Management Company: BlackRock Asset Management Deutschland AG

Objectives and Investment Policy

- ▶ iShares eb.rexx® Government Germany 2.5-5.5yr UCITS ETF (DE) (hereinafter the "Fund") is an exchange traded fund (ETF) that aims to track the performance of the eb.rexx® Government Germany 2.5-5.5 (Total return index) as closely as possible. In this regard, it aims to replicate the benchmark.
- ▶ The index measures the performance of German government bonds traded on the Eurex Bonds® platform with a remaining time to maturity between 2.5 and 5.5 years. Only bonds denominated in Euros with a minimum amount outstanding of EUR 4 billion are included in the index. The index is rebalanced on a monthly basis and uses a market-value weighted methodology with the maximum weighting of any individual bond limited to 30%.
- ▶ In order to achieve its investment objective, the Fund mostly invests in interest-bearing securities that are mainly issued by government entities in Germany.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- ▶ It is not the Investment Manager's intention to leverage the Fund. However, the Fund may generate minimal amounts of leverage from time to time, for example, if using financial derivative instruments (FDIs) for efficient portfolio management purposes.
- ▶ Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 3 years.
- ▶ The units in the Fund are distributing units. Income from the Fund's investments will be paid out at least once a year as a dividend.
- ▶ The Fund units are denominated in Euro.
- ▶ The units are listed on one or more Stock Exchange(s). Investors can buy or sell their units daily during business hours through an intermediary on such Stock Exchange(s).

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated two due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Investors dealing on exchanges will pay fees charged by their stock brokers. Such charges are publicly available on the exchanges on which the units are listed and traded, or can be obtained from stock brokers. If investors deal in units directly with the Fund or the Management Company of the Fund, the entry charge is up to 2% and the exit charge is up to 1%.

*Authorised participants dealing directly with the Fund or the Management Company (as the case may be) will pay related transaction costs.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2017. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Management Company undertakes securities lending to reduce costs, the Fund will receive 100% of the associated revenue generated from which up to 40% (currently 37.5%) will be paid to the Management Company in the form of an overall fixed fee in respect of costs arising in connection with the preparation and execution of such security-lending transactions. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest

Entry Charge (entry charge 0% when traded on exchange)	2.00%*
Exit Charge (exit charge 0% when traded on exchange)	1.00%*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.
