Lyxor Flexible Allocation Class B (GBP) A Sub-Fund of the SICAV LYXOR INVESTMENT FUNDS

ISIN code: (A) LU1009070381

Managed by Amundi Asset Management, a subsidiary of Amundi Group

Objectives and Investment Policy

This Fund is an active UCITS.

The Fund's investment objective is to provide a net capital appreciation (taking into account all fees and expenses attributable to the Fund) above the Euro Short-Term Rate (the "STR") or the equivalent money market rate in the relevant currency of the Class of Shares (the "Benchmark Index"), over a 3 to 5 years horizon with an annual volatility target level of 8%. The Fund has a flexible investment approach to generate performance in most market environments. It will invest in a diversified portfolio of liquid instruments.

In order to hedge the GBP currency risk, the Sub-Fund uses a daily hedging strategy which aims at reducing the impact of a change in the share class currency against the currency of the Benchmark index constituents.

The share currency is the British Pound (GBP).

Dividend Policy : the accumulation share automatically retains, and re-invests, all attributable income within the Sub-Fund; thereby accumulating value in the price of the accumulation shares.

The minimum recommended holding term is 5 years.

Shares may be sold or redeemed (and/or converted) on any dealing day (except otherwise stated in the prospectus) at the respective dealing price (net asset value) in accordance with the articles of incorporation. Further details are provided in the prospectus of the UCITS.

Risk and Reward Profile

The risk level of this Sub-Fund reflects the risk of its allocation, which is exposed to the bond market and the equity market in roughly equal proportions.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your initial investment does not benefit from any guarantee or protection.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.

- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Risk of Financial derivative Instruments: the Sub-Fund invest in financial derivative instruments. These financial derivative instruments can induce different types of risks such as (but not limited to) leverage risk, high volatility risk, valuation risk or liquidity risk. If this risk occurs, the net asset value of the Sub-Fund may decrease significantly.
- Hedging risk : The currency hedging may be imperfect and generate a difference between the performance of the Index and the share you are invested in.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.

Charges

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
