of the sub-fund can be found in the table under title 'How did the

sustainability indicators perform?' of this annex.

The sub-fund invested 75.48% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 22.47% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmarks MSCI All Countries World - Net Return Index en iBoxx Euro Corporate bonds Total Return Index are used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	10% better than the following benchmarks: MSCI All Countries World - Net Return Index and iBoxx Euro Corporate bonds Total Return Index.	19.36	18.36	Yes
Carbon Intensity	A reduction of 50% by 2030 based on the following benchmarks: MSCI All Countries World - Net Return Index and iBoxx Euro Corporate bonds Total Return Index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	118.23	45.38	Yes
Bonds financing green and/or social projects	A minimum of 10% of corporate bonds invested in should qualify as bonds financing green and/or social projects.	10	17.51	Yes
Instruments issued by governments, supranational debtors and/or agencies linked to governments				
ESG Score	10% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	0.77	0.82	Yes
Carbon Intensity	25% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	422.53	343.61	Yes
Bonds financing green and/or social projects	A minimum of 10% of the investments in bonds issued by governments, supranational debtors and/or agencies linked to governments should qualify as bonds financing green and/or social projects.	10	26.30	Yes
Minimum % Sustainable Investments	A minimum of 30% of sustainable investments.	30	75.48	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology. As of April 28, 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals were classified as "sustainable investments," which triggered a change in these objectives. The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the objectives and results achieved described in this chapter only reflect the situation at the end of sub-fund's financial year and, for this reason, are not a reliable indicator for future results.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the situation at the end of the financial year as shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

● **... and compared to previous periods?**

Sustainability indicators	Achieved result	Achieved result
	31/12/2022	31/12/2023
Instruments issued by companies		
ESG risk score		18.36
Carbon Intensity		45.38
Bonds financing green and/or social projects		17.51
Instruments issued by governments, supranational debtors and/or agencies linked to governments		
ESG Score		0.82
Carbon Intensity		343.61
Bonds financing green and/or social projects		26.30
Sustainable Investments	77.80	75.48

For both reporting periods, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2022 - 31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 75.48% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this chapter only reflect the situation at the end of the financial year of the sub-fund and, for that reason, are not a reliable indicator for future results.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a part of its portfolio in issuers that contribute to the UN Sustainable Development Goals (including both social and environmental objectives).

Instruments of companies that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals, were designated as 'sustainable investments'.

As of 28 April 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN Sustainable Development Goals, were also classified as "sustainable investments".

Governments were assessed on five pillars which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scored sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies were considered to be instruments that contribute to UN Sustainable Development Goals.

- The country is aligned with the ESG criteria: it has a score of at least 80 for one of the five pillars and does not score lower than 50 for any of the other pillars;
- The country is not excluded: it does not rank among the 50% most controversial regimes AND it does meet the criteria on respecting the sustainable principles AND it does not rank

among the 10% worst scoring countries of the universe.

Supranational government bonds were considered to contribute to the UN Sustainable Development Goals if either of the following criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst-scoring half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the 'sustainable development' label to instruments of companies and governments.

(2) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund invested a part of its portfolio in bonds financing green and/or social projects (that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds). Instruments that meet these requirements were labelled 'sustainable investments'. The percentage of the portfolio invested in bonds financing green and/or social projects can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of issuers from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded, and companies active in the palm oil industry are subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

How were the indicators for adverse impacts on sustainability factors taken into account?

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies that deviate significantly (score of -10) from any of the UN's first 15 Sustainable Development Goals (based on MSCI SDG Net Alignment Score), as well as companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

For investments in instruments issued by countries, the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account by excluding countries in the worst 10%

according to the ESG score model, and by excluding countries that do not comply with sustainability principles and are exposed to controversial regimes.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on carbon intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the carbon intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.
- **Indicator 15:** GHG intensity of investee countries was taken into account through the carbon intensity reduction target for sovereign related investments.
- **Indicator 16:** Investee countries subject to social violations was taken into account as the sub-fund did not invest in (i) Countries that do not comply with sustainability principles and (ii) countries exposed to controversial regimes. More information can be found in the exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV. As part of its commitment to responsible investment, KBC Asset Management NV exercised the voting rights of the shares it manages in accordance with its proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on the KBC Asset Management NV website.

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies. As part of its commitment to responsible investment, KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting. More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the greatest proportion of the financial product during the reference period which is:
01/01/2023-31/12/2023

Largest investments	Sector	% assets	Country
KBC Equity Fund World Responsible Investing -ISB	Financial Services	13.82%	Belgium
KBC Eq Fd USA & Canada Responsible Investing -ISB	Financial Services	11.61%	Belgium
KBC Eq Fd North America Responsible Investing -ISB	Financial Services	11.61%	Belgium
KBC Eq F N.Am.Cont. Responsible Investing - ISB EUR	Financial Services	11.61%	Belgium
KBC Equity Fd Eurozone Responsible Investing -ISB	Financial Services	6.14%	Belgium

What was the proportion of sustainability-related investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the year, the proportion of sustainable investments was 75.48%.

What was the asset allocation?

Asset allocation describes the

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar

share of investments in specific assets.

as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund KBC Highly Dynamic Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 97.95% in assets that promote environmental or social characteristics and 2.05% in other investments. The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Highly Dynamic Responsible Investing' of the prospectus.

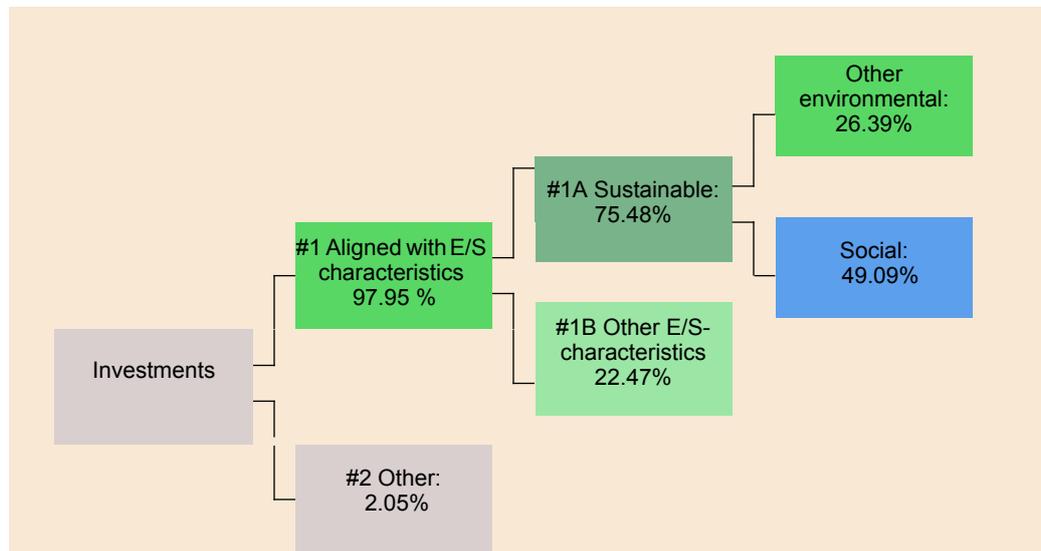

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

26.39% of the sustainable investments are environmentally sustainable investments and 49.09% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus investments in bonds that can be considered as bonds financing green and/or social projects, plus instruments that are considered "sustainable" by the Responsible Investing Advisory Board.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2023 the investments were made in the following sectors:

Sector	%Assets
Software & Tech Services	13.04%
Health Care	11.99%
Tech Hardware & Semiconductors	10.59%
National	10.21%
Banking	9.96%
Consumer Staple Products	5.39%
Retail & Wholesale - Discretionary	5.14%
Financial Services	4.85%
Media	4.70%
Insurance	4.24%
Materials	2.86%
Consumer Discretionary Products	2.84%
Real Estate	2.71%
Telecommunications	2.59%
Unclassifiable	2.20%
Industrial Services	1.54%
Consumer Discretionary Services	1.18%
Utilities	1.17%
Industrial Products	1.12%
Supranationals	0.95%
Retail & Wholesale - Staples	0.59%
Regional & Local	0.07%
Renewable Energy	0.05%
Not specified	0.02%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

However, an exception is provided in the exclusion policy for investments in green bonds of these companies, which promote the energy transition. Consequently, for the portion invested in green bonds, there may be exposure to these sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage invested in EU Taxonomy-aligned investments was set at 31 December 2023. KBC Asset Management NV determined that insufficient reliable, timely and verifiable data from issuers or investee companies were available at that time for consistent reporting, and this based on its own research and services from data suppliers. The percentage invested in investments aligned with the EU Taxonomy was therefore set at 0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?**

Yes:

In fossil gas

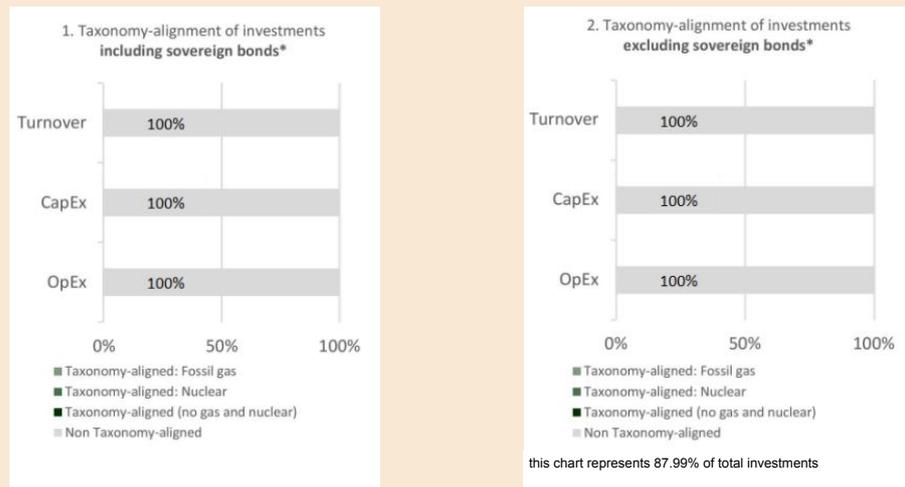

In nuclear energy

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 -turnover reflecting the share of revenue from green activities of investee companies.
 -capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 -operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy--alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The previous reference period (which ran from 1 January 2022 tot 31 December 2022) also reported 0% on EU taxonomy-aligned investments.

KBC Asset Management NV determined, based on its own research and services from data suppliers, that insufficient reliable, timely and verifiable data of issuers in which investments were made were available for the previous and current financial year. The percentage of investments aligned with the EU taxonomy was therefore set at 0% for both reference periods.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

The sub-fund invested 75.48% in sustainable investments as defined by art. 2.17 SFDR. At the end of the financial year of the sub-fund, the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 26.39%.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities

funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of socially sustainable investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the financial year of the sub-fund, the share of socially sustainable investments was 49.09%,

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

At the end of the financial year, the "not sustainable" category may include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Highly Dynamic Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 not sustainable”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better ESG (risk)score;
- promoted climate change mitigation, by preferring issuers with lower Carbon Intensity, with the objective of meeting a predetermined carbon intensity target;
- supported sustainable development , by including issuers that contribute to the UN Sustainable Development Goals;
- supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The sub-fund excluded issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded, and companies active in the palm oil industry were subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) were excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement

initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmarks MSCI All Countries World - Net Return Index en iBoxx Euro Corporate bonds Total Return Index were used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

More information can be found in the table under the "How did the sustainability indicators perform" section of this annex.

● ***How does the reference benchmark differ from a broad market index?***

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund sets out to achieve the highest possible return by investing in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-view). To this end, the fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ('stock component'), bonds and/or bond-related investments ('bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

The target allocation for the asset classes is 75% for the stock component and 25% for the bond component. This allocation may be significantly deviated from in line with the investment view of KBC Asset Management, as illustrated below. Therefore, the sub-fund may invest a sizeable portion of its assets in asset classes that are not included in the target allocation (such as money market instruments and cash). The stock component can amount to a maximum of 90% of the sub-fund.

When applying KBC Asset Management NV's investment view, the managers base their investment decisions on the analysis of the financial and economic developments and prospects for specific regions, sectors and themes. If conditions on the financial markets are uncertain, volatile or both, part of the portfolio can also be converted into investments with a lower level of risk (such as money market instruments and cash). If the stock component outperforms the bond component, or vice versa, the managers can likewise use part of the portfolio to buy additional assets in the best-performing of these two classes and sell assets in the worst-performing one.

When applying KBC Asset Management NV's investment view, the managers pay one-and-a-half times as much attention to the downside risk as to the upside potential. The more attention that is paid to downside risk, the larger the portion of the portfolio that can be converted into investments with a lower level of risk, such as cash and money market instruments, in times of uncertain and/or volatile markets. This part of the portfolio will ultimately amount to between 5% and 30% of the assets. This limit is indicative and may be reviewed annually based on the long-term trend of the financial markets. Any change to this indicative limit does not imply a change in the strategy of the sub-fund. However, under certain market conditions, the sub-fund's assets will not be invested in these asset classes in accordance with the pre-set target allocation.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme. For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.8. Future policy

Future investment and the allocation to risky assets will be determined by the ExpertEase model.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG BGN: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies

other than the Bulgarian Leva, there is a considerable chance that the value of an investment will be affected by movements in exchange rates

- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG EUR: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Plus Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Prime Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 4 341 805.52 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the

sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Highly Dynamic Tolerant (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	27,958,927.38	1,963,537.42	29,922,464.80
Sales	27,293,726.95	3,073,521.89	30,367,248.84
Total 1	55,252,654.33	5,037,059.32	60,289,713.64
Subscriptions	3,543,521.26	1,385,723.80	4,929,245.06
Redemptions	1,504,026.91	2,085,212.09	3,589,239.00
Total 2	5,047,548.17	3,470,935.89	8,518,484.06
Monthly average of total assets	43,095,434.98	44,542,529.37	43.827.988.99
Turnover rate	116.50%	3.52%	118.12%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund targets change daily based on the Experteas model and realignment to target is carried out whenever current allocation deviates from targets by more than a pre-established threshold. Also, futures are used structurally and closed periodically triggering a full rebalance. Finally, turnover is also caused by the need to periodically reflect changes in the underlying bond/equity models composition and by the need to cover subscriptions and redemptions.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

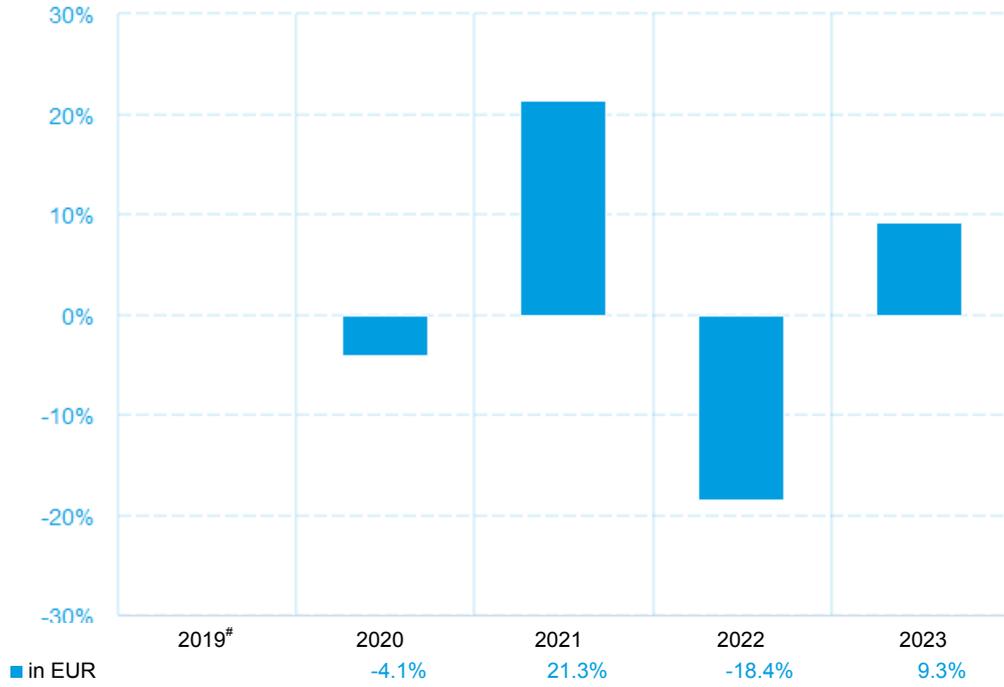

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 14,3983 net (20,5690 gross).

Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The EURO STOXX 50® (Bloomberg code: SX5E Index) is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Horizon KBC Highly Dynamic Tolerant. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **FTSE 100** is an equity index computed by the Financial Times Ltd. The dividend is not reinvested. It comprises 100 shares. The FTSE 100 serves primarily as a continuous indicator of market trends on the UK stock market. The value of the FTSE 100 is based on the market value of the shares of 100 companies listed on the London Stock Exchange. These are the companies with the biggest market capitalisation, and the shares are weighted accordingly. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 3 January 1984.

The FTSE 100 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Financial Times Ltd has all proprietary rights with respect to the index. In no way Financial Times Ltd endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Financial Times Ltd disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **Nikkei 225** is an equity index computed by Nikkei, Inc. The dividend is not reinvested. It comprises 225 shares. The Nikkei 225 serves primarily as a continuous indicator of market trends on the Japanese stock market. The value of the Nikkei 225 is based on the market value of the shares of 225 companies. These are the 225 leading and most liquid shares on the first section of the Tokyo Stock Exchange. The index was launched on 16 May 1949, with a base value of 176.21.

The Nikkei 225 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Nikkei, Inc has all proprietary rights with respect to the index. In no way Nikkei, Inc endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Nikkei, Inc. disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund sets out to achieve the highest possible return by investing in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-view). To this end, the sub-fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments (the 'stock component'), bonds and/or bond-related investments (the 'bond component'), money market instruments, cash and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

The target allocation for the assets is 75% for the stock component and 25% for the bond component. This allocation may be significantly deviated from in line with the investment view of KBC Asset Management, as illustrated below. Therefore, the sub-fund may invest a sizeable portion of its assets in asset classes that are not included in the target allocation (such as money market instruments and cash). The stock component can amount to a maximum of 90% of the sub-fund.

When applying KBC Asset Management NV's investment view, the managers base their investment decisions on the analysis of the financial and economic developments and prospects for specific regions, sectors and themes. If conditions on the financial markets are uncertain, volatile or both, part of the portfolio can also be converted into investments with a lower level of risk, such as money market instruments and cash. If the stock component outperforms the bond component, or vice versa, the managers can likewise use part of the portfolio to buy additional assets in the best-performing of these two asset classes and sell assets in the worst-performing one.

When applying KBC Asset Management NV's investment view, the managers pay one-and-a-half times as much attention to the downside risk as to the upside potential. The more attention that is paid to downside risk, the larger the portion of the portfolio that can be converted into investments with a lower level of risk, such as cash and money market instruments, in times of uncertain and/or volatile markets. This part of the portfolio will ultimately amount to between 5% and 30% of the assets. This limit is indicative and may be reviewed annually based on the long-term trend of the financial markets. Any change to this indicative limit does not imply a change in the strategy of the sub-fund. However, under certain market conditions, the sub-fund's assets will not be invested in these asset classes in accordance with the pre-set target allocation.

Within the above limits, the sub-fund pursues (directly or indirectly) responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The issuers in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for Horizon KBC Highly Dynamic Tolerant Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes issuers in advance from the Responsible Investment universe which fall foul of the exclusion policies available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that issuers involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that issuers who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better **ESG score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring issuers with lower **Carbon Intensity**, with the objective of meeting a predetermined carbon intensity target;
- (3) support sustainable development, by including issuers that contribute to the **UN Sustainable Development Goals** and
- (4) support sustainable development by encouraging the transition to a more sustainable world via **bonds financing**

green and/or social projects.

The sub-fund's targets are available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-score

The contribution to the integration of sustainability into policy decisions of the issuers is measured based on an ESG score. This score represents the aggregated performance assessment of a given entity against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- In the case of instruments issued by companies:
 - respect for the environment (e.g., reduction in greenhouse gas emissions);
 - attention to society (e.g., employee working conditions); and
 - corporate governance (e.g., independence and diversity of the board of directors).

The ESG score for companies is an ESG risk score supplied by a data provider.

- In the case of instruments issued by national governments, supranational debtors and/or agencies linked to governments, the following five pillars are used
 - overall economic performance and stability (e.g., quality of institutions and government);
 - socio-economic development and health of the population (e.g., education and employment);
 - equality, freedom and the rights of all citizens;
 - environmental policy (e.g., climate change); and
 - security, peace and international relations.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG score of the portfolio for companies is compared to a reference portfolio determined on the basis of the above-mentioned target spread

The ESG score for countries of the portfolio is compared to a reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).

More information on the ESG Score and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets can be revised upwards or downwards.

(2) Carbon Intensity

The objective to promote climate change mitigation, by favoring lower carbon intensity issuers, with the goal of meeting a predetermined carbon intensity target covers at least 90% of the portfolio. The objective does not apply to issuers for which data is not available.

The contribution of issuers to climate change mitigation is measured based on their carbon intensity. For companies, carbon intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD). For countries, it is defined as the greenhouse gas emissions (in tonnes CO₂ equivalent), divided by the Gross Domestic Product (in current prices, in mln USD).

The targets for instruments issued by companies are different from those for instruments issued by national governments, supranational debtors and/or government-linked agencies.

More information on Carbon Intensity and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to investing a minimum proportion of the portfolio in issuers that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives. Instruments of issuers that meet these requirements are designated as "sustainable investments," according to Article 2.17 of the SFDR.

Companies that contribute to the UN Sustainable Development Goals are defined as those that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals.

Governments are assessed on the five pillars as described in the ESG score, which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scores sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies are considered to be instruments that contribute to sustainable development. Bonds of supranational governments contribute to the UN's Sustainable development goals if one of the two criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments.

More information about this and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds .

The targets may be revised upwards or downwards.

(4) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund commits to invest a minimum proportion of the portfolio in bonds financing green and/or social projects. Bonds whose proceeds will be used exclusively to finance (a combination of) green and social projects that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds are considered bonds financing green and/or social projects. Instruments that meet these requirements are labelled 'sustainable investments', in line with article 2(17) SFDR.

More information on bonds financing green and/or social projects and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which an issuer can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible issuer based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets issued by issuers that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

Taxonomy related information

At the date of this prospectus, the sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. The percentage invested in environmentally sustainable activities within the meaning of the EU Taxonomy Framework at all times is 0%. The underlying investments of this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or investee companies is available and final regulatory technical standards are published providing more detailed guidance on the Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability disclosure in the financial services sector and on how Taxonomy information should be made public, the prospectus will be updated.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. The principal adverse impacts on sustainability factors that were taken into account through the exclusion policies can be found in the 'Annex for Horizon KBC Highly Dynamic Tolerant Responsible Investing'.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy. The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy can be found in the 'Annex for Horizon KBC Highly Dynamic

Tolerant Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for Horizon KBC Highly Dynamic Tolerant Responsible Investing'.

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

Following weekly strategy of KBC AM

2.1.9. Summary risk indicator (SRI)

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

There is no capital protection.

Comfort Prime Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an

investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 15 498 232.20 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Highly Dynamic Tolerant Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	102,545,425.95	6,209,106.57	108,754,532.52
Sales	89,811,574.65	8,050,257.04	97,861,831.69
Total 1	192,357,000.60	14,259,363.61	206,616,364.21
Subscriptions	21,293,643.24	7,907,220.46	29,200,863.70
Redemptions	5,415,993.21	6,938,477.56	12,354,470.77
Total 2	26,709,636.45	14,845,698.02	41,555,334.47
Monthly average of total assets	142,794,642.83	155,202,559.29	149,075,828.76
Turnover rate	116.00%	-0.38%	110.72%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Active asset management may result in high turnover rates (monthly percentage >50%), reason; Model driven funds that trade based on market movements in addition to regular strategy changes and subscriptions and redemptions.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

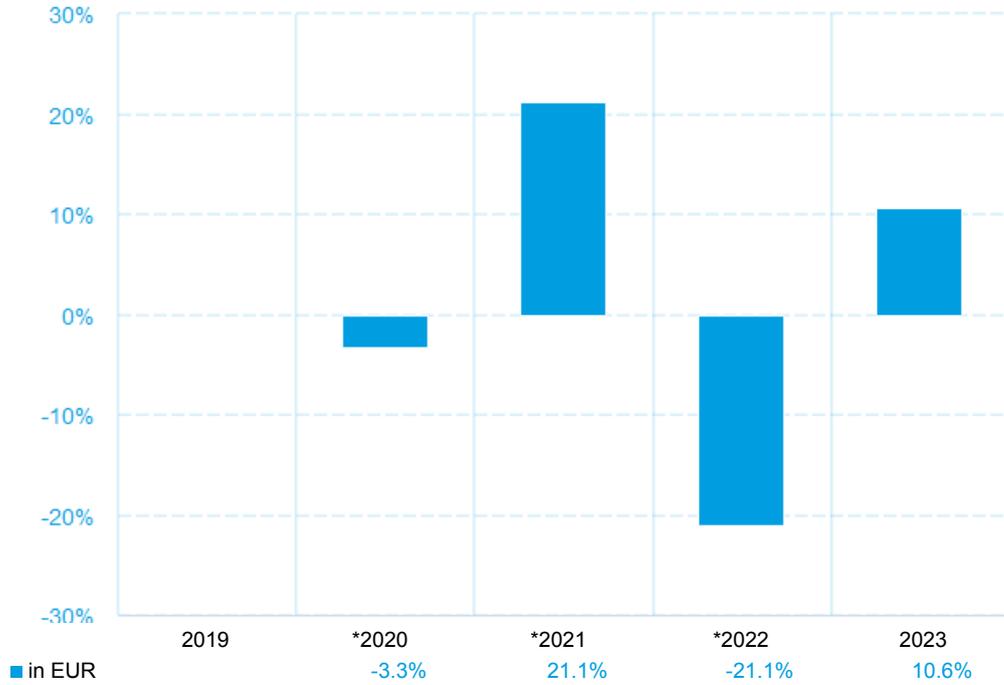

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 12,2781 net (17,5402 gross).

$$[\text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The EURO STOXX 50® (Bloomberg code: SX5E Index) is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Horizon KBC Highly Dynamic Tolerant Responsible Investing. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **FTSE 100** is an equity index computed by the Financial Times Ltd. The dividend is not reinvested. It comprises 100 shares. The FTSE 100 serves primarily as a continuous indicator of market trends on the UK stock market. The value of the FTSE 100 is based on the market value of the shares of 100 companies listed on the London Stock Exchange. These are the companies with the biggest market capitalisation, and the shares are weighted accordingly. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 3 January 1984.

The FTSE 100 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Financial Times Ltd has all proprietary rights with respect to the index. In no way Financial Times Ltd endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Financial Times Ltd disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **Nikkei 225** is an equity index computed by Nikkei, Inc. The dividend is not reinvested. It comprises 225 shares. The Nikkei 225 serves primarily as a continuous indicator of market trends on the Japanese stock market. The value of the Nikkei 225 is based on the market value of the shares of 225 companies. These are the 225 leading and most liquid shares on the first section of the Tokyo Stock Exchange. The index was launched on 16 May 1949, with a base value of 176.21.

The Nikkei 225 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Nikkei, Inc has all proprietary rights with respect to the index. In no way Nikkei, Inc endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Nikkei, Inc. disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained

from the branches providing the financial service.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
Horizon KBC Highly Dynamic Tolerant Responsible Investing

Legal entity identifier:
875500BE9KO0C0229Y68

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes No

<input type="checkbox"/> It made sustainable investments with an environmental objective : %	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.26% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : %	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics but did not make any sustainable investments	

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments) by preferring issuers with a better ESG (risk)score;
- has promoted climate change mitigation by preferring issuers with lower carbon intensity, with the objective of meeting a predetermined carbon intensity target;
- has supported sustainable development by including issuers that contribute towards achieving the UN Sustainable Development Goals;
- has supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The specific objectives of the sub-fund can be found in the table under title 'How did the

sustainability indicators perform?' of this annex.

The sub-fund invested 76.26% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 23.06% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	10% better than the target allocation as described in the prospectus under the title 'information concerning the sub-fund KBC Highly Dynamic Tolerant Responsible Investing'.	19.36	18.41	Yes
Carbon Intensity	A reduction of 50% by 2030 compared to the target allocation described in the prospectus under the title 'information concerning the sub-fund KBC Highly Dynamic Tolerant Responsible Investing' at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	118.23	45.23	Yes
Bonds financing green and/or social projects	A minimum of 10% of corporate bonds invested in should qualify as bonds financing green and/or social projects.	10	17.79	Yes
Instruments issued by governments, supranational debtors and/or agencies linked to governments				
ESG Score	10% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	0.77	0.82	Yes
Carbon Intensity	25% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	422.53	343.62	Yes
Bonds financing green and/or social projects	A minimum of 10% of the investments in bonds issued by governments, supranational debtors and/or agencies linked to governments should qualify as bonds financing green and/or social projects.	10	27.58	Yes
Minimum % Sustainable Investments	A minimum of 30% of sustainable investments.	30	76.26	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology. As of April 28, 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals were classified as "sustainable investments," which triggered a change in these objectives. The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the objectives and results achieved described in this chapter only reflect the situation at the end of sub-fund's financial year and, for this reason, are not a reliable indicator for future results.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to

different results than the situation at the end of the financial year as shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	
	31/12/2022	31/12/2023
Instruments issued by companies		
ESG risk score		18.41
Carbon Intensity		45.23
Bonds financing green and/or social projects		17.79
Instruments issued by governments, supranational debtors and/or agencies linked to governments		
ESG Score		0.82
Carbon Intensity		343.62
Bonds financing green and/or social projects		27.58
Sustainable Investments	76.20	76.26

For both reporting periods, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2022 - 31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 76.26% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this chapter only reflect the situation at the end of the financial year of the sub-fund and, for that reason, are not a reliable indicator for future results.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a part of its portfolio in issuers that contribute to the UN Sustainable Development Goals (including both social and environmental objectives).

Instruments of companies that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals, were designated as 'sustainable investments'.

As of 28 April 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN Sustainable Development Goals, were also classified as "sustainable investments".

Governments were assessed on five pillars which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scored sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies were considered to be instruments that contribute to UN Sustainable Development Goals.

- The country is aligned with the ESG criteria: it has a score of at least 80 for one of the five pillars and does not score lower than 50 for any of the other pillars;
- The country is not excluded: it does not rank among the 50% most controversial regimes AND it does meet the criteria on respecting the sustainable principles AND it does not rank among the 10% worst scoring countries of the universe.

Supranational government bonds were considered to contribute to the UN Sustainable Development Goals if either of the following criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst-scoring half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the 'sustainable development' label to instruments of companies and governments.

(2) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund invested a part of its portfolio in bonds financing green and/or social projects (that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds). Instruments that meet these requirements were labelled 'sustainable investments'. The percentage of the portfolio invested in bonds financing green and/or social projects can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of issuers from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded, and companies active in the palm oil industry are subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

How were the indicators for adverse impacts on sustainability factors taken into account?

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies that deviate significantly (score of -10) from any of the UN's first 15 Sustainable Development Goals (based on MSCI SDG Net Alignment Score), as well as companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

For investments in instruments issued by countries, the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account by excluding countries in the worst 10% according to the ESG score model, and by excluding countries that do not comply with

sustainability principles and are exposed to controversial regimes.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on carbon intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the carbon intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.
- **Indicator 15:** GHG intensity of investee countries was taken into account through the carbon intensity reduction target for sovereign related investments.
- **Indicator 16:** Investee countries subject to social violations was taken into account as the sub-fund did not invest in (i) Countries that do not comply with sustainability principles and (ii) countries exposed to controversial regimes. More information can be found in the exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV. As part of its commitment to responsible investment, KBC Asset Management NV exercised the voting rights of the shares it manages in accordance with its proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on the KBC Asset Management NV website.

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies. As part of its commitment to responsible investment, KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting. More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the greatest proportion of the financial product during the reference period which is:
01/01/2023-31/12/2023

Largest investments	Sector	% assets	Country
KBC Equity Fund World Responsible Investing -ISB	Financial Services	15.60%	Belgium
KBC Eq Fd USA & Canada Responsible Investing -ISB	Financial Services	13.11%	Belgium
KBC Eq Fd North America Responsible Investing -ISB	Financial Services	13.11%	Belgium
KBC Eq F N.Am.Cont. Responsible Investing - ISB EUR	Financial Services	13.11%	Belgium

What was the proportion of sustainability-related investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the year, the proportion of sustainable investments was 76.26%.

What was the asset allocation?

Asset allocation describes the

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar

share of investments in specific assets.

as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund KBC Highly Dynamic Tolerant Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 99.32% in assets that promote environmental or social characteristics and 0.68% in other investments. The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Highly Dynamic Tolerant Responsible Investing' of the prospectus.

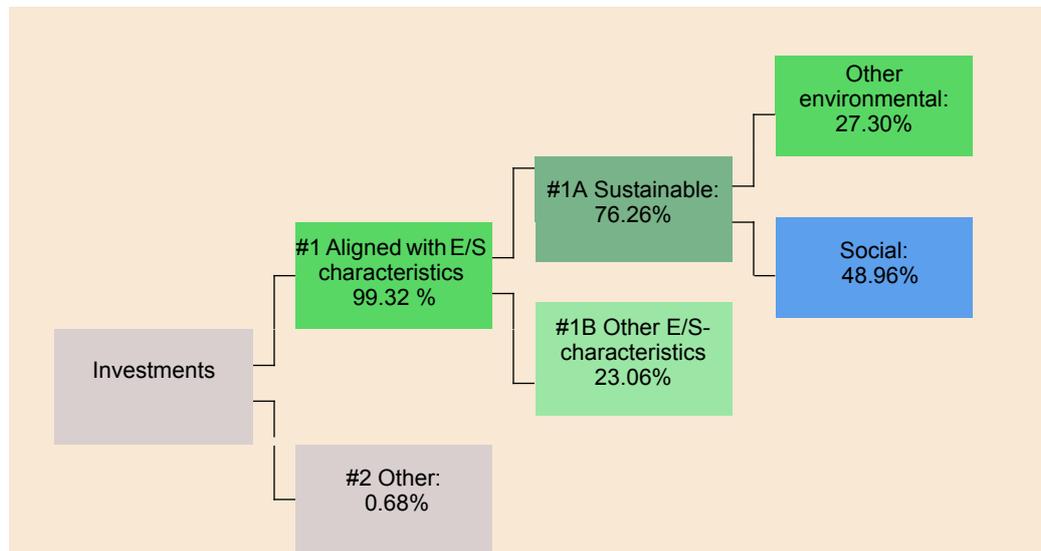

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

27.30% of the sustainable investments are environmentally sustainable investments and 48.96% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus investments in bonds that can be considered as bonds financing green and/or social projects, plus instruments that are considered "sustainable" by the Responsible Investing Advisory Board.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2023 the investments were made in the following sectors:

Sector	%Assets
Software & Tech Services	13.97%
Health Care	12.73%
Tech Hardware & Semiconductors	11.44%
Banking	9.95%
Consumer Staple Products	5.68%
Retail & Wholesale - Discretionary	5.45%
Unclassifiable	5.12%
Media	4.96%
Financial Services	4.76%
Insurance	4.43%
National	3.70%
Consumer Discretionary Products	3.00%
Materials	2.75%
Real Estate	2.73%
Telecommunications	2.58%
Industrial Services	1.67%
Industrial Products	1.21%
Consumer Discretionary Services	1.20%
Utilities	1.11%
Supranationals	0.81%
Retail & Wholesale - Staples	0.62%
Regional & Local	0.06%
Renewable Energy	0.06%
Not specified	0.01%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

However, an exception is provided in the exclusion policy for investments in green bonds of these companies, which promote the energy transition. Consequently, for the portion invested in green bonds, there may be exposure to these sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage invested in EU Taxonomy-aligned investments was set at 31 December 2023. KBC Asset Management NV determined that insufficient reliable, timely and verifiable data from issuers or investee companies were available at that time for consistent reporting, and this based on its own research and services from data suppliers. The percentage invested in investments aligned with the EU Taxonomy was therefore set at 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

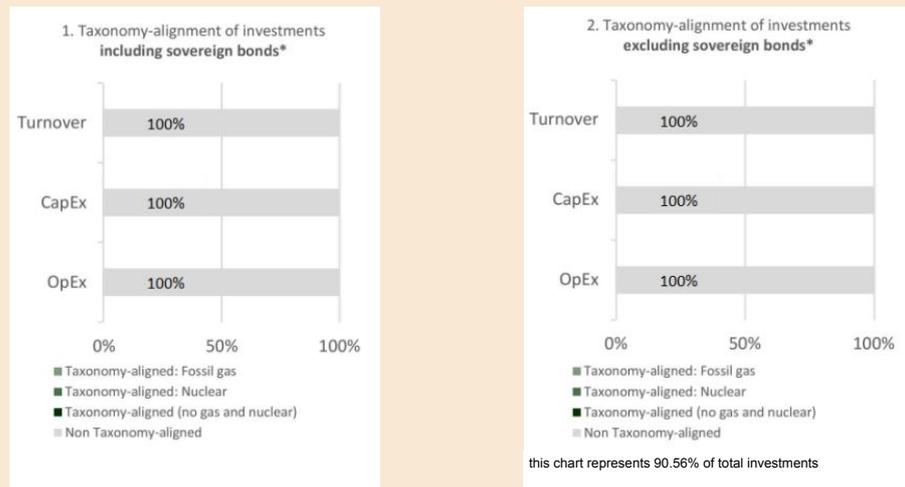

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 -turnover reflecting the share of revenue from green activities of investee companies.
 -capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 -operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy--alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The previous reference period (which ran from 1 January 2022 tot 31 December 2022) also reported 0% on EU taxonomy-aligned investments.

KBC Asset Management NV determined, based on its own research and services from data suppliers, that insufficient reliable, timely and verifiable data of issuers in which investments were made were available for the previous and current financial year. The percentage of investments aligned with the EU taxonomy was therefore set at 0% for both reference periods.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

The sub-fund invested 76.26% in sustainable investments as defined by art. 2.17 SFDR. At the end of the financial year of the sub-fund, the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 27.30%.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities

funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of socially sustainable investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the financial year of the sub-fund, the share of socially sustainable investments was 48.96%,

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

At the end of the financial year, the "not sustainable" category may include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Highly Dynamic Tolerant Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under "#2 not sustainable", there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better ESG (risk)score;
- promoted climate change mitigation, by preferring issuers with lower Carbon Intensity, with the objective of meeting a predetermined carbon intensity target;
- supported sustainable development , by including issuers that contribute to the UN Sustainable Development Goals;
- supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The sub-fund excluded issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded, and companies active in the palm oil industry were subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) were excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement

initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the described reference portfolio was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

More information can be found in the table under the "How did the sustainability indicators perform" section of this annex.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its unit holders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund aims to achieve the highest possible return by investing partly in a worldwide selection of investments in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-strategy) and partly in a Central and Eastern European selection of investments.

The target allocation for the asset classes is 30% shares and/or share-related investments ('the stock component') and 70% bonds and/or bond-related investments ('the bond component'). It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV. It is therefore possible for the sub-fund to invest in asset classes that are not included in the target allocation. Any deviation from the target allocation based on the investment strategy of KBC Asset Management NV only impacts the target allocation of the worldwide stock and bond component.

The portfolio systematically contains more bonds than shares.

The target allocation for the stock component is 15% a worldwide selection of shares that may come from any region, sector or theme and 15% a selection of Bulgarian shares.

The target allocation for the bond component is 20% a worldwide selection of bonds and/or bond-related investments that may come from any region, sector or theme, and 50% a Central and Eastern European selection of bonds and debt instruments.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The compartment is actively managed, without reference to a benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or

- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or

- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to CSOB Asset Management a.s. investiční společnost, Radlicka 333/150 , 150 57 , Praha 5, Czech Republic.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

In line with the defined strategy, the fund was and is invested in different asset classes combining Bulgarian equities, global equities, CEE bonds denominated in EUR and local currencies and global bonds.

The position in KBC Bonds Emerging Europe represented more than 25% of the number of units outstanding of that sub-fund (56.19%).

In accordance with answer 4(a) of the European Securities and Markets Authority (ESMA) document 'Questions and Answers on the Application of the UCITS Directive', the management company shall assess a rebalancing of the investment portfolio in the best interests of investors, always with a normal prudent management of the investment portfolio in mind.

2.1.8. Future policy

Following weekly strategy of KBC AM, together with fundamental positioning in bond part and stock picks

2.1.9. Summary risk indicator (SRI)

Institutional F shares BG: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the fixed income component does not provide any protection against an increase in inflation.
- a moderate level of credit risk: the fixed income component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the fixed income component does not provide any protection against an increase in inflation.
- a moderate level of credit risk: the fixed income component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 BGN.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Platinum Portfolio (in Bulgarian Leva)

	1 st half of year	2 nd half of year	Year
Purchases	99,706,970.18	17,559,977.59	117,266,947.77
Sales	43,259,235.00	20,101,659.43	63,360,894.43
Total 1	142,966,205.18	37,661,637.02	180,627,842.20
Subscriptions	83,596,851.24	12,853,197.35	96,450,048.59
Redemptions	20,119,802.13	23,245,143.80	43,364,945.93
Total 2	103,716,653.37	36,098,341.15	139,814,994.52
Monthly average of total assets	329,283,714.45	366,976,557.44	348,436,581.82
Turnover rate	11.92%	0.42%	11.71%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

Institutional F shares BG

BE6328052632
Horizon Platinum Portfolio Institutional F shares BG CAP
Annual performance on 31/12/2023 (in BGN)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Starting date	Share classes						
CAP	BE6328052632	BGN	8.94%								18/11/2021	-2.05%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Institutional F shares BG

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in BGN and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :
$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:
$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

Horizon Platinum Portfolio Classic Shares CAP

Annual performance on 31/12/2023 (in BGN)

The cumulative returns are shown where they relate to a period of at least one year.

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Institutional F shares BG Capitalisation :

Ongoing charges : 1,465%
Transaction costs: 0,015%

Classic Shares Capitalisation :

Ongoing charges : 0,239%
Transaction costs: 0,015%

Percentage calculated at reporting date: 31 December 2023 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 0% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Institutional F shares BG

Fee for managing the investment portfolio	Max 1.26%	per year calculated on the basis of the average total net assets of the sub-fund. For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio. CSOB Asset Management a.s investiční společnost receives a fee from the management company of max. 1,26% of .00% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	

Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests at least 50% of its assets in shares, directly or indirectly, that may come from any region, sector or theme.

The manager ensures that there is an adequate spread among shares in the equities portfolio. To ensure this, at least 40 different shares will be included.

Based on factors such as the economic and financial outlook, the manager may decide to invest some of the assets in deposits and short-term debt instruments temporarily. These investments are limited to a maximum 25% of the assets.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

This may involve money market instruments or securities. Debt instruments issued by both public bodies and companies may be considered.

The rating of money market instruments shall be at least A-2 from Standard & Poor's or an equivalent rating from Moody's or Fitch or, in the absence of a rating, a mean credit risk profile that is at least equivalent according to the manager.

The rating of securities shall be at least A- from Standard & Poor's or an equivalent rating from Moody's or Fitch or, in the absence of a rating, a mean credit risk profile that is at least equivalent according to the manager.

The debt instruments in which the sub-fund invests have a maximum maturity of 397 days. If the interest rate is changed in line with developments on the money market within a period of 397 days maximum, the maturity may be longer, but will never be longer than two years.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Thanks to a prolonged rally in November and December, 2023 ended up being an excellent year for the stock markets, exactly like 2022. The S&P500 in the US almost equalled the absolute record it had set in early 2022. Most European stock markets were also able to turn in fine performances.

Stock markets rose in defiance of macroeconomic noise and various concerns, including the lingering Russian-Ukrainian war, (core) inflation remaining relatively high, the sharp rate hikes carried out by central banks, the regional banking crisis in the US and the most widely predicted recession ever, the arrival of which economists nonetheless kept pushing back. Investors have had a turbulent time, with market sentiment even more volatile than usual in 2023. Recessionary concerns at the start of the year were supplanted by resilient economic growth in the summer, followed by a correction in the autumn due to fears that interest rates would remain higher for longer, before rallying at the end of the year driven by the prospect of future rate cuts.

The battle against inflation seems to have been won. Since 2022, central banks have hiked interest rates sharply and reduced their asset purchasing programmes to curb fast-rising inflation. These efforts continued unabated in 2023, and with success as price increases slowed down. The decline in inflation enables interest rates to fall, and the lower the level of interest rates, the more attractive that shares become.

The Nasdaq was the best-performing index by a mile, gaining 44% and recording its best year since 1999, thanks in part to the rise of generative artificial intelligence and ChatGPT. A select group of companies was the driving force behind the bullish US stock market, namely Apple, Microsoft, Alphabet, Amazon, Meta, Tesla and Nvidia. This elite cluster, also referred to as the 'Magnificent Seven', posted a collective gain of no less than 80% in 2023. By contrast, the combined gain recorded by the remaining 493 companies in the S&P500 index came to 'just' 5% or thereabouts.

The Chinese stock market was the big underperformer, with the property crisis, deflation and slowing economic growth all having a major impact on it. It has never recovered from the blow dealt by the coronavirus: since the outbreak began in 2020, the Hang Seng index – one of China's leading indices – has lost almost 40%.

The fund had a good year and managed to beat the world index in 2023. This came about thanks to a very strong selection of software companies like Palo Alto Networks, Salesforce and Cadence Design, semiconductor companies like AMD, ASM International and Nvidia, as well as a number of other heavyweights like Meta and Amazon. On the other hand, the decision to give more weight to defensive sectors because of the difficult macroeconomic conditions was detrimental to the fund's performance.

2.1.8. Future policy

In retrospect, the forecasts for 2023 turned out to be of little value, as the two main macroeconomic ones failed to materialise, namely the widely predicted recession in the US and the expected robust recovery in China following the lifting of draconian restrictions related to the zero-Covid policy there. The general expectation for 2024 is that the economy can achieve a soft landing and that central banks will cut key rates. Although reality may well turn out to be different, we are also currently assuming a scenario of a strengthening economy and rate cuts in the second half of the year.

In view of the economy picking up speed, we are therefore poised to systematically increase the weight of cyclical shares in the fund by, for instance, investing in companies active in manufacturing, transportation or materials. Upping investments in small-cap and mid-cap companies is also a good option in this scenario of a recovering economy. Of course, we also intend to add the shares of companies that benefit from interest-rate cuts, such as real estate or growth companies. However, we are starting the year with a very balanced portfolio and still with a slight preference for sectors that tend to be more defensive, such as health care and consumer staples. In addition, we currently have most confidence in companies operating in the software and semiconductor sectors.

All things considered, we believe that 2024 could be another good year for the stock market, albeit with somewhat lower returns than in 2023. The prospect of rate cuts should support share valuations. The big question, of course, is whether corporate earnings will hold up. 2024 will undoubtedly be another special year, with the focus being on important elections throughout the world, two ongoing armed conflicts, high expectations about artificial intelligence and companies looking to achieve solid earnings growth. In other words, a promising foundation for making a diversified but well-considered selection of shares.

2.1.9. Summary risk indicator (SRI)

4 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of Horizon Private Banking Active Stock Selection (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	62,171,485.82	96,520,188.10	158,691,673.92
Sales	53,754,683.12	71,396,611.46	125,151,294.58
Total 1	115,926,168.94	167,916,799.56	283,842,968.50
Subscriptions	23,981,081.66	34,039,148.38	58,020,230.04
Redemptions	12,868,800.31	14,040,807.03	26,909,607.34
Total 2	36,849,881.97	48,079,955.41	84,929,837.38
Monthly average of total assets	412,887,124.61	453,042,783.34	433.130.886.44
Turnover rate	19.15%	26.45%	45.92%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
Distribution units (DIV)
Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$
i = 1 ... N
from which C = C0 * ... * CN.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2024: 17,0555 net (24,3650 gross).

2.4.6. Costs

Ongoing Charges and Transaction costs:

Capitalisation :

Ongoing charges : 1,560%
Transaction costs: 0,062%

Distribution :

Ongoing charges : 1,571%
Transaction costs: 0,062%

Percentage calculated at reporting date: 31 December 2023 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,41% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.25%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.15%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-

fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2. Information on Horizon Privileged Portfolio Defensive

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date:	3 March 2006
Initial subscription price:	250 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. The investment policy aims to follow the investment strategy designed for an investor with a specific risk profile.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments, bonds and/or bond-related investments, money market instruments, cash and/or alternative investments (including real estate, and financial instruments that are linked to price movements on the commodity market).

The target allocation for the asset classes is 30% shares and/or share-related investments ("the stock component") and 70% bonds and/or bond-related investments ("the bond component").

It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy). It is therefore possible for the sub-fund to invest in asset classes that are not included in the target allocation. The portfolio systematically contains more bonds than shares.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the "Characteristics of the bonds and debt instruments" section below.

The fund is actively managed with reference to the following benchmark: 30% MSCI All Countries World - Net Return Index, 35% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index, 35% iBoxx Euro Corporate bonds Total Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 1.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

Following weekly strategy of KBC AM

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 4 416 463.52 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Privileged Portfolio Defensive (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	14,427,533.83	7,244,250.27	21,671,784.11
Sales	18,986,614.56	10,588,322.62	29,574,937.17
Total 1	33,414,148.39	17,832,572.89	51,246,721.28
Subscriptions	227,448.13	148,771.11	376,219.24
Redemptions	5,246,993.30	3,439,297.70	8,686,291.00
Total 2	5,474,441.43	3,588,068.81	9,062,510.24
Monthly average of total assets	63,198,927.12	60,458,221.70	61.806.292.25
Turnover rate	44.21%	23.56%	68.25%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Fund follows KBC AM weekly strategy.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2022 - 12	64,517,383.71	309.37	
2023 - 12	61,111,447.12	334.92	

2.4.5. Performance figures

BE0945926799
Horizon Privileged Portfolio Defensive CAP
Annual performance compared to the benchmark on 31/12/2023 (in EUR)

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE0945926799	EUR	8.26%	10.75%	-0.90%	0.21%	0.56%	2.56%	1.35%	2.78%	03/03/2006	1.65%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :
$$\left[\frac{NIW(D)}{NIW(Y)} \right]^{1/X} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:
$$\left[\frac{NIW(D)}{NIW(S)} \right]^{1/F} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Ongoing charges : 1,516%

Transaction costs: 0,028%

Percentage calculated at reporting date: 31 December 2023 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 52,95% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.36%	<p>per year calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,36% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

2. Information on Horizon Privileged Portfolio Dynamic

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date:	3 March 2006
Initial subscription price:	250 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. The investment policy aims to follow the investment strategy designed for an investor with a specific risk profile.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments, bonds and/or bond-related investments, money market instruments, cash and/or alternative investments (including real estate, and financial instruments that are linked to price movements on the commodity market).

The target allocation for the asset classes is 55% shares and/or share-related investments ("the stock component") and 45% bonds and/or bond-related investments ("the bond component").

It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy). It is therefore possible for the sub-fund to invest in asset classes that are not included in the target allocation. The portfolio is generally evenly allocated between shares and bonds.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the "Characteristics of the bonds and debt instruments" section below.

The fund is actively managed with reference to the following benchmark: 22.5% iBoxx Euro Corporate bonds Total Return Index, 22.5% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index, 55% MSCI All Countries World - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 2.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

Following weekly strategy of KBC AM

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 11 054 102.13 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Privileged Portfolio Dynamic (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	33,655,802.34	19,804,702.00	53,460,504.34
Sales	40,610,240.83	23,940,800.72	64,551,041.55
Total 1	74,266,043.17	43,745,502.72	118,011,545.88
Subscriptions	1,392,892.01	1,117,356.04	2,510,248.05
Redemptions	7,039,320.48	5,612,871.33	12,652,191.81
Total 2	8,432,212.49	6,730,227.37	15,162,439.86
Monthly average of total assets	150,224,372.97	150,000,412.07	150,110,526.18
Turnover rate	43.82%	24.68%	68.52%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Fund follows KBC AM weekly strategy.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

BE0945925783
Horizon Privileged Portfolio Dynamic CAP
Annual performance compared to the benchmark on 31/12/2023 (in EUR)

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE0945925783	EUR	10.30%	13.35%	1.78%	3.44%	3.45%	6.12%	3.11%	5.54%	03/03/2006	2.47%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :
$$\left[\frac{NIW(D)}{NIW(Y)} \right]^{1/X} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:
$$\left[\frac{NIW(D)}{NIW(S)} \right]^{1/F} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Ongoing charges : 1,669%

Transaction costs: 0,054%

Percentage calculated at reporting date: 31 December 2023 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 52,97% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.54%	<p>per year calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,54% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date:	3 March 2006
Initial subscription price:	250 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. The investment policy aims to follow the investment strategy designed for an investor with a specific risk profile.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments, bonds and/or bond-related investments, money market instruments, cash and/or alternative investments (including real estate, and financial instruments that are linked to price movements on the commodity market).

The target allocation for the asset classes is 75% shares and/or share-related investments ("the stock component") and 25% bonds and/or bond-related investments ("the bond component").

It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy). It is therefore possible for the sub-fund to invest in asset classes that are not included in the target allocation. As a rule, the portfolio contains more shares than bonds.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the "Characteristics of the bonds and debt instruments" section below.

The fund is actively managed with reference to the following benchmark: 12.5% iBoxx Euro Corporate bonds Total Return Index, 12.5% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index, 75% MSCI All Countries World - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 2.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Fund follows KBC AM weekly strategy.

2.1.8. Future policy

The Fund will follow KBC AM weekly strategy.

2.1.9. Summary risk indicator (SRI)

4 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 813 114.58 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

Geographic breakdown (as a % of securities portfolio)

The geographical distribution of the sub-fund's investments is calculated based on the geographical distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Privileged Portfolio Dynamic High (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	2,723,755.64	1,697,396.28	4,421,151.92
Sales	4,021,150.86	2,537,530.38	6,558,681.23
Total 1	6,744,906.50	4,234,926.66	10,979,833.15
Subscriptions	35,458.62	135,533.52	170,992.14
Redemptions	1,196,732.59	940,316.82	2,137,049.41
Total 2	1,232,191.21	1,075,850.34	2,308,041.55
Monthly average of total assets	13,105,434.67	12,580,527.47	12.838.606.84
Turnover rate	42.06%	25.11%	67.54%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Fund follows KBC AM weekly strategy.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

BE0945923762
Horizon Privileged Portfolio Dynamic High CAP
Annual performance compared to the benchmark on 31/12/2023 (in EUR)

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE0945923762	EUR	11.95%	15.44%	4.29%	6.41%	5.75%	9.07%	4.52%	7.42%	03/03/2006	2.99%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :
$$\left[\frac{NIW(D)}{NIW(Y)} \right]^{1/X} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:
$$\left[\frac{NIW(D)}{NIW(S)} \right]^{1/F} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Ongoing charges : 1,841%

Transaction costs: 0,074%

Percentage calculated at reporting date: 31 December 2023 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 52,99% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.68%	<p>per year calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,68% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

2. Information on Horizon Privileged Portfolio Pro 90 August

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date:	28 July 2006
Initial subscription price:	250 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. The sub-fund also aims to set a floor price for the net asset value each year.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk.** In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in more risky assets (such as shares, share UCIs, medium and longer-term bonds, medium and longer-term bond UCIs, certain money market instruments, and alternative investments (like real estate and financial instruments that are linked to price movements on the commodity markets)) and/or less risky assets (such as certain money market instruments, shorter-term bonds, shorter-term bond UCIs and cash). Compared with bond UCIs classified as riskier assets, bond UCIs belonging to the less risky assets invest more in instruments with a shorter term to maturity, which means that they are less sensitive to movements in interest rates. In principle, therefore, they are less volatile.

The sub-fund may be invested up to 95% in shares, up to 65% in medium and longer-term bonds and up to 100% in shorter-term bonds.

The sub-fund has two objectives:

1. to achieve the highest possible return by making investments in accordance with the investment strategy of KBC Asset Management NV.

The target allocation for the asset classes is 55% shares and/or share-related investments (“the stock component”) and 45% bonds and/or bond-related investments (“the bond component”).

It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy) and/or to protect the floor price, as described in section 2. It is therefore possible for the sub-fund to invest in asset classes that have not been included in the target allocation.

2. to protect a floor price.

The sub-fund also aims to set a floor price for the net asset value each year. This floor price is valid for one year and is always equal to 90% of the net asset value on the last Belgian banking day of the previous July. The initial floor price is equal to 90% of the initial net asset value and is valid until the last banking day of July 2007. Achieving the objective to protect the floor price becomes increasingly important the closer the net asset value gets to the floor price. In such a situation, the asset allocation will be increasingly focused on protecting the floor price and will deviate from the target allocation specified in point 1 above.

The floor price changes every year based on the net asset value. Any decline in the net asset value when a new floor price is being set will result in the new floor price being lower than the current applicable value. Any increase in the net asset value when a new floor price is being set will result in the new floor price being higher than the current applicable value.

The sub-fund does not provide any capital protection or capital guarantee, nor does it offer a guaranteed return. It is therefore possible for the net asset value to be lower than the floor price.

The allocation of the assets is influenced by whether they involve more or less risk. Riskier assets are intended to generate the return, while less risky assets are designed to protect the floor.

During the year, the manager may deviate from the target allocation in the following ways:

1) If the net asset value falls towards the floor price, the manager may intervene and replace investments in riskier assets with investments in less risky ones. If the net asset value hits the floor price, the manager may switch completely to investments in money market instruments, shorter-term bonds, shorter-term bond funds, and/or cash. Conversely, if the net asset value moves away from the floor price and goes up to a strong enough extent, the manager may intervene and gradually reallocate the assets by replacing the less risky assets with more risky ones.

2) If markets develop favourably and provided the net asset value is sufficiently high relative to the floor price, and for as long as both these conditions are met, the stock component can temporarily go up sharply relative to the percentage determined when the floor price was set.

3) The bond component will be monitored separately and, if its performance is negative, the exposure within this component may be reduced periodically, for instance by reducing investments in bonds in favour of investments in money market instruments and cash.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the “Characteristics of the bonds and debt instruments” section below.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors (‘PAI’) as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

The objective of the fund is to achieve the highest possible return, while aiming at maintaining the NAV above the floor level. The allocation in equity, bond and money market investments is determined by a dynamic portfolio insurance algorithm. The fund has three profiles, dynamic, dynamic-up and very dynamic and the gearing is determined by the NAV distance to the floor.

Horizon Portfolio Pro 90 Aug

NAV 29/12/2023: 317.14

Floor NAV : 278.96

The fund entered 2023 with a high allocation to cash, at around 50% of the fund, protecting against the poor equity market performance seen the previous year. Markets had sold off with the expectation that a tighter monetary policy stance from many of the world's Central Banks, could tip major economies into recession. Europe was seen as particularly vulnerable as the winter progressed with the backdrop of higher energy costs.

However, the energy crisis failed to materialise and natural gas prices fell. Global stock markets began to rebound, led by European shares, as sentiment amongst investors improved. The failure of a small number of US Banks – such as Silicon Valley Bank (SVB) and Signature Bank – in Q1, threatened to derail optimism, but action from US authorities helped to avoid contagion.

The key investment themes of high inflation, hawkish western central banks and increasing geopolitical tensions weighted on sentiment at times and led to volatile markets. While Central Banks expected interest rates to peak by mid-2023, investors were looking forward to a pause and even hopeful of the first signs of rate cuts in the developed world. However, this thesis faced several challenges, as robust jobs figures persisted in the US and economic growth continued to be better than many had anticipated. This saw a further sell-off in global bonds, with many benchmark bonds reaching yields last seen prior to the Great Financial Crisis in 2008. Higher-for-longer was front on many investor's minds in Q3, with markets pricing rates to remain restrictive for a prolonged period. However, this narrative changed swiftly in the middle of Q4, as investors took solace in the downward trajectory of inflation in developed markets and largely less hawkish rhetoric from Central Bank policy officials. This provided a strong back-drop for many of the world's equity markets, which had already been buoyed by surging Artificial Intelligence (AI) optimism. Resulting in many regional equity markets finishing the year in the region of all-time-highs.

2.1.8. Future policy

Future investment and the participation level in risky assets will be determined by the dynamic portfolio insurance model while ensuring that the floor is protected.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Privileged Portfolio Pro 90 August (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	73,507,203.73	96,908,294.82	170,415,498.55
Sales	84,581,246.35	106,055,184.44	190,636,430.80
Total 1	158,088,450.08	202,963,479.26	361,051,929.35
Subscriptions	103,324.77	22,612.13	125,936.90
Redemptions	10,449,033.98	8,545,666.02	18,994,700.00
Total 2	10,552,358.75	8,568,278.15	19,120,636.90
Monthly average of total assets	100,078,770.77	92,055,357.32	96,017,536.80
Turnover rate	147.42%	211.17%	356.11%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The turnover in assets is primarily determined by the dynamic portfolio insurance algorithm employed in the fund, which determines its allocation to risky assets (equity, bonds, etc.) or less risky assets (cash). Additionally, the fund uses an active investment strategy and is positioned to benefit from the investment views of KBC Asset Management NV.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

BE0946343119
Horizon Privileged Portfolio Pro 90 August CAP
Annual performance on 31/12/2023 (in EUR)

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Starting date	Share classes						
CAP	BE0946343119	EUR	5.21%		1.80%		1.03%		1.16%		28/07/2006	1.37%

Risk warning: Past performance is not a guide to future performance.
* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :
$$[\text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:
$$[\text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Ongoing charges : 2,300%

Transaction costs: 0,054%

Percentage calculated at reporting date: 31 December 2023 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Fee for managing the investment portfolio

The management fee amounts to 1,018,823.70 EUR. An additional fee of 479,352.93 EUR was charged regarding commissions and charges for allocating the assets.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 38,64% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.96%	<p>per year (0.50% of which is for the protection of the floor price) calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,96% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date:	3 March 2006
Initial subscription price:	250 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. The sub-fund also aims to set a floor price for the net asset value each year.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in more risky assets (such as shares, share UCIs, medium and longer-term bonds, medium and longer-term bond UCIs, certain money market instruments, and alternative investments (like real estate and financial instruments that are linked to price movements on the commodity markets)) and/or less risky assets (such as certain money market instruments, shorter-term bonds, shorter-term bond UCIs and cash). Compared with bond UCIs classified as riskier assets, bond UCIs belonging to the less risky assets invest more in instruments with a shorter term to maturity, which means that they are less sensitive to movements in interest rates. In principle, therefore, they are less volatile.

The sub-fund may be invested up to 95% in shares, up to 65% in medium and longer-term bonds and up to 100% in shorter-term bonds.

The sub-fund has two objectives:

1. to achieve the highest possible return by making investments in accordance with the investment strategy of KBC Asset Management NV.

The target allocation for the asset classes is 55% shares and/or share-related investments (“the stock component”) and 45% bonds and/or bond-related investments (“the bond component”).

It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy) and/or to protect the floor price, as described in section 2. It is therefore possible for the sub-fund to invest in asset classes that have not been included in the target allocation.

2. to protect a floor price.

The sub-fund also aims to set a floor price for the net asset value each year. This floor price is valid for one year and is always equal to 90% of the net asset value on the last Belgian banking day of the previous January. The initial floor price is equal to 90% of the initial net asset value and is valid until the last banking day of January 2007. Achieving the objective to protect the floor price becomes increasingly important the closer the net asset value gets to the floor price. In such a situation, the asset allocation will be increasingly focused on protecting the floor price and will deviate from the target allocation specified in point 1 above.

The floor price changes every year based on the net asset value. Any decline in the net asset value when a new floor price is being set will result in the new floor price being lower than the current applicable value. Any increase in the net asset value when a new floor price is being set will result in the new floor price being higher than the current applicable value.

The sub-fund does not provide any capital protection or capital guarantee, nor does it offer a guaranteed return. It is therefore possible for the net asset value to be lower than the floor price.

The allocation of the assets is influenced by whether they involve more or less risk. Riskier assets are intended to generate the return, while less risky assets are designed to protect the floor.

During the year, the manager may deviate from the target allocation in the following ways:

1) If the net asset value falls towards the floor price, the manager may intervene and replace investments in riskier assets with investments in less risky ones. If the net asset value hits the floor price, the manager may switch completely to investments in money market instruments, shorter-term bonds, shorter-term bond funds, and/or cash. Conversely, if the net asset value moves away from the floor price and goes up to a strong enough extent, the manager may intervene and gradually reallocate the assets by replacing the less risky assets with more risky ones.

2) If markets develop favourably and provided the net asset value is sufficiently high relative to the floor price, and for as long as both these conditions are met, the stock component can temporarily go up sharply relative to the percentage determined when the floor price was set.

3) The bond component will be monitored separately and, if its performance is negative, the exposure within this component may be reduced periodically, for instance by reducing investments in bonds in favour of investments in money market instruments and cash.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the “Characteristics of the bonds and debt instruments” section below.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors (‘PAI’) as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’), through the general exclusion policy

and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

The objective of the fund is to achieve the highest possible return, while aiming at maintaining the NAV above the floor level. The allocation in equity, bond and money market investments is determined by a dynamic portfolio insurance algorithm. The fund has three profiles, dynamic, dynamic-up and very dynamic and the gearing is determined by the NAV distance to the floor.

Horizon Portfolio Pro 90 Feb

NAV 29/12/2023: 348.18
Floor NAV: 297.21

The fund entered 2023 with a high allocation to raise, at around 80% of the fund, protecting against the poor equity market performance seen the previous year. Markets had sold off with the expectation that a tighter monetary policy stance from many of the world's Central Banks, could tip major economies into recession. Europe was seen as particularly vulnerable as the winter progressed with the backdrop of higher energy costs.

However, the energy crisis failed to materialise and natural gas prices fell. Global stock markets began to rebound, led by European shares, as sentiment amongst investors improved. The fund was able to benefit from this renewed optimism as it reset at the end of January, moving back to 100% in risky assets at that point. The failure of a small number of US Banks – such as Silicon Valley Bank (SVB) and Signature Bank – in Q1, threatened to derail optimism, but action from US authorities helped to avoid contagion.

The key investment themes of high inflation, hawkish western central banks and increasing geopolitical tensions weighed on sentiment at times and led to volatile markets. While Central Banks expected interest rates to peak by mid-2023, investors were looking forward to a pause and even hopeful of the first signs of rate cuts in the developed world. However, this thesis faced several challenges, as robust jobs figures persisted in the US and economic growth continued to be better than many had anticipated. This saw a further sell-off in global bonds, with many benchmark bonds reaching yields last seen prior to the Great Financial Crisis in 2008. Higher-for-longer was front on many investor's minds in Q3, with markets pricing rates to remain restrictive for a prolonged period. However, this narrative changed swiftly in the middle of Q4, as investors took solace in the downward trajectory of inflation in developed markets and largely less hawkish rhetoric from Central Bank policy officials. This provided a strong back-drop for many of the world's equity markets, which had already been buoyed by surging Artificial Intelligence (AI) optimism. Resulting in many regional equity markets finishing the year in the region of all-time-highs. The fund was able to benefit from this end of year momentum, as it increased its allocation by gearing-up to its very dynamic profile at the beginning of December.

2.1.8. Future policy

Future investment and the participation level in risky assets will be determined by the dynamic portfolio insurance model while ensuring that the floor is protected.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.4.2. Changes in the composition of the assets of Horizon Privileged Portfolio Pro 90 February (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	308,188,924.18	115,205,938.29	423,394,862.46
Sales	332,050,608.66	134,125,639.46	466,176,248.12
Total 1	640,239,532.84	249,331,577.74	889,571,110.58
Subscriptions	813,742.26	102,034.27	915,776.53
Redemptions	20,418,780.22	18,523,754.15	38,942,534.37
Total 2	21,232,522.48	18,625,788.42	39,858,310.90
Monthly average of total assets	207,048,234.56	191,510,589.14	199,215,206.70
Turnover rate	298.97%	120.47%	426.53%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The turnover in assets is primarily determined by the dynamic portfolio insurance algorithm employed in the fund, which determines its allocation to risky assets (equity, bonds, etc.) or less risky assets (cash). Additionally, the fund uses an active investment strategy and is positioned to benefit from the investment views of KBC Asset Management NV.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

BE0945921741
Horizon Privileged Portfolio Pro 90 February CAP
Annual performance on 31/12/2023 (in EUR)

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Starting date	Share classes						
CAP	BE0945921741	EUR	5.75%		1.27%		0.70%		0.79%		03/03/2006	1.88%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :
$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:
$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Ongoing charges : 2,395%

Transaction costs: 0,074%

Percentage calculated at reporting date: 31 December 2023 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Fee for managing the investment portfolio

The management fee amounts to 2,113,466.28 EUR. An additional fee of 994,295.51 EUR was charged regarding commissions and charges for allocating the assets.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 38,71% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.96%	<p>per year (0.50% of which is for the protection of the floor price) calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,96% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date:	27 April 2006
Initial subscription price:	250 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. The sub-fund also aims to set a floor price for the net asset value each year.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in more risky assets (such as shares, share UCIs, medium and longer-term bonds, medium and longer-term bond UCIs, certain money market instruments, and alternative investments (like real estate and financial instruments that are linked to price movements on the commodity markets)) and/or less risky assets (such as certain money market instruments, shorter-term bonds, shorter-term bond UCIs and cash). Compared with bond UCIs classified as riskier assets, bond UCIs belonging to the less risky assets invest more in instruments with a shorter term to maturity, which means that they are less sensitive to movements in interest rates. In principle, therefore, they are less volatile.

The sub-fund may be invested up to 95% in shares, up to 65% in medium and longer-term bonds and up to 100% in shorter-term bonds.

The sub-fund has two objectives:

1. to achieve the highest possible return by making investments in accordance with the investment strategy of KBC Asset Management NV.

The target allocation for the asset classes is 55% shares and/or share-related investments (“the stock component”) and 45% bonds and/or bond-related investments (“the bond component”).

It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy) and/or to protect the floor price, as described in section 2. It is therefore possible for the sub-fund to invest in asset classes that have not been included in the target allocation.

2. to protect a floor price.

The sub-fund also aims to set a floor price for the net asset value each year. This floor price is valid for one year and is always equal to 90% of the net asset value on the last Belgian banking day of the previous April. The initial floor price is equal to 90% of the initial net asset value and is valid until the last banking day of April 2007. Achieving the objective to protect the floor price becomes increasingly important the closer the net asset value gets to the floor price. In such a situation, the asset allocation will be increasingly focused on protecting the floor price and will deviate from the target allocation specified in point 1 above.

The floor price changes every year based on the net asset value. Any decline in the net asset value when a new floor price is being set will result in the new floor price being lower than the current applicable value. Any increase in the net asset value when a new floor price is being set will result in the new floor price being higher than the current applicable value.

The sub-fund does not provide any capital protection or capital guarantee, nor does it offer a guaranteed return. It is therefore possible for the net asset value to be lower than the floor price.

The allocation of the assets is influenced by whether they involve more or less risk. Riskier assets are intended to generate the return, while less risky assets are designed to protect the floor.

During the year, the manager may deviate from the target allocation in the following ways:

1) If the net asset value falls towards the floor price, the manager may intervene and replace investments in riskier assets with investments in less risky ones. If the net asset value hits the floor price, the manager may switch completely to investments in money market instruments, shorter-term bonds, shorter-term bond funds, and/or cash. Conversely, if the net asset value moves away from the floor price and goes up to a strong enough extent, the manager may intervene and gradually reallocate the assets by replacing the less risky assets with more risky ones.

2) If markets develop favourably and provided the net asset value is sufficiently high relative to the floor price, and for as long as both these conditions are met, the stock component can temporarily go up sharply relative to the percentage determined when the floor price was set.

3) The bond component will be monitored separately and, if its performance is negative, the exposure within this component may be reduced periodically, for instance by reducing investments in bonds in favour of investments in money market instruments and cash.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the “Characteristics of the bonds and debt instruments” section below.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors (‘PAI’) as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’), through the general exclusion policy

and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

The objective of the fund is to achieve the highest possible return, while aiming at maintaining the NAV above the floor level. The allocation in equity, bond and money market investments is determined by a dynamic portfolio insurance algorithm. The fund has three profiles, dynamic, dynamic-up and very dynamic and the gearing is determined by the NAV distance to the floor.

HorizonPortfolioPro90May	NAV29/12/2023	FloorNAV
	357.78	302.87

The fund entered 2023 with a high allocation to raise, at around 60% of the fund, protecting against the poor equity market performance seen the previous year. Markets had sold off with the expectation that a tighter monetary policy stance from many of the world's Central Banks, could tip major economies into recession. Europe was seen as particularly vulnerable as the winter progressed with the backdrop of higher energy costs.

However, the energy crisis failed to materialise and natural gas prices fell. Global stock markets began to rebound, led by European shares, as sentiment amongst investors improved. The failure of a small number of US Banks – such as Silicon Valley Bank (SVB) and Signature Bank – in Q1, threatened to derail optimism, but action from US authorities helped to avoid contagion.

The key investment themes of high inflation, hawkish western central banks and increasing geopolitical tensions weighed on sentiment at times and led to volatile markets. While Central Banks expected interest rates to peak by mid-2023, investors were looking forward to a pause and even hopeful of the first signs of rate cuts in the developed world. However, this thesis faced several challenges, as robust jobs figures persisted in the US and economic growth continued to be better than many had anticipated. This saw a further sell-off in global bonds, with many benchmark bonds reaching yields last seen prior to the Great Financial Crisis in 2008. Higher-for-longer was front on many investor's minds in Q3, with markets pricing rates to remain restrictive for a prolonged period. However, this narrative changed swiftly in the middle of Q4, as investors took solace in the downward trajectory of inflation in developed markets and largely less hawkish rhetoric from Central Bank policy officials. This provided a strong back-drop for many of the world's equity markets, which had already been buoyed by surging Artificial Intelligence (AI) optimism. Resulting in many regional equity markets finishing the year in the region of all-time-highs. The fund was able to benefit from this end of year momentum, as it increased its allocation to equity by gearing-up to dynamic-up in November and very dynamic in December.

2.1.8. Future policy

Future investment and the participation level in risky assets will be determined by the dynamic portfolio insurance model while ensuring that the floor is protected.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Privileged Portfolio Pro 90 May (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	237,672,326.76	144,211,898.46	381,884,225.22
Sales	261,103,338.30	158,002,720.76	419,106,059.06
Total 1	498,775,665.06	302,214,619.23	800,990,284.29
Subscriptions	145,854.58	76,241.85	222,096.43
Redemptions	21,013,560.95	14,964,179.85	35,977,740.80
Total 2	21,159,415.53	15,040,421.70	36,199,837.23
Monthly average of total assets	198,956,324.65	184,981,487.38	191.911.158.75
Turnover rate	240.06%	155.24%	398.51%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The turnover in assets is primarily determined by the dynamic portfolio insurance algorithm employed in the fund, which determines its allocation to risky assets (equity, bonds, etc.) or less risky assets (cash). Additionally, the fund uses an active investment strategy and is positioned to benefit from the investment views of KBC Asset Management NV.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the

net asset value

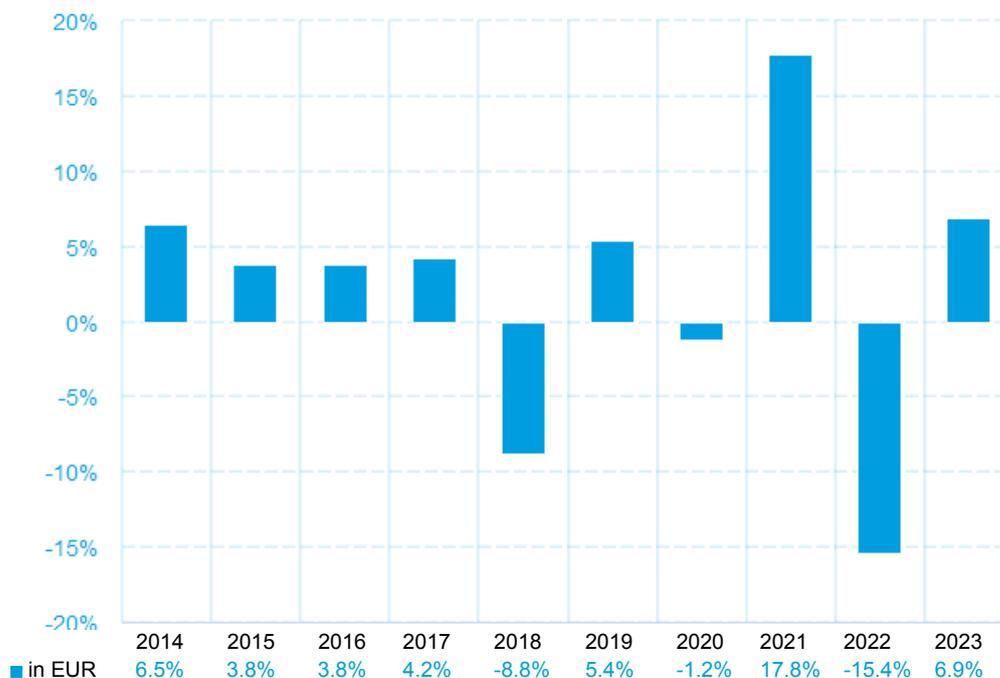

Period	Change in number of shares in circulation						
	Subscriptions		Redemptions		End of period

2.4.5. Performance figures

BE0946104636
Horizon Privileged Portfolio Pro 90 May CAP
Annual performance on 31/12/2023 (in EUR)

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Starting date	Share classes						
CAP	BE0946104636	EUR	6.87%		2.10%		2.07%		1.91%		27/04/2006	2.05%

Risk warning: Past performance is not a guide to future performance.
* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :
$$[\text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:
$$[\text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Ongoing charges : 2,434%

Transaction costs: 0,074%

Percentage calculated at reporting date: 31 December 2023 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Fee for managing the investment portfolio

The management fee amounts to 2,036,311.24 EUR. An additional fee of 957,926.91 EUR was charged regarding commissions and charges for allocating the assets.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 38,68% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.96%	<p>per year (0.50% of which is for the protection of the floor price) calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,96% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2. Information on Horizon Privileged Portfolio Pro 90 November

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date:	2 November 2006
Initial subscription price:	250 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. The sub-fund also aims to set a floor price for the net asset value each year.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in more risky assets (such as shares, share UCIs, medium and longer-term bonds, medium and longer-term bond UCIs, certain money market instruments, and alternative investments (like real estate and financial instruments that are linked to price movements on the commodity markets)) and/or less risky assets (such as certain money market instruments, shorter-term bonds, shorter-term bond UCIs and cash). Compared with bond UCIs classified as riskier assets, bond UCIs belonging to the less risky assets invest more in instruments with a shorter term to maturity, which means that they are less sensitive to movements in interest rates. In principle, therefore, they are less volatile.

The sub-fund may be invested up to 95% in shares, up to 65% in medium and longer-term bonds and up to 100% in shorter-term bonds.

The sub-fund has two objectives:

1. to achieve the highest possible return by making investments in accordance with the investment strategy of KBC Asset Management NV.

The target allocation for the asset classes is 55% shares and/or share-related investments (“the stock component”) and 45% bonds and/or bond-related investments (“the bond component”).

It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy) and/or to protect the floor price, as described in section 2. It is therefore possible for the sub-fund to invest in asset classes that have not been included in the target allocation.

2. to protect a floor price.

The sub-fund also aims to set a floor price for the net asset value each year. This floor price is valid for one year and is always equal to 90% of the net asset value on the last Belgian banking day of the previous October. The initial floor price is equal to 90% of the initial net asset value and is valid until the last banking day of October 2007.

Achieving the objective to protect the floor price becomes increasingly important the closer the net asset value gets to the floor price. In such a situation, the asset allocation will be increasingly focused on protecting the floor price and will deviate from the target allocation specified in point 1 above.

The floor price changes every year based on the net asset value. Any decline in the net asset value when a new floor price is being set will result in the new floor price being lower than the current applicable value. Any increase in the net asset value when a new floor price is being set will result in the new floor price being higher than the current applicable value.

The sub-fund does not provide any capital protection or capital guarantee, nor does it offer a guaranteed return. It is therefore possible for the net asset value to be lower than the floor price.

The allocation of the assets is influenced by whether they involve more or less risk. Riskier assets are intended to generate the return, while less risky assets are designed to protect the floor.

During the year, the manager may deviate from the target allocation in the following ways:

1) If the net asset value falls towards the floor price, the manager may intervene and replace investments in riskier assets with investments in less risky ones. If the net asset value hits the floor price, the manager may switch completely to investments in money market instruments, shorter-term bonds, shorter-term bond funds, and/or cash. Conversely, if the net asset value moves away from the floor price and goes up to a strong enough extent, the manager may intervene and gradually reallocate the assets by replacing the less risky assets with more risky ones.

2) If markets develop favourably and provided the net asset value is sufficiently high relative to the floor price, and for as long as both these conditions are met, the stock component can temporarily go up sharply relative to the percentage determined when the floor price was set.

3) The bond component will be monitored separately and, if its performance is negative, the exposure within this component may be reduced periodically, for instance by reducing investments in bonds in favour of investments in money market instruments and cash.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the “Characteristics of the bonds and debt instruments” section below.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors (‘PAI’) as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

The objective of the fund is to achieve the highest possible return, while aiming at maintaining the NAV above the floor level. The allocation in equity, bond and money market investments is determined by a dynamic portfolio insurance algorithm. The fund has three profiles, dynamic, dynamic-up and very dynamic and the gearing is determined by the NAV distance to the floor.

HorizonPortfolioPro90Nov	NAV29/12/2023	FloorNAV
	344.10	288.96

The fund entered the year with only a small build-up of cash in its allocation, as it had revised its floor lower at the end of October the previous year. Markets entering 2023 had sold off with the expectation that a tighter monetary policy stance from many of the world's Central Banks, could tip major economies into recession. Europe was seen as particularly vulnerable as the winter progressed with the backdrop of higher energy costs.

However, the energy crisis failed to materialise and natural gas prices fell. Global stock markets began to rebound, led by European shares, as sentiment amongst investors improved. The failure of a small number of US Banks – such as Silicon Valley Bank (SVB) and Signature Bank – in Q1, threatened to derail optimism, but action from US authorities helped to avoid contagion.

The key investment themes of high inflation, hawkish western central banks and increasing geopolitical tensions weighed on sentiment at times and led to volatile markets. While Central Banks expected interest rates to peak by mid-2023, investors were looking forward to a pause and even hopeful of the first signs of rate cuts in the developed world. However, this thesis faced several challenges, as robust jobs figures persisted in the US and economic growth continued to be better than many had anticipated. This saw a further sell-off in global bonds, with many benchmark bonds reaching yields last seen prior to the Great Financial Crisis in 2008. Higher-for-longer was front on many investor's minds in Q3, with markets pricing rates to remain restrictive for a prolonged period. However, this narrative changed swiftly in the middle of Q4, as investors took solace in the downward trajectory of inflation in developed markets and largely less hawkish rhetoric from Central Bank policy officials. This provided a strong back-drop for many of the world's equity markets, which had already been buoyed by surging Artificial Intelligence (AI) optimism. Resulting in many regional equity markets finishing the year in the region of all-time-highs. The fund was able to benefit from this end of year momentum, as it increased its allocation to equity by gearing-up to dynamic-up in November and very dynamic in December.

2.1.8. Future policy

Future investment and the participation level in risky assets will be determined by the dynamic portfolio insurance model while ensuring that the floor is protected.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Privileged Portfolio Pro 90 November (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	154,342,159.82	120,179,611.87	274,521,771.69
Sales	169,108,215.92	132,333,653.12	301,441,869.04
Total 1	323,450,375.74	252,513,264.99	575,963,640.73
Subscriptions	244,181.67	40,814.76	284,996.43
Redemptions	13,479,648.88	12,101,777.91	25,581,426.79
Total 2	13,723,830.55	12,142,592.67	25,866,423.22
Monthly average of total assets	154,356,244.78	144,654,415.53	149,424,481.57
Turnover rate	200.66%	166.17%	368.14%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The turnover in assets is primarily determined by the dynamic portfolio insurance algorithm employed in the fund, which determines its allocation to risky assets (equity, bonds, etc.) or less risky assets (cash). Additionally, the fund uses an active investment strategy and is positioned to benefit from the investment views of KBC Asset Management NV.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the

net asset value

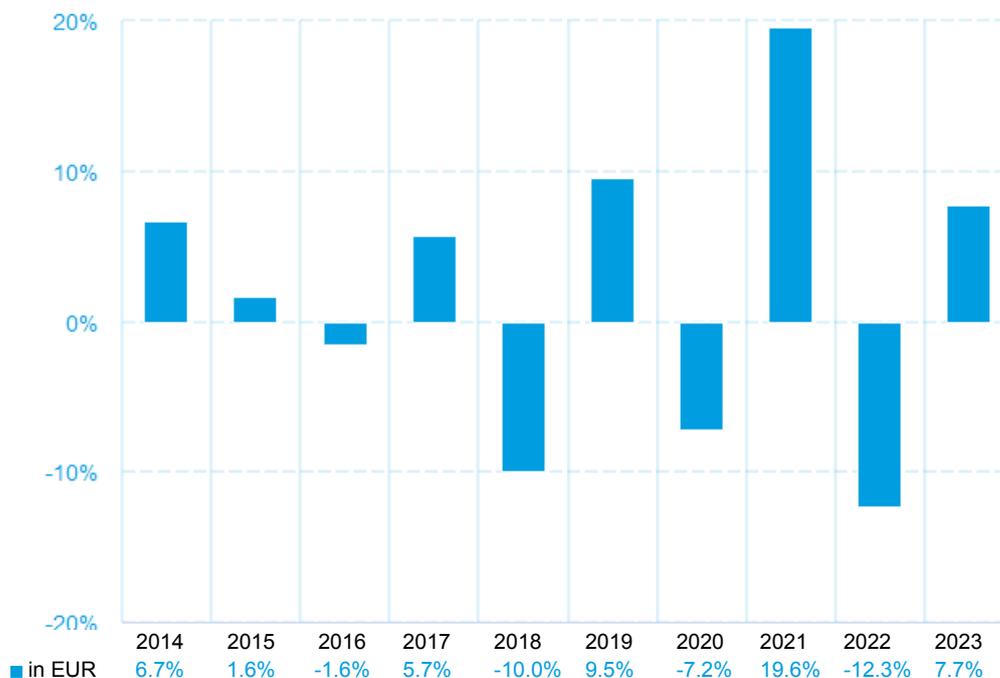

Period	Change in number of shares in circulation						
	Subscriptions		Redemptions		End of period		
	Capitalization	Distribution	Capitalization	Distribution	Capitalization	Distribution	Totaal
2021 - 12	7,259.67		238,180.79		651,436.76		651,436.76

2022 - 12	158,555,154.10	319.46	
2023 - 12	144,180,758.10	344.10	

2.4.5. Performance figures

BE0946433043
Horizon Privileged Portfolio Pro 90 November CAP
Annual performance on 31/12/2023 (in EUR)

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE0946433043	EUR	7.71%		4.15%		2.81%		1.54%		02/11/2006	1.88%

Risk warning: Past performance is not a guide to future performance.
* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :
$$[\text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:
$$[\text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Ongoing charges : 2,386%

Transaction costs: 0,074%

Percentage calculated at reporting date: 31 December 2023 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Fee for managing the investment portfolio

The management fee amounts to 1,586,104.38 EUR. An additional fee of 746,161.97 EUR was charged regarding commissions and charges for allocating the assets.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 38,68% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.96%	<p>per year (0.50% of which is for the protection of the floor price) calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,96% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2. Information on Horizon Start 100

2.1. Management report

2.1.1. Launch date and subscription price

Launch date:	10 October 2022
Initial subscription price:	10 EUR
Maturity date:	29 October 2027
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 EUR at Maturity (i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

Capital Protection

The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from www.kbc.be/prospectus/spv.

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from www.kbc.be.

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
 - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
 - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

No formal guarantee

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

Potential return

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

Sub-fund's investment policy

Permitted asset classes

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

Characteristics of the bonds and other debt instruments

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

Permitted swap transactions

The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.

The sub-fund's risk profile is not affected by the use of these swaps.

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.

The sub-fund's risk profile is not affected by the use of these swaps.

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

The swaps under (3) serve to hedge the credit risk.

The sub-fund's risk profile is not affected by the use of these swaps.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Strategie selected

Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation.

If the Value of the basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation has risen relative to its Starting Value, 100% of this increase in Value (= (End Value minus the Starting Value) divided by the Starting Value) will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital gain will be capped at 40% (yield to maturity of 6.90% before taxes and charges).

Negative performances of the basket are not taken into account.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund took into account the principal adverse impacts on sustainability factors of its investment decisions ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through the application of the KBC Group Investment Policy as well as through the KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and nuclear and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took particular account of exposure to controversial weapons ('indicator 14') by excluding companies involved in controversial weapon systems, and to violations of UN Global Compact principles or Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

Maturity

Friday 29 October 2027 (payment with a value date of D+1 banking day)

Currency

EUR, for all shares in the basket, changes in the value of the currency in which they are expressed relative to EUR are irrelevant.

Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Monday 17 October 2022 inclusive.

End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from October 2026 through September 2027 (inclusive).

Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Horizon Start 100, about 1586 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Horizon Start 100 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

Selection criteria for the basket :

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy* (the 'Selection criteria').

* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at www.kbc.be/investment-legal-documents > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :

Mergers or acquisitions

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

* The KBC Group Investment Policy can be found at www.kbc.be/investment-legal-documents > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

Demergers

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

* The KBC Group Investment Policy can be found at www.kbc.be/investment-legal-documents > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

Nationalisation, bankruptcy or disqualification

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.8. Summary risk indicator

2 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: there is no protection against an increase of the inflation.
- a moderate level of market risk: the level of the risk reflects the volatility of the stock market.
- a moderate level of performance risk: the level of the risk reflects the volatility of the stock market.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.9. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 9 127 293.46 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.4.5. Performance figures

BE6336589641
Horizon Start 100 CAP
Annual performance on 31/12/2023 (in EUR)

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Starting date	Share classes						
CAP	BE6336589641	EUR	6.96%								10/10/2022	5.03%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :
$$[\text{NIW}(D) / \text{NIW}(Y)]^{1 / X} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:
$$[\text{NIW}(D) / \text{NIW}(S)]^{1 / F} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing charges and transaction costs:

Ongoing Charges : 1.385%
 Transaction Costs: 0.000%
 Percentage calculated at reporting date: 31 December 2023.

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5 Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

Not applicable

Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6 Bestaan van fee sharing agreements en rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	max. 0.20 EUR	per unit per year, as described below. The management fee is payable at the end of each month.
Administration fee	max. 0.01 EUR	per unit per year, based on the number of units issued at the start of each six-month period and is payable at the end of each month.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	max. 0.05%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges' for this structured sub-fund.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs		* During the first year following the initial subscription period: 0.30% of the net assets of the sub-fund per year. * After that: 0.10% of the net assets of the sub-fund per year.

Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 EUR per unit per year (with a maximum of EUR per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 EUR per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 EUR per unit per year, as described above.

Launch date:	26 June 2023
Initial subscription price:	10 EUR
Maturity date:	31 July 2028
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 EUR at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

Capital Protection

The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from www.kbc.be/prospectus/spv.

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from www.kbc.be.

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
 - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
 - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

No formal guarantee

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

Potential return

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

Sub-fund's investment policy

Permitted asset classes

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

Characteristics of the bonds and other debt instruments

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

Permitted swap transactions

The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.

The sub-fund's risk profile is not affected by the use of these swaps.

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.

The sub-fund's risk profile is not affected by the use of these swaps.

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

The swaps under (3) serve to hedge the credit risk.

The sub-fund's risk profile is not affected by the use of these swaps.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Strategie selected

Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 World Selection Stocks.

At Maturity, a capital gain will be distributed that will equal the best of two alternatives:

- on the one hand 6%, settled at 100% of the initial subscription price;
- on the other hand 100% of the increase in the basket of 30 shares, settled at 100% of the initial subscription price. The evolution of the basket is calculated as $((\text{Ending Value} - \text{Starting Value}) / \text{Starting Value})$. Decreases in the basket are not taken into account.

Consequently, the capital gain at the Maturity Date will be at least 6% (actuarial yield: 1.15% before fees and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund took into account the principal adverse impacts on sustainability factors of its investment decisions ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through the application of the KBC Group Investment Policy as well as through the KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and nuclear and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took particular account of exposure to controversial weapons ('indicator 14') by excluding companies involved in controversial weapon systems, and to violations of UN Global Compact principles or Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

Maturity

Monday 31 July 2028 (payment with a value date of D+1 banking day)

Currency

EUR, for all shares in the basket, changes in the value of the currency in which they are expressed relative to EUR are irrelevant.

Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Thursday 6 July 2023 inclusive.

End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from July 2027 through June 2028 (inclusive).

Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Horizon Start 100 Plus, about 1549 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Horizon Start 100 Plus under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

Selection criteria for the basket :

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy* (the 'Selection criteria').

* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at www.kbc.be/investment-legal-documents > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :

Mergers or acquisitions

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

* The KBC Group Investment Policy can be found at www.kbc.be/investment-legal-documents > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

Demergers

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

* The KBC Group Investment Policy can be found at www.kbc.be/investment-legal-documents > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

Nationalisation, bankruptcy or disqualification

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

2.1.8. Summary risk indicator

2 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: there is no protection against an increase of the inflation.
- a moderate level of market risk: the level of the risk reflects the volatility of the stock market.
- a moderate level of performance risk: the level of the risk reflects the volatility of the stock market.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.9. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 10 544 988.41 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.4.6. Costs

Ongoing charges and transaction costs:

not applicable

Percentage calculated at reporting date: 31 December 2023.

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5 Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

Not applicable

Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6 Bestaan van fee sharing agreements en rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	max. 0.20 EUR	per unit per year, as described below. The management fee is payable at the end of each month.
Administration fee	max. 0.01 EUR	per unit per year, based on the number of units issued at the start of each six-month period and is payable at the end of each month.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	max. 0.05%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges' for this structured sub-fund.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs		* During the first year following the initial subscription period: 0.30% of the net assets of the sub-fund per year. * After that: 0.10% of the net assets of the sub-fund per year.

Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 EUR per unit per year (with a maximum of EUR per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 EUR per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the

amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 EUR per unit per year, as described above.

Detail of the received(+)/ given(-) collateral for financial derivatives

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested either directly, or indirectly via correlated financial instruments, primarily in bonds.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in bonds and/or bond-related investments that may come from any region, sector or theme.

See also the 'Characteristics of the bonds and debt instruments' paragraph below.

Within the above limits, the sub-fund pursues (directly or indirectly) responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The issuers in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for Horizon Strategisch Obligatiedepot Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes issuers in advance from the Responsible Investment universe which fall foul of the exclusion policies available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that issuers involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that issuers who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better **ESG score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring issuers with lower **Carbon Intensity**, with the objective of meeting a predetermined carbon intensity target;
- (3) support sustainable development, by including issuers that contribute to the **UN Sustainable Development Goals** and
- (4) support sustainable development by encouraging the transition to a more sustainable world via **bonds financing green and/or social projects**.

The sub-fund's targets are available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-score

The contribution to the integration of sustainability into policy decisions of the issuers is measured based on an ESG score. This score represents the aggregated performance assessment of a given entity against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- In the case of instruments issued by companies:
 - respect for the environment (e.g., reduction in greenhouse gas emissions);
 - attention to society (e.g., employee working conditions); and
 - corporate governance (e.g., independence and diversity of the board of directors).

The ESG score for companies is an ESG risk score supplied by a data provider.

- In the case of instruments issued by national governments, supranational debtors and/or agencies linked to governments, the following five pillars are used
 - overall economic performance and stability (e.g., quality of institutions and government);
 - socio-economic development and health of the population (e.g., education and employment);
 - equality, freedom and the rights of all citizens;
 - environmental policy (e.g., climate change); and
 - security, peace and international relations.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG score of the portfolio for companies is compared to following benchmark: iBoxx Euro Corporate bonds Total Return Index.

The ESG score for countries of the portfolio is compared to a reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).

More information on the ESG Score and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets can be revised upwards or downwards.

(2) Carbon Intensity

The objective to promote climate change mitigation, by favoring lower carbon intensity issuers, with the goal of meeting a predetermined carbon intensity target covers at least 90% of the portfolio. The objective does not apply to issuers for which data is not available.

The contribution of issuers to climate change mitigation is measured based on their carbon intensity. For companies, carbon intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD). For countries, it is defined as the greenhouse gas emissions (in tonnes CO₂ equivalent), divided by the Gross Domestic Product (in current prices, in mln USD).

The targets for instruments issued by companies are different from those for instruments issued by national governments, supranational debtors and/or government-linked agencies.

More information on Carbon Intensity and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to investing a minimum proportion of the portfolio in issuers that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives. Instruments of issuers that meet these requirements are designated as "sustainable investments," according to Article 2.17 of the SFDR.

Companies that contribute to the UN Sustainable Development Goals are defined as those that are aligned with at

least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals.

Governments are assessed on the five pillars as described in the ESG score, which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scores sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies are considered to be instruments that contribute to sustainable development. Bonds of supranational governments contribute to the UN's Sustainable development goals if one of the two criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. More information about this and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds .

The targets may be revised upwards or downwards.

(4) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund commits to invest a minimum proportion of the portfolio in bonds financing green and/or social projects. Bonds whose proceeds will be used exclusively to finance (a combination of) green and social projects that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds are considered bonds financing green and/or social projects. Instruments that meet these requirements are labelled 'sustainable investments', in line with article 2(17) SFDR.

More information on bonds financing green and/or social projects and the concrete goals of the sub-fund can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The targets may be revised upwards or downwards.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which an issuer can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible issuer based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets issued by issuers that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative for these derivatives available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: 50% iBoxx Euro Corporate bonds Total Return Index, 50% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 1.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. The percentage invested in environmentally sustainable activities within the meaning of the EU Taxonomy Framework at all times is 0%. The underlying investments of this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or investee companies is available and final regulatory technical standards are published providing more detailed guidance on the Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability disclosure in the financial services sector and on how Taxonomy information should be made public, the prospectus will be updated.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. The principal adverse impacts on sustainability factors that were taken into account through the exclusion policies can be found in the 'Annex for Horizon Strategisch Obligatiedepot Responsible Investing'.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy. The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy can be found in the 'Annex for Horizon Strategisch Obligatiedepot Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for Horizon Strategisch Obligatiedepot Responsible Investing'.

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 75% of its assets in bonds and debt instruments

- in bonds and debt instruments rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or

This means that the sub-fund may invest up to 25% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 2 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: there is no protection against an increase of the inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the assets are primarily - but not exclusively - invested in bonds with an investment grade rating. Consequently the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

There is no capital protection.

Discretionary Shares: 2 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: there is no protection against an increase of the inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the assets are primarily - but not exclusively - invested in bonds with an investment grade rating. Consequently the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Strategisch Obligatiedepot Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	9,381,868.35	2,766,412.47	12,148,280.82
Sales	1,576,619.97	279,991.02	1,856,610.99
Total 1	10,958,488.32	3,046,403.49	14,004,891.81
Subscriptions	8,568,160.60	2,930,828.58	11,498,989.18
Redemptions	612,019.15	461,836.68	1,073,855.83
Total 2	9,180,179.75	3,392,665.26	12,572,845.01
Monthly average of total assets	12,002,624.19	17,642,558.80	14.856.842.11
Turnover rate	14.81%	-1.96%	9.64%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

			Share classes	Bench mark	Starting date	Share classes						
DIS	BE0946766467	EUR	6.31%	7.62%	-4.13%	-3.72%	-2.32%	-1.47%	-0.48%	0.48%	29/12/2006	1.31%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)] ^ [1 / X] - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)] ^ [1 / F] - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

Dividend on ex-dividend date 28/03/2024: 5,0329 net (7,1899 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
Horizon Strategisch Obligatiedepot Responsible Investing

Legal entity identifier:
549300TQAFEKH1F33306

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes **No**

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: %</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: %</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 78.93% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments) by preferring issuers with a better ESG (risk)score;
- has promoted climate change mitigation by preferring issuers with lower carbon intensity, with the objective of meeting a predetermined carbon intensity target;
- has supported sustainable development by including issuers that contribute towards achieving the UN Sustainable Development Goals;
- has supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The specific objectives of the sub-fund can be found in the table under title 'How did the

sustainability indicators perform?' of this annex.

The sub-fund invested 78.93% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 19.21% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark iBoxx Euro Corporate bonds - Total Return Index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	10% better than the following benchmark: iBoxx Euro Corporate bonds - Total Return Index	18.14	17.09	Yes
Carbon Intensity	A reduction of 50% by 2030 based on the following benchmark: iBoxx Euro Corporate bonds Total Return Index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	113.06	49.82	Yes
Bonds financing green and/or social projects	A minimum of 10% of corporate bonds invested in should qualify as bonds financing green and/or social projects.		17.97	Not available
Instruments issued by governments, supranational debtors and/or agencies linked to governments				
ESG Score	10% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	0.77	0.82	Yes
Carbon Intensity	25% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).	422.53	343.53	Yes
Bonds financing green and/or social projects	A minimum of 10% of the investments in bonds issued by governments, supranational debtors and/or agencies linked to governments should qualify as bonds financing green and/or social projects.		28.37	Not available
Minimum % Sustainable Investments	A minimum of 30% of sustainable investments.	30	78.93	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology. As of April 28, 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals were classified as "sustainable investments," which triggered a change in these objectives. The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the objectives and results achieved described in this chapter only reflect the situation at the end of sub-fund's financial year and, for this reason, are not a reliable indicator for future results.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the situation at the end of the financial year as shown in the table above and

section 2.1.7 of the general annual report.
No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result
	31/12/2022	31/12/2023
Instruments issued by companies		
ESG risk score		17.09
Carbon Intensity		49.82
Bonds financing green and/or social projects		17.97
Instruments issued by governments, supranational debtors and/or agencies linked to governments		
ESG Score		0.82
Carbon Intensity		343.53
Bonds financing green and/or social projects		28.37
Sustainable Investments	88.17	78.93

For both reporting periods, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2022 - 31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 78.93% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this chapter only reflect the situation at the end of the financial year of the sub-fund and, for that reason, are not a reliable indicator for future results.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a part of its portfolio in issuers that contribute to the UN Sustainable Development Goals (including both social and environmental objectives).

Instruments of companies that are aligned with at least one of the 15 first UN Sustainable Development Goals, while not being misaligned with any of these UN Sustainable Development Goals, were designated as 'sustainable investments'.

As of 28 April 2023, instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN Sustainable Development Goals, were also classified as "sustainable investments".

Governments were assessed on five pillars which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scored sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies were considered to be instruments that contribute to UN Sustainable Development Goals.

- The country is aligned with the ESG criteria: it has a score of at least 80 for one of the five pillars and does not score lower than 50 for any of the other pillars;
- The country is not excluded: it does not rank among the 50% most controversial regimes AND it does meet the criteria on respecting the sustainable principles AND it does not rank among the 10% worst scoring countries of the universe.

Supranational government bonds were considered to contribute to the UN Sustainable

Development Goals if either of the following criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst-scoring half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the 'sustainable development' label to instruments of companies and governments.

(2) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund invested a part of its portfolio in bonds financing green and/or social projects (that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds). Instruments that meet these requirements were labelled 'sustainable investments'. The percentage of the portfolio invested in bonds financing green and/or social projects can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of issuers from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded, and companies active in the palm oil industry are subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

How were the indicators for adverse impacts on sustainability factors taken into account?

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies that deviate significantly (score of -10) from any of the UN's first 15 Sustainable Development Goals (based on MSCI SDG Net Alignment Score), as well as companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

For investments in instruments issued by countries, the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account by excluding countries in the worst 10% according to the ESG score model, and by excluding countries that do not comply with sustainability principles and are exposed to controversial regimes.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on carbon intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the carbon intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.
- **Indicator 15:** GHG intensity of investee countries was taken into account through the carbon intensity reduction target for sovereign related investments.
- **Indicator 16:** Investee countries subject to social violations was taken into account as the sub-fund did not invest in (i) Countries that do not comply with sustainability principles and (ii) countries exposed to controversial regimes. More information can be found in the exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV. As part of its commitment to responsible investment, KBC Asset Management NV exercised the voting rights of the shares it manages in accordance with its proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on the KBC Asset Management NV website.

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies. As part of its commitment to responsible investment, KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the proxy voting and engagement policy. Where appropriate, KBC Asset Management NV entered into dialogue with the management of the companies concerned, if necessary before voting. More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
01/01/2023-31/12/2023

Largest investments	Sector	% assets	Country
KBC Part. Corporate Bds Responsible Investing -ISB	Financial Services	18.73%	Belgium
KBC Bonds Strategic Broad 25/75 RI -ISB	Financial Services	17.24%	Luxembourg
KBC Bonds Strategic Broad 50/50 RI -ISB	Financial Services	17.24%	Luxembourg

What was the proportion of sustainability-related investments?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the year, the proportion of sustainable investments was 78.93%.

What was the asset allocation?

Asset allocation describes the

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar

share of investments in specific assets.

as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund Strategisch Obligatiedepot Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 98.14% in assets that promote environmental or social characteristics and 1.86% in other investments. The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Strategisch Obligatiedepot Responsible Investing' of the prospectus.

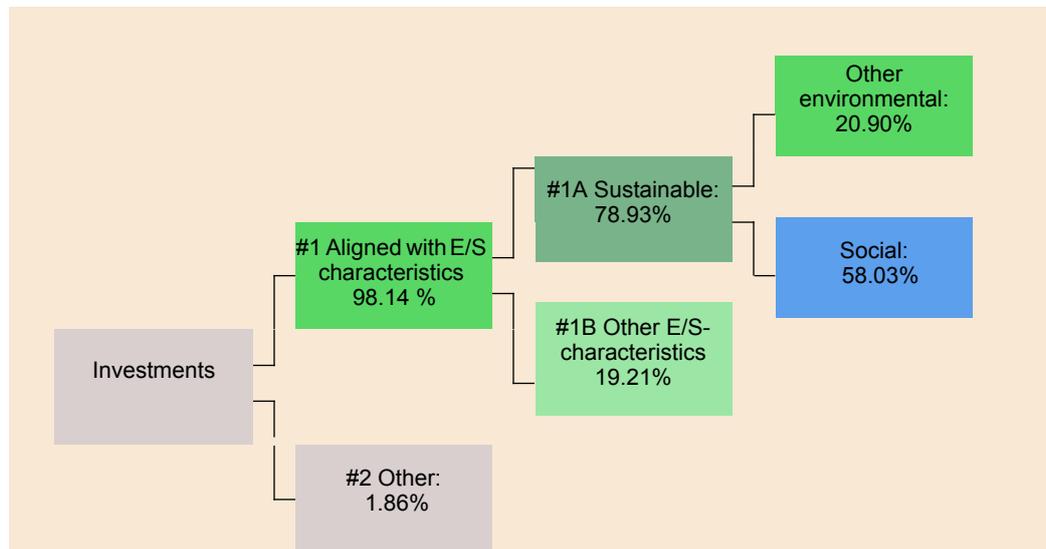

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

20.90% of the sustainable investments are environmentally sustainable investments and 58.03% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus investments in bonds that can be considered as bonds financing green and/or social projects, plus instruments that are considered "sustainable" by the Responsible Investing Advisory Board.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2023 the investments were made in the following sectors:

Sector	%Assets
National	38.71%
Banking	13.82%
Financial Services	9.45%
Materials	5.80%
Health Care	4.07%
Supranationals	3.84%
Telecommunications	3.80%
Real Estate	3.41%
Insurance	2.67%
Utilities	2.58%
Consumer Staple Products	2.53%
Media	2.01%
Software & Tech Services	1.90%
Retail & Wholesale - Discretionary	1.88%
Consumer Discretionary Services	1.36%
Consumer Discretionary Products	1.33%
Tech Hardware & Semiconductors	0.30%
Regional & Local	0.30%
Retail & Wholesale - Staples	0.26%
Unclassifiable	0.05%
Renewable Energy	0.03%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

However, an exception is provided in the exclusion policy for investments in green bonds of these companies, which promote the energy transition. Consequently, for the portion invested in green bonds, there may be exposure to these sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage invested in EU Taxonomy-aligned investments was set at 31 December 2023. KBC Asset Management NV determined that insufficient reliable, timely and verifiable data from issuers or investee companies were available at that time for consistent reporting, and this based on its own research and services from data suppliers. The percentage invested in investments aligned with the EU Taxonomy was therefore set at 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

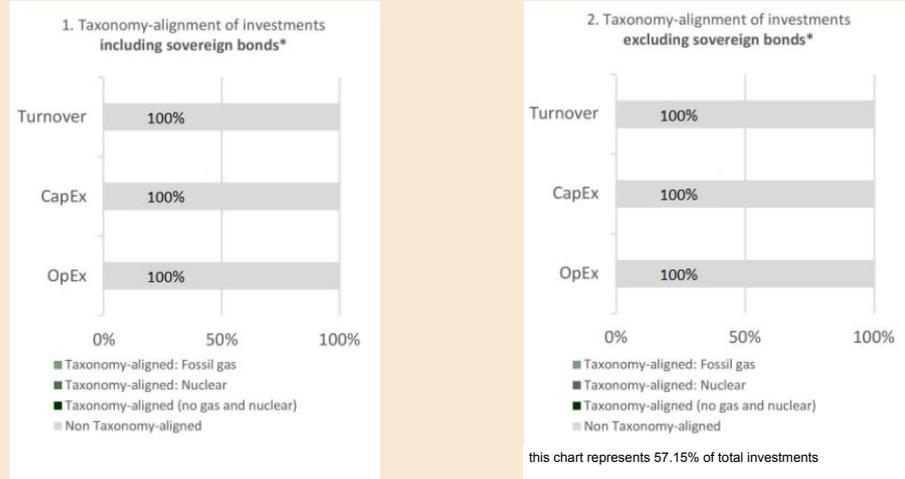

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they

contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of: **-turnover** reflecting the share of revenue from green activities of investee companies. **-capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. **-operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy--alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The previous reference period (which ran from 1 January 2022 tot 31 December 2022) also reported 0% on EU taxonomy-aligned investments.

KBC Asset Management NV determined, based on its own research and services from data suppliers, that insufficient reliable, timely and verifiable data of issuers in which investments were made were available for the previous and current financial year. The percentage of investments aligned with the EU taxonomy was therefore set at 0% for both reference periods.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results.

The sub-fund invested 78.93% in sustainable investments as defined by art. 2.17 SFDR. At the end of the financial year of the sub-fund, the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 20.90%.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of socially sustainable investments?

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The reference period of this annual report is from 1 January 2023 to 31 December 2023. Given the qualification of instruments of governments, supranational debtors and/or government-linked agencies that contribute to the UN's sustainable development goals as "sustainable investments" as of April 28, 2023, the figures described in this section only reflect the situation at the end of the financial year of the sub-fund and, for this reason, are not a reliable indicator for future results. At the end of the financial year of the sub-fund, the share of socially sustainable investments was 58.03%,

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

At the end of the financial year, the "not sustainable" category may include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Strategisch Obligatiedepot Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 not sustainable”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better ESG (risk)score;
- promoted climate change mitigation, by preferring issuers with lower Carbon Intensity, with the objective of meeting a predetermined carbon intensity target;
- supported sustainable development , by including issuers that contribute to the UN Sustainable Development Goals;
- supported sustainable development by encouraging the transition to a more sustainable world via bonds financing green and/or social projects.

The sub-fund excluded issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded, and companies active in the palm oil industry were subject to strict criteria. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that issuers based in countries that encourage unfair tax practices, that seriously violate basic environmental, social or good governance principles (through normative screening, through a poor ESG risk score, due to involvement in unsustainable countries and controversial regimes) were excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark iBoxx Euro Corporate bonds - Total Return Index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

More information can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. The investment policy aims to track the strategy recommended for an investor with a specific risk profile.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are primarily invested directly or indirectly (by means of financial instruments with similar performance) in equities, bonds and/or money market instruments. A target range is laid down for these assets. It is 30% for equities and 70% for bonds and/or money market instruments.

Depending on expectations regarding the performance of these assets, the fund manager decides which assets to under- or overweight compared to the above target range.

The equity component will invest directly or indirectly in a global selection of shares, whereby all sectors and themes are eligible for consideration. More than 50% of the equity component will be invested in shares of companies listed in the US. The equity component can vary between 20 and 40%. This composition is based on KBC Asset Management NV's monthly investment strategy, which is published at www.kbcam.be/assetclasses.

The component comprising bonds and/or money market instruments can vary between 60 and 80%. To mitigate sensitivity to interest rates, up to 50% of the component comprising bonds and/or money market instruments may be invested in money market instruments. All themes, industry sectors and regions are eligible for consideration. This composition is based on KBC Asset Management NV's monthly investment strategy, which is published at www.kbcam.be/assetclasses.

The fund is actively managed with reference to the following benchmark: 14% iBoxx corporate USD Total Return Index, 56% JP Morgan Government bond US 1-5 Years - Total Return Index, 30% MSCI USA - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 1.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units in undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for

shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk’.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to CSOB Asset Management a.s investiční společnost, Radlicka 333/150 , 150 57 , Praha 5, Czech Republic.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

Following weekly strategy of KBC AM

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of concentration risk: there is a concentration of investments in the United States of America.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 USD.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 1/1/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

	30/06/2022	31/12/2022	30/06/2023	31/12/2023

2.4.2. Changes in the composition of the assets of Horizon USD Low (in American dollar)

	1 st half of year	2 nd half of year	Year
Purchases	10,124,706.45	6,318,370.72	16,443,077.17
Sales	12,879,062.85	7,824,428.11	20,703,490.97
Total 1	23,003,769.30	14,142,798.83	37,146,568.13
Subscriptions	518,002.08	658,112.07	1,176,114.15
Redemptions	2,668,870.45	1,909,391.44	4,578,261.89
Total 2	3,186,872.53	2,567,503.51	5,754,376.04
Monthly average of total assets	44,728,214.72	44,120,085.24	44.419.082.23
Turnover rate	44.30%	26.23%	70.67%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: Turnover on the portfolio is as a result of weekly / adhoc changes to strategy in anticipation of, and response to, financial markets movements.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Period	Change in number of shares in circulation						
	Subscriptions		Redemptions		End of period		
	Capitalization	Distribution	Capitalization	Distribution	Capitalization	Distribution	Totaal
2021 - 12	187,660.59		16,379.51		382,080.24		382,080.24
2022 - 12	61,529.20		51,085.89		392,523.55		392,523.55
2023 - 12	9,998.17		39,091.08		363,430.64		363,430.64

Period	Amounts received and paid by the UCITS (in American dollar)			
	Subscriptions		Redemptions	
	Capitalization	Distribution	Capitalization	Distribution
2021 - 12	23,386,990.64		2,051,631.30	
2022 - 12	7,339,756.03		5,914,728.73	
2023 - 12	1,178,262.67		4,586,303.51	

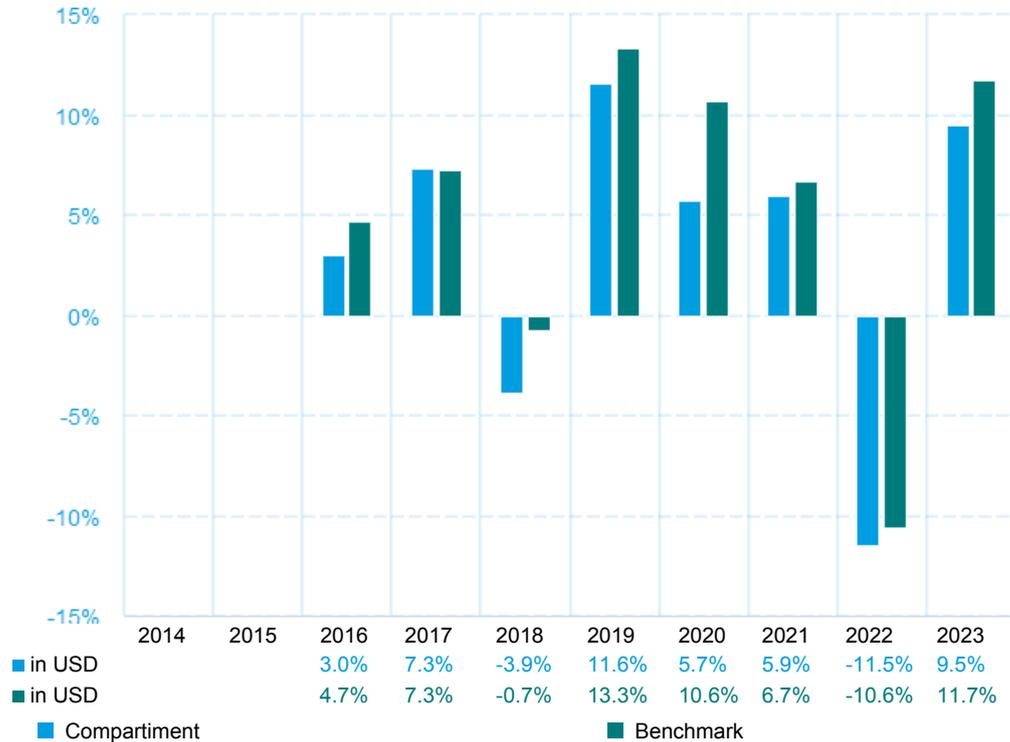

Period	Net asset value End of period (in American dollar)		
	Of the sub-fund	Of one share	
		Capitalization	Distribution
2021 - 12	48,946,634.57	128.11	
2022 - 12	44,528,613.72	113.44	
2023 - 12	45,145,079.32	124.22	

2.4.5. Performance figures

BE6275363453
Horizon USD Low CAP

Annual performance compared to the benchmark on 31/12/2023 (inUSD)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Starting date	Share classes						
CAP	BE6275363453	USD	9.50%	11.72%	0.90%	2.15%	3.92%	5.96%			02/04/2015	2.51%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in USD and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :
$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})]^{1/X} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:
$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})]^{1/F} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Ongoing charges : 1,217%

Transaction costs: 0,011%

Percentage calculated at reporting date: 31 December 2023 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 69,93% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.61%	per year calculated on the basis of the average total net assets of the sub-fund. For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio. CSOB Asset Management a.s. investiční společnost receives a fee from the management company of max. 1,61% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
	Max 0.01%	per year calculated on the basis of the portion of the average total net assets of the sub-fund that are directly invested in bonds and debt instruments, compensating the use of research to those instruments. If the actual cost of the research comprises a lower percentage than the percentage stated, the management company will receive only this lower amount.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Management fees

Name	Maximum management fee
KBC Bonds - Corporates USD - Institutional B Shares Capitalisation	1.10%
KBC Bonds - Emerging Markets - Institutional B Shares Capitalisation	1.30%
