

### BlackRock Euro Government Inflation-Linked Bond Fund

A sub-fund of BlackRock Fixed Income Dublin Funds plc

**Class Institutional Accumulating EUR**

**ISIN: IE00B4WXT857**

**Manager: BlackRock Asset Management Ireland Limited**

## Objectives and Investment Policy

- ▶ The Fund aims to achieve a total return on your investment, through a combination of capital growth and income, which reflects the return of the Barclays Capital Euro Government Inflation-Linked Bond Index, the Fund's benchmark index.
- ▶ The Fund invests predominantly in the fixed income (FI) securities (such as bonds) that make up the Fund's benchmark index (which comprises Euro-denominated government inflation linked bonds) (i.e. bonds which pay income linked to a rate of inflation).
- ▶ The FI securities may be issued by companies, governments, government agencies and supranationals (e.g. the International Bank for Reconstruction and Development) domiciled in countries both in and outside the European Union and will be investment grade (i.e. meet a specified level of credit worthiness) or are deemed by the investment manager to be of equivalent rating at the time of purchase. If the credit rating of a FI security is downgraded, the Fund may continue to hold this, until it is practicable to sell the position.
- ▶ The benchmark index measures the performance of the universe of inflation-linked bonds issued by governments of the European Monetary Union member states.
- ▶ The Fund uses techniques for efficient portfolio management purposes or to protect against exchange rate risk. These techniques

may include the strategic selection of certain securities that make up the benchmark index or other FI securities which provide similar performance to certain constituent securities. They may also include the use of financial derivative instruments (i.e. investments the prices of which are based on one or more underlying assets).

- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be accumulating shares (i.e. dividend income will be included in their value).
- ▶ Your shares will be denominated in Euro, the Fund's base currency.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is €500,000.

## Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\* Subject to a charge of up to 2% paid into the Fund where the Manager suspects arbitrage by an investor on the yield of the Fund.

The ongoing charges figure is based on the fixed annualised fees charged to the Fund as set out in the Fund's prospectus. This figure excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending

agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

### One-off charges taken before or after you invest

Entry Charge	None
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

### Charges taken from the Fund over each year

Ongoing Charges	0.13%**
