Risk and reward profile

This indicator relies on historic data and cannot be used for a prediction of future developments. The categorisation of the sub-fund may change in the future and is not a guarantee. Even a fund in category 1 is not an entirely risk-free investment.

The sub-fund has been placed in category 6 because its share value fluctuates strongly and therefore the chance of profit but also the risk of loss can be high.

It may be that due to the calculation model not all risks are accounted for when placing the sub-fund in a risk category. An extensive description of the risks is included in the section "Risks of Investment" in the prospectus. The following risks have no direct bearing on the categorisation but may nevertheless be of relevance to the sub-fund:

- Credit risks: The sub-fund may invest a part of its assets in debt securities issued by governments or companies. The issuers of these debt securities may become insolvent which may result in the partial or full loss of the value of their debt securities.
- Risks from the use of derivatives: The sub-fund may use derivatives for the purposes described above under "Objectives and Investment Policy". This does result in both increased opportunities and increased risk of loss. The use of derivatives to hedge against losses may also reduce the profit opportunities of the sub-fund.
- Custody risks: The custody of assets, particularly abroad, may involve a risk of loss arising from the possibility that the custodian or sub-custodian becomes insolvent, breach duties of due care or engages in abusive conduct.
- Operational risks: The sub-fund may become a victim of fraud or other criminal actions. It may also suffer losses caused by misunderstandings or mistakes of employees of the management company or third parties or it may suffer damages caused by external occurrences such as natural disasters.
