What is this product?

Type

This product is an investment fund. It is organised under Luxembourg law as a société anonyme qualifying as a société d'investissement à capital variable. It is authorised under Part I of the Luxembourg Law of 17 December 2010 and qualifies as an Undertaking for Collective Investments in Transferable Securities (UCITS).

Objectives, Process and Policies

Objective To achieve a return by investing primarily in global short duration investment grade corporate debt securities with positive E/S characteristics or debt securities that demonstrate improving E/S characteristics. Debt securities with positive E/S characteristics are those that the Investment Manager believes have been issued by companies that demonstrate effective governance and superior management of environmental and/or social issues (sustainable characteristics).

Investment Process

Investment Approach

- Uses a globally integrated research driven investment process that focuses on analysing fundamental, quantitative and technical factors across countries, sectors and issuers.
- Approaches corporate bond investing by focusing on generating returns primarily through credit sector rotation and security selection across the global corporate bond universe.
- Integrates ESG aspects to identify issuers with strong or improving sustainability characteristics.

Share Class Benchmark Bloomberg Global Aggregate Corporate 1 - 5 Year Index (Total Return Gross) Hedged to SEK

Benchmark uses and resemblance

- Performance comparison.
- Basis for relative VaR calculations.

The Sub-Fund is actively managed. The majority of issuers in the Sub-Fund are likely to be represented in the benchmark because the Investment Manager uses it as a basis for portfolio construction, but has some discretion to deviate from its composition and risk characteristics within indicative risk parameters and excludes securities based on ESG criteria.

The Sub-Fund will resemble the composition and risk characteristics of its benchmark; however, the Investment Manager's discretion and exclusions based on ESG criteria may result in performance that differs from the benchmark.

Main investment exposure At least 67% of assets invested, either directly or through derivatives, in short duration investment grade corporate debt securities from issuers anywhere in the world, including emerging markets with positive E/S characteristics or that demonstrate improving E/S characteristics. The Sub-Fund may also invest in global debt securities issued by governments, including local governments (up to 5%), but excluding supnationals and agencies.

The weighted average duration of the portfolio will generally not exceed three years and the remaining duration of each investment will generally not exceed five years at the time of purchase. The maturity of securities may be significantly longer than the periods stated above.

The Sub-Fund may invest up to 20% of assets in below investment grade debt securities. The Sub-Fund may invest in unrated debt securities to a limited extent. The Sub-Fund may invest up to 20% of assets in perpetual bonds, up to 10% of assets in contingent convertible bonds and up to 5% of assets in MBS/ABS. The Sub-Fund may invest in aggregate up to 25% of assets in below investment

grade debt securities, unrated debt securities, perpetual bonds, contingent convertible bonds and MBS/ABS.

The Sub-Fund invests at least 40% of assets excluding Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments, money market funds and derivatives for EPM, in Sustainable Investments, as defined under SFDR, contributing to environmental or social objectives.

The Sub-Fund excludes certain sectors, companies / issuers or practices from the investment universe based on specific values or norms-based screening policies. These policies set limits or full exclusions on certain industries and companies based on specific ESG criteria and/or minimum standards of business practice based on international norms.

To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens. Third party data may be subject to limitations in respect of its accuracy and / or completeness. The exclusions policy for the Sub-Fund can be found on the Management Company's Website (www.jpmmorganassetmanagement.lu). The Investment Manager may invest in green bonds, social bonds and sustainable bonds that may otherwise be excluded by such screens.

The Sub-Fund systematically includes ESG analysis in its investment decisions on at least 75% of non-investment grade and emerging market sovereign and 90% of investment grade securities purchased. The Sub-Fund excludes the bottom 20% of securities from its investable universe based on its ESG criteria.

This Share Class seeks to minimise the effect of currency fluctuations between the Reference Currency of the Sub-Fund (USD) and the Reference Currency of this Share Class (SEK).

Other investment exposure Up to 20% of net assets in Ancillary Liquid Assets and up to 20% of assets in Deposits with Credit Institutions, money market instruments and money market funds for managing cash subscriptions and redemptions as well as current and exceptional payments. Up to 100% of net assets in Ancillary Liquid Assets for defensive purposes on a temporary basis, if justified by exceptionally unfavourable market conditions.

Derivatives Used for: investment purposes; efficient portfolio management; hedging. **Types:** see [Sub-Fund Derivatives Usage](#) table under [How the Sub-Funds Use Derivatives, Instruments and Techniques](#) in the prospectus. **TRS including CFD:** none. **Global exposure calculation method:** relative VaR. **Expected level of leverage from derivatives:** 75% indicative only. Leverage may significantly exceed this level from time to time.

Currencies Sub-Fund Base Currency: USD. **Currencies of asset denomination:** any. **Hedging approach:** typically hedged to Base Currency.

Redemption and Dealing Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy This Share Class does not pay dividends. Earned income is retained in the Net Asset Value.

SFDR Classification Article 8

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and who understand the risks of the Sub-Fund, including the risk of capital loss, and:

- seek investment return through exposure to corporate bond markets, globally;
- seek an investment that embeds ESG principles;

■ are looking to use it as part of an investment portfolio and not as a complete investment plan.

Term The product does not have a maturity date. The Board of Directors of the Fund may unilaterally liquidate the product under certain circumstances and the manufacturer would facilitate such a liquidation.

Further information can be found in the "Investing in the Sub-Funds" section of the Prospectus.

What are the risks and what could I get in return?

Risks

 The risk indicator assumes you keep the product for 5 year(s).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you. The risk of the product may be significantly higher if held for less than the recommended holding period.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Beside the risks included in the risk indicator, other risks materially relevant for the product may affect its performance. Please refer to the Prospectus, available free of charge at www.jpmorganassetmanagement.lu.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 2021 and 2024.

Moderate: this type of scenario occurred for an investment between 2014 and 2019.

Favourable: this type of scenario occurred for an investment between 2016 and 2021.

What happens if JPMorgan Asset Management (Europe) S.à r.l. is unable to pay out?

JPMorgan Asset Management (Europe) S.à r.l. is responsible for administration and management of the Fund, and does not hold assets of the Fund (assets that can be held by a depository are, in line with applicable regulations, held with a depository in its custody network). JPMorgan Asset Management (Europe) S.à r.l., as the

manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Fund or the depository is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any of, your loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

■ in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario

- kr 100,000 is invested.

Example Investment kr 100,000	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	kr 710	kr 4,059
Annual cost impact*	0.7%	0.7%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.1% before costs and 3.1% after costs.
