Mercer Diversified Growth Fund (the "Fund")

Share Class A18-H-0.6200-EUR (IE00BJXBM176) (the "Share Class")

The Fund is a sub-fund of **MGI Funds plc** and is managed by Mercer Global Investments Management Limited

OBJECTIVE AND INVESTMENT POLICY

The investment objective of the Fund is to seek long-term growth of capital and income.

The Fund will seek to achieve its investment objective primarily by holding a range of Underlying Funds which in turn invest in assets including shares, equity interests, fixed and floating rate bonds issued by government and other corporate entities and indices on which commodities such as energy, agricultural and industrial products and precious metals are traded. The Fund can invest up to 100% of its assets in other collective investment schemes which fall within the categories specified by the Central Bank as permissible investments for UCITS ('Underlying Funds') which are consistent with the Fund's investment objectives and restrictions, but no more than 20% may be invested in any one Underlying Fund. Additionally, when it is determined to be the best approach, the Fund may also invest in such assets directly.

The Fund seeks to promote environmental characteristics within the meaning of Article 8 of the SFDR, namely, to seek to mitigate the impact of climate change through progressive decarbonisation within the Fund's portfolio. The Investment Manager relies on specific analyses to assess the Fund's current and future potential alignment to the decarbonisation expectations. Climate scenario research and modelling is used to assess the future impact of certain climate change scenarios, and forward-looking portfolio analytics and bottom-up assessment of holdings are used to examine the impact of any proposed investment decisions on the carbon exposure of the Fund.

In order to measure its decarbonisation strategy, the Fund uses a proprietary tool which scores securities based on metrics such as carbon emissions intensity, absolute carbon emissions, fossil fuel reserves, power generation carbon intensity, transportation carbon score, transition commitment and capacity, warming potential and green revenues. In addition, the Fund will have

exposure to sustainable investments either directly or through investment in Underlying Funds.

The Fund is actively managed and will seek to outperform cash by 3.0% - 4.0%, gross of the fees of the Manager, the Investment Manager and the Distributor, but net of all other fees and expenses, on average per annum over the medium to long term. For the purposes of the calculation of outperformance of cash, an appropriate rate has been used as detailed in the past performance section. The Fund is in no way constrained by any benchmark and there is no guarantee the Fund will outperform cash.

Underlying Funds can include other sub-funds of MGI Funds plc. The Fund may invest up to 20% of its assets in real estate investment trusts, up to 35% of its assets in Underlying Funds which invest in emerging markets securities, and up to 10% of its assets in equity securities listed or traded on Russian exchanges. The Fund may invest no more than 30% in bonds which are rated below investment grade.

The Fund may use financial derivative instruments (instruments for which the price is dependent on one or more underlying asset, 'FDI') up to a maximum of 20% of its assets. This can be to achieve the investment objective, to hedge a given investment or to hedge against anticipated movements in a market or other sector or to manage the portfolio more efficiently. FDI may enable the Fund to obtain market exposure in excess of the value of the Fund's assets.

The Fund may be leveraged up to 100% of its assets through FDI. The use of FDI may multiply the gains or losses made by the Fund on a given investment or on its investments generally.

The Share Class will not distribute dividends. Income and capital gains from the Fund are reinvested.

You can buy and sell shares in the Fund on demand each day which is a bank business day in Ireland or the United Kingdom.

RISK AND REWARD PROFILE

The risk and reward indicator value is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may change over time.

The lowest category, 1, does not mean risk free.

The value of investments and income from them can go down as well as up and you may not get back the full amount you invested.

The Share Class is rated 5 due to the nature of its investments which include the risks listed below:

Fund of Funds: The Fund is a fund of funds, which means that the Fund invests in other Underlying Funds and each of the Underlying Funds into which it invests may in turn be subject to

risks arising from the investments which that Underlying Fund makes. There can be no assurance that suitable Underlying Funds can be successfully selected or that the managers of the Underlying Funds will be successful in their investment strategies.

Operational risk: All funds are subject to the risk that something could go wrong in the day-to-day running of an organisation.

Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Multi-Manager or Fund of Funds: The Fund may in certain circumstances invest directly rather than through Underlying Funds. In such cases, the Fund will be directly subject to the risks identified here and in the supplement for the Fund.

Hedged Share Classes: The currency hedging approach may not be successful, so changes in exchange rates may cause the value of investments to decrease or increase.

For more information on risks please refer to the "Special Considerations and Risk Factors" section in the prospectus and in the supplement for the Fund.

CHARGES

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	none
Exit charge	none

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.
