Higher Risk

The risk indicator assumes you keep the product for 7 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This classification rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

**Be aware of currency risk.** The currency of this product may be different from that of your country. As you may receive payments in the currency of this product and not that of your country, the final return you will get will depend on the exchange rate between these two currencies.
