What is this product?

Type

This product is a UCITS Investment Fund.

Term

This product has no fixed end date. However the Sub-Fund, at its absolute discretion, can redeem all the shares of the Sub-Fund under the circumstances set out in the prospectus.

Objectives

Investment objective The investment objective of the Sub-Fund is to seek income and long term growth of capital.

Investment policies The Sub-Fund will seek to achieve its objective by primarily investing in fixed income securities denominated in hard currencies such as USD, EUR, GBP and YEN, issued primarily by governments, their agencies, local authorities and instrumentalities and corporate entities located in emerging markets.

The Sub-Fund is actively managed and will seek to outperform the JP Morgan EMBI Global Diversified ex CCC Index (the "Index") by 0.25% - 0.75%, gross of the fees of the Manager, the Investment Manager and the Distributor, but net of all other fees and expenses of the Sub-Fund, on average per annum over the medium to long term. The Investment Manager may use its discretion to invest in, for example, securities, issuers, companies or sectors not included in the Index. The Index tracks total returns for US dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities excluding securities rated CCC and below. There is no guarantee the Sub-Fund will outperform the Index.

The Sub-Fund is anticipated to have a tracking error within a range of 2.0% to 4.0% on an ex-post basis over the medium to long term under normal market conditions although this is not a target or a restriction and there is no guarantee the Sub-Fund will stay within this range. Tracking error is an indicator of the degree to which the Sub-Fund's performance may deviate from that of the Index. Certain indices (including the Index) may also be used in the management of the Sub-Fund, including for investment purposes, as detailed in the supplement.

The Sub-Fund may invest in debt securities issued or guaranteed by EU Member States and non-EU Member States, their sub-divisions, agencies or instrumentalities as well as corporate debt securities such as freely transferable promissory notes, debentures, fixed or floating rate bonds (including zero coupon bonds), convertible and non-convertible notes, commercial paper, certificates of deposits, and bankers acceptances. The Sub-Fund may also invest in debt securities of international agencies or supranational entities such as freely transferable promissory notes, bonds and debentures.

The Sub-Fund may invest over 30% of its net asset value in below investment grade securities but which are at least rated speculative grade (which means a minimum credit rating of B-/B3).

The Sub-Fund may use financial derivative instruments (instruments

for which the price is dependent on one or more underlying assets, "FDI") for hedging, efficient portfolio management purposes and/or investment purposes. FDI may enable the Sub-Fund to obtain market exposure up to 100% in excess of the value of the Sub-Fund's assets. The use of FDI may multiply the gains or losses made by the Sub-Fund on a given investment or on its investments generally.

Your shares will be hedged with the aim of mitigating the effect of exchange rate fluctuations between the currency of your share class and the Sub-Fund's base currency. The currency hedging approach may not be successful, so changes in exchange rates may adversely impact the value of your investment.

Redemption and Dealing You can buy and sell shares in the Sub-Fund on demand each day which is a bank business day in Ireland or the United Kingdom ("Dealing Day").

Distribution Policy The Share Class will not distribute dividends. Income and capital gains from the Sub-Fund are reinvested.

Intended retail investor

Investors who have at least a basic understanding of financial markets and the underlying investment instruments, who understand the risk of the Sub-Fund including the risk of capital loss and that the product should not constitute a complete investment plan and:

- have a long term investment horizon

Practical information

Depository The Sub-Fund's assets are held through its depository, State Street Custodial Services (Ireland) Limited.

Further information This document describes a Share Class of the Sub-Fund, which is a sub-fund of MGI Funds plc constituted as an umbrella, comprising a number of sub-funds (including the Sub-Fund), each having a separate portfolio of assets. As a matter of Irish law, the assets of one sub-fund will not be available to meet the liabilities of another. However, MGI Funds plc is a single legal entity that may operate, have assets held on its behalf, or be subject to claims in other jurisdictions that may not necessarily recognise such segregation. Accordingly, there is no absolute certainty that the assets of a sub-fund will not be exposed to the liabilities of other sub-funds of MGI Funds plc. Investors do not have the right to exchange shares in one sub-fund for shares in another sub-fund. The prospectus, latest annual and semi-annual reports, which are prepared for the entire Umbrella, and information on other share classes are available free of charge in English on <https://investment-solutions.mercer.com>.

The net asset value per share is published on www.bloomberg.com.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

What happens if Mercer Global Investments Management Limited is unable to pay out?

The Sub-Fund is responsible for paying redemptions and any other payment obligations due to investors. The Manager is not responsible for meeting the obligations of the Sub-Fund to investors from its own assets. The Sub-Fund's assets are safeguarded by the Depositary in accordance with applicable law. If the Sub-Fund is unable to pay out to investors due to its insolvency, investors will be unsecured creditors in the insolvency process and are likely to suffer a financial loss. Investors may also suffer a financial loss in the event of the Depositary's insolvency or default (or that of any custody delegate). Investors in UCITS, such as the Sub-Fund, are not covered under the terms of the Irish statutory investor compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	71 EUR	353 EUR
Annual cost impact*	0.7%	0.7% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.2% before costs and 4.5% after costs.
