#### BACKGROUND TO THE COMPANY

The following information is derived from, and should be read in conjunction with, the full text and definitions section of Crown Sigma UCITS plc's (the "Company") prospectus (the "Prospectus").

#### Structure

Fund size (NAV as at 30 April 2023):	EUR 5,541,082,102
Date of incorporation:	27 March 2012
Investment vehicle type:	Umbrella investment company with variable
	capital and segregated liability between sub-funds

The Company is an umbrella investment company with variable capital and segregated liability between sub-funds which is open-ended and was authorized by the Central Bank of Ireland pursuant to the provisions of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations").

The Company's Prospectus was last updated with effect from 17 September 2021 as approved by the Central Bank of Ireland. The update provides insertion for environmental, social and governance ("ESG") policies and language around the integration of ESG to reflect the definitions and requirements of the Sustainable Finance Disclosure Regulation (Regulation EU/2019/2088).

As at the end of the reporting period, the Company comprised of thirteen sub-funds, all with limited liability. The first subscription dates of the active sub-funds were as follows:

- LGT Crown Listed Private Equity 18 February 2013.
- LGT EM LC Bond Sub-Fund 29 April 2016.
- LGT Sustainable Equity Global Sub-Fund 29 April 2016.
- LGT Sustainable Equity Europe Sub-Fund 29 April 2016.
- LGT Sustainable Bond Global Sub-Fund 29 April 2016.
- LGT Sustainable Bond Global Hedged Sub-Fund 29 April 2016.
- LGT Sustainable Quality Equity Sub-Fund 31 March 2016.
- LGT Bond EM Credit Opportunities Sub-Fund 1 May 2017.
- LGT Sustainable Bond Corporates Sub-Fund 1 May 2017.
- LGT Sustainable Equity Market Neutral Sub-Fund 29 September 2017.
- LGT Crown Liquid Private Equity Opportunities Sub-Fund 1 November 2018.
- LGT EM HC Bond Sub-Fund: as of 15 June 2021.
- LGT EM Frontier LC Bond Sub-Fund: as of 23 June 2021.

#### Sustainable Finance Disclosure Regulation ("SFDR")

LGT Crown Listed Private Equity and LGT Crown Liquid Private Equity Opportunities Sub-Fund do not promote environmental or social characteristics in a way that meets the specific criteria contained in Article 8 of SFDR or have sustainable investment as its objective in a way that meets the specific criteria contained in Article 9 of SFDR and therefore has been categorized as an Article 6 financial product for the purposes of SFDR. Accordingly, SFDR does not require any ongoing disclosures in the periodic reports for these sub-funds.

For the purpose of the EU's regulation on the establishment of a framework to facilitate sustainable investment (the "Taxonomy Regulation"), it should be noted that the underlying investments of these sub-funds do not take into account the EU criteria for environmentally sustainable economic activities.

LGT Sustainable Bond Corporates Sub-Fund promotes environmental or social characteristics in a way that meets the specific criteria contained in Article 9 of SFDR and therefore has been categorized as an ESG Orientated Fund for the purposes of SFDR.

#### **BACKGROUND TO THE COMPANY (continued)**

#### Sustainable Finance Disclosure Regulation ("SFDR") (continued)

All other sub-funds promote environmental or social characteristics in a way that meets the specific criteria contained in Article 8 of SFDR and therefore has been categorized as an Article 8 financial product for the purposes of SFDR. The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

#### Investment objective

The investment objectives of the sub-funds are as follows:

#### LGT Crown Listed Private Equity

The sub-fund's investment objective is to invest the available funds in companies that are active in, or associated with, the private equity industry with the purpose of spreading investment risks and enabling its shareholders to achieve an appreciation of capital over the medium to long-term. The anticipated returns are expected to be correlated to listed private equity returns. The base currency of the sub-fund is Euro.

#### LGT EM LC Bond Sub-Fund

The investment objective of the sub-fund is to generate consistent medium-term capital appreciation by investing primarily in a broad range of fixed income securities listed or traded on a recognized exchange (such as bonds, including inter alia inflation-linked, high-yield or convertible bonds, credit linked notes, treasuries and money market instruments) which are issued by issuers from Emerging Markets and / or denominated in Emerging Markets currencies or otherwise linked or related to Emerging Markets. Furthermore, financial derivative instruments ("FDI") may be used to achieve the investment objective including futures, swaps, currency forwards and options. The base currency of the sub-fund is Euro.

#### LGT Sustainable Equity Global Sub-Fund

The investment objective of the sub-fund is to generate consistent long-term capital appreciation by investing primarily in a broad range of equity securities and instruments (shares, participatory certificates and profit-sharing certificates) listed or traded on a recognized exchange. Furthermore, FDI may be used to achieve the investment objective including futures, swaps, currency forwards and options. The base currency of the sub-fund is Euro.

#### LGT Sustainable Equity Europe Sub-Fund

The investment objective of the Sub-Fund is to generate consistent long-term capital appreciation by investing primarily in a broad range of equity securities and instruments (such as shares, participatory certificates and profit-sharing certificates) listed or traded on a recognized exchange. Such securities and instruments will be either (i) issued by companies with their registered office in, or operating most of their business activities in, a European country, or (ii) holding companies that primarily hold participations in companies with registered offices in European countries. Furthermore, FDI may be used to achieve the investment objective including futures, swaps, currency forwards and options. The base currency of the subfund is Euro.

#### LGT Sustainable Bond Global Sub-Fund

The investment objective of the sub-fund is to generate consistent medium term capital appreciation by investing primarily in a broad range of debt securities and instruments (such as bonds, including inter alia inflation-linked, high-yield or convertible bonds, credit linked notes, treasuries and money market instruments listed or traded on a recognized exchange. Furthermore, FDI may be used to achieve the investment objective including futures, swaps, currency forwards and options. The base currency of the sub-fund is Euro.

#### LGT Sustainable Bond Global Hedged Sub-Fund

The investment objective of the sub-fund is to generate consistent medium term capital appreciation by investing primarily in a broad range of debt securities and instruments (such as bonds, including inter alia inflation-linked, high-yield or convertible bonds, credit linked notes, treasuries and money market instruments listed or traded on a recognized exchange and issued by private or public debtors globally. Furthermore, FDI may be used to achieve the investment objective including futures, swaps, currency forwards and options. The base currency of the sub-fund is US Dollar.

#### **BACKGROUND TO THE COMPANY (continued)**

#### Investment objective (continued)

#### LGT Sustainable Quality Equity Sub-Fund

The investment objective of the sub-fund is to generate consistent long term capital appreciation by investing primarily in a broad range of equity securities and instruments (shares, participatory certificates and profit sharing certificates) listed or traded on a recognized exchange. Furthermore, FDI may be used to achieve the investment objective including futures, swaps, currency forwards and options. The base currency of the sub-fund is US Dollar.

#### LGT Bond EM Credit Opportunities Sub-Fund

The investment objective of the sub-fund is to generate consistent medium term capital appreciation by investing primarily in a broad range of debt securities and instruments (such as bonds, including inter alia inflation-linked, high-yield or convertible bonds, credit linked notes, treasuries and money market instruments) listed or traded on a recognized exchange and which are issued by issuers from emerging markets and opportunistically issued by issuers from developed markets. Furthermore, FDI may be used to achieve the investment objective including futures, swaps, currency forwards and options. The base currency of the sub-fund is US Dollar.

#### LGT Sustainable Bond Corporates Sub-Fund

The investment objective of the sub-fund is to generate consistent medium term capital appreciation by investing primarily in a broad range of debt securities and instruments (such as bonds, including inter alia inflation-linked, high-yield or convertible bonds, credit linked notes, treasuries and money market instruments) listed or traded on a recognized exchange and issued by private or public debtors globally. Furthermore, FDI may be used to achieve the investment objective including futures, swaps, currency forwards and options. The base currency of the sub-fund is US Dollar.

#### LGT Sustainable Equity Market Neutral Sub-Fund

The investment objective of the sub-fund is to generate consistent long term capital appreciation by investing primarily in a broad range of single equity and equity index securities and instruments. The Investment Manager will pursue a long/short equity market neutral strategy. Furthermore, FDI may be used to achieve the investment objective including futures, swaps, currency forwards, contracts for difference and options. The base currency of the sub-fund is US Dollar.

#### LGT Crown Liquid Private Equity Opportunities Sub-Fund

The investment objective of the sub-fund is to generate consistent medium to long term appreciation of capital by investing predominantly in equities, equity related transferable securities, as well as fixed income securities of companies that are benefitting from or have the potential to benefit from Private Equity value creation strategies. Furthermore, FDI may be used to achieve the investment objective including futures, swaps, currency forwards, contracts for difference and options. The base currency of the sub-fund is US Dollar.

#### LGT EM HC Bond Sub-Fund

The investment objective of the sub-fund is to generate consistent long term capital appreciation by investing primarily in fixed income securities, namely government bonds, money market instruments, floating rate notes and fixed or variable rate commercial paper and in cash, of emerging market or frontier markets denominated currencies. The Investment Manager will pursue a long only strategy. Furthermore, FDI may be used to achieve the investment objective including futures, total return swaps, currency forwards, options and warrants. The base currency of the sub-fund is US Dollar.

#### LGT EM Frontier LC Bond Sub-Fund

The investment objective of the sub-fund is to generate consistent long term capital appreciation by investing primarily in fixed income securities such as bonds, treasuries and money market instruments, floating rate notes and fixed or variable rate commercial paper and in cash, of mainly emerging market or frontier markets denominated currencies. The Investment Manager will pursue a long/short strategy. Furthermore, FDI may be used to achieve the investment objective including futures, total return swaps, currency forwards, options and warrants. The base currency of the sub-fund is US Dollar.

There can be no assurance that the Sub-Funds will achieve their investment objective and investment results may vary substantially on a monthly, quarterly and annual basis, and over the course of a market cycle.

#### INVESTMENT MANAGER'S REPORT

The strong sell-off experienced since the initiation of the war between Russia and Ukraine at the end of February continued well into summer. Fears of recession in developed countries, higher inflation, tighter monetary policies globally, China growth slowdown partly due to still strict COVID restrictions but also real estate sector weakness and geopolitical events were the dominant themes during the beginning of the reporting period. These drivers kept global risk appetite under pressure and the US dollar on a strengthening path. Official sources like IMF, having already earlier downgraded their growth forecasts, in July further lowered their estimates for 2023 and next year. Since Russia's invasion into Ukraine, inflation has been the major topic as well as a headache for global central banks as there has been both demand and supply driven inflation worries. It also became clear that inflation would remain at very high levels or even rise further, forcing most central banks to raise interest rates faster and more rigorously. Higher commodity prices were the clearest driver for supply driven inflation uncertainty but also pent-up demand after two years of Covid restrictions had its expected impact. In this difficult environment local emerging market debt saw a continuous slide lower. Central and Eastern Europe was again the worst performing region, hit by a double whammy of currency weakness and rapidly rising yields. Latin America struggled to a similar degree although the weakness was more focused on the FX side. Asia was again the best performing region although inflationary pressures were starting to mount. From a fixed income asset class perspective, inflation-linked bonds with similar maturities underperformed government bonds due to the sharp decline in break-even rates and the riskoff environment, while corporate bonds were the worst performers. Energy prices continued to rise, supported by geopolitics, while industrial metals prices fell on rising recession fears. In the changing macroeconomic environment, shifting from inflationary to recessionary fears, global interest rates are showing large daily fluctuations due to uncertainty about the economic outlook and the response of central banks. However, global break-even rates slumped in some cases significantly, particularly in June due to weaker commodity prices.

The sentiment however turned around sharply mid-July and risky assets saw a strong rally driving them almost to the same levels as where the period began. The sharp turn came after a period of extreme investor bearishness and was triggered partly by investors focusing more on the possibility that the Fed would pivot in its hiking cycle. The illiquidity during the holiday season partly explained the strong rebound in asset prices as risk sentiment improved. The positive sentiment completely turned in mid-August as inflation pressures continued to mount and economic activity remained unexpectedly resilient. This forced central bankers globally to step up hawkish rhetoric and follow it up with further rate hikes. Earlier, markets had already started to price in rate cuts by mid next year, but the expectations that inflation is more of a structural problem forced markets to reverse their assumptions. The fear that central banks would choose to fight inflation at the expense of growth proved poisonous for riskier assets. The bearish sentiment into quarter end led equity markets to drop to year lows. Local emerging market debt saw a similar pattern with initial strength turning into weakness and reaching year to date lows at quarter end. This was especially true against USD as the relentless strengthening of the greenback continued throughout the quarter. Turkey was able to perform exceptionally well during the period despite inflation sharply accelerating above 80% as the central bank stuck to its unorthodox monetary policy of cutting interest rates. Yields on Turkish bonds dropped from 23% to almost 12%, resulting in an almost 30% gain. Foreign ownership of bonds is however only around 1%, as the risk of capital controls and highly negative real rates didn't attract buying interest. Colombia on the other hand performed very poorly with markets continued to be roiled by the election of the left-wing president Gustavo Petro. The uncertainty concerning the political agenda and fiscal prudence resulted in losses in both FX and bonds. In the third quarter, global bond yields have been on a wild ride and showed significant increase in volatility. The Ice BofA MOVE Index of US Treasury option volatility reached the second highest reading in the post-global financial crises period. During the quarter, markets were affected by the ongoing trend in big rate hikes from major global central banks, surprising inflation data, leadership change in the UK and elections in Italy and finally interventions by governments and central banks. After the new UK government delivered a big fiscal expansion package in September, front-end gilt yields rose more than 100 basis points within a few days and long-bonds sold-off dramatically. As a result, the Bank of England announced unlimited long-dated bond purchases and postponed the quantitative tightening to the end of October. The strong rise in nominal government bond yields was mainly driven by the sharp surge in real yields, while break-even rates declined in most markets. In particular, benchmark real yields were significantly higher for the quarter except in Japan. Above all, Italian, British, US, French and Danish real yields rose by over 100 basis points over the quarter. This resulted in an increase in the real yield of the benchmark index by 132 basis points. Inflation expectations have developed unevenly but have declined overall. In New Zealand and Sweden, the declines in 10-year break-even inflation rates have been significant, amounting to more than 50 basis points. On the other hand, the BOE's intervention led to an outlier in inflation expectations in the UK, with an increase of 47 basis points.

Coming into the third quarter the extreme bearishness got relief from the better than expected US inflation number released in November. On the back of this markets started pricing in a less aggressive Fed, leading to broad based gains in risky assets and global yields correcting lower. Markets started questioning the FEDs resolve to hike rates much further, especially given the signs of a global economic cool down evident in various leading indicators. US 10Y government yields dropped by more than 75bps at the same time as the US dollar sold off heavily. Some more dovish comments from FED board members further boosted the markets, as did the abrupt and totally unexpected ending of zero covid policy in China in the beginning of December. The market moves were possibly exaggerated by the low liquidity coming into the end of the year and some investors already re-positioning for the new year. The strong sentiment continued throughout January.

#### **INVESTMENT MANAGER'S REPORT (continued)**

Local emerging market debt tightly followed the pattern seen in other risky assets. On the back of lower core rates the average yield on emerging market local debt decreased by over 80bps from its highs during the quarter. The at least temporary reversal of USD strength also boosted the FX return component of the asset class. Egypt bucked this positive trend and was by far the worst performing country with a negative performance exceeding 22%. This was almost purely driven by losses in the currency, as bond prices remained stable. The increased in energy and food prices (especially wheat of which Egypt is a large importer) led to spiralling inflation, which the central bank was somewhat unwilling to fight with aggressive enough rate hikes. Foreign investors have substantially cut their exposures to Egypt, removing a key funding source and reducing FX reserves for the country. Against this backdrop Egypt was forced to devalue its currency in March 2022 and then again in October of 2022. Regardless of the IMF program put in place in December markets remain sceptical about the prospects of the country and its ability to avoid a third devaluation inside of a year. As 2022 progressed, there were repeated fears that the US policy of raising interest rates, combined with an energy crisis in Europe and the collapse in real estate prices in China, could lead to a global recession. On the other hand, the prospect that such a development could tame inflation and soften the interest rate outlook has always been a source of confidence. However, optimism increasingly dominated in the fourth quarter: while the Fed, ECB, and the BoE ended the year in a synchronized fashion, all downshifting the size of rate hikes from 75 to 50 basis points moves in December. With regards to the rhetoric that indicates the future monetary policy, the BoE followed a more dovish approach, the ECB was on the rather hawkish side, while the US Fed landed in between the two. The biggest surprise (in terms of timing) was Bank of Japan's decision to widen the trading band target to +/- 0.5% (previously +/- 0.25%) on 10-year bond yields. China surprisingly announced the end of its zero-COVID policy shortly before the end of the year. For its part, Europe benefited from the fact that local natural gas prices were significantly lower in the fourth quarter than in late summer, which somewhat eased previous concerns about the energy crisis. Index real yields closed the quarter mixed, significantly higher in Europe, while lower in the US and Australia. Inflation expectations as measured by 10-year breakeven rates rose in most markets, while falling in the UK, Sweden, Japan and Canada. From a performance perspective, the best market was Italy slightly ahead of Australia and the UK, while Denmark showed a negative total return number and performed worst. Despite a strong finish, however, all equity indices posted losses for the full year, with emerging markets booking the biggest and European and Japanese equities the smallest losses on a currency-hedged basis. China's CSI 300 benchmark and the Nasdaq in the US suffered the largest setbacks.

After the initial euphoria early in the year, boosted by the China re-opening and hopes for an early end of the monetary policy tightening cycle, the sentiment however quickly turned in February with the higher than expected inflation print in the US. This led markets to quickly price in additional hikes as well as the Fed staying at the higher terminal rate for a longer period, leading to a rapid rise in global yields. Risk sentiment whiplashed and risky assets across the board were priced lower. The US dollar experienced a bout of strength, partially reversing its losses during the last months, but later gave up all the gains. Market uncertainty increased significantly towards the end of the quarter as financial sector stress picked up in the US, but later spreading also to European banks. Bank runs resulted in the largest failures in US banks since 2008 and the loss of investor confidence in Credit Suisse forced the Swiss authorities to hastily engineer a takeover of the bank by its rival UBS. Bank stress placed central banks in a difficult situation regarding the continuation of their monetary tightening. Local emerging market debt tightly followed the pattern seen in other risky assets. The initial euphoria in January quickly turned to weakness in February, where markets gave back 2/3 of their gains. Easing of concerns regarding the banking sector drove a strong rally at the end of the quarter, surpassing the highs seen in beginning of February. The average yield on emerging market local debt stayed pretty much unchanged, although it fluctuated wildly at the end of the reporting period. The best performing country was Colombia after having struggled since the election of far-left president Petro in June 2022. There was not so much positive development in the country, rather some of the worst fears being priced out. It has proved challenging for Petro's government to be able to push through most of their more market unfriendly legislation, soothing investor fears. Egypt was once again by far the worst performing country. Despite the significantly improved prospects for a cyclical recovery in the year 2023, the pattern of fluctuating market sentiment that we had seen in 2022 continued in the first few months of the new year. Interest rates trended higher and credit spreads tightened until around mid-February. By early March, however, reality had caught up with the markets. As investor panic spread rapidly, two US regional banks had to be taken over by deposit insurance within days of each other. Credit Suisse ceased to exist as an independent company, and the major central banks took steps to restore liquidity and confidence. Expectations for future US key interest rates fell particularly sharply, with many investors now anticipating a turnaround in rates next summer. In April, financial market developments were dominated by uncertainties about the major policy rates path, amid mixed but generally weaker data releases, rising recession risks, inflation rates still above target, the noise about the US debt ceiling and last but not least renewed uncertainties from the banking sector. Since beginning of the year 2023, real yields on the benchmark indexes experienced a rollercoaster ride and closed clearly lower than end of December 2022 except Sweden and the UK. In mid-March, inflation-linked bonds struggled, and break-even inflation rates fell due to the risk-off environment. The US 10-year break-even inflation rate fell to 2.08%, the lowest level since early 2021, before bouncing back to 2.2%, while the 2-year fell from over 3% and closed the reporting period at 2.2%. In a year-on-year comparison, the global stock markets, as measured by the MSCI World NET TR (EUR), closed slightly weaker, mainly driven by the weak development of most currencies against the euro. The various stock indices (in local currency including dividends) achieved the following returns in the reporting period: S&P500 +2.6%, MSCI Europe +7.1%, NIKKEI +9.9% and MSCI Emerging Markets LC -3.9%.

LGT Capital Partners Ltd. Pfäffikon, Switzerland August 2023

#### DIRECTORS' REPORT

The Directors submit their annual report together with the audited financial statements, which comprise the Statement of Comprehensive Income, the Balance Sheet, the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, the Statement of Cash Flows, the related notes for the Company and its sub-funds and the Portfolio of Investments, for the year ended 30 April 2023.

#### Statement of Directors' responsibilities

The Directors are responsible for preparing the Directors' report and the financial statements in accordance with Irish law which requires the Directors to prepare financial statements for each financial year that gives a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year. Under that law the Directors have prepared the financial statements in accordance with International Financial Reporting Standards ("IFRS"), as adopted by the European Union ("EU").

Under Irish law, the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Company for the financial year.

In preparing the financial statements, the Directors are required to:

- (i) select suitable accounting policies and then apply them consistently;
- (ii) make judgments and estimates that are reasonable and prudent;
- (iii) state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements; and
- (iv) prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors confirm that they have complied with the above requirements in preparing the audited financial statements. These financial statements may be available on the website of LGT Capital Partners Limited and/or any regulatory website as may be required by law and/or regulations. The Directors are responsible for the maintenance and integrity of corporate and financial information included on the Company's website.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- (i) correctly record and explain the transactions of the Company;
- (ii) enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy; and
- (iii) enable the Directors to ensure that the financial statements comply with the Companies Act 2014 and enable those financial statements to be audited.

The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Under the UCITS regulations, the Directors are required to entrust the assets of the Company to the Depositary for safe-keeping. The Depositary appointed as at the year end is RBC Investor Services Bank S.A., Dublin Branch.

#### Directors' compliance statement

The Directors acknowledge that they are responsible for securing the Company's compliance with its relevant obligations. The Directors confirm that they have;

- (i) drawn up a compliance policy statement setting out the Company's policies respecting compliance by the Company with its relevant obligations;
- (ii) put in place appropriate arrangements or structures that are designed to secure material compliance with the Company's relevant obligations; and
- (iii) conducted a review, during the financial year ended 30 April 2023, of the arrangements and structures, referred to at (ii) above.

#### **DIRECTORS' REPORT (continued)**

#### Corporate governance statement

The Board has adopted a voluntary Corporate Governance Code for Collective Investment Schemes & Management Companies (the "Code") issued on 14 December 2011 by the Irish Funds Industry Association. The Company has been in compliance with the Code for the entire year.

#### Accounting records

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- (i) correctly record and explain the transactions of the Company;
- (ii) enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy; and
- (iii) enable the Directors to ensure that the financial statements comply with the Companies Act 2014 and enable those financial statements to be audited.

The measures taken by the Directors to secure compliance with the Company's obligations to keep adequate accounting records are the use of appropriate systems and procedures, appointment of an administrator and employment of competent persons.

#### Investment objective

The Company's investment objective is to spread investment risk and enable its shareholders to achieve an appreciation of capital over the medium to long-term. The investment objectives of each individual sub-fund are detailed in the Background to the Company section of these financial statements.

#### Review of business and future developments

Recent disruptions associated with current geopolitical events have had a global impact, and uncertainty exists as to their implications. Such disruptions can potentially adversely affect the assets, and thus performance of the sub funds. The Manager, together with the Investment Manager continues to monitor these developments and evaluate their impact on the Company.

A detailed review of the business is included in the Investment Manager's Report. A summary of future developments is included in the events since the period end note.

The Directors do not propose to change the current strategy or investment objectives of the Company for the foreseeable future. The Directors believe that the Company and the Sub-Funds have adequate resources to continue in operational existence for the foreseeable future. For this reason, they have adopted the going concern basis in preparing the financial statements.

#### Risk management objectives and policies

The Company is exposed to a variety of financial risks including: market, currency, interest rate, credit and liquidity risks and attributes great importance to professional risk management. The Company has investment guidelines that set out its overall business strategies, its tolerance for risk and its general risk management philosophy and has established processes to monitor and control the economic impact of these risks. The Investment Manager provides the Company with investment recommendations that are consistent with the Company's objectives. The nature of the Company's risks and the actions taken to manage these risks are analyzed in more detail in Note 4 to these financial statements. The Company's capital is represented by the net assets attributable to holders of redeemable participating shares. The policies in place to ensure the preservation of this capital and to ensure the ability to continue as a going concern is detailed in Note 4(f) to these financial statements.

#### **DIRECTORS' REPORT (continued)**

#### Connected parties

Chapter 10 of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (SI No 420 of 2015) (the "Regulations") – 'Dealings by promoter, manager, trustee, investment adviser and group companies' states that any transaction carried out with a UCITS by a promoter, manager, trustee, investment adviser and/or associated or group companies of these ("connected parties") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the shareholders.

The Directors are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Chapter 10 of the Regulations are applied to all transactions with connected parties; and the Directors are satisfied that transactions with connected parties entered into during the period complied with the obligations set out in this paragraph.

#### Results and distributions

The results for the year are set out in the Statement of Comprehensive Income. Total dividends of EUR 44,072,009 (2022: EUR 91,192,025) were paid during the year ended 30 April 2023 on the following distribution dates.

Sub-Fund	Distribution Date	Amount
LGT EM LC Bond Sub-Fund	26 April 2023	EUR 4,904,662
LGT Sustainable Equity Global Sub-Fund	26 April 2023	EUR 13,575,297
LGT Sustainable Bond Global Sub-Fund	26 April 2023	EUR 2,289,009
LGT Sustainable Quality Equity Sub-Fund	26 April 2023	USD 13,968,028
LGT EM Frontier LC Bond Sub-Fund	27 October 2022	USD 2,851,517
LGT EM Frontier LC Bond Sub-Fund	26 April 2023	USD 7,451,979

#### **ERISA declaration**

The Company does not constitute "plan assets" as defined under the Employee Retirement Income Security Act ("ERISA") as less than 25% of the Company is owned by "benefit plan investors".

#### **Events since the Balance Sheet date**

Events since the Balance Sheet date are disclosed in Note 18 to the financial statements.

#### Directors

The persons who were Directors at any time during the year ended 30 April 2023 and 30 April 2022, along with any changes in Directors during the year, are as follows.

Kevin Mathews (Irish)\*

Roger Gauch (Swiss)

Paul Garvey (Irish) (resigned 08.03.2023)

Kathryn O'Driscoll (Irish)

Sivakumar Sethuraman (Swiss) (appointed 08.03.2023)

\* denotes Independent Director

#### Directors' and Secretary's interests

The Directors have the power to appoint any person to be a Director. Any Director so appointed shall hold office until the next annual general meeting and shall then be eligible for re-election. Directors are not required to retire by rotation. A Director must, however, be a person approved for that purpose by the Central Bank of Ireland.

#### **DIRECTORS' REPORT (continued)**

The Company, by ordinary resolution of which extended notice has been given in accordance with the provisions of the Companies Act 2014, may remove any Director notwithstanding anything in the Articles of Association of the Company (the "Articles") or in any agreement between the Company and such Director and may, if thought fit, by ordinary resolution appoint another Director in his stead. The prior approval of the Central Bank of Ireland, and a majority of the shareholders (by way of a special resolution) shall be required to any amendment to the Articles.

The Directors and Secretary and their families had no direct interests in the shares of the Company at 30 April 2023. No Director had at any time during the period, a material interest in any contract of significance, existing during or at the end of the period, in relation to the business of the Company. Certain Directors may have indirect interests in the shares of the Company by way of their co-investments in the various LGT funds.

The Directors of the Company may also be directors of the Investment Manager and Sub-Distributor or Manager and Distributor or both. No Directors are or have been directors of LGT Capital Partners (Ireland) Limited and LGT Fund Managers (Ireland) Limited during the year.

#### Remuneration disclosure

The AIFMD disclosure provisions of Article 13 of the Directive 2011/61/EC (in particular Annex II) and European Securities and Markets Authority's ("ESMA") "Guidelines on sound remuneration policies under AIFMD" have been applied at the level of the Management Company. Disclosures regarding remuneration policy are included in the Financial Information (unaudited) section at the back of these financial statements.

#### Relevant audit information

The Board of Directors is satisfied there is no relevant audit information of which the Company's statutory auditors are unaware. Furthermore, the Board of Directors confirm they have taken all appropriate steps in order to make themselves aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.

#### **Audit Committee**

The Directors believe that there is no requirement to form an audit committee as the Board has only non-executive Directors and one independent Director and the Company complies with the provisions of the Irish Funds' Corporate Governance Code. The Directors have delegated the day-to-day investment management and administration of the Company to the Investment Manager, Manager and to the Administrator respectively. The Directors have also appointed RBC Investor Services Bank S.A., Dublin Branch as depositary of the assets of the Company.

#### **Independent Auditors**

PricewaterhouseCoopers have expressed their willingness to continue in office in accordance with section 383 of the Companies Act 2014.

On behalf of the Board

Director

Date: 22 August 2023

Director

### Report of the Depositary to the Shareholders For the year ended 30 April 2023

As required by the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) ("the Regulations"), and solely within the context of our oversight duties as depositary, we are pleased to present our report as follows.

In our opinion, Crown Sigma UCITS plc (the "Company") has been managed for the year ended 30 April 2023:

- (i) In accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum & Articles of Association and the Regulations; and
- (ii) Otherwise in accordance with the provisions of the Memorandum & Articles of Association and the Regulations.

e-Signed by Fergal Curran on 2023-08-22 07:08:08 GMT

e-Signed by Eoghan Cassidy on 2023-08-22 07:11:46 GMT

Date: 22 August 2023

### Independent auditors' report to the members of Crown Sigma UCITS plc

#### Report on the audit of the financial statements

#### **Opinion**

In our opinion, Crown Sigma UCITS plc's financial statements:

- give a true and fair view of the Company's and sub-funds' assets, liabilities and financial position as at 30 April 2023 and of their results and cash flows for the year then ended;
- have been properly prepared in accordance with International Financial Reporting Standards ("IFRSs") as adopted by the European Union; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Balance Sheet as at 30 April 2023;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Cash Flows for the year then ended;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares for the year then ended;
- the Portfolio of Investments for each of the sub-funds as at 30 April 2023; and
- the notes to the financial statements for the Company and for each of its sub-funds, which include a description of the significant accounting policies.

#### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

#### Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's and sub-funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's and sub-funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

#### Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Directors' Report, we also considered whether the disclosures required by the Companies Act 2014 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

- In our opinion, based on the work undertaken in the course of the audit, the information given in the Directors'
  Report for the year ended 30 April 2023 is consistent with the financial statements and has been prepared in
  accordance with applicable legal requirements.
- Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Directors' Report.

#### Responsibilities for the financial statements and the audit

#### Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' responsibilities set out on page 10, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's and sub-funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

#### Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

 $\underline{https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description\ of\ auditors\ responsibilities\ for\ audit.pdf.}$ 

This description forms part of our auditors' report.

#### Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

#### Other required reporting

#### Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

#### **Companies Act 2014 exception reporting**

#### Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

#### NOTE

 $\label{thm:companying} \textit{The accompanying notes form an integral part of these financial statements}$ 

<sup>1)</sup> Launched 15 June 2021.

<sup>&</sup>lt;sup>2)</sup> Launched 23 June 2021.

<sup>&</sup>lt;sup>3)</sup> Cross Sub-Fund transactions have been eliminated on Company total amount (see Note 11 for further details).

#### NOTES TO THE FINANCIAL STATEMENTS

#### 1. GENERAL

Crown Sigma UCITS plc (the "Company") is an open-ended investment company with variable capital and is structured as an umbrella investment company with segregated liability between sub-funds, which is authorized by the Central Bank of Ireland pursuant to the provisions of the Companies Act 2014 and the European Communities (Undertaking for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations"). The Company was incorporated on 27 March 2012.

As at 30 April 2023 and 2022 the Company comprised of thirteen sub-funds; LGT Crown Listed Private Equity, LGT EM LC Bond Sub-Fund, LGT Sustainable Equity Global Sub-Fund, LGT Sustainable Equity Europe Sub-Fund, LGT Sustainable Bond Global Hedged Sub-Fund, LGT Sustainable Quality Equity Sub-Fund, LGT Bond EM Credit Opportunities Sub-Fund, LGT Sustainable Bond Corporates Sub-Fund, LGT Sustainable Equity Market Neutral Sub-Fund, LGT Crown Liquid Private Equity Opportunities Sub-Fund, LGT EM HC Bond Sub-Fund and LGT EM Frontier LC Bond Sub-Fund.

The Company's investment objective is to achieve long-term capital growth with principles designed to minimize the risk of capital loss. However, there can be no assurance that the investment objective will be met. Details of the investment objective and policies for each Sub-Fund of the Company appear in the Supplement for the relevant Sub-Fund and in the Background to the Company section of these financial statements.

Copies of the Company's Prospectus, simplified prospectus, annual and semi-annual financial reports are available at the registered office of the Company and may be received free of charge. A Statement of Portfolio Changes is available at the registered office of the Company and is sent to shareholders at their registered addresses. The base currency of account of each sub-fund is specified in the relevant Supplement to the Prospectus of the Company. The functional currency of LGT Crown Listed Private Equity, LGT EM LC Bond Sub-Fund, LGT Sustainable Equity Global Sub-Fund, LGT Sustainable Equity Europe Sub-Fund and LGT Sustainable Bond Global Sub-Fund is the Euro ("EUR") (collectively "the Euro denominated sub-funds"). The functional currency of LGT Sustainable Bond Global Hedged Sub-Fund, LGT Sustainable Quality Equity Sub-Fund, LGT Bond EM Credit Opportunities Sub-Fund, LGT Sustainable Bond Corporates Sub-Fund, LGT Sustainable Equity Market Neutral Sub-Fund, LGT Crown Liquid Private Equity Opportunities Sub-Fund, LGT EM HC Bond Sub-Fund and LGT EM Frontier LC Bond Sub-Fund is the US Dollar ("USD") (collectively "the USD denominated sub-funds").

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

#### 2.1 Basis of preparation

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") and IFRS Interpretations Committee ("IFRIC") interpretations, as adopted by the European Union ("EU"), those parts of the Companies Act 2014 applicable to companies reporting under IFRS and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and liabilities held at fair value through profit or loss. The financial statements have been prepared on a going concern basis. The preparation of financial statements in conformity with IFRS as adopted by the EU requires the use of accounting estimates and assumptions. It also requires management to exercise its judgment in the process of applying the Company's accounting policies.

All references to the net asset value ("NAV") or net assets throughout this document refer to the net assets attributable to holders of redeemable participating shares unless otherwise stated.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(a) Standards and amendments to published standards that are mandatory for the financial year beginning on or after 1 April 2022

There are no standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 April 2022 that have a material effect on the financial statements of the Company.

(b) Standards and amendments to published standards that are not yet effective

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 April 2022 and have not been early adopted in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the Company.

#### 2.2 Use of estimates

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from these estimates.

The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions with a significant risk of causing a material adjustment to the carrying amounts of assets within the next financial year are:

Fair value of non-quoted investments

The Board of Directors uses its judgment to select a variety of methods and makes assumptions that are not always supported by observable market prices or rates. The use of valuation techniques requires them to make estimates and assumptions. Changes in assumptions could affect the reported fair value of these investments. As at 30 April 2023 and 30 April 2022, the Board of Directors made no fair value adjustments for unquoted investments.

#### 2.3 Foreign currency translation

Items included in the Company's financial statements are measured using the currency of the primary economic environment in which it operates (the "functional currency"). This is the euro ("Euro" or "EUR"), which is also the currency in which the majority of the investors have subscribed into the Company. The Company has also chosen the Euro to be its presentation currency. The USD denominated sub-funds have a presentation and functional currency of USD as the majority of investors in these sub-funds have subscribed into the sub-funds in this currency.

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the Statement of Comprehensive Income.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 2.4 Financial assets and financial liabilities at fair value through profit or loss

The Company classifies its investments based on both the Company's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Company is primarily focused on fair value information and uses that information to assess the investments' performance and to make decisions. The Company has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income. The contractual cash flows of the Company's debt securities are solely principal and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Company's business model's objective.

Derivative contracts that have a negative fair value are presented as liabilities at fair value through profit or loss.

Consequently, all investments are measured at fair value through profit or loss.

The Company's policy is for LGT Capital Partners (Ireland) Limited ("Manager") and the Board of Directors to evaluate the information about these financial assets and liabilities on a fair value basis together with other related financial information.

Financial assets that are not at fair value through profit or loss include receivable for investments sold and account receivables. Financial liabilities that are not at fair value through profit or loss include payable for investments purchased and other accounts payable. These amounts are recognized initially at fair value and subsequently measured at amortized cost.

Purchases and sales of investments are recognized on the trade date, i.e. the date on which the Company commits to purchase or sell the investment. Investments are initially recognized at fair value and transaction costs for all financial assets and financial liabilities carried at fair value through profit or loss are expensed as incurred. Investments are derecognized when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership. Financial liabilities are derecognized when the obligation specified in the contract is discharged, cancelled or expired.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Statement of Comprehensive Income within net changes in unrealized gain/(loss) on fair value of financial assets and liabilities at fair value through profit or loss in the year in which they arise.

As at 30 April 2023 and 2022 all investments were classified as financial assets and liabilities at fair value through profit or loss.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the close of trading on the reporting date. The Company utilizes the last traded market price for both financial assets and financial liabilities where the last traded price falls within the bid-ask spread. Where the last traded price is not within the bid-ask spread, management will determine the point within the bid-ask spread that is most representative of fair value.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

The underlying investments of the Company are valued as follows:

- bonds: bonds are valued at the last reported price on the main exchange on the last business day of the valuation period.
- futures: futures are contractual obligations to buy or sell financial instruments on a future date at a specified price established in an organized market. The futures contracts are collateralised by cash or marketable securities; changes in the futures contracts' value are settled daily with the exchange and valued at mark-to-market. Interest rate futures are contractual obligations to receive or pay a net amount based on changes in interest rates at a future date at a specified price, established in an organized financial market. The Company has entered into arrangements with whom it undertakes futures transactions.

For open futures contracts, changes in the fair value of the contract are recognized as unrealized gains or losses by "marking-to-market" the value of the contract at the Balance Sheet date and are included in the net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income. When the contract is closed, the difference between the proceeds from (or cost of) the closing transactions and the original transaction is recorded as a realized gain or loss.

- forward currency contracts: the unrealized gain or loss on open forward currency contracts is calculated as the difference between the original contracted rate and the rate at the period end. Unrealized gains or losses on open forward currency contracts are included in financial assets or financial liabilities at fair value through profit or loss in the Balance Sheet. Realized gains or losses on forward currency contracts as reflected in the Statement of Comprehensive Income include net gains/(losses) on forward currency contracts that have been settled as at the Balance Sheet date.
- exchange traded funds: exchange traded funds are valued at the last reported price on the main exchange.
- transferable securities: transferable securities (being equity securities) are valued at the last reported price on the main exchange.
- Fund investments/collective investment schemes: the fair value of investments in unlisted investment funds/collective investment schemes is based on the latest available unaudited net asset value provided by the relevant fund's manager or administrator.
- option contracts: when the Company purchases an option, an amount equal to fair value which is based on the premium paid is recorded as an asset. When the Company writes an option, an amount equal to fair value which is based on the premium received by the Company is recorded as a liability. Unrealized gains or losses on options are included in net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income. When options are closed, the difference between the premium and the amount paid or received, net of brokerage commissions, or the full amount of the premium if the option expires worthless, is recognized as a realized gain or loss.
- Warrants: When the Company purchases a warrant, an amount equal to the premium paid by the Company is reflected as an asset. The amount of the asset is subsequently marked to market to reflect the current market value of the warrant. When a security is purchased or sold through the exercise of a warrant, the related carrying amount of the warrant is added to the cost of the security acquired or deducted from the proceeds of the security sold. When a warrant expires (or the Company enters into a closing transaction), the Company realizes a gain or loss on the warrant to the extent of the premiums paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid.

#### 2.5 Prepayments for financial assets at fair value through profit or loss

Prepayments for financial assets at fair value through profit or loss is comprised of amounts paid in advance of the April dealing dates of the underlying investments.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 2.6 Determination of gains or losses on financial assets and liabilities at fair value through profit or loss

Both realized and unrealized gains and losses on financial assets and liabilities at fair value through profit or loss are taken to income as incurred. Realized gains and losses on futures, exchange traded funds, transferable securities, collective investment schemes and options are calculated on a first-in-first-out basis. Realized gains and losses on forward currency contracts are calculated on an actual basis. The difference between the cost and the fair value of financial assets and liabilities at fair value through profit or loss are reflected in the Statement of Comprehensive Income as the change in unrealized gains or losses on financial assets and liabilities at fair value through profit or loss.

#### 2.7 Redeemable participating shares

The Company issues redeemable shares, which are redeemable at the holder's option and do not have identical rights. Such shares are classified as financial liabilities. Redeemable shares can be put back to the Company at any dealing date for cash equal to a proportionate share of the Company's net asset value attributable to the share class. Shares are redeemable daily or weekly. The redeemable shares are carried at the redemption amount that is payable at the Balance Sheet date if the holder exercises the right to put the share back to the Company.

#### 2.8 Cash and cash equivalents

Cash and cash equivalents include all cash in hand and short-term deposits with maturity of three months or less. Cash and cash equivalents are recorded at nominal value. Bank overdrafts that are repayable on demand form an integral part of the Company's cash management and, if any, are shown as current liabilities in the Balance Sheet.

#### 2.9 Margin cash

Margin cash provided by the Company, if any, is identified in the Balance Sheet as margin cash and is not included as a component of cash and cash equivalents. The carrying value of margin cash represents its approximate fair value.

#### 2.10 Receivables

Receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Receivables are recognized initially at fair value, and subsequently measured at amortized cost using the effective interest rate method, less provision for impairment. A provision for impairment is established when there is objective evidence that the Company will not be able to collect all amounts to be received. Significant financial difficulties of the counterparty, probability that the counterparty will enter bankruptcy or financial reorganization, and default in payments are considered indicators that the amount to be received is impaired.

### 2.11 Payables

Payables are recognized initially at fair value and subsequently stated at amortized cost. The difference between the proceeds and the amount payable is recognized over the period of the payable using the effective interest method.

#### 2.12 Expenses

Expenses are recognized in the Statement of Comprehensive Income on an accruals basis.

#### 2.13 Distributions payable to holders of redeemable participating shares

Proposed distributions to holders of participating shares are classified in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares when they are ratified by a board meeting of the Company.

### 2.14 Interest income and expense from cash and cash equivalents and interest from financial assets at fair value through profit or loss

Interest is recognized on a time-proportionate basis using the effective interest method. Interest income and expense includes interest from cash and cash equivalents and cash overdrafts. Interest from financial assets at fair value through profit or loss includes interest from debt securities.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 2.15 Dividend income

Dividend income relating to exchange traded equity investments is recognized in the Statement of Comprehensive Income on the ex-dividend date. Dividend income is recognized on a gross basis excluding withholding tax, which is disclosed separately in the Statement of Comprehensive Income.

#### 2.16 Withholding tax

The Company currently incurs withholding taxes imposed by certain countries on investment income and capital gains. Such income or gains are recorded gross of withholding taxes in the Statement of Comprehensive Income. Withholding tax and capital gains tax are shown as separate items in the Statement of Comprehensive Income.

#### 2.17 Redemptions payable to holders of redeemable participating shares

Redemptions payable to holders of redeemable participating shares relate to redemptions made by holders of redeemable shares during the year that were paid after the year end.

#### 2.18 Subscriptions received in advance

Subscriptions received in advance relate to monies paid in advance by investors in advance of the April dealing dates of the underlying sub-funds.

#### 2.19 Transaction costs

Some transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or liability is recognized initially, an entity shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or liability. They include fees and commissions paid to agents, advisors, brokers and dealers.

Transaction costs on the purchase and sale of bonds, transferable securities, futures, forwards and options are included in the purchase and sale price of the investment. They cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed. Custody transaction costs are included in Depositary and trustee fees.

#### 3. EFFICIENT PORTFOLIO MANAGEMENT

A sub-fund may employ techniques and instruments relating to transferable securities and/or other financial instruments in which it invests for efficient portfolio management purposes. Use of such techniques and instruments are made for one or more of the following reasons:

- (i) the reduction of risk;
- (ii) the reduction of cost; or
- (iii) the generation of additional capital or income for the sub-fund with an appropriate level of risk.

#### Forward currency contracts

Individual sub-funds use forward currency contracts which alter the currency characteristics of assets held by the relevant sub-fund. Assets of a sub-fund may be denominated in a currency other than the base currency of the sub-fund, which is the Euro for the Euro denominated sub-funds or USD for the USD denominated sub-funds and changes in the exchange rate between the base currency and the currency of the asset may lead to a depreciation of the value of the sub-fund's assets expressed in Euro or USD. Forward currency contracts are also used for share class hedging purposes, where share classes of a relevant sub-fund are denominated in a currency different to the base currency, Euro or US Dollars. Gains, losses and transaction costs of such contracts are attributable solely to the relevant share class. Further details regarding the exposure obtained through forward currency contracts are disclosed in Note 4(b). Details of open forward currency contracts and the counterparties to those transactions are disclosed in the portfolio of investments.

### 3. EFFICIENT PORTFOLIO MANAGEMENT (continued)

The revenue/loss arising from such efficient portfolio management techniques for the period are detailed in the table below. Direct and indirect operational costs and fees incurred (i.e. transaction costs) cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

#### 4. FINANCIAL RISK MANAGEMENT

The Company maintains positions in a variety of financial instruments as dictated by its investment management strategy. The Company's investing activities expose it to various types of risk that are associated with the financial instruments and markets in which it invests. Below is a description of the principal risks inherent in the Company's activities along with the actions it has taken to manage these risks.

The Company's assets and liabilities comprise financial instruments which include:

- Exchange traded funds, transferrable securities, futures, bonds, forward currency contracts, option contracts and warrants are held in accordance with the Company's investment objectives and policies;
- Forward currency contracts; these are held in order to hedge against foreign exchange gains/(losses) in some non-USD share classes in LGT Sustainable Bond Global Hedged Sub-Fund, LGT Bond EM Credit Opportunities Sub-Fund, LGT Sustainable Bond Corporates Sub-Fund, LGT Sustainable Equity Market Neutral Sub-Fund, LGT EM HC Bond Sub-Fund and LGT EM Frontier LC Bond Sub-Fund.
- Cash, liquid resources and short-term receivables and payables that arise directly from its investment activities.

The main risks arising from the Company's financial instruments are market price, foreign currency, interest rate, credit, liquidity and capital risks. The Board of Directors reviews and agrees policies for managing each of these risks and they are summarized below:

#### (a) Market price risk

The Company's investments are susceptible to market price risk arising from uncertainties about future values of the positions held. The Company's Manager provides the Company with investment recommendations that are consistent with the Company's objectives.

#### Value at Risk

The Company applies absolute Value at Risk ("VaR") methodology to its portfolio as well as to the individual investments in order to estimate the risk of positions held at certain times. The risk analysis refers to a specified time horizon and to a given level of confidence and in this respect derives the potential losses that could occur on these positions as a result of market movements affecting the exposures held. VaR is a statistically based estimate of the potential loss on the program (referring to portfolio composition at a particular point of time) from adverse market movements. It expresses the maximum amount the program might lose, but only to a certain level of confidence (99%). There is therefore a specified statistical probability (1%) that actual losses could be greater than the VaR estimate. The positions have been fully modelled for the purpose of these risk estimates. The VaR-methodology employed is historical 1-day VaR99 based on 1 year input data.

Actual outcomes are monitored regularly to test the validity of this VaR calculation. The employment of different methodologies, also with greater forward looking characteristics, generates information about the robustness of the risk figures.

#### Limitations to this Value at Risk Model

The reference input timeframe may or may not be suitable to predict future behavior at a particular point in time.

The methodology employed for this risk illustration is only one type of risk information considered and the complexity of risks analysis for fund strategy portfolios requires the use of various different methodologies.

#### Note:

<sup>1)</sup> Definition of leverage: The level of leverage represents the sum of absolute notional exposures to FDIs in percentage of the Net Asset Value of the respective sub-fund. This number may seem high, if the Manager allocates an increased proportion of the portfolio to FDIs which have high notional exposures due to their specific characteristics, but with lower levels of volatility and VaR, such as interest rate futures. For example, given a comparable expected volatility, the notional exposure of interest rate futures may represent a multiple of the notional exposure of equity index futures or commodity index futures. As such, notional exposure of different FDIs may not necessarily be comparable in their risk profile. Strategies based on interest rate futures typically have a lower VaR than a comparable exposure to other permitted assets, hence they require a much higher notional exposure versus a strategy investing in other permitted assets. Therefore, the leverage of the respective sub-fund may increase as the sub-fund's allocation to particular strategies which deploy interest rate futures is increased. The sub-fund may seek exposure to these particular strategies as they may provide attractive risk adjusted returns and contribute to the diversification of the sub-fund. In general, the sum of notional exposure to FDIs tends to be higher when underlying markets are less volatile.

The performance of the investments and the compilation of the investment portfolio held by the Company is monitored by the Manager on a weekly basis and reviewed regularly by the Board of Directors.

#### 4. FINANCIAL RISK MANAGEMENT (continued)

#### (b) Foreign currency risk

Foreign currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company invests in securities and other investments that are denominated in currencies other than the Euro (for Euro denominated sub-funds) or the USD (for US Dollar denominated sub-funds). Accordingly, the value of the Company's assets may be affected favorably or unfavorably by fluctuations in currency rates and therefore the Company will be subject to foreign exchange risk. In accordance with the Company's policy, the Manager monitors the Company's currency position on a monthly basis and the Board of Directors reviews it on a regular basis.

Some of the share classes of LGT Sustainable Bond Global Hedged Sub-Fund, LGT Bond EM Credit Opportunities Sub-Fund, LGT Sustainable Bond Corporates Sub-Fund, LGT Sustainable Equity Market Neutral Sub-Fund, LGT EM HC Bond Sub-Fund and LGT EM Frontier LC Bond Sub-Fund are denominated in currencies other than the US Dollar. The Directors currently instruct the Manager to hedge the Euro/US Dollar equivalent exposure of these share classes in the sub-fund. The Company may utilize a variety of financial instruments such as derivatives to hedge against changes in currency values which may affect the value of the relevant share classes and such transactions are clearly attributable to each relevant share class. Details of forward currency contracts held at 30 April 2023 are included in the portfolio of investments.

The FX profit and loss arising from these forward currency contracts are attributed only to that specific share class.

The Company does not seek to hedge currency risk on investments not denominated in a sub-fund's base currency. The exposure to non-Euro currencies (for Euro denominated sub-funds) and to non-USD currencies (for US Dollar denominated sub-funds) at the reporting date were as follows:

#### (c) Interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of markets interest rates on the fair value of financial assets and liabilities and future cash flows. The Company holds fixed interest securities that expose the Company to fair value interest rate risk. The Company's policy requires the Manager to manage this risk by measuring the mismatch of the interest rate sensitivity gap of financial assets and liabilities and calculating the average duration of the portfolio of fixed interest securities. The average effective duration of the Company's portfolio is a measure of the sensitivity of the fair value of the Company's fixed interest securities to changes in market interest rates.

Any excess cash and cash equivalents are invested at short-term market interest rates. At 30 April 2023 and 2022, if short-term market interest rates had been lower by 25 basis points (2022: 25 basis points) with all other variables held constant, the change in net assets attributable to redeemable participating shareholders was deemed by the Directors to be immaterial. However, the Company may be indirectly affected by the impact of interest rate changes on the earnings of certain underlying investments in which the Company invests and impact on the valuation of certain over-the-counter derivative products that use interest rates as an input in their valuation model.

### 4. FINANCIAL RISK MANAGEMENT (continued)

The following table summarizes the Company's exposure to interest rate risks. It includes the Company's assets and liabilities at fair values at the Balance Sheet date:

#### (d) Credit risk

The Company is exposed to credit risk, which is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company is exposed to counterparty credit risk on trading derivative products, government bonds, corporate bonds, collective investment schemes, cash and cash equivalents, amounts due from brokers and other receivable balances. Impairment provisions are provided for losses that have been incurred by the Balance Sheet date, if any. There were no impairment provisions for the year ended 30 April 2023 (2022: none).

Financial assets, which potentially expose the Company to credit risk, consist principally of cash, investments and balances arising from other contractual transactions. The Company seeks to mitigate its exposure to credit risk by conducting its contractual transactions with institutions which are reputable and well established. In accordance with the Company's policy, the Manager monitors the Company's credit position on a monthly basis and the Board of Directors reviews it on a regular basis.

#### 4. FINANCIAL RISK MANAGEMENT (continued)

Credit risk arising from receivables from underlying portfolio sub-funds relates to redemptions or transactions awaiting settlement. Risk relating to unsettled receivables is considered small due to the short settlement period involved and the due diligence performed on the portfolio companies. The maximum exposure related to unsettled trades equals the amounts shown on the Balance Sheet.

The Company's Depositary and Trustee is RBC Investor Services Bank S.A., Dublin Branch ("Depositary"). Some of the cash of the Company is held by the Depositary at the year end. The Company is exposed to credit risk through the use of the Depositary for their cash and cash equivalents. Bankruptcy or insolvency of the Depositary may cause the Company's rights with respect to its cash held by the Depositary to be delayed or limited. The maximum exposure to this risk at 30 April 2023 and 2022 is the amount of cash disclosed in Note 9.

To mitigate the risks the Company is exposed to from the use of the Depositary, the Manager employs appropriate procedures to ensure that the counterparties are reputable institutions and that the credit risk is acceptable to the Company. The Company only transacts with custodians that are regulated entities subject to prudential supervision, or with high credit-ratings assigned by international credit-rating agencies. The credit rating of the Depositary at 30 April 2023 was A-1+/AA- (30 April 2022: A-1+/AA-) (Source: Standard and Poor's).

The Company has also cash accounts held with LGT Bank AG as at 30 April 2023 and 30 April 2022. The cash accounts are held for the purposes of trading in derivative financial instruments. Bankruptcy or insolvency may cause the Company's rights with respect to its cash held by this financial institution to be delayed or limited and would rank the Company pari passu with other creditors. The maximum exposure to this risk at 30 April 2023 and 2022 is the amount of cash disclosed in Note 9. The credit ratings per Standard and Poor's of this financial institution as at the year-end was A-1/A+ (2022: A-1/A+).

LGT EM LC Bond Sub-Fund, LGT Sustainable Bond Global Sub-Fund, LGT Sustainable Bond Global Hedged Sub-Fund, LGT Bond EM Credit Opportunities Sub-Fund, LGT Sustainable Bond Corporates Sub-Fund, LGT EM HC Bond Sub-Fund and LGT EM Frontier LC Bond Sub-Fund invests in a broad range of bonds, including high yield and emerging market bonds which may be either investment grade or below investment grade. The following table summarizes the credit quality of the Company's debt portfolio at the Balance Sheet date:

The Company's overall exposure to credit risk on derivative instruments can change substantially within a short period, as it is affected by each related transaction with the respective counterparty. All derivatives are shown on the Balance Sheet on a gross basis by investment type. As set out in the counterparty agreements, certain amounts can be subject to offset/netting. As set out in the counterparty agreements, certain amounts can be subject to offset/netting as outlined in the following table.

<sup>(1)</sup> As at 30 April 2022, the counterparty for these forward currency contracts was RBC Investor Services Bank S.A.

The margin balance maintained by the Company is for the purpose of providing collateral on futures positions and forward contracts and is included in the 'Cash collateral / margin cash' column D2. See Note 9 and Note 10 for further details.

<sup>(2)</sup> As at 30 April 2022, LGT Bank AG was the derivative counterparty for these futures positions.

<sup>(3)</sup> As at 30 April 2022, the counterparty for these forward currency contracts was LGT Bank AG.

<sup>(4)</sup> The unencumbered cash balances at RBC Investor Services Bank S.A LGT Bank AG as detailed in Note 9, are not included in this table.

#### 4. FINANCIAL RISK MANAGEMENT (continued)

#### (e) Liquidity risk

Liquidity risk is the risk that the Company cannot generate sufficient cash resources to meet its payment obligations in full as they fall due or can only do so at materially disadvantageous terms. Depending on the subfund, the Company is exposed to daily or weekly cash redemptions of participating shares. If significant redemptions of participating shares are requested, it may not be possible to liquidate the Company's investments at the time such redemptions are requested, or it may be possible to do only at prices which the Directors believe do not reflect the true value of such investments, resulting in an adverse effect on the return to the investors.

It therefore invests the majority of its assets in investments that are traded in an active market and can be readily disposed of; it invests only a limited proportion of its assets in investments not actively traded. The Company's listed securities are considered to be readily realizable as they are listed on recognized stock exchanges. In accordance with the Company's policy, the Manager and Investment Manager monitors the Company's liquidity position on a daily basis. There have been no material changes made to these liquidity management systems and procedures described above during the year.

Substantially all of the sub-funds' financial liabilities have maturities of one to three months from the Balance Sheet date to the contractual maturity date. Maturities are outlined in the Portfolio of Investments of the respective sub-funds.

#### (f) Capital risk management

The capital of the Company is represented by the net assets attributable to the holders of redeemable participating shares and the Manager monitors this on an ongoing basis. The Company's objective when managing the capital is to safeguard the ability to continue as a going concern in order to provide returns for holders of redeemable participating shares and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Company.

In order to maintain or adjust the capital structure, the Company's policy is to perform the following:

- monitor the level of daily subscriptions and redemptions relative to the assets it expects to be able to liquidate within one week and adjust the amount of distributions the Company pays to holders of redeemable participating shares.
- redeem and issue new shares in accordance with the constitutional documents of the Company, which include the ability to restrict redemptions and require certain minimum holdings and subscriptions.

#### (g) Fair value estimation

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the close of trading on the reporting date. The Company utilizes the last traded market price for both financial assets and financial liabilities where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, management will determine the point within the bid-ask spread that is most representative of fair value. An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

#### 4. FINANCIAL RISK MANAGEMENT (continued)

IFRS 13 requires the Company to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorized in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgment by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Investments whose values are based on quoted market prices in active markets, and therefore classified within Level 1, include futures, warrants, exchange traded funds, transferable securities, and certain government bonds. The Company does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. The Company currently classifies forward currency contracts, collective investment schemes, options, certain government bonds and corporate bonds held as at 30 April 2023 and 2022 as Level 2 investments as their fair value is based on observable inputs.

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently. There were no Level 3 investments at 30 April 2023 (30 April 2022: none).

The following tables below analyze within the fair value hierarchy the Company's financial assets (by class) designated as fair value through profit or loss at 30 April 2023:

There was no transfer between levels during the year (2022: none). For the remaining assets and liabilities which are carried at amortized cost; their carrying values are a reasonable approximation of fair value (2022: same). This includes cash and cash equivalents, receivable and payable for investments sold and purchased, subscriptions receivable, redemptions payable, other receivables, various expenses payable and other liabilities.

### 5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS IN APPLYING ACCOUNTING POLICIES

The Company makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

#### Functional currency

The Board of Directors considers the Euro the currency that most faithfully represents the economic effect of the underlying transactions, events and conditions at the level of the Company. Although some sub-funds' functional currencies may be different to the Euro, the Euro is the currency in which the Company measures its overall performance and reports its results, as well as the currency of its underlying investments. This determination also considers the competitive environment in which the Company is compared to other global investment products.

The functional currency of LGT Sustainable Bond Global Hedged Sub-Fund, LGT Sustainable Quality Equity Sub-Fund, LGT Bond EM Credit Opportunities Sub-Fund, LGT Sustainable Bond Corporates Sub-Fund, LGT Sustainable Equity Market Neutral Sub-Fund, LGT Crown Liquid Private Equity Opportunities Sub-Fund, LGT EM HC Bond Sub-Fund and LGT EM Frontier LC Bond Sub-Fund is the US Dollar as the shares in these subfunds are predominantly issued in US Dollar and therefore represents the primary economic environment in which they operate.

#### 6. FEES AND EXPENSES

#### 6.1 Management fee

The Company pays to the Manager a fee at the annual rate up to the following percentages of the relevant subfund's net asset value which is accrued at each valuation date and paid monthly in arrears (2022: same rates):

#### 6.2 Administration fee

The Administrator is RBC Investor Services Ireland Limited (the "Administrator"). The administration fee covers both administration and transfer agency services. The Company pays the Administrator out of the assets of each sub-fund the following fees:

In respect of all daily dealing sub-funds:

- (a) The Administrator, in relation to the provision of its core service as fund administrator is entitled to a fee payable out of the assets of the sub-fund, accruing daily or weekly, depending on the dealing frequency of the sub-fund and payable monthly in arrears at the end of each calendar month at a rate not exceeding 0.0225% of the Net Asset Value of the sub-fund, subject to a minimum annual fee for the sub-fund, exclusive of out-of pocket expenses and transaction fees, not exceeding USD 20,000 per annum, per sub-fund up to two classes. Additional annual fees of USD 1,000 will apply per each additional class.
- (b) The sub-fund shall also be subject to fund tax, year-end support, transfer agency maintenance and transaction charges, which shall not exceed normal commercial rates.
- (c) The Administrator shall also be entitled to reimbursement of all reasonable out-of-pocket expenses incurred for the benefit of the Sub-Fund.
- (d) Fees are exclusive of VAT, if any. The Administrator is also entitled to charge to the sub-fund all agreed fees and transaction charges, at normal commercial rates, together with all reasonable and properly vouched out-of-pocket expenses (plus any applicable taxes), it incurs on behalf of the sub-fund in the performance of its duties under the Administration Agreement, which shall be payable quarterly in arrears.

The exact rates based on the NAV are as follows:

For RBC Investor Services Ireland Limited First USD 100 million of net asset value:

Next USD 150 million of net asset value: Next USD 250 million of net asset value:

Thereafter:

2.25 basis points p.a.

1.75 basis points p.a.

1.25 basis points p.a.

1.00 basis points p.a.

#### 6. FEES AND EXPENSES (continued)

#### 6.3 Performance fee

No sub-fund is subject to performance fees.

#### 6.4 Depositary and trustee fees

In respect of all daily dealing sub-funds (all sub-funds except LGT Crown Listed Private Equity):

- (a) The Depositary shall be entitled to a fee payable out of the assets of the sub-fund accruing daily and payable monthly in arrears at the end of each calendar month at an annual rate not exceeding 0.015% of the Net Asset Value of the sub-fund, subject to a minimum annual fee for the sub-fund, exclusive of out-of pocket expenses, of USD 12,000 per annum, per sub-fund.
- (b) Safekeeping fees based on the Net Asset Value of the sub-fund may also be charged which shall vary from 0.03% to 0.80% subject to a minimum annual fee, exclusive of transaction charges and out-of-pocket expenses, of USD 3,300 per annum.
- (c) The sub-fund shall also be subject to transaction charges, which shall not exceed normal commercial rates.
- (d) The Depositary shall also be entitled to reimbursement of properly vouched out of pocket expenses incurred by the Depositary, or any sub-custodian, for the benefit of the sub-fund.
- (e) Fees are exclusive of VAT, if any. In addition, the Depositary is also entitled to charge to the sub-fund all agreed fees and transaction charges, at normal commercial rates, together with all reasonable and properly vouched out-of-pocket expenses (plus any applicable taxes), it incurs on behalf of the sub-fund in the performance of its duties under the Depositary Agreement, which shall be payable quarterly in arrears.

In respect of LGT Crown Listed Private Equity:

First USD 100 million of net asset value:

Next USD 400 million of net asset value:

1.50 basis points p.a.

1.00 basis points p.a.

Thereafter:

0.50 basis points p.a.

and subject to a minimum fee of USD 12,000 per annum. This fee accrues weekly and is payable monthly in arrears. In addition, a safekeeping fee will be charged that will vary by investment type, subject to a minimum fee of USD 3,300 per annum.

#### 6.5 Operation fee

The Manager is entitled to an Operation Fee for the management and administration of each sub-fund at the following maximum rate:

Sub-Fund	2023	2022
LGT Crown Listed Private Equity	n/a	n/a
LGT EM LC Bond Sub-Fund	0.20	0.20
LGT Sustainable Equity Global Sub-Fund	0.11	0.11
LGT Sustainable Equity Europe Sub-Fund	0.14	0.14
LGT Sustainable Bond Global Sub-Fund	0.14	0.14
LGT Sustainable Bond Global Hedged Sub-Fund	0.14	0.14
LGT Sustainable Quality Equity Sub-Fund	0.11	0.11
LGT Bond EM Credit Opportunities Sub-Fund	0.25	0.25
LGT Sustainable Bond Corporates Sub-Fund	0.15	0.15
LGT Sustainable Equity Market Neutral Sub-Fund	0.15	0.15
LGT Crown Liquid Private Equity Opportunities Sub-Fund	0.12	0.12
LGT EM HC Bond Sub-Fund	0.25	0.25
LGT EM Frontier LC Bond Sub-Fund	0.30	0.30

#### 6. FEES AND EXPENSES (continued)

This fee is calculated on the basis of the Net Asset Value per Class (before debiting the management and operation fee), as at each Valuation Day. The operation fee will be accrued on each Valuation Day and debited at the end of each month. This Operation Fee includes the manager fee, the fees of the Depositary and Administrator and the transaction fees.

#### 6.6 Directors' fees

Director's fees of EUR 5,000 were charged in respect of Kevin Mathews' services during the year (2022: EUR 5,000).

#### 6.7 Audit fees

Audit fees relate to the Company's statutory audit carried out by PricewaterhouseCoopers Dublin. The total audit fees incurred by the Company for the year was EUR 188,396 (2022: EUR 188,598). This fee is inclusive of out-of-pocket expenses. Non-audit fees relating to tax advisory services for the year was EUR 112,000 (2022: EUR 84,950).

#### 6.8 Fees paid to LGT Fund Managers (Ireland) Limited

LGT Fund Managers (Ireland) Limited is entitled to company secretarial fees of EUR 5,000 per annum respectively. These fees are included in "Other expenses" in the Statement of Comprehensive Income.

#### 7. FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS

<sup>1)</sup> Cross Sub-Fund transactions have been eliminated on Company total amount (see Note 11 for further details).

Details of derivative instruments held at 30 April 2023 are included in the portfolio of investments. The Company holds the following financial derivative instruments:

#### (a) Futures

Futures are contractual obligations to buy or sell financial instruments on a future date at a specified price established in an organized market. The futures contracts are collateralized by cash or marketable securities; changes in the futures contracts' value are settled daily with the exchange. Interest rate futures are contractual obligations to receive or pay a net amount based on changes in interest rates at a future date at a specified price, established in an organized financial market.

Investment in such derivative financial instruments is a primary feature of the Company and is used for direct investment and for the purposes of asset allocation, taking views on the pricing of assets (whether overpriced or underpriced) or likely direction of markets, currency management, maintaining the required level of exposure, hedging, cash management and efficient investing.

#### (b) Forward currency contracts

A forward currency contract is an agreement between two parties to exchange two currencies at a given exchange rate at some point in the future, usually 30, 60, or 90 days hence. A forward currency contract mitigates foreign exchange risk for the parties and is most useful when both parties have operations or some other interest in a country using a given currency. Forward currency contracts are over-the-counter contracts.

Some of the share classes of the sub-funds are denominated in other currencies other than the Euro Dollar. The Directors currently instruct the Manager to hedge the Euro and USD equivalent exposure of these share classes in the relevant sub-fund. The Company utilizes a variety of financial instruments such as derivatives to hedge against changes in currency values which may affect the value of the relevant share classes and such transactions are clearly attributable to each relevant share class.

### 7. FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS (continued)

#### (c) Options

Options are the right to buy or sell a specific quantity of a specific asset at a fixed price at or before a specified future date. A sub-fund may invest in two forms of options: put or call options. Put options are contracts sold for a premium that gives one party (the buyer) the right, but not the obligation, to sell to the other party (the seller) of the contract, a specific quantity of a particular product or financial instrument at a specified price. Call options are similar contracts sold for a premium that gives the buyer the right, but not the obligation, to buy from the seller of the option. Options may also be cash settled. A sub-fund may be a seller or buyer of put and call options.

#### (d) Warrants

Warrants are a form of security that provides the holder the right to buy a specific number of equity shares at a stated price before an expiration date. Purchased warrants are non-income producing investments.

#### 8. SHARE CAPITAL

#### (a) Participating shares

The Company has authorized participating share capital of 1,000,000,000,000 shares of no par value initially designated as unclassified shares and 3 management shares of EUR 1 each. The unclassified shares are available for issue as shares. The issue price is payable in full upon acceptance. There are no rights of pre-emption attaching to the shares in the Company.

The issued redeemable participating share capital is at all times equal to the net asset value of the Company.

The right of holders of any shares to participate in the assets of the Company is limited to the assets (if any) of the sub-fund relating to such shares. If the realized net assets of any sub-fund are insufficient to pay any amounts due on the relevant shares in full in accordance with the relevant sub-fund supplement and the Articles, the relevant shareholders will have no further right of payment in respect of such shares or any claim against any other sub-fund or any other assets of the Company.

If a sub-fund has two or more classes of shares, the claims of the holders of such classes to the assets of the relevant sub-fund will, subject to the terms of the relevant sub-fund, rank pari passu with each other, and, on a winding-up of the Company, the holders of each such class will participate in the assets (if any) comprised in such sub-fund pro rata to the amount paid up on the shares of each such class. Each separate class relating to one sub-fund will have recourse only to the assets comprised within the relevant sub-fund. Consequently, if on the winding-up of the Company, the assets of a sub-fund (after payment of all fees, expenses and other liabilities (other than amounts owing to shareholders) which are to be borne by such sub-fund) are insufficient to pay the full repurchase proceeds payable in respect of all classes of shares relating to the relevant sub-fund, the proceeds of the relevant sub-fund will be distributed equally amongst each shareholder of the relevant sub-fund pro rata to the amount paid up on the shares held by each shareholder.

The Directors are given authority to affect the issue of shares and to create new classes of shares (in accordance with the requirements of the Central Bank of Ireland) and have absolute discretion to accept or reject in whole or in part any application for shares. Provided applications are received before the valuation point, the Directors may at their sole discretion accept a subscription application and/or subscription monies after the relevant dealing deadline. Issues of shares will normally be made with effect from a dealing day in respect of applications received on or prior to the dealing deadline. Dealing days and dealing deadlines relating to each sub-fund are specified in the relevant sub-fund supplement.

The Directors may temporarily suspend the calculation of the net asset value of a particular sub-fund or class and/or the issue, redemption and conversion of shares under certain instances detailed in the Prospectus. Where possible, all reasonable steps will be taken to bring any period of suspension to an end as soon as possible in a manner that is, in the opinion of the Directors, in the best interests of the shareholders of the particular sub-fund.

### 8. SHARE CAPITAL (continued)

#### (b) Management shares

Management shares issued by the Company amount to EUR 3, being three management shares of EUR 1 each. The management shares do not form part of the net asset value of the Company and are thus disclosed in the financial statements by way of this note only. In the opinion of the Board of Directors, this disclosure reflects the nature of the Company's business as an investment fund.

The 3 management shares were held by LGT Fund Managers (Ireland) Limited, LGT Bank AG, Dublin Branch and LGT Capital Partners (Ireland) Limited as at 30 April 2023 and 2022.

#### 10. MARGIN CASH

Margin cash represents margin deposits held in respect of open exchange-traded futures contracts as well as some open forward currency and options contracts. The margin cash, if any, for futures contracts is held with LGT Bank AG who may, but not at present, request deposit for variation margin for open futures positions. The margin cash for forward currency and options contracts is held with RBC Investor Services Bank S.A., Dublin Branch where they serve as the counterparty for the respective open contracts. Margin cash, if requested and deposited is recorded at nominal value and is shown separately on the Balance Sheet.

#### 11. RELATED PARTY TRANSACTIONS

Parties are considered to be related if one party has the ability to control the other party or exercise considerable influence over the other party in making financial or operating decisions. In the opinion of the Board of Directors, LGT Capital Partners Limited, LGT Capital Partners (Ireland) Limited, LGT Fund Managers (Ireland) Limited and LGT Bank AG, Dublin Branch are related parties under IAS 24 "Related Party Disclosures".

Director's fees of EUR 5,000 were charged in respect of Kevin Mathews' services during the year (2022: EUR 5,000). Kevin Mathews also received EUR 1,000 as the appointed Money Laundering Report Officer for the Company.

Details of cash and margin cash held with LGT Bank AG at 30 April 2023 and 2022 can be found in Note 9 and Note 4(c), respectively.

The three management shares were held by LGT Fund Managers (Ireland) Limited, LGT Bank AG, Dublin Branch and LGT Capital Partners (Ireland) Limited as at 30 April 2023 and 2022. The following participating shares were held by related parties of the Company as at 30 April 2023:

The average USD/EUR exchange rate used for the purposes of consolidation on the Statement of Comprehensive Income and the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares was 0.9601 (2022: 0.8746, except for LGT EM HC Bond Sub-Fund (0.8816) and LGT EM Frontier LC Bond Sub-Fund (0.8830)).

#### 15. TAXATION

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to Shareholders or any encashment, redemption, cancellation or transfer of shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; or the Company has been authorized by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (b) certain exempted Irish tax resident Shareholders who have provided the Company with the necessary signed statutory declarations.

Any transaction (which might otherwise be a chargeable event) in relation to shares held in a recognized clearing system as designated by order of the Irish Revenue Commissioners will not constitute a chargeable event. It is the current intention of the Directors that all the Shares in the Company will be held in a recognized clearing system.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

#### 16. COMPARATIVE INFORMATION

Certain comparative amounts for the prior period have been reclassified to conform to current period presentations. Such reclassifications had no effect on net result or net assets attributable to holders of redeemable participating shares.

#### 17. SIGNIFICANT EVENTS DURING THE YEAR

Effective 8 March 2023 Paul Garvey resigned as a director, with Sivakumar Sethuraman being appointed as a director.

The disruptions associated with events in Ukraine continued to have a global impact, and uncertainty continues to exist as to its implications. The Manager, with Directors' oversight, monitored these developments and evaluated their impact on the Company. They continue to monitor these developments on an on-going basis.

#### 18. EVENTS SINCE THE BALANCE SHEET DATE

There have been no material events that could impair the integrity of the information presented in the financial statements or requiring disclosure. Effective 03 July 2023, CACEIS had completed the purchase of RBC Investor Services Bank S.A., its branches and subsidiaries. Subsequently, the legal entity is known as CACEIS Investor Services Bank S.A., and the other subsidiaries and branches have been similarly rebranded. The Depository is now called CACEIS Investor Services Bank S.A., Dublin Branch and the Fund Administrator is called CACEIS Investor Services Ireland Ltd.

#### 19. APPROVAL OF FINANCIAL STATEMENTS

The Board of Directors approved the financial statements on 22 August 2023.

# FINANCIAL INFORMATION (UNAUDITED) (continued)

#### **SFT Regulation Disclosure**

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions (SFTs) and of reuse and amending Regulation (EU) No 648/2012, requires UCITS investment companies to provide the following information in their annual and semi-annual reports on the use made of SFTs and total return swaps (TRS).

For the year ended 30 April 2022 the Company has not engaged in securities borrowing in the form of contracts for difference ("cfds") (i.e. total return swaps) trading, which are in scope for this SFT regulation or other securities financing transactions.

#### **Remuneration policy**

The Management Company operates a remuneration policy in accordance with the principles set out in the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 ("the Regulations"). The policy contains uniform compensation guidelines which adequately take into consideration the Management Company's capital, liquidity and risk profile, as well as its long-term success, thus representing incentives for employees.

The Management Company does not guarantee any variable remuneration. Fixed and variable components of total remuneration are appropriately balanced and the fixed component represents a sufficiently high proportion of the total remuneration in order to incentivize employees and to allow the operation of a fully flexible policy on variable remuneration, including the possibility to pay no variable remuneration. The measurement of performance used to calculate variable remunerations, or pools of variable remuneration, includes a comprehensive adjustment mechanism to integrate all relevant types of current and future risks.

Identified employees of the Management Company are defined as senior management, risk takers, control functions and any employees receiving total remuneration that takes them into the same remuneration bracket as senior managers and risk takers, whose professional activities have a material impact on the risk profiles of the Management Company for the funds under management. The disclosures below have been adjusted to reflect the total net variable compensation breakdown for identified staff as it applies to liquid funds under management by the Management Company, based on the relevant share of total assets under management.

	2023
	EUR
	(000, 000)
Total fixed remuneration	96
Total variable remuneration paid	62
Total variable remuneration deferred	27

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective. provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Crown Sigma UCITS plc – LGT EM LC Bond Sub-Fund

Legal entity identifier: 549300XI70HWIEKQX753

# **Environmental and/or social characteristics**

Does this financial product have a sustainable investment objective? practices. Yes No It made sustainable investments It promoted Environmental/Social (E/S) characteristics and while it did not have as its with an environmental objective a sustainable investment, it had a objective: % minimum proportion of % of sustainable in economic activities that investments qualify as environmentally with an environmental objective in sustainable under the EU economic activities that qualify as Taxonomy environmentally sustainable under in economic activities that the EU Taxonomy do not qualify as with an environmental objective in environmentally economic activities that do not sustainable under the EU qualify as environmentally Taxonomy sustainable under the EU Taxonomy Taxonomy or not. with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: %

The **EU** Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. The Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with pre-contractual commitments.

The Sub-Fund promoted environmental and social characteristics, as it took into account ESG related factors in the asset selection and investment consideration and / or monitoring process in the following ways:

The Investment Manager conducted an assessment of ESG factors, in the process to identify a universe of investable issuers through a systematic process which relies on information from underlying issuers (the "Country Selection Model"), resulting in a specific country classification (the "ESG Rating"). Environmental and/or social characteristics considered as part of the ESG Rating (and therefore promoted as environmental and/or social characteristics by the Sub-Fund) included:

- Green energy, emissions, natural resources, education, health, standards of living, civil liberties, gender equality, institutional strength, corruption, democracy, political stability.
- Environmental and/or social characteristics are further enriched with economic development inputs, such as economic growth and economic stability, on the basis that such characteristics are often intrinsically linked with the long-term ESG direction of Emerging Markets.

The above characteristics were assessed on a backward-looking basis using systematic data and enriched on an ongoing basis with forward-looking dissemination of in-house research, political assessments and research meetings.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics.

# How did the sustainability indicators perform?

- **Integration of ESG.** The Investment Manager considers the Sub-Fund has successfully and consistently integrated ESG in the investment process in the following manner:
  - The ESG Rating as part of the Sub-Fund's Country Selection Model was successfully and consistently applied.
    - In the Country Selection Model, quantitative and qualitative data was used. A greater weight was given to the long-term development of countries, which was consequently reflected in the ESG Rating the Investment Manager applied to countries. The Sub-Fund did not make any invests into F rated countries or currencies and avoided government bonds of C rated countries.
  - The Investment Manager successfully and consistently applied the Sub-Fund's ESG exclusion policy.
  - o At the end of the reporting period 98.3% (incl. collaterals) of the investments were aligned with environmental and social characteristics.

#### ...and compared to previous periods?

Not applicable.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following principal adverse impact indicators as part of the asset allocation process. These indicators are computed as part of the ESG rating system. This allows for enhanced insight in the adverse impacts caused by issuers.

Based on the performance of these indicators, the Investment Manager expects to mitigate the effects of the Sub-Fund over a longer time horizon.

2.3

Asset allocation describes the share of investments in specific assets.

### What was the proportion of sustainability-related investments?

98.3% of the portfolio promoted environmental and social characteristics (incl. collaterals).

#### What was the asset allocation?

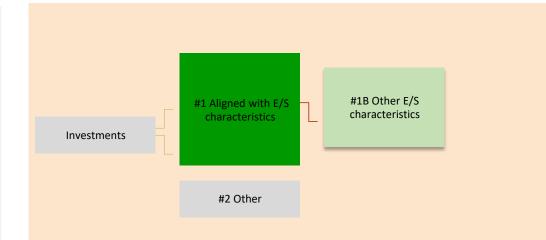

The sub-fund allocated 98.3% to investments aligned with environmental and/or social characteristics.

The remaining portion of 1.7% was not aligned with the environmental or social characteristics ("Other"). It consisted solely of the investments described under "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**#1 Aligned with E/S characteristics** includes the investments of the Sub-Fund used to attain the environmental or social characteristics promoted by the Sub-Fund.

**#2 Other** includes the remaining investments of the Sub-Fund which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Investments were made in government bonds, bonds issued by AAA-rated supranational issuers and development banks and FX derivatives and options.

# To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?<sup>1</sup>

:		
In fossil gas		In nuclear energy
	: In fossil gas	:

   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
  expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g.
  for a transition to
  a green economy.
- operational
  expenditure
  (OpEx) reflecting
  green operational
  activities of
  investee
  companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

100%

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# What was the share of investments made in transitional and enabling activities?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. This is the first reportable period, which includes this reporting format.

sustainable investments with an environmental objective that do not take into account the

criteria for environmentally

sustainable economic activities

under the EU

Taxonomy.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

### What was the share of socially sustainable investments?

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments under "Other" were investments which are not aligned with the environmental or social characteristics. The instruments in this category were FX derivatives and options. The Sub-Fund does not use derivatives specifically for the purpose of attaining the environmental and or social characteristics it promotes. Rather, the Sub-Fund may use derivatives for ordinary purposes, that is, for investment purposes, hedging and/or for efficient portfolio management purposes.

A screening was conducted to capture countries subject to comprehensive sanctions, per the Investment Manager's policy, which was taken into account as part of the final ESG Rating of an applicable country. Therefore, in line with the exclusion policy, the Sub-Fund did not invest into countries rated as F, based on Country Selection Model or currencies (FX derivatives or options) of these countries.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with the pre-contractual commitments.

Further, the Investment Manager interacted actively with issuers, which included the following:

Direct Engagement

 The Investment Manager established and maintained dialogue with issuers on topics related to the attainment of the Fund's strategy and investment objective. This included on-the-ground research visits to meet the country representatives.

Indirect Engagement

The Investment Manager engaged issuers indirectly through its active participation in industry
associations or organizations on sustainability related topics that partook in dialogue with
issuers. The Investment Manager is committed to being an active collaborator and thought
leader, which is further demonstrated through its participation in UN Principles for Responsible
Investment, the Institutional Investors Group on Climate Change and the Climate Action 100+
initiative.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a specific index as a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics that it promotes.

# Where can I find more product specific information online?

You may find more information on <a href="www.fundinfo.com">www.fundinfo.com</a> and the Investment Manager's website: <a href="www.lgtcp.com/en/regulatory-information">www.lgtcp.com/en/regulatory-information</a> .

Sustainable
investment means an

that the investee
companies follow
good governance

practices.

The **EU** Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. The Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Crown Sigma UCITS plc - LGT Sustainable Equity Global Sub-Fund

Legal entity identifier: 54930053MKRLX5T5TK55

# **Environmental and/or social characteristics**

Does this financial product have a sustainable investment objective?

Yes	• No
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 90% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with pre-contractual commitments.

The Sub-Fund promoted environmental and social characteristics, as it took into account ESG related factors in the asset selection and investment consideration and / or monitoring process in the following ways:

**ESG Exclusion Policy:** Exclusions were applied in the investment selection process based on ESG factors as a means of promoting environmental and social characteristics. For example, the following companies are excluded from investment consideration:

- Companies that, to the best of the Investment Manager's knowledge, generate any revenue from *inhumane weapons; and*
- Companies that generate a significant amount of their revenue from certain industries or business activities deemed by the Investment Manager to be controversial (e.g. arms, tobacco, pornography, nuclear power production, coal).

**ESG Rating:** The following are key performance indicators on ESG factors related to an investee company that are included in the ESG cockpit, which is a proprietary tool used as part of the ESG rating system discussed below, in the process to identify a universe of investable companies through a systematic process which relies on information from underlying companies (and therefore promoted as environmental and/or social characteristics by the Sub-Fund):

• greenhouse gas emissions, energy consumption, water and sanitation natural resources and biodiversity, waste and emissions, labour conditions, health and safety, human resources, diversity, education, suppliers, community relations and product impact.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted.

The Investment Manager's consideration of ESG factors, which included SDGs and climate factors, provided additional insights into both risk and value drivers, enabled optimisation of ESG in portfolio management and the asset selection process.

#### how the environmental or social characteristics promoted by the financial product are attained.

indicators measure

Sustainability

# How did the sustainability indicators perform?

During the reported period, the Sub-Fund achieved 98% underlying investments which promoted environmental and/or social characteristics of which 90% were considered sustainable investments. The primary binding element is a commitment of at least 90% of the assets of the Sub-Fund to underlying investments, which promote environmental and/or social characteristics.

The assessment of whether this binding element has been attained, is measured by the following sustainability indicators:

- **ESG Exclusion Policy**. The first factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently executed its ESG exclusion policy.
  - The Investment Manager successfully and consistently executed the Sub-Fund's ESG Exclusion Policy.
- **Screening based on ESG Rating.** Another factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently applied its ESG rating system in the process to identify a universe of investable companies and in the investment monitoring process.

This resulted in the exclusion of any security that are in the lowest 25% of the universe as described further in the Supplement of the Prospectus under the following Section of the SFDR Annex: "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?".

The Sub-Fund has successfully and consistently executed its ESG Assessment, by ensuring no investment in the lowest 25% was held in the portfolio during the course of the year.

- Sustainable Investments. The aggregate weight of all sustainable investments held
  by the Sub-Fund shall be calculated and used to measure the attainment by the SubFund of the environmental and/or social characteristics it promotes.
  The Sub-Fund has successfully aggregated the sustainable investments of the fund:
  90%
- United Nations Sustainable Development Goals ("UN SDGs").

In terms of considering whether investments of the Sub-Fund which are eligible for selection may be categorised as sustainable investments which are aligned with SFDR, another factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently applied its policy relating to investing in sustainable investments, i.e. in the context of the proportion of the Sub-Fund in sustainable investments only including investments with a positive net contribution to the UN SDGs by virtue of a net positive SDG score, based on the outputs from the ESG rating system. For the avoidance of doubt, the net positive SDG score, and therefore the level of sustainable investments, is determined on the basis of how an investment contributes, in terms of a total impact contribution (which includes an analysis of products, services and operational alignment), to an environmental or social objective.

The Investment Manager successfully and consistently applied its methodology relating to UN SDGs. Sustainable investments were fully comprised of investments meeting the prescribed UN SDG criteria and therefore 90% of the Sub-Fund had investments align with the UN SDGs.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the Sub-Fund targeted a combination of environmental and social objectives across the spectrum, as per below, based on alignment of such investments with the UN SDGs.

An investment with an environmental objective aligned with SFDR is one which is measured, for example, by key resource efficiency indicators on the use of energy, renewable energy, raw materials, water and land, on the production of waste, and greenhouse gas emissions, or on its impact on biodiversity and the circular economy.

An investment with a social objective aligned with SFDR is an investment that contributes to tackling inequality or that fosters social cohesion, social integration and labour relations, or an investment in human capital or economically or socially disadvantaged communities.

The objective of the sustainable investment was to have a net positive SDG Score.

90% of the Sub-Fund contributed to a net positive SDG Score. Highest scores were attained for a net positive contribution to UN SDG 10 (Reduced Inequalities), UN SDG 5 (Gender Equality) and UN SDG 3 (Good Health and Well-Being).

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In terms of ensuring that the sustainable investments did not cause significant harm to any environmental or social sustainable investment objective, a requirement for sustainable investments was the positive net contribution to UN SDGs, which covered a broad set of ESG activities.

In addition, the portfolio was systematically screened for controversies across environmental and / or social issues as part of LGT's "do no significant harm" assessment.

As an additional safeguard, the mandatory principal adverse impacts set out in Annex 1 of the regulatory technical standards supplementing the SFDR are used to further screen against activities that may significantly harm any of the environmental or social objectives, whereby investments that do not meet minimum thresholds applied by the Investment Manager for each of the mandatory PAI indicators in Annex 1 shall be excluded from investment consideration.

During the reporting period the sustainable investments did not cause significant harm to any environmental or social sustainable investment objective.

# How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts on sustainability factors were considered in the following manner:

- Principal adverse impact indicators were captured under the "do no significant harm" principle for sustainable investments outlined in the SFDR Annex of the Supplement to the Prospectus section entitled "How did the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?"
- Principal adverse impacts were assessed as part of the ESG rating system.
- Principal adverse impact indicators were reported on as outlined in the SFDR Annex of the Supplement to the Prospectus section entitled "How did this financial product consider principal adverse impacts on sustainability factors?"

# Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the Investment Manager monitored breaches and controversies for new and existing investments which largely relies on the quality of data supplied by external data providers.

Where the Investment Manager identifies clear breaches of norms outlined in the a) OECD Guidelines for Multinational Enterprises, b) the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work, and c) the International

#### **Principal adverse**

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Bill of Human Rights the Investment Manager will seek to exclude the investee company from investment by the Sub-Fund.

During the reporting period there were no breaches of norms outlined in the abovementioned norms.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following principal adverse impact indicators in the investment management process. This is calculated with the Investment Manager's proprietary ESG rating system and is part of our overall ESG Rating. This allows for enhanced insight in the adverse impacts caused by investee companies or issuers.

Based on the performance of these indicators, the Investment Manager expects to mitigate the effects of the Sub-Fund over a longer time horizon.

# What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets. The Sub-Fund allocated 98% to investments aligned with environmental and/or social characteristics (#1). The Sub-Fund allocated 90% to sustainable investments (#1A), of which 70.8% was social sustainable investments and 19.2% was environmental sustainable investments.

The remaining portion of 2% are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments (#2 Other).

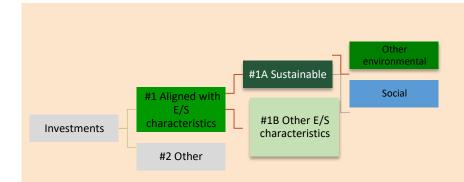

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

What was the asset allocation?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**#1 Aligned with E/S characteristics** includes the investments of the Sub-Fund used to attain the environmental or social characteristics promoted by the Sub-Fund.

**#2 Other** includes the remaining investments of the Sub-Fund which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers: -

The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Investments were made through a diversified asset allocation and a broad variety of economic sectors in accordance with Section C. of Annex A of the Prospectus in respect of the Sub-Fund.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
  expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g.
  for a transition to
  a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

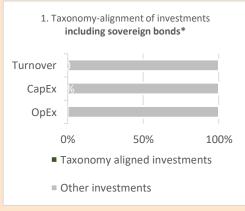

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?<sup>2</sup>

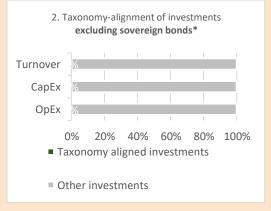

Yes:

In fossil gas

In nuclear energy

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

<sup>&</sup>lt;sup>2</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. This is the first reportable period, which includes this reporting format.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 18.7%

# What was the share of socially sustainable investments?

The share of socially sustainable investments was 70.8%.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund made 2% of investments in "Other".

Investments under "#2 Other" were investments which were neither aligned with the environmental or social characteristics nor qualify as sustainable investments, for example:

- There may be insufficient data available to verify any classification under sustainable investments
   or
  investments with environmental and/or social characteristics.
- There may be exposures where an ESG assessment cannot be applied or there is lacking market practice for appropriate quantification of ESG factors.
- Exposures consisting of certain FDI, hedging, cash or cash equivalents.

The Investment Manager applied minimum safeguards through a screening that is conducted to capture severe controversies or violations of social norms, taken into account as part of the final ESG score of an investee company of the Sub-Fund. Investors should note that, while the Investment Manager has developed a comprehensive tool to rate securities on ESG-related metrics, there may exist instances where data is lacking, and such assessment may be impacted on this basis.

Exclusions are also applied by the Investment Manager in the investment selection process based on ESG factors.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with the pre-contractual commitments.

The Investment Manager conducted the following engagements:

Engagement with direct investments: As an active direct investor in equities, the
Investment Manager are in continuous dialogue with companies. It is a two-way dialogue that
allows the Investment Manager to express its expectations as a sustainable investor, while also
providing companies with the opportunity to offer further clarification and insight into their
ESG practices and aspirations.

are
sustainable
investments with
an environmental
objective that do
not take into
account the
criteria for
environmentally
sustainable
economic activities
under the EU
Taxonomy.

Some of the most frequent topics of engagement included climate change, pollution and health and safety.

#### Reference benchmarks

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### • Industry engagement

We work together with international partners, networks and initiatives to raise awareness for ESG issues and enhance analytical tools.

In respect of additional actions taken to meet the environmental and / or social characteristics during the reference period, the Investment Manager continued alignment of the Sub-Fund's carbon footprint in line with the Net Zero Emissions by 2050 budget. This alignment included carbon budgets for each security,

Investors should note, the Sub-Fund does not target a climate transition objective as specified under EU 2019/2088, nor does it explicitly promote such investment objective or characteristic, however, the Investment Manager applies general principles and tools of carbon budgeting to assess alignment with international targets, such as the Net Zero Emissions by 2050 for comparative and performance management purposes.

### How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a specific index as a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics that it promotes.

The Benchmark used by the Sub-Fund is a mainstream index and does not take account of ESG factors and is therefore not consistent with the environmental and social characteristics promoted by the Sub-Fund.

Sustainable
investment means an
investment in an
economic activity that
contributes to an
environmental or
social objective,
provided that the
investment does not
significantly harm any
environmental or
social objective and
that the investee
companies follow
good governance

It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: \_\_\_\_%

214

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with pre-contractual commitments.

The Sub-Fund promoted environmental and social characteristics, as it took into account ESG related factors in the asset selection and investment consideration and / or monitoring process in the following ways:

**ESG Exclusion Policy:** Exclusions were applied in the investment selection process based on ESG factors as a means of promoting environmental and social characteristics. For example, the following companies are excluded from investment consideration:

- Companies that, to the best of the Investment Manager's knowledge, generate any revenue from inhumane weapons; and
- Companies that generate a significant amount of their revenue from certain industries or business activities deemed by the Investment Manager to be controversial (e.g. arms, tobacco, pornography, nuclear power production, coal).

**ESG Rating:** The following are key performance indicators on ESG factors related to an investee company that are included in the ESG cockpit, which is a proprietary tool used as part of the ESG rating system discussed below, in the process to identify a universe of investable companies through a systematic process which relies on information from underlying companies (and therefore promoted as environmental and/or social characteristics by the Sub-Fund):

 greenhouse gas emissions, energy consumption, water and sanitation natural resources and biodiversity, waste and emissions, labour conditions, health and safety, human resources, diversity, education, suppliers, community relations and product impact.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted.

The Investment Manager's consideration of ESG factors, which included SDGs and climate factors, provided additional insights into both risk and value drivers, enabled optimisation of ESG in portfolio management and the asset selection process.

### How did the sustainability indicators perform?

During the reported period, the Sub-Fund achieved 97% underlying investments which promoted environmental and/or social characteristics of which 91% were considered sustainable investments. The primary binding element is a commitment of at least 91% of the assets of the Sub-Fund to underlying investments, which promote environmental and/or social characteristics.

The assessment of whether this binding element has been attained, is measured by the following sustainability indicators:

• **ESG Exclusion Policy**. The first factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently executed its ESG exclusion policy.

The Investment Manager successfully and consistently executed the Sub-Fund's ESG Exclusion Policy.

• **Screening based on ESG Rating.** Another factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently applied its ESG rating system in the process to identify a universe of investable companies and in the investment monitoring process.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This resulted in the exclusion of any security that are in the lowest 25% of the universe as described further in the Supplement of the Prospectus under the following Section of the SFDR Annex: "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?".

The Sub-Fund has successfully and consistently executed its ESG Assessment, by ensuring no investment in the lowest 25% was held in the portfolio during the course of the year.

 Sustainable Investments. The aggregate weight of all sustainable investments held by the Sub-Fund shall be calculated and used to measure the attainment by the Sub-Fund of the environmental and/or social characteristics it promotes.
 The Sub-Fund has successfully aggregated the sustainable investments of the fund: 91%

#### United Nations Sustainable Development Goals ("UN SDGs").

In terms of considering whether investments of the Sub-Fund which are eligible for selection may be categorised as sustainable investments which are aligned with SFDR, another factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently applied its policy relating to investing in sustainable investments, i.e. in the context of the proportion of the Sub-Fund in sustainable investments only including investments with a positive net contribution to the UN SDGs by virtue of a net positive SDG score, based on the outputs from the ESG rating system. For the avoidance of doubt, the net positive SDG score, and therefore the level of sustainable investments, is determined on the basis of how an investment contributes, in terms of a total impact contribution (which includes an analysis of products, services and operational alignment), to an environmental or social objective.

The Investment Manager successfully and consistently applied its methodology relating to UN SDGs. Sustainable investments were fully comprised of investments meeting the prescribed UN SDG criteria and therefore 91% of the Sub-Fund had investments align with the UN SDGs.

#### ...and compared to previous periods?

Not applicable

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the Sub-Fund targeted a combination of environmental and social objectives across the spectrum, as per below, based on alignment of such investments with the UN SDGs.

An investment with an environmental objective aligned with SFDR is one which is measured, for example, by key resource efficiency indicators on the use of energy, renewable energy, raw materials, water and land, on the production of waste, and greenhouse gas emissions, or on its impact on biodiversity and the circular economy.

An investment with a social objective aligned with SFDR is an investment that contributes to tackling inequality or that fosters social cohesion, social integration and labour relations, or an investment in human capital or economically or socially disadvantaged communities.

The objective of the sustainable investment was to have a net positive SDG Score.

91% of the Sub-Fund contributed to a net positive SDG Score. Highest scores were attained for a net positive contribution to UN SDG 10 (Reduced Inequalities), UN SDG 5 (Gender Equality) and UN SDG 3 (Good Health and Well-Being).

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In terms of ensuring that the sustainable investments did not cause significant harm to any environmental or social sustainable investment objective, a requirement for sustainable investments was the positive net contribution to UN SDGs, which covered a broad set of ESG activities.

In addition, the portfolio was systematically screened for controversies across environmental and / or social issues as part of LGT's "do no significant harm" assessment.

As an additional safeguard, the mandatory principal adverse impacts set out in Annex 1 of the regulatory technical standards supplementing the SFDR are used to further screen against activities that may significantly harm any of the environmental or social objectives, whereby investments that do not meet minimum thresholds applied by the Investment Manager for each of the mandatory PAI indicators in Annex 1 shall be excluded from investment consideration.

During the reporting period the sustainable investments did not cause significant harm to any environmental or social sustainable investment objective.

# How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts on sustainability factors were considered in the following manner:

- Principal adverse impact indicators were captured under the "do no significant harm" principle for sustainable investments outlined in the SFDR Annex of the Supplement to the Prospectus section entitled "How did the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?"
- Principal adverse impacts were assessed as part of the ESG rating system.
- Principal adverse impact indicators were reported on as outlined in the SFDR Annex of the Supplement to the Prospectus section entitled "How did this financial product consider principal adverse impacts on sustainability factors?"

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the Investment Manager monitored breaches and controversies for new and existing investments which largely relies on the quality of data supplied by external data providers.

Where the Investment Manager identifies clear breaches of norms outlined in the a) OECD Guidelines for Multinational Enterprises, b) the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work, and c) the International

#### Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Bill of Human Rights the Investment Manager will seek to exclude the investee company from investment by the Sub-Fund.

During the reporting period there were no breaches of norms outlined in the abovementioned norms.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following principal adverse impact indicators in the investment management process. This is calculated with the Investment Manager's proprietary ESG rating system and is part of our overall ESG Rating. This allows for enhanced insight in the adverse impacts caused by investee companies or issuers.

Based on the performance of these indicators, the Investment Manager expects to mitigate the effects of the Sub-Fund over a longer time horizon.

#### What was the proportion of sustainability-related investments?

The Sub-Fund allocated 97% to investments aligned with environmental and/or social characteristics (#1). The Sub-Fund allocated 91% to sustainable investments (#1A), of which 69.0% was social sustainable investments and 22.0% was environmental sustainable investments.

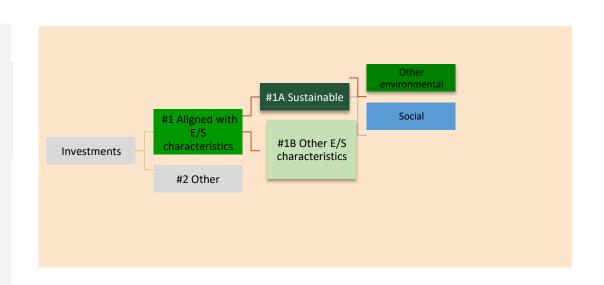

The remaining portion of 3% are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments (#2 Other).

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

#### What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

#### 220

**#1 Aligned with E/S characteristics** includes the investments of the Sub-Fund used to attain the environmental or social characteristics promoted by the Sub-Fund.

**#2 Other** includes the remaining investments of the Sub-Fund which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers: -

The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Investments were made through a diversified asset allocation and a broad variety of economic sectors in accordance with Section C. of Annex A of the Prospectus in respect of the Sub-Fund.

# To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

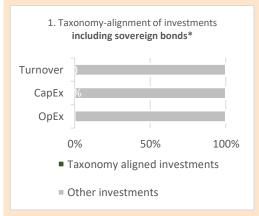

Did the financial product invest in fossil gas and/or nuclear energy reactivities that comply with the EU Taxonomy? <sup>3</sup>								
	Yes:							
	In fossil gas	In nuclear energy						
•	No							

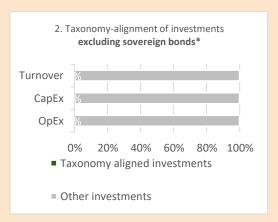

Taxonomy-aligned activities are expressed as a share of:

turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.

ossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to ting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

<sup>\*</sup>For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. This is the first reportable period, which includes this reporting format.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 21.7%

What was the share of socially sustainable investments?

The share of socially sustainable investments was 69.0%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund made 3% of investments in "Other".

Investments under "#2 Other" were investments which were neither aligned with the environmental or social characteristics nor qualify as sustainable investments, for example:

- There may be insufficient data available to verify any classification under sustainable investments
   or investments with environmental and/or social characteristics.
- There may be exposures where an ESG assessment cannot be applied or there is lacking market practice for appropriate quantification of ESG factors.
- Exposures consisting of certain FDI, hedging, cash or cash equivalents.

The Investment Manager applied minimum safeguards through a screening that is conducted to capture severe controversies or violations of social norms, taken into account as part of the final ESG score of an investee company of the Sub-Fund. Investors should note that, while the Investment Manager has developed a comprehensive tool to rate securities on ESG-related metrics, there may exist instances where data is lacking, and such assessment may be impacted on this basis.

Exclusions are also applied by the Investment Manager in the investment selection process based on ESG factors

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with the pre-contractual commitments.

The Investment Manager conducted the following engagements:

• **Engagement with direct investments:** As an active direct investor in equities, the Investment Manager are in continuous dialogue with companies. It is a two-way dialogue that allows the Investment Manager to express its expectations as a sustainable investor, while also providing companies with the opportunity to offer further clarification and insight into their ESG practices and aspirations.

Some of the most frequent topics of engagement included climate change, pollution and health and safety.

#### • Industry engagement

We work together with international partners, networks and initiatives to raise awareness for ESG issues and enhance analytical tools.

In respect of additional actions taken to meet the environmental and / or social characteristics during the reference period, the Investment Manager continued alignment of the Sub-Fund's carbon footprint in line with the Net Zero Emissions by 2050 budget. This alignment included carbon budgets for each security,

Investors should note, the Sub-Fund does not target a climate transition objective as specified under EU 2019/2088, nor does it explicitly promote such investment objective or characteristic, however, the Investment Manager applies general principles and tools of carbon budgeting to assess alignment with international targets, such as the Net Zero Emissions by 2050 for comparative and performance management purposes.

#### How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a specific index as a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Benchmark used by the Sub-Fund is a mainstream index and does not take account of ESG factors and is therefore not consistent with the environmental and social characteristics promoted by the Sub-Fund.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Did this financial product have a sustainable investment objective?

Sustainable
investment means an
investment in an
economic activity that
contributes to an
environmental or social
objective, provided that
the investment does
not significantly harm
any environmental or
social objective and
that the investee
companies follow good
governance practices.

## **Environmental and/or social characteristics**

investments with an environmental objective:% in economic activities that	X It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of66.7% of sustainable investments
qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  It made sustainable investments with a social objective:%	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective  X  It promoted E/S characteristics, but did not make any sustainable investments
	in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  It made sustainable investments

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with pre-contractual commitments.

The Sub-Fund promoted environmental and social characteristics, as it took into account ESG related factors in the asset selection and investment consideration and / or monitoring process in the following ways:

**ESG Exclusion Policy**: Exclusions were applied in the investment selection process based on ESG factors as a means of promoting environmental and social characteristics. Different factors applied to companies and to governments as the issuer of the instruments.

The following companies were excluded from investment consideration:

- Companies that, to the best of the Investment Manager's knowledge, generate any revenue from inhumane weapons; and
- Companies that generate a significant amount of their revenue from certain industries or business
  activities deemed by the Investment Manager to be controversial (e.g. arms, tobacco, pornography,
  nuclear power production, coal).

Countries were excluded from investment consideration based on the below criteria:

- if the country had not signed certain international treaties on controversial weapons;
- if the country failed to meet basic requirements with respect to *human rights and democracy* (assessed among other things based on Freedom House Index, rating of the Reporters Without Boarders Press Freedom, ratification of conventions and treaties in respect of human rights and labour conditions):
- if the country had a high level of *corruption* (assessed among other things based on Transparency International Corruption Perception Index and if a country's military budget exceeded 4% of gross domestic product);
- if the country was subject to sanctions under Art 41 of the UN security council to eliminate terrorism and weapons proliferation, oppose human rights violations or violations of international treaties, money laundering and deliberate destabilization of sovereign countries and drug trafficking; or
- if the country was considered a jurisdiction with *strategic AML/CFT deficiencies* by the Financial Action Task Force ("FATF").

**ESG Rating**: The following were key performance indicators on ESG factors related to an issuer that were included in the ESG cockpit, which is a proprietary tool used as part of the ESG rating system discussed below, in the process to identify a universe of investable issuers through a systematic process which relies on information from underlying issuers (and are therefore promoted as environmental and/or social characteristics by the Sub-Fund):

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- In respect of companies as issuers: greenhouse gas emissions, energy consumption, water and sanitation, natural resources and biodiversity, waste and emissions, labour conditions, health and safety, human resources, diversity, education, suppliers, community relations and product impact.
- In respect of supranational organisations as issuers: controversial practices, business ethics & product responsibility, environmental principles and action plans, community & human rights.
- In respect of countries as issuers: CO2 intensity, biodiversity and resources, corruption and business climate, public spending for education.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted.

### How did the sustainability indicators perform?

During the reported period, the Sub-Fund achieved 96.9% underlying investments which promoted environmental and/or social characteristics. The primary binding element is a commitment of at least 50% of the assets of the Sub-Fund to underlying investments, to be sustainable investments. The Sub-Fund achieved 66.7% underlying investments which were sustainable investments during the reporting period.

• **ESG Exclusion Policy**. The first factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently executed its ESG exclusion policy.

The Investment Manager considers that the Sub-Fund has successfully and consistently executed its ESG exclusion policy. Enforcement of the ESG Exclusion Policy occurred through ongoing monitoring.

• **Screening based on ESG Rating.** Another factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently applied its ESG rating system in the process to identify a universe of investable issuers and/or issuers in the investment monitoring process.

The Sub-Fund has successfully and consistently applied its ESG rating system in the process to identify a universe of investable issuers in the investment monitoring process.

• **Sustainable Investments.** The aggregate weight of sustainable investments held by the Sub-Fund shall be calculated and used to measure the attainment by the SubFund of the environmental and/or social characteristics it promotes.

At the end of the reporting period 96.9% of the investments were aligned with environmental and social characteristics. 66.7% of the investments were considered sustainable investments.

- United Nations Sustainable Development Goals ("UN SDGs"). Sustainable investments of the Sub-Fund target a combination of environmental and social objectives across the spectrum based on the alignment of such investments with the UN SDGs. Thus, another factor contributing to whether the Sub-Fund is attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently applied its policy relating to investing in sustainable investments. The Asset Manager considers as sustainable investments, which are aligned with SFDR, only instruments which either:
  - qualify as a Green, Social or Sustainable use of proceeds ("UOP") instrument according to the principles of the International Capital Markets Associations ("ICMA"), which align with UN SDGs, or
  - o have a positive net contribution to UN SDGs by virtue of the issuer's net 132 positive SDG score, based on the outputs from the ESG rating system. For the avoidance of doubt, the net positive SDG score, and therefore the level of sustainable investments, is determined on the basis of how an investment contributes, in terms of a total impact contribution (which includes an analysis of products, services and operational alignment) to an environmental or social objective.

The Investment Manager successfully and consistently applied its policy relating to UN SDGs in respect of the Sub-Fund as 66.7% made a positive contribution to such UN SDGs.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund invested in issuers that positively contributed to the UN SDGs, thus promoting environmental and/or social characteristics through a combination of environmental and social objectives.

An investment with an environmental objective aligned with SFDR was one which is oriented towards, for example, climate change adaptation (e.g. support adaptation related research), climate change mitigation (e.g. develop renewable energy technologies), protection of biodiversity (e.g. promote organic farming), reduction of air, water and soil polution.

An investment with a social objective aligned with SFDR was an investment that contributed to tackling inequality or that fostered social cohesion, social integration and labour relations, or an investment in human capital or economically or socially disadvantaged communities.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the sustainable investments did not cause significant harm to any environmental or social sustainable investment objective, a requirement for sustainable investments was the positive contribution to UN SDGs, which cover a broad set of ESG activities.

In addition, the portfolio was systematically screened for controversies across environmental and / or social issues as part of the Investment Manager's "do no significant harm" assessment in respect of issuers as well as in respect of projects that are financed through the UOP instruments. A sudden drop due to an ESG controversy will generally lead to an alert to be triggered so further assessment and action can be taken. These controversies are being systematically logged in an inhouse engagement tool and reported in the annual Active Ownership Report classified as re-active engagements.

As an additional safeguard, the applicable mandatory principal adverse impacts set out in Annex 1 of the regulatory technical standards supplementing the SFDR were used to further screen against activities that may significantly harm any of the environmental or social objectives. Investments that do not meet minimum thresholds applied by the Investment Manager for each of the mandatory PAI indicators in Annex 1 were excluded from investment consideration. Such investments included companies active in the fossil fuel sector or UN global compacct violators.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts on sustainability factors were considered in the following manner:

- Principal adverse impact indicators were captured under the "do no significant harm" principle for sustainable investments as outlined in the Prospecus.
- Principal adverse impact indicators were assessed in the exclusion of securities as part of the ESG rating system as outlined in the Prospectus.
- Principal adverse impact indicators were reported on as outlined in the Prospectus.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

The Investment Manager monitored breaches and controversies for new and existing investments which largely relies on the quality of data supplied by external data providers. Where the Investment Manager identified clear breaches of norms outlined in the a) OECD Guidelines for Multinational Enterprises, b) the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work, and c) the International Bill of Human Rights the Investment Manager were excluded from investment by the Sub-Fund.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following principal adverse impact indicators as part of the asset allocation process. These indicators are computed as part of the ESG rating system and impact the ESG rating. This allows for enhanced insight in the adverse impacts caused by investee companies or issuers. Based on the performance of these indicators, the Investment Manager expects to mitigate the effects of the Sub-Fund over a longer time horizon.

What were the top investments of this financial product?

To comply with the EU
Taxonomy, the criteria
for fossil gas include
TI limitations on
in emissions and
cc switching to fully
grenewable power or
in low-carbon fuels by
fir the end of 2035. For
druclear energy, the
processors of the criteria include

20 comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### What was the proportion of sustainability-related investments?

The Sub-Fund allocated 96.9% to investments aligned with environmental and/or social characteristics (#1) including 66.7% of investments considered as sustainable investments (#1A).

The remaining portion of 3.1% was aligned with #2 Other.

#### What was the asset allocation?

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Investments were made globally in government-, corporates- and supranational bonds. Economic sectors related to the corporate exposure, include the financial, energy, communications, consumer goods and services, healthcare, technology, utillities and industrial sector.

No

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to invest any proportion of its assets in environmentally sustainable economic activities aligned with the EU Taxonomy. Accordingly, the level of committed EU Taxonomy- aligned investments were zero per cent.

			ncial product			U	and/or	nuclear	energy	related
	,	Yes:								
			In fossil gas	In nu	clear e	nerg	У			

<sup>&</sup>lt;sup>4</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure
   (CapEx) showing the
   green investments
   made by investee
   companies, e.g. for a
   transition to a green
   economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

sustainable

criteria for environmentally sustainable economic

2020/852.

activities under

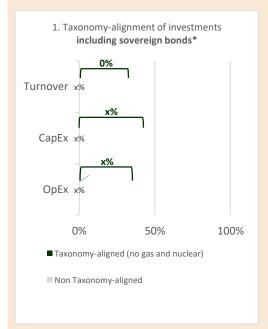

Regulation (EU)

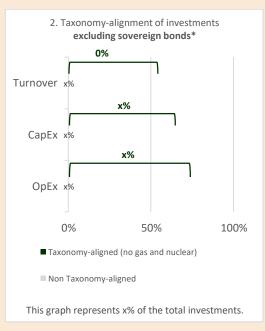

investments with an environmental

objective that do not

take into account the

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities? The Sub-Fund did not commit to make sustainable investments with an environmental objective aligned with the EU Taxonomy. Hence, the Sub-Fund did not commit to invest in sustainable investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

50.8% of the investments were made to sustainable investments with an environmental objective not aligned with the EU Taxonomy.

#### What was the share of socially sustainable investments?

15.8% of the investments were made to sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments under "#2 Other" were investments which are neither aligned with the environmental or social characteristics nor qualify as sustainable investments, for example:

- There may have been insufficient data available to verify any classification under sustainable investments or investments with environmental and/or social characteristics.
- There may have been exposures where an ESG assessment could not be applied or there was lacking market practice for appropriate quantification of ESG factors.
- Exposures consisting of certain FDI, hedging, cash or cash equivalents.

The Investment Manager applied minimum safeguards through a screening that is conducted to capture severe controversies or violations of social norms, taken into account as part of the final ESG score of an issuer. Investors should note while the Investment Manager has developed a comprehensive tool to rate securities on ESG-related metrics, there may exist instances where data was lacking, and such assessment may have been impacted.

Additionally, to the extent possible and / or where any investments in "Other" form a portion of the strategic asset allocation, the Investment Manager's proprietary ESG rating was applied to the investments making up the 'Other' section of the Sub-Fund in order to continually consider and review such investments.

Exclusions were also applied by the Investment Manager in the investment selection process based on ESG factors as described in the Prospectus.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with the pre-contractual commitments.

Further, the Investment Manager interacted actively with issuers, which included the following:

#### Direct Engagement

• The Investment Manager established and maintained dialogue with issuers on topics related to the attainment of the Fund's strategy and investment objective.

#### Indirect Engagement

• The Investment Manager engaged issuers indirectly through its active participation in industry associations or organizations on sustainability related topics that partook in dialogue with issuers. The Investment Manager is committed to being an active collaborator and thought leader, which is further demonstrated through its participation in UN Principles for Responsible Investment, the Institutional Investors Group on Climate Change and the Climate Action 100+ initiative.

Details on engagement activities are reported on an annual basis and are available in LGT Capital Partners Active Ownership Report 2022 available on www.lgtcp.com.

# How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a specific index as a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics that it promotes.

The Benchmark used by the Sub-Fund is a mainstream index and does not take account of ESG factors and is therefore not consistent with the environmental and social characteristics promoted by the Sub- Fund.

#### Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with pre-contractual commitments.

The Sub-Fund promoted environmental and social characteristics, as it took into account ESG related factors in the asset selection and investment consideration and / or monitoring process in the following ways:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

**ESG Exclusion Policy**: Exclusions were applied in the investment selection process based on ESG factors as a means of promoting environmental and social characteristics. Different factors applied to companies and to governments as the issuer of the instruments.

The following companies were excluded from investment consideration:

- Companies that, to the best of the Investment Manager's knowledge, generate any revenue from inhumane weapons; and
- Companies that generate a significant amount of their revenue from certain industries or business activities deemed by the Investment Manager to be controversial (e.g. arms, tobacco, pornography, nuclear power production, coal).

Countries were excluded from investment consideration based on the below criteria:

- if the country had not signed certain international treaties on controversial weapons;
- if the country failed to meet basic requirements with respect to *human rights and democracy* (assessed among other things based on Freedom House Index, rating of the Reporters Without Boarders Press Freedom, ratification of conventions and treaties in respect of human rights and labour conditions):
- if the country had a high level of *corruption* (assessed among other things based on Transparency International Corruption Perception Index and if a country's military budget exceeded 4% of gross domestic product);
- if the country was subject to sanctions under Art 41 of the UN security council to eliminate terrorism and weapons proliferation, oppose human rights violations or violations of international treaties, money laundering and deliberate destabilization of sovereign countries and drug trafficking; or
- if the country was considered a jurisdiction with *strategic AML/CFT deficiencies* by the Financial Action Task Force ("FATF").

**ESG Rating**: The following were key performance indicators on ESG factors related to an issuer that were included in the ESG cockpit, which is a proprietary tool used as part of the ESG rating system discussed below, in the process to identify a universe of investable issuers through a systematic process which relies on information from underlying issuers (and are therefore promoted as environmental and/or social characteristics by the Sub-Fund):

- In respect of companies as issuers: greenhouse gas emissions, energy consumption, water and sanitation, natural resources and biodiversity, waste and emissions, labour conditions, health and safety, human resources, diversity, education, suppliers, community relations and product impact.
- In respect of supranational organisations as issuers: controversial practices, business ethics & product responsibility, environmental principles and action plans, community & human rights.
- In respect of countries as issuers: CO2 intensity, biodiversity and resources, corruption and business climate, public spending for education.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted.

### How did the sustainability indicators perform?

During the reported period, the Sub-Fund achieved 98% underlying investments which promoted environmental and/or social characteristics. The primary binding element is a commitment of at least 50% of the assets of the Sub-Fund to underlying investments, to be sustainable investments. The Sub-Fund achieved 63.6% underlying investments which were sustainable investments during the reporting period.

• **ESG Exclusion Policy**. The first factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently executed its ESG exclusion policy.

The Investment Manager considers that the Sub-Fund has successfully and consistently executed its ESG exclusion policy. Enforcement of the ESG Exclusion Policy occurred through ongoing monitoring.

• **Screening based on ESG Rating.** Another factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently applied its ESG rating system in the process to identify a universe of investable issuers and/or issuers in the investment monitoring process.

The Sub-Fund has successfully and consistently applied its ESG rating system in the process to identify a universe of investable issuers in the investment monitoring process.

• **Sustainable Investments.** The aggregate weight of sustainable investments held by the Sub-Fund shall be calculated and used to measure the attainment by the Sub Fund of the environmental and/or social characteristics it promotes.

At the end of the reporting period 98% of the investments were aligned with environmental and social characteristics. 63.6% of the investments were considered sustainable investments.

- United Nations Sustainable Development Goals ("UN SDGs"). Sustainable investments of the Sub-Fund target a combination of environmental and social objectives across the spectrum based on the alignment of such investments with the UN SDGs. Thus, another factor contributing to whether the Sub-Fund is attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently applied its policy relating to investing in sustainable investments. The Asset Manager considers as sustainable investments, which are aligned with SFDR, only instruments which either:
  - qualify as a Green, Social or Sustainable use of proceeds ("UOP") instrument according to the principles of the International Capital Markets Associations ("ICMA"), which align with UN SDGs, or
  - o have a positive net contribution to UN SDGs by virtue of the issuer's net 132 positive SDG score, based on the outputs from the ESG rating system. For the avoidance of doubt, the net positive SDG score, and therefore the level of sustainable investments, is determined on the basis of how an investment contributes, in terms of a total impact contribution (which includes an analysis of products, services and operational alignment) to an environmental or social objective.

The Investment Manager successfully and consistently applied its policy relating to UN SDGs in respect of the Sub-Fund as 63.6% made a positive contribution to such UN SDGs

#### ...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund invested in issuers that positively contributed to the UN SDGs, thus promoting environmental and/or social characteristics through a combination of environmental and social objectives.

An investment with an environmental objective aligned with SFDR was one which is oriented towards, for example, climate change adaptation (e.g. support adaptation related research), climate change

mitigation (e.g. develop renewable energy technologies), protection of biodiversity (e.g. promote organic farming), reduction of air, water and soil polution.

An investment with a social objective aligned with SFDR was an investment that contributed to tackling inequality or that fostered social cohesion, social integration and labour relations, or an investment in human capital or economically or socially disadvantaged communities.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the sustainable investments did not cause significant harm to any environmental or social sustainable investment objective, a requirement for sustainable investments was the positive contribution to UN SDGs, which cover a broad set of ESG activities.

In addition, the portfolio was systematically screened for controversies across environmental and / or social issues as part of the Investment Manager's "do no significant harm" assessment in respect of issuers as well as in respect of projects that are financed through the UOP instruments. A sudden drop due to an ESG controversy will generally lead to an alert to be triggered so further assessment and action can be taken. These controversies are being systematically logged in an inhouse engagement tool and reported in the annual Active Ownership Report classified as re-active engagements.

As an additional safeguard, the applicable mandatory principal adverse impacts set out in Annex 1 of the regulatory technical standards supplementing the SFDR were used to further screen against activities that may significantly harm any of the environmental or social objectives. Investments that do not meet minimum thresholds applied by the Investment Manager for each of the mandatory PAI indicators in Annex 1 were excluded from investment consideration. Such investments included companies active in the fossil fuel sector or UN global compact violators.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts on sustainability factors were considered in the following manner:

- Principal adverse impact indicators were captured under the "do no significant harm" principle for sustainable investments as outlined in the Prospecus.
- Principal adverse impact indicators were assessed in the exclusion of securities as part of the ESG rating system as outlined in the Prospectus.
- Principal adverse impact indicators were reported on as outlined in the Prospectus.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

The Investment Manager monitored breaches and controversies for new and existing investments which largely relies on the quality of data supplied by external data providers. Where the Investment Manager identified clear breaches of norms outlined in the a) OECD Guidelines for Multinational Enterprises, b) the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work, and c) the International Bill of Human Rights the Investment Manager were excluded from investment by the Sub-Fund.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following principal adverse impact indicators as part of the asset allocation process. These indicators are computed as part of the ESG rating system and impact the ESG rating. This allowes for enhanced insight in the adverse impacts caused by investee companies or issuers.

Based on the performance of these indicators, the Investment Manager expects to mitigate the effects of the Sub-Fund over a longer time horizon.

What were the top investments of this financial product?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Asset allocation
describes the share
of investments in
specific assets.

### What was the proportion of sustainability-related investments?

The Sub-Fund allocated 98% to investments aligned with environmental and/or social characteristics (#1) including 63.6% of investments considered as sustainable investments (#1A).

The remaining portion of 2% was aligned with #2 Other.

#### What was the asset allocation?

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

The Sub-Fund invested primarily in a broad range of fixed income securities and instruments listed or traded on Regulated Markets and issued by private or public debtors all over the world.

No

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to invest any proportion of its assets in environmentally sustainable economic activities aligned with the EU Taxonomy. Accordingly, the level of committed EU Taxonomy- aligned investments were zero per cent.

	•	vest in fossil gas and/ EU Taxonomy <sup>5</sup> ?	or r	nuclear	energy	related
Yes	s:					
	In fossil gas	In nuclear energy				

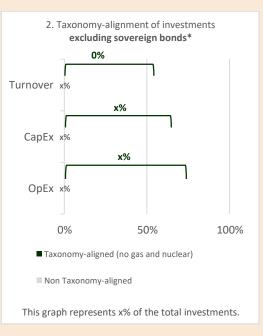

<sup>&</sup>lt;sup>5</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities? The Sub-Fund did not commit to make sustainable investments with an environmental objective aligned with the EU Taxonomy. Hence, the Sub-Fund did not commit to invest in sustainable investments in transitional and enabling activities.
  - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

45.8% of the investments were made to sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

17.8% of the investments were made to sustainable investments with a social objective.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments under "#2 Other" were investments which are neither aligned with the environmental or social characteristics nor qualify as sustainable investments, for example:

- There may have been insufficient data available to verify any classification under sustainable investments or investments with environmental and/or social characteristics.
- There may have been exposures where an ESG assessment could not be applied or there was lacking market practice for appropriate quantification of ESG factors.
- Exposures consisting of certain FDI, hedging, cash or cash equivalents.

The Investment Manager applied minimum safeguards through a screening that is conducted to capture severe controversies or violations of social norms, taken into account as part of the final ESG score of an issuer. Investors should note while the Investment Manager has developed a comprehensive tool to rate securities on ESG-related metrics, there may exist instances where data was lacking, and such assessment may have been impacted.

Additionally, to the extent possible and / or where any investments in "Other" form a portion of the strategic asset allocation, the Investment Manager's proprietary ESG rating was applied to the investments making up the 'Other' section of the Sub-Fund in order to continually consider and review such investments.

Exclusions were also applied by the Investment Manager in the investment selection process based on ESG factors as described in the Prospectus.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with the pre-contractual commitments.

Further, the Investment Manager interacted actively with issuers, which included the following:

Direct Engagement

• The Investment Manager established and maintained dialogue with issuers on topics related to the attainment of the Fund's strategy and investment objective.

Indirect Engagement

• The Investment Manager engaged issuers indirectly through its active participation in industry associations or organizations on sustainability related topics that partook in dialogue with issuers. The Investment Manager is committed to being an active collaborator and thought leader, which is further demonstrated through its participation in UN Principles for Responsible Investment, the Institutional Investors Group on Climate Change and the Climate Action 100+ initiative.

Details on engagement activities are reported on an annual basis and are available in LGT Capital Partners Active Ownership Report 2022 available on www.lgtcp.com.

# How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a specific index as a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics that it promotes.

The Benchmark used by the Sub-Fund is a mainstream index and does not take account of ESG factors and is therefore not consistent with the environmental and social characteristics promoted by the Sub-Fund.

#### Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU** Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. The Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Crown Sigma UCITS plc – LGT Sustainable Quality Equity Sub-Fund

Legal entity identifier: 54930003L8V1USVNSG26

## **Environmental and/or social characteristics**

Does this financial product have a sustainable investment objective?

Yes	● ○ 🗶 No
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 88% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with pre-contractual commitments.

The Sub-Fund promoted environmental and social characteristics, as it took into account ESG related factors in the asset selection and investment consideration and / or monitoring process in the following ways:

**ESG Exclusion Policy:** Exclusions were applied in the investment selection process based on ESG factors as a means of promoting environmental and social characteristics. For example, the following companies are excluded from investment consideration:

- Companies that, to the best of the Investment Manager's knowledge, generate any revenue from inhumane weapons; and
- Companies that generate a significant amount of their revenue from certain industries or business activities deemed by the Investment Manager to be controversial (e.g. arms, tobacco, pornography, nuclear power production, coal).

**ESG Rating:** The following are key performance indicators on ESG factors related to an investee company that are included in the ESG cockpit, which is a proprietary tool used as part of the ESG rating system discussed below, in the process to identify a universe of investable companies through a systematic process which relies on information from underlying companies (and therefore promoted as environmental and/or social characteristics by the Sub-Fund):

• greenhouse gas emissions, energy consumption, water and sanitation natural resources and biodiversity, waste and emissions, labour conditions, health and safety, human resources, diversity, education, suppliers, community relations and product impact.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted.

The Investment Manager's consideration of ESG factors, which included SDGs and climate factors, provided additional insights into both risk and value drivers, enabled optimisation of ESG in portfolio management and the asset selection process.

### How did the sustainability indicators perform?

During the reported period, the Sub-Fund achieved 99% underlying investments which promoted environmental and/or social characteristics of which 88% were considered sustainable investments. The primary binding element is a commitment of at least 90% of the assets of the Sub-Fund to underlying investments, which promote environmental and/or social characteristics.

The assessment of whether this binding element has been attained, is measured by the following sustainability indicators:

• **ESG Exclusion Policy**. The first factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently executed its ESG exclusion policy.

The Investment Manager successfully and consistently executed the Sub-Fund's ESG Exclusion Policy.

• **Screening based on ESG Rating.** Another factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently applied its ESG rating system in the process to identify a universe of investable companies and in the investment monitoring process.

This resulted in the exclusion of any security that are in the lowest 25% of the universe as described further in the Supplement of the Prospectus under the following Section of the SFDR Annex: "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?".

The Sub-Fund has successfully and consistently executed its ESG Assessment, by ensuring no investment in the lowest 25% was held in the portfolio during the course of the year.

- Sustainable Investments. The aggregate weight of all sustainable investments held
  by the Sub-Fund shall be calculated and used to measure the attainment by the SubFund of the environmental and/or social characteristics it promotes.
  The Sub-Fund has successfully aggregated the sustainable investments of the fund:
  88%.
- United Nations Sustainable Development Goals ("UN SDGs").

In terms of considering whether investments of the Sub-Fund which are eligible for selection may be categorised as sustainable investments which are aligned with SFDR, another factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently applied its policy relating to investing in sustainable investments, i.e. in the context of the proportion of the Sub-Fund in sustainable investments only including investments with a positive net contribution to the UN SDGs by virtue of a net positive SDG score, based on the outputs from the ESG rating system. For the avoidance of doubt, the net positive SDG score, and therefore the level of sustainable investments, is determined on the basis of how an investment contributes, in terms of a total impact contribution (which includes an analysis of products, services and operational alignment), to an environmental or social objective.

The Investment Manager successfully and consistently applied its methodology relating to UN SDGs. Sustainable investments were fully comprised of investments meeting the prescribed UN SDG criteria and therefore 88% of the Sub-Fund had investments align with the UN SDGs.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the Sub-Fund targeted a combination of environmental and social objectives across the spectrum, as per below, based on alignment of such investments with the UN SDGs.

An investment with an environmental objective aligned with SFDR is one which is measured, for example, by key resource efficiency indicators on the use of energy, renewable energy, raw materials, water and land, on the production of waste, and greenhouse gas emissions, or on its impact on biodiversity and the circular economy.

An investment with a social objective aligned with SFDR is an investment that contributes to tackling inequality or that fosters social cohesion, social integration and labour relations, or an investment in human capital or economically or socially disadvantaged communities.

The objective of the sustainable investment was to have a net positive SDG Score.

88% of the Sub-Fund contributed to a net positive SDG Score. Highest scores were attained for a net positive contribution to UN SDG 10 (Reduced Inequalities), UN SDG 5 (Gender Equality) and UN SDG 3 (Good Health and Well-Being).

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In terms of ensuring that the sustainable investments did not cause significant harm to any environmental or social sustainable investment objective, a requirement for sustainable investments was the positive net contribution to UN SDGs, which covered a broad set of ESG activities.

In addition, the portfolio was systematically screened for controversies across environmental and / or social issues as part of LGT's "do no significant harm" assessment.

As an additional safeguard, the mandatory principal adverse impacts set out in Annex 1 of the regulatory technical standards supplementing the SFDR are used to further screen against activities that may significantly harm any of the environmental or social objectives, whereby investments that do not meet minimum thresholds applied by the Investment Manager for each of the mandatory PAI indicators in Annex 1 shall be excluded from investment consideration.

During the reporting period the sustainable investments did not cause significant harm to any environmental or social sustainable investment objective.

# How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts on sustainability factors were considered in the following manner:

- Principal adverse impact indicators were captured under the "do no significant harm" principle for sustainable investments outlined in the SFDR Annex of the Supplement to the Prospectus section entitled "How did the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?"
- Principal adverse impacts were assessed as part of the ESG rating system.
- Principal adverse impact indicators were reported on as outlined in the SFDR Annex of the Supplement to the Prospectus section entitled "How did this financial product consider principal adverse impacts on sustainability factors?"

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the Investment Manager monitored breaches and controversies for new and existing investments which largely relies on the quality of data supplied by external data providers.

Where the Investment Manager identifies clear breaches of norms outlined in the a) OECD Guidelines for Multinational Enterprises, b) the UN Guiding Principles on

#### Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work, and c) the International Bill of Human Rights the Investment Manager will seek to exclude the investee company from investment by the Sub-Fund.

During the reporting period there were no breaches of norms outlined in the abovementioned norms.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following principal adverse impact indicators in the investment management process. This is calculated with the Investment Manager's proprietary ESG rating system and is part of our overall ESG Rating. This allows for enhanced insight in the adverse impacts caused by investee companies or issuers.

Based on the performance of these indicators, the Investment Manager expects to mitigate the effects of the Sub-Fund over a longer time horizon.

Indicator	Metric	Portfolio exposure	Portfolio coverage	Portfolio eligibility

#### What was the proportion of sustainability-related investments?

The Sub-Fund allocated 99% to investments aligned with environmental and/or social characteristics (#1). The Sub-Fund allocated 88% to sustainable investments (#1A), of which 68.0% was social sustainable investments and 20.0% was environmental sustainable investments.

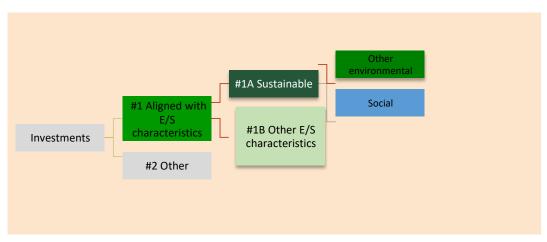

The remaining portion of 1% are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments (#2 Other).

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

#### What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

**#1 Aligned with E/S characteristics** includes the investments of the Sub-Fund used to attain the environmental or social characteristics promoted by the Sub-Fund.

**#2 Other** includes the remaining investments of the Sub-Fund which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers: -

The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Investments were made through a diversified asset allocation and a broad variety of economic sectors in accordance with Section C. of Annex A of the Prospectus in respect of the Sub-Fund.

### To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

	•	duct invest in fossil gas and/or nuclear energy related with the EU Taxonomy? <sup>6</sup>
	Yes:	
	In fossil gas	In nuclear energy
×	No	

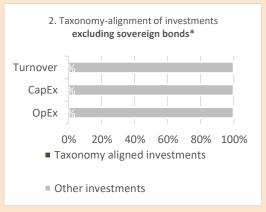

<sup>&</sup>lt;sup>6</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
  expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g.
  for a transition to
  a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. This is the first reportable period, which includes this reporting format.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 19.9%

What was the share of socially sustainable investments?

The share of socially sustainable investments was 68.0%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

whether the financial product attains the

The Sub-Fund made 1% of investments in "Other".

Investments under "#2 Other" were investments which were neither aligned with the environmental or social characteristics nor qualify as sustainable investments, for example:

- There may be insufficient data available to verify any classification under sustainable investments
   or investments with environmental and/or social characteristics.
- There may be exposures where an ESG assessment cannot be applied or there is lacking market practice for appropriate quantification of ESG factors.
- Exposures consisting of certain FDI, hedging, cash or cash equivalents.

The Investment Manager applied minimum safeguards through a screening that is conducted to capture severe controversies or violations of social norms, taken into account as part of the final ESG score of an investee company of the Sub-Fund. Investors should note that, while the Investment Manager has developed a comprehensive tool to rate securities on ESG-related metrics, there may exist instances where data is lacking, and such assessment may be impacted on this basis.

Exclusions are also applied by the Investment Manager in the investment selection process based on ESG factors.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with the pre-contractual commitments.

The Investment Manager conducted the following engagements:

• **Engagement with direct investments:** As an active direct investor in equities, the Investment Manager are in continuous dialogue with companies. It is a two-way dialogue that allows the Investment Manager to express its expectations as a sustainable investor, while also providing companies with the opportunity to offer further clarification and insight into their ESG practices and aspirations.

Some of the most frequent topics of engagement included climate change, pollution and health and safety.

#### Industry engagement

We work together with international partners, networks and initiatives to raise awareness for ESG issues and enhance analytical tools.

In respect of additional actions taken to meet the environmental and / or social characteristics during the reference period, the Investment Manager continued alignment of the Sub-Fund's carbon footprint in line with the Net Zero Emissions by 2050 budget. This alignment included carbon budgets for each security,

Investors should note, the Sub-Fund does not target a climate transition objective as specified under EU 2019/2088, nor does it explicitly promote such investment objective or characteristic, however, the Investment Manager applies general principles and tools of carbon budgeting to assess alignment with international targets, such as the Net Zero Emissions by 2050 for comparative and performance management purposes.

How did this financial product perform compared to the reference benchmark?

254

The Sub-Fund has not designated a specific index as a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics that it promotes.

The Benchmark used by the Sub-Fund is a mainstream index and does not take account of ESG factors and is therefore not consistent with the environmental and social characteristics promoted by the Sub-Fund.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Crown Sigma UCITS plc – LGT Bond Credit EM Credit Opportunities Sub-Fund

Legal entity identifier: 549300YG2JJUME9TWX82

### **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective? Yes It promoted Environmental/Social (E/S) It made sustainable characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally sustainable under the EU economic activities that do not qualify as environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: \_\_\_%

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with pre-contractual commitments.

The Sub-Fund promoted environmental and social characteristics, as it took into account ESG related factors in the asset selection and investment consideration and / or monitoring process in the following ways:

Sustainability
indicators measure
how the environmental
or
social characteristics
promoted by the
financial product are
attained.

**ESG Exclusion Policy**. In respect of companies, exclusions were applied in the investment selection process based on ESG factors as a means of promoting environmental and social characteristics. Different factors applied to companies and to countries as the issuer of the instruments. The following companies were excluded from investment consideration:

- Companies that, to the best of the Investment Manager's knowledge, generated any revenue from inhumane weapons; and
- Companies that generated a significant amount of their revenue from certain industries or business activities deemed by the Investment Manager to be controversial (e.g. thermal coal mining companies and utilities that generate more than 5% of their revenues from thermal coal plants).

In respect of countries, those with the lowest ESG rating were excluded.

The above-described exclusions were applied to the whole portfolio of the Sub-Fund and issuers who fulfilled the above criteria were deemed non-investable and were fully excluded from the entire investment portfolio of the Sub-Fund.

**ESG Rating.** The following were key performance indicators on ESG factors related to a company or supranational organisation as issuer that were included in the ESG cockpit, which is a proprietary tool used as part of the ESG rating system discussed below (and are therefore promoted as environmental and/or social characteristics by the Sub-Fund):

- In respect of companies as issuers: greenhouse gas emissions, energy consumption, water and sanitation natural resources and biodiversity, waste and emissions, labour conditions, health and safety, human resources, diversity, education, suppliers, community relations and product impact.
- In respect of supranational organisations as issuers: controversial practices, business ethics & product responsibility, environmental principles and action plans, community & human rights.

In respect of countries, the Investment Manager applied its "Country Selection Model", resulting in a specific country classification. Environmental and/or social characteristics considered as part of the ESG rating of countries (and therefore promoted as environmental and/or social characteristics by the SubFund) included:

- Green energy, emissions, natural resources, education, health, standards of living, civil liberties, gender equality, institutional strength, corruption, democracy, political stability.
- Environmental and/or social characteristics were further enriched with economic development inputs, such as economic growth and economic stability, on the basis that such characteristics are often intrinsically linked with the long-term ESG direction of Emerging Markets.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the reported period, the Sub-Fund achieved 83.5% underlying investments which promoted environmental and/or social characteristics. The primary binding element is a commitment of at least 50% of the assets of the Sub-Fund to underlying investments, which promote environmental and/or social characteristics.

The assessment of whether this binding element has been attained, is measured by the following two sustainability indicators:

**ESG Exclusion Policy.** The first factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently executed its ESG exclusion policy in respect of companies

The Investment Manager successfully and consistently executed the Sub-Fund's ESG Exclusion Policy. Enforcement of the ESG Exclusion Policy occurred through ongoing monitoring.

**Screening based on ESG Rating.** Another factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently applied its ESG rating system to the assets in its portfolio. Investors should be aware that the ESG rating can only be assigned if there is sufficient data in relation to the relevant underlying. Thus, not all investments can be assigned an ESG rating. Where this is the case, such investments will not be considered by the Investment Manager as investments aligned with environmental and/or social characteristics promoted by the Sub-Fund. Instead, such investments will form part of the "Other" assets as described in more detail under "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" in the relevant section of the Supplement.

An investment will be deemed to be aligned with the environmental and social characteristics promoted by the Sub-Fund only if:

(a) it has not been excluded under the ESG Exclusion Policy;

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

(b) there is sufficient data to enable it to be subject to the ESG screening for the purposes of determining the ESG rating; and (c) it is not excluded from being considered as aligned with the environmental and social characteristics promoted by the Sub-Fund by virtue of the criteria described within the "Screening based on ESG Rating" process in the section "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?" contained in the relevant section of the Supplement.

The Investment Manager considers the Sub-Fund successfully and consistently applied its ESG rating system to the assets in its portfolio. Investors should be aware that the ESG rating could only be assigned if there was sufficient data in relation to the relevant underlying.

...and compared to previous periods?

Not applicable. This is the first period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. The Sub-Fund does not make a comittment to sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. The Sub-Fund does not make a comittment to sustainable investments.

——— How were the indicators for adverse impacts on sustainability factors taken into account?

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

# How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following principal adverse impact indicators as part of the asset allocation process. These indicators are computed as part of the ESG rating system and impact the ESG rating. This allows for enhanced insight in the adverse impacts caused by investee companies or issuers.

Based on the performance of these indicators, the Investment Manager expects to mitigate the effects of the Sub-Fund over a longer time horizon.

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

### In which economic sectors were the investments made?

Investments were made in Corporates, Supranational and Government bonds issued by emerging markets. Economic sectors related to the corporate exposure, include the financial, real estate, basic materials, oil and gas, consumer goods and services, healthcare and industrial sector.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

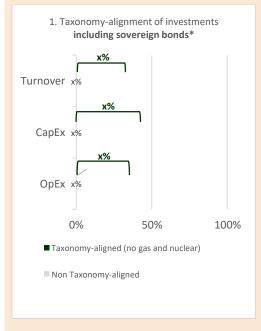

Taxonomy-aligned activities are expressed as a share of:

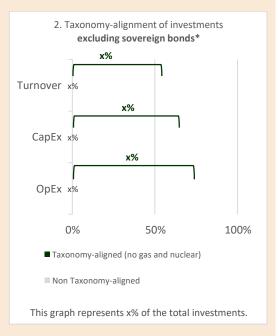

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>7</sup>?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities? The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

<sup>&</sup>lt;sup>7</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. The Sub-Fund does not make a comittment to sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments? Not applicable. The Sub-Fund does not make a comittment to sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund had 16.5% of investments in the category "#2 Other".

Investments under "Other" were investments which are not aligned with the environmental or social characteristics. The instruments in this category were FX derivatives and cash. Corporate and Sovereign exposure that could not obtain an ESG rating as described in the Supplement section "How did the sustainability indicators perform? were not considered by the Investment Manager as investments aligned with environmental and/or social characteristics promoted by the Sub-Fund. Instead, such investments formed part of the "Other" assets.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The Investment Manager applied minimum safeguards through a screening that is conducted to capture severe controversies or violations of social norms, taken into account as part of the final ESG score of an issuer. Investors should note while the Investment Manager has developed a comprehensive tool to rate securities on ESG-related metrics, there may exist instances where data was lacking, and such assessment may have been impacted.

Additionally, to the extent possible and / or where any investments in "Other" form a portion of the strategic asset allocation, the Investment Manager's proprietary ESG rating was applied to the investments making up the 'Other' section of the Sub-Fund in order to continually consider and review such investments.

Exclusions were also applied by the Investment Manager in the investment selection process based on ESG factors as described in the Prospectus.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with the pre-contractual commitments.

Further, the Investment Manager interacted actively with issuers, which included the following:

#### Direct Engagement

• The Investment Manager established and maintained dialogue with issuers on topics related to the attainment of the Fund's strategy and investment objective.

#### Indirect Engagement

• The Investment Manager engaged issuers indirectly through its active participation in industry associations or organizations on sustainability related topics that partook in dialogue with issuers. The Investment Manager is committed to being an active collaborator and thought leader, which is further demonstrated through its participation in UN Principles for Responsible Investment, the Institutional Investors Group on Climate Change and the Climate Action 100+ initiative.

Details on engagement activities are reported on an annual basis and are available in LGT Capital Partners Active Ownership Report 2022 available on www.lgtcp.com.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable. The Sub-Fund has not designated a specific index as a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics it promotes. The Benchmark used by the Sub-Fund is a main stream index and does not take account of ESG factors and is therefore not consistent with the environmental and social chracteristics promoted by the Sub-Fund.

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

### Sustainable investment objective

Did this financial product have a sustainable investment objective? Yes No It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: 56.3%\_ sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: 38.3%

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The investment objective of the Sub-Fund was to generate consistent medium term capital appreciation while positively contributing to the United Nations Sustainable Development Goals ("UN SDGs"), thus pursuing a sustainable investment objective through a combination of environmental objectives (such as climate change mitigation and pollution prevention and control) and social objectives.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The Investment Manager considers the Sub-Fund has fully met its sustainable investment objective and positively contrubed to the UN SDGs through a combination of environmental objectives (in particular climate change mitigation and pollution prevention and control) and social objectives. For further details on the performance towards these objectives, investors may refer to the section "How did the sustainability indicators perform?" and the associated sub-sections.

### How did the sustainability indicators perform?

During the reported period, the Sub-Fund achieved 94.6% underlying investments which qualified as sustainable investments. The primary binding element is a commitment of at least 25% of the assets of the Sub-Fund to be sustainable investments with an environmental objective as well as at least 25% of the assets of the Sub-Fund to be sustainable investments with a social objective.

The assessment of whether this binding element has been attained, is measured by the following sustainability indicators:

- **ESG Exclusion Policy**. The first factor contributing to whether the Sub-Fund is attaining its sustainable investment objective will be an assessment of whether the Sub-Fund has successfully and consistently executed its ESG exclusion policy. For example, the following companies are excluded from investment consideration:
  - O Companies that, to the best of the Investment Manager's knowledge, generate any revenue from inhumane weapons; and
  - O Companies that generate a significant amount of their revenue from certain industries or business activities deemed by the Investment Manager to be controversial (e.g. arms, tobacco, pornography, nuclear power production, coal).

The Investment Manager successfully and consistently executed the Sub-Fund's ESG Exclusion Policy. Enforcement of the ESG Exclusion Policy occurred through ongoing monitoring.

- **Screening based on ESG Rating.** Another factor contributing to whether the Sub-Fund will be considered to be attaining its sustainable investment objective will be an assessment of whether the Sub-Fund has successfully and consistently applied its ESG rating system in the process to identify a universe of investable issuers and in the investment monitoring process. The following are key performance indicators on ESG factors related to an issuer that are included in the ESG cockpit, which is a proprietary tool used as part of the ESG rating system discussed below, in the process to reduce the universe of investable issuers through a systematic process which relies on information from underlying issuers:
  - o greenhouse gas emissions, energy consumption, water and sanitation, natural resources and biodiversity, waste and emissions, labour conditions, health and safety, human resources, diversity, education, suppliers, community relations and product impact.

The Sub-Fund has successfully and consistently applied its ESG rating system in the process to identify a universe of investable issuers in the investment monitoring process.

• **Sustainable Investments.** The aggregate weight of all sustainable investments held by the Sub-Fund shall be calculated and used to measure the attainment by the Sub-Fund of the sustainable objective.

At the end of the reporting period 94.6% of the investments were sustainable investments. Of such investments 56.3% of the sustainable investments had an environmental objective and 38.3% had a social

objective.

Principal adverse

**impacts** are the

most significant negative impacts of

sustainability factors

social and employee matters, respect for human rights, anti-

investment

decisions on

relating to

environmental,

- United Nations Sustainable Development Goals ("UN SDGs"). Sustainable investments of the Sub-Fund target a combination of environmental and social objectives across the spectrum based on the alignment of such investments with the UN SDGs. Other than cash, Cash Equivalents and certain FDI retained specifically for liquidity management and/or hedging purposes, the Sub-Fund will only invest in assets that are sustainable investments. Thus, another factor contributing to whether the Sub-Fund is attaining its sustainable investment objective will be an assessment of whether the Sub-Fund has successfully and consistently applied its policy relating to investing in sustainable investments. The Investment Manager considers as sustainable investments only instruments which either:
  - qualify as a Green, Social or Sustainable use of proceeds ("UOP") instrument according to the principles of the International Capital Markets Associations ("ICMA") and contribute to specific UN SDGs. or
  - have a positive net contribution to UN SDGs by virtue of the issuer's net positive SDG score, based on the outputs from the ESG rating system. For the avoidance of doubt, the net positive SDG score, and therefore the level of sustainable investments, is determined on the basis of how an investment contributes, in terms of a total impact contribution (which includes an analysis of products, services and operational alignment), to an environmental or social objective.

The Investment Manager successfully and consistently applied its policy relating to UN SDGs in respect of the Sub-Fund as 94.6% made a positive contribution to such UN SDGs.

...and compared to previous periods?

Not applicable.

### How did the sustainable investments not cause significant harm to any sustainable investment objective?

To ensure that the sustainable investments did not cause significant harm to any environmental or social sustainable investment objective, a requirement for sustainable investments was the positive contribution to UN SDGs, which cover a broad set of ESG activities.

In addition, the portfolio was systematically screened for controversies across environmental and / or social issues as part of the Investment Manager's "do no significant harm" assessment in respect of issuers as well as in respect of projects that are financed through the UOP instruments. A sudden drop due to an ESG controversy will generally lead to an alert to be triggered so further assessment and action can be taken. These controversies are being systematically logged in an inhouse engagement tool and reported in the Investment Manager's Active Ownership Report where such are classified as re-active engagements.

As an additional safeguard, the applicable mandatory principal adverse impacts set out in Annex 1 of the regulatory technical standards supplementing the SFDR were used to further screen against activities that may significantly harm any of the environmental or social objectives. Investments that do not meet minimum thresholds applied by the Investment Manager for each of the mandatory PAI indicators in Annex 1 were excluded from investment consideration. Such exclusions included companies active in the fossil fuel sector or UN global compact violators.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts on sustainability factors were considered in the following manner:

- Principal adverse impact indicators were captured under the "do no significant harm" principle for sustainable investments as outlined in the Prospecus.
- Principal adverse impact indicators were assessed in the exclusion of securities as part of the ESG rating system as outlined in the Prospectus.
- Principal adverse impact indicators were reported on as outlined in the Prospectus.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager monitored breaches and controversies for new and existing investments which largely relies on the quality of data supplied by external data providers. Where the Investment Manager identified clear breaches of norms outlined in the a) OECD Guidelines for Multinational Enterprises, b) the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work, and c) the International Bill of Human Rights the Investment Manager were excluded the investee company from investment by the Sub-Fund.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following principal adverse impact indicators as part of the asset allocation process. These indicators are computed as part of the ESG rating system and impact the ESG rating. This allowes for enhanced insight in the adverse impacts caused by investee companies or issuers. Based on the performance of these indicators, the Investment Manager expects to mitigate the effects of the Sub-

Fund over a longer time horizon.

Based on the performance of these indicators, the Investment Manager expects to mitigate the effects of the Sub-Fund over a longer time horizon.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the

best performance.

### CROWN SIGMA UCITS PLC SUPPLEMENTAL INFORMATION FOR THE YEAR ENDED 30 APRIL 2023

### What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

94.6% of the portfolio was aligned with #1 Sustainable of which 56.3% had an environmental objective and 38.3% had a social objective.

The remaining portion of 5.4% was aligned with #2 Not sustainable.

#### What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#### In which economic sectors were the investments made?

Investments were made globally in government-, corporates- and supranational bonds. Economic sectors related to the corporate exposure, include the financial, energy, communications, consumer goods and services, healthcare, technology, utillities and industrial sector.

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to invest any proportion of its assets in environmentally sustainable economic activities aligned with the EU Taxonomy. Accordingly, the level of committed EU Taxonomyaligned investments were zero per cent.

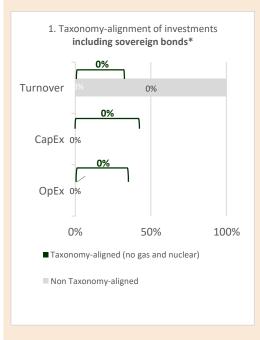

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>8</sup>?

	Yes:		
		In fossil gas	In nuclear energy
X	No		

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies
- capital
  expenditure
  (CapEx) showing
  the green
  investments
  made by investee
  companies, e.g.
  for a transition to
  a green economy.
- operational
   expenditure
   (OpEx) reflecting
   green operational
   activities of
   investee
   companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

<sup>&</sup>lt;sup>8</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The Sub-Fund did not commit to make sustainable investments with an environmental objective aligned with the EU Taxonomy. Hence, the Sub-Fund did not commit to invest in sustainable investments in transitional and enabling activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

56.3% of the investments were made to sustainable investments with an environmental objective not aligned with the EU Taxonomy.

### What was the share of socially sustainable investments?

38.3% of the investments were made to sustainable investments with a social objective.

### What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

5.4% of the investments made considered not sustainable were related to cash, cash equivalents and certain FDI. Such holdings are included for liquidity, hedging and/or cash management purposes and are considered "Not sustainable". No minimum environmental or social safeguards were in place in relation to such cash, cash equivalents and certain FDI.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Manager considers that the sustainable investment objective has been met in accordance with the pre-contractual commitments.

Further, the Investment Manager interacted actively with issuers, which included the following:

### **Direct Engagement**

• The Investment Manager established and maintained dialogue with issuers on topics related to the attainment of the Fund's strategy and investment objective.

#### **Indirect Engagement**

• The Investment Manager engaged issuers indirectly through its active participation in industry associations or organizations on sustainability related topics that partook in dialogue with issuers. The Investment Manager is committed to being an active collaborator and thought leader, which is further demonstrated through its participation in UN Principles for Responsible Investment, the Institutional Investors Group on Climate Change and the Climate Action 100+ initiative.

Details on engagement activities are reported on an annual basis and are available in LGT Capital Partners Active Ownership Report 2022 available on www.lqtcp.com.

#### Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

### How did this financial product perform compared to the reference sustainable benchmark?

Not applicable. The Sub-Fund uses the Bloomberg Global Aggregate Corporate Hedged (TR) Index (the "Performance Benchmark") for performance measurement purposes only. The Performance Benchmark is a mainstream index and does not take account of ESG factors and is therefore not consistent with the sustainable investment objective of the Sub-Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU** Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. The Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Crown Sigma UCITS plc – LGT Sustainable Equity Market Neutral Sub-Fund

Legal entity identifier: 549300OYX4FYIXN73E31

### **Environmental and/or social characteristics**

Does this financial product have a sustainable investment objective?						estment objective?
•		Yes		• •	×	No
	with	ade sustainable invental an environmental ective:%  in economic active qualify as environ sustainable under Taxonomy  in economic active do not qualify as environmentally sustainable under Taxonomy	vities that nmentally r the EU vities that r the EU		chara object prop	economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
		ade sustainable inventage a social objective:			-	omoted E/S characteristics, but <b>did not</b> e <b>any sustainable investments</b>

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with pre-contractual commitments.

The Sub-Fund promoted environmental and social characteristics, as it took into account ESG related factors in the asset selection and investment consideration and / or monitoring process in the following ways:

**ESG Exclusion Policy:** Exclusions were applied in the investment selection process based on ESG factors as a means of promoting environmental and social characteristics. For example, the following companies are excluded from investment consideration:

- Companies that, to the best of the Investment Manager's knowledge, generate any revenue from inhumane weapons; and
- Companies that generate a significant amount of their revenue from certain industries or business activities deemed by the Investment Manager to be controversial (e.g. arms, tobacco, pornography, nuclear power production, coal).

**ESG Rating:** The following are key performance indicators on ESG factors related to an investee company that are included in the ESG cockpit, which is a proprietary tool used as part of the ESG rating system discussed below, in the process to identify a universe of investable companies through a systematic process which relies on information from underlying companies (and therefore promoted as environmental and/or social characteristics by the Sub-Fund):

 greenhouse gas emissions, energy consumption, water and sanitation natural resources and biodiversity, waste and emissions, labour conditions, health and safety, human resources, diversity, education, suppliers, community relations and product impact.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted.

The Investment Manager's consideration of ESG factors, which included SDGs and climate factors, provided additional insights into both risk and value drivers, enabled optimisation of ESG in portfolio management and the asset selection process.

### How did the sustainability indicators perform?

During the reported period, the Sub-Fund achieved 95% underlying investments which promoted environmental and/or social characteristics of which 86% were considered sustainable investments. The primary binding element is a commitment of at least 50% of the assets of the Sub-Fund to underlying investments, which promote environmental and/or social characteristics.

The assessment of whether this binding element has been attained, is measured by the following sustainability indicators:

• **ESG Exclusion Policy**. The first factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently executed its ESG exclusion policy.

The Investment Manager successfully and consistently executed the Sub-Fund's ESG Exclusion Policy.

Screening based on ESG Rating. Another factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently applied its ESG rating system in the process to identify a universe of investable companies and in the investment monitoring process.

This resulted in the exclusion of any security that are in the lowest 25% of the universe as described further in the Supplement of the Prospectus under the following Section of the SFDR Annex: "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?".

The Sub-Fund has successfully and consistently executed its ESG Assessment, by ensuring no investment in the lowest 25% was held in the portfolio during the course of the year.

- **Sustainable Investments**. The aggregate weight of all sustainable investments held by the Sub-Fund shall be calculated and used to measure the attainment by the Sub-Fund of the environmental and/or social characteristics it promotes. The Sub-Fund has successfully aggregated the sustainable investments of the fund: 86%
- United Nations Sustainable Development Goals ("UN SDGs").

In terms of considering whether investments of the Sub-Fund which are eligible for selection may be categorised as sustainable investments which are aligned with SFDR, another factor contributing to whether the Sub-Fund will be considered to be attaining the environmental and/or social characteristics it promotes will be an assessment of whether the Sub-Fund has successfully and consistently applied its policy relating to investing in sustainable investments, i.e. in the context of the proportion of the Sub-Fund in sustainable investments only including investments with a positive net contribution to the UN SDGs by virtue of a net positive SDG score, based on the outputs from the ESG rating system. For the avoidance of doubt, the net positive SDG score, and therefore the level of sustainable investments, is determined on the basis of how an investment contributes, in terms of a total impact contribution (which includes an analysis of products, services and operational alignment), to an environmental or social objective.

The Investment Manager successfully and consistently applied its methodology relating to UN SDGs. Sustainable investments were fully comprised of investments meeting the prescribed UN SDG criteria and therefore 86% of the Sub-Fund had investments align with the UN SDGs.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the Sub-Fund targeted a combination of environmental and social objectives across the spectrum, as per below, based on alignment of such investments with the UN SDGs.

An investment with an environmental objective aligned with SFDR is one which is measured, for example, by key resource efficiency indicators on the use of energy, renewable energy, raw materials, water and land, on the production of waste, and greenhouse gas emissions, or on its impact on biodiversity and the circular economy.

An investment with a social objective aligned with SFDR is an investment that contributes to tackling inequality or that fosters social cohesion, social integration and labour relations, or an investment in human capital or economically or socially disadvantaged communities.

The objective of the sustainable investment was to have a net positive SDG Score.

86% of the Sub-Fund contributed to a net positive SDG Score. Highest scores were attained for a net positive contribution to UN SDG 10 (Reduced Inequalities), UN SDG 5 (Gender Equality) and UN SDG 3 (Good Health and Well-Being).

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In terms of ensuring that the sustainable investments did not cause significant harm to any environmental or social sustainable investment objective, a requirement for sustainable investments was the positive net contribution to UN SDGs, which covered a broad set of ESG activities.

In addition, the portfolio was systematically screened for controversies across environmental and / or social issues as part of LGT's "do no significant harm" assessment.

As an additional safeguard, the mandatory principal adverse impacts set out in Annex 1 of the regulatory technical standards supplementing the SFDR are used to further screen against activities that may significantly harm any of the environmental or social objectives, whereby investments that do not meet minimum thresholds applied by the Investment Manager for each of the mandatory PAI indicators in Annex 1 shall be excluded from investment consideration.

During the reporting period the sustainable investments did not cause significant harm to any environmental or social sustainable investment objective.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts on sustainability factors were considered in the following manner:

- Principal adverse impact indicators were captured under the "do no significant harm" principle for sustainable investments outlined in the SFDR Annex of the Supplement to the Prospectus section entitled "How did the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?"
- Principal adverse impacts were assessed as part of the ESG rating system.
- Principal adverse impact indicators were reported on as outlined in the SFDR Annex of the Supplement to the Prospectus section entitled "How did this financial product consider principal adverse impacts on sustainability factors?"

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the Investment Manager monitored breaches and controversies for new and existing investments which largely relies on the quality of data supplied by external data providers.

Where the Investment Manager identifies clear breaches of norms outlined in the a) OECD Guidelines for Multinational Enterprises, b) the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work, and c) the International

#### Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Bill of Human Rights the Investment Manager will seek to exclude the investee company from investment by the Sub-Fund.

During the reporting period there were no breaches of norms outlined in the abovementioned norms.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following principal adverse impact indicators in the investment management process. This is calculated with the Investment Manager's proprietary ESG rating system and is part of our overall ESG Rating. This allows for enhanced insight in the adverse impacts caused by investee companies or issuers.

Based on the performance of these indicators, the Investment Manager expects to mitigate the effects of the Sub-Fund over a longer time horizon.

	Metric	Portfolio	Portfolio	Portfolio

### What was the proportion of sustainability-related investments?

The Sub-Fund allocated 95% to investments aligned with environmental and/or social characteristics (#1). The Sub-Fund allocated 86% to sustainable investments (#1A), of which 66.7% was social sustainable investments and 19.3% was environmental sustainable investments.

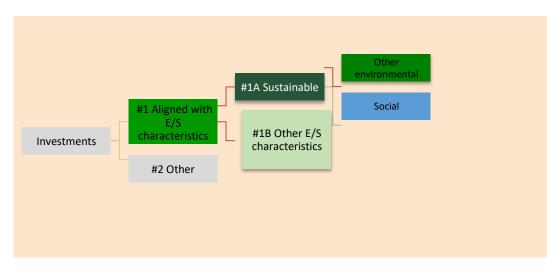

The remaining portion of 14% are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments (#2 Other).

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

#### What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

**#1 Aligned with E/S characteristics** includes the investments of the Sub-Fund used to attain the environmental or social characteristics promoted by the Sub-Fund.

**#2 Other** includes the remaining investments of the Sub-Fund which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers: -

The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Investments were made through a diversified asset allocation and a broad variety of economic sectors in accordance with Section C. of Annex A of the Prospectus in respect of the Sub-Fund.

### To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

	Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy? <sup>9</sup>
	Yes:
	In fossil gas In nuclear energy
×	No

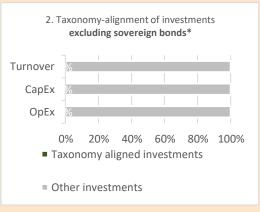

<sup>&</sup>lt;sup>9</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- expenditure
  (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. This is the first reportable period, which includes this reporting format.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 19.0%

What was the share of socially sustainable investments?

The share of socially sustainable investments was 66.7%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund made 14% of investments in "Other".

Investments under "#2 Other" were investments which were neither aligned with the environmental or social characteristics nor qualify as sustainable investments, for example:

- There may be insufficient data available to verify any classification under sustainable investments
   or investments with environmental and/or social characteristics.
- There may be exposures where an ESG assessment cannot be applied or there is lacking market practice for appropriate quantification of ESG factors.
- Exposures consisting of certain FDI, hedging, cash or cash equivalents.

The Investment Manager applied minimum safeguards through a screening that is conducted to capture severe controversies or violations of social norms, taken into account as part of the final ESG score of an investee company of the Sub-Fund. Investors should note that, while the Investment Manager has developed a comprehensive tool to rate securities on ESG-related metrics, there may exist instances where data is lacking, and such assessment may be impacted on this basis.

Exclusions are also applied by the Investment Manager in the investment selection process based on ESG factors.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with the pre-contractual commitments.

The Investment Manager conducted the following engagements:

• **Engagement with direct investments:** As an active direct investor in equities, the Investment Manager are in continuous dialogue with companies. It is a two-way dialogue that allows the Investment Manager to express its expectations as a sustainable investor, while also providing companies with the opportunity to offer further clarification and insight into their ESG practices and aspirations.

Some of the most frequent topics of engagement included climate change, pollution and health and safety.

#### Industry engagement

We work together with international partners, networks and initiatives to raise awareness for ESG issues and enhance analytical tools.

In respect of additional actions taken to meet the environmental and / or social characteristics during the reference period, the Investment Manager continued alignment of the Sub-Fund's carbon footprint in line with the Net Zero Emissions by 2050 budget. This alignment included carbon budgets for each security,

Investors should note, the Sub-Fund does not target a climate transition objective as specified under EU 2019/2088, nor does it explicitly promote such investment objective or characteristic, however, the Investment Manager applies general principles and tools of carbon budgeting to assess alignment with international targets, such as the Net Zero Emissions by 2050 for comparative and performance management purposes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a specific index as a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics that it promotes.

The Benchmark used by the Sub-Fund is a mainstream index and does not take account of ESG factors and is therefore not consistent with the environmental and social characteristics promoted by the Sub-Fund.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. The Regulation does not lay down a list of socially sustainable economic activities.

Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Crown Sigma UCITS plc - LGT EM HC Bond Sub-Fund

Does this financial product have a sustainable investment objective?

Legal entity identifier: 549300SA5QV5V3F7L659

### **Environmental and/or social characteristics**

Yes	• No
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	characteristics and while it did not have as it objective a sustainable investment, it had a minimum proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with pre-contractual commitments.

The Sub-Fund promoted environmental and social characteristics, as it took into account ESG related factors in the asset selection and investment consideration and / or monitoring process in the following ways:

The Investment Manager conducted an assessment of ESG factors, in the process to identify a universe of investable issuers through a systematic process which relies on information from underlying issuers (the "Country Selection Model"), resulting in a specific country classification (the "ESG Rating"). Environmental and/or social characteristics considered as part of the ESG Rating (and therefore promoted as environmental and/or social characteristics by the Sub-Fund) included:

- Green energy, emissions, natural resources, education, health, standards of living, civil liberties, gender equality, institutional strength, corruption, democracy, political stability.
- Environmental and/or social characteristics are further enriched with economic development inputs, such as economic growth and economic stability, on the basis that such characteristics are often intrinsically linked with the long-term ESG direction of Emerging Markets.

The above characteristics were assessed on a backward-looking basis using systematic data and enriched on an ongoing basis with forward-looking dissemination of in-house research, political assessments and research meetings.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics.

### How did the sustainability indicators perform?

- **Integration of ESG.** The Investment Manager considers the Sub-Fund has successfully and consistently integrated ESG in the investment process in the following manner:
  - o The ESG Rating as part of the Sub-Fund's Country Selection Model was successfully and consistently applied.
    - In the Country Selection Model, quantitative and qualitative data was used. A greater weight was given to the long-term development of countries, which was consequently reflected in the ESG Rating the Investment Manager applied to countries. The Sub-Fund did not make any invests into F rated countries or currencies and avoided government bonds of C rated countries.
  - The Investment Manager successfully and consistently applied the Sub-Fund's ESG exclusion policy.
  - o At the end of the reporting period 98.6% (incl. collaterals) of the investments were aligned with environmental and social characteristics.

### ...and compared to previous periods?

Not applicable.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following principal adverse impact indicators as part of the asset allocation process. These indicators are computed as part of the ESG rating system. This allows for enhanced insight in the adverse impacts caused by issuers.

Based on the performance of these indicators, the Investment Manager expects to mitigate the effects of the Sub-Fund over a longer time horizon.

#### Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Indicators applicable to investments in sovereigns and supranationals				
		Portfolio	Portfolio	Portfolio
Indicator	Metric	exposure	coverage	eligibility
GHG intensity (country's Scope 1, 2 and 3 GHG emissions per million GDP)	GHG intensity (country's Scope 1, 2 and 3 GHG emissions per million GDP)	1138.71	97.79%	97.79%
Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	1, 0.46%	97.79%	97.79%

### What were the top investments of this financial product?

The top investments as of the end of the financial year were as follows:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

1.5.2022-30.4.2023

Largest investments	Sector	% Assets	Country
MONGOLIA 8.65% 23-19.01.28	Government bonds	MON	2.6

SENEGAL 4.75% 13.03.28/POOL REGS	Government bonds	SEN	1.4

#### What was the proportion of sustainability-related investments?

98.6% of the portfolio promoted environmental and social characteristics (incl. collaterals).

#### What was the asset allocation?

The sub-fund allocated 98.6% to investments aligned with environmental and/or social characteristics.

The remaining portion of 1.4% was not aligned with the environmental or social characteristics ("Other"). It consisted solely of the investments described under "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

#### **Asset allocation** describes the share of investments in

specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

#### **Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional

#### activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the Sub-Fund used to attain the environmental or social characteristics promoted by the Sub-Fund.

#2 Other includes the remaining investments of the Sub-Fund which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Investments were made in government bonds. FX and interest rate derivatives were used for risk management purposes.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

 Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?<sup>10</sup>

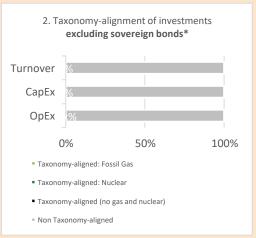

Yes:		
In	fossil gas	In nuclear energy
No		

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

 $<sup>^{10}</sup>$  Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of investments made in transitional and enabling activities?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. This is the first reportable period, which includes this reporting format.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

#### What was the share of socially sustainable investments?

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments under "Other" were investments which are not aligned with the environmental or social characteristics. The instruments in this category were FX derivatives and options. The Sub-Fund does not use derivatives specifically for the purpose of attaining the environmental and or social characteristics it promotes. Rather, the Sub-Fund may use derivatives for ordinary purposes, that is, for investment purposes, hedging and/or for efficient portfolio management purposes.

A screening was conducted to capture countries subject to comprehensive sanctions, per the Investment Manager's policy, which was taken into account as part of the final ESG Rating of an applicable country. Therefore, in line with the exclusion policy, the Sub-Fund did not invest into countries rated as F, based on Country Selection Model or currencies (FX derivatives or options) of these countries.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with the pre-contractual commitments.

Further, the Investment Manager interacted actively with issuers, which included the following:

#### Direct Engagement

• The Investment Manager established and maintained dialogue with issuers on topics related to the attainment of the Fund's strategy and investment objective. This included on-the-ground research visits to meet the country representatives.

#### Indirect Engagement

The Investment Manager engaged issuers indirectly through its active participation in industry
associations or organizations on sustainability related topics that partook in dialogue with
issuers. The Investment Manager is committed to being an active collaborator and thought
leader, which is further demonstrated through its participation in UN Principles for Responsible

Investment, the Institutional Investors Group on Climate Change and the Climate Action 100+ initiative.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a specific index as a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics that it promotes.

#### Where can I find more product specific information online?

You may find more information on <a href="www.fundinfo.com">www.fundinfo.com</a> and the Investment Manager's website: <a href="www.lgtcp.com/en/regulatory-information">www.lgtcp.com/en/regulatory-information</a> .

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Crown Sigma UCITS plc - LGT EM Frontier LC Bond Sub-Fund

Legal entity identifier: 549300WBW2FCTXCREH23

### **Environmental and/or social characteristics**

Does this financial product have a sustainable investment objective? Yes × No It made sustainable investments It promoted Environmental/Social (E/S) characteristics and while it did not have as its with an environmental objective a sustainable investment, it had a objective: \_\_\_% minimum proportion of \_\_% of sustainable in economic activities that investments qualify as environmentally with an environmental objective in sustainable under the EU economic activities that qualify as Taxonomy environmentally sustainable under in economic activities that the EU Taxonomy do not qualify as with an environmental objective in environmentally economic activities that do not sustainable under the EU qualify as environmentally Taxonomy sustainable under the EU Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: \_\_\_\_%

The **EU** Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. The Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with pre-contractual commitments.

The Sub-Fund promoted environmental and social characteristics, as it took into account ESG related factors in the asset selection and investment consideration and / or monitoring process in the following ways:

The Investment Manager conducted an assessment of ESG factors, in the process to identify a universe of investable issuers through a systematic process which relies on information from underlying issuers (the "Country Selection Model"), resulting in a specific country classification (the "ESG Rating"). Environmental and/or social characteristics considered as part of the ESG Rating (and therefore promoted as environmental and/or social characteristics by the Sub-Fund) included:

- Green energy, emissions, natural resources, education, health, standards of living, civil liberties, gender equality, institutional strength, corruption, democracy, political stability.
- Environmental and/or social characteristics are further enriched with economic development inputs, such as economic growth and economic stability, on the basis that such characteristics are often intrinsically linked with the long-term ESG direction of Emerging Markets.

The above characteristics were assessed on a backward-looking basis using systematic data and enriched on an ongoing basis with forward-looking dissemination of in-house research, political assessments and research meetings.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics.

#### How did the sustainability indicators perform?

- **Integration of ESG.** The Investment Manager considers the Sub-Fund has successfully and consistently integrated ESG in the investment process in the following manner:
  - o The ESG Rating as part of the Sub-Fund's Country Selection Model was successfully and consistently applied.
    - In the Country Selection Model, quantitative and qualitative data was used. A greater weight was given to the long-term development of countries, which was consequently reflected in the ESG Rating the Investment Manager applied to countries. The Sub-Fund did not make any invests into F rated countries or currencies and avoided government bonds of C rated countries.
  - o The Investment Manager successfully and consistently applied the Sub-Fund's ESG exclusion policy.
  - o At the end of the reporting period 85.3% (incl. collaterals) of the investments were aligned with environmental and social characteristics.

#### ...and compared to previous periods?

Not applicable.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following principal adverse impact indicators as part of the asset allocation process. These indicators are computed as part of the ESG rating system. This allows for enhanced insight in the adverse impacts caused by issuers.

Based on the performance of these indicators, the Investment Manager expects to mitigate the effects of the Sub-Fund over a longer time horizon.

#### What was the proportion of sustainability-related investments?

85.3% of the portfolio promoted environmental and social characteristics (incl. collaterals).

## Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive

safety and waste management rules.

# Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

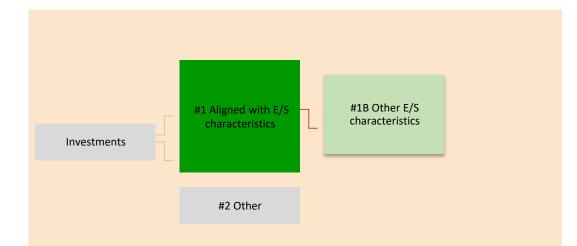

## Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#### What was the asset allocation?

The sub-fund allocated 85.3% to investments aligned with environmental and/or social characteristics.

The remaining portion of 14.7% was not aligned with the environmental or social characteristics ("Other"). It consisted solely of the investments described under "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

**#1 Aligned with E/S characteristics** includes the investments of the Sub-Fund used to attain the environmental or social characteristics promoted by the Sub-Fund.

**#2 Other** includes the remaining investments of the Sub-Fund which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Investments were made in government bonds, bonds issued by AAA-rated supranational issuers and development banks and FX derivatives.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

- Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?<sup>11</sup>
- Yes:

  In fossil gas

  In nuclear energy

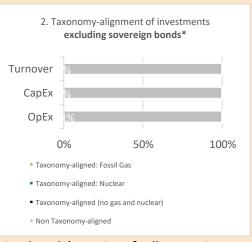

No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital
  expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g.
  for a transition to
  a green economy.
- operational
  expenditure
  (OpEx) reflecting
  green operational
  activities of
  investee
  companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The Sub-Fund did not invest in environmentally sustainable economic activities aligned with the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. This is the first reportable period, which includes this reporting format.

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

Not applicable. The Sub-Fund did not make a commitment to sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments under "Other" were investments which are not aligned with the environmental or social characteristics. The instruments in this category were FX derivatives and options. The Sub-Fund does not use derivatives specifically for the purpose of attaining the environmental and or social characteristics it promotes. Rather, the Sub-Fund may use derivatives for ordinary purposes, that is, for investment purposes, hedging and/or for efficient portfolio management purposes.

A screening was conducted to capture countries subject to comprehensive sanctions, per the Investment Manager's policy, which was taken into account as part of the final ESG Rating of an applicable country. Therefore, in line with the exclusion policy, the Sub-Fund did not invest into countries rated as F, based on Country Selection Model or currencies (FX derivatives or options) of these countries.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager considers that the environmental and/or social characteristics have been met in accordance with the pre-contractual commitments.

Further, the Investment Manager interacted actively with issuers, which included the following:

#### Direct Engagement

• The Investment Manager established and maintained dialogue with issuers on topics related to the attainment of the Fund's strategy and investment objective. This included on-the-ground research visits to meet the country representatives.

#### Indirect Engagement

The Investment Manager engaged issuers indirectly through its active participation in industry associations or organizations on sustainability related topics that partook in dialogue with issuers. The Investment Manager is committed to being an active collaborator and thought

Reference benchmarks

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

leader, which is further demonstrated through its participation in UN Principles for Responsible Investment, the Institutional Investors Group on Climate Change and the Climate Action 100+ initiative.

#### How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a specific index as a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics that it promotes.

#### Where can I find more product specific information online?

You may find more information on <a href="www.fundinfo.com">www.fundinfo.com</a> and the Investment Manager's website: <a href="www.lgtcp.com/en/regulatory-information">www.lgtcp.com/en/regulatory-information</a>.
