Directors' Report

The Directors present their annual report together with the audited financial statements of Metzler International Investments plc ("the Company") for the year ended 30 September 2023.

Principal Activities

Metzler International Investments plc is an investment company with variable capital organised under the laws of Ireland and has its registered office at Kilmore House, Spencer Dock, North Wall Quay, Dublin 1, Ireland. The Company is authorised as an Undertaking for Collective Investment in Transferable Securities pursuant to the European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016 (amending the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended) and the Central Bank of Ireland (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

The purpose for which the Company is established is the collective investment in transferable securities of capital raised from the public, operating on the principle of risk-spreading. The Company aims to provide investors with the opportunity to invest in a variety of funds investing in equities, equity related securities and debt securities (such as bonds, treasury bills, commercial paper, promissory notes, fixed interest and floating rate and zero coupon notes and certificates of deposit), open-ended investment funds, financial derivatives instruments and warrants.

The Company had no employees during the year ended 30 September 2023 or 30 September 2022.

The Company is organised as an umbrella fund and contains twenty-three funds (the "Funds") twelve of which were active at year end, namely:

Metzler European Smaller Companies Sustainability
Metzler European Growth Sustainability
Metzler Japanese Equity Sustainability Fund
Metzler Global Equities Sustainability
Metzler Focus Japan Sustainability
Metzler Wertsicherungsfonds 90
Metzler Wertsicherungsfonds 98
Metzler Sovereign Select LCR Sustainability
Metzler European Dividend Sustainability
Metzler China A Share Sustainability Fund
Metzler Long/Short Volatility

Metzler Eastern Europe - Fund fully redeemed on 29 April 2022, please refer to the note below on Metzler Eastern Europe for further details.

The Central Bank of Ireland has not yet revoked the following Funds, which were closed and inactive at the end of the reporting year.

Metzler NEXT Portfolio - Fund closed 28 September 2023
Metzler Alternative Multi Strategy - Fund closed 17 July 2023

Significant Activities during the Business Year

Results

The results of operations for the year are stated on pages 98 to 102 of the financial statements (Statement of Comprehensive Income).

Performance and Performance Measurement

A detailed performance review for each Fund is included in the Investment Reviews section on pages 8 to 35. The performance figures of the Funds shown in the investment reviews are adjusted for any distributions made during the financial year. Investment reviews are not included for in-active Funds.

Principal Risks and Uncertainties

A description of the risks and uncertainties facing each Fund is included in Note 12 to the financial statements.

Dividends

On 16 November 2022 the Directors resolved that dividends be declared as follows:

Metzler Euro Corporates Short Term Sustainability / Class A	EUR 0.80 per share
Metzler Euro Corporates Short Term Sustainability / Class X	EUR 1.00 per share
Metzler Sovereign Select LCR Sustainability / Class B	EUR 1.40 per share
Metzler Sovereign Select LCR Sustainability / Class X	EUR 1.70 per share
Metzler European Dividend Sustainability / Class A	EUR 3.00 per share
Metzler European Dividend Sustainability / Class B	EUR 3.75 per share
Metzler European Dividend Sustainability / Class BN	EUR 4.00 per share
Metzler European Dividend Sustainability / Class X	EUR 4.50 per share

These dividends were payable to the shareholders of record on 12 December 2022 and paid on 15 December 2022.

New Fund/Share Class launch

Metzler Long/Short Volatility was authorised by the Central Bank of Ireland on 17 October 2022 and launched on 1 November 2022.

Metzler Global Equities Sustainability / Share Class B launched on 19 May 2023.

Fund/Share Class Closure

Metzler Euro Corporates Short Term Sustainability terminated on 26 June 2023 by way of compulsory redemption.

Metzler Alternative Multi Strategy terminated on 17 July 2023 by way of compulsory redemption.

Metzler NEXT Portfolio terminated on 28 September 2023 by way of compulsory redemption.

Changes to the Board of Directors of the Company

Keith Milne resigned from the Board of Directors of the Company with effect as of 23 December 2022.

Eastern European Conflict

The conflict continues between Russia and Ukraine, with further long term devastating political, economic, and social implications for the region and has also resulted in geo-political instability and financial market instability. In response to the invasion and to deter Russian advances, NATO member countries have imposed severe and widespread sanctions on the Russian economy. The imposed sanctions have a direct impact on Metzler Eastern Europe as outlined below and could have an indirect impact on the Company.

Directors' Report

Significant Activities during the Business Year (continued)

Metzler Eastern Europe

Due to the international sanctions imposed upon Russia, the residual stocks within Metzler Eastern Europe Fund were currently not tradable and are required to be disclosed in the audited financial statement until such time the stocks are tradable again. Due to the sanctions imposed, the Fund fully redeemed on 29 April 2022 as a result of compulsory redemption, triggered by the Board of Directors in March 2022. On 19 December 2023, a decision was agreed upon by Universal Investment Ireland pricing committee to value the stocks at zero as there is no longer an observable price available.

Acquisition by CACEIS of RBC Investor Services

CACEIS and Royal Bank of Canada (RBC) announced during 2022 they had signed a memorandum of understanding for the acquisition by CACEIS of the European asset servicing business of RBC Investor Services. The acquisition was completed on 3 July 2023 and CACEIS now acts as registrar and transfer agent of the Company.

Brown Brothers Harriman & Co. (BBH)

On 30 November 2022, it was announced that through mutual agreement State Street Corporation and Brown Brothers Harriman & Co. (BBH) decided to terminate the agreement for the sale of Investor Service business to State Street Corporation, which was first announced on 7 September 2021.

Events since the Year End Date

It is the intention of the Directors to continue to develop the investment activities of the Company.

Changes to the Board of Directors of the Company

Rainer Matthes resigned from the Board of Directors of the Company with effect as of 14 December 2023.

Christian Rausch was appointed to the Board of Directors of the Company with effect as of 14 December 2023.

Fund Closure

Metzler China A Share Sustainability Fund terminated on the 11 December 2023 by way of compulsory redemption.

Dividends

On 28 November 2023 the Directors resolved that dividends be declared as follows:

Metzler Sovereign Select LCR Sustainability / Class B	EUR 1.20 per share
Metzler Sovereign Select LCR Sustainability / Class X	EUR 1.40 per share
Metzler European Dividend Sustainability / Class A	EUR 3.00 per share
Metzler European Dividend Sustainability / Class B	EUR 3.70 per share
Metzler European Dividend Sustainability / Class BN	EUR 3.90 per share
Metzler European Dividend Sustainability / Class X	EUR 4.50 per share

These dividends were payable to the shareholders of record on 11 December 2023 and paid on 14 December 2023.

Directors

The following individuals served as Directors of the Company during the financial year:

Robert Burke (Independent Director) - Irish
Rainer Matthes - German - Resigned 14 December 2023
Keith Milne - Irish - Resigned 23 December 2022
Damien Owens - Irish
Philip Schätzle - German
Deirdre Yaghootfam (Independent Director) - Irish

Directors' and Secretary's Interests

None of the Directors, the Company Secretary nor their families held, at 30 September 2023 or during the year, any beneficial interest in the shares of the Company.

Directors' Report

Soft Commissions

There were no soft commission arrangements in place during the year.

Statement of Directors' Responsibilities

The Directors are also responsible for preparing a Directors' Report and financial statements, in accordance with applicable law and regulations.

Company Law requires the Directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with the FRS 102 The Financial Reporting Standard applicable in the UK and the Republic of Ireland.

Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company and its changes in net assets attributable to holders of redeemable shares for that year. In preparing the financial statements, the Directors are required to:

- Select suitable accounting policies and then apply them consistently;
- Make judgements and estimates that are reasonable and prudent;
- State whether applicable Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- Assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- Use the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the Company and enable them to ensure that the financial statements comply with the Companies Act 2014, the Undertaking for Collective Investment in Transferable Securities pursuant European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 as amended, the European Union (Undertakings for Collective Investment in Transferable Securities) Amendment Regulations 2016 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019. They are responsible for such internal controls as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company and to prevent and detect fraud and other irregularities. The Directors are also responsible for preparing a Directors' report that complies with the requirements of the Companies Act 2014.

The Directors of the Company are compliant with the Irish Fund Industry Association Corporate Governance Code ('the Code').

Connected Persons

Regulation 43 of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, "Transactions involving Connected Persons" states that any transaction carried out with these "connected persons" must be carried out as if negotiated at arm's length and must be in the best interests of the shareholders.

The Board of Directors is satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Regulation 43 are applied to all transactions with "connected persons" and the Manager is satisfied that transactions with "connected persons" entered into during the period complied with the obligations.

Directors' Report

Statutory Compliance Statement, Companies Act 2014, section 225(2)

1. The Directors acknowledge that they are responsible for securing the Company's compliance with the Company's relevant obligations within the meaning of section 225 of the Companies Act 2014 (described below as the Relevant Obligations).
2. The Directors confirm that they have:
 - (a) drawn up a compliance policy statement setting out the Company's policies (that are, in the opinion of the Directors, appropriate to the Company) in respect of the Company's compliance with its Relevant Obligations;
 - (b) put in place appropriate arrangements or structures that, in the opinion of the Directors, provide a reasonable assurance of compliance in all material respects with the Company's Relevant Obligations; and
 - (c) during the financial year to which this report relates, conducted a review of the arrangements or structures that the Directors have put in place to ensure material compliance with the Company's Relevant Obligations.

Audit Committee

The Directors have considered the nature of the company, as an investment company, as well as its size and taking both into account, they have decided that there is no need for a separate audit committee as the Board of Directors fulfils this role.

Political and Charitable Contributions

The Company made no disclosable political donations, charitable contributions, or incurred any disclosable political expenditure during the year.

Accounting Records

The Directors believe that they have complied with the requirements of sections 281 to 285 of the Companies Act 2014 with regards to maintaining adequate accounting records by appointing Universal Investment Ireland, the Manager and Administrator, which employs accounting personnel with the appropriate expertise and by providing adequate resources to the finance function. The accounting records of the Company are maintained at Kilmore House, Spencer Dock, Northwall Quay, Dublin 1.

Statement of Relevant Audit Information

So far as the Directors are aware, there is no relevant audit information of which the Company's statutory auditors are unaware. Each Director has taken all the steps that he/she ought to have taken as a Director in order to make himself/herself aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.

Independent Auditor

The auditor, KPMG has indicated its willingness to continue in office in accordance with the Companies Act 2014.

On behalf of the Board on: 30 January 2024

Damien Owens
Director

Deirdre Yaghootfam
Director

Investment Reviews

Metzler European Smaller Companies Sustainability

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation by investing predominantly in European equities and equity related securities, in such a way that medium to small companies, measured by market capitalisation, will form the main focus of the portfolio.

The Fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR, please see page 165 for further details. The Fund invests in companies that apply good corporate governance.

Fund Report

European equities in general and the small and mid-cap asset class in Europe had a good start to the reporting year in October 2022. Markets were recovering from the strong losses in September 2022 as the fear of a gas shortage in Europe decreased and as the economy proved to be more robust than initially anticipated. This move in the market was accompanied with small and mid-caps outperforming during this time. However, at the beginning of March 2023 the prevailing picture changed again. Interest rates continued to rise as central banks continued with their tightening policy and hiked interest rates further as inflation proved to be higher than anticipated. Currently the macroeconomic environment continues to worsen, with decreasing but still high inflation, monetary tightening and the expectation of an imminent severe recession in the next quarters as key themes. As a consequence, the market became a lot more cautious on cyclical companies as well as companies with high valuation multiples. Simultaneously, the outperformance of small and mid-cap stocks reversed and now the asset class is lagging large caps again.

In these circumstances, small and mid-caps had overall a mildly worse performance versus large caps, lagging by 116 bps. However, combining the relative drawdown of the asset class relative to large caps of the reporting year with the previous 12 months of relative underperformance vs large caps, the magnitude of under-performance of small and mid-caps is unprecedented - the underperformance is even more pronounced than in the global financial crisis 2007-2008 and now amounting to 26%.

The appetite for small and mid-cap (SMID) stocks has probably reached its all-time-low after the sell down for SMID caps in September. For the above-mentioned reasons investors are not willing to re-engage in the asset class with confidence. Outflows still dominate the picture in Europe and small and mid-caps continue to get hit disproportionately by this outflow trend. This means that top-down factors are still dominating the investment environment, making stock picking ever more challenging.

During this very challenging reporting period with extremely high volatility, the Fund's investment management reacted to the new environment by looking for companies with stable cash flows, high pricing power or beneficiaries of interest rates. In addition, we continued to reduce the share of UK companies in the portfolio as we believe that the country is in more structural economic difficulties for the next time. In doing so, the shares of Safestore, Gerresheimer, Bonesupport, Vopak, Intermediate Capital and Vitrolife entered the portfolio while Breedon, S4 Capital, Lanxess, Bridgepoint, Applus and Majorel left the portfolio.

Positive contributions to the Fund's performance in the reporting period came from BE Semiconductor +114.9%, a Dutch tech company, from the utility company Centrica +127.6%, a UK company, from the laundry service provider Elis +63.3%, a French company and from the BPER Banca +89.5%, an Italian bank. In addition, we benefitted from a takeover offer from Applus +72.0%, the Spanish testing company. A negative impact on the Fund came from, GB Group -63.6% and Future PLC -31.7%, two UK companies, Viaplay -72.0% , the Swedish media company, as well as Alfen Group -46.0%, a Dutch company.

Investment Reviews

Metzler European Smaller Companies Sustainability

Fund Report (continued)

The strategic positioning of the Fund is unchanged. We own structural growth stocks with reasonable valuations but also selective investments among cyclicals, recovery companies or in "value stocks" which have the right strategy and balance sheet. We avoid too leveraged business models, too cyclical businesses with little pricing power and too expensive "fashion" stocks. Fundamentally we continue to expect a volatile market environment going forward, as investors need to price in a recession. However, we do not expect any substantial rate hikes anymore and hence we neither expect a material upward movement in interest rates. As we look into 2024, we could envisage some cuts to interest rates, albeit more likely in the US than in Europe with should see also some support for valuation multiples. Having said this, small and mid-cap valuations have become now very interesting and at some stage the large outflows trend could come to an end, supporting a recovery of the asset class in absolute and relative terms.

Investment Reviews

Metzler European Growth Sustainability

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation by investing predominantly in European equities and equity related securities, in such a way that companies of growth sectors will be the main focus of the investment portfolio.

The Fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR, please see page 165 for further details. The Fund invests in companies that apply good corporate governance.

The Fund is eligible under the French Plan d'Épargne en Actions (PEA) tax regime.

Fund Report

European stock markets developed very positively at the beginning of the reporting period. The market recovery was driven in particular by cyclical stocks, some of which recovered significantly from their lows in the fall of 2022. The European energy crisis eased significantly thanks to falling gas prices. European growth stocks slightly underperformed the broad European market in the reporting period. Since summer 2023, bond yields have risen significantly globally, leading to a price correction in European growth stocks. These stocks are valued higher than the market average due to their growth and quality. Rising interest rates negatively impact the net present value (NPV) of high future growth, leading to a compression of elevated valuation multiples.

To reflect the environment described above, we made some adjustments to the Fund. We added several quality growth stocks to the Fund, such as BE Semiconductor, Compass Group and Lindt. With inflation slowing and a possible end to the interest rate cycle, we believe both the fundamentals and valuations of quality growth stocks are attractive. To Fund these quality growth stocks, we have divested from Adyen, Orsted and Neste, among others. In all three cases, the fundamental performance of the investment case did not develop as we expected. Accordingly, we sold these positions to redeploy the capital into ideas with higher conviction.

We also acquired a position in RELX, a global provider of information-based analytics and decision tools. Digitisation, data, and increasingly powerful Artificial intelligence (AI) technologies have demonstrably accelerated RELX's growth over the past decade. We consider RELX a winner from the advent of artificial intelligence, given the company's wealth of proprietary data.

The Fund benefited significantly from its positioning in the pharmaceuticals sector in the year under review. The largest single position in the Fund, Novo Nordisk, gained 70.20% in the reporting period. The company benefited from the success of its anti-obesity drugs. In addition, the overweight in the semiconductor sector (ASM International, ASML, BE Semiconductor) had a positive impact on the Fund's performance.

Positions in the energy sector (Neste), the industrial goods sector (Teleperformance, Alfen, Adyen) and the telecommunications sector (Deutsche Telekom, Cellnex) had a particularly negative impact on the Fund's performance.

In the year under review, the Fund achieved a performance of 13.88% (Class A), 14.71% (Class B) and 14.71% (Class C) and performed similarly to the benchmark index MSCI Europe Growth Net with a gain of 14.79%.

Performance in review period %	13.88 (Class A)

Investment Reviews

Metzler NEXT Portfolio

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation by gaining exposure to equity markets by investing predominantly in a portfolio of equities, equity related securities and Investment funds which are dealt in on a Recognised Market. The Fund may invest up to 100% of its net assets in Investment Funds in accordance with the conditions set down by the Central Bank.

The Fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR, please see page 165 for further details. The Fund invests in companies that apply good corporate governance.

Fund Report

In the third quarter, the MSCI World index decreased by 0.5% from the perspective of a euro investor, while the US dollar appreciated against the euro 3.0%. The MSCI Emerging Markets ended the third quarter almost unchanged. The Fund was closed towards the end of the third quarter, which is why holdings were already reduced towards the end of the reporting period.

Until the end of September the equity weighting in the Fund was kept fairly constant during the reporting period, fluctuating within a range of 65% to a maximum of 70%. On average it was consistently slightly below the strategic equity allocation of 70%. In the second half of September the equity allocation was further decreased down to around 50% due to the Fund closing (end of the month). In the equities segment, the focus was on international equities.

Prices on the bond markets moved downwards in the third quarter. On balance, interest rates rose, while risk premiums narrowed. For example, the ICE BofA Global Government Index (EUR hedged) fell by 2.9%, while the ICE BofA Euro Corporate Index slightly gained 0.3%. Although the focus was on the equity markets, the Fund held units in a government bond fund (approx. 12% weighting in the portfolio) and a corporate bond fund (approx. 17.8% weighting in the portfolio). All positions across the Fund were sold towards the end of the month.

The Fund terminated on 28 September 2023.

Investment Reviews

Metzler Japanese Equity Sustainability Fund

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation by investing predominantly in equities of companies located in Japan, comprised in the Tokyo Stock Price Index (TOPIX).

The Fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR, please see page 165 for further details. The Fund invests in companies that apply good corporate governance.

Fund Report

Both sector allocation and stock selection contributed positively during the reporting period. Value stocks held firm for most of the reporting period as higher interest rates continued to hit high priced growth stocks. Electric Appliances, Wholesale Trade, Transportation Equipment, Services and Banks sectors contributed positively. Conversely, Iron & Steel, Mining, Air Transportation, Machinery and Securities & Commodity Futures sectors dragged performance.

In terms of stock selection, overweight positions in JVCKENWOOD and NEC (Electric Appliances), Sumitomo Mitsui Financial Group and Mitsubishi UFJ Financial Group (Banks), Mitsubishi Corp. (Wholesale Trade), and Honda Motor and Toyota Industries (Transportation Equipment) were positive for performance. On the other hand, overweight positions in Hitachi Zosen (Machinery), Kureha (Chemicals), NTT (Information & Communication), and no positions in Mitsui & Co. (Wholesale Trade), Tokyo Electron (Electric Appliances) and Mizuho Financial Group (Banks) contributed negatively.

Although global stock markets are currently on a declining trend mainly due to renewed concerns for geopolitical risks triggered by the war between Israel and Hamas, we believe the medium to long-term outlook for the Japanese market is positive. In the BOJ's (Bank of Japan) Tankan survey, which looks at the sentiment of large manufacturers, which has been on a downtrend since the December 2021 survey, has bottomed out in March 2023. The September survey for large manufacturers was better than market expectations and the outlook also exceeded expectations, showing a positive outlook for the future. Furthermore, the stability of large non-manufacturers was also confirmed. Chinese tourists to Japan have continued to increase since the Chinese government lifted the ban on group tours in August, and travellers from other areas of the world are also showing considerable growth. The overall outlook for corporate earnings is robust, and we expect upward revisions to future earnings. In terms of valuation, despite the outperformance of the Japanese market relative to other leading countries, the P/B ratio of TOPIX (Tokyo Stock Price Index) is around 1.36x and 12 month forward P/E ratio is roughly 13.9x, which is in line with the past 5 and 10 year averages of 14.0x. The move towards better corporate governance has increased in the last few years and is expected to continue with the Tokyo Stock Exchange taking a strong stance on corporate management and to be aware of capital cost and shareholder return. We will continue to focus on identifying out of favour companies with improving earnings momentum and attractive valuations.

Investment Reviews

Metzler Global Equities Sustainability

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation by investing predominantly in equities and equity related securities of international growth companies.

The Fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR, please see page 165 for further details. The Fund invests in companies that apply good corporate governance.

Fund Report

In the first reporting quarter (October to December 2022), global stock markets processed war, high inflation, rising interest rates and concerns about economic slowdown with falling prices. However, with broad parts of the economy showing resilience, especially in the US with continued record employment levels, optimism began to spread among investors. Whereas market participants had previously assumed that the central banks' fight against inflation would most likely result in a recession, a "soft landing" of the economy emerges to become more possible. This optimism was spurred by falling commodity prices and gradually declining inflation.

In the first quarter, we sold our remaining position in Sherwin Williams due to its exposure to the US real estate market. We also sold our position in Teleperformance after the Colombian government launched an investigation into the labor rights situation at the company's Colombian call centers and even more importantly the development in artificial intelligence represents a potential disruption to the business model. A new addition to the portfolio was Rentokil, the market leader in pest control. Rentokil is continuously expanding its presence through targeted acquisitions. We bought an initial position in the largest listed retail insurance company, Allstate. In addition to a broad range of personal lines products such as auto and home insurance, the company also offers life and annuity products.

In the first quarter under review, the Fund's performance benefited from gains in the energy company TotalEnergies, as well as in a number of companies in the healthcare sector (Novo Nordisk, AstraZeneca, Dexcom and AbbVie). Our exposure to KBC Group and Mastercard from the financial sector also contributed positively to performance. The technology companies Amazon, Alphabet, Apple, Entegris and Microsoft in particular had a negative impact on performance.

In the second reporting quarter (January to March 2023), the recovery on the stock markets continued. Growth stocks in particular performed noticeably better than the broad market. Commodity prices traded well below last year's highs and the normalisation trend in inflation continued, at least on the surface. Core inflation, excluding volatile energy and food prices, stubbornly remained at levels well above the central bankers' inflation target in the United States and rose even further in the Eurozone. This forced central banks to continue raising interest rates. In the United States, there was a crisis at individual regional banks, which were no longer sufficiently capitalised following high losses on the money parked in government bonds.

Investment Reviews

Metzler Global Equities Sustainability

Fund Report (continued)

In the second quarter, we slightly increased our positioning in more cyclical stocks and bought an initial position in Schneider Electric, the leading company in power distribution and automation and control products. We also bought shares in Epiroc, one of the leading mining equipment companies, and shares in Daikin, the Japanese air conditioning manufacturer. Daikin is very well diversified in terms of geographic end markets and has made acquisitions and collaborations with the major Chinese air conditioning manufacturers in the past. In addition, we bought an initial position in Prudential, cautiously rebuilding our exposure to the Chinese economy for the first time. Prudential is one of the leading pan-Asian life and health insurers. This offers a unique growth base compared to other insurers, with extensive access to large, underpenetrated markets. We bought an initial position in chip designer NVIDIA. We expect NVIDIA's end markets away from gaming to drive much of its growth in the near term. The company has delivered consistent performance and has a solid balance sheet with a demonstrated commitment to returns on capital. In addition, we established a first position in the travel category by purchasing Booking.com shares. Booking.com is a leader in the European travel market and has the opportunity to gain share in North America, Asia and Latin America through a strong brand. On the other hand, we sold our shares in the Japanese staffing services company, Recruit Holdings. After the company presented disappointing quarterly results and revised its earnings estimates downward, we limited our losses. We also liquidated our position in Equinor, as the company has been strongly negatively affected by the current normalisation of European gas prices after a very positive 2022. We also sold our holdings in leading US asset manager Charles Schwab for risk management reasons. While we are positive on the strength of the company's deposit business, we see market skepticism towards companies with large deposit overhangs investing in securities portfolios.

In the second quarter under review, Fund performance benefited from price increases in the technology companies Microsoft, Apple, Alphabet, ASML and Amazon due to positive developments in the field of artificial intelligence. On the other hand, losses in financial stocks Charles Schwab, Allstate and Prudential in particular had a negative impact on the Fund's performance.

In the third reporting quarter (April to June 2023), the market was characterised by easing inflation data and the accompanying decline in interest rate hike expectations. The picture on the global stock markets was mixed. While no major price gains were achieved in Europe, the markets in the United States and Japan continued to rise. In particular, growth stocks in the United States, driven by euphoria surrounding the topic of artificial intelligence, recorded strong price increases.

In the third quarter under review, we purchased a position in the US credit bureau Equifax for the first time. Here, we see the company's data base as particularly strong, as the standard commercial credit data is supplemented with information from sub-segments of the company. We also purchased for the first time on Willscot Mobile, a US company specialising in flexible workspaces and mobile storage solutions. In addition to the attractive environment, we were convinced by the company's high management quality and pronounced pricing power. On the other hand, we sold our shares in UPM-Kymmene, due to an unexpected profit warning shortly before the actual quarterly figures. Further observations showed that the company's situation continues to deteriorate, making a new entry unattractive at the current time. Furthermore, we sold our shares in Avantor to avoid further losses and to use the released capital for qualitatively stronger positioned companies. We liquidated our position in IQVIA as financing opportunities for biotechnology companies have deteriorated and competition has increased significantly, which could make it more difficult to maintain market share in the future. We also divested shares in Neste due to the current gloom and the lack of transparency regarding the short-term prospects for success. We sold Allstate due to negative assessments regarding the company's capital position, as despite existing high losses, a capital repatriation program is continuing.

Investment Reviews

Metzler Global Equities Sustainability

Fund Report (continued)

In the third reporting quarter, the Fund's performance again benefited from price increases in technology stocks Microsoft, Apple, Amazon, Alphabet and NVIDIA. This quarter, the market again celebrated the tailwinds for these companies from artificial intelligence.

In the last reporting quarter (July to September 2023), economic indicators dimmed and global equity markets posted losses. Purchasing managers' indices recorded significant declines in the Eurozone and the United States. Gross domestic product growth weakened more in the Eurozone than in the United States. In the face of persistently high inflation, interest rates reached new highs, which had a negative impact on the valuation levels of equities in general. A divergence with relative weakness of Europe and China compared to the United States and Japan can increasingly be observed.

In the fourth quarter under review, we added L'Oréal shares to our portfolio. The French manufacturer of high-quality cosmetic products is benefiting from increasing demand for beauty and care products. In addition to the increased propensity to buy among existing customers, we see enormous potential for the future if the economic situation in China improves. In contrast, we sold our position in Estée Lauder. We also bought an initial position in the global market leader in online video streaming, Netflix, and in Gartner. Gartner is a leading global consulting firm that provides research, consulting and events for participants in the IT industry. The firm has an excellent long-term growth record and business model consistency. In response to a possible downsizing of the sales market, we divested our stake in the sleep therapy device manufacturer ResMed. The possible market entry of new drugs could severely limit ResMed's sales market.

We additionally sold our position in Lonza. The sudden departure of the CEO is a negative surprise, which further weighed on our governance concerns. Even before this event, operating results were disappointing, and estimates were revised downwards.

The Fund's performance in the fourth quarter benefited from gains in Alphabet and energy company TotalEnergies, among others. In addition, our position in Novo Nordisk contributed positively to performance. The stock benefited from positive results of a medical study. Performance was negatively impacted by the shares of luxury goods manufacturer LVMH, among others, due to market participants' concerns about the state of the consumer. Shares of Apple and Microsoft also contributed negatively to performance after very strong positive contributions in the previous quarters. In addition, shares of Dexcom weighed on the Fund's performance.

Metzler Focus Japan Sustainability

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation by investing predominantly in equities and/or equity related securities of companies located in Japan, which are listed or traded on recognised markets in Japan. The Fund will for the most part be invested in up to 35 securities, however this number may be increased if the Investment Manager deems appropriate.

The Fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR, please see page 165 for further details. The Fund invests in companies that apply good corporate governance.

Fund Report

The TOPIX (Tokyo Stock Price Index) rose 3.04% in October-December 2022 quarter and 5.91% in January-March 2023 quarter respectively, resulting in a gain of 9.13% in October-March period with the TOPIX closing at 2,003.50 at the end of March 2023, and the Fund was up 3.01%, underperforming the benchmark by -7.69%.

In the fourth quarter of 2022, the Japanese stock market rose on expectations for slower rate hikes in the US. Early in the quarter, the Japanese stocks maintained an uptrend on the view that the US Fed would slow the pace of rate hikes. In November, US stocks rallied, and Japanese stocks followed suit as US CPI (Consumer Price Index) figures checked in below market expectations and FOMC (The Federal Open Market Committee) minutes suggested that the pace of US interest rate hikes could slow down. Entering December, amid heightening concerns regarding a recession in the US and Europe, US stocks pulled back and so did Japanese stocks. The market continued to soften as the Bank of Japan's revision to its yield curve control policy on December 20th was regarded as an effective rate hike.

In the first quarter of 2023, the Japanese stock market continued to rise. Early in the quarter, Japanese stocks sustained gains on rising expectations of moderating US inflation and China's ending its zero-COVID policy. Although the outcome of the February FOMC meeting suggested that the Fed was easing monetary tightening, US long-term interest rates remained high due to strong US economic indicators. As a result, the downtrend in the US stock market strengthened. Japanese stocks fell on the back of global fears regarding financial systems triggered by the collapse of Silicon Valley Bank, then recovered rapidly toward the end of the quarter after central bank interventions around the world. The Japanese stock market thereafter rallied further due to strong buying before the ex-dividend date.

The TOPIX rose 14.23% in April-June 2023 quarter and 1.52% in July-September 2023 quarter respectively, resulting in a gain of 15.97% in April-September period with the TOPIX closing at 2,323.39 at the end of September 2023, and the Fund was up 18.23%, outperforming the benchmark by 0.98%.

In the second quarter of 2023, the Japanese stock market rose sharply mainly due to expectations that Japan would end deflation and the Tokyo Stock Exchange's call for firms trading below book value to address the actions to close this gap. Foreign investors continued to buy Japanese stocks, which led to a significant market rally. The upbeat US market and the yen's depreciation against the dollar also pushed the market higher.

In the third quarter of 2023, early in the quarter, the Bank of Japan decided to make its Yield Curve Control (YCC) policy more flexible, which caused temporary market turmoil. In August, the market fell as long-term interest rates rose in Japan and the US, reflecting concerns that the US Fed would continue monetary tightening. The market rose in the first half of September, mainly because expectations for US rate hikes receded, but it subsequently fell as an upward revision to FOMC (The Federal Open Market Committee) members' policy rate projections, higher crude oil prices, and concerns about a possible partial shutdown of the US government weighed on the market.

Investment Reviews

Metzler Focus Japan Sustainability

Fund Report (continued)

Since the beginning of the year, Japan's stock market has been the best performer among the developed countries. This is because it has become clear that Japan is emerging from deflation that has lasted for 30 years, and the Prime Minister Kishida's Cabinet has been implementing a series of policies that are beneficial to the stock market. However, as Japan has experienced a long period of deflation, consumer confidence will not improve immediately, and real wages will not become positive until next year. The market expects the Bank of Japan to abolish negative interest rates early next year, but we will have to wait until the Bank of Japan is confident about the 2% inflation outlook, so we expect it to be in the second half of the year after confirming the spring labor wage increase trend. On the other hand, in China, it has become clear that economic growth led by fixed asset investment has reached its limit in an economy with a declining birthrate, and the economic growth rate is expected to slow down to about 2.0% around 2030. It is believed there will be a major shift in global asset allocation from Chinese stocks to Japanese stocks, and the Nikkei Stock Average is expected to renew its bubble-era high in two to three years.

Investment Reviews

Metzler Euro Corporates Short Term Sustainability

Investment Objective

The investment objective of the Fund is to achieve interest income and long-term capital appreciation by investing predominantly in corporate debt securities of global issuers denominated in Euro, with a period to maturity of up to five years.

Fund Report

The Fund promotes environmental and social characteristics and invests in companies that apply good corporate governance.

In the reporting year, the Fund's securities portfolio consisted of euro-denominated corporate bonds with a maximum remaining term of five years.

The reporting year was characterised by numerous challenges for the capital markets. In particular inflation levels and their potential effects on interest rates, in both directions, affected global capital markets.

Stubborn inflation and the absence of a significant slowdown in the global economy led to new highs in risk-free interest rates by the end of February. At the same time, risk premia for corporate bonds with a maturity of 1-5 developed clearly positively, starting from a historically negative previous year and also partly due to a rather friendly economic environment.

This picture changed in the second half of the reporting period due to a slowdown in inflation momentum, leading to lower risk-free rates, particularly in the shorter maturities, partly due to a gloomier economic outlook and the expectation of the first interest rate cuts in 2024. At the same time, however, the trend in risk premiums for corporate bonds with maturities of 1-5 years was slightly negative.

Overall, yields rose significantly. For example, yields on three-year US Treasuries and three-year German government bonds rose to 4.80% (+51 basis points) and 2.93% (+117 basis points) respectively during the reporting period. In addition, the risk premiums of investment-grade corporate bonds fell compared to government bonds, as measured by the option-adjusted spread (OAS). Prices for corporate bonds fell accordingly, which also reduced the Fund performance.

At the beginning of the reporting year, the Fund was overweighted in BBB-rated bonds by 3.8% and in bonds with a maturity of three to five years by 23.5%.

The Fund terminated on 26 June 2023.

Investment Reviews

Metzler Wertsicherungsfonds 90

Investment Objective

The investment objective of the Fund is to achieve long-term capital appreciation while aiming to restrict negative returns within a calendar year to 10%, thus aiming to preserve a minimum Net Asset Value per Share (adjusted for dividend distributions) at year end of 90% of the Net Asset Value per Share at the beginning of a calendar year. To achieve this objective, the Fund pursues a capital preservation strategy (Wertsicherungsstrategie). The Fund will seek to attain its investment objective by gaining exposure to the global equity and debt securities markets. The Fund will gain this exposure by predominantly investing in global stock index derivatives and interest rate/bond derivatives.

Fund Report

Metzler Wertsicherungsfonds 90 started the financial year with an equity allocation of 4% and a bond allocation of 8%, which corresponded to a duration of 0.5 years at fund level. Share prices rose in the three months up to the end of the value protection period. The derivatives on global equity indices held in the fund gained 8.0%. Due to the significant reduction in the risk budget, however, the equity allocation could not be increased and was kept at a low level until the end of the year.

The prices of the derivatives on global bonds held in the portfolio largely trended sideways. They were down 0.2% at the end of the year. The duration was therefore also kept almost unchanged and stood at 0.3 years at the end of the year.

The low investment ratios in both asset classes meant that the Fund price also moved very little. The performance in the first three months of the reporting year was 0.00% (unit class B), 0.06% (unit class C) and -0.15% (unit class F).

As at January 1, 2023, the portfolio management adjusted the ratios with a view to meeting the target of 90% for the end of 2023. The Fund started the new calendar year with an equity ratio of 18% and a duration of 1.0 years.

The stock markets rose significantly up to the end of September. The derivatives on global equity indices held in the Fund gained 9.8%. The equity allocation was built up quickly and consistently and stood at 62% at the end of September.

The global bond basket suffered further losses in the first nine months of the year, losing 1.8% in value. The duration of the Fund was therefore only increased slightly and stood at 1.8 years at the end of September.

In the first nine months of 2023, bonds made a negative contribution to performance, but the positive contribution from equities more than compensated for this. The performance since the beginning of the year was 1.05% (unit class B), 1.25% (unit class C) and 0.61% (unit class F).

Equities also made a positive contribution to performance for the financial year as a whole. In the financial year, the Fund achieved a gain of 1.05% (unit class B), 1.31% (unit class C) and 0.46% (unit class F).

The Fund was exposed to price fluctuation and interest rate risks. These risks were monitored and actively managed on a daily basis.

The allocation is presented taking derivative transactions (futures) into account. The bond ratio is calculated on the basis of a reference duration of 6.5 years.

Investment Reviews

Metzler Alternative Multi Strategy

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation by investing predominantly in a broadly diversified portfolio of derivatives strategies based on the equity, bond and currency markets.

Fund Report

After a weak previous year, the stock markets got off to a very positive start in 2023. Apart from some turbulence in the banking sector in March, equities performed positively in the reporting period. Although the bond markets briefly recorded gains in January and March, they continued their negative performance overall, which can be attributed to a combination of good economic data and concerns about the sustainability of public finances.

The Fund performed neutrally in the reporting period. The high volatility on the bond markets and the rapid change of direction on the equity markets weighed on the performance of the momentum strategies. The volatility strategies came under pressure at the beginning of the year when prices on the equity markets recovered significantly and had problems with the marked decline in volatility as the year progressed. The "carry" and value strategies, on the other hand, benefited from the market environment and largely made up for the losses.

Performance over the entire reporting period was as follows:

Volatility: -3.85%
Carry: 3.59%
Momentum: -1.65%
Value: 1.74%

The Fund terminated on 17 July 2023.

Investment Reviews

Metzler Wertsicherungsfonds 98

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation while aiming to restrict negative returns within a calendar year to 2%, thus aiming to preserve a minimum Net Asset Value per Share (adjusted for dividend distributions) at year end of 98% of the Net Asset Value per Share at the beginning of a calendar year. To achieve this objective, the Fund pursues a capital preservation strategy (Wertsicherungsstrategie). The Fund will seek to attain its investment objective by gaining exposure to the EU debt securities markets and the global equity markets. The Fund will gain this exposure by predominantly investing in EU interest rate/bond derivatives and global equity index derivatives.

Fund Report

Metzler Wertsicherungsfonds 98 started the financial year with an equity allocation of 0.5% and a bond allocation of 4%, which corresponded to a duration of 0.3 years at fund level. Share prices rose in the three months up to the end of the value protection period. The derivatives on global equity indices held in the fund gained 8.0%. Due to the significant reduction in the risk budget, however, the equity allocation could not be increased and was kept at a low level until the end of the year.

By contrast, the prices of the derivatives on European bonds held in the portfolio fell significantly. They were down 2.6% at the end of the year. The duration was therefore also kept almost unchanged at a very low level and stood at 0.2 years at the end of the year.

The low investment ratios in both asset classes meant that the fund price also moved very little. The performance in the first three months of the reporting year was 0.11%.

As at January 1, 2023, the portfolio management adjusted the ratios with a view to meeting the target of 98% for the end of 2023. The Fund started the new calendar year with an equity ratio of 2.7% and a duration of 0.6 years.

The stock markets rose significantly up to the end of September. The derivatives on global equity indices held in the Fund gained 9.8%. The equity allocation was built up quickly and consistently and stood at 16.8% at the end of September.

In the first nine months of the year, the European bond basket was able to make up some of the previous year's losses and gained 0.8% in value. The duration of the Fund was therefore increased slightly and stood at 1.0 years at the end of September.

In the first nine months of 2023, both asset classes made a positive contribution to performance. The performance since the beginning of the year was 1.54%.

For the financial year as a whole, only equities made a positive contribution to performance. The Fund achieved a gain of 1.65% in the financial year.

The Fund was exposed to price fluctuation and interest rate risks. These risks were monitored and actively managed on a daily basis.

The allocation is presented taking derivative transactions (futures) into account. The bond ratio is calculated on the basis of a reference duration of 6.5 years.

Metzler Sovereign Select LCR Sustainability

Investment Objective

The investment objective of the Fund is to achieve interest income and increase the value of its investments over the long term. The Fund shall invest at least 90% of its net asset value in global sovereign debt securities issued by governments or German Bundesländer (local German federal states). The Fund shall be managed in accordance with the eligibility rules for the Liquidity Coverage Ratio imposed by Basel III.

The Fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR, please see page 165 for further details. The Fund invests in companies that apply good corporate governance.

Fund Report

In the year under review, the Fund's securities portfolio consisted of global government bonds and other public-sector bonds including German federal states denominated in local currency. Currency risks were largely hedged with forward exchange transactions.

In the reporting period, the global government bond markets continued to be dominated by the reaction of central banks to combat high inflation. The last time we witnessed a comparable cycle of key interest rate hikes in the US and Europe was in the 1970s.

Indeed, conflicting forces appear to have impacted the bond market. On the one hand, the global economy has weakened; on the other, historical experience shows that after inflation (core inflation, i.e. excluding energy and food prices) rose rapidly to 6.0% or higher, it often took several years for inflation to fall back to a level of 2.0%.

Stubbornly high inflation means that the hurdle for key rate cuts in the future is likely to be very high. The yield curves of the key bond markets remains inverted. Overall, yields on the bond markets rose significantly. For example, yields on ten-year Treasuries and ten-year Bunds rose to 4.57% (+93 basis points) and 2.84% (+92 basis points) respectively in the reporting period. Government bond prices fell accordingly, which also reduced the Fund price.

At the beginning of the reporting year, the Eurozone was represented among the investment regions with 45.0% of fund assets. During the reporting year, this share decreased to 34.5%. Government bonds from France, Belgium, Finland, Singapore and the Netherlands were sold in full. In return, we added government bonds from the United Kingdom, the Czech Republic, Poland and New Zealand to the portfolio.

At the reporting date, German government bonds had the largest weighting within the euro segment at 8.5%, followed by Italian government bonds at 7.0%. Outside the Eurozone, US Treasuries had the highest weighting with 12.3% of the Fund. The "high-yield markets" within the industrialised countries (Australia and New Zealand) together accounted for 16.1% of Fund assets at the end of the reporting period. Bonds from emerging markets countries were represented in the portfolio with a combined weighting of 7.5% (Poland and the Czech Republic).

Investment Reviews

Metzler European Dividend Sustainability

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation. The investment objective will be obtained by investing predominantly in European equities and equity related securities such as, but not limited to, warrants, ADRs and GDRs, that are listed or traded on Recognised Markets. The Fund will have no industry or market capitalisation focus. The main investment focus of the investment portfolio will be on companies with an historical record of paying dividends, or with a high potential to pay dividends in the future.

The Fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR, please see page 165 for further details. The Fund invests in companies that apply good corporate governance.

Fund Report

European equity markets performed very positively, particularly at the beginning of the reporting period. Markets were driven by cyclical stocks, some of which recovered significantly from their lows in the fall of 2022. The European energy crisis significantly eased thanks to falling gas prices. In addition, the departure from the very strict Covid measures in China raised hopes among market participants that the Chinese economy would recover, and that European companies with Chinese exposure would in particular benefit. Accordingly, investors positioned themselves in cyclical stocks at the beginning of the reporting period. Defensive stocks, on the other hand, underperformed. The positive mood on the European stock markets changed at the beginning of March with the bankruptcy of the US Silicon Valley Bank and the difficulties of the major Swiss bank Credit Suisse. However, central banks quickly managed to calm the situation and prevent it from spilling over into the real economy. Since the spring, the European stock market has moved sideways with only minor fluctuations. On the one hand, investors vacillated between concerns about the economy and the negative impact of restrictive monetary policy, and on the other hand, the unchanged robust corporate earnings.

Compared with the European dividend index, the Fund benefited at sector level from strong stock selection in the utilities and pharmaceuticals sectors. On the other hand, the rather defensive orientation of the Fund at the beginning of the reporting period had a negative impact. During the reporting period, the Fund was underweighted in cyclical sectors such as automobiles, which performed strongly. The slight overweight in the real estate sector and stock selection in banks and insurance companies also weighed on relative performance.

Amongst the top performing portfolio holdings was the company Enel +44.9%, an Italian utility company, which was one of the portfolio winners. The company intends to focus its activities on the core markets of Italy and Spain and significantly reduce debt, which was rewarded by investors. Shares of reinsurer Hannover Re +38.0% benefited from the fact that less alternative capital is available to cover risks and insurance companies have to pay significantly higher premiums. Thanks to rising interest rates and few loan defaults, BNP Paribas +45.7%, a major French bank, significantly increased its profit, which was rewarded by investors with a strong share price.

Among the underperforming portfolio holdings was the private equity company Antin Infrastructure -41.7%, a French company. The company is focused on the attractive segment of infrastructure projects but was unable to escape the headwinds caused by tighter monetary policy. Rising interest rates also had a negative impact on consumption spending. Shares of spirits group Pernod Ricard -14.9%, for example, came under significant pressure after the company spoke of weakening demand in its two most important markets, the US and China. British banks are benefiting from rising interest rates. However, the intensity of competition is significantly higher than in the rest of Europe, forcing banks to pass on the higher interest rates to their customers in order not to lose deposits. Our portfolio holding lender NatWest -18.3%, a UK bank, also suffered from this.

Investment Reviews

Metzler European Dividend Sustainability

Fund Report (continued)

Following the strong market recovery, we reduced cyclical stocks in the portfolio at the end of 2022. We sold BASF, Covestro, Taylor Wimpey and Equinor. In return, we increasingly positioned ourselves in the banking sector from the beginning of the year in order to benefit from rising earnings expectations. The sector is benefiting most from interest rate hikes by European central banks and is one of the most attractive dividend sectors in Europe. Similarly, we increased the weighting in defensive utilities, which are benefiting from investments in power grids and renewable energy. For example, in January we added the shares of Enel (Italy) and SSE (UK) to the portfolio. From the second quarter of 2023, we selectively added quality and growth stocks back to the portfolio and built initial positions in SAP (IT; Germany), LVMH (Luxury Goods; France), ASML (IT; Netherlands), RELX (IT; UK) and Novo Nordisk (Healthcare; Denmark).

Metzler China A Share Sustainability Fund

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation. The investment objective will be obtained by gaining exposure to the Chinese equity markets. The Fund will gain this exposure by predominantly investing in A-Shares of Chinese companies, denominated in RMB, listed on the Shanghai or Shenzhen stock exchanges (China A-Shares) via the Shanghai-Hong Kong Stock Connect or the Shenzhen-Hong Kong Stock Connect (collectively Stock Connect).

The Fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR, please see page 165 for further details. The Fund invests in companies that apply good corporate governance.

Fund Report

During the reporting period, the CSI 300 Index delivered a loss of 0.55%, while the China A Share Equity Fund returned -14.22%, representing an underperformance of 13.67%. Sector-wise, the underperformance was mainly dragged by our investment in Financials and Industrials, contributing at -3.72% and -3.57%, respectively. During the reporting period, we were overweight in IT and Consumer Staples; and we were underweight in Financials and Materials.

The Chinese onshore market started to rebound at the end of 2022, thanks to the post covid re-opening policy. However, the economic recovery was slower than market expectation, thus hit on the investors' sentiment and dragging down the share prices in quarter two and quarter three in 2023.

To shore up the economy and investors' confidence, the Chinese government ramped up efforts through a series of measures. In late July, the long-awaited Politburo signalled policy support in many areas, covering in particular the property and capital market. In late August, concrete measures immediately followed especially in these two sectors to restore home-buyers and investors' confidence. The regulators' move effectively lifted the market sentiment; however, the market rebound did not sustain as the investors remained gripped by worries about flagging domestic demand.

Economic fundamentals showed sequential improvement in August and September, from previous weakness since quarter two. Manufacturing PMI (Purchasing Managers' Index) climbed to 50.2% after staying in contraction for the past five months. Both production and new orders continued to expand, which confirms our forecast that the industrial cycle will start to move up in quarter four. Meanwhile, the non-manufacturing activities also picked up speed and rose to 51.7%, from 51.0% in August. Another positive surprise was travel booking data, which came stronger than expected across various online platforms. Vacation spending in the Mid-Autumn and National Holiday also edged stronger, posting 1.5% increase from 2019 pre-pandemic levels.

The property market saw modest sales improvement in the new home segment as well as the resale markets, but the recovery is only half-way through. The easing of mortgage and purchase restrictions did help rebuild home buyer confidence to some extent, but another demand bottleneck - income growth expectations, will take longer to remove.

Equity market activities remained soft in quarter three. Mainland equity turnover stayed at trough, due to high level of uncertainty in the market, which was built up in previous' continuous cycle of touch-and-go. To shore up support for the market and revive investors' confidence, the policy makers used various tools, including cutting transaction cost, encouraging listed companies to pay better dividends, tightening rules of shares reduction, and incentivising insurer to invest in the stock market.

Will China equities stage a rebound? Are the policy supports announced so far suffice to recharge economic growth and equity performance? Usually we would expect to see the market to rebound after the "policy bottom", "economic bottom" and the subsequent "corporate earnings bottom". In today's situation, the policy easing cycle has already started and the economy is in the long process of recovery. We believe broader-scale earnings pickup is closely ahead of us. Further signs of property market stabilisation, which we think the Chinese government will manage to achieve, will gradually offer more clarity on China's macro prospects. In early October, China's state-owned Central Huijin Investment doubled down on its investments in China's top four state-owned banks, sending a strong signal that the "national team" is coming to revive confidence of the stock market. Coupled with historically low valuation, we believe that the Chinese equity market still holds significant opportunities for active investing.

Investment Reviews

Metzler Long/Short Volatility

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation. The investment objective will be obtained by utilising option contracts which predominately comprise of global equity indices. The Fund may also trade options on bond futures.

Fund Report

The equity markets performed positively in the reporting period. The implied volatility for the S&P 500 as measured by the VIX fell significantly from over 30 points to below 15 points. This development was largely driven by the positive performance of large US technology companies, which benefited in particular from the fantasy surrounding the topic of artificial intelligence. In March, the banking sector briefly got into difficulties, which quickly brought back memories of the financial crisis among market participants and also caused volatility to soar. However, the crisis was contained by consistent intervention by the central banks. From August onwards, the positive momentum on the stock markets slowed and volatility rose again somewhat with the onset of the correction.

Based on the negative market environment of the previous year, the Fund was geared towards falling prices and rising volatility and was surprised by the sometimes rapid recovery at the start of the year. Over the course of the year, the portfolio increasingly adapted to the positive market environment, which in turn slowed participation in the rising volatility in March and the third quarter. The long positions suffered heavy losses due to the significant decline in volatility, which could not be offset by the income from the short positions.

Notes to the Financial Statements

General

Metzler International Investments plc (the "Company") was incorporated on 21 December 1994 under the laws of the Republic of Ireland as an investment company with variable capital and has its registered office at Kilmore House, Spencer Dock, North Wall Quay, Dublin 1, Ireland. The Company is authorised as an Undertaking for Collective Investment in Transferable Securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 as amended, the European Union (Undertakings for Collective Investment in Transferable Securities) Amendment Regulations 2016 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, as may be modified, amended, supplemented, consolidated or re-enacted from time to time.

The Company is managed by Universal-Investment Ireland Fund Management Limited, trading as Universal Investment Ireland (the "Manager").

The Company is organised as an umbrella fund and contains twenty-three sub-funds (the "Funds") twelve of which were active at year end, namely:

Metzler European Smaller Companies Sustainability	Commenced trading on 02 January 1998
Metzler European Growth Sustainability	Commenced trading on 02 January 1998
Metzler Japanese Equity Sustainability Fund	Commenced trading on 04 January 1999
Metzler Global Equities Sustainability	Commenced trading on 4 January 1999
Metzler Focus Japan Sustainability	Commenced trading on 15 November 2006
Metzler Wertsicherungsfonds 90	Commenced trading on 1 October 2012
Metzler Wertsicherungsfonds 98	Commenced trading on 2 May 2015
Metzler Sovereign Select LCR Sustainability	Commenced trading on 24 August 2015
Metzler European Dividend Sustainability	Commenced trading on 4 August 2015
Metzler China A Share Sustainability Fund	Commenced trading on 15 January 2018
Metzler Long/Short Volatility	Commenced trading on 17 October 2022
Metzler Eastern Europe	Commenced trading on 4 October 2000 - Fund fully redeemed on 29 April 2022, please refer to note 19 for further details.

The Central Bank of Ireland has not yet revoked the following Funds, which were closed and inactive at the end of the year.

Metzler NEXT Portfolio	Commenced trading on 2 January 1998 - Fund closed 28 September 2023
Metzler Alternative Multi Strategy	Commenced trading on 1 October 2012 - Fund closed 17 July 2023
Metzler Euro Corporates Short Term Sustainability	Commenced trading on 1 October 2012 - Fund closed 26 June 2023
Metzler Wertsicherungsfonds 92	Commenced trading on 11 November 2018 - Fund closed 28 January 2022
Metzler Global Equity Enhanced	Commenced trading on 15 January 2018 - Fund closed 5 November 2021

Metzler US Equity Enhanced	Commenced trading on 15 January 2018 - Fund closed 8 July 2021
Metzler Japanese Equity Enhanced	Commenced trading on 15 January 2018 - Fund closed 9 July 2021
Metzler German Equity Enhanced	Commenced trading on 15 January 2018 - Fund closed 8 July 2021
Metzler European Small and Micro Cap	Commenced trading on 2 August 2011 - Fund closed 3 July 2020
Metzler European Concentrated Growth	Commenced trading on 2 August 2011 - Fund closed 10 January 2020

Notes to the Financial Statements

1. Significant Accounting Policies

Presentation of Financial Statements

The financial statements are prepared under the historical cost convention modified by the inclusion of securities stated at fair value.

The Statement of Comprehensive Income is on pages 98 to 102. The Statement of Financial Position is on pages 103 to 107.

In the opinion of the Directors the financial statements give the information required by the Companies Act 2014.

The following is a summary of the significant accounting policies adopted by the Company:

i) **Basis of Accounting**

The financial statements are prepared in accordance with Financial Reporting Standard 102 ("FRS102"): The Financial Reporting Standard applicable to the UK and the Republic of Ireland, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 as amended, the European Union (Undertakings for Collective Investment in Transferable Securities) Amendment Regulations 2016 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48 (1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

The financial statements are prepared on a fair value basis for financial assets and financial liabilities designated at fair value through profit or loss ("FVTPL"). All other assets and liabilities are stated at amortised cost or redemption amount (redeemable shares). The accounting policies set out below have, unless otherwise stated, been applied consistently to all periods presented in these financial statements.

Critical Accounting Estimates and Judgements

The preparation of Financial Statements in conformity with FRS 102 requires the use of certain critical accounting estimates and judgements. It also requires the Board of Directors, based on the advice of the Manager, to exercise its judgement in the process of applying the Company's accounting policies. The estimates and associated judgements are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. Universal Investment Ireland, as the Manager, makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the actual results.

Information about assumptions and estimation uncertainties that have a significant risk or resulting in material adjustment within the next financial year, as well as critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are included in Notes 1(ii) and 5.

Notes to the Financial Statements

1. Significant Accounting Policies (continued)

ii) Financial Assets and Financial Liabilities at Fair Value Through Profit or Loss

Classification

The Company has designated its assets and liabilities into the categories below in accordance with FRS 102.

Financial Assets and Liabilities at Fair Value Through Profit or Loss

The Company recognises and measures financial assets and financial liabilities in accordance with International Accounting Standard 39 ("IAS 39") as permitted by FRS 102 and has applied Sections 11 and 12 for disclosures. The category of financial assets and liabilities at fair value through profit or loss is sub-divided into two sub-categories. However, the Company has classified all of its financial assets as held for trading. Financial assets held for trading include equities, bonds, investment funds and derivatives. These instruments are acquired principally for the purpose of generating a profit from fluctuations in price. Financial assets classified as loans and receivables include Cash at bank and margin cash and debtor balances.

Recognition/Derecognition

The Company recognises financial assets and financial liabilities when all significant rights and access to the benefits from the assets and the exposure to the risks inherent in those benefits are transferred to the Company. Financial assets and financial liabilities at fair value through profit or loss (FVTPL) are initially recognised at the transaction price on trade date, which is the date on which the Company becomes a party to the contractual provisions of the instrument. The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in the Statement of Comprehensive Income. Any interest in such transferred financial assets that is created or retained by the Company is recognised as a separate asset or liability. The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

Measurement

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value, with transaction costs for such instruments being recognised in Statement of Comprehensive Income. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in profit or loss in the Statement of Comprehensive Income in the period in which they arise. Financial assets classified as loans and receivables are carried at amortised cost less impairment loss if any. Financial liabilities, other than those measured at fair value, are measured at amortised cost using the effective interest rate. Financial liabilities measured at amortised cost include management fees, payable for investments/redemptions and accounts payable.

Notes to the Financial Statements

1. Significant Accounting Policies (continued)

ii) Financial Assets and Financial Liabilities at Fair Value Through Profit or Loss (continued)

Fair Value Measurement Principles

Fair Value is the price for which the asset could be exchanged, or liability transferred, between knowledgeable willing parties in an arm's length transaction. The best evidence of fair value is a quoted market price for an identical asset in an active market. Quoted in an active market refers to quoted prices that are readily and regularly available and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted price is usually the current closing price. The fair value of financial instruments is based on their quoted market prices at the reporting date, without any deduction for estimated future selling costs. Financial assets and financial liabilities are typically valued at close of business price. If a quoted market price is not available on a recognised stock exchange or from a broker/dealer for non-exchange-traded financial instruments, the fair value of the instrument is estimated using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

When discounted cash flow techniques are used, estimated future cash flows are based on the Manager's best estimates and the discount rate used is a market rate at the reporting date applicable for an instrument with similar terms and conditions. Where other pricing models are used, inputs are based on market data at the reporting date. Fair values for unquoted equity investments are estimated, if possible, using applicable price/earnings ratios for similar listed companies adjusted to reflect the specific circumstances of the issuer.

The fair value of derivatives that are not exchange-traded is estimated at the amount that the Company would receive or pay to terminate the contract at the period end taking into account current market conditions and the current creditworthiness of the counterparties. Specifically, the fair value of a forward contract is determined as a net present value of estimated future cash flows, discounted at appropriate market rates on the valuation date. Exchange traded futures (including index futures) and options contracts shall be valued at the settlement price as determined by the market in question. If such market price is not available, the value shall be the probable realisation value estimated with care and in good faith by the Directors or such other competent person appointed by the Directors and approved for the purpose by the Depositary.

Fair Value Disclosures

A key disclosure required in the financial statements is the categorisation of fair value measurements within a three-level hierarchy that reflects the significance of inputs used in measuring fair values. The fair value hierarchy in place for the Company is as described in Note 5.

Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Amortised cost Measurement

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment or uncollectability in the case of a financial asset.

Notes to the Financial Statements

1. Significant Accounting Policies (continued)

ii) Financial Assets and Financial Liabilities at Fair Value Through Profit or Loss (continued)

Impairment

A financial asset not classified at FVTPL is assessed at each reporting date to determine whether there is objective evidence of impairment. A financial asset or a group of financial assets is impaired if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset(s) and that loss event(s) had an impact on the estimated future cash flows of that asset(s) that can be estimated reliably.

Objective evidence that financial assets are impaired includes significant financial difficulty of the borrower or issuer, default or delinquency by a borrower, restructuring of the amount due on terms that the Company would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, or adverse changes in the payment status of the borrowers. An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account against receivables. Interest on the impaired asset continues to be recognised. If an event occurring after the impairment was recognised causes the amount of impairment loss to decrease, then the decrease in impairment loss is reversed through profit or loss.

iii) Security Transactions

Security transactions are recorded in the accounts of the Company on the trade date upon which the transaction takes place, with the exception of certain investment funds booked soonest after the trade date.

iv) Income from Investments

Dividend income relating to investments is recognised in profit or loss in the Statement of Comprehensive Income on the ex-dividend date.

Other income which is immaterial to the total, comprises mainly of, income distributions from investment funds and bank interest and are recognised in profit or loss in the Statement of Comprehensive Income

Interest income from investments and Bank interest are accounted for on an effective yield basis.

Capital gains, dividends and interest received on investments made by the Company may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Company or its shareholders. Income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in profit or loss in the Statement of Comprehensive Income and net of any tax credits.

v) Expenses

Each Fund shall pay all of its expenses. Expenses are accrued on a daily basis.

vi) Realised and Unrealised Gains and Losses on Sale of Investments

The computation of realised gains and losses on the sale of investments is made on the basis of average cost. Net gain from financial instruments at FVTPL includes all realised and unrealised fair value changes and foreign exchange gains/losses.

Notes to the Financial Statements

1. Significant Accounting Policies (continued)

vii) Foreign Currency Translation

The functional currency of the Company is Euro ("EUR") as the Board of Directors have determined that this reflects the Company's primary economic environment. The presentation currency of the Company is also Euro. Transactions in foreign currencies are translated at the foreign currency exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated to the functional currency at the foreign currency closing exchange rate ruling at the reporting date. Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of monetary assets and liabilities are recognised in the Statement of Comprehensive Income. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to the functional currency at the foreign currency exchange rates ruling at the dates that the values were determined.

Foreign currency exchange differences relating to investments at fair value through profit or loss and derivative financial instruments are included in net gains/losses on financial assets at fair value through profit or loss. All other foreign currency exchange differences relating to monetary items, including cash, are presented in the Statement of Comprehensive Income.

viii) Cash Flow Statement

The Company has availed of the exemption available to open-ended investment funds under FRS 102 (Section 7.1A(c)) and is not presenting a cash flow statement.

ix) Going Concern

The Company's activities, together with the factors likely to affect its future developments, performance and position are set out in the financial statements, together with its financial and liquidity positions. In addition, the notes to the financial statements address the Company's financial risk management objectives, details of the financial instruments used by the Company and its exposure to credit and liquidity risks. The Board of Directors have a reasonable expectation that the entity has adequate resources to continue in operational existence for the foreseeable future. Thus they continue to adopt the going concern basis of accounting in preparing the financial statements.

x) Net Asset Value per Share

The Net Asset Value per redeemable share is determined by dividing the value of the Net Assets of each class of redeemable shares by the total number of redeemable shares, of that class, in issue at the time.

xi) Distributions

Distributions payable on redeemable shares are recognised in the Statement of Comprehensive Income as finance costs when they are declared.

xii) Redeemable Shares

Redeemable shares are redeemable at the shareholder's option and are classified as financial liabilities. The redeemable shares can be put back to the Company at any time for cash equal to a proportionate share of the Company's net asset value. The redeemable share is carried at the redemption amount that is payable at the reporting date if the shareholder exercised its right to put back the share to the Company.

Notes to the Financial Statements

1. Significant Accounting Policies (continued)

xiii) Transaction Fees

Transaction fees are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

xiv) Cross-investments

Balances and transactions relating to cross-investments within the Company are eliminated from the total column for the Company in the Statement of Comprehensive Income, Statement of Financial Position and Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares on consolidation.

In cases where a Fund has made cross-investments into the assets of another Fund of the Company, fees associated with such cross-investments are deducted in the calculation of fees of the investing Fund, to avoid double counting. A further breakdown is available in Note 11.

Notes to the Financial Statements

3. Management, Depositary and Performance Fees

Management fees of up to 2% of the Net Asset Value of each Fund are payable to the Manager in respect of each class of Participating Shares. Management fees accrue daily and are payable quarterly in arrears. Class X Shares are available only to those investors (and, where relevant, underlying clients) who are known to the Metzler Group prior to investment in this Share Class.

The Depositary will be paid by the Company an annual custody fee per Fund, accruing and calculated daily and paid monthly in arrears at a rate ranging from 0.0075% to 0.6% per annum calculated by reference to the market value of the investments that the Fund may make in the relevant market. In addition, the Depositary shall be paid an annual trustee fee per Fund not exceeding 0.03% of the net asset value of each Fund. The Depositary shall also be entitled to be paid by the Company transaction charges and any out-of-pocket expenses incurred by the Depositary in the performance of its duties and functions under the Depositary Agreement.

In accordance with the Schedule below, the Investment Manager may also be entitled to a performance related management fee (the 'Performance Fee') in each Performance Period if the performance of the relevant Fund (or Class of Shares within the Fund) has relatively outperformed the applicable benchmark for that Fund (or class) (the 'Benchmark').

Fund name	Benchmark	Max % of outperformance payable (Participation Rate)	% of outperformance payable (Participation Rate)
Metzler European Growth Sustainability (Class A Shares only)	MSCI Europe Growth net	20%	15%
Metzler European Smaller Companies Sustainability (Class A Shares only)	STOXX Europe Small 200 NR Index	20%	15%
Metzler Euro Corporates Short Term Sustainability (Fund terminated 26 June 2023)	ICE BofAML EMU Corporates, Non-Financial, 1 3 yr	20%	20%
Metzler Alternative Multi Strategy (Fund terminated 17 July 2023)	ICE BofAML Euro Currency 3-Month Deposit Bid Rate Index	15%	15%

Notes to the Financial Statements

4. Other Expenses & Transaction Fees

i) Other expenses:

Other expenses include audit fees of EUR 121,770 (excluding VAT) for the statutory audit of the Company (30 September 2022: EUR 119,255 (excluding VAT)) and Directors' fees of EUR 100,000 (30 September 2022: EUR 95,500). The balance comprises of legal fees, transaction fees, research fees and other miscellaneous expenses. There are no fees paid to the statutory auditor in respect of other assurance services, tax advisory services or other non-audit services in the current year (30 September 2022: EUR NIL).

The Company had no employees during the year ended 30 September 2023 or 30 September 2022.

ii) Transaction fees:

Transaction fees, as per table below, are included within net gains/(losses) on financial assets at fair value through profit or loss.

	1,532,593	1,773,888

Not all transaction costs are separately identifiable. For fixed income investments and foreign exchange currency contracts, transaction costs are included in the purchase and sales price of the investments.

5. Fair Value Information

A key disclosure required in the financial statements is the categorisation of fair value measurements within a three-level hierarchy that reflects the significance of inputs used in measuring fair values.

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e., developed using market data) for the asset or liability, either directly or indirectly

Level 3: Inputs are unobservable (i.e., for which market data is unavailable) for the asset or liability.

Metzler Global Equity Enhanced and Metzler Wertsicherungsfonds 92 did not hold any financial assets or financial liabilities as at 30 September 2023 and 30 September 2022.

Notes to the Financial Statements

6. Cash at bank and margin cash

All cash balances, except for EUR 15,419,009 held as margin with J.P. Morgan, are in the custody of Brown Brothers Harriman Trustee Services (Ireland) Ltd. This includes EUR 11,007 for the non-participating shareholders as of 30 September 2023 (30 September 2022: EUR 11,033). The custodian has a lien on a Fund's assets if the Fund has any bank overdrafts.

The margin and amounts due to broker balance held with J.P. Morgan is split between the Funds as follows:

9. Share Capital

The authorised share capital of the Company consists of the following:

Capital requirement

The Company regards Net Assets Attributable to Holders of Redeemable Shares as the Capital of each Fund. The Company's objective is to manage this Capital in line with the investment objectives of each Fund. The Company is not subject to any additional regulatory capital requirements.

Participating Shares

The Company has a variable share capital consisting of participating shares. The authorised share capital of the Company is 500,000,000 shares of no par value. Please refer to Fund Summary Information on pages 92 to 97 for details of active share classes.

The number of redeemable shares in issue for each class at 30 September 2023 and 30 September 2022, is included in the Statement of Financial Position on pages 103 to 107. The Company regards Net Assets Attributable to Holders of Redeemable Shares as the Capital of each Fund.

Non-Participating Shares

The Company has an initial authorised capital of EUR 39,000 divided into 30,000 Subscriber Shares of EUR 1.30 each. At the end of the year, seven of these Subscriber shares were fully paid up and the remaining 29,993 shares were paid up to the extent of one quarter of their par value.

Notes to the Financial Statements

10. Taxation

Under the Taxes Consolidation Act 1997 of Ireland, the Company will not be liable for tax in respect of its income and gains, other than on the occurrence of a chargeable event. A chargeable event includes any distribution, redemption, repurchase, cancellation, transfer of shares or on the ending of a 'Relevant Period', a 'Relevant Period' being an eight year period beginning with the acquisition of the shares by the shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A chargeable event does not include:

- (i) Any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- (ii) An exchange of shares representing one Fund of the Company; or
- (iii) An exchange of shares arising on a qualifying amalgamation or reconstruction of a Fund of the Company with another Fund; or
- (iv) Certain exchanges of shares between spouses and former spouses.

A chargeable event will not occur in respect of shareholders who are neither resident nor ordinarily resident in Ireland and who provide the Company with a relevant declaration to that effect. In the absence of an appropriate declaration, the Company will be required to withhold Irish tax on the occurrence of a chargeable event.

There were no chargeable events during the year. Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Company or its shareholders.

11. Related Party Transactions

The following transactions with related parties were entered into during the year by the Company in the ordinary course of business and on normal commercial terms:

Universal Investment Ireland, as Manager, earned a management fee (out of which the Investment Managers received a fee) of EUR 12,235,110 (30 September 2022: EUR 13,729,882) of which EUR 3,085,745 (30 September 2022: EUR 3,084,902) was due at the year end. There was no performance related fee at the year end or the previous year.

During the current year, Metzler European Smaller Companies Sustainability, Metzler European Growth Sustainability, Metzler Global Equities Sustainability and Metzler European Dividend Sustainability incurred research fees payable to the Investment Manager of EUR 92,797 (30 September 2022: EUR 100,217). EUR 334,349 had been accrued at the year end in relation to invoices not yet issued from 2022/2023 (30 September 2022: EUR 562,498). Metzler Asset Management GmbH is appointed as the Investment Manager to these Funds. Research fees are included in other expenses.

B. Metzler seel. Sohn & Co. AG was the counterparty to Metzler Sovereign Select LCR Sustainability, Metzler Long/Short Volatility and Metzler Alternative Multi Strategy for forward currency contracts totalling EUR (1,913,044) at year end (30 September 2022: EUR (165,879)) and EUR 6,007,655 of transactions which settled during the year (30 September 2022: EUR (9,707,591)).

On 28 September 2023, Metzler NEXT Portfolio closed and redeemed out of all its shares held in other Funds managed by the Investment Manager, Metzler Asset Management GmbH (other than Metzler International Investments plc) in the above tables.

During the year, the total fees waived by the Manager as a result of the cross holdings in any Funds managed by the Metzler Group entities is EUR 15,330 (30 September 2022: EUR 15,332).

12. Financial Risk Management

The Funds are exposed to a variety of financial risks in pursuing their stated investment objectives. These risks are defined in FRS 102 as including market risk (which in turn includes currency risk, interest rate risk and price risk), liquidity risk and credit risk. The Funds take exposure to certain of these risks to generate investment returns on their respective portfolios, although, Funds are exposed to some or all of these risks, which can also potentially result in a reduction of the Net Assets of each respective Fund. The Investment Manager uses its best endeavours to minimise the potentially adverse effects of these risks to the performance of the Funds where it can do so while still these inherent by managing the investments of the Fund in a way that is consistent with the investment objective and policy of each Fund. The risks, with measures adopted by the Funds for managing the various risks, are detailed below.

a) Market Price Risk

Market price risk is the risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. It represents the potential loss a Fund might suffer through holding market positions in the face of price movements, whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market. The Funds are principally invested in equities, bonds, futures contracts, options contracts, forward exchange contracts and investment funds and have adopted a number of investment restrictions which are set out in the prospectus which limit the exposure of each Fund to adverse changes in the price of any individual financial asset.

Notes to the Financial Statements

12. Financial Risk Management (continued)

a) Market Price Risk (continued)

In addition, the Investment Managers consider the asset allocation of each respective Fund on a daily basis in order to minimise the risk associated with particular countries or industry sectors, whilst continuing to follow each Fund's investment objectives. The maximum risk arising from an investment in a financial instrument of the Company is determined by the fair value of its financial instruments, except for derivatives. The maximum exposure on short put options is limited to the strike price while the maximum exposure on short call options is theoretically unlimited. The maximum exposure on future and forward contracts is represented by their respective gross notional amounts.

b) Relative VaR

A sophisticated risk measurement technique called relative 'Value-at-Risk' (VaR) is used to measure the market risk of the relevant Funds. In accordance with the requirements of the Central Bank, the daily VaR of the relevant Fund may not exceed twice the daily VaR of a comparable derivative-free portfolio or benchmark. Information on the reference benchmarks for the Funds, as at 30 September 2023, is detailed below:

Fund Name	Reference Benchmarks 2023	Reference Benchmarks 2022

Notes to the Financial Statements

12. Financial Risk Management (continued)

b) Relative VaR (continued)

The calculation of relative VaR is carried out for the Funds using the following quantitative standards:

- (i) the calculation model used is the Historical Simulation model;
- (ii) the confidence level is 99%;
- (iii) the holding period is 10 days;
- (iv) the historical observation period is 1 year;
- (v) stress tests are carried out monthly and the results are monitored by the Manager. Appropriate stress tests are used to measure any potential major depreciation of the Fund's value as a result of unexpected changes in the risk parameters, to analyse potential situations in which the use of derivative instruments would bring about a loss; and
- (vi) back-testing of the Funds is carried out daily, to compare the potential market risk amount calculated by the model to the actual change in the value of the portfolio. The results are monitored by the Manager.

Although VaR is an important tool for measuring market risk, the assumptions on which the model is based give rise to some limitations, including the following:

- A 10-day holding period assumes that it is possible to hedge or dispose of positions within that period. This may not be the case for certain highly illiquid assets or in situations in which there is severe general market illiquidity.
- A 99% confidence level does not reflect losses that may occur beyond this level, meaning that within the model used there is a 1% probability that losses could exceed the VaR.
- VaR is calculated on an end-of-day basis and does not reflect exposures that may arise on positions during the trading day.
- The use of historical data as a basis for determining the possible range of future outcomes may not always cover all possible scenarios, especially those of an exceptional nature.
- The VaR measure is dependent upon the Fund's position and the volatility of market prices.
- The VaR of an unchanged position reduces if market price volatility declines and vice versa.

For the year ended 30 September 2023 and 30 September 2022, details of the lowest, the highest and the average utilisation of the VaR limit calculated for the Funds are as follows:

Level of leverage at year end	-	-	396.19					
Maximum level of leverage	-	166.09	501.42					
Average Level of Leverage	-	137.14	202.57					

The leverage of the Fund shall be calculated as the sum of the notionals of the financial derivative instruments. This method of measuring leverage involves simply adding all the notionals and allowing no offsets of long against short positions and no adjustments based on the duration of instruments.

Notes to the Financial Statements

12. Financial Risk Management (continued)

d) Currency Risk

A portion of the financial assets of the Company is denominated in currencies other than Euro, the functional currency of the Company, with the effect that the Net Assets and total return can be affected by currency movements.

The total currency exposure as at 30 September 2023 and as at 30 September 2022 was as follows:

Fund Currency	Investments & Non Monetary Assets (Liabilities)	Monetary Assets (Liabilities)	Hedged	Net Unhedged	Investments & Non Monetary Assets (Liabilities)	Monetary Assets (Liabilities)	Hedged	Net Unhedged

The currency risk of each Fund is actively managed on a daily basis by the Investment Managers by monitoring and considering the country and associated currency allocation of each Fund's portfolio and by initiating adjustments to these allocations where appropriate, taking due account of the investment objectives of each Fund and the best interests of shareholders. Financial Derivative Instruments are included in Monetary Assets (Liabilities).

e) Interest rate risk profile of financial assets

The Company is exposed to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows.

Substantially all of the financial instruments at prior and current year end of Metzler European Smaller Companies Sustainability, Metzler European Growth Sustainability, Metzler NEXT Portfolio, Metzler Japanese Equity Sustainability Fund, Metzler Global Equities Sustainability, Metzler Eastern Europe, Metzler Focus Japan Sustainability, Metzler European Dividend Sustainability and Metzler China A Share Sustainability Fund are equities and thus non-interest bearing. Any excess cash is held with the Depository and invested at short term market interest rates. As a result, these Funds are subject to limited exposure to fair value interest rate risk due to the prevailing levels of market interest rates.

Notes to the Financial Statements

Notes to the Financial Statements

12. Financial Risk Management (continued)

f) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting its obligations associated with financial liabilities. The Company's Prospectus provides for the daily creation and cancellation of shares and the Company is therefore exposed to the liquidity risk of meeting shareholder redemptions at any time. The Company's assets are considered to be liquid as they can be readily disposed of in the event that cash needs to be raised to meet redemptions or to pay expenses. The Company's redemption policy provides for a two to four days settlement cycle. Redemption applications for Metzler NEXT Portfolio, Metzler Japanese Equity Sustainability Fund, Metzler Focus Japan Sustainability and Metzler China A Share Sustainability Fund should be submitted a day before trade date due to Asian markets timing issues. These settlement cycles are deemed adequate by the Directors of the Company for meeting redemption requirements.

Under the terms of the Company's Prospectus, the redemption proceeds are paid within 14 days of the day on which a redemption request is received. In addition, the Company's Prospectus states that the Manager is not bound to redeem on any Dealing Day more than 10% of the shares of any one Fund. If the number of requests received exceeds that limit, the requests may be reduced proportionately. The Investment Managers monitor liquidity of each Fund on a daily basis and initiate appropriate investment action where necessary to meet liquidity requirements. The Company's financial liabilities are redeemable participating shares, short term creditors and accruals all payable within one year. The residual contractual maturities of financial liabilities as at the reporting date are as follows:

Notes to the Financial Statements

12. Financial Risk Management (continued)

g) Credit risk

Credit risk arises from the possibility that a loss may occur from the failure of another party to perform according to the terms of the contract. The Company will be exposed to credit risk on the counterparties with which it trades in relation to forward currency, options and futures contracts. The Company is also exposed to credit risk on the issuers of debt securities it holds and is further exposed to a credit risk on parties with whom it trades equities. An additional credit risk exists in relation to cash held on deposit with a credit institution.

All of the Funds within the Company are exposed to a credit risk on parties with whom they trade equities. However, transactions in these financial instruments are generally settled or paid for on delivery, or cleared through the appropriate clearing system for the market on which the instruments are traded. The risk of default is not considered to be material as delivery of securities sold is generally only made once the Depository has received confirmation of payment. Payment is also generally only made on a purchase once confirmation of delivery of the securities has been received by the Depository. The trade will fail if either party fails to deliver the required confirmations.

Metzler Euro Corporates Short Term Sustainability, Metzler Wertsicherungsfonds 90, Metzler Alternative Multi Strategy, Metzler Wertsicherungsfonds 98, Metzler Sovereign Select LCR Sustainability and Metzler Wertsicherungsfonds 92 are exposed to credit risk on the issuers of the debt securities they hold during the reporting year. To minimise the risk, the Investment Managers of the Funds have primarily purchased AAA, AA, A, BBB and BB debt securities, as rated by S&P or an Equivalent Rating, from sovereign issuers. The Funds are also exposed to a credit risk in relation to the counterparty with whom they trade derivative contracts, with the Funds' rights with respect to cash and assets held with, and owing from, these counterparties subject to delay or limitation in the event of bankruptcy or insolvency of a counterparty. The counterparty with whom the Funds are currently trading these financial derivative instruments is J.P. Morgan, currently rated A+ by S&P (30 September 2022: A+ by S&P).

In addition, the Funds are also exposed to a credit risk in relation to the counterparty with whom they trade derivative contracts, with the Funds' rights with respect to cash and assets held with, and owing from, these counterparties subject to delay or limitation in the event of bankruptcy or insolvency of a counterparty. The counterparties with whom the Funds are currently trading these financial derivative instruments are J.P. Morgan and B. Metzler seel. Sohn & Co. AG. J.P. Morgan is currently rated A+ by S&P (30 September 2022: A+ by S&P). B. Metzler seel Sohn & Co. AG does not currently have a credit rating as it is a privately owned company.

Substantially all of the Company's securities are held on a fiduciary basis by Brown Brothers Harriman Trustee Services (Ireland) Limited (the Depository). Its parent BBH & Co is currently rated A+ by Fitch (30 September 2022: A+ by Fitch). These assets are held in segregated accounts of each Fund (in accordance with UCITS regulations), reducing the credit risk of holding the assets in safekeeping. The Company will however be exposed to the credit risk of a credit institution holding its deposits. The cash held on overnight deposit for each Fund is held with recognised and reputable financial institutions which form part of the Depository's list of financial institutions with whom it places money on overnight deposit. An agreement has been reached with the Depository that the Depository or its agent will use reasonable endeavours to preclude more than 15% of a respective Fund's NAV being placed on overnight deposit with any one institution.

The Investment Managers analyse credit concentration based on the counterparty of the financial assets that the Company holds and structure the portfolio in line with regulatory guidelines to diversify credit risk. Details of the parties with whom the Company is exposed to credit risk are disclosed in the Portfolio and Statement of Changes in Investments. At the year end, the maximum credit exposure of the Company is best represented by carrying amounts of the financial assets as disclosed in the Statement of Financial Position.

Notes to the Financial Statements

12. Financial Risk Management (continued)

g) Credit risk

At the year end, the Company's financial assets exposed to credit risk amounted to the following:

The average exchange rates used at the prior year end 30 September 2022 were:

Currency	Currency Code	FX Rate 30.09.2022
Swiss Franc	CHF	1.0223

16. Investments

All the investments held at the year end, with the exception of permitted investments in units of open-ended investment funds, are listed or traded on a Recognised Market. Russian based securities subject to sanctions with original cost of EUR 33,258,068 have been written down to nil, as no observable price available (30 September 2022: EUR 25,310).

Notes to the Financial Statements

17. Changes to the Prospectus

The Prospectus was updated on 21 June 2023 to update for sustainability-related disclosure requirements and the resignation of Keith Milne from the Board of Directors of the Company. Further details can be found in the Prospectus.

18. Segregated Liability

The Company is structured as an umbrella fund with segregated liability between its Funds. Accordingly, each Fund will bear its own liabilities and is not liable for liabilities of other Funds.

19. Significant Events during the Year

Changes to the Board of Directors of the Company

Keith Milne resigned from the Board of Directors of the Company with effect as of 23 December 2022.

Acquisition by CACEIS of RBC Investor Services

CACEIS and Royal Bank of Canada (RBC) announced during 2022, they had signed a memorandum of understanding for the acquisition by CACEIS of the European asset servicing business of RBC Investor Services. The acquisition was completed on 3 July 2023 and CACEIS now acts as registrar and transfer agent of the Company.

Brown Brothers Harriman & Co. (BBH)

On 30 November 2022, it was announced that through mutual agreement State Street Corporation and Brown Brothers Harriman & Co. (BBH) decided to terminate the agreement for the sale of Investor Service business to State Street Corporation, which was first announced on 7 September 2021.

Eastern European Conflict

The conflict continues between Russia and Ukraine, with further long term devastating political, economic, and social implications for the region and has also resulted in geo-political instability and financial market instability. In response to the invasion and to deter Russian advances, NATO member countries have imposed severe and widespread sanctions on the Russian economy. The imposed sanctions have a direct impact on Metzler Eastern Europe as outlined below and could have an indirect impact on the Company.

Metzler Eastern Europe

Due to the international sanctions imposed upon Russia, the residual stocks within Metzler Eastern Europe Fund were currently not tradable and are required to be disclosed in the audited financial statement until such time the stocks are tradable again. Due to the sanctions imposed, the Fund fully redeemed on 29 April 2022 as a result of compulsory redemption, triggered by the Board of Directors in March 2022. On 19 December 2023, a decision was agreed upon by Universal Investment Ireland pricing committee to value the stocks at zero as there is no longer an observable price available.

Notes to the Financial Statements

19. Significant Events during the Year (continued)

New Fund/Class launch

Metzler Long/Short Volatility was authorised by the Central Bank of Ireland on 17 October 2022 and launched on 1 November 2022.

Metzler Global Equities Sustainability / Share Class B launched on 19 May 2023.

Fund/Share Class Closure

Metzler Wertsicherungsfonds 90 / share class X was fully redeemed on 13 June 2023.

Metzler Euro Corporates Short Term Sustainability terminated on 26 June 2023 by way of compulsory redemption.

Metzler Alternative Multi Strategy terminated on 17 July 2023 by way of compulsory redemption.

Metzler NEXT Portfolio terminated on 28 September 2023 by way of compulsory redemption.

20. Events since the Year End Date

Changes to the Board of Directors of the Company

Rainer Matthes resigned from the Board of Directors of the Company with effect as of 14 December 2023.

Christian Rausch was appointed to the Board of Directors of the Company with effect as of 14 December 2023.

Fund Closure

Metzler China A Share Sustainability Fund terminated on the 11 December 2023 by way of compulsory redemption.

Dividends

On 28 November 2023 the Directors resolved that dividends be declared as follows:

Metzler Sovereign Select LCR Sustainability / Class B	EUR 1.20 per share
Metzler Sovereign Select LCR Sustainability / Class X	EUR 1.40 per share
Metzler European Dividend Sustainability / Class A	EUR 3.00 per share
Metzler European Dividend Sustainability / Class B	EUR 3.70 per share
Metzler European Dividend Sustainability / Class BN	EUR 3.90 per share
Metzler European Dividend Sustainability / Class X	EUR 4.50 per share

These dividends were payable to the shareholders of record on 11 December 2023 and paid on 14 December 2023.

21. Approval of the Financial Statements

The Financial Statements were approved by the Directors on 30 January 2024.

Additional Disclosures to the Shareholders of Metzler International Investments plc

Remuneration Disclosures

Sustainability and the avoidance of excessive risks have always been given top priority in the Universal Investment Group remuneration policy, which is thus based on a long-term perspective. The Universal Investment Group remuneration policy, which is applied to all group companies, is a component of the overall low risk business strategy of the Universal Investment Group.

The Universal Investment Group's remuneration to staff comprises of fixed (base salary) and variable (bonus or special payments) remuneration components. The base salary element provides employees with appropriate compensation for their work which reflects the tasks and responsibilities entrusted to them, and encourages the long-term commitment of employees to the Universal Investment Group. This system thus rules out any significant dependence on variable remuneration components so that the possibility of employees being rewarded for taking unreasonable risks is avoided. The remuneration of staff is not linked to the performance of individual Funds.

One of the key aims of the remuneration policy is to ensure no unnecessary risk are taken, by identified staff, on behalf of, Universal Investment Ireland, the funds under management and the underlying shareholders. The Board of Universal Investment Ireland in applying this remuneration policy aims to avoid or appropriately manage any relevant conflicts of interest and believes the adoption of the stated remuneration policy achieves this objective.

Remuneration information of Universal Investment Ireland as Management Company

In deciding on an equitable allocation for Metzler International Investments plc of the total remuneration of the Universal Investment Ireland, criteria such as the number of sub-funds in the Company, assets under management and resources required to manage the daily business of the sub-funds were factored into the calculation.

Proportional amount of employee remuneration:	EUR	1,856,001
of which fixed remuneration	EUR	1,744,851
of which variable remuneration	EUR	111,150
of those who exercise an influence over the risk profile of the Funds	EUR	518,628
Number of employees		29

Remuneration information of Metzler Asset Management GmbH as EU Investment Manager

Total amount of employee remuneration:	EUR	17,985,583
of which fixed remuneration	EUR	16,506,118
of which variable remuneration	EUR	1,479,466
Remuneration paid directly from the Funds	EUR	5,090,925
Number of employees		198
Total amount of remuneration paid to certain employee groups:	EUR	3,685,696
of which managing director	EUR	1,659,453
of which other executives	EUR	1,841,116
of which other risk takers	EUR	-
of which employees with control functions	EUR	185,127
of which employees with the same income level	EUR	-

Remuneration information of T&D Asset Management Co. Ltd., Nissay Asset Management Corporation and China Asset Management (Hong Kong) as non-EU Investment Managers

Proportional amount of employee remuneration of those who exercise an influence over the risk profile	EUR	115,119
of which fixed remuneration	EUR	98,899
of which variable remuneration	EUR	16,220
Number of employees		15

The Investment Managers also have appropriate remuneration policies in place as at 30 September 2023.

Sustainable Finance Disclosure Regulation ("SFDR") Disclosure

Article 8 Mutual Funds

The following Funds are classified as a product promoting environmental or social characteristics within the meaning of the Disclosure Regulation Article 8.

Metzler European Smaller Companies Sustainability
Metzler European Growth Sustainability
Metzler Next Portfolio (closed 28 September 2023)
Metzler Japanese Equity Sustainability Fund
Metzler Global Equities Sustainability
Metzler Focus Japan Sustainability
Metzler Euro Corporates Short Term Sustainability (closed 26 June 2023)
Metzler Sovereign Select LCR Sustainability
Metzler European Dividend Sustainability
Metzler China A Share Sustainability Fund

Consideration of Principal Adverse Impacts ("PAI") indicators at Fund level

The Manager does not consider adverse impacts of investment decisions on sustainability factors. As the investment management function of the Fund has been delegated to the Investment Manager who undertakes the investment decisions on behalf of the Fund, the Manager relies on the investment policies and processes of the delegate Investment Manager. Even though the consideration of principal adverse impacts on sustainability factors ("PAI") is not binding at the Manager's entity level, the consideration of PAI is binding at the level of the Fund.

Reference to annexes for Article 8

Information on the environmental and/or social characteristics and about the consideration of PAI is available in the Annexes in Appendix 1 starting on page 172. "Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852".

Information on Classification and Taxonomy

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Article 6 Funds

The following Funds are not classified as a product promoting environmental or social characteristics within the meaning of the Disclosure Regulation (Article 8), nor as a product with sustainable investment as its objective (Article 9).

Metzler Wertsicherungsfonds 90
Metzler Alternative Multi Strategy (Closed 17 July 2023)
Metzler Wertsicherungsfonds 98
Metzler Long / Short Volatility

The investments underlying these financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Report of the Depositary to the Shareholders

We have enquired into the conduct of Metzler International Investments plc ('the Company') for the year ended 30 September 2023, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company as a body, in accordance with the Central Bank of Ireland's UCITS Regulations, and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed:

- (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and
- (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum & Articles of Association, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ("the Central Bank UCITS Regulations"); and
- (ii) otherwise in accordance with the provisions of the Memorandum & Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations.

Independent Auditor's Report to the Members of Metzler International Investments Public Limited Company

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Metzler International Investments Public Limited Company ('the Company') for the year ended September 30, 2023, which comprise the Statement of Comprehensive Income, Statement of Financial Position, Statement of Changes in Net Assets Attributable to the Holders of Redeemable Shares and related notes, including the summary of significant accounting policies set out in note 1.

The financial reporting framework that has been applied in their preparation is Irish Law and FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland issued in the United Kingdom by the Financial Reporting Council.

In our opinion:

- the financial statements give a true and fair view of the assets, liabilities and financial position of the Company as at September 30, 2023 and of its changes in net assets attributable to holder of redeemable participating shares for the year then ended;
- the financial statements have been properly prepared in accordance with FRS 102 *The Financial Reporting Standard applicable in the UK and Republic of Ireland*; and
- the financial statements have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Independent Auditor's Report to the Members of Metzler International Investments Public Limited Company (continued)

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Other information

The directors are responsible for the other information presented in the Annual Report together with the financial statements. The other information comprises the information included in the directors' report, investment reviews, portfolio and statement of changes in investments, fund summary information, additional disclosures to the shareholders, Sustainable Finance Disclosure Regulation ("SFDR") Disclosure, Depositary report, Management and Administration and Appendix 1. The financial statements and our auditor's report thereon do not comprise part of the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work we have not identified material misstatements in the other information.

Based solely on our work on the other information undertaken during the course of the audit, we report that:

- we have not identified material misstatements in the directors' report;
- in our opinion, the information given in the directors' report is consistent with the financial statements; and
- in our opinion, the directors' report has been prepared in accordance with the Companies Act 2014.

Our opinions on other matters prescribed by the Companies Act 2014 are unmodified

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

Matters on which we are required to report by exception

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions required by Sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

Independent Auditor's Report to the Members of Metzler International Investments Public Limited Company (continued)

Respective responsibilities and restrictions on use

Responsibilities of directors for the financial statements

As explained more fully in the directors' responsibilities statement set out on page 6, the directors are responsible for: the preparation of the financial statements including being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A fuller description of our responsibilities is provided on IAASA's website at <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/>.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's members, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

ANNEX

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Metzler European Smaller Companies Sustainability

Legal entity identifier: (LEI-Code): 635400B1NUUD3HF4XE74

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective**: __%

 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: __%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.44% of sustainable investments -
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy -q8 ana
 - with a social objective
- It promoted E/S characteristics but **did not make any sustainable investments**.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Fund promoted environmental and social characteristics within the meaning of Article 8 of the Disclosure Regulation.

Due to the range of investments the Fund can invest in, the environmental and social characteristics promoted by the Fund address a range of environmental, social and corporate governance (“ESG”) issues.

The Fund’s assets are invested in securities of issuers that meet defined minimum standards in terms of ESG criteria. Each issuer of equities and/or corporate bonds undergoes a sustainability analysis undertaken by the Investment Manager prior to acquisition. The ESG performance of an issuer is systematically evaluated on the basis of various environmental and social criteria, as well as information by which corporate governance practices can be assessed.

These criteria relate to the following issues:

- Environmental

- Climate change mitigation
- Avoidance of detrimental impacts on ecosystems and loss of biodiversity
- Sales in climate-friendly technologies

- Social

- Universal human rights
- Prohibition of child and forced labour
- Health and safety in the workplace

- Corporate Governance

- Structure and quality of the supervisory board of an investee company
- Principles of anti-corruption under the UN Global Compact.

The Fund promotes these environmental and social characteristics through the Investment Manager’s consideration of ESG criteria using the following approaches as further outlined below: (i) exclusions, (ii) ESG integration, and (iii) engagement. The abbreviation “ESG” stands for the three aspects of sustainability (i) environmental; (ii) social; and (iii) good corporate governance.

(i) Exclusions

The Fund applied activity-based exclusions. Companies with the following activities are excluded:

- Tobacco (Production, Downstream) > 5% Revenue
- Nuclear Energy > 5% Revenue
- Nuclear Weapons (Upstream, Production, Downstream) > 0% Revenue
- Conventional Weapons (Upstream, Production, Downstream) > 5%
- Unconventional Weapons (Upstream, Production, Downstream) > 0% Revenue
- Coal (Upstream, Production) > 5% Revenue
- Other Fossil Fuel (Production) > 5% Revenue

The Fund applied norm-based screening in connection with UN Global Compact, OECD Guidelines, and ILO (International Labour Organisation).

The Fund applied exclusions for sovereigns. The following exclusions were applied:

- Sovereigns with serious violations of democratic and human rights are excluded on basis of Freedom House evaluation.
- Sovereigns that are exposed to corruption.

Investments in sovereign issuers are excluded:

- (a) which do not allow a particular group of people, or the population in general, free access to political rights and civil liberties;
- (b) whose peace status is to be classified as very low;
- (c) which have a serious level of corruption;
- (d) with close connections to cases of money laundering; and/or
- (e) which have serious violations of democratic and human rights.

(ii) ESG Integration

The aim of ESG integration is to improve the risk/return profile of the Fund by integrating sustainability aspects into the traditional investment analysis process. The assessment of an issuer's sustainability is carried out by the Investment Manager using published information from the issuers. All issuers of equities and/or corporate bonds are subject to sustainability analysis before their securities are purchased.

In ESG integration, environmental, social and corporate governance criteria are considered by the Investment Manager when making investment decisions. In this context, the investment universe only includes investments that do not fall under the above exclusion criteria.

Key figures on climate and other environmental concerns, negative impacts in the areas of social and employee matters, human rights and anti-corruption are all considered. The analysis covers the following areas:

(a) involvement in controversial business practices based on over 100 internationally recognised standards, including the UN Global Compact;

(b) sustainability risk management: In addition to ESG ratings and scores, several key performance indicators are considered, which, for example, measure the handling of employee matters;

(c) climate ratings to measure the transition to a low-carbon economy; and

(d) compliance of companies with the objectives of the Paris Agreement adopted under the United Nations Framework Convention on Climate Change.

In addition, the Investment Manager may also rely on the sustainability assessment of external providers to evaluate the above criteria. External data providers collect information from companies or issuers on how they deal with the above-mentioned sustainability issues and generally also assess these and make this information available to the Investment Manager. With regard to a violation of the ten principles of the UN Global Compact, the Investment Manager generally refers to the information in the sustainability assessments of external data providers.

(iii) Engagement

Engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had also mandated Columbia Threadneedle Investments to engage with underlying companies via dialogue and voting rights.

How did the sustainability indicators perform?

All sustainability indicators of the Fund, which serve to fulfill the ecological and/or social characteristics of the fund, were complied with during the reference period. Compliance with the environmental and/or social criteria for the selection of assets was verified before as well as after acquisition.

In addition, the Fund considered the following sustainability factors in its strategy on a mandatory basis:

- GHG emissions (Metric: Scope 1 GHG emissions)
- GHG emissions (Metric: Scope 2 GHG emissions)
- GHG emissions (Metric: Scope 3 GHG emissions)
- GHG emissions (Metric: Scope 1 and 2 GHG emissions)
- GHG emissions (Metric: Scope 1, 2 and 3 GHG emissions)
- Carbon footprint (Metric: Carbon footprint Scope 1 and 2)
- Carbon footprint (Metric: Carbon footprint Scope 1, 2 and 3)
- GHG intensity of investee companies (Metric: GHG intensity of investee companies Scope 1 and 2)

- GHG intensity of investee companies (Metric: GHG intensity of investee companies Scope 1, 2 and 3)
- Exposure to companies active in the fossil fuel sector (Metric: Share of investments in companies active in the fossil fuel sector)
- Share energy consumption from non-renewable sources (Metric: Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources)
- Share energy production from non-renewable sources (Metric: Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE A)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE B)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE C)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE D)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE E)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE F)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE G)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE H)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE L)
- Activities negatively affecting biodiversity-sensitive areas (Metric: Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas)
- Water Emissions (Metric: Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average)
- Hazardous waste and radioactive waste ratio (Metric: Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average)
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (Metric: Share of investments in companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises)

- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Metric: Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises)
- Unadjusted gender pay gap (Metric: Average unadjusted gender pay gap of investee companies)
- Board gender diversity (Metric: Average ratio of female to male board members in investee companies, expressed as a percentage of all board members)
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Metric: Share of investments in investee companies involved in the manufacture or selling of controversial weapons)
- Investing in companies without carbon emission reduction initiatives investment weight (Metric: Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement)Exposure to companies producing chemicals (Metric: Share of investments in investee companies the activities of which fall under Division 20.2 of Annex I to Regulation (EC) No 1893/2006)
- Exposure to companies producing chemicals (Metric: Share of investments in investee companies the activities of which fall under Division 20.2 of Annex I to Regulation (EC) No 1893/2006)
- Non-Recycled waste ratio (Metric: Tonnes of non-recycled waste generated by investee companies per million EUR invested, expressed as a weighted average)
- Share of investments in investee companies whose operations affect threatened species (Metric: Share of investments in investee companies whose operations affect threatened species)
- Share of investee companies without deforestation policy (Metric: Share of investments in companies without a policy to address deforestation)
- Rate of accidents (Metric: Number of workdays lost to injuries, accidents, fatalities or illness of investee companies expressed as a weighted average)
- Share of investee companies with insufficient whistleblower protection (Metric: Share of investments in entities without policies on the protection of whistleblowers)
- Number of incidents of discrimination reported in investee companies (Metric: Number of incidents of discrimination reported in investee companies expressed as a weighted average)
- Excessive CEO Pay ratio (Metric: Average ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees (excluding the highest-compensated individual))
- Exposure to companies without human rights policy (Metric: Share of investments in entities without a human rights policy)
- Exposure to companies with lack of due diligence (Metric: Share of investments in entities without a due diligence process to identify, prevent, mitigate and address adverse human rights impacts)
- Exposure to companies with lack of processes and measures for preventing trafficking in human beings (Metric: Share of investments in investee companies without policies against trafficking in human beings)
- Exposure to companies with operations and suppliers at significant risk of incidents of child labour (Metric: Share of investments in investee companies exposed to operations and suppliers at significant risk of incidents of child labour in terms of geographic areas or type of operation)

- Exposure to companies with operations and suppliers at significant risk of incidents of forced or compulsory labour (Metric: Share of the investments in investee companies exposed to operations and suppliers at significant risk of incidents of forced or compulsory labour in terms in terms of geographic areas and/or the type of operation)
- Number of identified cases of severe human rights issues and incidents (Metric: Number of cases of severe human rights issues and incidents connected to investee companies on a weighted average basis)
- Exposure to companies with a lack of anti-corruption and anti-bribery policies (Metric: Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption)
- Exposure to companies with cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery (Metric: Share of investments in investee companies with identified insufficiencies in actions taken to address breaches in procedures and standards of anti-corruption and anti-bribery)
- Number of convictions for violation of anti-corruption and anti-bribery laws (Metric: Numbers of convictions and amount of fines for violations of anti-corruption and anti-bribery laws by investee companies)
- Average income inequality (Metric: The distribution of income and economic inequality among the participants in a particular economy including a quantitative indicator explained in the explanation column)
- Average freedom of expression (Metric: Measuring the extent to which political and civil society organisations can operate freely including a quantitative indicator explained in the explanation column)
- Average corruption score (Metric: Average corruption score)
- Non-Cooperative tax jurisdictions (Metric: Investments in jurisdictions on the EU list of non-cooperative jurisdictions for tax purposes)
- Average political stability score (Metric: Measure of the likelihood that the current regime will be overthrown by the use of force using a quantitative indicator explained in the explanation column)
- Average rule of law score (Metric: Measure of the level of corruption, lack of fundamental rights, and the deficiencies in civil and criminal justice using a quantitative indicator explained in the explanation column)

● ***...and compared to previous periods?***

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Fund has a proportion of 32.44% of sustainable investments composed of investments with an environmental or social objective in economic activities that are classified as sustainable within the meaning of Article 2(17) of the Disclosure Regulation.

Sustainable investments within the meaning of Article 2(17) of the Disclosure Regulation

The Fund has invested in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.

- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

In the investment process, the Investment Manager's consideration of these indicators is based on a positive list of companies that have developed a strategy against at least one of the above key indicators and have a track record in addressing environmental and/or social objectives. Information from MSCI ESG Research for the individual key indicators is used as the basis for this positive list.

In relation to the 17 United Nations Sustainable Development Goals, revenues are considered in products and services that are consistent with the 17 United Nations Sustainable Development Goals. Sustainable impact data from MSCI ESG Research is used for this purpose. The contribution of sustainable investments is determined by a share ratio, which is the ratio of the market value in sustainable companies to the market value of all investments of the Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensured that in the selection of sustainable investments, none of the environmental and social objectives listed in Article 2(17) of the Disclosure Regulation or of the environmental objectives included in Article 9 of Regulation (EU) 2020/852 were significantly harmed. Significant harm existed in particular in the case of severe impacts on the adverse sustainability indicators or the breach of the minimum level of protection set out in Article 18 of Regulation (EU) 2020/852. In addition, the Fund invested in securities of such issuers or companies that in their business activities observed the governance aspects referred to in Article 2(17) of the Disclosure Regulation. This was ensured and documented by the exclusions defined in the internationally recognised standards.

How were the indicators for adverse impacts on sustainability factors taken into account?

In selecting sustainable investments for the Fund, the indicators of adverse impact on sustainability factors were used to determine significant harm. Criteria for a severe impact were defined for 33 environmental and social indicators. Investments that did not meet the Investment Manager's defined ambition levels for each of these indicators could not be classified as sustainable investments. In the absence of relevant data, classification of an investment as a sustainable investment was not possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Investments were monitored for alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The principles were based on international standards in the areas of human rights, labour rights, the environment and corruption. If a company had been found to be at fault or to have breached these standards, the company had been excluded for investment by the Fund. In the case of investments already held by the Fund, the relevant investment had been sold.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following PAI were considered:

Environmental Adverse Impact Indicators

- Greenhouse gas (“GHG”) emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste ratio
- Investments in companies without carbon emission reduction initiatives
- Investments in companies producing chemicals
- Non-recycled waste ratio
- Natural species and protected areas
- Deforestation

Social Adverse Impact Indicators

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- Unadjusted gender pay gap
- Board gender diversity
- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
- Investments in companies without workplace accident prevention policies
- Rate of workplace accidents
- Insufficient whistleblower protection
- Incidents of discrimination
- Excessive CEO pay ratio
- Lack of human rights policy
- Lack of due diligence
- Lack of processes and measures for preventing trafficking in human beings
- Operations and suppliers at significant risk of incidents of forced or compulsory labour
- Number of identified cases of severe human rights issues and incidents
- Lack of anti-corruption and anti-bribery policies
- Operations and suppliers at significant risk of incidents of child labour
- Cases of insufficient action taken to address breaches of standards of anticorruption and anti-bribery
- Number of convictions and the number of fines for violations of anti-corruption and anti-bribery laws

The principal adverse impact indicators are taken into account by exclusion criteria.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/10/2022 – 30/09/2023

Largest Investments	Sector	% Assets*	Country
Elis S.A.	Industrials	2.17	France
Spie S.A.	Industrials	2.01	France
ASR Nederland N.V.	Financials	1.99	Netherlands
Gaztransport Technigaz	Energy	1.95	France
Infrastrutture Wireless Italiane S.p.A.	Telecommunication Services	1.92	Italy
Soitec S.A.	Information Technology	1.83	France
Storebrand ASA	Financials	1.75	Norway
Inchcape PLC	Consumer Discretionary	1.74	United Kingdom
Royal Unibrew AS	Consumer Staples	1.73	Denmark
Interpump Group S.p.A.	Industrials	1.65	Italy
IG Group Holdings PLC	Financials	1.64	United Kingdom
Siegfried Holding AG	Health Care	1.63	Switzerland
Subsea 7 S.A.	Energy	1.62	Luxembourg
Beazley PLC	Financials	1.57	United Kingdom
CTS Eventim AG & Co. KGaA	Telecommunication Services	1.56	Germany

*Average % asset

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

32.44% of the Fund was invested in sustainability-related investments at the end of the fiscal year on 30 September 2023.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Top 5 Sectors	% Assets
Industrials	19.05
Financials	17.32
Information Technology	11.26
Health Care	11.04
Consumer Discretionary	9.15

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The environmental characteristics of the Fund could contribute positively to the taxonomy objective to climate change mitigation and climate change adaptation.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

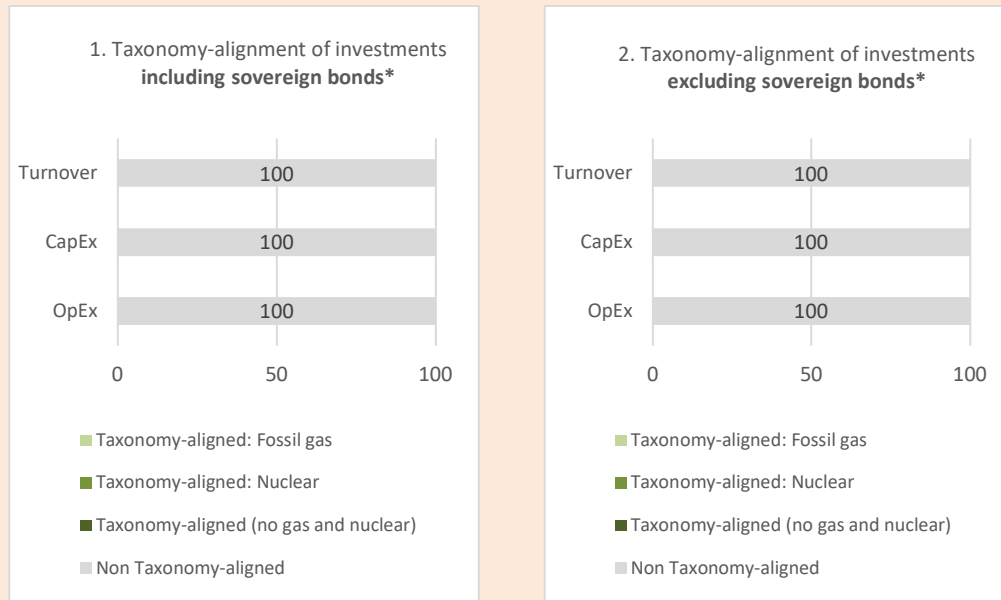

- Yes:
 - In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

This Fund does not currently commit to investing in economic activities that are classified as enabling or transitional activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund invests in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.
- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

Since these include both environmental and social objectives, it is not possible to specify minimum proportions for environmentally sustainable, non-taxonomy-compliant investments on the one hand and socially sustainable investments on the other. The total proportion of sustainable investments in relation to the Fund's environmental and social objectives can be found on the first page of this appendix.

What was the share of socially sustainable investments?

The Fund invests in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.
- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

Since these include both environmental and social objectives, it is not possible to specify minimum proportions for environmentally sustainable, non-taxonomy-compliant investments on the one hand and socially sustainable investments on the other. The total proportion of sustainable investments in relation to the Fund's environmental and social objectives can be found on the first page of this appendix.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The other investments include hedging instruments and cash instruments.

For other investments that do not fall under the Fund’s sustainability strategy, it is ensured that these are not used contrary to the overall sustainability strategy. Insofar as derivatives may be acquired, it is ensured that the underlying references of the derivatives are compliant with the sustainability strategy. If the derivative references an index, it is ensured that the index has sustainability characteristics. Due to the financial instruments available on the market, there may be deviations in the sustainability characteristics of the underlying reference index from the Fund characteristics. Any derivatives whose underlying references could be classified as not being aligned to the sustainability strategy, as well as currency holdings that do not match the Fund currency or that are not denominated in EUR, USD, GBP, CHF or JPY, may not be included as a significant component in the Fund. The use of derivatives to offset negative market fluctuations is not included. In addition, investments may be specifically excluded from the sustainability strategy that are not subject to an explicit review of minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Our engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had mandated Columbia Threadneedle Investments to exercise voting rights.

If information was available at the underlying asset level, various calculation methods were applied to summarise this at the Fund level.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable
- **How did this financial product perform compared with the reference benchmark?**
Not applicable
- **How did this financial product perform compared with the broad market index?**
Not applicable

ANNEX

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Metzler European Growth Sustainability

Legal entity identifier: (LEI-Code): 635400FPXIOZMDIQ3028

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective**: __%

 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: __%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.16% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics but **did not make any sustainable investments**.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Fund promoted environmental and social characteristics within the meaning of Article 8 of the Disclosure Regulation.

Due to the range of investments the Fund can invest in, the environmental and social characteristics promoted by the Fund address a range of environmental, social and corporate governance (“ESG”) issues.

The Fund’s assets are invested in securities of issuers that meet defined minimum standards in terms of ESG criteria. Each issuer of equities and/or corporate bonds undergoes a sustainability analysis undertaken by the Investment Manager prior to acquisition. The ESG performance of an issuer is systematically evaluated on the basis of various environmental and social criteria, as well as information by which corporate governance practices can be assessed.

These criteria relate to the following issues:

- Environmental

- Climate change mitigation
- Avoidance of detrimental impacts on ecosystems and loss of biodiversity
- Sales in climate-friendly technologies

- Social

- Universal human rights
- Prohibition of child and forced labour
- Health and safety in the workplace

- Corporate Governance

- Structure and quality of the supervisory board of an investee company
- Principles of anti-corruption under the UN Global Compact.

The Fund promotes these environmental and social characteristics through the Investment Manager’s consideration of ESG criteria using the following approaches as further outlined below, (i) exclusions, (ii) ESG integration, and (iii) engagement. The abbreviation “ESG” stands for the three aspects of sustainability (i) environmental; (ii) social; and (iii) good corporate governance.

(i). Exclusions

The Fund applied activity-based exclusions. Companies with the following activities are excluded:

- Tobacco (Production, Downstream) > 5% Revenue
- Nuclear Energy > 5% Revenue
- Nuclear Weapons (Upstream, Production, Downstream) > 0% Revenue
- Conventional Weapons (Upstream, Production, Downstream) > 5%
- Unconventional Weapons (Upstream, Production, Downstream) > 0% Revenue
- Coal (Upstream, Production) > 5% Revenue
- Other Fossil Fuel (Production) > 5% Revenue

The Fund applied norm-based screening in connection with UN Global Compact, OECD Guidelines, and ILO (International Labour Organisation).

The Fund applied exclusions for sovereigns. The following exclusions were applied:

- Sovereigns with serious violations of democratic and human rights are excluded on basis of Freedom House evaluation.
- Sovereigns that are exposed to corruption,

Investments in sovereign issuers are excluded:

- (a) which do not allow a particular group of people, or the population in general, free access to political rights and civil liberties;
- (b) whose peace status is to be classified as very low;
- (c) which have a serious level of corruption;
- (d) with close connections to cases of money laundering; and/or
- (e) which have serious violations of democratic and human rights.

(ii) ESG Integration

The aim of ESG integration is to improve the risk/return profile of the Fund by integrating sustainability aspects into the traditional investment analysis process. The assessment of an issuer's sustainability is carried out by the Investment Manager using published information from the issuers. All issuers of equities and/or corporate bonds are subject to sustainability analysis before their securities are purchased.

In ESG integration, environmental, social and corporate governance criteria are considered by the Investment Manager when making investment decisions. In this context, the investment universe only includes investments that do not fall under the above exclusion criteria.

Key figures on climate and other environmental concerns, negative impacts in the areas of social and employee matters, human rights and anti-corruption are all considered. The analysis covers the following areas:

(a) involvement in controversial business practices based on over 100 internationally recognised standards, including the UN Global Compact;

(b) sustainability risk management: In addition to ESG ratings and scores, several key performance indicators are considered, which, for example, measure the handling of employee matters;

(c) climate ratings to measure the transition to a low-carbon economy; and

(d) compliance of companies with the objectives of the Paris Agreement adopted under the United Nations Framework Convention on Climate Change.

In addition, the Investment Manager may also rely on the sustainability assessment of external providers to evaluate the above criteria. External data providers collect information from companies or issuers on how they deal with the above-mentioned sustainability issues and generally also assess these and make this information available to the Investment Manager. With regard to a violation of the ten principles of the UN Global Compact, the Investment Manager generally refers to the information in the sustainability assessments of external data providers.

(iii) Engagement

Engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had also mandated Columbia Threadneedle Investments to engage with underlying companies via dialogue and voting rights

How did the sustainability indicators perform?

All sustainability indicators of the Fund, which serve to fulfill the ecological and/or social characteristics of the Fund, were complied with during the reference period. Compliance with the environmental and/or social criteria for the selection of assets was verified before as well as after acquisition.

In addition, the Fund considered the following sustainability factors in its strategy on a mandatory basis:

- GHG emissions (Metric: Scope 1 GHG emissions)
- GHG emissions (Metric: Scope 2 GHG emissions)
- GHG emissions (Metric: Scope 3 GHG emissions)
- GHG emissions (Metric: Scope 1 and 2 GHG emissions)
- GHG emissions (Metric: Scope 1, 2 and 3 GHG emissions)
- Carbon footprint (Metric: Carbon footprint Scope 1 and 2)
- Carbon footprint (Metric: Carbon footprint Scope 1, 2 and 3)
- GHG intensity of investee companies (Metric: GHG intensity of investee companies Scope 1 and 2)

- GHG intensity of investee companies (Metric: GHG intensity of investee companies Scope 1, 2 and 3)
- Exposure to companies active in the fossil fuel sector (Metric: Share of investments in companies active in the fossil fuel sector)
- Share energy consumption from non-renewable sources (Metric: Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources)
- Share energy production from non-renewable sources (Metric: Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE A)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE B)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE C)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE D)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE E)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE F)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE G)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE H)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE L)
- Activities negatively affecting biodiversity-sensitive areas (Metric: Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas)
- Water Emissions (Metric: Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average)
- Hazardous waste and radioactive waste ratio (Metric: Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average)
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (Metric: Share of investments in companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises)

- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Metric: Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises)
- Unadjusted gender pay gap (Metric: Average unadjusted gender pay gap of investee companies)
- Board gender diversity (Metric: Average ratio of female to male board members in investee companies, expressed as a percentage of all board members)
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Metric: Share of investments in investee companies involved in the manufacture or selling of controversial weapons)
- Investing in companies without carbon emission reduction initiatives investment weight (Metric: Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement)Exposure to companies producing chemicals (Metric: Share of investments in investee companies the activities of which fall under Division 20.2 of Annex I to Regulation (EC) No 1893/2006)
- Exposure to companies producing chemicals (Metric: Share of investments in investee companies the activities of which fall under Division 20.2 of Annex I to Regulation (EC) No 1893/2006)
- Non-Recycled waste ratio (Metric: Tonnes of non-recycled waste generated by investee companies per million EUR invested, expressed as a weighted average)
- Share of investments in investee companies whose operations affect threatened species (Metric: Share of investments in investee companies whose operations affect threatened species)
- Share of investee companies without deforestation policy (Metric: Share of investments in companies without a policy to address deforestation)
- Rate of accidents (Metric: Number of workdays lost to injuries, accidents, fatalities or illness of investee companies expressed as a weighted average)
- Share of investee companies with insufficient whistleblower protection (Metric: Share of investments in entities without policies on the protection of whistleblowers)
- Number of incidents of discrimination reported in investee companies (Metric: Number of incidents of discrimination reported in investee companies expressed as a weighted average)
- Excessive CEO Pay ratio (Metric: Average ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees (excluding the highest-compensated individual))
- Exposure to companies without human rights policy (Metric: Share of investments in entities without a human rights policy)
- Exposure to companies with lack of due diligence (Metric: Share of investments in entities without a due diligence process to identify, prevent, mitigate and address adverse human rights impacts)
- Exposure to companies with lack of processes and measures for preventing trafficking in human beings (Metric: Share of investments in investee companies without policies against trafficking in human beings)
- Exposure to companies with operations and suppliers at significant risk of incidents of child labour (Metric: Share of investments in investee companies exposed to operations and suppliers at significant risk of incidents of child labour in terms of geographic areas or type of operation)

- Exposure to companies with operations and suppliers at significant risk of incidents of forced or compulsory labour (Metric: Share of the investments in investee companies exposed to operations and suppliers at significant risk of incidents of forced or compulsory labour in terms of geographic areas and/or the type of operation)
- Number of identified cases of severe human rights issues and incidents (Metric: Number of cases of severe human rights issues and incidents connected to investee companies on a weighted average basis)
- Exposure to companies with a lack of anti-corruption and anti-bribery policies (Metric: Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption)
- Exposure to companies with cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery (Metric: Share of investments in investee companies with identified insufficiencies in actions taken to address breaches in procedures and standards of anti-corruption and anti-bribery)
- Number of convictions for violation of anti-corruption and anti-bribery laws (Metric: Numbers of convictions and amount of fines for violations of anti-corruption and anti-bribery laws by investee companies)
- Average income inequality (Metric: The distribution of income and economic inequality among the participants in a particular economy including a quantitative indicator explained in the explanation column)
- Average freedom of expression (Metric: Measuring the extent to which political and civil society organisations can operate freely including a quantitative indicator explained in the explanation column)
- Average corruption score (Metric: Average corruption score)
- Non-Cooperative tax jurisdictions (Metric: Investments in jurisdictions on the EU list of non-cooperative jurisdictions for tax purposes)
- Average political stability score (Metric: Measure of the likelihood that the current regime will be overthrown by the use of force using a quantitative indicator explained in the explanation column)
- Average rule of law score (Metric: Measure of the level of corruption, lack of fundamental rights, and the deficiencies in civil and criminal justice using a quantitative indicator explained in the explanation column)

● ***...and compared to previous periods?***

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Fund has a proportion of 49.16% of sustainable investments composed of investments with an environmental or social objective in economic activities that are classified as sustainable within the meaning of Article 2(17) of the Disclosure Regulation.

Sustainable investments within the meaning of Article 2(17) of the Disclosure Regulation

The Fund has invested in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.

- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

In the investment process, the Investment Manager's consideration of these indicators is based on a positive list of companies that have developed a strategy against at least one of the above key indicators and have a track record in addressing environmental and/or social objectives. Information from MSCI ESG Research for the individual key indicators is used as the basis for this positive list.

In relation to the 17 United Nations Sustainable Development Goals, revenues are considered in products and services that are consistent with the 17 United Nations Sustainable Development Goals. Sustainable impact data from MSCI ESG Research is used for this purpose. The contribution of sustainable investments is determined by a share ratio, which is the ratio of the market value in sustainable companies to the market value of all investments of the Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensured that in the selection of sustainable investments, none of the environmental and social objectives listed in Article 2(17) of the Disclosure Regulation or of the environmental objectives included in Article 9 of Regulation (EU) 2020/852 were significantly harmed. Significant harm existed in particular in the case of severe impacts on the adverse sustainability indicators or the breach of the minimum level of protection set out in Article 18 of Regulation (EU) 2020/852. In addition, the Fund invested in securities of such issuers or companies that in their business activities observed the governance aspects referred to in Article 2(17) of the Disclosure Regulation. This was ensured and documented by the exclusions defined in the internationally recognised standards.

How were the indicators for adverse impacts on sustainability factors taken into account?

In selecting sustainable investments for the Fund, the indicators of adverse impact on sustainability factors were used to determine significant harm. Criteria for a severe impact were defined for 33 environmental and social indicators. Investments that did not meet the Investment Manager's defined ambition levels for each of these indicators could not be classified as sustainable investments. In the absence of relevant data, classification of an investment as a sustainable investment was not possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Investments were monitored for alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The principles were based on international standards in the areas of human rights, labour rights, the environment and corruption. If a company had been found to be at fault or to have breached these standards, the company had been excluded for investment by the Fund. In the case of investments already held by the Fund, the relevant investment had been sold.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following PAI were considered:

Environmental Adverse Impact Indicators

- Greenhouse gas (“GHG”) emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste ratio
- Investments in companies without carbon emission reduction initiatives
- Investments in companies producing chemicals
- Non-recycled waste ratio
- Natural species and protected areas
- Deforestation

Social Adverse Impact Indicators

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- Unadjusted gender pay gap
- Board gender diversity
- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
- Investments in companies without workplace accident prevention policies
- Rate of workplace accidents
- Insufficient whistleblower protection
- Incidents of discrimination
- Excessive CEO pay ratio
- Lack of human rights policy
- Lack of due diligence
- Lack of processes and measures for preventing trafficking in human beings
- Operations and suppliers at significant risk of incidents of forced or compulsory labour
- Number of identified cases of severe human rights issues and incidents
- Lack of anti-corruption and anti-bribery policies
- Operations and suppliers at significant risk of incidents of child labour
- Cases of insufficient action taken to address breaches of standards of anticorruption and anti-bribery
- Number of convictions and the number of fines for violations of anti-corruption and anti-bribery laws

The principal adverse impact indicators are taken into account by exclusion criteria.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/10/2022 – 30/09/2023

Largest Investment	Sector	% Assets*	Country
Novo-Nordisk AS	Health Care	6.64	Denmark
LVMH Moët Hennessy Louis Vuitton SE	Consumer Discretionary	6.58	France
Nestlé S.A.	Consumer Staples	6.31	Switzerland
ASML Holding N.V.	Information Technology	6.29	Netherlands
AstraZeneca PLC	Health Care	4.74	United Kingdom
L'Oréal S.A.	Consumer Staples	4.21	France
Roche Holding AG	Health Care	3.08	Switzerland
Schneider Electric SE	Industrials	3.02	France
VINCI S.A.	Industrials	2.27	France
Infineon Technologies AG	Information Technology	2.18	Germany
EssilorLuxottica S.A.	Consumer Discretionary	2.17	France
Rentokil Initial PLC	Industrials	2.14	United Kingdom
DSV A/S	Industrials	2.10	Denmark
Wolters Kluwer N.V.	Industrials	2.08	Netherlands
Compagnie Financière Richemont AG	Consumer Discretionary	2.00	Switzerland

*Average % asset

What was the proportion of sustainability-related investments?

● What was the asset allocation?

49.16% of the Fund was invested in sustainability-related investments at the end of the fiscal year on 30 September 2023.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Top 5 Sectors	% Assets
Industrials	21.38
Health Care	17.89
Consumer Discretionary	17.03
Consumer Staples	14.96
Information Technology	13.06

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The environmental characteristics of the Fund could contribute positively to the taxonomy objective to climate change mitigation and climate change adaptation.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

This Fund does not currently commit to investing in economic activities that are classified as enabling or transitional activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund invests in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.
- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

Since these include both environmental and social objectives, it is not possible to specify minimum proportions for environmentally sustainable, non-taxonomy-compliant investments on the one hand and socially sustainable investments on the other. The total proportion of sustainable investments in relation to the Fund's environmental and social objectives can be found on the first page of this appendix

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Fund invests in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.
- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

Since these include both environmental and social objectives, it is not possible to specify minimum proportions for environmentally sustainable, non-taxonomy-compliant investments on the one hand and socially sustainable investments on the other. The total proportion of sustainable investments in relation to the Fund's environmental and social objectives can be found on the first page of this appendix

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The other investments include hedging instruments and cash instruments.

For other investments that do not fall under the Fund’s sustainability strategy, it is ensured that these are not used contrary to the overall sustainability strategy. Insofar as derivatives may be acquired, it is ensured that the underlying references of the derivatives are compliant with the sustainability strategy. If the derivative references an index, it is ensured that the index has sustainability characteristics. Due to the financial instruments available on the market, there may be deviations in the sustainability characteristics of the underlying reference index from the Fund characteristics. Any derivatives whose underlying references could be classified as not being aligned to the sustainability strategy, as well as currency holdings that do not match the Fund currency or that are not denominated in EUR, USD, GBP, CHF or JPY, may not be included as a significant component in the Fund. The use of derivatives to offset negative market fluctuations is not included. In addition, investments may be specifically excluded from the sustainability strategy that are not subject to an explicit review of minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Our engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had mandated Columbia Threadneedle Investments to exercise voting rights.

If information was available at the underlying asset level, various calculation methods were applied to summarise this at the Fund level.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable.
- **How did this financial product perform compared with the reference benchmark?**
Not applicable.
- **How did this financial product perform compared with the broad market index?**
Not applicable.

ANNEX

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Metzler NEXT Portfolio

Legal entity identifier: (LEI-Code):
635400MVLPEEVJ13TM70

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective**: ___%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 31.80% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics but **did not make any sustainable investments**.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Fund promoted environmental and social characteristics within the meaning of Article 8 of the Disclosure Regulation.

Due to the range of investments the Fund can invest in, the environmental and social characteristics promoted by the Fund address a range of environmental, social and corporate governance (“ESG”) issues.

The Fund’s assets are invested in securities of issuers that meet defined minimum standards in terms of ESG criteria. Each issuer of equities and/or corporate bonds undergoes a sustainability analysis undertaken by the Investment Manager prior to acquisition. The ESG performance of an issuer is systematically evaluated on the basis of various environmental and social criteria, as well as information by which corporate governance practices can be assessed.

These criteria relate to the following issues:

- Environmental

- Climate change mitigation
- Avoidance of detrimental impacts on ecosystems and loss of biodiversity
- Sales in climate-friendly technologies

- Social

- Universal human rights
- Prohibition of child and forced labour
- Health and safety in the workplace

- Corporate Governance

- Structure and quality of the supervisory board of an investee company
- Principles of anti-corruption under the UN Global Compact.

The Fund promotes these environmental and social characteristics through the Investment Manager’s consideration of ESG criteria using the following approaches as further outlined below: (i) exclusions, (ii) ESG integration, and (iii) engagement. The abbreviation “ESG” stands for the three aspects of sustainability (i) environmental; (ii) social; and (iii) good corporate governance.

(i) Exclusions

The Fund applied activity-based exclusions. Companies with the following activities are excluded:

- Tobacco (Production, Downstream) > 5% Revenue
- Nuclear Energy > 5% Revenue
- Nuclear Weapons (Upstream, Production, Downstream) > 0% Revenue
- Nuclear Weapons (Upstream, Production, Downstream) > 0% Revenue
- Conventional Weapons (Upstream, Production, Downstream) > 5% Revenue
- Unconventional Weapons (Upstream, Production, Downstream) > 0% Revenue
- Coal (Upstream, Production) > 5% Revenue
- Other Fossil Fuel (Production) > 5% Revenue

The Fund applied norm-based screening in connection with UN Global Compact, OECD Guidelines and ILO (International Labour Organisation).

The Fund applied exclusions for sovereigns. The following exclusions were applied:

- Sovereigns with serious violations of democratic and human rights are excluded on basis of Freedom House evaluation.
- Sovereigns that are exposed to corruption

Investments in sovereign issuers are excluded:

- (a) which do not allow a particular group of people, or the population in general, free access to political rights and civil liberties;
- (b) whose peace status is to be classified as very low;
- (c) which have a serious level of corruption;
- (d) with close connections to cases of money laundering; and/or
- (e) which have serious violations of democratic and human rights.

(ii) ESG Integration

The aim of ESG integration is to improve the risk/return profile of the Fund by integrating sustainability aspects into the traditional investment analysis process. The assessment of an issuer's sustainability is carried out by the Investment Manager using published information from the issuers. All issuers of equities and/or corporate bonds are subject to sustainability analysis before their securities are purchased.

In ESG integration, environmental, social and corporate governance criteria are considered by the Investment Manager when making investment decisions. In this context, the investment universe only includes investments that do not fall under the above exclusion criteria.

Key figures on climate and other environmental concerns, negative impacts in the areas of social and employee matters, human rights and anti-corruption are all considered. The analysis covers the following areas:

(a) involvement in controversial business practices based on over 100 internationally recognised standards, including the UN Global Compact;

(b) sustainability risk management: In addition to ESG ratings and scores, several key performance indicators are considered, which, for example, measure the handling of employee matters;

(c) climate ratings to measure the transition to a low-carbon economy; and

(d) compliance of companies with the objectives of the Paris Agreement adopted under the United Nations Framework Convention on Climate Change.

In addition, the Investment Manager may also rely on the sustainability assessment of external providers to evaluate the above criteria. External data providers collect information from companies or issuers on how they deal with the above-mentioned sustainability issues and generally also assess these and make this information available to the Investment Manager. With regard to a violation of the ten principles of the UN Global Compact, the Investment Manager generally refers to the information in the sustainability assessments of external data providers.

(iii) Engagement

Engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had also mandated Columbia Threadneedle Investments to engage with underlying companies via dialogue and voting rights.

● **How did the sustainability indicators perform?**

All sustainability indicators of the Fund, which serve to fulfill the ecological and/or social characteristics of the Fund, were complied with during the reference period. Compliance with the environmental and/or social criteria for the selection of assets was verified before as well as after acquisition.

In addition, the Fund considered the following sustainability factors in its strategy on a mandatory basis:

- GHG emissions (Metric: Scope 1 GHG emissions)
- GHG emissions (Metric: Scope 2 GHG emissions)
- GHG emissions (Metric: Scope 3 GHG emissions)
- GHG emissions (Metric: Scope 1 and 2 GHG emissions)
- GHG emissions (Metric: Scope 1, 2 and 3 GHG emissions)
- Carbon footprint (Metric: Carbon footprint Scope 1 and 2)
- Carbon footprint (Metric: Carbon footprint Scope 1, 2 and 3)
- GHG intensity of investee companies (Metric: GHG intensity of investee companies Scope 1 and 2)

- GHG intensity of investee companies (Metric: GHG intensity of investee companies Scope 1, 2 and 3)
- Exposure to companies active in the fossil fuel sector (Metric: Share of investments in companies active in the fossil fuel sector)
- Share energy consumption from non-renewable sources (Metric: Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources)
- Share energy production from non-renewable sources (Metric: Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE A)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE B)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE C)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE D)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE E)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE F)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE G)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE H)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE L)
- Activities negatively affecting biodiversity-sensitive areas (Metric: Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas)
- Water Emissions (Metric: Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average)
- Hazardous waste and radioactive waste ratio (Metric: Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average)
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (Metric: Share of investments in companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises)

- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Metric: Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises)
- Unadjusted gender pay gap (Metric: Average unadjusted gender pay gap of investee companies)
- Board gender diversity (Metric: Average ratio of female to male board members in investee companies, expressed as a percentage of all board members)
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Metric: Share of investments in investee companies involved in the manufacture or selling of controversial weapons)
- Investing in companies without carbon emission reduction initiatives investment weight (Metric: Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement) Exposure to companies producing chemicals (Metric: Share of investments in investee companies the activities of which fall under Division 20.2 of Annex I to Regulation (EC) No 1893/2006)
- Non-Recycled waste ratio (Metric: Tonnes of non-recycled waste generated by investee companies per million EUR invested, expressed as a weighted average)
- Share of investments in investee companies whose operations affect threatened species (Metric: Share of investments in investee companies whose operations affect threatened species)
- Share of investee companies without deforestation policy (Metric: Share of investments in companies without a policy to address deforestation)
- Rate of accidents (Metric: Number of workdays lost to injuries, accidents, fatalities or illness of investee companies expressed as a weighted average)
- Share of investee companies with insufficient whistleblower protection (Metric: Share of investments in entities without policies on the protection of whistleblowers)
- Number of incidents of discrimination reported in investee companies (Metric: Number of incidents of discrimination reported in investee companies expressed as a weighted average)
- Excessive CEO Pay ratio (Metric: Average ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees (excluding the highest-compensated individual))
- Exposure to companies without human rights policy (Metric: Share of investments in entities without a human rights policy)
- Exposure to companies with lack of due diligence (Metric: Share of investments in entities without a due diligence process to identify, prevent, mitigate and address adverse human rights impacts)
- Exposure to companies with lack of processes and measures for preventing trafficking in human beings (Metric: Share of investments in investee companies without policies against trafficking in human beings)
- Exposure to companies with operations and suppliers at significant risk of incidents of child labour (Metric: Share of investments in investee companies exposed to operations and suppliers at significant risk of incidents of child labour in terms of geographic areas or type of operation)
- Exposure to companies with operations and suppliers at significant risk of incidents of forced or compulsory labour (Metric: Share of the investments in investee

companies exposed to operations and suppliers at significant risk of incidents of forced or compulsory labour in terms in terms of geographic areas and/or the type of operation)

- Number of identified cases of severe human rights issues and incidents (Metric: Number of cases of severe human rights issues and incidents connected to investee companies on a weighted average basis)
- Exposure to companies with a lack of anti-corruption and anti-bribery policies (Metric: Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption)
- Exposure to companies with cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery (Metric: Share of investments in investee companies with identified insufficiencies in actions taken to address breaches in procedures and standards of anti-corruption and anti-bribery)
- Number of convictions for violation of anti-corruption and anti-bribery laws (Metric: Numbers of convictions and amount of fines for violations of anti-corruption and anti-bribery laws by investee companies)
- Average income inequality (Metric: The distribution of income and economic inequality among the participants in a particular economy including a quantitative indicator explained in the explanation column)
- Average freedom of expression (Metric: Measuring the extent to which political and civil society organisations can operate freely including a quantitative indicator explained in the explanation column)
- Average corruption score (Metric: Average corruption score)
- Non-Cooperative tax jurisdictions (Metric: Investments in jurisdictions on the EU list of non-cooperative jurisdictions for tax purposes)
- Average political stability score (Metric: Measure of the likelihood that the current regime will be overthrown by the use of force using a quantitative indicator explained in the explanation column)
- Average rule of law score (Metric: Measure of the level of corruption, lack of fundamental rights, and the deficiencies in civil and criminal justice using a quantitative indicator explained in the explanation column)

● ***...and compared to previous periods?***

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Fund will have a proportion of 31.80% of sustainable investments composed of investments with an environmental or social objective in economic activities that are classified as sustainable within the meaning of Article 2(17) of the Disclosure Regulation.

Sustainable investments within the meaning of Article 2(17) of the Disclosure Regulation
The Fund invests in environmentally and/or socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals: Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.

- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

In the investment process, the Investment Manager's consideration of these indicators is based on a positive list of companies that have developed a strategy against at least one of the above key indicators and have a track record in addressing environmental and/or social objectives. Information from MSCI ESG Research for the individual key indicators is used as the basis for this positive list.

In relation to the 17 United Nations Sustainable Development Goals, revenues are considered in products and services that are consistent with the 17 United Nations Sustainable Development Goals. Sustainable impact data from MSCI ESG Research is used for this purpose. The contribution of sustainable investments is determined by a share ratio, which is the ratio of the market value in sustainable companies to the market value of all investments of the Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensured that in the selection of sustainable investments, none of the environmental and social objectives listed in Article 2(17) of the Disclosure Regulation or of the environmental objectives included in Article 9 of Regulation (EU) 2020/852 were significantly harmed. Significant harm existed in particular in the case of severe impacts on the adverse sustainability indicators or the breach of the minimum level of protection set out in Article 18 of Regulation (EU) 2020/852. In addition, the Fund invested in securities of such issuers or companies that in their business activities observed the governance aspects referred to in Article 2(17) of the Disclosure Regulation. This was ensured and documented by the exclusions defined in the internationally recognised standards.

How were the indicators for adverse impacts on sustainability factors taken into account?

In selecting sustainable investments for the Fund, the indicators of adverse impact on sustainability factors were used to determine significant harm. Criteria for a severe impact were defined for 33 environmental and social indicators. Investments that did not meet the Investment Manager's defined ambition levels for each of these indicators could not be classified as sustainable investments. In the absence of relevant data, classification of an investment as a sustainable investment was not possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Investments were monitored for alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The principles were based on international standards in the areas of human rights, labour rights, the environment and corruption. If a company had been found to be at fault or to have breached these standards, the company had been excluded for investment by the Fund. In the case of investments already held by the Fund, the relevant investment had been sold.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union? criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following PAI were considered

Environmental Adverse Impact Indicators

- Greenhouse gas (“GHG”) emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity sensitive areas
- Emissions to water
- Hazardous waste ratio
- Investments in companies without carbon emission reduction initiatives
- Investments in companies producing chemicals
- Non-recycled waste ratio
- Natural species and protected areas
- Deforestation

Social Adverse Impact Indicators

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- Unadjusted gender pay gap
- Board gender diversity
- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
- Investments in companies without workplace accident prevention policies
- Rate of workplace accidents
- Insufficient whistleblower protection
- Incidents of discrimination
- Excessive CEO pay ratio
- Lack of human rights policy
- Lack of due diligence
- Lack of processes and measures for preventing trafficking in human beings
- Operations and suppliers at significant risk of incidents of child labour
- Operations and suppliers at significant risk of incidents of forced or compulsory labour
- Number of identified cases of severe human rights issues and incidents
- Lack of anti-corruption and anti-bribery policies
- Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery
- Number of convictions and the number of fines for violations of anti-corruption and anti-bribery laws

The following PAI are considered for sovereign investments:

- GHG intensity
- Investee countries subject to social violations
- Average income inequality score
- Average freedom of expression score
- Average corruption score
- Non-cooperative tax jurisdictions
- Average political stability score
- Average rule of law score

The principal adverse impact indicators are taken into account by exclusion criteria.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: *01/10/2022-30/09/2023*

Largest Investment	Sector	% Assets*	Country
Metzler Global Equities Sustainability	Equity Funds	18.30	Ireland
Metzler Global Growth Sustainability	Equity Funds	17.78	Germany

*Average % asset

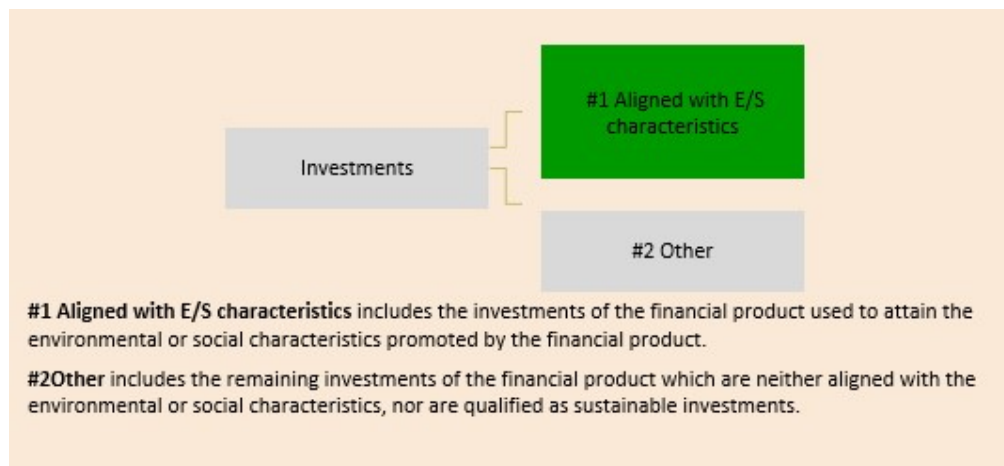

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

The Fund closed on 28 September 2023.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● *In which economic sectors were the investments made?*

Top 5 Sectors	% Assets
Equity funds	69.03
Bond funds	27.58

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The environmental characteristics of the Fund could contribute positively to the taxonomy objective to climate change mitigation and climate change adaptation.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

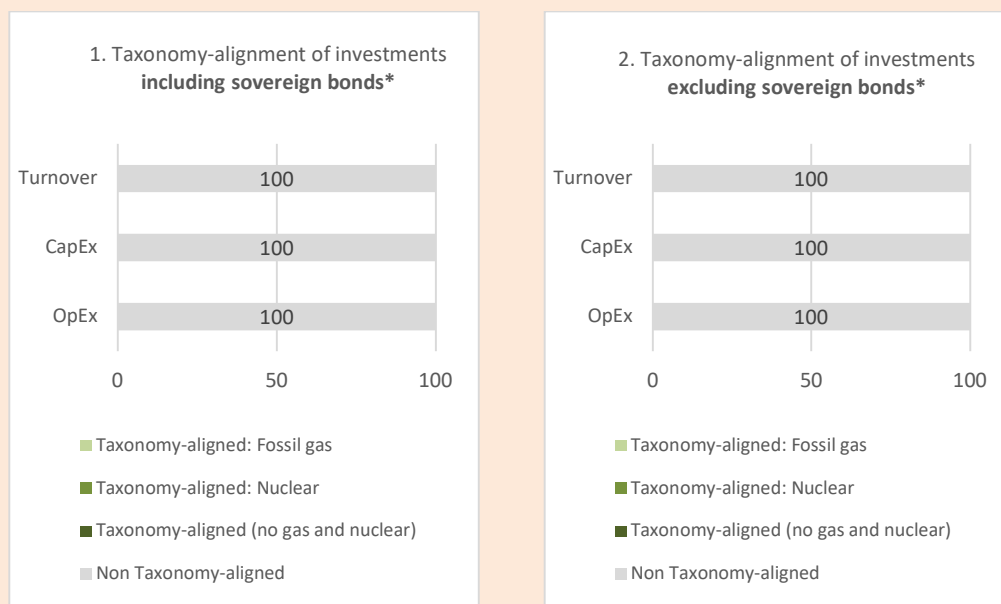

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- Yes:
- In fossil gas In nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

This Fund does not currently commit to investing in economic activities that are classified as enabling or transitional activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund invests in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.
- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO₂ reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

Since these include both environmental and social objectives, it is not possible to specify minimum proportions for environmentally sustainable, non-taxonomy-compliant investments on the one hand and socially sustainable investments on the other. The total proportion of sustainable investments in relation to the Fund's environmental and social objectives can be found on the first page of this appendix

What was the share of socially sustainable investments?

The Fund invests in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.
- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO₂ reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

Since these include both environmental and social objectives, it is not possible to specify minimum proportions for environmentally sustainable, non-taxonomy-compliant investments on the one hand and socially sustainable investments on the other. The total proportion of sustainable investments in relation to the Fund's environmental and social objectives can be found on the first page of this appendix

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The other investments include hedging instruments, instruments for diversification purposes and cash instruments.

For other investments that do not fall under the Fund’s sustainability strategy, it is ensured that these are not used contrary to the overall sustainability strategy. Insofar as derivatives may be acquired, it is ensured that the underlying references of the derivatives are compliant with the sustainability strategy. If the derivative references an index, it is ensured that the index has sustainability characteristics. Due to the financial instruments available on the market, there may be deviations in the sustainability characteristics of the underlying reference index from the Fund characteristics. Any derivatives whose underlying references could be classified as not being aligned to the sustainability strategy, as well as currency holdings that do not match the Fund currency or that are not denominated in EUR, USD, GBP, CHF or JPY, may not be included as a significant component in the Fund. The use of derivatives to offset negative market fluctuations is not included. In addition, investments may be specifically excluded from the sustainability strategy that are not subject to an explicit review of minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Our engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had mandated Columbia Threadneedle Investments to exercise voting rights.

If information was available at the underlying asset level, various calculation methods were applied to summarise this at the Fund level.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- **How does the reference benchmark differ from a broad market index?**
Not applicable.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable.
- **How did this financial product perform compared with the reference benchmark?**
Not applicable.
- **How did this financial product perform compared with the broad market index?**
Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Metzler Japanese Equity Sustainability Fund

Legal entity identifier: (LEI-Code): 635400WMEE6EI2CEZA38

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective**: __%

 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: __%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 19.75% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics but **did not make any sustainable investments**.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Fund promoted **environmental and social characteristics** within the meaning of Article 8 of the Disclosure Regulation.

Due to the range of investments the Fund can invest in, the environmental and social characteristics promoted by the Fund address a range of environmental, social and corporate governance (“ESG”) issues.

The Fund’s assets are invested in securities of issuers that meet defined minimum standards in terms of ESG criteria. Each issuer of equities and/or corporate bonds undergoes a sustainability analysis undertaken by the Investment Manager prior to acquisition. The ESG performance of an issuer is systematically evaluated on the basis of various environmental and social criteria, as well as information by which corporate governance practices can be assessed.

These criteria relate to the following issues:

- Environmental

- Climate change mitigation
- Avoidance of detrimental impacts on ecosystems and loss of biodiversity

- Social

- Universal human rights
- Prohibition of child and forced labour
- Health and safety in the workplace

- Corporate Governance

- Principles of anti-corruption under the UN Global Compact.

The Fund promotes these environmental and social characteristics through the Investment Manager’s consideration of ESG criteria using the following approaches as further outlined below, (i) exclusions, (ii) ESG integration, and (iii) engagement. The abbreviation “ESG” stands for the three aspects of sustainability (i) environmental; (ii) social; and (iii) good corporate governance.

(i) Exclusions

The Fund applied activity-based exclusions. Companies with the following activities are excluded:

- Tobacco (Production, Downstream) > 5% Revenue
- Nuclear Energy > 5% Revenue
- Nuclear Weapons (Upstream, Production, Downstream) > 0% Revenue
- Conventional Weapons (Upstream, Production, Downstream) > 5% Revenue
- Unconventional Weapons (Upstream, Production, Downstream) > 0% Revenue
- Coal (Upstream, Production) > 5% Revenue
- Other Fossil Fuel (Production) > 5% Revenue

The Fund applied norm-based screening in connection with UN Global Compact, OECD Guidelines, and ILO (International Labour Organisation).

The (Sub)Fund applied exclusions for sovereigns. The following exclusions were applied:

- Sovereigns with serious violations of democratic and human rights are excluded on basis of Freedom House evaluation.
- Sovereigns that are exposed to corruption,

Investments in sovereign issuers are excluded:

(a) which do not allow a particular group of people, or the population in general, free access to political rights and civil liberties.

(b) whose peace status is to be classified as very low;

(c) which have a serious level of corruption.

(d) with close connections to cases of money laundering; and/or

(e) which have serious violations of democratic and human rights.

(ii) ESG Integration

The aim of ESG integration is to improve the risk/return profile of the Fund by integrating sustainability aspects into the traditional investment analysis process. The assessment of an issuer's sustainability is carried out by the Investment Manager using published information from the issuers.

All issuers of equities and/or corporate bonds are subject to sustainability analysis before their securities are purchased. The Investment Manager applies a top-down screening and bottom-up research on sectors and stocks by using ESG factors. The Investment Manager's in-house developed ESG framework is specific for various sectors.

In ESG integration, environmental, social and corporate governance criteria are considered by the Investment Manager when making investment decisions. In this context, the investment universe only includes investments that do not fall under the above exclusion criteria.

Key figures on climate and other environmental concerns, negative impacts in the areas of social and employee matters, human rights and anti-corruption are all considered. The analysis covers the following areas:

Environmental

- Key climate change factors based on the TCFD (Task Force on Climate related Financial Disclosures) framework and other relevant perspectives such as the social impact of an environmental product.

Social

- Key factors related to stakeholder relationships (e.g., employees, customers, or business partners).

Corporate governance

- Mechanism and structure of corporate governance

In addition, the Investment Manager may also rely on the sustainability assessment of external providers to evaluate the above criteria. External data providers collect information from companies or issuers on how they deal with the above-mentioned sustainability issues and generally also assess these and make this information available to the Investment Manager. With regard to a violation of the ten principles of the UN Global Compact, the Investment Manager generally refers to the information in the sustainability assessments of external data providers.

(iii) Engagement

Engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had also mandated Columbia Threadneedle Investments to engage with underlying companies via dialogue and voting rights.

How did the sustainability indicators perform?

All sustainability indicators of the Fund, which serve to fulfill the ecological and/or social characteristics of the Fund, were complied with during the reference period. Compliance with the environmental and/or social criteria for the selection of assets was verified before as well as after acquisition.

In addition, the Fund obligatorily considered the following sustainability factors in its strategy and discloses the adverse effects on them:

- Exposure to companies active in the fossil fuel sector (Metric: Share of investments in companies active in the fossil fuel sector)
- Activities negatively affecting biodiversity-sensitive areas (Metric: Share of investments in investee companies with sites/operations located in or near to

biodiversity-sensitive areas where activities of those investee companies negatively affect those areas)

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (Metric: Share of investments in companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises)
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Metric: Share of investments in investee companies involved in the manufacture or selling of controversial weapons)
- Number of identified cases of severe human rights issues and incidents (Metric: Number of cases of severe human rights issues and incidents connected to investee companies on a weighted average basis)

● ***...and compared to previous periods?***

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Fund will have a proportion of 19.75% of sustainable investments composed of investments with an environmental or social objective in economic activities that are classified as sustainable within the meaning of Article 2(17) of the Disclosure Regulation.

Sustainable investments within the meaning of Article 2(17) of the Disclosure Regulation
The Fund invests in environmentally and/or socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals: Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.
- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

In the investment process, the Investment Manager's consideration of these indicators is based on a positive list of companies that have developed a strategy against at least one of the above key indicators and have a track record in addressing environmental and/or social objectives. Information from MSCI ESG Research for the individual key indicators is used as the basis for this positive list.

In relation to the 17 United Nations Sustainable Development Goals, revenues are considered in products and services that are consistent with the 17 United Nations Sustainable Development Goals. Sustainable impact data from MSCI ESG Research is used for this purpose. The contribution of sustainable investments is determined by a share ratio, which is the ratio of the market value in sustainable companies to the market value of all investments of the Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensured that in the selection of sustainable investments, none of the environmental and social objectives listed in Article 2(17) of the Disclosure Regulation or of the environmental objectives included in Article 9 of Regulation (EU) 2020/852 were significantly harmed. Significant harm existed in particular in the case of severe impacts on the adverse sustainability indicators or the breach of the minimum level of protection set out in Article 18 of Regulation (EU) 2020/852. In addition, the Fund invested in securities of such issuers or companies that in their business activities observed the governance aspects referred to in Article 2(17) of the Disclosure Regulation. This was ensured and documented by the exclusions defined in the internationally recognised standards.

How were the indicators for adverse impacts on sustainability factors taken into account?

In selecting sustainable investments for the Fund, the indicators of adverse impact on sustainability factors were used to determine significant harm. Criteria for a severe impact were defined for 33 environmental and social indicators. Investments that did not meet the Investment Manager's defined ambition levels for each of these indicators could not be classified as sustainable investments. In the absence of relevant data, classification of an investment as a sustainable investment was not possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Investments were monitored for alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The principles were based on international standards in the areas of human rights, labour rights, the environment and corruption. If a company had been found to be at fault or to have breached these standards, the company had been excluded for investment by the Fund. In the case of investments already held by the Fund, the relevant investment had been sold.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following PAI were considered:

Environmental Adverse Impact Indicators

- Exposure to companies active in the fossil fuel sector.
- Activities negatively affecting biodiversity-sensitive areas.

Social Adverse Impact Indicators

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Number of identified cases of severe human rights issues and incidents.

The principal adverse impact indicators are taken into account by exclusion criteria.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: *01/10/2022 – 30/09/2023*

Largest Investment	Sector	% Assets*	Country
Toyota Motor Corp.	Consumer Discretionary	3.85	Japan
Hitachi Ltd.	Information Technology	3.25	Japan
Mitsubishi UFJ Financial Group Inc.	Financials	3.23	Japan
Nippon Telegraph and Telephone Corp.	Telecommunication Services	3.18	Japan
Sumitomo Mitsui Financial Group Inc.	Financials	3.14	Japan
ITOCHU Corp.	Industrials	2.65	Japan
Mitsubishi Corp.	Industrials	2.52	Japan
Honda Motor Co. Ltd.	Consumer Discretionary	2.51	Japan
Takeda Pharmaceutical Co. Ltd.	Health Care	2.46	Japan
Sony Group Corp.	Consumer Discretionary	2.30	Japan
East Japan Railway Co.	Industrials	2.10	Japan
Fujitsu Ltd.	Information Technology	1.91	Japan
Marubeni Corp.	Industrials	1.76	Japan
NEC Corp.	Information Technology	1.71	Japan
TDK Corp.	Information Technology	1.69	Japan

*Average % asset

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

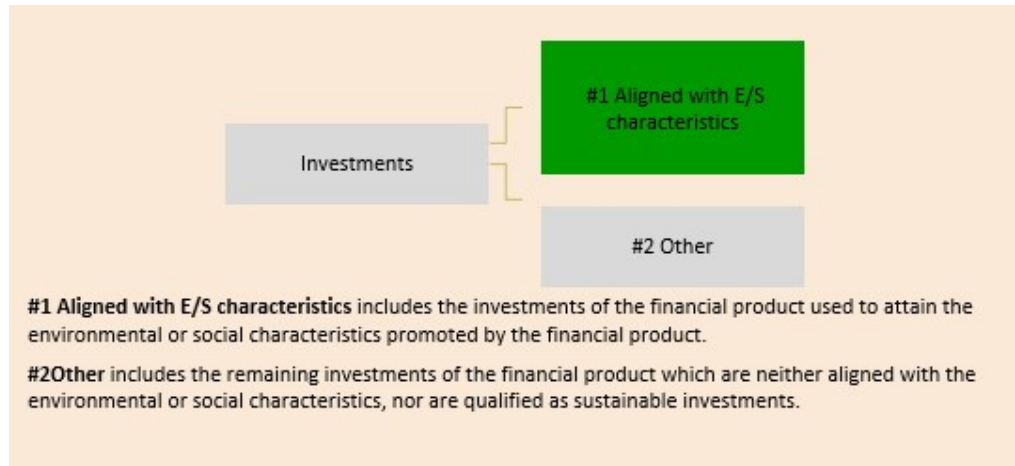

● *What was the asset allocation?*

19.75% of the Fund was invested in sustainability-related investments at the end of the fiscal year on 30 September 2023.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Top 5 Sectors	% Assets
Industrials	21.47
Consumer Discretionary	19.72
Information Technology	17.37
Financials	12.84
Materials	6.99

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The environmental characteristics of the Fund could contribute positively to the taxonomy objective to climate change mitigation and climate change adaptation.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

This Fund does not currently commit to investing in economic activities that are classified as enabling or transitional activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund invests in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.

- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

Since these include both environmental and social objectives, it is not possible to specify minimum proportions for environmentally sustainable, non-taxonomy-compliant investments on the one hand and socially sustainable investments on the other. The total proportion of sustainable investments in relation to the Fund's environmental and social objectives can be found on the first page of this appendix.

What was the share of socially sustainable investments?

The Fund invests in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.
- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

Since these include both environmental and social objectives, it is not possible to specify minimum proportions for environmentally sustainable, non-taxonomy-compliant investments on the one hand and socially sustainable investments on the other. The total proportion of sustainable investments in relation to the Fund's environmental and social objectives can be found on the first page of this appendix.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The other investments include hedging instruments and cash instruments.

For other investments that do not fall under the Fund's sustainability strategy, it is ensured that these are not used contrary to the overall sustainability strategy. Insofar as derivatives may be acquired, it is ensured that the underlying references of the derivatives are compliant with the sustainability strategy. If the derivative references an index, it is ensured that the index has sustainability characteristics. Due to the financial instruments available on the market, there may be deviations in the sustainability characteristics of the underlying reference index from the Fund characteristics. Any derivatives whose underlying references could be classified as not being aligned to the sustainability strategy, as well as currency holdings that do not match the Fund currency or that are not denominated in EUR, USD, GBP, CHF or JPY, may not be included as a significant component in the Fund. The use of derivatives to offset negative market fluctuations is not included. In addition, investments may be specifically excluded from the sustainability strategy that are not subject to an explicit review of minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Our engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had mandated Columbia Threadneedle Investments to exercise voting rights.

If information was available at the underlying asset level, various calculation methods were applied to summarise this at the Fund level.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable

Not applicable
- ***How did this financial product perform compared with the broad market index?***
Not applicable

ANNEX

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Metzler Global Equities Sustainability

Legal entity identifier: (LEI-Code): 635400RJJCCIP26NMJ76

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective**: __%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: __%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.17% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics but **did not make any sustainable investments**.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Fund promoted environmental and social characteristics within the meaning of Article 8 of the Disclosure Regulation.

Due to the range of investments the Fund can invest in, the environmental and social characteristics promoted by the Fund address a range of environmental, social and corporate governance (“ESG”) issues.

The Fund’s assets are invested in securities of issuers that meet defined minimum standards in terms of ESG criteria. Each issuer of equities and/or corporate bonds undergoes a sustainability analysis undertaken by the Investment Manager prior to acquisition. The ESG performance of an issuer is systematically evaluated on the basis of various environmental and social criteria, as well as information by which corporate governance practices can be assessed.

These criteria relate to the following issues:

Environmental

- Climate change mitigation
- Avoidance of detrimental impacts on ecosystems and loss of biodiversity
- Sales in climate-friendly technologies

Social

- Universal human rights
- Prohibition of child and forced labour
- Health and safety in the workplace

Corporate Governance

- Structure and quality of the supervisory board of an investee company
- Principles of anti-corruption under the UN Global Compact.

The Fund promotes these environmental and social characteristics through the Investment Manager’s consideration of ESG criteria using the following approaches as further outlined below (i) exclusions,(ii) ESG integration, and (iii) engagement. The abbreviation "ESG" stands for the three aspects of sustainability (i) environmental; (ii) social; and (iii) good corporate governance.

(i) Exclusions

The Fund applied activity-based exclusions. Companies with the following activities are excluded:

- Tobacco (Production, Downstream) > 5% Revenue
- Nuclear Energy > 5% Revenue
- Nuclear Weapons (Upstream, Production, Downstream) > 0% Revenue
- Conventional Weapons (Upstream, Production, Downstream) > 5%
- Unconventional Weapons (Upstream, Production, Downstream) > 0% Revenue
- Coal (Upstream, Production) > 5% Revenue
- Other Fossil Fuel (Production) > 5% Revenue

The Fund applied norm-based screening in connection with UN Global Compact, OECD Guidelines and ILO (International Labour Organisation).

The Fund applied exclusions for sovereigns. The following exclusions were applied:

- Sovereigns with serious violations of democratic and human rights are excluded on basis of Freedom House evaluation.
- Sovereigns that are exposed to corruption,

Investments in sovereign issuers are excluded:

- (a) which do not allow a particular group of people, or the population in general, free access to political rights and civil liberties;
- (b) whose peace status is to be classified as very low;
- (c) which have a serious level of corruption;
- (d) with close connections to cases of money laundering; and/or
- (e) which have serious violations of democratic and human rights.

(ii) ESG Integration

The aim of ESG integration is to improve the risk/return profile of the Fund by integrating sustainability aspects into the traditional investment analysis process. The assessment of an issuer's sustainability is carried out by the Investment Manager using published information from the issuers. All issuers of equities and/or corporate bonds are subject to sustainability analysis before their securities are purchased.

In ESG integration, environmental, social and corporate governance criteria are considered by the Investment Manager when making investment decisions. In this context, the investment universe only includes investments that do not fall under the above exclusion criteria.

Key figures on climate and other environmental concerns, negative impacts in the areas of social and employee matters, human rights and anti-corruption are all considered. The analysis covers the following areas:

(a) involvement in controversial business practices based on over 100 internationally recognised standards, including the UN Global Compact;

(b) sustainability risk management: In addition to ESG ratings and scores, several key performance indicators are considered, which, for example, measure the handling of employee matters;

(c) climate ratings to measure the transition to a low-carbon economy; and

(d) compliance of companies with the objectives of the Paris Agreement adopted under the United Nations Framework Convention on Climate Change.

In addition, the Investment Manager may also rely on the sustainability assessment of external providers to evaluate the above criteria. External data providers collect information from companies or issuers on how they deal with the above-mentioned sustainability issues and generally also assess these and make this information available to the Investment Manager. With regard to a violation of the ten principles of the UN Global Compact, the Investment Manager generally refers to the information in the sustainability assessments of external data providers.

(iii) Engagement

Engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had also mandated Columbia Threadneedle Investments to engage with underlying companies via dialogue and voting rights

How did the sustainability indicators perform?

All sustainability indicators of the Fund, which serve to fulfill the ecological and/or social characteristics of the fund, were complied with during the reference period. Compliance with the environmental and/or social criteria for the selection of assets was verified before as well as after acquisition.

In addition, the Fund considered the following sustainability factors in its strategy on a mandatory basis:

- GHG emissions (Metric: Scope 1 GHG emissions)
- GHG emissions (Metric: Scope 2 GHG emissions)
- GHG emissions (Metric: Scope 3 GHG emissions)
- GHG emissions (Metric: Scope 1 and 2 GHG emissions)
- GHG emissions (Metric: Scope 1, 2 and 3 GHG emissions)
- Carbon footprint (Metric: Carbon footprint Scope 1 and 2)
- Carbon footprint (Metric: Carbon footprint Scope 1, 2 and 3)
- GHG intensity of investee companies (Metric: GHG intensity of investee companies Scope 1 and 2)

- GHG intensity of investee companies (Metric: GHG intensity of investee companies Scope 1, 2 and 3)
- Exposure to companies active in the fossil fuel sector (Metric: Share of investments in companies active in the fossil fuel sector)
- Share energy consumption from non-renewable sources (Metric: Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources)
- Share energy production from non-renewable sources (Metric: Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE A)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE B)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE C)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE D)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE E)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE F)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE G)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE H)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE L)
- Activities negatively affecting biodiversity-sensitive areas (Metric: Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas)
- Water Emissions (Metric: Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average)
- Hazardous waste and radioactive waste ratio (Metric: Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average)
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (Metric: Share of investments in companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises)

- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Metric: Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises)
- Unadjusted gender pay gap (Metric: Average unadjusted gender pay gap of investee companies)
- Board gender diversity (Metric: Average ratio of female to male board members in investee companies, expressed as a percentage of all board members)
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Metric: Share of investments in investee companies involved in the manufacture or selling of controversial weapons)
- Investing in companies without carbon emission reduction initiatives investment weight (Metric: Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement)Exposure to companies producing chemicals (Metric: Share of investments in investee companies the activities of which fall under Division 20.2 of Annex I to Regulation (EC) No 1893/2006)
- Exposure to companies producing chemicals (Metric: Share of investments in investee companies the activities of which fall under Division 20.2 of Annex I to Regulation (EC) No 1893/2006)
- Non-Recycled waste ratio (Metric: Tonnes of non-recycled waste generated by investee companies per million EUR invested, expressed as a weighted average)
- Share of investments in investee companies whose operations affect threatened species (Metric: Share of investments in investee companies whose operations affect threatened species)
- Share of investee companies without deforestation policy (Metric: Share of investments in companies without a policy to address deforestation)
- Rate of accidents (Metric: Number of workdays lost to injuries, accidents, fatalities or illness of investee companies expressed as a weighted average)
- Share of investee companies with insufficient whistleblower protection (Metric: Share of investments in entities without policies on the protection of whistleblowers)
- Number of incidents of discrimination reported in investee companies (Metric: Number of incidents of discrimination reported in investee companies expressed as a weighted average)
- Excessive CEO Pay ratio (Metric: Average ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees (excluding the highest-compensated individual))
- Exposure to companies without human rights policy (Metric: Share of investments in entities without a human rights policy)
- Exposure to companies with lack of due diligence (Metric: Share of investments in entities without a due diligence process to identify, prevent, mitigate and address adverse human rights impacts)
- Exposure to companies with lack of processes and measures for preventing trafficking in human beings (Metric: Share of investments in investee companies without policies against trafficking in human beings)
- Exposure to companies with operations and suppliers at significant risk of incidents of child labour (Metric: Share of investments in investee companies exposed to operations and suppliers at significant risk of incidents of child labour in terms of geographic areas or type of operation)

- Exposure to companies with operations and suppliers at significant risk of incidents of forced or compulsory labour (Metric: Share of the investments in investee companies exposed to operations and suppliers at significant risk of incidents of forced or compulsory labour in terms of geographic areas and/or the type of operation)
- Number of identified cases of severe human rights issues and incidents (Metric: Number of cases of severe human rights issues and incidents connected to investee companies on a weighted average basis)
- Exposure to companies with a lack of anti-corruption and anti-bribery policies (Metric: Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption)
- Exposure to companies with cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery (Metric: Share of investments in investee companies with identified insufficiencies in actions taken to address breaches in procedures and standards of anti-corruption and anti-bribery)
- Number of convictions for violation of anti-corruption and anti-bribery laws (Metric: Numbers of convictions and amount of fines for violations of anti-corruption and anti-bribery laws by investee companies)
- Average income inequality (Metric: The distribution of income and economic inequality among the participants in a particular economy including a quantitative indicator explained in the explanation column)
- Average freedom of expression (Metric: Measuring the extent to which political and civil society organisations can operate freely including a quantitative indicator explained in the explanation column)
- Average corruption score (Metric: Average corruption score)
- Non-Cooperative tax jurisdictions (Metric: Investments in jurisdictions on the EU list of non-cooperative jurisdictions for tax purposes)
- Average political stability score (Metric: Measure of the likelihood that the current regime will be overthrown by the use of force using a quantitative indicator explained in the explanation column)
- Average rule of law score (Metric: Measure of the level of corruption, lack of fundamental rights, and the deficiencies in civil and criminal justice using a quantitative indicator explained in the explanation column)

● ***...and compared to previous periods?***

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Fund has a proportion of 57.17% of sustainable investments composed of investments with an environmental or social objective in economic activities that are classified as sustainable within the meaning of Article 2(17) of the Disclosure Regulation.

Sustainable investments within the meaning of Article 2(17) of the Disclosure Regulation

The Fund has invested in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.

- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

In the investment process, the Investment Manager's consideration of these indicators is based on a positive list of companies that have developed a strategy against at least one of the above key indicators and have a track record in addressing environmental and/or social objectives. Information from MSCI ESG Research for the individual key indicators is used as the basis for this positive list.

In relation to the 17 United Nations Sustainable Development Goals, revenues are considered in products and services that are consistent with the 17 United Nations Sustainable Development Goals. Sustainable impact data from MSCI ESG Research is used for this purpose. The contribution of sustainable investments is determined by a share ratio, which is the ratio of the market value in sustainable companies to the market value of all investments of the Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensured that in the selection of sustainable investments, none of the environmental and social objectives listed in Article 2(17) of the Disclosure Regulation or of the environmental objectives included in Article 9 of Regulation (EU) 2020/852 were significantly harmed. Significant harm existed in particular in the case of severe impacts on the adverse sustainability indicators or the breach of the minimum level of protection set out in Article 18 of Regulation (EU) 2020/852. In addition, the Fund invested in securities of such issuers or companies that in their business activities observed the governance aspects referred to in Article 2(17) of the Disclosure Regulation. This was ensured and documented by the exclusions defined in the internationally recognised standards.

How were the indicators for adverse impacts on sustainability factors taken into account?

In selecting sustainable investments for the Fund, the indicators of adverse impact on sustainability factors were used to determine significant harm. Criteria for a severe impact were defined for 33 environmental and social indicators. Investments that did not meet the Investment Manager's defined ambition levels for each of these indicators could not be classified as sustainable investments. In the absence of relevant data, classification of an investment as a sustainable investment was not possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Investments were monitored for alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The principles are based on international standards in the areas of human rights, labour rights, the environment and corruption. If a company is found to be at fault or to have breached these standards, the company will be excluded for investment by the Fund. In the case of investments already held by the Fund, the relevant investment will be sold.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following PAI were considered:

Environmental Adverse Impact Indicators

- Greenhouse gas (“GHG”) emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste ratio
- Investments in companies without carbon emission reduction initiatives
- Investments in companies producing chemicals
- Non-recycled waste ratio
- Natural species and protected areas
- Deforestation

Social Adverse Impact Indicators

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- Unadjusted gender pay gap
- Board gender diversity
- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
- Investments in companies without workplace accident prevention policies
- Rate of workplace accidents
- Insufficient whistleblower protection
- Incidents of discrimination
- Excessive CEO pay ratio
- Lack of human rights policy
- Lack of due diligence
- Lack of processes and measures for preventing trafficking in human beings
- Operations and suppliers at significant risk of incidents of forced or compulsory labour
- Number of identified cases of severe human rights issues and incidents
- Lack of anti-corruption and anti-bribery policies
- Operations and suppliers at significant risk of incidents of child labour
- Cases of insufficient action taken to address breaches of standards of anticorruption and anti-bribery
- Number of convictions and the number of fines for violations of anti-corruption and anti-bribery laws

The principal adverse impact indicators are taken into account by exclusion criteria.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/10/2022 – 30/09/2023

Largest investment	Sector	% Assets*	Country
Microsoft Corp.	Information Technology	5.72	United States
Apple Inc.	Information Technology	4.07	United States
Alphabet Inc.	Telecommunication Services	3.58	United States
Amazon.com Inc.	Consumer Discretionary	2.77	United States
LVMH Moët Hennessy Louis Vuitton SE	Consumer Discretionary	2.44	France

Thermo Fisher Scientific Inc.	Health Care	1.68	United States
S&P Global Inc.	Financials	1.64	United States

*Average % asset

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

57.17% of the Fund was invested in sustainability-related investments at the end of the fiscal year on 30 September 2023.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Top 5 Sectors	% Assets
Information Technology	25.77
Financials	14.83
Health Care	14.71
Industrials	12.66
Consumer Discretionary	11.08

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The environmental characteristics of the Fund could contribute positively to the taxonomy objective to climate change mitigation and climate change adaptation.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

This Fund does not currently commit to investing in economic activities that are classified as enabling or transitional activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund invests in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.
- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

Since these include both environmental and social objectives, it is not possible to specify minimum proportions for environmentally sustainable, non-taxonomy-compliant investments on the one hand and socially sustainable investments on the other. The total proportion of sustainable investments in relation to the Fund's environmental and social objectives can be found on the first page of this appendix.

What was the share of socially sustainable investments?

The Fund invests in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.
- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

Since these include both environmental and social objectives, it is not possible to specify minimum proportions for environmentally sustainable, non-taxonomy-compliant investments on the one hand and socially sustainable investments on the other. The total proportion of sustainable investments in relation to the Fund's environmental and social objectives can be found on the first page of this appendix.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The other investments include hedging instruments and cash instruments.

For other investments that do not fall under the Fund’s sustainability strategy, it is ensured that these are not used contrary to the overall sustainability strategy. Insofar as derivatives may be acquired, it is ensured that the underlying references of the derivatives are compliant with the sustainability strategy. If the derivative references an index, it is ensured that the index has sustainability characteristics. Due to the financial instruments available on the market, there may be deviations in the sustainability characteristics of the underlying reference index from the Fund characteristics. Any derivatives whose underlying references could be classified as not being aligned to the sustainability strategy, as well as currency holdings that do not match the Fund currency or that are not denominated in EUR, USD, GBP, CHF or JPY, may not be included as a significant component in the Fund. The use of derivatives to offset negative market fluctuations is not included. In addition, investments may be specifically excluded from the sustainability strategy that are not subject to an explicit review of minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Our engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had mandated Columbia Threadneedle Investments to exercise voting rights.

If information was available at the underlying asset level, various calculation methods were applied to summarise this at the Fund level.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- **How does the reference benchmark differ from a broad market index?**
Not applicable.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable.
- **How did this financial product perform compared with the reference benchmark?**
Not applicable.
- **How did this financial product perform compared with the broad market index?**
Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Metzler Focus Japan Sustainability

Legal entity identifier: (LEI-Code):
635400MCBJPTS5CNDD92

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective**: __%

 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: __%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 24.31% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics but **did not make any sustainable investments**.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Fund promoted environmental and social characteristics within the meaning of Article 8 of the Disclosure Regulation.

Due to the range of investments the Fund can invest in, the environmental and social characteristics promoted by the Fund address a range of environmental, social and corporate governance (“ESG”) issues.

The Fund’s assets are invested in securities of issuers that meet defined minimum standards in terms of ESG criteria. Each issuer of equities and/or corporate bonds undergoes a sustainability analysis undertaken by the Investment Manager prior to acquisition. The ESG performance of an issuer is systematically evaluated on the basis of various environmental and social criteria, as well as information by which corporate governance practices can be assessed.

These criteria relate to the following issues:

- Environmental

- Climate change mitigation
- Avoidance of detrimental impacts on ecosystems and loss of biodiversity

- Social

- Universal human rights
- Prohibition of child and forced labour
- Health and safety in the workplace

- Corporate Governance

- Principles of anti-corruption under the UN Global Compact.

The Fund promotes these environmental and social characteristics through the Investment Manager’s consideration of ESG criteria using the following approaches as further outlined below (i) exclusions,(ii) ESG integration, and (iii) engagement. The abbreviation "ESG" stands for the three aspects of sustainability (i) environmental; (ii) social; and (iii) good corporate governance.

The Fund applied activity-based exclusions. Companies with the following activities are excluded:

- Tobacco (Production, Downstream) > 5% Revenue
- Nuclear Energy > 5% Revenue
- Nuclear Weapons (Upstream, Production, Downstream) > 0% Revenue
- Conventional Weapons (Upstream, Production, Downstream) > 5% Revenue
- Unconventional Weapons (Upstream, Production, Downstream) > 0% Revenue
- Coal (Upstream, Production) > 5% Revenue
- Other Fossil Fuel (Production) > 5% Revenue

The Fund applied norm-based screening in connection with UN Global Compact, OECD Guidelines, and ILO (International Labour Organisation).

The Fund applied exclusions for sovereigns. The following exclusions were applied:

- Sovereigns with serious violations of democratic and human rights are excluded on basis of Freedom House evaluation.
- Sovereigns that are exposed to corruption,

Investments in sovereign issuers are excluded:

- (a) which do not allow a particular group of people, or the population in general, free access to political rights and civil liberties;
- (b) whose peace status is to be classified as very low;
- (c) which have a serious level of corruption;
- (d) with close connections to cases of money laundering; and/or
- (e) which have serious violations of democratic and human rights.

(ii) ESG Integration

The aim of ESG integration is to improve the risk/return profile of the Fund by integrating sustainability aspects into the traditional investment analysis process. The assessment of an issuer's sustainability is carried out by the Investment Manager using published information from the issuers.

The Investment Manager's ESG assessment incorporates relevant non-financial information to assess an issuer's sustainability over the medium- to long-term. An ESG evaluation is conducted by the Investment Manager on the results of its ESG assessment using a proprietary framework. In its selection of Japanese equities, the Investment Manager integrates this ESG evaluation and leverages it to enhance the accuracy and confidence of the medium- to long-term financial forecasts for an issuer. Constructive and purposeful dialogues in response to various ESG issues in relation to an issuer are pursued by the Investment Manager to foster sustainable growth of the issuer.

In ESG integration, environmental, social and corporate governance criteria are considered by the Investment Manager when making investment decisions. In this context, the investment universe only includes investments that do not fall under the above exclusion criteria.

Key figures on climate and other environmental concerns, negative impacts in the areas of social and employee matters, human rights and anti-corruption are all considered. The analysis covers the following areas:

Environmental

- Key climate change factors based on the TCFD (Task Force on Climate related Financial Disclosures) framework and other relevant perspectives such as the social impact of an environmental product.

Social

- Key factors related to stakeholder relationships (e.g., employees, customers, or business partners).

-

Corporate governance

- Mechanism and structure of corporate governance

In addition, the Investment Manager may also rely on the sustainability assessment of external providers to evaluate the above criteria. External data providers collect information from companies or issuers on how they deal with the above-mentioned sustainability issues and generally also assess these and make this information available to the Investment Manager. With regard to a violation of the ten principles of the UN Global Compact, the Investment Manager generally refers to the information in the sustainability assessments of external data providers.

(iii) Engagement

Engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had also mandated Columbia Threadneedle Investments to engage with underlying companies via dialogue and voting rights.

● ***How did the sustainability indicators perform?***

All sustainability indicators of the Fund, which serve to fulfill the ecological and/or social characteristics of the Fund, were complied with during the reference period. Compliance with the environmental and/or social criteria for the selection of assets was verified before as well as after acquisition.

In addition, the Fund obligatorily considered the following sustainability factors in its strategy and discloses the adverse effects on them:

- Exposure to companies active in the fossil fuel sector (Metric: Share of investments in companies active in the fossil fuel sector)
- Activities negatively affecting biodiversity-sensitive areas (Metric: Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas)

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (Metric: Share of investments in companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises)
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Metric: Share of investments in investee companies involved in the manufacture or selling of controversial weapons)
- Number of identified cases of severe human rights issues and incidents (Metric: Number of cases of severe human rights issues and incidents connected to investee companies on a weighted average basis)

● ***...and compared to previous periods?***

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Fund will have a proportion of 24.31% of sustainable investments composed of investments with an environmental or social objective in economic activities that are classified as sustainable within the meaning of Article 2(17) of the Disclosure Regulation.

Sustainable investments within the meaning of Article 2(17) of the Disclosure Regulation
The Fund invests in environmentally and/or socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals: Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.
- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

In the investment process, the Investment Manager's consideration of these indicators is based on a positive list of companies that have developed a strategy against at least one of the above key indicators and have a track record in addressing environmental and/or social objectives. Information from MSCI ESG Research for the individual key indicators is used as the basis for this positive list.

In relation to the 17 United Nations Sustainable Development Goals, revenues are considered in products and services that are consistent with the 17 United Nations Sustainable Development Goals. Sustainable impact data from MSCI ESG Research is used for this purpose. The contribution of sustainable investments is determined by a share ratio, which is the ratio of the market value in sustainable companies to the market value of all investments of the Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensured that in the selection of sustainable investments, none of the environmental and social objectives listed in Article 2(17) of the Disclosure Regulation or of the environmental objectives included in Article 9 of Regulation (EU) 2020/852 were significantly harmed. Significant harm exists in particular in the case of severe impacts on the adverse sustainability indicators or the breach of the minimum level of protection set out in Article 18 of Regulation (EU) 2020/852. In addition, the Fund invested in securities of such issuers or companies that in their business activities observed the governance aspects referred to in Article 2(17) of the Disclosure Regulation. This was ensured and documented by the exclusions defined in the internationally recognised standards.

How were the indicators for adverse impacts on sustainability factors taken into account?

In selecting sustainable investments for the Fund, the indicators of adverse impact on sustainability factors were used to determine significant harm. Criteria for a severe impact were defined for 33 environmental and social indicators. Investments that did not meet the Investment Manager's defined ambition levels for each of these indicators could not be classified as sustainable investments. In the absence of relevant data, classification of an investment as a sustainable investment is not possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Investments were monitored for alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The principles are based on international standards in the areas of human rights, labour rights, the environment and corruption. If a company is found to be at fault or to have breached these standards, the company will be excluded for investment by the Fund. In the case of investments already held by the Fund, the relevant investment had been sold.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following PAI were considered:

Environmental Adverse Impact Indicators

- Exposure to companies active in the fossil fuel sector.
- Activities negatively affecting biodiversity-sensitive areas.

Social Adverse Impact Indicators

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Number of identified cases of severe human rights issues and incidents.

The principal adverse impact indicators are taken into account by exclusion criteria.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: *01/10/2022 – 30/09/2023*

Largest Investment	Sector	% Assets*	Country
Sony Group Corp.	Consumer Discretionary	5.50	Japan
Mitsubishi Corp.	Industrials	4.07	Japan
ANA Holdings Inc.	Industrials	3.98	Japan
Kao Corp.	Consumer Staples	3.66	Japan
H.U. Group Holdings Inc.	Health Care	3.58	Japan
Makita Corp.	Industrials	3.45	Japan
Recruit Holdings Co. Ltd.	Industrials	3.26	Japan
Fujitsu Ltd.	Information Technology	3.18	Japan
Terumo Corp.	Health Care	3.05	Japan
Murata Manufacturing Co. Ltd.	Information Technology	3.03	Japan
Panasonic Holdings Corp.	Consumer Discretionary	2.97	Japan
Eisai Co. Ltd.	Health Care	2.85	Japan
Marui Group Co. Ltd.	Consumer Discretionary	2.84	Japan
Mitsubishi UFJ Financial Group Inc.	Financials	2.82	Japan
Dexerials Corp.	Information Technology	2.70	Japan

*Average % asset

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

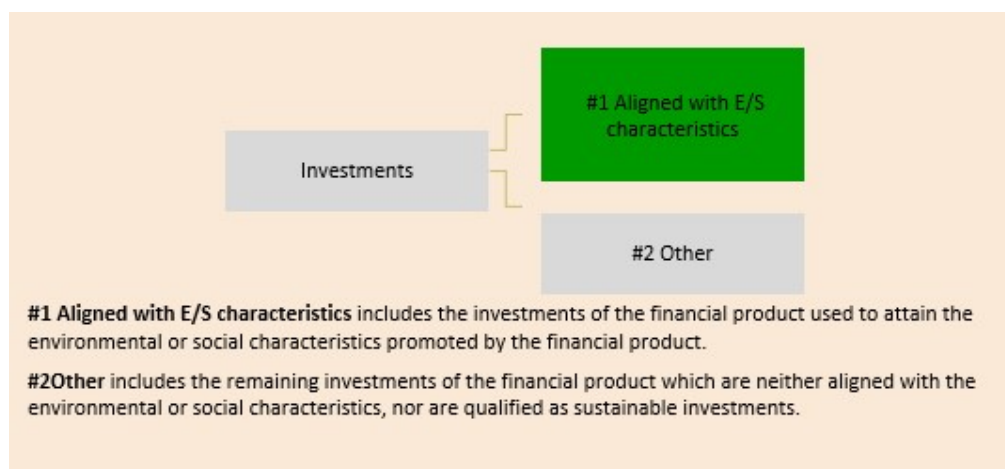

● *What was the asset allocation?*

24.31% of the Fund was invested in sustainability-related investments at the end of the fiscal year on 30 September 2023.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Top 5 Sectors	% Assets
Industrials	22.20
Consumer Discretionary	19.07
Health Care	15.94
Information Technology	15.19
Financials	12.31

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The environmental characteristics of the Fund could contribute positively to the taxonomy objective to climate change mitigation and climate change adaptation.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

This Fund does not currently commit to investing in economic activities that are classified as enabling or transitional activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund invests in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.

- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.

- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

Since these include both environmental and social objectives, it is not possible to specify minimum proportions for environmentally sustainable, non-taxonomy-compliant investments on the one hand and socially sustainable investments on the other. The total proportion of sustainable investments in relation to the Fund's environmental and social objectives can be found on the first page of this appendix

What was the share of socially sustainable investments?

The Fund invests in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.

- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.

- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

Since these include both environmental and social objectives, it is not possible to specify minimum proportions for environmentally sustainable, non-taxonomy-compliant investments on the one hand and socially sustainable investments on the other. The total proportion of sustainable investments in relation to the Fund's environmental and social objectives can be found on the first page of this appendix

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The other investments include hedging instruments and cash instruments.

For other investments that do not fall under the Fund's sustainability strategy, it is ensured that these are not used contrary to the overall sustainability strategy. Insofar as derivatives may be acquired, it is ensured that the underlying references of the derivatives are compliant with the sustainability strategy. If the derivative references an index, it is ensured that the index has sustainability characteristics. Due to the financial instruments available on the market, there may be deviations in the sustainability characteristics of the underlying reference index from the Fund characteristics. Any derivatives whose underlying references could be classified as not being aligned to the sustainability strategy, as well as currency holdings that do not match the Fund currency or that are not denominated in EUR, USD, GBP, CHF or JPY, may not be included as a significant component in the Fund. The use of derivatives to offset negative market fluctuations is not included. In addition, investments may be specifically excluded from the sustainability strategy that are not subject to an explicit review of minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Our engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had mandated Columbia Threadneedle Investments to exercise voting rights.

If information was available at the underlying asset level, various calculation methods were applied to summarise this at the Fund level.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Metzler Sovereign Select LCR Sustainability

Legal entity identifier: (LEI-Code): 635400VZ67MGOF7JLA87

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective**: __%

 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: __%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU
 - with a social objective
- It promoted E/S characteristics but **did not make any sustainable investments**.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Fund promoted environmental and social characteristics within the meaning of Article 8 of the Disclosure Regulation.

Due to the range of investments the Fund can invest in, the environmental and social characteristics promoted by the Fund address a range of environmental, social and corporate governance (“ESG”) issues.

The Fund’s assets are invested in securities of issuers that meet defined minimum standards in terms of ESG criteria. Each investment in supranational organisations or sovereign bonds undergoes a sustainability analysis prior to acquisition. The ESG performance of an issuer is systematically evaluated on the basis of various environmental and social criteria, as well as information by which government leadership and corporate governance practices can be assessed. These criteria relate to the following issues:

- Environmental

- Climate change mitigation
- Avoidance of detrimental impacts on ecosystems and loss of biodiversity
- Management of natural resources

- Social

- Universal human rights
- Prohibition of child and forced labour
- Promotion of human resources

- Corporate Governance

- Transparency and accountability to the population
- Political leadership structure

The Fund promotes these environmental and social characteristics through the Investment Manager’s consideration of ESG criteria using the following approaches as further outlined below: (i) exclusions, and (ii) ESG integration. The abbreviation “ESG” stands for the three aspects of sustainability (i) environmental; (ii) social; and (iii) good corporate governance.

(i.) Exclusions

The Fund applied exclusions for sovereigns. The following exclusions were applied:

- Sovereigns with serious violations of democratic and human rights are excluded on basis of Freedom House evaluation.
- Sovereigns that are exposed to corruption.

Investments in sovereign issuers are excluded:

- (a) which do not allow a particular group of people, or the population in general, free access to political rights and civil liberties;
- (b) whose peace status is to be classified as very low;
- (c) which have a serious level of corruption;
- (d) with close connections to cases of money laundering; and/or
- (e) which have serious violations of democratic and human rights.

(ii) ESG Integration

The aim of ESG integration is to improve the risk/return profile of the Fund by integrating sustainability aspects into the traditional investment analysis process. The assessment of an issuer's sustainability is carried out by the Investment Manager using published information from external data providers. The Investment Manager assesses a country's exposure to and management of ESG risk factors affecting its value creation process. The assessment is based on the MSCI ESG Government Ratings.

In ESG integration, environmental, social and corporate governance criteria are considered by the Investment Manager when making investment decisions. In this context, the investment universe only includes investments that do not fall under the above exclusion criteria.

Key figures on climate and other environmental concerns, negative impacts in the areas of social and employee matters, human rights and anti-corruption are all considered. The analysis covers the following areas:

- (a) involvement in controversial business;
- (b) sustainability risk management: In addition to ESG ratings and scores, several key performance indicators are considered, which include, for example, access to political rights and civil liberties;
- (c) climate rating to measure the transition to a low-carbon economy; and
- (d) compliance of companies with the objectives of the Paris Agreement adopted under the United Nations Framework Convention on Climate Change.

How did the sustainability indicators perform?

All sustainability indicators of the Fund, which serve to fulfill the ecological and/or social characteristics of the Fund, were complied with during the reference period.

In addition, the Fund considered the following sustainability factors in its strategy on a mandatory basis:

- GHG intensity (Metric: GHG intensity of investee countries)
- Investee countries subject to social violations (Metric: Share of investments in investee companies involved in the manufacture or selling of controversial weapons)
- Average income inequality (Metric: The distribution of income and economic inequality among the participants in a particular economy including a quantitative indicator explained in the explanation column)
- Average freedom of expression (Metric: Measuring the extent to which political and civil society organisations can operate freely including a quantitative indicator explained in the explanation column)
- Average corruption score (Metric: Average corruption score)
- Non-Cooperative tax jurisdictions (Metric: Investments in jurisdictions on the EU list of non-cooperative jurisdictions for tax purposes)
- Average political stability score (Metric: Measure of the likelihood that the current regime will be overthrown by the use of force using a quantitative indicator explained in the explanation column)
- Average rule of law score (Metric: Measure of the level of corruption, lack of fundamental rights, and the deficiencies in civil and criminal justice using a quantitative indicator explained in the explanation column)
-

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following PAI were considered:

Adverse Impact Indicators

- Greenhouse gas (“GHG”) intensity
- Investee countries subject to social violations
- Average income inequality score
- Average freedom of expression score
- Average corruption score
- Non-cooperative tax jurisdictions
- Average political stability score
- Average rule of law score

The principal adverse impact indicators are taken into account by exclusion criteria.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

This Fund does not currently commit to investing in economic activities that are classified as enabling or transitional activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The other investments include hedging instruments and cash instruments.

For other investments that do not fall under the Fund’s sustainability strategy, it is ensured that these are not used contrary to the overall sustainability strategy. Insofar as derivatives may be acquired, it is ensured that the underlying references of the derivatives are compliant with the sustainability strategy. If the derivative references an index, it is ensured that the index has sustainability characteristics. Due to the financial instruments available on the market, there may be deviations in the sustainability characteristics of the underlying reference index from the Fund characteristics. Any derivatives whose underlying references could be classified as not being aligned to the sustainability strategy, as well as currency holdings that do not match the Fund currency or that are not denominated in EUR, USD, GBP, CHF or JPY, may not be included as a significant component in the Fund. The use of derivatives to offset negative market fluctuations is not included. In addition, investments may be specifically excluded from the sustainability strategy that are not subject to an explicit review of minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund invests exclusively in countries and supranational organisations which apply good governance practices. Countries and supranational organisations are only eligible if they demonstrate good governance. Directive 2013/34/EU of the European Parliament and of the Council sets out transparency duties with regard to environmental, social and corporate governance aspects in the context of non-financial reporting. Such supranational organisations are expected to publish a corporate governance code under national legislation, at a minimum identifying sound management structures, proper relations with employees, employee compensation and tax compliance.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Metzler European Dividend Sustainability

Legal entity identifier: (LEI-Code): 6354006ISJC2DBJ8D452

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective**: __%

 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: __%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.87% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics but **did not make any sustainable investments**.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Fund promoted environmental and social characteristics within the meaning of Article 8 of the Disclosure Regulation.

Due to the range of investments the Fund can invest in, the environmental and social characteristics promoted by the Fund address a range of environmental, social and corporate governance (“ESG”) issues.

The Fund’s assets are invested in securities of issuers that meet defined minimum standards in terms of ESG criteria. Each issuer of equities and/or corporate bonds undergoes a sustainability analysis undertaken by the Investment Manager prior to acquisition. The ESG performance of an issuer is systematically evaluated on the basis of various environmental and social criteria, as well as information by which corporate governance practices can be assessed. These criteria relate to the following issues:

- Environmental

- Climate change mitigation
- Avoidance of detrimental impacts on ecosystems and loss of biodiversity
- Sales in climate-friendly technologies

- Social

- Universal human rights
- Prohibition of child and forced labour
- Health and safety in the workplace

- Corporate Governance

- Structure and quality of the supervisory board of an investee company
- Principles of anti-corruption under the UN Global Compact.

The Fund promotes these environmental and social characteristics through the Investment Manager’s consideration of ESG criteria using the following approaches as further outlined below: (i) exclusions, (ii) ESG integration, and (iii) engagement. The abbreviation “ESG” stands for the three aspects of sustainability (i) environmental; (ii) social; and (iii) good corporate governance.

(i). Exclusions

The Fund applied activity-based exclusions. Companies with the following activities are excluded:

- Tobacco (Production, Downstream) > 5% Revenue
- Nuclear Energy > 5% Revenue
- Nuclear Weapons (Upstream, Production, Downstream) > 0% Revenue
- Conventional Weapons (Upstream, Production, Downstream) > 5%
- Unconventional Weapons (Upstream, Production, Downstream) > 0% Revenue
- Coal (Upstream, Production) > 5% Revenue
- Other Fossil Fuel (Production) > 5% Revenue

The Fund applied norm-based screening in connection with UN Global Compact, OECD Guidelines, and ILO (International Labour Organisation) .

The Fund applied exclusions for sovereigns. The following exclusions were applied:

- Sovereigns with serious violations of democratic and human rights are excluded on basis of Freedom House evaluation.
- Sovereigns that are exposed to corruption,

Investments in sovereign issuers are excluded:

- (a) which do not allow a particular group of people, or the population in general, free access to political rights and civil liberties;
- (b) whose peace status is to be classified as very low;
- (c) which have a serious level of corruption;
- (d) with close connections to cases of money laundering; and/or
- (e) which have serious violations of democratic and human rights.

(ii) ESG Integration

The aim of ESG integration is to improve the risk/return profile of the Fund by integrating sustainability aspects into the traditional investment analysis process. The assessment of an issuer's sustainability is carried out by the Investment Manager using published information from the issuers. All issuers of equities and/or corporate bonds are subject to sustainability analysis before their securities are purchased.

In ESG integration, environmental, social and corporate governance criteria are considered by the Investment Manager when making investment decisions. In this context, the investment universe only includes investments that do not fall under the above exclusion criteria.

Key figures on climate and other environmental concerns, negative impacts in the areas of social and employee matters, human rights and anti-corruption are all considered. The analysis covers the following areas:

(a) involvement in controversial business practices based on over 100 internationally recognised standards, including the UN Global Compact;

(b) sustainability risk management: In addition to ESG ratings and scores, several key performance indicators are considered, which, for example, measure the handling of employee matters;

(c) climate ratings to measure the transition to a low-carbon economy; and

(d) compliance of companies with the objectives of the Paris Agreement adopted under the United Nations Framework Convention on Climate Change.

In addition, the Investment Manager may also rely on the sustainability assessment of external providers to evaluate the above criteria. External data providers collect information from companies or issuers on how they deal with the above-mentioned sustainability issues and generally also assess these and make this information available to the Investment Manager. With regard to a violation of the ten principles of the UN Global Compact, the Investment Manager generally refers to the information in the sustainability assessments of external data providers.

(iii) Engagement

Engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had also mandated Columbia Threadneedle Investments to engage with underlying companies via dialogue and voting rights.

How did the sustainability indicators perform?

All sustainability indicators of the Fund, which serve to fulfill the ecological and/or social characteristics of the fund, were complied with during the reference period. Compliance with the environmental and/or social criteria for the selection of assets was verified before as well as after acquisition.

In addition, the Fund considered the following sustainability factors in its strategy on a mandatory basis:

- GHG emissions (Metric: Scope 1 GHG emissions)
- GHG emissions (Metric: Scope 2 GHG emissions)
- GHG emissions (Metric: Scope 3 GHG emissions)
- GHG emissions (Metric: Scope 1 and 2 GHG emissions)
- GHG emissions (Metric: Scope 1, 2 and 3 GHG emissions)
- Carbon footprint (Metric: Carbon footprint Scope 1 and 2)
- Carbon footprint (Metric: Carbon footprint Scope 1, 2 and 3)
- GHG intensity of investee companies (Metric: GHG intensity of investee companies Scope 1 and 2)
-

- GHG intensity of investee companies (Metric: GHG intensity of investee companies Scope 1, 2 and 3)
- Exposure to companies active in the fossil fuel sector (Metric: Share of investments in companies active in the fossil fuel sector)
- Share energy consumption from non-renewable sources (Metric: Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources)
- Share energy production from non-renewable sources (Metric: Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE A)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE B)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE C)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE D)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE E)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE F)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE G)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE H)
- Energy consumption intensity per high impact climate sector (Metric: Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector NACE L)
- Activities negatively affecting biodiversity-sensitive areas (Metric: Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas)
- Water Emissions (Metric: Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average)
- Hazardous waste and radioactive waste ratio (Metric: Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average)
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (Metric: Share of investments in companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises)
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Metric: Share of

investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises)

- Unadjusted gender pay gap (Metric: Average unadjusted gender pay gap of investee companies)
- Board gender diversity (Metric: Average ratio of female to male board members in investee companies, expressed as a percentage of all board members)
- Investing in companies without carbon emission reduction initiatives investment weight (Metric: Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement) Exposure to companies producing chemicals (Metric: Share of investments in investee companies the activities of which fall under Division 20.2 of Annex I to Regulation (EC) No 1893/2006)
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Metric: Share of investments in investee companies involved in the manufacture or selling of controversial weapons)
- Exposure to companies producing chemicals (Metric: Share of investments in investee companies the activities of which fall under Division 20.2 of Annex I to Regulation (EC) No 1893/2006)
- Non-Recycled waste ratio (Metric: Tonnes of non-recycled waste generated by investee companies per million EUR invested, expressed as a weighted average)
- Share of investments in investee companies whose operations affect threatened species (Metric: Share of investments in investee companies whose operations affect threatened species)
- Share of investee companies without deforestation policy (Metric: Share of investments in companies without a policy to address deforestation)
- Rate of accidents (Metric: Number of workdays lost to injuries, accidents, fatalities or illness of investee companies expressed as a weighted average)
- Share of investee companies with insufficient whistleblower protection (Metric: Share of investments in entities without policies on the protection of whistleblowers)
- Number of incidents of discrimination reported in investee companies (Metric: Number of incidents of discrimination reported in investee companies expressed as a weighted average)
- Excessive CEO Pay ratio (Metric: Average ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees (excluding the highest-compensated individual))
- Exposure to companies without human rights policy (Metric: Share of investments in entities without a human rights policy)
- Exposure to companies with lack of due diligence (Metric: Share of investments in entities without a due diligence process to identify, prevent, mitigate and address adverse human rights impacts)
- Exposure to companies with lack of processes and measures for preventing trafficking in human beings (Metric: Share of investments in investee companies without policies against trafficking in human beings)
- Exposure to companies with operations and suppliers at significant risk of incidents of child labour (Metric: Share of investments in investee companies exposed to operations and suppliers at significant risk of incidents of child labour in terms of geographic areas or type of operation)
- Exposure to companies with operations and suppliers at significant risk of incidents of forced or compulsory labour (Metric: Share of the investments in investee companies exposed to operations and suppliers at significant risk of incidents of forced or compulsory labour in terms in terms of geographic areas and/or the type of operation)

- Number of identified cases of severe human rights issues and incidents (Metric: Number of cases of severe human rights issues and incidents connected to investee companies on a weighted average basis)
- Exposure to companies with a lack of anti-corruption and anti-bribery policies (Metric: Share of investments in entities without policies on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption)
- Exposure to companies with cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery (Metric: Share of investments in investee companies with identified insufficiencies in actions taken to address breaches in procedures and standards of anti-corruption and anti-bribery)
- Number of convictions for violation of anti-corruption and anti-bribery laws (Metric: Numbers of convictions and amount of fines for violations of anti-corruption and anti-bribery laws by investee companies)
- Average income inequality (Metric: The distribution of income and economic inequality among the participants in a particular economy including a quantitative indicator explained in the explanation column)
- Average freedom of expression (Metric: Measuring the extent to which political and civil society organisations can operate freely including a quantitative indicator explained in the explanation column)
- Average corruption score (Metric: Average corruption score)
- Non-Cooperative tax jurisdictions (Metric: Investments in jurisdictions on the EU list of non-cooperative jurisdictions for tax purposes)
- Average political stability score (Metric: Measure of the likelihood that the current regime will be overthrown by the use of force using a quantitative indicator explained in the explanation column)
- Average rule of law score (Metric: Measure of the level of corruption, lack of fundamental rights, and the deficiencies in civil and criminal justice using a quantitative indicator explained in the explanation column)

● ***...and compared to previous periods?***

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Fund has a proportion of 51.87% of sustainable investments composed of investments with an environmental or social objective in economic activities that are classified as sustainable within the meaning of Article 2(17) of the Disclosure Regulation.

Sustainable investments within the meaning of Article 2(17) of the Disclosure Regulation
The Fund has invested in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.

- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

In the investment process, the Investment Manager's consideration of these indicators is based on a positive list of companies that have developed a strategy against at least one of the above key indicators and have a track record in addressing environmental and/or social objectives. Information from MSCI ESG Research for the individual key indicators is used as the basis for this positive list.

In relation to the 17 United Nations Sustainable Development Goals, revenues are considered in products and services that are consistent with the 17 United Nations Sustainable Development Goals. Sustainable impact data from MSCI ESG Research is used for this purpose. The contribution of sustainable investments is determined by a share ratio, which is the ratio of the market value in sustainable companies to the market value of all investments of the Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensured that in the selection of sustainable investments, none of the environmental and social objectives listed in Article 2(17) of the Disclosure Regulation or of the environmental objectives included in Article 9 of Regulation (EU) 2020/852 were significantly harmed. Significant harm existed in particular in the case of severe impacts on the adverse sustainability indicators or the breach of the minimum level of protection set out in Article 18 of Regulation (EU) 2020/852. In addition, the Fund invested in securities of such issuers or companies that in their business activities observed the governance aspects referred to in Article 2(17) of the Disclosure Regulation. This was ensured and documented by the exclusions defined in the internationally recognised standards.

How were the indicators for adverse impacts on sustainability factors taken into account?

In selecting sustainable investments for the Fund, the indicators of adverse impact on sustainability factors were used to determine significant harm. Criteria for a severe impact were defined for 33 environmental and social indicators. Investments that did not meet the Investment Manager's defined ambition levels for each of these indicators could not be classified as sustainable investments. In the absence of relevant data, classification of an investment as a sustainable investment was not possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Investments were monitored for alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The principles were based on international standards in the areas of human rights, labour rights, the environment and corruption. If a company had been found to be at fault or to have breached these standards, the company had been excluded for investment by the Fund. In the case of investments already held by the Fund, the relevant investment had been sold.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following PAI were considered:

Environmental Adverse Impact Indicators

- Greenhouse gas (“GHG”) emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste ratio
- Investments in companies without carbon emission reduction initiatives
- Investments in companies producing chemicals
- Non-recycled waste ratio
- Natural species and protected areas
- Deforestation

- Operations and suppliers at significant risk of incidents of forced or compulsory labour
- Number of identified cases of severe human rights issues and incidents
- Lack of anti-corruption and anti-bribery policies

Social Adverse Impact Indicators

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- Unadjusted gender pay gap
- Board gender diversity
- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
- Investments in companies without workplace accident prevention policies
- Rate of workplace accidents
- Insufficient whistleblower protection
- Incidents of discrimination
- Excessive CEO pay ratio
- Lack of human rights policy
- Lack of due diligence
- Lack of processes and measures for preventing trafficking in human beings
- Operations and suppliers at significant risk of incidents of forced or compulsory labour
- Number of identified cases of severe human rights issues and incidents
- Lack of anti-corruption and anti-bribery policies
- Operations and suppliers at significant risk of incidents of child labour
- Cases of insufficient action taken to address breaches of standards of anticorruption and anti-bribery
- Number of convictions and the number of fines for violations of anti-corruption and anti-bribery laws

The principal adverse impact indicators are taken into account by exclusion criteria.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/10/2022 – 30/09/2023

Largest Investment	Sector	% Assets*	Country
Zurich Insurance Group AG	Financials	5.17	Switzerland
TotalEnergies SE	Energy	5.00	France
Allianz SE	Financials	4.88	Germany
Iberdrola S.A.	Utilities	4.67	Spain
Unilever PLC	Consumer Staples	3.97	United Kingdom
Rio Tinto PLC	Materials	3.87	United Kingdom
AXA S.A.	Financials	3.66	France
Anglo American PLC	Materials	3.61	United Kingdom
Deutsche Post AG	Industrials	3.45	Germany
Novartis AG	Health Care	3.37	Switzerland
Koninklijke Ahold Delhaize N.V.	Consumer Staples	3.13	Netherlands
Nestlé S.A.	Consumer Staples	3.07	Switzerland
AstraZeneca PLC	Health Care	3.06	United Kingdom
VINCI S.A.	Industrials	2.54	France
Stellantis N.V.	Consumer Discretionary	2.49	Netherlands

*Average % asset

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

51.87% of the Fund was invested in sustainability-related investments at the end of the fiscal year on 30 September 2023.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Top 5 Sectors	% Assets
Financials	22.33
Materials	14.91
Consumer Staples	13.70
Utilities	11.18
Industrials	11.02

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The environmental characteristics of the Fund could contribute positively to the taxonomy objective to climate change mitigation and climate change adaptation.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

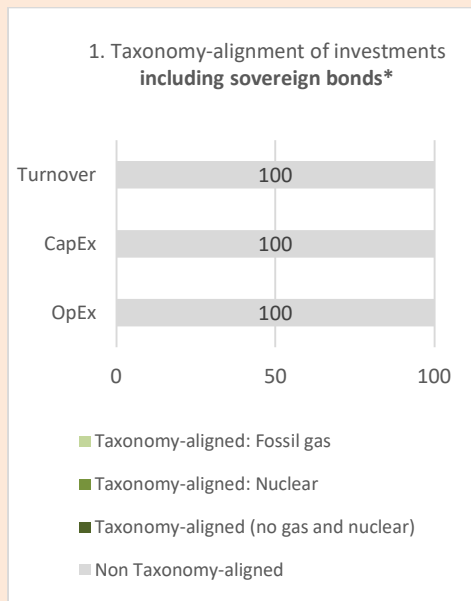

- Yes:
 - In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

This Fund does not currently commit to investing in economic activities that are classified as enabling or transitional activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund invests in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.
- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

Since these include both environmental and social objectives, it is not possible to specify minimum proportions for environmentally sustainable, non-taxonomy-compliant investments on the one hand and socially sustainable investments on the other. The total proportion of sustainable investments in relation to the Fund's environmental and social objectives can be found on the first page of this appendix

What was the share of socially sustainable investments?

The Fund invests in environmentally and socially sustainable economic activities as defined in Article 2(17) of the Disclosure Regulation which contribute to the achievement of at least one of the following objectives:

- Financing economic activities that are consistent with at least one of the 17 United Nations Sustainable Development Goals. Companies that generate at least 20% of their revenues from products or services aimed at one or more of these goals correspond to an explicit corporate focus on meeting such environmental or societal needs.
- Mitigating climate change and transitioning to a low-carbon economy: The company is committed to CO2 reduction targets. The implied temperature increase of the company is less than 2 degrees Celsius.
- Positively contributing to equality and human capital by promoting greater diversity in the workforce.

Since these include both environmental and social objectives, it is not possible to specify minimum proportions for environmentally sustainable, non-taxonomy-compliant investments on the one hand and socially sustainable investments on the other. The total proportion of sustainable investments in relation to the Fund's environmental and social objectives can be found on the first page of this appendix.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The other investments include hedging instruments and cash instruments.

For other investments that do not fall under the Fund’s sustainability strategy, it is ensured that these are not used contrary to the overall sustainability strategy. Insofar as derivatives may be acquired, it is ensured that the underlying references of the derivatives are compliant with the sustainability strategy. If the derivative references an index, it is ensured that the index has sustainability characteristics. Due to the financial instruments available on the market, there may be deviations in the sustainability characteristics of the underlying reference index from the Fund characteristics. Any derivatives whose underlying references could be classified as not being aligned to the sustainability strategy, as well as currency holdings that do not match the Fund currency or that are not denominated in EUR, USD, GBP, CHF or JPY, may not be included as a significant component in the Fund. The use of derivatives to offset negative market fluctuations is not included. In addition, investments may be specifically excluded from the sustainability strategy that are not subject to an explicit review of minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Our engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had mandated Columbia Threadneedle Investments to exercise voting rights. If information was available at the underlying asset level, various calculation methods were applied to summarise this at the Fund level.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable.
- **How did this financial product perform compared with the reference benchmark?**
Not applicable.
- **How did this financial product perform compared with the broad market index?**
Not applicable.

ANNEX

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Metzler China A Share Sustainability Fund

Legal entity identifier: (LEI-Code): 635400UXP58UBIUFVV54

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective**: __%

 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: __%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics but **did not make any sustainable investments**.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Fund promoted environmental and social characteristics within the meaning of Article 8 of the Disclosure Regulation.

Due to the range of investments the Fund can invest in, the environmental and social characteristics promoted by the Fund address a range of environmental, social and corporate governance (“ESG”) issues.

The Fund’s assets are invested in securities of issuers that meet defined minimum standards in terms of ESG criteria. Each issuer of equities and/or corporate bonds undergoes a sustainability analysis undertaken by the Investment Manager prior to acquisition. The ESG performance of an issuer is systematically evaluated on the basis of various environmental and social criteria, as well as information by which corporate governance practices can be assessed.

These criteria relate to the following issues:

- Environmental

- Climate change mitigation
- Avoidance of detrimental impacts on ecosystems and loss of biodiversity

- Social

- Universal human rights
- Prohibition of child and forced labour
- Health and safety in the workplace

- Corporate Governance

- Principles of anti-corruption under the UN Global Compact.

The Fund promotes these environmental and social characteristics through the Investment Manager’s consideration of ESG criteria using the following approaches as further outlined below (i) exclusions, (ii) ESG integration, and (iii) Engagement. The abbreviation “ESG” stands for the three aspects of sustainability (i) environmental; (ii) social; and (iii) good corporate governance.

(i) Exclusions

The Fund applied activity-based exclusions. Companies with the following activities are excluded:

- Tobacco (Production, Downstream) > 5% Revenue
- Nuclear Energy > 5% Revenue
- Nuclear Weapons (Upstream, Production, Downstream) > 0% Revenue
- Conventional Weapons (Upstream, Production, Downstream) > 5% Revenue
- Unconventional Weapons (Upstream, Production, Downstream) > 0% Revenue
- Coal (Upstream, Production) > 5% Revenue
- Other Fossil Fuel (Production) > 5% Revenue

The Fund applied norm-based screening in connection with UN Global Compact, OECD Guidelines, and ILO (International Labour Organisation).

The Fund applied exclusions for sovereigns. The following exclusions were applied:

- Sovereigns with serious violations of democratic and human rights are excluded on basis of Freedom House evaluation.

- Sovereigns that are exposed to corruption,

Investments in sovereign issuers are excluded:

(a) which do not allow a particular group of people, or the population in general, free access to political rights and civil liberties;

(b) whose peace status is to be classified as very low;

(c) which have a serious level of corruption;

(d) with close connections to cases of money laundering; and/or

(e) which have serious violations of democratic and human rights.

(ii) ESG Integration

The aim of ESG integration is to improve the risk/return profile of the Fund by integrating sustainability aspects into the traditional investment analysis process. The assessment of an issuer's sustainability is carried out by the Investment Manager using published information from the issuers. All issuers of equities and/or corporate bonds are subject to sustainability analysis before their securities are purchased. In ESG integration, environmental, social and corporate governance criteria are considered by the Investment Manager when making investment decisions. In this context, the investment universe only includes investments that do not fall under the above exclusion criteria.

Key figures on climate and other environmental concerns, negative impacts in the areas of social and employee matters, human rights and anti-corruption are all considered. The analysis covers the following areas:

(a) involvement in controversial business practices based on over 100 internationally recognised standards, including the UN Global Compact;

(b) sustainability risk management: In addition to ESG ratings and scores, several key performance indicators are considered, which, for example, measure the handling of employee matters;

(c) climate ratings to measure the transition to a low-carbon economy; and

(d) compliance of companies with the objectives of the Paris Agreement adopted under the United Nations Framework Convention on Climate Change.

In addition, the Investment Manager may also rely on the sustainability assessment of external providers to evaluate the above criteria. External data providers collect information from companies or issuers on how they deal with the above-mentioned sustainability issues and generally also assess these and make this information available to the Investment Manager. With regard to a violation of the ten principles of the UN Global Compact, the Investment Manager generally refers to the information in the sustainability assessments of external data providers.

(iii) Engagement

Engagement will involve discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager enters into a dialogue with the businesses in which it invests and addresses relevant ESG parameters. In doing so, it also seeks to exert its influence to ensure that continuous improvements can be achieved by the companies on the relevant ESG parameters. The Investment Manager engages with underlying companies via dialogue and voting rights. The Investment Manager has also mandated Columbia Threadneedle Investments to engage with underlying companies via dialogue and voting rights.

If information is available at the underlying asset level, various calculation methods are applied to summarise this at the Fund level.

How did the sustainability indicators perform?

All sustainability indicators of the Fund, which serve to fulfill the ecological and/or social characteristics of the Fund, were complied with during the reference period. Compliance with the environmental and/or social criteria for the selection of assets was verified before as well as after acquisition.

In addition, the Fund considered the following sustainability factors in its strategy on a mandatory basis:

- Exposure to companies active in the fossil fuel sector (Metric: Share of investments in companies active in the fossil fuel sector)
- Activities negatively affecting biodiversity-sensitive areas (Metric: Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas)

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (Metric: Share of investments in companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises)
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Metric: Share of investments in investee companies involved in the manufacture or selling of controversial weapons)
- Number of identified cases of severe human rights issues and incidents (Metric: Number of cases of severe human rights issues and incidents connected to investee companies on a weighted average basis)

● ***...and compared to previous periods?***

Not applicable

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following PAI were considered:

Environmental Adverse Impact Indicators

- Exposure to companies active in the fossil fuel sector
- Activities negatively affecting biodiversity sensitive areas

Social Adverse Impact Indicators

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
- Number of identified cases of severe human rights issues and incidents

The principal adverse impact indicators are taken into account by exclusion criteria.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: *01/10/2022 – 30/09/2023*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

This Fund does not currently commit to investing in economic activities that are classified as enabling or transitional activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The other investments include hedging instruments and cash instruments.

For other investments that do not fall under the Fund’s sustainability strategy, it is ensured that these are not used contrary to the overall sustainability strategy. Insofar as derivatives may be acquired, it is ensured that the underlying references of the derivatives are compliant with the sustainability strategy. If the derivative references an index, it is ensured that the index has sustainability characteristics. Due to the financial instruments available on the market, there may be deviations in the sustainability characteristics of the underlying reference index from the Fund characteristics. Any derivatives whose underlying references could be classified as not being aligned to the sustainability strategy, as well as currency holdings that do not match the Fund currency or that are not denominated in EUR, USD, GBP, CHF or JPY, may not be included as a significant component in the Fund. The use of derivatives to offset negative market fluctuations is not included. In addition, investments may be specifically excluded from the sustainability strategy that are not subject to an explicit review of minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Our engagement involved discussions regarding business relevant ESG challenges related to the underlying companies. The Investment Manager entered into a dialogue with the businesses in which it invested and addressed relevant ESG parameters. In doing so, it also sought to exert its influence to ensure that continuous improvements could be achieved by the companies on the relevant ESG parameters. The Investment Manager engaged with underlying companies via dialogue and voting rights. The Investment Manager had mandated Columbia Threadneedle Investments to exercise voting rights.

If information was available at the underlying asset level, various calculation methods were applied to summarise this at the Fund level.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***
