MFM Asset Allocation Allegro Fund (the "Sub-Fund") is a sub-fund of MFM Funds (Lux) (the "Fund")

Class RF CHF (the "Class") - ISIN: LU1493705955

The Fund has appointed FundPartner Solutions (Europe) S.A. as management company.

Objectives and investment policy

This Sub-Fund aims to offer direct and indirect exposure to a wide range of asset classes: debt securities, equities and equity related securities (such as ADR, GDR, EDR, certificates), cash, money market instruments, currencies, commodities and real estate.

The Sub-Fund is actively managed. The Sub-Fund has no benchmark index and is not managed in reference to a benchmark index.

The Sub-Fund may obtain its exposure:

- directly in the securities/asset classes mentioned in the previous paragraph (except for the commodities and real estate asset classes);
- in undertakings for collective investment (UCIs) having as main objective to invest in the above-mentioned asset classes;
- in any transferable securities (such as structured products) linked or offering an exposure to the performance of the above-mentioned asset classes;
- in financial derivative instruments having as underlying or offering an exposure to the above-mentioned asset classes;
- in closed-ended UCIs investing in property, especially Real Estate Investment Trusts (REITs) and similar investments.

In pursuing its investment policy and due to the use of financial derivative instruments, the Sub-Fund can invest up to 100% of its net assets in cash deposits, money market funds and money market instruments.

The choice of investments will neither be limited by geographical area, asset class and/or economic sector nor in terms of currencies in which investments will be denominated. However, depending on financial market conditions, a particular focus can be placed on a single country (or some countries), a single currency, a single economic sector.

The Sub-Fund may invest a great part of its net assets in emerging markets to take advantage of investment opportunities. In normal market conditions, such investments should not exceed 50% of its net assets.

The Sub-Fund may invest up to:

- 10% of its net assets in contingent convertible debt securities.
- 10% of its net assets in distressed or defaulted debt or issuers.
- 10% of its net assets in asset-backed/mortgaged-backed securities.
- 20% of its net assets in UCITS eligible alternative strategy funds.

- 20% of its net assets in closed-ended real estate UCIs, notably closed-ended REITs, closed-ended real estate investment funds and closed-ended real estate investment companies.

- 30% of its net assets in structured products, as detailed in the prospectus.

For hedging and for any other purposes, the Sub-Fund may use financial derivative instruments within the limits and descriptions set out in the prospectus. The use of derivative instrument may increase leverage, imply additional costs and risks.

If the investment manager considers this to be in the best interest of the shareholders, on a temporary basis and for defensive purposes, the Sub-Fund may also hold up to 100% of its net assets in liquid assets, such as cash deposits, money market UCIs and Money Market Instruments.

Risk Disclaimer

- This current risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

- The risk category shown is not guaranteed and may shift over time.

- The lowest category, which corresponds to Number 1, cannot be regarded as being risk-free.

- The Sub-Fund does not provide any capital guarantee or asset protection measures.

Why is this Sub-Fund in this category?

The investment objective of the Sub-Fund is to generate capital growth by investing directly and indirectly in a wide range of asset types: debt securities, equities and equity related securities, cash, Money Market Instruments and currencies. Hence, the risk/reward profile of the sub-fund should correspond to the medium high class on the SRRI scale.

Are there any other particular Risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward rating include:

- **Liquidity risks:** The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.

- **Counterparty risks:** The Sub-Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the sub-fund.

- **Credit risks:** The Sub-Fund can invest a significant portion of its assets in debt securities. The issuers of these debt securities may become insolvent, which will mean that the securities will lose all or some of their value.

- **Risks from the use of derivatives:** The Sub-Fund may use financial derivatives instruments which may result in the Sub-Fund being leveraged and may result in material fluctuations in the value of the sub-fund. Leverage on certain types of transactions including derivatives may impair the sub-fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the sub-fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the sub-fund being exposed to a greater loss than the initial investment.

- **Operational risks:** The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the management company or by external third parties or may be damaged by external events, such as natural disasters.
