## What is this product?

### Type

This product is an investment fund. It is organised under Luxembourg law as a société anonyme qualifying as a société d'investissement à capital variable. It is authorised under Part I of the Luxembourg Law of 17 December 2010 and qualifies as an Undertaking for Collective Investments in Transferable Securities (UCITS).

### Objectives, Process and Policies

**Objective** To achieve a return through investing in companies with exposure to the theme of climate change solutions.

### Investment Process

#### Investment Approach

- Uses the ThemeBot which, through natural language processing, determines textual relevance and revenue attribution to identify companies exposed to the theme of climate change solutions and its related sub-themes.
- Using the results of Themebot as the basis for company selection, applies an active, bottom-up investment approach to stock selection, drawing on a fundamental research-based investment process.

**Share Class Benchmark** MSCI All Country World Index (Total Return Net)

#### Benchmark uses and resemblance

- Performance comparison.

The Sub-Fund is actively managed without reference or constraints relative to its benchmark.

**Main investment exposure** Companies that have been identified by the Investment Manager, at the time of purchase, as best positioned to develop solutions to address climate change, by being significantly engaged in developing such solutions, whilst not significantly harming any environmental or social objectives and following good governance practices. The Sub-Fund has sustainable investment as its objective and the Investment Manager considers the investee companies as qualifying as "sustainable investments" for the purposes of SFDR.

Companies are selected in relation to key sub-themes of climate change solutions, which may change from time to time, such as sustainable transport, sustainable construction, sustainable food & water, renewable energy and recycling and re-use. Companies developing solutions within the sub-themes, such as companies developing clean energy from wind, solar or hydro are expected to have positive impacts from a climate change mitigation perspective. The Sub-Fund will invest globally, including in emerging markets. The Sub-Fund may invest up to 15% in China A-Shares through the China-Hong Kong Stock Connect Programmes.

The Sub-Fund may invest a significant portion of its assets in small capitalisation companies and have significant positions in specific sectors or markets from time to time.

Significant engagement in developing climate change solutions will be measured through metrics such as the revenue or potential revenue generated by companies through such solutions or other metrics applied by the Investment Manager which may change from time to time, in relation to the key sub-themes as described above. The process to identify companies with exposure to the theme of climate change solutions has three steps: 1) exclusionary framework, 2) identification of initial universe of relevant companies using the ThemeBot, 3) identification of companies best positioned to develop solutions to address climate change.

Step 1: The Investment Manager evaluates and applies values and norms based screening to implement exclusions. To support this

screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens.

Step 2: To identify companies aligned to the sub-themes, the Investment Manager uses the ThemeBot which is a proprietary natural language processing tool that: identifies and determines the relevance of key words and concepts related to the climate change solutions sub-themes; and evaluates public documentation such as regulatory filings, broker reports, news reports or company profiles to identify those companies providing the highest exposure to these sub-themes.

Step 3: The Investment Manager analyses the results of the Themebot to select the companies from this core universe best placed to achieve the sub fund's objective. This analysis is based on fundamental analysis and ongoing engagement with companies to understand how they are positioned to develop solutions today and in the future to address climate change. Fundamental analysis is used to better understand sustainability risks and opportunities that may impact a company. This analysis is also an important driver behind active company engagement when seeking to positively influence business practices to improve sustainability. As part of this analysis, the Investment Manager may make use of a proprietary ESG framework which assess each company's exposure to material sustainability issues however the focus is to identify companies aligned to the theme of climate change solutions.

The Investment Manager has ultimate discretion over the construction of the portfolio and may add companies that have not been identified by the Themebot.

If a company ceases to qualify, the Investment Manager will engage with the company to determine the circumstances for ceasing to qualify. If the company can resolve the matter in the short-term it may continue to be held in the portfolio. However, if not, the security will be sold as soon as reasonably practicable, in the best interests of the Sub-Fund.

The Sub-Fund systematically includes ESG criteria in investment analysis and investment decisions on all securities purchased (excluding cash).

**Other investment exposure** Up to 20% of net assets in Ancillary Liquid Assets and up to 20% of assets in Deposits with Credit Institutions, money market instruments and money market funds for managing cash subscriptions and redemptions as well as current and exceptional payments. Up to 100% of net assets in Ancillary Liquid Assets for defensive purposes on a temporary basis, if justified by exceptionally unfavourable market conditions.

**Derivatives** Used for: efficient portfolio management; hedging. *Types:* see [Sub-Fund Derivatives Usage](#) table under [How the Sub-Funds Use Derivatives, Instruments and Techniques](#) in the Prospectus. *TRS including CFD:* none. *Global exposure calculation method:* commitment.

**SFDR Classification** Article 9

#### Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and who understand the risks of the Sub-Fund, including the risk of capital loss, and:

- seek long-term capital growth;
- seek a higher risk, thematic equity investment that embeds ESG principles;
- are looking to use it as part of an investment portfolio and not as a complete investment plan.

**Term** The product does not have a maturity date. The Board of Directors of the Fund may unilaterally liquidate the product under certain circumstances and the manufacturer would facilitate such a liquidation.

**Practical information**

**Depository** The fund depository is J.P. Morgan SE - Luxembourg Branch.

**Legal Information** JPMorgan Asset Management (Europe) S.à.r.l. may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the

relevant parts of the Prospectus.

JPMorgan Funds consists of separate Sub-Funds, each of which issues one or more Share Classes. This document is prepared for a specific Share Class. The Prospectus and annual and semi-annual financial reports are prepared for JPMorgan Funds.

The Sub-Fund is part of JPMorgan Funds. Under Luxembourg law, there is segregated liability between Sub-Funds. This means that the assets of a Sub-Fund will not be available to meet a claim of a creditor or another third party made against another Sub-Fund.

**Switching** Investors may switch into Shares of another Share Class (excluding a T Share Class, F Share Class or CPF Share Class) of the Sub-Fund or another Sub-Fund of JPMorgan Funds (excluding Multi-Manager Sub-Funds) subject to meeting any relevant eligibility requirements and minimum holding amounts. Further information can be found in the "Investing in the Sub-Funds" section of the Prospectus.

**What are the risks and what could I get in return?**

**Risks**

 The risk indicator assumes you keep the product for 5 year(s).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you. The risk of the product may be significantly higher if held for less than the recommended holding period.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Beside the risks included in the risk indicator, other risks materially relevant for the product may affect its performance. Please refer to the Prospectus, available free of charge at [www.jpmorganassetmanagement.lu](http://www.jpmorganassetmanagement.lu).

**Performance scenarios**

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

**The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.**

The stress scenario shows what you might get back in extreme market circumstances.

**Unfavourable:** this type of scenario occurred for an investment between 2021 and 2023.

**Moderate:** this type of scenario occurred for an investment between 2014 and 2019.

**Favourable:** this type of scenario occurred for an investment between 2016 and 2021.

Recommended holding period		5 years	
Example Investment		\$ 10,000	
Scenarios		if you exit after 1 year	if you exit after 5 years (recommended holding period)
<b>Minimum return</b>	There is no minimum guaranteed return. You could lose some or all of your investment.

**What happens if JPMorgan Asset Management (Europe) S.à.r.l. is unable to pay out?**

JPMorgan Asset Management (Europe) S.à.r.l. is responsible for administration and management of the Fund, and does not hold assets of the Fund (assets that can be held by a depository are, in line with applicable regulations, held with a depository in its custody network). JPMorgan Asset Management (Europe) S.à.r.l., as the

manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Fund or the depository is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any of, your loss.

**What are the costs?**

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

**Costs over time**

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- \$ 10,000 is invested.

Example Investment \$ 10,000	if you exit after 1 year	if you exit after 5 years (recommended holding period)
<b>Total Costs</b>	<b>\$ 814</b>	<b>\$ 2,412</b>
<b>Annual cost impact*</b>	<b>8.1%</b>	<b>3.8%</b>

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.6% before costs and 5.4% after costs.

#### Composition of costs
