

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product

**iShares Emerging Markets Bond Index Fund (CH)** (the "Fund"), **Class X NT USD** (the "Unit Class"), ISIN: **CH0449128526**, is issued by BlackRock Asset Management Switzerland AG (the "Fund Management Company") which is part of the BlackRock, Inc group.

The Fund Management Company is authorised in Switzerland and regulated by the Swiss Financial Market Supervisory Authority ("FINMA") and FINMA is responsible for supervising the Fund Management Company in relation to this Key Information Document.

More information is available at [www.blackrock.com](http://www.blackrock.com) or by calling **+41 (0)800 33 66 88**. This document is dated 16 April 2024.

**Caution: You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

**Type:** The Fund is a sub-fund of BlackRock Investment Funds Switzerland, an umbrella fund under Swiss law, authorised by the Swiss Financial Market Supervisory Authority as "Other funds for Traditional Investments", which was established under the Swiss Collective Investment Schemes Act (CISA) of June 23, 2006, as amended.

**Term:** The Fund has been established for an indefinite period but in certain circumstances, as described in the Fund prospectus (with integrated fund contract), the Fund or individual sub-funds may be dissolved by the Fund Management Company or the Custodian Bank by terminating the fund contract without notice or by order of the supervisory authority, and, in each case, subject to compliance with the Fund prospectus (with integrated fund contract) and applicable regulation.

## Objectives

- The Fund aims to achieve a return on your investment through a combination of capital growth and income on the Fund's assets, which reflects the return of the JP Morgan Emerging Market Bond Index Global Diversified (the Fund's benchmark index).
- The Fund aims to invest as far as possible and practicable in the fixed income (FI) securities (such as bonds) that make up the benchmark index.
- The benchmark index measures the performance of US Dollar denominated bonds issued by governments and government agencies that are 100% guaranteed or owned by the governments and government agencies of emerging markets countries.
- The FI securities include both investment grade (i.e. meet a specified level of creditworthiness) and sub-investment grade securities (i.e. have a relatively low credit rating credit or are unrated but deemed to be of comparable quality with sub-investment grade FI securities).
- The Fund uses techniques to achieve a similar return to its benchmark index. This may include the use of financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets).
- The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income.
- The price of fixed income securities may be affected by changing interest rates which in turn may affect the value of your investment. Fixed income securities prices move inversely to interest rates. Therefore, the market value of fixed income securities may decrease as interest rates increase. The credit rating of an issuing entity will generally affect the yield that can be earned on fixed income securities; the better the credit rating the smaller the yield.
- The return on your investment in the Fund is directly related to the value of the underlying assets of the Fund, less costs (see "What are the costs?" below).
- The relationship between the return on your investment, how it is impacted and the period for which you hold your investment is considered below (see "How long should I hold it and can I take my money out early?").
- The custodian of the Fund is State Street Bank International GmbH, Munich, Zurich Branch.
- Further information about the Fund can be obtained from the latest fund prospectus with integrated fund contract, the latest annual report and half-yearly reports of the BlackRock Investment Funds Switzerland. These documents are available free of charge in German. These can be found, along with other (practical) information, including prices of units, on the BlackRock website at: [www.blackrock.com](http://www.blackrock.com) or the iShares website at: [www.ishares.com](http://www.ishares.com). Unit prices are published daily on the electronic platform at [www.fundinfo.com](http://www.fundinfo.com).
- Your units will be accumulating units (i.e. interest income will be included in their value).
- Your units will be denominated in US Dollar, the Fund's base currency.
- You can buy and sell your units daily.

**Intended retail investor:** The Fund is intended for investors with the ability to bear losses up to the amount invested in the Fund (see "How long should I hold it and can I take my money out early?"). Please refer to the prospectus (with integrated fund contract) for detailed information on the individual unit classes.

**Insurance benefits:** The Fund does not offer any insurance benefits.

## What are the risks and what could I get in return?

### Risk Indicator

<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>	<b>6</b>	<b>7</b>
<b>The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.</b>						

- The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
- We have classified this product as 3 out of 7, which is a medium low risk class. This classification rates the potential losses from future performance at a medium low level, and poor market conditions could affect the value of your investment. This classification is not guaranteed and may change over time and may not be a reliable indication of the future risk profile of the Fund. The lowest category does not mean risk free.
- **Be aware of currency risk.** If you receive payments in a currency that is different to the product's base currency, the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
- Please refer to the product's Prospectus for details of other materially relevant risks that may apply to this product.
- This product does not include any protection from future market performance so you could lose some or all of your investment.
- If the product is not able to pay you what is owed, you could lose your entire investment.

### Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product, which may include input from benchmark(s) / proxy, over the last ten years. Markets could develop very differently in the future.

<b>Recommended holding period : 3 years</b>		<b>Example Investment : USD 10,000</b>	
<b>Scenarios</b>		<b>If you exit after 1 year</b>	<b>If you exit after 3 years</b>
<b>Minimum</b>	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>		
<b>Stress*</b>	<b>What you might get back after costs</b>	7,450 USD	5,700 USD
	Average return each year	-25.5%	-17.1%
<b>Unfavourable**</b>	<b>What you might get back after costs</b>	7,630 USD	8,080 USD
	Average return each year	-23.7%	-6.9%
<b>Moderate***</b>	<b>What you might get back after costs</b>	10,430 USD	11,500 USD
	Average return each year	4.3%	4.8%
<b>Favourable****</b>	<b>What you might get back after costs</b>	11,620 USD	12,270 USD
	Average return each year	16.2%	7.1%

\* The stress scenario shows what you might get back in extreme market circumstances.

\*\* This type of scenario occurred for an investment in the product and/or benchmark(s) or proxy between October 2019 - October 2022.

\*\*\* This type of scenario occurred for an investment in the product and/or benchmark(s) or proxy between January 2018 - January 2021.

\*\*\*\* This type of scenario occurred for an investment in the product and/or benchmark(s) or proxy between August 2018 - August 2021.

### What happens if BlackRock Asset Management Schweiz AG is unable to pay out?

This product is a contractual fund under the Collective Investment Schemes Act (CISA), which requires BlackRock Asset Management Schweiz AG to segregate the assets of the product from its own assets. In the event of the insolvency of BlackRock Asset Management Schweiz AG, the fund's assets in the safekeeping of the custodian will not be affected.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

**Costs over time:** The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

### We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return).
- For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.

	If you exit after 1 year	If you exit after 3 years
<b>Total costs</b>	7 USD	23 USD
<b>Annual cost Impact (*)</b>	0.1%	0.1%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.8 % before costs and 4.8 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

### Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	-
Exit costs	We do not charge an exit fee.	-

Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.04% of the value of your investment per year. This is based on a combination of estimated and actual costs data over the last year. Any underlying product costs are included here with the exception of transaction costs which would be included below under 'Transaction costs'.	4 USD
Transaction costs	0.03% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	3 USD

Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	-
