What is this product?

Type

This product is a UCITS Investment Fund.

Term

This product has no fixed end date. However the Sub-Fund, at its absolute discretion, can redeem all the shares of the Sub-Fund under the circumstances set out in the prospectus.

Objectives

Investment objective The investment objective of the Sub-Fund is to seek long-term growth of capital and income.

Investment policies The Sub-Fund will seek to achieve its investment objective primarily by holding a range of Underlying Funds which in turn invest in assets including shares, equity interests, fixed and floating rate bonds issued by government and other corporate entities and indices on which commodities such as energy, agricultural and industrial products and precious metals are traded. The Sub-Fund can invest up to 100% of its assets in other collective investment schemes which fall within the categories specified by the Central Bank of Ireland as permissible investments for UCITS ("Underlying Funds") which are consistent with the Sub-Fund's investment objectives and restrictions, but no more than 20% may be invested in any one Underlying Fund. Additionally, when it is determined to be the best approach, the Sub-Fund may also invest in such assets directly.

The Sub-Fund seeks to promote environmental characteristics within the meaning of Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR"), namely, to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Investment Manager relies on specific analyses to assess the Sub-Fund's current and future potential alignment to the decarbonisation expectations. Climate scenario research and modelling is used to assess the future impact of certain climate change scenarios, and forward-looking portfolio analytics and bottom-up assessment of holdings are used to examine the impact of any proposed investment decisions on the carbon exposure of the Sub-Fund. In addition, the Sub-Fund will have exposure to sustainable investments either directly or through investment in Underlying Funds. The Sub-Fund will invest at least 20% in sustainable investments, being investments which, according to the Investment Manager's framework: (a) contribute positively to UN Sustainable Development Goals ("SDGs"); (b) do no significant harm to any environmental or social objective; and (c) follow good governance practices.

The Sub-Fund is actively managed and will seek to outperform cash by 3.0% - 4.0%, gross of the fees of the Manager, the Investment Manager and the Distributor, but net of all other fees and expenses of the Sub-Fund, on average per annum over the medium to long term. For the purposes of the calculation of outperformance of cash, an appropriate rate has been used as detailed in the past performance document referred to in the "Other relevant information" section. The Sub-Fund is in no way constrained by any benchmark and there is no guarantee the Sub-Fund will outperform cash. The asset allocation views of the Investment Manager may be implemented through investment in Underlying Funds.

Underlying Funds can include other sub-funds of MGI Funds plc. The Sub-Fund may invest up to 20% of its assets in real estate investment trusts and up to 35% of its assets in Underlying Funds which invest in emerging markets securities. The Sub-Fund may invest no more than 30% in bonds which are rated below investment grade.

The Sub-Fund may use financial derivative instruments (instruments for which the price is dependent on one or more underlying asset, "FDI") up to a maximum of 20% of its assets. This can be to achieve the investment objective, to hedge a given investment or to hedge against anticipated movements in a market or other sector or to manage the portfolio more efficiently. FDI may enable the Sub-Fund to obtain market exposure in excess of the value of the Sub-Fund's assets.

The Sub-Fund may be leveraged up to 100% of its assets through FDI. The use of FDI may multiply the gains or losses made by the Sub-Fund on a given investment or on its investments generally.

Your shares will be hedged with the aim of mitigating the effect of exchange rate fluctuations between the currency of your share class and the currencies of the Sub-Fund's underlying assets. The currency hedging approach may not be successful, so changes in exchange rates may adversely impact the value of your investment.

Redemption and Dealing You can buy and sell shares in the Sub-Fund on demand each day which is a bank business day in Ireland or the United Kingdom ("Dealing Day").

Distribution Policy The Share Class will not distribute dividends. Income and capital gains from the Sub-Fund are reinvested.

Intended retail investor

Investors who have at least a basic understanding of financial markets and the underlying investment instruments, who understand the risk of the Sub-Fund including the risk of capital loss and that the product should not constitute a complete investment plan and:

- have a long term investment horizon
- seek a product which promotes environmental and/or social characteristics

Practical information

Depositary The Sub-Fund's assets are held through its depositary, State Street Custodial Services (Ireland) Limited.

Further information This document describes a Share Class of the Sub-Fund, which is a sub-fund of MGI Funds plc constituted as an umbrella, comprising a number of sub-funds (including the Sub-Fund), each having a separate portfolio of assets. As a matter of Irish law, the assets of one sub-fund will not be available to meet the liabilities of another. However, MGI Funds plc is a single legal entity that may operate, have assets held on its behalf, or be subject to claims in other jurisdictions that may not necessarily recognise such segregation. Accordingly, there is no absolute certainty that the assets of a sub-fund will not be exposed to the liabilities of other sub-funds of MGI Funds plc. Investors do not have the right to exchange shares in one sub-fund for shares in another sub-fund. The prospectus, latest annual and semi-annual reports, which are prepared for the entire Umbrella, and

information on other share classes are available free of charge in English on <https://investment-solutions.mercer.com>.

The net asset value per share is published on www.bloomberg.com.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator other risks may affect the Sub-Fund's performance. Please refer to the Sub-Fund's supplement available free of charge at <https://investment-solutions.mercer.com>

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between December 2021 and December 2023.

Moderate: this type of scenario occurred for an investment between November 2014 and November 2019.

Favourable: this type of scenario occurred for an investment between January 2016 and January 2021.

What happens if Mercer Global Investments Management Limited is unable to pay out?

The Sub-Fund is responsible for paying redemptions and any other payment obligations due to investors. The Manager is not responsible for meeting the obligations of the Sub-Fund to investors from its own assets. The Sub-Fund's assets are safeguarded by the Depositary in accordance with applicable law. If the Sub-Fund is unable to pay out to investors due to its insolvency, investors will be unsecured creditors in the insolvency process and are likely to suffer a financial loss. Investors may also suffer a financial loss in the event of the Depositary's insolvency or default (or that of any custody delegate). Investors in UCITS, such as the Sub-Fund, are not covered under the terms of the Irish statutory investor compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	87 EUR	437 EUR
Annual cost impact*	0.9%	0.9% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.6% before costs and 3.7% after costs.

Composition of costs
