

This Simplified Prospectus contains key information about The Jupiter Global Fund –

Jupiter Climate Change Solutions (the 'Fund'). This Simplified Prospectus does not comprise a description of all the sub-funds of The Jupiter Global Fund currently existing, for which separate Simplified Prospectuses are available. If you would like more information before you invest, please consult the full Prospectus. For details about the Fund's holdings please see the most recent annual or semi-annual report and accounts (when issued) of The Jupiter Global Fund (the 'Company'). The rights and duties of the investor as well as the legal relationship with the Fund are laid down in the full Prospectus. Unless defined in this document, defined terms shall bear the same meaning as in the full Prospectus.

Important Information

The Fund is a sub-fund of the Company, an open-ended investment fund with multiple sub-funds incorporated under the laws of the Grand Duchy of Luxembourg. The Company was incorporated on 22 September 2005 and exists for an unlimited period. The Fund was launched on 30 September 2005.

The Company qualifies as an undertaking for collective investment in transferable securities as a société d'investissement à capital

variable under Part I of the Luxembourg law of 17 December 2010 on undertakings for collective investment (the '2010 Law').

The base currency of the Fund is the Euro. Shares of each Class may however be purchased in any freely convertible currency at such conversion rates as may be determined by the Custodian and at the exchange rate risk of the investor, as more fully described in section headed 'How to Subscribe' in the full Prospectus.

Investment Objective and Policy

The investment objective of the Fund is to generate long term capital growth from investment worldwide in companies that are responding positively to the challenge of environmental sustainability and climate change.

The Fund will invest primarily in worldwide equity and equity related securities (including listed preference shares, listed convertible unsecured loan stock, listed warrants and other similar securities). The portfolio will principally comprise of companies considered by the Investment Manager to provide products or services which contribute to environmental improvement, facilitate adaptation to the impacts of climate change or help mitigate the impacts of climate change.

Subject to the limits set out in section headed 'Investment Restrictions' in the full Prospectus, the Fund will have the ability: to hedge against directional risk using index futures and/or cash; to hold bonds and warrants on transferable securities; to use options and futures for hedging purposes and for efficient portfolio management; to enter into portfolio swaps; to use forward currency contracts; and to hold liquid assets on an ancillary basis.

It is the Investment Manager's view that environmental solutions businesses will have deep, long-term structural impact across three key areas – infrastructure, resource efficiency and demographics. The Investment Manager believes the new categories better communicate the link between environmental and economic issues. They also reflect the Investment Manager's belief that investment in environmental solutions businesses is an investment in long-term global structural growth.

Infrastructure

There has been a marked increase in global infrastructure spending in recent years as emerging market economies look to support rapid growth and mature economies seek to modernise. Patterns in both emerging and developed markets have trended towards infrastructure of lower environmental impact (i.e. less pollution, more alternative energy sources etc.) in recognition of its longer-term economic benefits. This is creating opportunities for businesses involved in renewable energy generation, smart electrical grids, clean and

wastewater systems, engineering consultants, transport infrastructure and communication networks.

Resource efficiency

Increased global demand for natural resources has stimulated significant investment in resource efficiency (i.e. lower impact methods of using existing resources such as energy, water and land, as well as resource recycling). This is presenting opportunities for businesses involved in energy and water efficiency, wastewater recycling, air pollution technology, waste recycling (from residential to industrial materials) and sustainable agriculture and land management.

Demographics

Rising populations and changing demographic patterns around the world create unique challenges when it comes to environmental and economic sustainability. Ageing populations in the West are putting pressure on healthcare, for example, while a growing global population is affecting agriculture and food production. These challenges have created opportunities for businesses that are providing sustainable, low impact solutions in sustainable consumption, public transport, health, agriculture and education. The Fund continues to use a stock-focused investment approach. Taking a long-term bottom-up approach to investment and every stock within the portfolios is there on its own fundamental merits. These are companies with strong management teams, sound balance sheets and defensible market positions that convert a high proportion of profit into cash. While the Fund is global in scope, specific geographical exposures are a consequence of stock picking process rather than targeted asset allocation.

Full details can be found on Jupiter's website at www.jupiterinternational.com

Definitions used in this Simplified Prospectus:

- 'NOK' means Norwegian Krone, the legal currency of Norway; and
- 'SEK' means Swedish Krona, the legal currency of Sweden.

For further details, please consult the full Prospectus.

Specific Risk Factors

The Fund is exposed to stock markets fluctuations and depends on the financial performance of the companies in which it invests its assets. More particularly, the Fund is exposed to the following risks:

Risks Related to Investments in Equities (including ordinary and preference shares)

Experience has shown that equities and securities of a share-like character may be subject to strong price fluctuations. That is why

they offer the possibility of considerable price gains, but also involve the corresponding risks. Share prices are influenced above all by the profits or otherwise of individual enterprises and sectors as well as macro-economic developments and political perspectives which determine the expectations of the securities markets and thus the movement of prices.

Specific Risk Factors *continued*

Risks Related to Investments in Fixed-Interest Securities (including convertible debt securities)

Price changes in fixed-interest securities are influenced predominantly by interest rate developments in the capital markets, which in turn are influenced by macro-economic factors. Fixed-interest securities could suffer when capital market interest rates rise, while they could increase in value when capital market interest rates fall. The price changes also depend on the term or residual time to maturity of the fixed-interest securities. In general, fixed-interest securities with shorter terms have less price risks than fixed-interest securities with longer terms. However, they generally have lower returns and, because of the more frequent due dates of the securities portfolios, involve higher re-investment costs.

Risk Related to Investments in Warrants

In addition to the above risks involved with securities and exchange rate changes, warrants carry the risk, but also the opportunity, of what is known as leverage. This leverage is produced, for example, with call warrants through the lower capital investment when the warrants are purchased compared with a direct purchase of the underlying assets. The same applies for put warrants. The greater the leverage, the greater the change of price of the warrant in the event of a change in the prices of the underlying assets (in comparison to the subscription price set forth in the option conditions). The opportunities and risks of warrants increase as the leverage increases. Since warrants are generally issued only for a limited term, it cannot be ruled out that they will be valueless at the date of maturity if the price of the underlying assets falls below the subscription price fixed when the call warrants were issued or exceeds the subscription price fixed when the put warrants were issued.

Risks Related to Investments in Equity Related Securities

The Fund may invest in equity related securities, including but not limited to financial derivative instruments, options, swaps, futures and forward contracts, warrants, convertible bonds and preference shares. Equity related securities may not be listed and are subject to the terms and conditions imposed by their issuers. There may be no active market in equity related securities and therefore investments in equity related securities can be illiquid. In order to meet realisation requests, the Company relies upon the issuers of the equity related securities to quote a price to unwind any part of the equity related securities that will reflect the market liquidity conditions and the size of the transaction. There is a risk that the issuers of equity related securities will not settle a transaction due to a credit or liquidity problem and the Fund may suffer a loss (including a total loss). Investments in equity related securities do not entitle the investors to the beneficial interest in the underlying securities nor to make any claim against the company issuing the securities. Fluctuations in the exchange rate between the denomination currency of the underlying shares and the equity related securities will affect the value of the equity related securities, the redemption amount and the distribution amount on the equity related securities.

There can be no guarantee that any appreciation in the value of the Fund's investments will occur and investors may not get back the full value of their investment.

For further details, please consult the full Prospectus.

Investment Details

Profile of the typical investor

This Fund may be suitable for investors with a broad attitude to risk looking for a long term investment opportunity in line with its Investment Objective and Policy. An investment in the Fund will not be suitable for investors seeking solely an index-linked return on their investment. Investment in the Fund should be regarded as long term in nature and may not be suitable as a short term investment. Typical investors in the Fund are expected to be asset and wealth managers regulated or authorised by the relevant local regulator, retail private clients who will invest through suitably authorised intermediaries and private individuals who are experienced in making equity investments and who have the resources to withstand the risks associated with them.

Classes of Shares

For the time being, the Fund is offering
Class L Euro
Class L US Dollar
Class L Sterling
Class L Norwegian Krone
Class L Swedish Krona

Dividend policy

Class L Euro	Accumulation of income
Class L US Dollar	Accumulation of income
Class L Sterling	Annual dividend with automatic reinvestment by default ¹
Class L Norwegian Krone	Accumulation of income
Class L Swedish Krona	Accumulation of income

¹Prospective investors in the UK should note that the Sterling Class will be subject to the UK 'Distributing Fund' regime for accounting periods ending on or before 30 September 2011. Further details of this regime are set out in the full Prospectus.

Fees and Expenses

To be borne by the Shareholder				
Class L				
Fees				
Euro	US Dollar	Sterling	Norwegian Krone	Swedish Krona

Administrator, Custodian and Management Company costs (up to)**				
0.155%	0.155%	0.155%	0.155%	0.155%

Investment Details *continued*

*The management fee is calculated on the basis of the average daily Net Asset Value of the Fund. It is payable monthly in arrears. The fee actually charged and applicable to each Class of Shares within the limits set forth above will be published in the annual and semi-annual reports of the Company.

**Management Company fees are calculated on a sliding scale not exceeding 0.075% per annum calculated on the Net Asset Value of the Fund with an overall minimum annual fee of €10,000 per Fund. Fees for administration, transfer agency and depository bank services are calculated on a sliding scale not exceeding 0.08% per annum calculated on the Net Asset Value of the Fund. The Fund is also subject to custody safe keeping fees calculated by reference to basis point charges that vary depending upon the country of domicile of securities within the Fund's portfolio. In addition, the Fund is subject to transaction charges expressed as a flat fee per trade that varies according to the country of domicile of the securities traded. In addition to the fees and charges identified herein, the Fund will be subject to normal banking and brokerage fees and commissions on transactions relating to the assets and liabilities of the Fund and any reasonable out of pocket expenses incurred in connection with the Fund and chargeable to the Fund.

Total Expense Ratio (TER)

Class L Euro	Class L US Dollar	Class L Sterling	Class L Norwegian Krone	Class L Swedish Krona
2.00%	2.00%	2.00%	N/A	N/A

The TER is the ratio of gross amount of expenses of the Fund to its average net assets (excluding transaction fees) of the elapsed year and might be exceeded during the current year.

Portfolio Turnover Rate (PTR)

= -20.00%

The PTR is calculated at the level of the Fund by adding the total of securities transactions (purchases and sales) and subtracting that total from the total subscription and redemption of Shares of the Fund and dividing this result by the average monthly net asset value of the Fund and by multiplying the result by 100.

Calculation of the Net Asset Value per Share

The prices of the Shares of each Class are determined at 1.00pm Luxembourg time (the 'Valuation Point') on every Business Day (the 'Valuation Day').

How to buy Shares

Applications must be received by the Administrator prior to 1.00pm Luxembourg time (the 'Dealing Deadline') on a Valuation Day. Shares will be purchased at the Subscription Price calculated as at the Valuation Point, plus an Initial Charge, if applicable. Applications received by the Administrator after the Dealing Deadline on a Valuation Day will be dealt with at the Valuation Point on the following Valuation Day.

How to convert Shares

Conversion facilities are available to all Shareholders wishing to convert all or part of their holding from the Fund to another. Conversions between sub-funds of the Company are made at the relevant Subscription Price and Redemption Price (subject to any conversion fee, if applicable) and may only be made into the equivalent Class in the Fund into which the Shareholder wishes to convert. Conversion requests should be presented directly to the Administrator.

How to redeem Shares

Redemption requests must be received by the Administrator prior to the Dealing Deadline on a Valuation Day. Shares will be redeemed at the Redemption Price of the Fund calculated as at the Valuation Point on such Valuation Day. Redemption requests received by the Administrator after the Dealing Deadline on a Valuation Day will be dealt with at the Valuation Point on the following Valuation Day.

Publication of prices

The prices of the Shares of each Class will be published on www.jupiterinternational.com and at the registered office of the Company on every Valuation Day. Price information is also available on request from the Distributors and from the Administrator in Luxembourg.

Information on Initial Subscription and minimum holding in each Class

Share Class	Minimum Initial Investment	Minimum Incremental Investment	Minimum Holding
L Euro	€1,000	€50	€1,000
L US Dollar	US\$1,000	US\$50	US\$1,000
L Sterling	£1,000	£50	£1,000
L Norwegian Krone	NOK10,000	NOK 500	NOK 10,000
L Swedish Krona	SEK 12,000	SEK 600	SEK 12,000

Taxation of the Fund

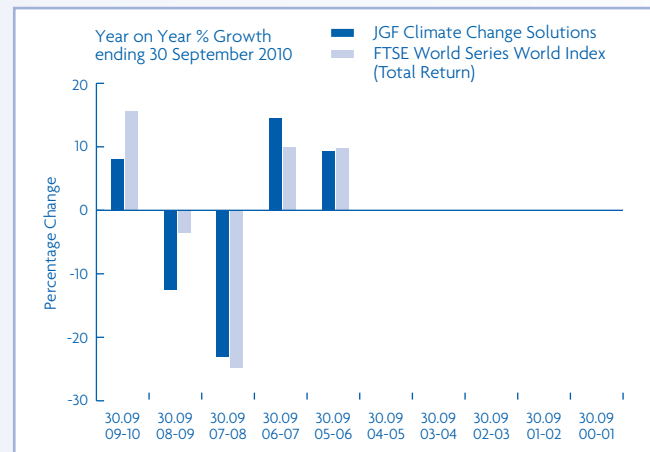

The Fund is solely liable to an annual tax in Luxembourg ('taxe d'abonnement') calculated at the rate of 0.05% per annum computed on the Net Asset Value of each Class. This tax is calculated at the end of the quarter to which the tax relates and payable quarterly.

No Stamp Duty or other tax is payable in Luxembourg in connection with the issue of Shares of the Fund.

EU Tax Considerations

The Council of the EU adopted, on 3 June 2003, Council Directive 2003/48/EC on taxation of savings income in the form of interest payments (the 'Directive'). The Directive was implemented in Luxembourg by a law of 21 June 2005 (the 'EUSD Law'). Under the EUSD Law, dividend and/or redemption proceeds from Shares of the Fund paid to individuals may be subject to withholding tax or give rise to exchange of information with tax authorities. Whether the EUSD Law will be applicable in any particular case and the implications arising therefrom depend on various factors, such as the asset class of the Fund, the location of the paying agent used and the tax residence of the shareholders concerned. Although more details on the implications of the Directive and the EUSD Law are contained in the full Prospectus, investors should also seek advice from their financial or tax legal adviser.
