## What is this product?

### Type

This product is a UCITS Investment Fund.

### Term

This product has no fixed end date. However the Fund, at its absolute discretion, can redeem all the shares of the Fund under the circumstances set out in the prospectus.

### Objectives

**Investment objective** The investment objective of the Fund is to achieve a risk and return profile which reflects that of the ICE 5+ Year Euro GDP-Weighted Government Index (the "Index").

**Investment policies** The Fund is an index tracking fund. It is passively managed and will seek to achieve its objective by investing in a portfolio of debt securities that as far as possible and practicable, reflect the component securities of the Index.

The Index measures the performance of EUR denominated bonds with over 5 years maturity issued by investment grade Eurozone countries, have a fixed coupon schedule, at least five years remaining to final maturity and a minimum amount outstanding of EUR 1 billion. The weighting of individual qualifying securities in the Index is based on its market capitalisation adjusted for the corresponding country weight which is based on the economic size of each qualifying Eurozone country (measured using GDP data).

The Fund may use optimisation techniques in order to achieve a similar return to the Index. This strategy seeks to build a representative portfolio that matches the risk and return characteristics of the Index without the expectation that the Fund will hold every underlying constituent of the Index.

The Fund will predominantly invest in investment grade (i.e. BBB-, Baa3 or its credit equivalent as rated by an internationally recognized rating agency) Eurozone government bonds which are included in the Index.

The Fund may also invest in other Euro denominated debt securities issued or guaranteed by Eurozone governments or otherwise issued in the Eurozone, subject to those securities having similar risk and return performance to securities included in the Index.

The Fund may invest no more than 30% of its assets in securities rated below investment grade, which must, at the time of the investment, be at least speculative grade (i.e. at least a minimum credit rating of B-/B3).

The Fund may also invest in cash, money market instruments and/or other similar liquid short term instruments for liquidity purposes.

The Fund may use derivatives (instruments for which the price is dependent on one or more underlying assets, "FDI") for the purposes of hedging and/or efficient portfolio management only. The Fund may not invest in FDI that would result in losses exceeding the net asset value of the Fund.

**Redemption and Dealing** You can buy and sell shares in the Fund on demand each day which is a bank business day in Ireland or the United Kingdom ("Dealing Day").

**Distribution Policy** The Share Class will not distribute dividends. Income and capital gains from the Fund are reinvested.

### Intended retail investor

Investors who have at least a basic understanding of financial markets and the underlying investment instruments, who understand the risk of the Fund including the risk of capital loss and that the product should not constitute a complete investment plan and:

- have a long term investment horizon

### Practical information

**Depository** The Fund's assets are held through its depository, State Street Custodial Services (Ireland) Limited.

**Further information** This document describes a Share Class of the Fund, which is a sub-fund of MGI Funds plc constituted as an umbrella, comprising a number of sub-funds (including the Fund), each having a separate portfolio of assets. As a matter of Irish law, the assets of one sub-fund will not be available to meet the liabilities of another. However, MGI Funds plc is a single legal entity that may operate, have assets held on its behalf, or be subject to claims in other jurisdictions that may not necessarily recognise such segregation. Accordingly, there is no absolute certainty that the assets of a sub-fund will not be exposed to the liabilities of other sub-funds of MGI Funds plc. Investors do not have the right to exchange shares in one sub-fund for shares in another sub-fund. The prospectus, latest annual and semi-annual reports, which are prepared for the entire Umbrella, and information on other share classes are available free of charge in English on <https://investment-solutions.mercer.com>.

The net asset value per share is published on [www.bloomberg.com](http://www.bloomberg.com).

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

**The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.**

## What happens if Mercer Global Investments Management Limited is unable to pay out?

The Fund is responsible for paying redemptions and any other payment obligations due to investors. The Manager is not responsible for meeting the obligations of the Fund to investors from its own assets. The Fund's assets are safeguarded by the Depositary in accordance with applicable law. If the Fund is unable to pay out to investors due to its insolvency, investors will be unsecured creditors in the insolvency process and are likely to suffer a financial loss. Investors may also suffer a financial loss in the event of the Depositary's insolvency or default (or that of any custody delegate). Investors in UCITS, such as the Fund, are not covered under the terms of the Irish statutory investor compensation scheme.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

## Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
<b>Total Costs</b>	<b>40 EUR</b>	<b>200 EUR</b>
<b>Annual cost impact*</b>	<b>0.4%</b>	<b>0.4%</b>

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.4% before costs and 4.0% after costs.
