JPM Global Multi-Asset Growth Sustainable D (acc) - EUR

a Share Class of JPMorgan Investment Funds – Global Multi-Asset Growth Sustainable Fund. The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives, Process and Policies

INVESTMENT OBJECTIVE

To provide long-term capital growth by investing in a flexible growth portfolio of securities, directly and through the use of derivatives, across a combination of asset classes, positively positioned towards companies and issuers with above average ESG scores.

A growth portfolio is determined by an evaluation of the relevant risks related to the portfolio, which would be higher than a cautious or balanced portfolio.

INVESTMENT PROCESS

Investment approach

- Multi-asset approach, leveraging specialists from around JPMorgan Asset Management's global investment platform, with a focus on capital growth and the potential for high price fluctuations.
- Flexible implementation of the managers' allocation views at asset class and regional level in line with the volatility profile of the Sub-Fund.
- Seeks to provide the majority of its returns through securities with positive environmental and/or social characteristics that follow good governance practices by incorporating ESG factors, exclusions and positioning the portfolio positively towards such securities.

Benchmark uses and resemblance

- Performance comparison.
- Basis for relative VaR calculations.

The Sub-Fund is actively managed. Though the majority of its holdings (excluding derivatives) are likely to be components of the benchmark, the Investment Manager has broad discretion to deviate from its securities, weightings and risk characteristics. The degree to which the Sub-Fund may resemble the composition and risk characteristics of the benchmark will vary over time and its performance may be meaningfully different.

POLICIES

Main investment exposure Invested either directly or through derivatives in a growth portfolio of securities, across a combination of asset classes, positively positioned to securities with positive or improving environmental and/or social characteristics that follow good governance practices. The Sub-Fund may invest in equities, debt securities and REITs from issuers anywhere in the world, including emerging markets. The Sub-Fund may invest up to 100% in equities and up to 60% in debt securities. The Sub-Fund invests at least 25% of assets excluding cash, cash equivalents, Money Market Funds and derivatives for EPM, in Sustainable Investments, as defined under SFDR, contributing to environmental or social objectives.

The Sub-Fund may invest in China A-Shares via the China-Hong Kong Connect Programmes, and in convertible securities and currencies. The Sub-Fund may invest up to 10% of its assets in MBS/ABS of any credit quality. MBS which may be agency (issued by quasi US government agencies) and non-agency (issued by private institutions) refers to debt securities that are backed by mortgages, including residential and commercial mortgages, and ABS refers to those that are backed by other types of assets such as credit card debt, car loans, consumer loans and equipment leases.

The Sub-Fund will typically maintain an average asset-weighted MSCI ESG score above the average MSCI ESG score of the Sub-Fund's investable universe weighted to match the Sub-Fund's asset allocation, excluding cash holdings and currencies. The Sub-Fund's average asset-weighted MSCI ESG score will be calculated as the total of each security's market value multiplied by its MSCI ESG score. The average MSCI ESG score of the investable universe will be calculated using the ESG scores of relevant asset class and region indices, weighted to reflect the asset class and region exposure in the Sub-Fund.

The average asset-weighted ESG score will not include those securities held by the Sub-Fund that do not have an MSCI ESG score, such as certain MBS/ABS securities. For those securities without an MSCI ESG score, the majority will have positive E/S characteristics or demonstrate improving E/S characteristics as determined by the Investment Manager. The Sub-Fund systematically includes ESG criteria in investment analysis and investment decisions on at least 90% of securities purchased (excluding cash).

Other investment exposures Up to 3% in contingent convertible bonds.

Derivatives Used for: investment purposes; hedging; efficient portfolio management. Types: see [Sub-Fund Derivative Usage](#) table under [How the Sub-Funds Use Derivatives, Instruments and Techniques](#) in the Prospectus. TRS including CFD: 2% expected; 10% maximum. Global exposure calculation method: relative VaR. Expected level of leverage from derivatives: 200% indicative only. Leverage may significantly exceed this level from time to time.

Currencies Sub-Fund Base Currency: EUR. Currencies of asset denomination any. Hedging approach: flexible

Redemption and Dealing Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

Risk and Reward Profile

Lower risk Potentially lower reward

Higher risk Potentially higher reward

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 5 because its simulated Net Asset Value has shown medium to high fluctuations historically.
