Lyxor Dow Jones Industrial Average UCITS ETF - Dist (the "Fund")

ISIN: FR0007056841 - Collective investment scheme domiciled in France (FCP)

Managed by Lyxor International Asset Management S.A.S. ("LIAM")

Investment objectives and policies

The fund is a passively managed index-linked UCITS.

The objective of the Fund is to replicate, both upwards and downwards, the performance of the DOW JONES INDUSTRIAL AVERAGE Net Total Return (net dividends reinvested) (the "Benchmark Index"), denominated in dollars (USD), which represents the 30 leading companies in the United States from different sectors except transport and utilities, while minimising the tracking error between the Fund's performance and that of the Benchmark Index as much as possible.

The anticipated level of tracking error under normal market conditions is indicated in the Fund's prospectus.

Further information about the benchmark index can be found on <https://us.spindices.com/>.

The Fund aims to achieve its objective via indirect replication, i.e. by entering into one or more over-the-counter swaps (financial derivative instruments, "FDIs").

The Fund may invest in a diversified portfolio of international equities, whose performance will be swapped for the performance of the Benchmark Index using FDIs.

The updated composition of the portfolio of securities held by the Fund is available at www.lyxoretf.com.

Its net asset value can also be found on the Fund's Reuters and Bloomberg pages and may also be indicated on the websites of the stock markets where the Fund is listed.

The unit currency is the euro (EUR).

Risk and return profile

The risk and return category given above is based on the historical performance of the Fund's component assets or the performance of its benchmark index or the simulated performance of a portfolio model. As such, this risk estimation cannot be a reliable indicator of future risk, and it could change over time. The lowest category does not mean a risk-free investment. The Fund has been classified in category 6. The Fund has been classified as category 6 given its exposure to the Benchmark Index. Category 6 indicates that it is possible to suffer a very large capital loss, under normal market conditions, as the value of your investment could fluctuate strongly and quite quickly both upward and downward each day.
