This information is required by law to help you to understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Euro Corporate Bonds

Sub-fund of KBC Institutional Fund

Classic Shares: BE0168961846 (ISIN-code for Capitalisation shares), BE0945990464 (ISIN-code for Distribution shares)

managed by KBC Asset Management NV

OBJECTIVES AND INVESTMENT POLICY

KBC Institutional Fund Euro Corporate Bonds aims to generate a return by investing chiefly in corporate bonds denominated in euros or currencies pegged to the euro. All regions and sectors may be taken into consideration.

The fund invests at least 90% of its assets in bonds and debt instruments that have an investment grade* credit rating* from Standard & Poors or an equivalent rating from Moodys or Fitch. The fund invests no more than 10% of its assets in bonds and debt instruments that have a credit rating below investment grade or that have not received a rating from the aforementioned agencies. The bonds and debt instruments can have different life spans.

KBC Institutional Fund Euro Corporate Bonds may make limited use of derivatives*. This means that derivatives can be used either to help achieve the investment objectives (for instance, to increase or decrease the exposure to one or more market segments in line with the investment strategy), or to neutralise the portfolio's sensitivity to market factors (by hedging an exchange rate risk, for example).

The fund is denominated in Euro.

You can opt for capitalisation units or distribution units. If you opt for capitalisation units, the fund will reinvest any income received in the manner set out in the prospectus. If you opt for distribution units, the fund can pay out part or all of any income received at the intervals specified in the prospectus (for more details, see section 'Types of shares and fees and charges' of the information for this sub-fund in the prospectus).

Orders for fund units are executed daily (for more details, see the 'Information concerning the trading of shares' section of the information for this sub-fund in the prospectus).

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

This figure is based on data from the past, which is not always a reliable indication of risk and return in the future.

The risk and reward indicator is assessed regularly and can therefore go up or down.

The lowest figure does not mean that the investment is entirely free of risk. However, it does indicate that, compared with the higher figures, this product will generally provide a lower, but more predictable return. While the figure gives an indication of the return the fund might generate, it also indicates the risk involved. The higher the figure, the greater the potential return, but also the more difficult it is to predict this return. You might even sustain a loss.

The figure has been calculated from the viewpoint of an investor in euro.

Why does this fund have a risk and reward indicator of 3?

3 is typical for bond funds, which tend to have an indicator of 3 or 4. Bond funds are generally less sensitive to the markets than equity funds, which tend to have an indicator of 6 or even 7 in some cases. The value of bond funds is especially sensitive to changes in interest rates, since the interest on these bonds is fixed in advance and does not go up when market rates increase.

Moreover, an investment in this fund involves:

- A moderate level of inflation risk: there is no protection against an increase of the inflation.
- A moderate level of credit risk: the assets are primarily - but not exclusively - invested in bonds with an investment grade rating. Consequently the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

There is no capital protection.

CHARGES

These charges are used to cover, among other things, the management costs of the fund, including marketing and distribution expenses. They reduce the investment's ability to grow. You can find additional information on the charges in the 'Types of shares and fees and charges' section in the information concerning this sub-fund in the prospectus.

One-off charges taken before or after you invest

Entry charge	3.00%	This is the <i>maximum</i> that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you will pay less. For more information on the actual entry and exit charges, please contact your financial adviser or distributor.
Exit charge	5.00% on sale of units within one month of purchase	
Switching from one sub-fund to another		If you would like to exchange your units in this sub-fund* for units in another sub-fund, you will be charged a fee comprising the Exit Charge for the old sub-fund and the Entry Charge for the new sub-fund (for more information, see the 'Types of shares and fees and charges' section in the information concerning this sub-fund in the prospectus).

Charges taken from the fund over a year

Ongoing charge	0.56%	The figure for the ongoing charge is based on the charges for the year ending on 31 December 2016. This figure does not include transaction charges, except if the fund pays entry or exit charges when units in other funds are bought or sold, and may change from year to year.
