Lazard Global Sustainable Fixed Income Fund B Acc EUR Hedged

Lazard Global Sustainable Fixed Income Fund is a sub-fund of Lazard Global Active Funds Public Limited Company (the "UCITS")

ISIN: IE00BJMDCB44

This Fund is managed by Lazard Fund Managers (Ireland) Limited, part of the Lazard Group

Objectives and Investment Policy

Lazard Global Sustainable Fixed Income Fund (the "Fund") aims to seek maximum total return from a combination of income and capital appreciation.

The Fund is actively managed and may invest in investment grade, non-investment grade and unrated debt securities (e.g. bonds), issued by corporates, sovereigns, governments and quasi-governmental bodies throughout the world. Such securities will primarily be investment grade, but the Investment Manager may seek to enhance returns and diversify risk by tactically investing in securities which are non-investment grade or unrated. A maximum of 15% of the Fund's net assets may be invested in debt instruments which are non-investment grade or unrated. The individual selection of securities will be determined by the Investment Manager's active assessment of macroeconomic factors, such as global interest rates, currency exposure, sector spreads and currencies.

In excess of 20% of the Fund's Net Asset Value will at all times be invested in labelled green, social, or sustainable bonds.

The Fund may also invest up to 10% of its value in units or shares of other investment funds (including exchange traded funds).

The Fund may invest more than 20% of its assets in emerging markets.

Up to 10% of the Fund's net assets may be held in cash and in investments that are deemed to be nearly equivalent to cash. This percentage may be exceeded where deemed appropriate by the Investment Manager in light of market conditions and the best interests of Shareholders.

The Fund may gain exposure to the asset classes above either by investing in them directly, or by using derivatives (which are financial contracts whose value is linked to the price of an underlying investment). The currency exposures of

the Fund's portfolio will be substantially hedged back into US Dollars, being the base currency of the Fund.

As a result of its use of derivatives, the Fund may be 'geared' or 'leveraged' (which can lead to a proportionately much larger movement in the value of the Fund's assets). The expected level of the Fund's leverage (as measured by the gross notional value of all derivatives positions) will be 100% of the value of the Fund.

You can buy and sell shares in the Fund on any day on which the stock exchanges in London and New York are open for business.

The Fund has discretion as to which investments it will hold within the limits of the Investment Objective and Policy.

Income and profits, if any, attributable to your shares will not be paid out as a dividend but will be accumulated in the Fund on your behalf and reflected in an increase in the value of your holdings.

The Fund's performance is measured against the performance of Bloomberg Barclays Global Aggregate Bond Index (the "Benchmark"), which the Investment Manager has assessed to be the most appropriate Benchmark for measuring performance. The performance of the Fund seeks to exceed the Benchmark performance. The Fund is not constrained by the Benchmark, as it has flexibility to invest in securities and asset classes not included in the Benchmark.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within a short period of time.

Risk and Reward Profile

The risk and reward categories above are calculated using historic data and may not be a reliable indicator of the Fund's future risk profile. The risk and reward category may shift over time and is not a target or guarantee. The lowest category (i.e. category 1) does not mean "risk free".

The risk rating of this share class is calculated on the basis of historic volatility – i.e. how much the value of the underlying assets of the Fund has fluctuated over the last 5 years. As this share class does not have 5 years' performance data available, we have simulated the volatility, using a suitable proxy, based on historic data.

This share class has been placed in the risk category stated above, because based on the simulated historic data, the underlying assets within the Fund have shown moderate volatility.

Please note, there are other risks that may not be reflected in the risk and reward categories above. Some of these risks are summarised below.

- There is no capital guarantee or protection of the value of the Fund. The value of your investment and the income from it can go down as well as up and you may not get back the amount you originally invested.
- This Fund may invest in the securities of emerging markets. These markets may be less developed than others and so there is a greater risk that the Fund

may experience greater volatility, delays in buying, selling and claiming ownership of its investments. Emerging markets may also have less developed political, economic and legal systems and there is a higher risk that the Fund may not get back its money.

- Investment in lower rated bonds increases the risk of default on repayment and the risk to capital of the Fund.
 - There is a risk that the other side to certain contracts that the Fund may enter into may not be able to meet obligations. For example, this may arise in the Fund where an investment is made using a derivative or a debt instrument, and the other side to the agreement becomes insolvent, or is otherwise unable to meet its obligations. In such a case, the Fund may incur loss.
 - There are additional risks relating to the use of derivatives - the Fund invests in derivatives for the purposes of reducing exposure (hedging), gaining greater exposure, and speculating in the value of underlying investments. The use of derivatives to gain greater exposure to investments rather than by direct investment can increase the possibility for profit but also increase the risk of loss.
 - The Fund may invest in units or shares of other investment funds. Such other funds may themselves be subject to their own fees and expenses.
 - More than 35% of the Fund may be invested in fixed interest securities issued by a single government. If any such single government were to fail to meet its obligations, the impact on the Fund would be material.
 - Your shares will be hedged with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the base currency of the Fund. This may not completely eliminate currency risk and therefore, any residual risk may affect the performance of your shares.
- See "Risk Factors" in the UCITS' Prospectus and Fund Supplement for more information about risks.

Charges

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	2.00%
This is the maximum that might be taken out of your money before it is invested and before proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	1.39%
Charges taken from the Fund under certain specific conditions	
Performance fee	N/A

The entry and exit charges shown are maximum figures. In some cases you may pay less. You can find out the actual charges from your financial advisor.

The ongoing charges figure is based on expenses for the year ending 31 December 2020 and does not include any performance fee or portfolio transaction costs incurred where we buy or sell assets for the Fund. Ongoing charges may vary from year to year.

An amount for "Duties and Charges" as defined in the UCITS' Prospectus may be applied.

The Directors may, in their absolute discretion, charge a switching fee of up to 1% of the Net Asset Value of the shares to be switched.

Please see "Fees and Expenses" in the UCITS' Prospectus, Fund Supplement and Appendix I Share Class Details of the Fund Supplement.
