Activity report for the period: 1 January 2023 - 31 December 2023

Investment objectives and investment policy to achieve the objectives:

The investment concept of the Lupus alpha Volatility Risk-Premium fund is based on an intelligent option strategy. The strategy's base investment consists of short-dated EUR-covered bonds with very high credit ratings and time deposits. This basic structure is enhanced with an overlay option strategy, which is implemented simultaneously on various international stock markets.

Premiums are earned from the regular sale of index options with a short remaining term.

The Lupus alpha Volatility Risk-Premium fund's return driver is the spread between implied and actual volatility (volatility Risk-Premium).

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities (under Article 7 of Regulation (EU) 2020/852 of the European Parliament and Council).

The main sources of income from disposals during the reporting period were gains on options and futures.

Portfolio structure and significant changes during the reporting period: Structure of the fund:

	31 December 2023	% quota	31 December 2022	% quota
Fixed interest securities	92,974,127.42	97.91	37,738,392.22	97.04
Futures	571,136.41	0.60	-85,264.39	-0.21
Options	-54,929.56	-0.06	-730,688.83	-1.87
Cash at banks, money market instruments and money market funds	2,136,700.90	2.25	1,776,432.76	4.57
Other assets	-1,101,134.33	-1.15	-102,099.96	-0.26
Fund assets	94,961,864.86	100.00	38,878,945.72	100.00

Fund earnings:

The 2022 financial year closed at 30 December 2022 with 20.89% implied volatility for the Eurostoxx50 (V2X Index). By the end of 2023, this had fallen slightly to 13.57%. Implied volatility for the S&P 500 (VIX index) was 21.67% at end 2022 and 12.45% at end 2023.

Class C of the Fund closed the 2023 financial year up 11.72%. Fund Class C volatility over the financial year was 3.37%.

Class R of the Fund closed the 2023 financial year up 10.92%. Fund Class R volatility over the financial year was 3.59%.

Significant risks:

The main types of risk assumed by the fund during the reporting period were as follows:

- Market price risk: Fund unit volatility over the financial year was 3.37%. This was well below major equity index (Eurostoxx50 and S&P 500) levels that showed historic volatility of 33.85% and 12.84% for the S&P 500.
- Default risk: The fund's underlying portfolio invested primarily in short-dated, EUR-denominated covered bonds with high credit ratings and liquidity. The focus was on German mortgage bonds (Pfandbriefe). By trading exclusively in exchange-traded derivatives, the risk of default is virtually eliminated.
- Interest rate risk: As the underlying investment consisted only of short-term EUR bonds with a maximum maturity of four years as well as time deposits, the interest rate risk was low. The fund's overall duration was generally kept between 0.5 and 1.6.
- Liquidity risk: The fund invested mainly in covered bonds with a minimum issue volume of EUR 500 million. Sales via the bond market were possible at any time. Traded derivatives were exclusively listed on the stock exchange. The liquidity risk was therefore low.
- Currency risk: The fund may only hold bonds denominated in euros. There is therefore only a small currency risk from the use of derivatives.
- Operational risk: In principle, the fund is exposed to operational risk in the management company's processes, but did not report any increased operational risk during the reporting period.

Other significant risks for investors

At 24:00 on 30 December 2022 Lupus alpha Volatility Invest merged with Lupus alpha Volatility Risk-Premium C of the Lupus alpha Volatility Risk-Premium Fund.

Information on the asset valuation method

Additional information pursuant to § 16 (1) (2) of the KARBV - Information about the valuation method

Valuation is done by the management company. The management company generally relies on external sources for this purpose.

If no trading prices are available, valuation models are used to determine prices (derived fair values) that are agreed between the custodian and the management company and are based as far as possible on market parameters. This procedure is subject to a permanent control process. Price information from third parties is checked for plausibility by other price sources, model invoices or by other appropriate procedures.

For assets admitted to trading on an exchange or admitted to or included in another organised market, as required under §27 KARBV, the last available trading price is used ensure the valuation is reliable. For assets that are neither admitted to trading on exchanges nor admitted to or included in another organised market, or for which no trading price is available, as required under §28 KARBV taken together with §168(3) KAGB, market values are used, based on careful assessment that involves appropriate valuation models and takes current market conditions into account. The underlying fair value may also be determined and communicated by an issuer, counterparty or other third party. In this case, this value is checked for plausibility by the management company or the custodian and this plausibility check is documented. Units in domestic investment funds, EC investment units and foreign Units in investment funds are valued at their most recent available redemption price or at a current price, as required under §27(1) KARBV. If no current price is available, the value of the units is determined in accordance with § 28 KARBV; reference is made to this in the annual report. Bank deposits are valued at their nominal value plus accrued interest. Fixed-term deposits are measured at fair value. Liabilities are recognised at their repayment amount.

Information on transparency and the total expense ratio

The total expense ratio expresses all charges and payments borne by the fund during the year, (excluding transaction charges) in relation to the average net asset value of the fund; it must be shown as a percentage.

0.85 Unit class C
2.19 Unit class R

Performance-related fee as a percentage of average net asset value

0.48 Unit class C
0.00 Unit class R

The management company does not receive any rebates on fees and expense reimbursements paid from the fund to the custodian or any third parties.

The management company does not grant any broker trail commissions to intermediaries to a significant extent from the fees paid to it by the fund.

Significant other income and other expenditure

no significant other income and other expenditure

Transaction charges (total of incidental acquisition charges plus selling charges)

211,967.32 EUR

Information pursuant to Regulation (EU) 2015/2365 on securities financing transactions

During the reporting period, the fund was not invested in any securities financing transactions pursuant to Regulation (EU) 2015/2365, which is why no disclosure is made below regarding this type of transaction.

Other information required for understanding the report
Explanation of net change in unrealised gains and losses:

The net change in unrealised gains and losses is determined by comparing the values of the assets included in the unit price with their respective historical cost in each fiscal year, the amount of positive differences is included in total unrealised gains, the amount of negative differences is included in total unrealised losses, and net changes are determined by comparing the totals at the end of the fiscal year with the totals at the beginning of the fiscal year.

Information on staff remuneration

Lupus alpha Group remuneration policy

Management company's remuneration system

Lupus alpha Investment GmbH is a subsidiary of Lupus alpha Asset Management AG. Lupus alpha (which means "the leader of the pack") is an owner-managed, independent asset management group that offers specialist investment products to institutional and private investors. We focus on a small number of attractive asset classes for which special expertise is required and in which we may realise sustainable added value for our customers. Our focus is on

European second-tier stocks as well as alternative solutions. As a specialist provider, we systematically open up new sources of alpha for institutional investors through specialist, innovative strategies and open up avenues for broader and deeper diversification of their overall portfolios.

Lupus alpha's partnership-based corporate structure creates the conditions for the highest possible level of staff continuity at management level. Together with its role as a specialist provider and the focus of its own investments on liquidity investments, limitation to the usual risks of a medium-sized asset manager is guaranteed.

Performance-related and entrepreneurial-oriented remuneration for employees is a central component for the design of Lupus alpha's remuneration system. By adopting a holistic remuneration concept, management intends to support the medium to long-term corporate goals defined as part of the strategy development process and to avoid incentives to take disproportionately high risks. All requirements arising from the decree concerning the Supervisory Requirements for Institutions' Remuneration Systems (InstitutsVergV), § 13 and 22 of Directive 2011/61/EU of the European Parliament and of the Council of 8 June 2011 on Alternative Investment Fund Managers (AIFM Directive), the guidelines for sound remuneration policies taking account of the AIFMD (German translation of the ESMA Guidelines) and Annex II Remuneration Policy of the AIFM Directive, are complied with in this regard.

Results of the annual review of the remuneration policy

Lupus alpha regularly reviews the appropriateness of the remuneration concept with the involvement of compliance and makes adjustments if necessary. The remuneration policy and its application are also subject to review by the internal audit department and monitoring by the Supervisory Board. There were no complaints.

Significant changes to the established remuneration policy

There were no significant changes to the remuneration system in the reporting period.

Total amount of employee compensation paid to the management company in 2022: EUR 6.6 million,

of which fixed remuneration 59.24%

of which variable remuneration 40.76%

Remuneration paid directly out of the fund in EUR million 0.00

Total employees incl. management 90

Total remuneration paid by the management company to risk takers in the financial year just ended: EUR 2.33 million,

of which indirectly via cost allocation by the parent company to senior management: EUR 2.33 million

Information on non-financial performance indicators

Conventional products under Article 6 of Directive (EU) 2019/2088 (Disclosure Regulation)

The most important principal adverse impacts (PAIs) on sustainability factors are taken into account in the investment process at the company level. As there is no binding requirement to consider PAIs on the fund level, this has not been done.

This fund has not been classified either as a product promoting environmental or social characteristics within the meaning of the Disclosure Regulation (article 8) or as a product that has sustainable investment as its objective (article 9). The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Report of the independent auditor

To Lupus alpha Investment GmbH, Frankfurt am Main

Audit opinion

We have audited the annual report of the Lupus alpha Volatility Risk-Premium fund – consisting of the activity report for the fiscal year from 1 January 2023 to 31 December 2023, the statement of assets and the statement of net assets as of 31 December 2023, the profit and loss account, the statement of appropriation of income, the statement of changes in fund assets for the fiscal year from 1 January 2023 to 31 December 2023, as well as the comparative three-year overview, the statement of transactions completed during the reporting period not included in the statement of net assets, and the notes.

In our opinion, based on our audit, the accompanying annual report complies, in all material respects, with the provisions of the German Investment Code (Kapitalanlagegesetzbuch – KAGB) and the relevant European regulations, and presents a comprehensive and true picture of the position and developments of the investment fund in compliance with these provisions.

Basis for the audit opinion

We conducted our audit of the annual report in accordance with § 102 KAGB, considering German generally accepted auditing standards determined by the *Institut der Wirtschaftsprüfer* [Institute of Public Auditors in Germany] (IDW). Our responsibility under these provisions and standards is described in more detail in the section “Responsibility of the auditor for the audit of the annual report” of our report. We are independent of Lupus alpha Investment GmbH in accordance with German commercial law and the professional rules and regulations, and have fulfilled our other German professional duties in accordance with these requirements. We believe that the audit evidence we have obtained is suitable and sufficient to serve as a basis for our audit opinion of the annual report.

Responsibility of the legal representatives for the annual report

The legal representatives of Lupus alpha Investment GmbH are responsible for preparing the annual report, which is compliant in all regards with the provisions of the KAGB and the relevant European regulations, as well as for ensuring that the annual report presents a comprehensive and true picture of the position and developments of the investment fund, in compliance with these provisions. Furthermore, the legal representatives are responsible for the internal controls they have deemed necessary under these provisions in order to ensure that the annual report is free of material misstatement, whether due to fraud or error (i.e. fraudulent financial reporting and misappropriation).

In preparing the annual report, the legal representatives are responsible for including in the report such events, decisions and factors that may materially affect the future growth of the investment fund. This means that in preparing the annual report, the legal representatives must assess Lupus alpha Investment GmbH’s operation of the investment fund as a going concern and are responsible for disclosing facts concerning the continuation of the investment fund, if applicable.

Responsibility of the auditor for the audit of the annual report

Our aim is to obtain reasonable assurance that the annual report as a whole is free of material misstatement, whether due to fraud or error, and to issue a report containing our audit opinion on the annual report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted pursuant to § 102 KAGB, in accordance with German Generally Accepted Standards for Financial Statement Audits issue by the Institut der Wirtschaftsprüfer (IDW) will always detect a material misstatement. Misstatements may be due to fraud or error and are considered material when it may reasonably be expected that these, individually or as a whole, could influence economic decisions of users made on the basis of this annual report.

During the audit, we exercise professional judgement and adopt a critical stance. In addition:

- We identify and assess the risk of material misstatements in the annual report due to fraud or error, plan and carry out audit procedures in response to these risks, and obtain sufficient and appropriate audit evidence to provide a basis for our audit opinion. The risk that material misstatements due to fraud will not be detected is higher than the risk that material misstatements due to error will not be detected, as fraud may involve collusion, forgery, intentional omissions, misleading representations, or bypassing of internal controls.
- We obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the fund's internal controls.
- We assess the appropriateness of the account methods used by the legal representatives of Lupus alpha Investment GmbH in preparing the annual report and the justifiability of the estimated values presented by the legal representatives and related information.
- On the basis of the audit evidence obtained, we reach a conclusion as to whether a material uncertainty exists in connection with events or circumstances that could raise serious doubt about Lupus alpha Investment GmbH's operation of the investment fund as a going concern. If we conclude that a material uncertainty exists, we are obliged to draw attention in our report to the relevant information in the annual report or, if such information is inadequate, to amend our audit opinion. We draw our conclusion on the basis of the audit evidence obtained up until the date of our report. However, future events or circumstances may result in Lupus alpha Investment GmbH's discontinuation of the investment fund.
- We assess the overall presentation, structure and content of the annual report, including figures and whether the annual report presents the underlying transactions and events in such a way that the annual report, in compliance with KAGB and the relevant European regulations, presents a picture of the fund's actual circumstances and performances.

Among other things, we discuss the planned scope and time frame of the audit with those responsible for governance, as well as significant findings including any deficiencies in the internal control system identified during our audit.
