What is this product?

Type

The fund is a compartment of MFS Meridian® Funds established in Luxembourg as an investment company with variable capital (Société d'Investissement à Capital Variable or "SICAV"). The assets of each compartment are segregated by law. The fund qualifies as an Undertaking for Collective Investment in Transferable Securities (a UCITS fund). As an investment fund, the return of the fund depends on the performance of its underlying assets.

Term

The fund has no fixed maturity date. However, the fund may be liquidated following notice to investors and subject to other conditions as described in the fund's Prospectus. The recommended holding period of the fund is 5 years.

You may request to redeem or exchange your shares on any business day of the MFS Meridian Funds (please see the fund's Prospectus). Information about other classes of the fund available in your country is available at meridian.mfs.com or from your financial intermediary.

Objectives

The fund's objective is total return, with an emphasis on current income but also considering capital appreciation, measured in U.S. dollars.

The fund invests primarily (at least 70%) in U.S. government securities, including mortgage-backed securities. The fund may also invest in other debt instruments. The fund invests substantially all of its assets in investment grade debt instruments. The Investment Manager may consider environmental, social and governance (ESG) factors in its fundamental analysis alongside other factors. The fund falls within Article 6 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR") and does not promote an environmental or social characteristic, or have sustainable investment as its objective. The fund may use derivatives for hedging and/or investment purposes but will not extensively or primarily use derivatives to achieve the fund's investment objective.

For information about the fund's risks, please see the fund's Prospectus.

The fund's benchmark, Bloomberg U.S. Government/Mortgage Bond Index (USD), has been designated for performance comparison only. Although the fund's investments will generally be represented in the benchmark, components are likely to be weighted differently from the benchmark and the fund is likely to invest outside of the benchmark to take advantage of attractive investment opportunities. The fund is actively managed within its objectives and the investment strategy will not restrict the extent to which portfolio holdings may deviate from the benchmark. It is expected that the fund's deviation from the benchmark will be significant.

Distributions. Income (net of expenses) will be distributed to shareholders monthly.

Depository. The fund's depository is State Street Bank International GmbH, Luxembourg Branch.

Intended Retail Investor

The fund is intended as a long term investment for investors who have the ability to bear fluctuations in the value of their investment, including in extraordinary market conditions, the total loss of their investment. The fund is available for investors with basic knowledge of financial instruments and limited or no previous experience investing in pooled investment products. Notwithstanding the above, investment decisions should be based on each investor's specific risk profile and investment portfolio.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years.

The fund has no required minimum holding period. You may request, on any business day of the fund, to redeem your shares in the currency in which the purchase was made at their net asset value. Please see the fund's Prospectus for more information. Due to potential volatility of returns, you should be prepared to stay invested for at least 5 years.
