What is this product?

Type

The Sub-Fund is part of the Fund LO Gateway, a public liability company (société anonyme) incorporated under the laws of the Grand Duchy of Luxembourg as an investment company with variable share capital. The Fund is subject to the Luxembourg law of 13 February 2007 relating to specialized investment funds ("SIF") and qualifies as an alternative investment fund ("AIF").

Term

The Sub-Fund has no maturity date. The PRIIP manufacturer is entitled to terminate the Sub-Fund unilaterally under the circumstances provided for in the constitutive documents of the Fund. A liquidation of the Fund will cause the automatic termination of the Sub-Fund.

Objectives

The Sub-Fund seeks to achieve long-term capital appreciation by investing either directly or through units of UCITS or UCIs in a diversified portfolio consisting of:

- (i) equity and equity equivalent securities;
- (ii) fixed-rate and floating rate debt securities including non-investment grade bonds, convertible bonds, bonds with attached warrants;
- (iii) financial derivative instruments and OTC derivatives exposed to any of the above investments as well as to commodities via eligible indices;
- (iv) currencies (including emerging market currencies);
- (v) in accordance with the applicable diversification rules, in Cash and Cash Equivalents (including short-term ABS/MBS).

The Sub-Fund may also invest in UCIs implementing alternative investment strategies and may be fully invested in emerging markets.

This Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Sustainability

This product is not a financial product subject to Article 8 or Article 9 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial sector (the "SFDR"). The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

The summary risk indicator is a guide to the level of risk of this product

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Other relevant risks: Credit risk, Emerging market risk and Financial, economic, regulatory and political risks.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. Markets could develop very differently in the future. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of a suitable benchmark over the last 10 years. These types of scenario occurred for an investment between 31.12.2013 and 31.12.2023. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 5 years

Example investment USD 125 000

Scenarios		If you cash in after 1 year	If you cash in after 5 years (recommended)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

What happens if Lombard Odier Funds (Europe) S.A. is unable to pay out?

The Fund's ability to pay out would not be affected by the insolvency of the manufacturer. You may however face a financial loss should the Depositary default on its obligations. Such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- the product performs as shown in the moderate scenario
- USD 125 000 is invested

Investment USD 125 000	If you cash in after 1 year	If you cash in after 5 years (recommended)
Total costs	USD 1 279	USD 6 806
Annual cost impact*	1.02%	1.02%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.12% before costs and 3.10% after costs. Part of the costs can be paid to the distributor who distributes the product for the services they provide. They will inform you of the amount.

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and what the different cost categories mean.
