Benchmark uses and resemblance

- Performance comparison.
- Basis for relative VaR calculations.

The Sub-Fund is actively managed. The majority of issuers in the Sub-Fund are likely to be represented in the benchmark because the Investment Manager uses it as a basis for portfolio construction, but has some discretion to deviate from its composition and risk characteristics within indicative risk parameters and excludes securities based on ESG criteria.

The Sub-Fund will resemble the composition and risk characteristics of its benchmark; however, the Investment Manager's discretion and exclusions based on ESG criteria may result in performance that differs from the benchmark.

The Sub-Fund excludes certain sectors, companies / issuers or practices from the investment universe based on specific values or norms-based screening policies. These policies set limits or full exclusions on certain industries and companies based on specific ESG criteria and/or minimum standards of business practice based on international norms.

To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens. Third party data may be subject to limitations in respect of its accuracy and / or completeness. The exclusions policy for the Sub-Fund can be found on the Management Company's Website (www.jpmanassetmanagement.lu). The Sub-Fund systematically includes ESG analysis in its investment decisions on at least 75% of non-investment grade and emerging market sovereign and 90% of investment grade securities purchased.
