Lazard Emerging Markets Local Debt Fund B Acc USD

Lazard Emerging Markets Local Debt Fund is a sub-fund of Lazard Global Investment Funds Public Limited Company (the "UCITS")

ISIN: IE00B4258398

This Fund is managed by Lazard Fund Managers (Ireland) Limited, part of the Lazard Group

Objectives and Investment Policy

Lazard Emerging Markets Local Debt Fund (the "Fund") aims to maximise total return from income and capital growth.

The Fund is actively managed and may invest in investment grade, non-investment grade and unrated debt securities (e.g. bonds) issued by corporates, sovereigns and quasi-governmental bodies that are based in or have close economic ties to emerging market countries. The Fund will primarily invest in securities denominated in the local emerging market currencies where the securities are issued although the Fund may also invest in securities denominated in US Dollars or currencies of other OECD countries.

The Fund may also invest up to 10% of its value in units or shares of other investment funds (including exchange traded funds and other sub-funds of the UCITS).

Investment in securities listed or traded in Russia will not exceed 25% of the value of the Fund at any time.

The Fund may invest in cash and in investments that are deemed to be nearly equivalent to cash at any time and to the extent considered appropriate in light of market conditions.

The Fund may gain exposure to the asset classes above either by investing in them directly, or by using derivatives (which are financial contracts whose value is linked to the price of an underlying investment).

As a result of its use of derivatives, the Fund may be 'geared' or 'leveraged' (which can lead to a proportionately much larger movement in the value of the Fund's assets). The expected level of the Fund's leverage (as measured by the gross notional value of all derivatives positions) will be 250% of the value of the Fund.

You can buy and sell shares in the Fund on any day treated as a normal business day in Dublin, London and New York.

The Fund has discretion as to which investments it will hold within the limits of the Investment Objective and Policy.

Income and profits, if any, attributable to your shares will not be paid out as a dividend but will be accumulated in the Fund on your behalf and reflected in an increase in the value of your holdings.

The Fund's performance is measured against the performance of the J.P. Morgan GBI-EM Global Diversified Index (the "Benchmark"), which the Investment Manager has assessed to be the most appropriate Benchmark for measuring performance. The performance of the Fund seeks to exceed the Benchmark performance. The Fund is not constrained by the Benchmark as it has flexibility to invest in securities and asset classes not included in the Benchmark.

The Fund promotes environmental and/or social characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088, the "SFDR Regulation".

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within a short period of time.

Risk and Reward Profile

The risk and reward categories above are calculated using historic data and may not be a reliable indicator of the Fund's future risk profile. The risk and reward category may shift over time and is not a target or guarantee.

The lowest category (i.e. category 1) does not mean "risk free".

The risk rating of this share class is calculated on the basis of historic volatility – i.e. how much the value of the underlying assets of the Fund has fluctuated over the last 5 years. As this share class does not have 5 years' performance data available, we have simulated the volatility, using a suitable proxy, based on historic data.

This share class has been placed in the risk category stated above, because based on the simulated historic data, the underlying assets within the Fund have shown moderately high volatility.

Please note, there are other risks that may not be reflected in the risk and reward categories above. Some of these risks are summarised below.

- There is no capital guarantee or protection of the value of the Fund. The value of your investment and the income from it can go down as well as up and you may not get back the amount you originally invested.

- This Fund may invest in the securities of emerging markets. These markets may be less developed than others and so there is a greater risk that the Fund may experience greater volatility, delays in buying, selling and claiming ownership of its investments. Emerging markets may also have less developed political, economic and legal systems and there is a higher risk that the Fund may not get back its money.
 - Investment in lower rated bonds increases the risk of default on repayment and the risk to capital of the Fund.
 - There is a risk that the other side to certain contracts that the Fund may enter into may not be able to meet obligations. For example, this may arise in the Fund where an investment is made using a derivative or a debt instrument, and the other side to the agreement becomes insolvent, or is otherwise unable to meet its obligations. In such a case, the Fund may incur loss.
 - There are additional risks relating to the use of derivatives - the Fund invests in derivatives for the purposes of reducing exposure (hedging), gaining greater exposure, and speculating in the value of underlying investments. The use of derivatives to gain greater exposure to investments rather than by direct investment can increase the possibility for profit but also increase the risk of loss.
 - The Fund may invest in units or shares of other investment funds. Such other funds may themselves be subject to their own fees and expenses.
 - The returns from your investment may be affected by changes in the exchange rate between the Fund's base currency, the currency of the Fund's investments, your share class and your home currency.
- See "Risk Factors" in the UCITS' Prospectus and Fund Supplement for more information about risks.
