Shareholders' information

The annual general meeting of shareholders of Morgan Stanley Investment Funds (the "Company") is held at the registered office of the Company and will be held on the second Tuesday of the month of May at 10.30 am. If such day is a legal or a bank holiday in Luxembourg, the annual general meeting shall be held on the next business day.

Notices of all general meetings are sent by mail to all registered shareholders at their registered address at least 8 days prior to the meeting. Such notices will indicate the time and place of the meeting as well as the conditions of admission thereto. Said notices will also contain the agenda and requirements of Luxembourg law with regard to the necessary quorum and majorities at the meeting.

To the extent required by law, further notices will be published in the Mémorial and in one Luxembourg newspaper.

Audited financial statements in respect of the preceding financial year are made available at the registered office of the Company and are available to shareholders upon request. In addition, unaudited semi-annual reports are also made available at the registered office.

The annual and semi-annual reports are also available on the Company's website (www.morganstanleyinvestmentfunds.com).

The Company's financial year end is 31 December.

Any other notices relevant to the Company are also published in a Luxembourg newspaper or mailed to affected shareholders.

The net asset value per share of each Class of Share is available on their respective dealing day during Luxembourg business hours at the registered office of the Company. Net asset value per share information is also available from market information providers, such as Bloomberg, www.fundinfo.com and Morningstar, as well as being available at www.morganstanleyinvestmentfunds.com.

No subscriptions can be received on the basis of financial reports alone. Subscriptions are only valid if made on the basis of the current prospectus and the latest Key Information Document.

Carnegie Fund Services S.A., 11, rue du Général-Dufour, 1204 Geneva, web: carnegie-fund-services-ch, is the representative in Switzerland and Banque Cantonale de Genève, 17, quai de l'Île, 1204 Geneva is the paying agent in Switzerland. The Prospectus, the latest Key Information Document, the Articles and the annual and semi-annual reports of the Company may be obtained free of charge from the representative in Switzerland.

A list of purchases and sales (securities transactions) carried out by the Company during the reporting year may be obtained free of charge from the representative in Switzerland.

The investment objectives set out in this annual report are summaries only. The complete investment objectives and policies for each Fund are set out in the Company's current prospectus.

Sustainability-related information required in accordance with Regulation (EU) 2019/2088 (SFDR) is available in Appendix 9: Sustainable Finance Disclosure (unaudited).

Board of Directors' Report

 - On 20 October 2023, Morgan Stanley Investment Funds – Sustainable Global High Yield Bond Fund changed its name to Morgan Stanley Investment Funds – Global High Yield Bond Fund.

Board of Directors' Report (continued)

Directors

CARINE FEIPEL

Independent Non-Executive Director

Carine Feipel is a non-executive director and Chair of the Company. Ms. Feipel is a Luxembourg Honorary attorney.

Ms. Feipel obtained the INSEAD IDP Certificate on Corporate Governance in 2014 and was admitted by ILA as a Certified Director in the same year. Ms. Feipel is a member of the Board of Directors of a Luxembourg based bank, four insurance companies, both active in the life insurance and the non-life insurance fields. Ms. Feipel is also a member of the Board of Directors of various Luxembourg companies active in the financial and investment funds sectors. In 2014, Ms. Feipel was elected to the Board of Directors of ILA and Served as Chair of such professional association from 2019 to 2023.

Ms. Feipel has almost 30 years of experience as a lawyer. She was a partner at Luxembourg law firm Arendt & Medernach where she headed the insurance law practice and was co-head of the employment law practice. Ms. Feipel was also a member of the Board of such firm and headed its New York office from 2007 to 2012. Ms. Feipel has been a member of various committees within the *Haut Comité pour la Place Financière*, a Government lead think tank coordinating promotion and innovation initiatives for the Luxembourg financial sector.

DIANE HOSIE

Non-Executive Director

Diane Hosie is a non-executive director of the Company and formerly International Head of Morgan Stanley Investment Managements client services and distribution oversight teams. Ms Hosie joined Morgan Stanley Investment Management in 1997 as a Senior Associate within Investment Management Operations and was named Managing Director in 2014. She has over 30 years' experience in Asset Management. Prior to Morgan Stanley Investment Management Ms Hosie spent nine years with Nomura Capital Management.

Ms. Hosie is a non-executive Director on a number of Luxembourg and Dublin based investment funds and management companies including MSIM Fund Management (Ireland) Limited. She is also the independent chair of a UK based Authorised Fund Manager.

SUSANNE VAN DOOTINGH

Independent Non-Executive Director

Susanne van Dootingh is a non-executive director of the Company. Ms. van Dootingh is an independent non-executive director of various Luxembourg domiciled investment funds and management companies. Prior to becoming an independent non-executive director in 2017, Ms. van Dootingh worked at State Street Global Advisors (SSGA) from 2002 to 2017 with her final position being Senior Managing Director, Head of European Governance and Regulatory Strategy, EMEA. During her tenure at

SSGA she held various other senior positions, amongst others in Global Product Development and Fixed Income Strategy, and was the chairwoman of the SSGA flagship Luxembourg Sicav and Management Company and various other boards for a decade.

Before joining SSGA in 2002 Ms. van Dootingh gained experience in global fixed income portfolio management and strategy at Fortis Investment Management, Barclays Global Investors and ABN AMRO Asset Management. She graduated from the Vrije Universiteit Amsterdam with a Master's degree in Financial Sector Management.

ZOË PARISH

Executive Director

Zoë Parish is a Managing Director of Morgan Stanley and the Head of International Product and Board Governance for Morgan Stanley Investment Management. Before returning to Morgan Stanley in 2019, Zoë spent 4 years at Coutts and Co and was most recently Head of Europe and Americas. Prior to that she was Head of Delivery responsible for developing and implementation of strategies for Coutts products for England and Wales. Prior to this she was business lead for several strategic projects for the firm including a web based investment platform. From 1993 to 2014, Zoë held leadership and product roles in Morgan Stanley's Private Wealth Management business in EMEA. In her latest role with the firm as Managing Director, she was Head of Product and also headed up the Alternatives platform, the Private Investment Club and Strategic Lead Management for EMEA. Zoë received a B. A. (Hons) and an LLB (Hons) both from the University of London. She also sits on the Board of Morgan Stanley Asset Management S.A and is the Chairman of the Board of Trustees for the University of London Boat Club.

ARTHUR LEV

Non-Executive Director

Arthur Lev is a non-executive director of the Company. Arthur Lev is the former Chairman of Morgan Stanley Investment Management (MSIM), where he spent nearly twenty years in a variety of business, risk and legal roles, most recently managing MSIM's Long Only and Alternatives businesses. Arthur also spent four years at FrontPoint Partners, a hedge fund firm that was acquired by Morgan Stanley. Arthur is currently an independent board member (and chair of the Audit and Risk Committee) of Russell Investments, a global money manager based in Seattle, WA. Arthur was previously an independent board member of NextCapital Group, a digital adviser and financial technology firm based in Chicago, IL (acquired by Goldman Sachs in 2022), and an independent board member of Techstars, a startup accelerator platform based in Boulder, CO. Arthur is a graduate of the University of Southern California (AB, 1983) and Harvard Law School (JD, 1986).

Board of Directors' Report (continued)

Structure of the Company

Morgan Stanley Investment Funds (the "Company") is registered in the Grand Duchy of Luxembourg as an undertaking for collective investment pursuant to Part I of the Law of 17 December 2010 on Undertakings for collective investment, as amended (the "2010 Law"). Such registration however does not imply a positive assessment by the supervisory authority of the quality of the shares of the Company (the "Shares") offered for sale. Any representation to the contrary is unauthorised and unlawful. The Company is an Undertaking for Collective Investment in Transferable Securities ("UCITS") for the purpose of the Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (the "UCITS Directive" or the "UCITS IV Directive"). Effective 1 January 2019, the Company has appointed MSIM Fund Management (Ireland) Limited as management company (the "Management Company").

Distribution of the Funds

All of the Funds and Share Classes are registered for distribution in the Grand Duchy of Luxembourg and a number of the Funds and Share Classes are registered for distribution in other jurisdictions. For a full list of countries in which Funds and Share Classes are registered for sale, please refer to www.morganstanleyinvestmentfunds.com.

Role and Responsibility of the Board

The responsibility of the Board is governed by Luxembourg law. With respect to the financial statements of the Company, the duties of the Directors are governed by the law of 10 December 2010 on, inter alia, the accounting and annual accounts of undertakings for collective investment and by the law of 17 December 2010 relating to undertakings for collective investment.

The matters reserved for the Board include determination of each Fund's investment objective and policies, investment restrictions and powers, amendments to the Prospectus, reviewing and approving key investment and financial data, including the annual accounts, as well as the appointment of the Auditor, the Custodian and the Management Company.

Prior to each Board meeting, the Directors receive detailed and timely information allowing them to be prepared for the items under discussion during the meeting. For each quarterly meeting, the Board receives reports consolidated by the Management Company on the basis of information received from the Investment Adviser, the Distributor, the Custodian, the Administrator, the

Transfer Agent, Risk Management, the Auditor as well as proposals for changes to existing Funds or proposals to launch new ones as appropriate. Senior representatives of the Management Company and other service providers attend Board meetings by invitation to enable the Directors to question the reports presented to them.

The Board can take independent professional advice if necessary and at the Company's expense.

Board Evaluation

The Board carries out an annual review of its performance.

Board Composition

The Board as a whole has a breadth of investment knowledge, financial skills, as well as legal and other experience relevant to the Company's business. Directors are elected annually by shareholders at the Annual General Meeting. The Board takes into account the nature and requirements of the fund industry and of the Company's business when making the recommendation to shareholders that Directors be elected.

Tabular Summary of Board Composition

Director	Residence	Executive	Non-Executive	Independent non-executive	Length of service on Board
Carine Feipel	Luxembourg			X	8 years
Susanne van Dootlingh	Belgium			X	5.25 years
Diane Hosie	United Kingdom		X		5.25 years
Zoë Parish	United Kingdom	X			3.75 years
Arthur Lev	United States of America		X		2.75 years

Board Meetings

The Board meets at least quarterly and additional meetings are convened as required from time to time by the business of the Company.

At the quarterly board meetings, the agenda includes, amongst other matters, those items highlighted under the section above called 'Role and Responsibility of the Board' and the approval of the annual report and accounts.

In certain circumstances, when it may not be appropriate to wait until the next Board meeting to discuss a particular issue, authority may be delegated to one or more Board members to deal with particular business issues.

The following table captures the Directors' attendance of Board Meetings throughout 2023.

Board of Directors' Report (continued)

Director	Number of board meetings attended
Carine Feipel	6 out of 6
Susanne van Dootingh	6 out of 6
Diane Hosie	6 out of 6
Zoë Parish	6 out of 6
Arthur Lev	5 out of 6

Internal Control

All administrative services are provided by the Management Company and custody of assets is provided by J.P. Morgan SE., Luxembourg Branch. The Management Company may delegate some of its responsibilities to any other party subject to approval by the Company but the Management Company's liability to the Company for the performance of collective portfolio management and other delegated services has not been affected by such delegation. In particular, the Management Company has delegated the investment management, distribution, central administration and transfer agency functions. The Board is responsible for the oversight of the design, implementation and maintenance of internal controls comprising monitoring the services provided by the Management Company and the Custodian, including the operational and compliance controls established by them to meet the Company's obligations to shareholders as set out in the Prospectus, Articles of Incorporation as well as all relevant regulations. The Management Company formally reports to the Board on a quarterly basis on the various activities it is responsible for and in addition shall inform the Board without delay of any material administrative or accounting matters.

Corporate Governance and ALFI Code of Conduct

The Board is responsible for ensuring that a high level of corporate governance is met and considers that the Company has complied with the best practices in the Luxembourg funds industry.

In particular the Board has adopted the ALFI Code of Conduct (the "Code") which sets out principles of good governance. These principles were last amended in June 2022 and are set out below:

1. The Board should ensure that high standards of corporate governance are applied at all times;
2. The Board should have good professional standing and appropriate experience and use best efforts to ensure that it is collectively competent to fulfil its responsibilities;
3. The Board should act fairly and independently in the best interests of the investors;
4. The Board should act with due care and diligence in the performance of their duties;

5. The Board should ensure compliance with all applicable laws and regulations and with the Fund's constitutional documents;
6. The Board should ensure that investors are properly informed, are fairly and equitably treated, and receive the benefits and services to which they are entitled;
7. The Board should ensure that an effective risk management process and appropriate internal controls are in place;
8. The Board should identify and manage fairly and effectively, to the best of its ability, any actual, potential or apparent conflict of interest and ensure appropriate disclosure;
9. The Board should ensure that shareholder rights are exercised in a considered way and in the best interests of the Fund;
10. The Board should ensure that the remuneration of the Board members is reasonable and fair and adequately disclosed; and
11. The board should integrate as appropriate sustainability standards and objectives including environmental, social and governance (ESG) criteria in its business model and operations.

The Board considers that the Company has been in compliance with the principles of the Code in all material aspects throughout the financial year ended 31 December 2023. The Board undertakes an annual review of ongoing compliance with the principles of the Code.

Proxy Voting Policy

The Board delegates responsibility for proxy voting to the Management Company. The Management Company manages the voting rights of the shares entrusted in a prudent and diligent manner, based exclusively on the reasonable judgment of what will best serve the financial interests of clients. So far, as is practicable, the Management Company will vote at all of the meetings called by companies in which the funds are invested.

A copy of the proxy voting policy is available from the Fund's registered office upon request or on the website:
<http://www.morganstanley.com/im/en-gb/institutional-investor/about-us/proxy-voting-en-gb.html>

Directors' and Officers' Indemnity Insurance

The Fund has taken out Directors' and Officers' Indemnity Insurance which indemnifies the Directors against certain liabilities arising in the course of their duties and responsibilities but does not cover against any fraudulent or dishonest actions on their part.

Board of Directors' Report (continued)

Annual General Meeting

The next Annual General Meeting of the Company will be held on 14 May 2024 at the Registered Office of the Company to consider matters relating to the year ended 31 December 2023. At this meeting shareholders will, amongst other matters, be requested to consider the usual matters at such meetings including:

1. The adoption of the financial statements and approval of the allocation of the results;
2. The approval of Directors' fees;
3. The election of the Directors, all of whom wish to stand for election;
4. The election of the Auditor.

Calvert Global Equity Fund*

INVESTMENT AIM

To provide high total returns, consistent with reasonable risk, measured in U.S. Dollars, by primarily investing in equity securities of companies located throughout the world (including in emerging markets for up to 30% of its net assets). Furthermore, the Fund will invest in companies that, in the opinion of the Investment Adviser, exhibit, through their operations and business practices, sound management of ESG characteristics. These characteristics include environmental sustainability, resource efficiency, support for equitable societies and respect for human rights, accountable governance, and transparent operations.

*Fund commenced operations on 28 November 2023.

Calvert Sustainable Climate Aligned Fund

INVESTMENT AIM

To provide long-term capital appreciation, measured in US Dollars, primarily investing in companies located in developed markets that are involved in economic activities that address climate transition and/or are aligned to the long-term de-carbonisation objectives of the Paris Agreement. The Fund will maintain a carbon profile that follows the net zero objectives of the Paris Agreement, as reflected in the appropriate Paris-Aligned benchmark, or in the absence of an approved Paris-Aligned benchmark it will maintain a substantially lower carbon footprint, of at least 50% less than that of the underlying market benchmark, and taking into account the long-term carbon reduction objectives of the Paris Agreement which may warrant a revision of the targeted range of reduction over time. Carbon footprint shall be measured as weighted average carbon intensity, defined as tonnes of CO₂ per \$1million enterprise value including cash.

Calvert Sustainable Developed Europe Equity Select Fund

INVESTMENT AIM

To provide long-term capital appreciation, measured in Euro, primarily investing in companies located in Europe's developed markets that are involved in economic activities that address global environmental or societal challenges that relate to areas such as environmental sustainability and resource efficiency, diversity, equity and inclusion, respect for human rights, product responsibility, human capital management and accountable governance and transparent operations, or are leaders in managing financially material environmental or social risks and opportunities. This strategy further takes into account the long-term carbon reduction objectives of the Paris Agreement and advancement of diversity, equity and inclusion.

Calvert Sustainable Developed Markets Equity Select Fund

INVESTMENT AIM

To provide long-term capital appreciation, measured in US Dollars, primarily investing in companies located in developed markets that are involved in economic activities that address global environmental or societal challenges, such as environmental sustainability and resource efficiency, diversity, equity and inclusion, respect for human rights, product responsibility, human capital management and accountable governance and transparent operations, or are leaders in managing financially material environmental or social risks and opportunities. This strategy further takes into account the long-term carbon reduction objectives of the Paris Agreement and advancement of diversity, equity and inclusion.

Calvert Sustainable Diversity, Equity and Inclusion Fund

INVESTMENT AIM

To provide long-term capital appreciation and advance diversity, equity and inclusion, measured in US Dollars, primarily investing in companies located globally, that demonstrate leadership or meaningful improvement in having a diverse workforce and an equal and inclusive work culture. The Fund will seek to maintain higher levels of workforce diversity at a portfolio level than the underlying market benchmark as measured by average percentage of women at the board level and average percentage of board members representing underrepresented ethnicities.

Calvert Sustainable Emerging Markets Equity Select Fund

INVESTMENT AIM

To provide long-term capital appreciation, measured in US Dollars, primarily investing in companies located in the world's emerging markets that are involved in economic activities that address global environmental or societal challenges that relate to areas such as environmental sustainability and resource efficiency, diversity, equity and inclusion, respect for human rights, product responsibility, human capital management and accountable governance and transparent operations, or are leaders in managing financially material environmental or social risks and opportunities. This strategy further takes into account the long-term carbon reduction objectives of the Paris Agreement and advancement of diversity, equity and inclusion.

China A-shares Fund

INVESTMENT AIM

To provide capital appreciation over the long term, measured in US Dollars, by investing primarily in China A-shares of companies listed on the Shanghai Stock Exchange and/or the Shenzhen Stock Exchange via Stock Connect. The Fund may also invest in issuers of other countries including, but not limited to, those that are listed on the Hong Kong Exchange (including China H-shares and red chips) and depositary receipts (including American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs)) of issuers located in any country and referring to China companies.

The Fund may make use of exchange traded and over-the-counter options, futures and other derivatives for investment or efficient portfolio management (including hedging) purposes.

Global Permanence Fund

INVESTMENT AIM

To seek long-term capital appreciation, measured in US Dollars, by investing primarily in equity securities, including depositary receipts (including American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs)), of established companies located throughout the world, with capitalisations within the range of companies included in the MSCI All Country World Index. With a view to enhancing returns and/or as part of the investment strategy, the Fund may make use of exchange traded and over-the-counter options, futures and other derivatives for investment or efficient portfolio management (including hedging) purposes.

Indian Equity Fund

INVESTMENT AIM

To seek long-term capital appreciation, measured in US Dollars, by investment directly or indirectly, primarily in the equity securities of companies domiciled or exercising the predominant part of their economic activity in India. The Fund, either directly or indirectly, may also invest, on an ancillary basis, in companies listed on Indian stock exchanges which may not be domiciled or exercising the predominant part of their economic activity in India, in depositary receipts (including American Depositary Receipts (ADRs), Global Depositary Receipts (GDRs) and European Depositary Receipts (EDRs)), debt securities convertible into common shares, preference shares, debentures, warrants on securities and other equity linked securities, including participatory notes. The Fund, either directly or indirectly, will invest in a concentrated portfolio of companies.

Sustainable Asia Equity Fund

INVESTMENT AIM

To seek long-term capital appreciation, measured in US Dollars, through investment primarily in the equity securities of companies domiciled in or exercising the predominant part of their economic activity in Asia, excluding Japan, thereby taking advantage of the dynamic economic growth capabilities of the region, while incorporating environmental, social and corporate governance (ESG) considerations. The Fund will maintain a lower carbon footprint than the MSCI Asia ex Japan Net Index.

US Insight Fund

INVESTMENT AIM

To seek long-term capital appreciation, measured in US Dollars, by investing primarily in securities issued by US companies and on an ancillary basis in securities issued by companies that are not from the US. Under normal market conditions, the Fund's investment objective will be pursued by investing primarily in equity securities of established and emerging companies.

Emerging Markets Corporate Debt Fund

INVESTMENT AIM

To seek to maximise total return, measured in US Dollars, primarily through investments across the credit spectrum of Fixed Income securities of corporate issuers, together with investing in Fixed Income securities of government and government related issuers located, in each case, in emerging markets countries. The Fund intends to invest its assets in emerging market countries' Fixed Income securities that provide a high level of current income, while at the same time holding the potential for capital appreciation.

Emerging Markets Debt Opportunities Fund*

INVESTMENT AIM

To generate total return, which is defined as income plus capital appreciation, by establishing long and short investment exposures to Emerging Markets debt pool through currencies, local interest rates, and sovereign and corporate credit, while investing primarily in (i) Fixed Income Securities of corporate, government and government-related issuers located in Emerging Market countries; and/or (ii) derivative instruments denominated in or based on the currencies, interest rates, or issuers of Emerging Market countries. Fixed Income Securities may include zero coupon bonds, preferred stocks, deferred interest bonds and notes and bonds and notes on which the interest is payable in the form of additional eligible stocks, bonds or notes of the same kind (Payment-in-Kind (PIK) securities).

* Fund commenced operations on 11 August 2023.

Global Asset Backed Securities Fund

INVESTMENT AIM

To provide an attractive rate of total return, measured in US Dollars, through investment primarily in Fixed Income Securities that are mortgage-backed securities, commercial mortgage-backed securities, collateralised mortgage obligations and covered bonds that are covered by mortgages including uniform mortgage-backed securities ("Mortgage Backed Securities"). At least half of the Fund's asset will be invested in securities rated investment-grade by an internationally recognised rating agency, securities determined to be of similar creditworthiness by the Investment Adviser, or securities backed by the United States of America.

Global Bond Fund

INVESTMENT AIM

To provide an attractive rate of return, measured in US Dollars, through market, instrument and currency selection. The Fund will invest primarily in domestic, international, emerging market and Euromarket Fixed Income Securities of varying maturities denominated in US Dollars and other currencies, including asset-backed securities (including mortgage backed securities), loan participations and loan assignments, to the extent that these instruments are securitised.

Global Credit Fund

INVESTMENT AIM

To provide an attractive rate of relative return, measured in USD, primarily through investment in Fixed Income Securities issued by corporations and other non government issuers (“Corporate Bonds”) organised or operating in both developed and emerging markets and denominated in global currencies. With a view to enhancing returns and/or as part of the investment strategy, the Fund may make use of exchange traded and over-the-counter options, futures and other derivatives for investment or efficient portfolio management (including hedging) purposes, while incorporating environmental, social and corporate governance (ESG) considerations.

Collateral received and paid by the Fund in respect of financial derivative instruments:

Type of Collateral	Counterparty	Currency	Amount received	Amount paid
Global Credit Fund				
Cash	Goldman Sachs	USD	37,392	-
			37,392	-

Global Credit Opportunities Fund*

INVESTMENT AIM

To provide an attractive level of total return, measured in US Dollars.

The Fund will invest primarily in Fixed Income Securities issued by corporations (“Corporate Bonds”) and other non-government related issuers located in developed markets, including investment grade bonds, high-yield bonds. The Fund may also invest primarily in mortgage-backed securities, and convertibles subject to applicable law and in other asset-backed securities as well as loan participations and loan assignments to the extent that these instruments are securitised.

*Fund commenced operations on 28 February 2023.

Global Fixed Income Opportunities Fund

INVESTMENT AIM

To provide an attractive level of total return, measured in US Dollars, through investment primarily in the global securities of corporate, government and government related issuers across a spectrum of fixed income asset classes including high yield bonds, investment-grade bonds, mortgage-backed securities, convertibles and currencies, and subject to applicable law, in other asset-backed securities, loan participations and loan assignments, to the extent that these instruments are securitised.

Global High Yield Bond Fund*

INVESTMENT AIM

To provide an attractive rate of total return, measured in U.S. Dollars, by investing primarily in high yield and unrated Fixed Income Securities, including without limitation those issued by governments, agencies and corporations located in emerging markets and for the avoidance of doubt and subject to applicable law, including asset-backed securities and loan participations and loan assignments, to the extent that these instruments are securitised.

*Formerly known as Sustainable Global High Yield Bond Fund prior to 20 October 2023.

US High Yield Middle Market Bond Fund*

INVESTMENT AIM

To provide an attractive rate of total return, measured in U.S. Dollars, by investing primarily in high yield and unrated U.S. Dollar denominated Fixed Income Securities, including without limitation those issued by Middle Market corporations or by governments and agencies located in developed or emerging markets and for the avoidance of doubt and subject to applicable law, including asset-backed securities and loan participations and loan assignments, to the extent that these instruments are securitised. For the purpose of this Fund, "Middle Market" is defined as the market for issuers with up to USD 1 billion in outstanding debt.

*Formerly known as US Dollar High Yield Bond Fund prior to 31 August 2023.

Global Balanced Defensive Fund

INVESTMENT AIM

To provide an attractive level of total return, measured in Euro, by investing primarily in portfolio of transferable securities such as equity securities, including closed-end Real Estate Investment Trusts (REITS); Fixed Income Securities (including investment grade, non-investment grade and unrated) and money market instruments and cash globally and through the use of financial derivative instruments. The investments will target total portfolio risk and volatility below that of the Global Balanced Fund.

Global Balanced Fund

INVESTMENT AIM

To provide an attractive level of total return, measured in Euro, by investing in a broad and balanced asset mix of both equity and Fixed Income Securities, while incorporating environmental, social and corporate governance (ESG) considerations. The Fund aims to manage total portfolio risk by managing the volatility level of the portfolio.

Notes to the financial statements

As at 31 December 2023

1 THE COMPANY

Morgan Stanley Investment Funds (the “Company”) was incorporated on 21 November 1988 under the laws of the Grand Duchy of Luxembourg as a “Société d’Investissement à Capital Variable” (“SICAV”) and is registered as an undertaking for collective investment pursuant to Part 1 of the Law of 17 December 2010, as amended. The 2010 Law transposes the UCITS Directives (Directive 2009/65/EC as amended by Directive 2014/91/EU) into Luxembourg legislation.

The exclusive purpose of the Company is to invest the funds available to it in transferable securities and other assets permitted by law, with the purpose of spreading investment risks and affording its shareholders the results of the management of its assets. The Company is presently structured to provide both institutional and individual investors with a variety of Equity, Bond, Liquidity, Alternative and Asset Allocation Funds.

At the date of this report eighty five funds are open for subscription.

Investment in Transferable Securities) Regulations 2011, as amended, and an umbrella fund with segregated liability between sub-funds, merged into three newly launched Morgan Stanley Investment Funds, on a 1 to 1 basis:

- On 11 August 2023, Eaton Vance International (Ireland) Funds plc – Global Macro Fund merged into Morgan Stanley Investment Funds – Global Macro Fund
- On 11 August 2023, Eaton Vance International (Ireland) Funds plc – Emerging Markets Local Income Fund merged into Morgan Stanley Investment Funds – Emerging Markets Local Income Fund
- On 11 August 2023, Eaton Vance International (Ireland) Funds plc – Emerging Markets Debt Opportunities Fund merged into Morgan Stanley Investment Funds – Emerging Markets Debt Opportunities Fund.

Name Change

On 31 August 2023 Morgan Stanley Investment Funds – Sustainable US High Yield Bond Fund changed its name to Morgan Stanley Investment Funds – US High Yield Bond Fund.

On 31 August 2023 Morgan Stanley Investment Funds – US Dollar High Yield Bond Fund changed its name to Morgan Stanley Investment Funds – US High Yield Middle Market Bond Fund.

On 29 September 2023 Morgan Stanley Investment Funds – International Equity (ex US) Fund changed its name to Morgan Stanley Investment Funds – International Resilience Fund.

On 20 October 2023 Morgan Stanley Investment Funds – Sustainable Global High Yield Bond Fund changed its name to Morgan Stanley Investment Funds – Global High Yield Bond Fund.

Significant Event

Acquisition of RBC by CACEIS and Related Changes

With effect from 3 July 2023, CACEIS Investor Services Bank S.A. acquired the Transfer Agent, RBC Investor Services Bank. The acquisition does not change the scope of services provided to the Fund. CACEIS Investor Services Bank S.A. will continue to carry out the Transfer Agent service through its branches and subsidiaries. As legal successor of RBC Investor Services Bank, CACEIS Investor Services Bank S.A. has assumed all rights and obligations that RBC Investor Services Bank had under the existing agreements with the Fund. All agreements in place with RBC Investor Services Bank have been transferred to CACEIS Investor Services Bank S.A. by operation of law. The domain name of the email address used to contact and receive information from the transfer agent changed from “@rbc.com” to “@caceis.com”.

Russia invasion of Ukraine

On 24 February 2022 Russia invaded Ukraine. The international community responded by imposing blocking sanctions on individuals, corporations and the Russian Central Bank. Prices of Russian and Ukrainian securities declined significantly following the invasion. The Directors have made an assessment regarding the potential impact of the Russia-Ukraine conflict on the funds. It remains unclear however what the longer-term impact of this action will be on portfolio positions within the Company. No Fund had exposure to Russia and/or Ukraine greater than 1.5% at 31 December 2023.

2 SIGNIFICANT ACCOUNTING POLICIES

The financial statements are presented in accordance with Luxembourg legal and regulatory requirements for UCITS investment funds in Luxembourg and require management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

The last day on which prices were calculated for all sub-funds was 29 December 2023, with the exception of Saudi Equity Fund which was on the 28 December 2023.

a) Valuation of securities

Securities listed on a recognised stock exchange or dealt in on any other regulated market are valued at their last available prices at the valuation point, or, in the event that there should be several such markets, on the basis of their last available prices on the main market for the relevant security.

In normal market conditions, fixed income securities (including mortgage and asset backed securities) are valued at mid market price at the valuation point, based on data provided by pricing vendors.

In the event that the last available price or mid market price (fixed income) does not truly reflect the fair market value of the relevant securities, the value of such securities will be based on the reasonably foreseeable sales price determined prudently and in good faith pursuant to procedures established by the Board of Directors of the Company.

Securities not listed or traded on a stock exchange or not dealt on another regulated market are valued on the basis of the reasonably foreseeable sales price determined prudently and in good faith pursuant to procedures established by the Board of Directors of the Company.

Investments in other Undertakings for Collective Investments (“UCIs”) are valued at the last available net asset value for the UCI in question, excluding redemption fees if any.

Events may occur between the determination of an investment’s last available price and the determination of the Fund’s Net Asset Value per Share at the valuation point that may, in the

Notes to the financial statements (continued)

As at 31 December 2023

opinion of the Board of Directors of the Company, mean that the last available price does not reflect the fair market value of the investment. In such circumstances the price of such investment shall be adjusted in accordance with the procedures adopted from time to time by the Board of Directors of the Company in their discretion. As at the date of this annual report, certain securities may be fair valued in accordance with these procedures.

If since the time of determination of the net asset value there has been a material change in the quotations in the markets on which a substantial portion of the investments attributable to an available Fund are dealt in or quoted, the Company may, in order to safeguard the interests of the shareholders and the Company, cancel the first valuation and carry out further valuations as appropriate.

b) Valuation of Interest rate swaps

An Interest Rate Swap (“IRS”) is a bilateral agreement in which each of the parties agree to exchange a series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged.

IRS contracts are valued by reference to service data providers, market data and algorithms.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on interest rate swap contracts” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on interest rate swaps” and the realised gain/loss under “Net realised gain/(loss) on interest rate swaps” in the Statement of operations and changes in net assets.

c) Valuation of Inflation rate swaps

An inflation rate swap is a bilateral agreement in which each of the parties agree to exchange fixed rate payments for floating, inflation index linked payments based on a notional amount that serves as a computation basis.

Inflation rate swap contracts are valued by reference to service data providers, market data and algorithms.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on inflation rate swaps” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on inflation rate swaps” and the realised gain/loss under “Net realised gain/(loss) on inflation rate swaps” in the Statement of operations and changes in net assets.

d) Valuation of Credit default swaps

A Credit Default Swap (“CDS”) is a transaction in which two parties enter into an agreement, whereby the buyer pays the seller a periodic payment for the specified life of the agreement. The seller makes no payments unless a credit event, relating

to a predetermined reference asset, occurs. If such an event does occur, the seller will then make a payment to the buyer, and the swap contract will terminate.

CDS contracts are valued by reference to service data providers, market data and algorithms.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on credit default swaps” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on credit default swaps” and the realised gain/loss under “Net realised gain/(loss) on credit default swaps” in the Statement of operations and changes in net assets.

The notional amount represents the highest potential liability of a contract and is not shown in the Statement of assets and liabilities.

e) Valuation of Total return swaps

A Total Return Swap (“TRS”) is a transaction in which the buyer receives the performance of an underlying asset and in return the buyer pays funding costs and generally, an arrangement fee. The underlying asset may be, but not limited to, a specific security, basket of securities, other instruments or an index.

TRS contracts are valued by reference to the mark to market value based on the market value of the underlying asset.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on Commodity index and total return swap contracts” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on Commodity index and total return swaps” and the realised gain/loss under “Net realised gain/(loss) on Commodity index and total return swaps” in the Statement of operations and changes in net assets.

f) Valuation of Options

Options are contractual agreements that convey the right, but not the obligation, for the purchaser either to buy or sell a specific amount of a financial instrument at a fixed price, either at a fixed future date or at any time within a specified year.

Options are valued by reference to the expected future cash flow based on the market implied performance, spot level and the volatility of the underlying asset(s).

In determining the accounting treatment for options, consideration is given to the nature of the instrument itself and the Fund’s investment objective. When the underlying asset is acquired or delivered upon exercise of an option, the acquisition cost or sale proceeds are adjusted by the amount of the premium paid. When an option is closed, the difference between the premium and the cost to close the position

Notes to the financial statements (continued)

As at 31 December 2023

is recorded under “Net realised gain/(loss) on options contracts” in the Statement of operations and changes in net assets. When an option expires, the premium is accounted for as a realised gain for options written or as a realised loss for options purchased.

For Global Balanced Income Fund, Global Macro Fund, Global Convertible Bond Fund, Emerging Market Local Income Fund and Emerging Market Domestic Debt Fund the premium received on written listed and OTC options is recorded as income. When an option is closed, the cost to close the position is recorded under “Net realised gain/(loss) on options contracts” in the Statement of operations and changes in net assets.

The market value of options purchased at fair value / options written at fair value is recorded in the Statement of assets and liabilities. The changes in unrealised gain/(loss) on options are recorded under “Net change in unrealised appreciation/(depreciation) on options contracts” in the Statement of operations and changes in net assets.

g) Swaption

A swaption is an option contract that grants its holder the right but not the obligation to enter into a predetermined swap contract. In return for the right, the holder of the swaption pays a premium to the issuer of the contract. Swaption contracts are valued by reference to service data providers, market data and algorithms. The unrealised gain/loss as at year end is recorded under “options purchased/written contracts at fair value” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on options contracts” and the realised gain/loss under “Net realised gain/(loss) on options contracts” in the Statement of operations and changes in net assets.

h) Bond Forward Contracts

Bond Forward Contracts is a short-term forward contract to purchase pre-specified fixed income instruments at a set price and within a specified time frame. The unrealised gain or loss on open contracts is calculated by reference to the difference between the contracted rate and the rate to close out the contract. The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on bond forward” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on bond forward” and the realised gain/loss which is the net gain/loss on contracts which have settled is recorded under “Net realised gain/(loss) on bond forward” in the Statement of operations and changes in net assets.

i) Valuation of Forward currency exchange contracts

A forward currency exchange contract is an agreement between two parties to exchange one currency for another at a specific price and date in the future.

All currency exchange contracts with maturity date greater than 2 business days from their trade dates are classified as Forward currency exchange contracts in line with MIFID II classification rule.

Open forward contracts are valued by reference to the last available currency rates prevailing at the relevant valuation point.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on forward currency exchange contracts” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on forward currency exchange contracts” and the realised gain/loss under “Net realised gain/(loss) on forward currency exchange contracts” in the Statement of operations and changes in net assets.

j) Valuation of Financial futures contracts

A financial futures contract is a contractual agreement, to buy or sell a particular commodity or financial instrument at a pre-determined price in the future. Financial futures contracts detail the quality and quantity of the underlying asset and they are standardised to facilitate trading on a futures exchange.

Futures contracts are valued at the last available prices, on the exchanges for which the contracts are traded on, as at the valuation point.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on financial futures contracts” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on financial futures contracts” and the realised gain/loss under “Net realised gain/(loss) on financial futures contracts” in the Statement of operations and changes in net assets.

At the time the Fund enters into a financial futures contract the Fund deposits and maintains with the broker as collateral an initial margin as required by the exchange on which the transaction is affected. Cash collateral paid/received to the broker as of 31 December 2023 is recorded as part of “Cash at bank and at brokers” and “Bank overdraft and due to broker” in the Statement of assets and liabilities. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as the variation margin and are recorded by the Fund as unrealised appreciation/(depreciation) on financial futures contracts. When the contract is closed, the Fund records a “Net realised gain/(loss) on financial futures contracts” equal to the difference between the value of the contract at the time it was opened and the time it is closed.

Notes to the financial statements (continued)

As at 31 December 2023

k) Income and securities transactions

Dividend income is recorded on the ex-dividend date. Interest income is accrued daily. For short term money market instruments the discount/premium is accreted/amortised on a daily basis until maturity or the sale of the instrument. Income from securities lending is recorded on a cash receipts basis. Income is recorded net of withholding tax.

Securities transactions are accounted for on a trade date basis, on the date the securities are purchased or sold. Realised gains or losses on the sale of securities are determined on the basis of the average cost method and are recorded under "Net realised gain/(loss) on sales of investments" in the Statement of operations and changes in net assets.

For the Global Asset Backed Securities Fund realised gains and losses on the sale of interest only mortgaged-backed securities are determined on a First In First Out (FIFO) basis of cost method and are recorded under "Net realised gain/(loss) on sales of investments" in the Statement of operations and changes in net assets.

l) Valuation of Repurchase agreements

Under a repurchase agreement, the Company purchases securities and agrees to re-sell them at a mutually agreed upon date and price. A repurchase agreement is collateralised by securities. Repurchase agreements are valued at cost with interest accrued from the date of purchase.

Repurchase agreements outstanding as at year end, if any, are included in the Statement of assets and liabilities. Net repurchase agreements income is included under "Bank interest" in the Statement of operations and changes in net assets.

m) Special Purpose Acquisition Companies ("SPACs")

Certain Funds may invest in stock, warrants and other securities of special purpose acquisition companies or similar special purpose entities. A SPAC is typically a publicly traded company that raises investment capital for the purpose of acquiring or merging with an existing company. Typically, the acquisition target is an existing private company that wants to trade publicly, which it accomplishes through an acquisition by, or combination with, a SPAC rather than by conducting a traditional initial public offering ("IPO"). A fund may acquire an interest in a SPAC in an IPO or a secondary market transaction. Unless and until an acquisition is completed, a SPAC generally invests its assets (less a portion retained to cover expenses) in U.S. government securities, money market securities and cash. A SPAC is a blank check company, meaning it does not have any operating history or ongoing business other than seeking to acquire an ongoing business hence, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete an attractive acquisition.

The identity of the acquisition target is not known at the time of a SPAC's initial public offering.

n) Private Investments in Public Equities ("PIPEs")

A Fund may acquire equity securities of an issuer that are issued through a private investment in public equity transaction, including on a when-issued basis. PIPE transactions typically involve the purchase of securities directly from a publicly traded company or its affiliates in a private placement transaction including through a SPAC, typically at a discount to the market price of the company's securities. The Fund's PIPE investment represents an unfunded subscription agreement in a private investment in public equity. PIPEs are fair valued using the price of the publicly traded equity security as a baseline and deducting the percentage of discount realized on the original purchase unless it is believed that the issuance percentage discount no longer represents the difference in value between the publicly traded equity security price and the PIPE's fair value. In these circumstances, the valuation will be determined prudently and in good faith pursuant to procedures established by the Board of Directors of the Company.

Shares in PIPEs generally are not registered with the SEC until after a certain time year from the date the private sale is completed. This restricted year can last many months. Until the public registration process is completed, PIPEs are restricted as to resale and a Fund cannot freely trade the securities.

Generally, such restrictions cause the PIPEs to be illiquid during this time. PIPEs may contain provisions that the issuer will pay specified financial penalties to the holder if the issuer does not publicly register the restricted equity securities within a specified year of time, but there is no assurance that the restricted equity securities will be publicly registered, or that the registration will remain in effect.

The unrealised gain/loss as at year end is recorded under "Unrealised gain/loss on Private Investment in Public Equity (PIPE)" in the Statement of assets and liabilities. The changes in such amounts are recorded under "Net change in unrealised appreciation/(depreciation) on Private Investment in Public Equity (PIPE)" and the realised gain/loss under "Net realised gain/(loss) on Private Investment in Public Equity (PIPE)" in the Statement of operations and changes in net assets.

o) To Be Announced securities contracts (TBAs)

TBA contracts are forward contracts on agency mortgage passthrough securities issued by agencies such as Fannie Mae, Freddie Mac and Ginnie Mae. They are common trading practice in which a commitment to buy or sell a mortgage backed security for a fixed future proceed at a future date is given. The specific securities (i.e. specified mortgage pools) to be delivered or received are not identified at the trade date, but are "to be announced" on the notification date which is usually two days before the settlement date. The securities to be delivered must, however, meet specified criteria, including face value,

Notes to the financial statements (continued)

As at 31 December 2023

coupon rate and maturity, and be within industry-accepted “good delivery” standards. TBAs are accounted for as derivatives when the settlement of the TBA trade is not expected to occur at the next regular settlement date or when a mechanism exists to settle the contract on a net basis. TBA contracts are disclosed in the Statement of assets and liabilities as Unrealised gain/(loss) on TBA contracts. The realised gain/(loss) on TBAs and changes in unrealised appreciation/(depreciation) are disclosed in the Statement of operations and changes in net assets respectively under the headings “Net realised gain/(loss) on TBA contracts” and “Net change in unrealised appreciation/ (depreciation) on TBA contracts”.

p) Bond Forwards

A bond forward contract is a contractual agreement between two parties to buy or sell a specific fixed income security at a pre-determined price on a pre-determined future date. The market value is based on the valuation elements laid down in the contracts, and is obtained from third party pricing agents, market makers or internal models. The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on bond forward contracts” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on bond forward contracts” and the realised gain/loss under “Net realised gain/(loss) on bond forward contracts” in the Statement of operations and changes in net assets.

q) Translation of foreign currencies

Transactions in foreign currencies are translated into the currency of each Fund at the last available rate of exchange prevailing in a recognised market at the date of the transactions. Assets and liabilities denominated in foreign currencies are translated into the currency of each Fund at the last available rate of exchange prevailing in a recognised market at the date of the Statement of assets and liabilities.

The Combined statement of assets and liabilities is presented in US Dollars at the last available rate of exchange prevailing in a recognised market at the date of the Statement of assets and liabilities, while the combined Statement of operations and changes in net assets is presented in US Dollars at the average exchange rates ruling during the year.

The difference between opening net assets stated at exchange rates at the beginning of the year and their value at the end of the year is shown as “Translation difference” in the Statement of operations and changes in net assets.

The impact of translating the Statement of operations and changes in net assets at average exchange rates is included within the “Translation difference” in the Statement of operations and changes in net assets.

3 SECURITIES LENDING

Certain Funds may lend securities to qualified financial institutions, such as broker-dealers, to earn additional income. Any increase or decrease in the fair value of the securities loaned that might occur and any interest earned or dividends declared on those securities during the term of the loan would remain in the Fund. Funds that lend securities, receive securities as collateral in an amount equal to or exceeding 100% of the current fair value of the loaned securities. The collateral is marked to market daily, by the securities lending agent, to ensure that a minimum of 100% collateral coverage is maintained throughout the term of the loan. Securities lending income is generated as a result of securities on loan less compensation to the administrative agent. Net securities lending income is included in the Statement of operations and changes in net assets. See note 4(c) for related party disclosure on securities lending transactions, and “Appendix 8: Securities Financing Transactions (unaudited)” for further information on securities lending transactions.

The value of loaned securities, related collateral outstanding, identity of the counterparties, security lending income and associated operational costs and fees for the year ended 31 December 2023 are as follows:

Fund	Fund currency	Counterparty	Market value of securities on loan in Fund currency	Non cash collateral in Fund currency	Total collateral in Fund currency
Asian Property Fund	USD	BNP Paribas	4,543,277	4,996,917	4,996,917

All revenues from securities lending transactions shall be payable to the relevant Sub-Fund following the deduction of compensation to the securities lending agent for its services. The expenses which may be deducted from the revenue delivered to the relevant Sub-Fund should generally not exceed 20% of the gross revenue arising from securities lending transactions. The difference, i.e. 80%, will be paid to the relevant Sub-Fund.

4 RELATED PARTY TRANSACTIONS AND AFFILIATIONS

The Company has delegated to the Management Company MSIM Fund Management (Ireland) Limited under the overall supervision and control of the Board of Directors of the Company, its investment management services, central administration, registrar and transfer agency services as well as marketing, principal distribution and sales services, as more specifically detailed in the management company services agreement as well as in the prospectus of the Company.

MSIM Fund Management (Ireland) Limited is regulated by the Central Bank of Ireland to provide these services. The Management Company may delegate some of its tasks to other parties, as detailed below, subject to approval by the Company. The Management Company's liability to the Company for the performance of collective portfolio management and other delegated services has not been affected by such delegation.

The Management Company in turn delegates the investment management functions to Morgan Stanley Investment Management Limited known as the "Investment Adviser".

Under the terms of an investment advisory agreement, Morgan Stanley Investment Management Limited has been appointed as Investment Adviser with responsibility for providing discretionary asset management and investment advisory services to the Management company, such services to be provided in relation to all Funds. The Investment Adviser may delegate any of its responsibilities to any other party subject to approval by the Board of Directors of the Company and the CSSF but the Investment Adviser shall remain responsible for the proper performance by such party of those responsibilities. A full list of sub-advisers can be found on pages 578 to 579.

Notes to the financial statements (continued)

As at 31 December 2023

Under the terms of the Management Company Services Agreement the Management Company is entitled to receive a Management Fee at the annual rates set out below. Under the Investment Advisory Agreements the Investment Advisers are entitled to receive a fee for their discretionary investment management and investment advisory services. Under the Distribution Agreement the Distributor is entitled to receive a fee for its distribution services. The fees of the Investment Adviser and the Distributor will be paid out of the Management Fee (except for distribution fees paid on class B as described in sub-section iv on page 552).

The annual Management Fee rates being charged as of 31 December 2023 are as follows and are as disclosed within the prospectus of the Company unless footnoted otherwise:

¹⁶ Short Duration US Government Income Fund Class A and AM have reduced their Management Fee to 0.76%.

¹⁷ Short Maturity Euro Bond Fund Class I and Z have reduced their Management Fee to 0.17%.

¹⁸ US High Yield Bond Fund Class A and AM have reduced their Management Fee to 1.16%, Class AH (EUR) to 1.14%, Class C and CM have reduced their Management Fee to 1.66%. Formerly known as Sustainable US High Yield Bond Fund prior to 31 August 2023.

¹⁹ Formerly known as US Dollar High Yield Bond Fund prior to 31 August 2023.

No Management Fee is payable in respect of Share Class Indicator N Shares.

In the case of any individual Fund or Class, the Management Company, the Investment Adviser(s) or/and Distributors may choose to waive or rebate all of their fees and charges or any portion thereof at their absolute discretion for an indefinite year,

Notes to the financial statements (continued)

As at 31 December 2023

in order to reduce the impact such fee may have on the performance of the Fund or Class for instance where the net assets of the Fund or Class are of insufficient size.

Where the Funds invest into underlying investment funds that are managed by the Investment Adviser or its affiliates, the fees and charges of the underlying investment funds are rebated to the Funds to avoid duplicated Management Fees otherwise known as “double dipping”, with the rebate being included within Other income (where applicable) in the Statement of operations and changes in net assets.

The Funds are subject to the following:

- i) Management Fee at the levels described above. The Management Fee covers the fees of the principal distributor and the Investment Adviser.
- ii) A monthly Administration Charge payable to the Management Company at a maximum annual rate of 0.25% of the Funds’ aggregate average daily Net Asset Value attributable to all Classes of Shares of the Funds. The current fees are as follows:

Share Class Indicator	Administration Charge
A, B, C, and F*	0.19%
I and J	0.14%
S, N and Z	0.10%

* Contingent administration fee waiver of 5bps applied to Global Brands Fund Class F has reduced their Administration Charge to 0.14%

The Administration Charge will remain in force for an unlimited year and may be changed, subject to the maximum noted above, by the Company upon no less than one month’s prior written notice.

The Administration Charge will be utilised by the Company to pay the fees of the Administrator, the Transfer Agent, the Domiciliary Agent (affiliated party) and the Management Company (affiliated party). The Funds will also pay other expenses incurred in the operation of the Company out of the Administration Charge including, without limitation, formation expenses of new Funds, the fees of the Custodian, expenses for legal and auditing services, cost of any proposed listings, maintaining such listings, reporting and publishing expenses (including preparing, printing, advertising and distributing Shareholders’ reports and prospectuses), the remuneration of the Directors including all reasonable out-of-pocket expenses, registration fees and other expenses due to supervisory authorities in various jurisdictions, insurance, interest, and the costs of publication of the Net Asset Value per Share, whether such publication is required for regulatory purposes or otherwise.

The Administration Charge for the year end is disclosed in the Statement of operations and changes in net assets.

- iii) Specific Additional Costs in addition to the Administration Charge, including, without limitation, taxe d’abonnement, additional custody fees applicable to investment in emerging

markets, hedging expenses and the costs relating to the subsidiaries. These Specific Additional Costs will remain in force for an unlimited year and may be changed by the Management Company upon no less than one month’s prior written notice.

These Specific Additional Costs are applicable as follows:

Share Class Indicator	Taxe d’abonnement
A, B, C, F, and I	0.05%
J, N, S, and Z	0.01%

Share Class Sub-Indicator	Hedging Expenses
H, H1, H2, H3, and H4	Up to 0.03%

Specific Additional Costs are made on the following Funds in addition to the Share Class costs above:

	Emerging Market Custody
China A-shares Fund, China Equity Fund	Up to 0.10%
Asia Opportunity Fund, Developing Opportunity Fund, Emerging Leaders Equity Fund, Indian Equity Fund, Latin American Equity Fund, NextGen Emerging Markets Fund, Sustainable Asia Equity Fund, Sustainable Emerging Markets Equity Fund	Up to 0.05%
Emerging Markets Debt Opportunities Fund, Emerging Markets Local Income Fund, Global Macro Fund, Saudi Equity Fund	Up to 0.25%

- iv) A Distribution Fee (payable to the Management Company in relation to Share Class Indicator B shares only).

The Distributor is paid a distribution fee for the Equity Funds, Bond Funds, Asset Allocation Funds and Alternative Investment Funds, accrued daily and paid monthly, at the annual rate of 1.00% of the average daily Net Asset Value to Share Class Indicator B as compensation for providing distribution-related services to the Funds with respect to such Shares.

Where the Distributor and its affiliates invest on behalf of clients, or their clients invest directly into Share Class Indicator N Shares, such clients may pay, outside of the Fund, to the Distributor or its affiliates a base management fee, a performance fee or a mixture of both a base management fee and a performance fee.

- a) Morgan Stanley Investment Management Limited and the sub-advisers for the Company have entered into the following types of transactions in which a connected person had a material interest:
 - i) Transactions in relation to an investment in respect of which an affiliated firm benefited from a commission, fee, mark up or mark down; or
 - ii) Transactions in relation to a placing and/or a new issue in which the affiliated company was a member of the underwriting syndicate.

Notes to the financial statements (continued)

As at 31 December 2023

All the transactions executed on behalf of the Company were entered into in the ordinary course of business and on normal commercial terms.

- b) The total aggregate value of the transactions of the Company effected through affiliated firms is USD 255,563,395; such transactions represent 0.07% of the total transactions. Total brokerage commission paid to affiliated firms is USD 57,996 at an average rate of commission of 0.02%.
- c) The Company has entered into a securities lending contract with Morgan Stanley & Co. International Limited which is under normal commercial terms. The arrangement is exclusive in relation to certain securities.

The following Funds received securities lending income from the above named affiliates under an exclusive arrangement:

Fund Name	USD
Emerging Markets Corporate Debt Fund	290,018
Emerging Markets Debt Fund	17,826
Euro Bond Fund	47,932
Euro Corporate Bond Fund	512,510
Euro Corporate Bond – Duration Hedged Fund	29,315
European High Yield Bond Fund	312,568
Global Bond Fund	52,439
Global Fixed Income Opportunities Fund	331,515
Short Maturity Euro Bond Fund	206,609
	1,800,732

- d) The affiliations of the Board of Directors of the Company are as follows:

All the Directors of the Company, are also Directors of the Morgan Stanley Liquidity Funds. In addition, Diane Hosie is a Director of the Management Company. Zoe Parish is employed by the Investment Advisor.

Elaine Keenan is the Chief Executive Officer and a Director of the Management Company. Ruairi O’Healai is a Director of the Management Company and employed by the Investment Advisor.

Global Asset Backed Securities Fund	MORGAN STANLEY RESECURITIZATION TRUST 2015-R4
Global Asset Backed Securities Fund	MORGAN STANLEY ABS CAPITAL I INC TRUST 2004-HE3
Global Asset Backed Securities Fund	MORGAN STANLEY ABS CAPITAL I INC TRUST 2004-HE8
Global Fixed Income Opportunities Fund	MORGAN STANLEY BANK OF AMERICA MERRILL LYNCH TRUST
Global Fixed Income Opportunities Fund	MORGAN STANLEY RESECURITIZATION TRUST 2015-R4

The Company has entered into OTC swaps transactions to which Morgan Stanley acts as counterparty.

5 DIVIDEND POLICY

The Company offers Accumulating Share Classes, Distributing Share Classes and Discretionary Distributing Share Classes. The Company intends to declare dividends for the Distributing Share Classes and Discretionary Distributing Share Classes.

Approach to declaring dividends

Distributing Share Classes (Share Class Sub-Indicators “X” and “M”)

For the Distributing Share Classes of the Bond Funds, Equity Funds, Asset Allocation Funds and Alternative Investment Funds, the Company intends to declare dividends which will be equal to the net investment income attributable to such Classes (i.e. 100% of the net investment income).

For the Global Asset Backed Securities Fund, net investment income is considered to include net realised gains and losses from prepaid principal on mortgaged-backed and asset-backed securities for the purpose of the dividend policy.

For the Global Balanced Income Fund, net investment income is considered to include the premium received as a result of the Funds writing listed and OTC options for the purpose of the dividend policy.

For Global Brands Equity Income Fund, net investment income is considered to include income earned through receipt of premiums by taking exposure via one or more swaps to written options on equity securities and /or to indices for the purpose of the dividend policy.

Discretionary Distributing Share Classes (Share Class Sub-Indicators “R” and “RM”)

For the Discretionary Distributing Share Classes of the Bond Funds, Equity Funds, Asset Allocation Funds and Alternative Investment Funds, the Company intends to declare dividends which will be set at the discretion of the Board of Directors of the Company. The Discretionary Distributing Share Class may pay distributions from capital or may charge all or part of the Fund’s fees and expenses to the capital of the Fund. Dividends paid out of capital amount to a return or withdrawal of part of a Shareholder’s original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease of the Net Asset Value per Share. Where part or all of the fees and expenses of a Share Class are charged to the capital of that Share Class the result will be a reduction of the capital that the Share Class has available for investment in the future and capital may be eroded.

Further details on the Discretionary Distributing Share Classes will be included in the relevant key investor information document of the applicable Fund.

Notes to the financial statements (continued)

As at 31 December 2023

Frequency of Dividends

Equity Funds and Alternative Investment Funds – semi-annual dividend (Share Class Sub-Indicators “X” and “R”)

Both the Distributing Share Classes (Share Class Sub-Indicator “X”) and Discretionary Distributing Share Classes (Share Class Sub-Indicator “R”) aim to declare semi-annual dividends for Equity Funds (other than the Global Brands Equity Income Fund) and Alternative Investment Funds. Such dividends, if any, will be accrued on the last Dealing Day of June and December and declared on the next Dealing Day. The dividend declaration will be made public at the registered office of the Company and made available at the offices of the Transfer Agent on the first Dealing Day of July and January.

Bond Funds, Asset Allocation Funds and the Global Brands Equity Income Fund – quarterly dividend (Share Class Sub-Indicators “X” and “R”)

Both the Distributing Share Classes (Share Class Sub-Indicator “X”) and Discretionary Distributing Share Classes (Share Class Sub-Indicator “R”) aim to declare quarterly dividends for Bond Funds, Asset Allocation Funds and the Global Brands Equity Income Fund.

Such dividends, if any, will be accrued on the last Dealing Day of March, June, September and December and declared on the next Dealing Day. The dividend declaration, where issued, will be made public at the registered office of the Company and made available at the offices of the Transfer Agent on the first Dealing Day of January, April, July and October as applicable.

Monthly Distributing Share Class (Share Class Sub-Indicators “M” and “RM”)

Both the Distributing Share Classes (Share Class Sub-Indicator “M”) and Discretionary Distributing Share Classes (“Share Class Sub-Indicator “RM”) aim to declare monthly dividends. Such dividends, if any, will be accrued on the last Dealing Day of the month and declared on the next Dealing Day. The dividend declaration for these Distributing Share Classes and Discretionary Distributing Share Classes, where issued, will be made public at the registered office of the Company and made available at the offices of the Transfer Agent on the first Dealing Day of the following month as applicable.

For the year ended 31 December 2023, the Fund paid dividends as follows:

¹ Fund commenced operations on 11 August 2023.

² Fund merged into Sustainable Global High Yield Bond Fund on 20 October 2023.

³ Formerly known as Sustainable Global High Yield Bond Fund prior to 20 October 2023.

⁴ Formerly known as Sustainable US High Yield Bond Fund prior to 31 August 2023.

⁵ Formerly known as US Dollar High Yield Bond Fund prior to 31 August 2023.

⁶ Fund closed operations on 18 September 2023.

6 TAXATION

Under current law and practice, the Company is not liable to any Luxembourg income tax, or any Luxembourg capital gains tax on the realised capital appreciation of the assets of the Company nor are dividends paid by the Company liable to any Luxembourg withholding tax. The Company is, however, liable to annual subscription tax in Luxembourg (“taxe d’abonnement”) calculated at the rate of 0.05% of the Net Asset Value of the funds. Furthermore, the Company has sought the benefit of a reduced annual tax rate of 0.01% for Share Classes where the whole of the

Notes to the financial statements (continued)

As at 31 December 2023

Share Class is held by institutional investors as provided by Article 174 of the 2010 Law, likely those Shares with Share Class Indicators J, N, S or Z. This tax is payable quarterly on the basis of the net assets of the relevant Funds, calculated at the end of the quarter to which the tax relates. No stamp or other tax will be payable in Luxembourg in connection with the issue of Shares of the Company, except a once and for all tax of EUR 1,239.47 which was paid upon incorporation.

Pursuant to Article 175 of the 2010 Law, subscription tax is not payable on the value of the assets of the Funds represented by investments in other Luxembourg undertakings for collective investment which are themselves subject to the subscription tax.

Subscription tax is calculated by reference to the net assets of the relevant Fund or Share Class at the end of each calendar quarter. Subscription tax will be paid from the tax d'abonnement Specific Additional Cost described in the prospectus. Any difference between the Specific Additional Costs collected and the tax payable will be paid by or credited to the Management Company.

Dividends, interest and capital gains on securities held by the Company may be subject to non-recoverable withholding tax or capital gains tax in the country of origin.

The below Funds had a provision for Indian Capital Gains Tax net of any refunds as at the year end, the amounts are included within the "Provision for foreign tax" on the Statement of Assets and Liabilities:

* Rates of exchange used to translate the Statement of operations and changes in net assets into US Dollars.

** As of 31 December 2023, the exchange rate applied for the Egyptian Pound was fair valued in pursuant to procedures under the direction of the Board of Directors.

8 SOFT COMMISSION ARRANGEMENTS

In compliance with the MiFID II requirements, research costs are borne by the Investment Adviser and paid for separately from transaction costs. Transaction costs are charged on an execution only basis. The only exception to this is the Morgan Stanley Investment Funds – Japanese Equity Fund, where the "unbundling" of research and dealing commissions is not possible due to the local Japanese regulatory requirements not allowing for separate payment of research costs.

9 STATEMENTS OF PORTFOLIO CHANGES

A statement giving the changes in the portfolio of investments for the year ended 31 December 2023 is available to shareholders, free of charge, on request from the Company's registered office, and also from the Paying Agents in countries where the company is registered to sell its Shares.

Notes to the financial statements (continued)

As at 31 December 2023

Please see list of Paying Agents on page 568.

10 OVERDRAFT FACILITY

The Company has access to a short-term credit extension facility with J.P. Morgan SE, Luxembourg Branch, primarily to facilitate the clearance of securities and foreign exchange transactions and in connection with abnormal redemption activity. Should such credit be extended, the Custodian shall be entitled to charge the Funds at rates to be agreed upon from time to time. In addition to any other remedies available, the Custodian shall be entitled to a right of set-off against the property of the Company to satisfy the repayment of, or reimbursement for accrued interest thereon.

There is no cross liability between the funds of the Company therefore the Custodian only has a right of set-off of the pool of assets of the fund that is relative to the overdraft.

11 LIABILITY OF THE COMPANY

The Board of Directors of the Company shall maintain for each Fund a separate pool of assets. As between Shareholders, each pool of assets is invested for the exclusive benefit of the relevant Fund.

The assets of the Company have been segregated on a Fund by Fund basis with third party creditors only having recourse to the assets of the relevant Fund.

12 BROKER ACCOUNTS

All derivative instruments and time deposits, as listed within the Schedule of Investments, on pages 7 to 482, are transacted through third party brokers.

In addition these brokers hold the collateral described in the above mentioned statements as applicable. The Funds are exposed to counter-party risk in respect of all amounts including collateral due to them from such brokers.

Payments of income and settlement proceeds are at the risk of the Funds.

The collateral and margin accounts received and paid by the Fund is listed within the Schedule of Investments, on pages 7 to 482.

Margin account transactions with brokers are added or deducted from the Net Asset Value.

13 TRANSACTION COSTS

For the year ended 31 December 2023, the Fund incurred transaction costs namely, commission and taxes relating to purchases or sales of transferable securities, money market instruments, exchange traded derivatives or other eligible assets. They can include the bid-ask spread, fees and commissions paid to agents, advisers, brokers and dealers, transaction related taxes and other market charges.

Fund Name	Currency	Total Transaction Costs	% of Average NAV

¹ Fund commenced operations on 28 November 2023.

² Fund closed operations on 15 December 2023.

³ Formerly known as International Equity (ex US) Fund prior to 29 September 2023.

⁴ Fund merged into Emerging Leaders Equity Fund on 27 October 2023.

⁵ Fund commenced operations on 21 November 2023.

⁶ Fund commenced operations on 11 August 2023.

⁷ Fund commenced operations on 07 February 2023.

⁸ Fund commenced operations on 28 February 2023.

⁹ Fund merged into Sustainable Global High Yield Bond Fund on 20 October 2023.

¹⁰ Formerly known as Sustainable Global High Yield Bond Fund prior to 20 October 2023.

¹¹ Formerly known as Sustainable US High Yield Bond Fund prior to 31 August 2023.

¹² Formerly known as US Dollar High Yield Bond Fund to 31 August 2023.

¹³ Fund closed operations on 18 September 2023.

¹⁴ Fund closed operations on 22 March 2023.

There are no brokerage fees charged separately for transactions on fixed income instruments and derivatives (except for futures). The transaction costs are included in the transaction price which is known as “marked up” and form part of the “Net realised gain/loss on Investments” in the Statement of operations and changes in net assets.

14 CROSS-INVESTMENT BETWEEN FUNDS

The Company is permitted to engage in cross investment between Funds within the umbrella structure.

As at 31 December 2023, the following named Funds held shares of other Funds of the Company:

Investment	Market Value (in USD)	% of Net Assets
European Fixed Income Opportunities Fund		
Morgan Stanley Investment Funds Global Asset Backed Securities Fund – Class N	6,892,726	5.49
	6,892,726	5.49
US Dollar Corporate Bond Fund		
Morgan Stanley Investment Funds Emerging Markets Corporate Debt Fund – Class N	214,793	0.12
	214,793	0.12
Global Balanced Defensive Fund		
Morgan Stanley Investment Funds Emerging Markets Corporate Debt Fund – Class N	1,128,238	2.42
Morgan Stanley Investment Funds Global Asset Backed Securities Fund – Class NH (EUR)	2,003,007	4.29
Morgan Stanley Investment Funds Emerging Markets Domestic Debt Fund – Class N	772,532	1.65
	3,903,777	8.36

15 ANTI-DILUTION MEASURES

As investors enter or exit a fund, the potential purchase and sale of securities may incur trading costs such as bid/ask spreads, brokerage fees, transaction charges and taxes. These costs are charged to the fund and are borne by all remaining shareholders of the fund, an effect known as dilution which can impact the remaining shareholders’ returns on their investment in the fund.

In order to protect remaining shareholders from dilution, the Management Company may adjust the NAV of a Fund to reflect these estimated trading costs, a mechanism known as swing pricing.

When net investor activity in a Fund exceeds a certain threshold (“Swing Threshold”) on a given Dealing Day, the NAV is adjusted by a factor (“Swing Factor”), upwards in case of net subscriptions and downwards in case of net redemptions. In either case, the swung NAV applies to all transactions, regardless of direction, not the specific circumstances of each individual investor transaction.

For each Fund, the Swing Factor shall not exceed 2% of the NAV in normal market conditions, however, the Management Company may decide to temporarily increase this limit in

Notes to the financial statements (continued)

As at 31 December 2023

exceptional circumstances (e.g. stressed or dislocated markets resulting in increased trading costs beyond the 2% cap) to protect Shareholders' interests.

As at year end, a swing pricing adjustment was applied to Global Convertible Bond Fund.

All Funds were swung during the year with the exception of the following Funds:

American Resilience Fund, Asia Opportunity Fund, Calvert Global Equity Fund, Calvert Sustainable Climate Aligned Fund, Calvert Sustainable Climate Transition Fund, Calvert Sustainable Developed Europe Equity Select Fund, Calvert Sustainable Developed Markets Equity Select Fund, Calvert Sustainable Diversity, Equity and Inclusion Fund, Calvert Sustainable Emerging Markets Equity Select Fund, China A-shares Fund, China Equity Fund, Developing Opportunity Fund, Global Brands Equity Income Fund, Global Brands Fund, Global Focus Property Fund, Global Insight Fund, Global Opportunity Fund, Global Sustain Fund, Japanese Small Cap Equity Fund, Sustainable Asia Equity Fund, Tailwinds Fund, US Focus Property Fund, US Growth Fund, US Insight Fund, Vitality Fund, Emerging Markets Corporate Debt Fund, Emerging Markets Debt Opportunities Fund, Emerging Markets Local Income Fund, Euro Strategic Bond Fund, European Fixed Income Opportunities Fund, Floating Rate ABS Fund, Global Credit Opportunities Fund, Global Fixed Income Opportunities Fund, Short Duration US Government Income Fund, Short Maturity Euro Corporate Bond Fund, Global Balanced Defensive Fund, Global Balanced Risk Control Fund of Funds, Global Balanced Sustainable Fund, Multi-Asset Risk Control Fund.

16 INDEMNIFICATIONS

The Company has arrangements in place for the indemnification of the members of its Board of Directors, and of its service providers (the "Indemnified Parties") in certain circumstances, which exclude the Indemnified Parties' own negligence, wilful default, or fraud. The Company's service providers include the Management Company, the Investment Advisers, the Sub-Investment Advisers, the Custodian, the Administrator and Paying Agent, the Distributor and the Registrar and Transfer Agent.

17 DIRECTORS' REMUNERATION

The Directors of the Company are entitled to remuneration at an annual rate of EUR 80,000 per director. In addition the appointed Chairman receives EUR 10,000 per annum.

The Administration charge is utilised to pay the remuneration of the Directors including reasonable out-of-pocket expenses. Directors fees remain ultimately subject to approval by the Company's shareholders.

18 EPIDEMICS/PANDEMICS/OUTBREAKS RISK

The performance of the Shares depends on the performance of the investments of the Funds, which could also be adversely affected by the effects of epidemics, pandemics or outbreaks of communicable diseases. In response to intensifying efforts to contain epidemics, pandemics or outbreaks of communicable diseases, governments around the world may take a number of actions, such as prohibiting residents' freedom of movement, encouraging or ordering employees to work remotely from home, and banning public activities and events, among others. Any prolonged disruption of businesses could negatively impact financial conditions. The performance of the Shares could be adversely affected to the extent that any of these epidemics, pandemics or outbreaks harms the economy in general.

19 SUBSEQUENT EVENTS

Effective 18 January 2024, Morgan Stanley Investment Funds – Global Asset Backed Securities Focused Fund was launched.

Effective 24 January 2024, Morgan Stanley Investment Funds – Calvert US Equity Fund was launched.

Effective 20 February 2024, Morgan Stanley Investment Funds – Systematic Liquid Alpha Fund was launched.

Effective 27 February 2024, Morgan Stanley Investment Funds – Parametric Commodity Fund was launched.

Independent Auditor's Report

To the Shareholders of
Morgan Stanley Investment Funds
6B, route de Trèves
L-2633 Senningerberg
Luxembourg

Opinion

We have audited the financial statements of Morgan Stanley Investment Funds (the "Company") and of each of its Funds, which comprise the statement of assets and liabilities and the schedule of investments as at 31 December 2023, and the statement of operations and changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company and of each of its Funds as at 31 December 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Company in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Company is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Company for the financial statements

The Board of Directors of the Company is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Company is responsible for assessing the Company's and each of its Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Company either intends to liquidate the Company of any of its Funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain

Independent Auditor's Report (continued)

As at 31 December 2023

audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Company.
- Conclude on the appropriateness of Board of Directors of the Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's or any of its Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Company or any of its Funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Appendix 1: Fund expense ratios (unaudited)

As at 31 December 2023

The following figures show the total expenses charged to each Class of each Fund open as at 31 December 2023, calculated net of any fee waivers and expressed as a percentage of average net assets for the year. For further information in relation to the expenses charged to the Funds, please refer to pages 501 to 519. For details of changes to the Management Fee during the year, please refer to note 4. Reported expense ratios may differ from the on-going charges figures due to accounting adjustments and/or significant movement in the total net assets for each Share Class within the year.

Appendix 4: Hedged Share Classes (unaudited)

As at 31 December 2023

The Board of Directors of the Company may decide from time to time for some or all of the Funds to issue Currency Hedged Share Classes.

Currency Hedged Share Classes seek to reduce the currency exposure of the Shareholder to currencies other than the currency in which the Currency Hedged Share Class is denominated (the “Hedged Share Class Currency”). The hedging process will vary depending on the type of fund for which the Currency Hedged Share Class is issued and the hedging strategy adopted for all the Currency Hedged Share Classes in that particular Fund, as defined by the prospectus. The types of Currency Hedged Share Class are as follows:

NAV Hedged Share Classes (Share Class Sub-Indicator “H”) seek to reduce exposure to currency movements between the Hedged Share Class Currency and the Fund’s Reference Currency. This involves hedging the Fund’s Reference Currency to the Hedged Share Class Currency without reference to its Investment Currencies.

Portfolio Hedged Share Classes (Share Class Sub-Indicator “H1”) seek to reduce exposure to currency movements between the Hedged Share Class Currency and the Fund’s Investment Currencies. This involves hedging the Fund’s Investment Currencies back to the Hedged Share Class Currency without reference to its Reference Currency.

Index Hedged Share Classes (Share Class Sub-Indicator “H2”) seek to reduce exposure to currency movements between the Hedged Share Class Currency and the currencies of a Fund’s benchmark index (“Index Currencies”). This involves hedging the Fund’s Index Currencies back to the Hedged Share Class Currency without reference to the Fund’s Reference Currency or its Investment Currency.

NAV Hedged (Non-deliverable Currency) Share Classes (Share Class Sub-Indicator “H3”) seek to reduce exposure to currency movements between a non-deliverable Hedged Share Class Currency and the Fund’s Reference Currency. This involves hedging the Fund’s Reference Currency back to the Hedged Share Class Currency without reference to its Investment Currencies. As the Hedged Share Class Currency is non-deliverable the Share Class will be denominated in a currency other than the Hedged Share Class Currency for the purposes of subscription and redemption.

NAV Hedged (Non-deliverable Currency) Share Classes (Share Class Sub-Indicator “H3”) seek to reduce exposure to currency movements between a non-deliverable Hedged Share Class Currency and the Fund’s Reference Currency. This involves hedging the Fund’s Reference Currency back to the Hedged Share Class Currency without reference to its Investment Currencies. As the Hedged Share Class Currency is non-deliverable the Share Class will be denominated in a currency other than the Hedged Share Class Currency for the purposes of subscription and redemption.

There is no segregation of liabilities between the different share classes of the same Fund. As such, under certain conditions, there is a remote risk that transactions specific to a Hedged Share Class could result in liabilities which may exceed the assets of that Hedged Share Class. In such a scenario, any excess liabilities could adversely impact the Net Asset Value of other share classes within the same Fund, as the assets of other share classes would be exposed to the excess liabilities of the Hedged Share Class. The Management Company has put in place a number of measures and controls as part of its risk management framework in order to prevent such an event, hence the risk of such ‘cross contamination’ is considered by the Management Company to be extremely low.

The hedging strategies adopted at the year end are as follows:

Fund Name	Hedged Share Class(es)	Hedging Strategy
American Resilience Fund	AH (EUR), BH (EUR), CH (EUR)	NAV Currency Hedged Share Classes
Asia Opportunity Fund	AH (EUR), BH (EUR), CH (EUR), IH (EUR), IH (GBP), JH (GBP), ZH (EUR), ZH (GBP), ZH3 (BRL)	NAV Currency Hedged and Non-Deliverable Currency Hedged Share Classes

¹¹ Formerly known as Sustainable US High Yield Bond Fund prior to 31 August 2023.

¹² Formerly known as US Dollar High Yield Bond Fund prior to 31 August 2023.

¹³ Fund closed operations on 18 September 2023.

¹⁴ Fund closed operations on 22 March 2023.

* Share Class was launched during the year.

** Share Class was closed during the year.

*** Share Class was reactivated during the year.

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

Appendix 6: Risk Measurement and Global Exposure (unaudited) As at 31 December 2023

As per ESMA/10 –788 “Guidelines on Risk Measurement and the Calculation of Global Exposure and Counterparty Risk for UCITS” on annual report disclosure requirements, the Global Exposure table below outlines the following information:

- Each Fund’s approach to measuring global exposure.
- Where the Fund is using relative VaR to measure global exposure the reference portfolio is provided.
- Lowest, average and highest relative VaR or absolute VaR for each Fund measuring global exposure on the VaR approach (note these numbers are actual VaR and relative VaR numbers and do not represent utilisation levels of the regulatory limit).
- Relevant regulatory limit for the Funds global exposure approach for Funds using VaR approach.
- Average leverage is given at the Fund level where the Fund uses the VaR approach to measure global exposure.
- Leverage is calculated using the sum of the notionals approach and the commitment approach.

Fund Name	Asset Class	Global Exposure Methodology	Reference Portfolio	Regulatory Limit			Expected Gross Leverage	Average Leverage (Sum of Notionals)	
				Lowest	Average	Highest

As at 31 December 2023

UCITS 2023 Remuneration Disclosure by MSIM Fund Management (Ireland) Limited to Morgan Stanley Investment Funds

1. Legal background

This remuneration disclosure has been prepared as required by, and in accordance with, the guidance provided in (1) EU Commission Recommendation on remuneration policies in the financial services sector (2009/384 EC) dated 30 April 2004; (2) EU Directive 2009/65/EC (as amended by Directive 2014/91/EU) (“the **UCITS Directive**”); and (3) the European Securities and Markets Authority “Guidelines on sound remuneration policies under the UCITS Directive”, (ESMA/2016/575) dated 14 October 2016 (“the **Guidelines**”) and in particular with section 14.1 (headed “External Disclosure”).

The data used in the analysis for this disclosure relates to the financial year ending December 31, 2023 of Morgan Stanley (“the **Firm**”) and to the remuneration of staff of Morgan Stanley Fund Management (Ireland) Limited (“the **UCITS Management Company**”) and its senior management team and other members of its staff whose actions have a material impact on the risk profile of the UCITS it manages or on the UCITS Management Company itself (“**Identified Staff**”).

2. The “Identified Staff” for the purposes of this disclosure

The Guidelines define “Identified Staff” as follows:

- a) “categories of staff, including senior management, risk takers, control functions, staff responsible for heading the investment management, administration, marketing, and any employee receiving total remuneration that falls into the remuneration bracket of senior management and risk takers, whose professional activities have a material impact on the management company’s risk profile or the risk profiles of UCITS that it manages” (“**Group A**”); and
- b) “categories of staff of the entity(ies) to which investment management activities have been delegated by the management company and whose professional activities have a material impact on the UCITS’s risk profile or the risk profiles of UCITS that the UCITS management company manages (“**Group B**”).

References in this disclosure letter to “Identified Staff” or to staff in Group A or Group B, should be construed accordingly.

Nine Identified Staff were employed or paid by the UCITS Management Company itself. All of the remaining Identified Staff are employees of other Morgan Stanley entities whose professional activities are considered to have a material impact on the risk profile of the UCITS managed by the UCITS Management Company, taking into consideration the internal organisation, nature, scope and complexity of the UCITS Management Company and the UCITS it manages.

The Identified Staff within Group A are staff who have been employed by or seconded to the UCITS Management Company and who are therefore subject to the Guidelines as adopted by the Central Bank of Ireland (CBI).

The Identified Staff in Group B are staff of one of the Morgan Stanley group entities to which the portfolio management of one or more of the UCITS Management Company’s Funds has been delegated pursuant to Article 13 of the UCITS Directive. They are not seconded to, or performing a function of, the UCITS Management Company. Accordingly, they are not staff of the UCITS Management Company. However, they are subject to applicable rules on remuneration which are deemed “equally as effective” as those which apply to Group A or appropriate contractual arrangements are in place in line with the Guidelines.

3. Process for determining remuneration policies and principles

The UCITS Management Company, as an affiliate of Morgan Stanley, benefits from the resources available within the Firm and is subject to the remuneration policies and practices that are applied on a Firm-wide level, including the Global Incentive Compensation Discretion Policy and the Global Compensation Policy.

In determining, maintaining and implementing the remuneration policies and practices applicable to the UCITS Management Company, including Identified Staff, the UCITS Management Company is subject to the remuneration policies and practices that apply to all Morgan Stanley International Limited (MSI) Group entities as well as those applying to Morgan Stanley globally and may consult, or receive guidance from, the Firm’s control functions and relevant remuneration committees to ensure consistency. Remuneration policy is designed to satisfy four key Firm-wide remuneration objectives: (i) deliver pay for sustainable performance, (ii) align remuneration with shareholders’ interests, (iii) attract and retain top talent, and (iv) mitigate excessive risk-taking.

In support of these objectives, annual compensation (i.e. remuneration) for the majority of the Firm’s employees, including Identified Staff, is comprised of two key elements: fixed remuneration and variable remuneration (variable incentive remuneration) that is discretionary and based on, among other factors, Firm performance measured against risk-adjusted metrics and individual and business segment performance.

Appendix 7: Remuneration Policy of the Management Company (unaudited) (continued)

As at 31 December 2023

The committee that manages remuneration for the Firm is the Compensation, Management Development and Succession Committee (CMDMS Committee) of the Morgan Stanley Board of Directors. As of 31 December 2023, it consisted of four directors, all of whom are independent under the New York Stock Exchange listing standards. Each year, the CMDMS Committee's mandate is to review the Firm-wide aggregate variable remuneration pool for variable incentive remuneration and to review and approve the design and structure of Morgan Stanley's Firm-wide deferred incentive remuneration programs, including the form of deferred incentive remuneration awards to be granted, the portion of variable incentive remuneration to be deferred, and the vesting, payment, cancellation and clawback provisions of deferred incentive remuneration awards. The CMDMS Committee has adopted the Global Incentive Compensation Discretion Policy, which applies to all Firm entities worldwide and sets forth guidance for managers on the use of discretion and considerations for assessing risk management and outcomes when making variable incentive remuneration decisions, and considerations for assessing risk management and outcomes. It has also approved the Global Compensation Policy which covers compensation philosophy and objectives, framework and governance.

In addition, the Board of the UCITS Management Company has adopted a remuneration policy (the "MSIM Fund Management (Ireland) Limited Remuneration Policy") in compliance with UCITS and the Guidelines as adopted by the CBI.

The policy is also appropriate to the UCITS Management Company's size, internal organization and the nature, scope and complexity of its activities. As well as complying with all of the UCITS management company's legal obligations, the principles of the MSIM Fund Management (Ireland) Limited Remuneration Policy supports the business strategy, objectives, values and long-term interests of its clients, including the Fund. In particular, the MSIM Fund Management (Ireland) Limited Remuneration Policy is designed to ensure that remuneration is consistent with and promotes sound and effective risk management and does not encourage risk taking that is inconsistent with the risk profile of the UCITS managed by the UCITS Management Company.

When determining its own remuneration decisions or influencing the decisions made by other Morgan Stanley entities, the UCITS Management Company takes into account and complies with (1) Irish, UK and EU legislation; (2) the MSIM Fund Management (Ireland) Limited Remuneration Policy and CBI requirements; and (3) the requirements of other remuneration policies set by the Firm. In doing so, it applies consistent principles with the objective of aligning the incentivisation of Identified Staff with business objectives, supporting the delivery of the UCITS Management Company's business plans and corporate values, avoiding conflicts of interest and enabling the right calibre of staff to be recruited. The UCITS Management Company always seeks to ensure, therefore, that the remuneration principles applied by it and the Firm are consistent with and promote sound and effective risk management and do not encourage risk-taking that is inconsistent with the risk profiles, rules or instruments of incorporation of the UCITS managed by the UCITS Management Company.

The following considerations are taken into account in the design, implementation and oversight of the UCITS Management Company's remuneration policies and practices:

- Overall corporate governance principles and structures as well as their interactions with the remuneration system;
- The inputs provided by all control functions (i.e. human resources, risk management, compliance, internal audit, etc.), which will be properly involved in the design of the Remuneration Policy, as further described below; and
- The clear distinction between operating and control functions, the safeguards for preventing conflicts of interests and the internal reporting system.

4. Involvement of control functions in risk management and the remuneration of those control functions

The control functions of the Firm assist the UCITS Management Company in implementing its overall remuneration strategy, having regard to operational, liquidity, market and counterparty risks.

In particular:

- a. The Risk Management function helps to ensure that the structure and design of remuneration arrangements does not encourage risk taking that is inconsistent with the risk profile of the UCITS managed by the UCITS Management Company;
- b. The Human Resources and Compliance functions analyse how the remuneration structure affects the UCITS Management Company's compliance with legislation, regulations and internal policies;
- c. The Internal Audit function periodically carries out an independent audit of the design, implementation and effects of Morgan Stanley's remuneration policies;
- d. The EMEA Remuneration Oversight Committee (EROCC) provides formal oversight of EMEA remuneration matters to ensure remuneration practices in EMEA are compliant with relevant UK and EU legislation and follow good practice standards. The

Appendix 7: Remuneration Policy of the Management Company (unaudited) (continued)

As at 31 December 2023

membership of the EROC is made up of the EMEA control function heads as well as the EMEA Chief Executive Officer. The EROC reviews activities of the UCITS Management Company that may lead to individual or collective adjustments of remuneration for its employees; and

- e. The MSI Remuneration Committee was established with effect from 1 January 2017, being appointed by the Board of Directors of MSI to assist in discharging its obligations in relation to remuneration matters of MSI and its subsidiaries (the MSI Group) and identified material risk takers. Its remit includes reviewing the remuneration policies and practices of the UCITS Management Company in accordance with the UCITS Directive and the Guidelines.

The Control Functions, including Risk Management, Compliance, and Internal Audit, as well as other support functions such as Finance, Legal and Human resources, are independent from the businesses they monitor. Those engaged in control functions are remunerated in accordance with objectives linked to their functions. Their objectives are independent of the financial performance of the UCITS of the UCITS Management Company. Potential conflicts that may arise in relation to individual remuneration decisions are mitigated by the independent role of Human Resources in the year end remuneration process.

5. Design and structure of remuneration

Remuneration paid to Identified Staff is awarded in accordance with Morgan Stanley principles relating to remuneration. Annual remuneration is comprised of two key elements: fixed remuneration and variable remuneration. Staff eligibility for annual incentive compensation (variable remuneration) is discretionary and subject to a multi-dimensional performance measurement, which considers, as applicable, the performance of the individual, the UCITS Management Company, the business segment, and the Firm.

Identified Staff receive a total annual remuneration package consisting of fixed pay that is comprised of base salary and, in certain circumstances, one or more allowances that are reviewed at least annually; and variable remuneration¹, payable partially as a cash bonus and partially in the form of deferred incentive remuneration awards. The amount of variable incentive remuneration is discretionary and is determined on the basis of, but not limited to, a variety of factors, including performance measured against risk-adjusted metrics and individual performance. It is possible that an individual could be awarded no variable incentive remuneration. Deferred incentive remuneration awards are typically subject to vesting over a multi-year period and are subject to cancellation until the payment date for competition, cause (i.e., any act or omission that constitutes a breach of obligation to the Company, including failure to comply with internal compliance, ethics or risk management standards, and failure or refusal to perform duties satisfactorily, including supervisory and management duties), disclosure of proprietary information, and solicitation of employees or clients. Awards are also subject to malus until the payment date if an employee's act or omission (including with respect to direct supervisory responsibilities) causes a restatement of the Firm's consolidated financial results, constitutes a violation of the Firm's global risk management principles, policies and standards, or causes a loss of revenue associated with a position on which the employee was paid and the employee operated outside of internal control policies. The Firm will also consider the exercise of cancellation and/or clawback (whether or not the Identified Staff remains employed by the UCITS Management Company), where it determines in its sole discretion that the relevant business unit, MSIM FMIL or the UCITS in which the Identified Staff is employed (or in relation to which they carry out some or all their duties) suffers a material failure of risk management.

The UCITS Management Company competes for access to talent globally with investment management firms, private equity firms, hedge funds, investment banks, brokerage firms and other companies offering financial services, and the UCITS Management Company's ability to sustain or improve its position in this highly competitive environment depends substantially on its ability to continue to attract and retain the most qualified individuals. In support of the UCITS Management Company's recruitment and retention objectives, the Firm continually monitors competitive pay levels and structures its incentive awards to include, among other things, vesting, deferred payment and cancellation provisions that protect the UCITS Management Company's interests and align the interests of Identified Staff with those of the UCITS' investors.

The Firm's Global Incentive Compensation Discretion Policy requires compensation managers to consider only legitimate, business related factors when exercising discretion in determining variable incentive remuneration, including adherence to Morgan Stanley's core values, conduct, disciplinary actions in the current performance year, risk management and risk outcomes. The policy specifically provides that all managers must consider whether or not an individual has managed risk appropriately and effectively managed and supervised the risk control practices of his or her reports during the performance year. Compensation managers are trained on the Global Incentive compensation Discretion Policy and are required to certify that they have followed the requirements of that policy and have escalated situations potentially requiring attention.

¹ The Firm does not award variable remuneration to a non-executive director for their non-executive director role.

Appendix 7: Remuneration Policy of the Management Company (unaudited) (continued)

As at 31 December 2023

Other financial and non-financial performance criteria that may be taken into account in deciding whether to award, and the amount of any variable incentive compensation to award, includes (but is not limited to):

- business and market conditions;
- individual conduct, including but not limited to, adherence to Morgan Stanley's code of conduct and policies;
- contribution to the performance and profitability of the business unit, the UCITS Management Company and the Firm;
- contribution to the strategic objectives of the UCITS Management Company, business unit, the Firm and the team;
- compliance with internal and external rules;
- revenue and profitability of funds managed by a portfolio manager;
- assets managed by a portfolio manager; and
- contribution to client objectives.

6. Quantitative remuneration disclosure²: scope of disclosure

We are required to disclose and include in this report certain aggregate remuneration details for (1) the entire staff of the UCITS Management Company³, (2) the UCITS Management Company's senior management team and other members of its staff whose actions have a material impact on the risk profile of the UCITS the UCITS Management Company manages or on the UCITS Management Company itself⁴, and (3) the staff of the delegate of the UCITS Management Company to whom investment management functions (including risk management) have been delegated.

We have included in our disclosure the relevant remuneration information details for all Identified Staff – i.e. for those in Group A and Group B (defined above).

7. Quantitative remuneration disclosure: financial information

On the basis of (1) our own financial records for staff in Group A and (2) the financial information supplied to us (pursuant and subject to their respective sectoral and jurisdictional obligations, both legal and regulatory) by entities to which relevant investment management activities have been delegated (the “**Delegate Companies**”), the requisite remuneration information in respect of the 2023 financial year ending December 31, 2023 was as follows:

- a. The total fixed remuneration paid to all staff of the UCITS Management Company's was USD 9,958,419.
- b. The total variable remuneration (variable incentive compensation) paid to all staff of the UCITS Management Company was USD 22,734,580.
- c. The number of individuals included as UCITS Management Company's staff (including for these purposes Identified Staff) was 194.
- d. The total remuneration (fixed and variable combined) paid to senior management and members of staff whose actions have a material impact on the risk profile of the UCITS or on the UCITS Management Company itself was USD 17,582,980.

8. Quantitative remuneration disclosure: rationale for apportionment

In calculating the “remuneration paid” to the staff in a) to d) above, we have, in accordance with the UCITS Directive and the Guidelines, adopted a proportionate approach and included a relevant proportion of staff's total remuneration. The apportionment method takes in to account a number of factors including, but not limited to; number of accounts managed by investment managers, number of accounts of the contracting entity, headcount of the Investment Management business as a proportion of the Institutional Securities Group and Investment Management Group overall headcount.

MSIM Fund Management (Ireland) Limited

January 2024

² Identified Staff and their associated remuneration are not allocated to individual UCITS so a breakdown by UCITS Fund does not exist and is not readily available.

³ Article 69 (3) (a) of the UCITS Directive.

⁴ Article 69 (3) (b) of the UCITS Directive and section 14 of the Guidelines.

Appendix 8: Securities Financing Transactions (unaudited)

As at 31 December 2023

The Company engages in Securities Financing Transactions (as defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions). In accordance with Article 13 of the Regulation, the Company's only involvement in and exposures related to securities financing transactions is its engagement on securities lending activities and Total Return Swaps for the year ended 31 December 2023 as detailed below:

SECURITIES LENDING

Global Data

Amount of securities on loan and amount of assets engaged in securities lending transactions

The following table represents the total value of assets engaged in securities lending as at the year end date. The total value of securities on loan as a proportion of the Funds' total lendable assets as at the year end date is also detailed below. Total lendable assets represents the aggregate value of asset types forming part of the Funds' securities lending programme.

Appendix 8: Securities Financing Transactions (unaudited) (continued)

As at 31 December 2023

Top ten counterparties

The following table provides details of the top ten counterparties (based on gross volume of outstanding transactions) in respect of securities lending transactions as at the reporting date. The Company is protected from borrower default by an indemnification provided by the lending agent, J.P. Morgan SE, Luxembourg Branch. If a borrower defaults, the lending agent would sell the collateral and use the proceeds to purchase the security that was not returned in the market. If the proceeds from the sale of the collateral are not enough to purchase the security the lending agent is liable for the difference. Therefore it is the lending agent (J.P. Morgan SE, Luxembourg Branch) who has the liability.

Fund Name	Fund Currency	Counterparty (Lending Agent)	Incorporation Country	Market value of loaned securities in Fund Currency
Asian Property Fund	USD	J.P. Morgan SE	Luxembourg	9,890,763
Calvert Sustainable Climate Transition Fund	USD	J.P. Morgan SE	Luxembourg	115,043
Counterpoint Global Fund	USD	J.P. Morgan SE	Luxembourg	868,204
European Property Fund	EUR	J.P. Morgan SE	Luxembourg	557,724
Global Focus Property Fund	USD	J.P. Morgan SE	Luxembourg	181,855

Aggregate transaction data

Type and quality of collateral

Non-cash collateral received by each Fund in respect of securities lending transactions as at the reporting date is in the form of government bonds.

All of the Funds' securities collateral have a credit rating of investment grade. Quality of collateral has been interpreted as pertaining to bond instruments, which have been assessed and reported in accordance with whether they are considered investment grade, below investment grade or not-rated. These designations are derived from the credit rating issued to the security or its issuer by at least one globally recognised credit rating agency, such as Standard & Poor's and Moody's. Bond instruments with a credit rating between 'AAA' and 'BBB' are deemed as investment grade. Credit ratings for bonds below these designations are considered below investment grade.

Fund Name	Fund Currency	Quality	COLLATERAL MARKET VALUE (in Fund Currency)
			Total
Asian Property Fund	USD	Investment grade	10,561,658
Calvert Sustainable Climate Transition Fund	USD	Investment grade	121,507

Maturity tenor of securities lending transactions

All securities on loan can be recalled at any point and therefore have a maturity tenor of one day.

Country in which counterparties are established

The country in which counterparties are established is disclosed under the section “Top Ten Counterparties” on page 599.

Settlement and clearing

The Company’s securities lending transactions, including related collateral, are settled and cleared on a tri-party basis.

Re-use of collateral

Non-cash collateral received by a Fund may not be sold, re-invested or pledged. As the collateral in receipt for securities lending is entirely in the form of securities, there is no reuse of securities lending collateral.

Safekeeping of collateral

Collateral received

J.P. Morgan Bank Luxembourg S.A, as securities lending agent of the Funds, is responsible for the safekeeping of the collateral received in respect of securities lending transactions as at the reporting date. The Custodian J.P. Morgan Bank Luxembourg S.A. is ultimately liable for any loss of instruments held in custody or by a third party to whom custody had been delegated (the sub-custody).

Collateral granted

No collateral is granted by the Company as part of their securities lending activities.

Appendix 8: Securities Financing Transactions (unaudited) (continued)

As at 31 December 2023

Return and cost

The total income earned from securities lending transactions is split between the relevant Funds and the securities lending agent. Details of this split are disclosed in note 3 to the financial statements on pages 549 to 550. Income earned during the year by the Funds from securities lending transactions is disclosed in the statement of operations and changes in net assets on pages 501 to 519.

TOTAL RETURN SWAPS

Global Data

Amount of assets engaged in Total Return Swaps

The following table represents the total value engaged in Total Return Swaps as at year end:

Fund Name	Fund Currency	Unrealised Gain and Loss in Fund Currency (in absolute value)	% of Total Net Asset Value
Global Brands Equity Income Fund	USD	12,005,877	2.18
Global Macro Fund	USD	64,039	0.05

Concentration Data

Ten largest collateral issuers

There are no collaterals received in respect of total return swap contracts. Therefore the ten largest collateral issuers disclosure is not applicable.

Top ten counterparties

The following table provides details of the top ten counterparties (based on gross volume of outstanding transactions) in respect of the total return swaps as at the reporting date. It also includes all counterparties in respect of the total return swaps at the year end date.

Counterparties	Incorporation Country	Unrealised Gain and Loss in Fund Currency (in absolute value)	
		Global Brands Equity Income Fund	Global Macro Fund
		USD	USD
Citigroup	United States of America	–	64,039
Morgan Stanley & Co. International PLC	United States of America	12,005,877	–

Aggregate transaction data

Type and quality of collateral and currency of collateral

This disclosure is required for collateral received only where there is a counterparty risk.

At the time of writing, it is not possible to identify the value of cash collateral specific to the different types of OTC derivatives where multiple types of OTC derivatives are traded with the same counterparty. This is a consequence of counterparties calculating and recording cash collateral based on the aggregated position of all OTC derivatives traded between the counterparty and its client. This calculation methodology is compliant with the International Swaps and Derivatives Associations, Inc. Master Agreement (“ISDA Master Agreement”) in place and is considered standard market practice within the industry. As a result, it is not practically possible to disclose cash collateral values specific to individual positions held by the Funds in total return swaps. Any cash collateral disclosures provided below are in respect of all OTC derivative transactions entered into by the Funds under the ISDA Master Agreement, not just total return swaps.

Appendix 8: Securities Financing Transactions (unaudited) (continued)

As at 31 December 2023

Maturity tenor of total return swaps transactions

The following table provides an analysis of the maturity tenor in respect of the total return swaps as at the year end date:

Maturity	Unrealised Gain and Loss in Fund Currency (in absolute value)	
	Global Brands Equity Income Fund	Global Macro Fund
	USD	USD
1 day	-	-
2 to 6 days	-	-
1 to 4 weeks	-	-
1 to 3 months	-	64,039
3 to 12 months	12,005,877	-
more than 1 year	-	-
open maturity	-	-

The above maturity tenor analysis has been based on the contractual maturity date.

Country in which counterparties are established

The country in which counterparties are established is disclosed under the section “Top Ten Counterparties” on page 599.

Settlement and clearing

OTC derivative transactions are entered into by the Funds under an ISDA Master Agreement, a bilateral agreement between the Funds and a counterparty that governs OTC derivative transactions (including total return swaps) entered into by the parties.

Re-use of collateral

Cash collateral received in respect of OTC derivative transactions was invested from time to time for certain Funds as foreseen with the Company’s prospectus. The performance returns from the re-use of cash collateral are not available.

The returns below for Morgan Stanley Liquidity Funds, a UCITS advised by an affiliate of the Investment Adviser, represent a reasonable estimate of returns received from the re-investment of cash collateral for the year ended 31 December 2023:

Morgan Stanley Liquidity Funds (MSLF) Sub-Fund	Net Return
US Dollar Liquidity Fund	5.31%
US Dollar Treasury Liquidity Fund	5.06%
Euro Liquidity Fund	3.28%

Safekeeping of collateral

Collateral received

J.P. Morgan SE, Luxembourg Branch is responsible for the safekeeping of the collaterals received in respect of total return swaps as at the reporting date. The Custodian J.P. Morgan SE, Luxembourg Branch is ultimately liable for any loss of instruments held in custody or by a third party to whom custody had been delegated (the sub-custody).

Safekeeping of collateral	Type	COLLATERAL VALUE (in Fund Currency)	
		Global Brands Equity Income Fund	Global Macro Fund
		USD	USD
	Cash	-*	-*

* Collateral granted in respect of total return swaps, and OTC forward currency exchange contracts. Please refer to the derivative instruments and collateral received and paid listed within the Statements of Investments on pages 7 to 482 for further details.

Appendix 8: Securities Financing Transactions (unaudited) (continued)

As at 31 December 2023

Collateral granted

The following table provides an analysis of the amount held in segregated account in relation to collateral granted by the Global Brands Equity Income Fund and Global Multi-Asset Opportunities Fund in respect of OTC derivative transactions (including total return swaps, inflation rate swaps, credit default swaps and OTC forward currency exchange contracts), as at the reporting date.

<i>COLLATERAL VALUE (in Fund Currency)</i>			
Safekeeping of collateral	Type	Global Brands Equity Income Fund	Global Macro Fund
		USD	USD
Segregated	Cash	9,100,000*	–*

* Collateral granted in respect of total return swaps and OTC forward currency exchange contracts. Please refer to the derivative instruments and collateral received and paid listed within the Schedules of Investments on pages 7 to 482 for further details.

Return and cost

All returns from OTC derivative transactions will accrue to the Funds and are not subject to any returns sharing arrangements with the Fund's Investment Adviser or any other third parties. Returns from those instruments are disclosed in the statement of operations and changes in net assets on pages 501 to 519.

The following table provides an analysis of return and cost in respect of the total return swaps as at the year end date:

	Global Brands Equity Income Fund	Global Macro Fund
	USD	USD
Return		
Interest received on total return swap transactions	14,604,601	–
Net realised gain/(loss) on total return swap contracts	(18,086,906)	63,782
Net change in unrealised appreciation/(depreciation) on total return swap contracts	(11,226,504)	(54,140)
	(14,708,809)	9,642
Cost		
Interest paid on total return swap transactions	(5,124)	(13,078)
	(5,124)	(13,078)
Net Return	(14,713,933)	(3,436)

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: American Resilience Fund

Legal entity identifier: 5493007IAYGIHAZG5H09

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 55.20% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in: (i) companies with any tie to fossil fuels; and (ii) companies in certain other energy intensive sectors. For the avoidance of any doubt, the Fund does not seek to make investments that contribute to climate change mitigation within the meaning of the EU Taxonomy.

In addition, the Fund considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involves weapons or civilian firearms; and (ii) that have any tie to controversial weapons.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests, which included evaluating investee companies' (each, a "Company", together the "Companies") net positive alignment with the UN Sustainable Development Goals (SDGs).

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Environmental Characteristics		
Exclusions:		
% of the Fund invested in companies which:		
Have any tie to fossil fuels	0.00%	0.00%
Have been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), or metals and mining	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
Civilian firearms (>10% revenue)	0.00%	0.00%
Weapons (>10% revenue)	0.00%	0.00%
% of the Fund invested in companies which have any tie to controversial weapons	0.00%	0.00%
Sustainable Investments:		
% of the Fund invested in companies classified as sustainable investments	10.00%	55.20%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Environmental Characteristics		
Exclusions:

Weapons (>10% revenue)	0.00%	0.00%
% of the Fund invested in companies which have any tie to controversial weapons	0.00%	0.00%
Sustainable Investments:		
% of the Fund invested in companies classified as sustainable investments	10.00%	49.25%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The positive contribution to environmental or social objectives test applied by the Investment Adviser sought to ensure that Companies classified as sustainable investments were classified based on their net positive alignment with the UN SDGs (which was primarily determined using alignment scores obtained from third party data providers). The UN SDGs include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The third party data providers' alignment scores indicate whether companies in the providers' coverage universe had a net positive alignment across the UN SDGs, either through their products and services (e.g. a health care company's essential medical products may be positively aligned with the Good Health and Well-Being SDG), or through business practices such as policies, actions and targets aimed at alignment with one or more of the SDGs (e.g. a company with robust carbon reduction plans may align with the Climate Action SDG by reducing its own emissions, switching to renewable energy or by seeking emission reductions in its value chain by engaging with suppliers and/or through product design).

The Investment Adviser classified a Company as having positive contribution to an environmental or social objective as simultaneously meeting three criteria assessed using third-party data: 1) having a net positive aggregate alignment score across all the SDGs (i.e. scores measuring positive alignment to individual SDGs have to, in total, be greater than the total of any negative alignment scores in the Investment Adviser's view), 2) having sufficient positive alignment (in the Investment Adviser's view) with at least one individual SDG and 3) not having any material mis-alignments on any of the SDGs (in the Investment Adviser's view).

In limited cases, and where it was satisfied that it was appropriate to do so based on its internal analysis (having regard to its engagements with the company or other data sources), the Investment Adviser treated an investment as passing its sustainable investment criteria, contrary to the position indicated by the third-party SDG alignment score. The Investment Adviser did this when, for example, it considered the third-party SDG alignment data to be out of date or incorrect based on the Investment Adviser's own engagement efforts or research.

More information on the UN SDGs can be found at: <https://www.undp.org/sustainable-development-goals>. The Investment Adviser recognises that the UN SDGs were written by Governments for Governments and therefore data that seeks to align corporate actions to the SDGs will not be perfectly representative.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The do no significant harm (“DNSH”) test applied by the Investment Adviser sought to ensure Companies classified as sustainable investments did not cause significant harm to any of the mandatory, SFDR-defined principal adverse impact (“PAI”) indicators which were relevant to the Company. This test also sought to ensure that Companies classified as sustainable investments are aligned with the minimum social safeguards including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund gained data to assess the relevant PAI indicators from third-party providers as well as internal research.

To determine whether significant harm was caused, initial thresholds for each of the relevant mandatory PAI indicators were set.

Where data was not available, the investment was deemed to fail the initial test and was not regarded as a sustainable investment.

However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the issuer, and therefore did not provide data on that PAI indicator, the investment was deemed to pass the initial test on the basis that the investment’s activities are unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

Additionally, in certain instances, the outcome of the initial test was supplemented (as appropriate) by the Investment Adviser’s internal qualitative assessments on significant harm (having regard to other data sources and/or its engagements with the investment) on one or more PAIs.

As part of its long-term investment approach, the investment team also sought to engage with company management teams and boards to encourage companies towards better ESG practices and to minimise or mitigate the principle adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considered a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of the Investment Adviser's DNSH test, Companies were not classified as sustainable investments if they failed to comply with the themes and values promoted by the OECD Guidelines for Multinational Enterprises or the UN Global Compact, or if they lack processes and compliance mechanisms to monitor compliance with the themes and values promoted by these global norms.

In each case, this assessment was based on information obtained from third-party data providers and/or internal assessments.

The Investment Adviser used the OECD Guidelines for Multinational Enterprises and the UN Global Compact as reasonable proxies.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

All the relevant mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund's investments as sustainable investments.

PAIs were also considered with respect to the other investments of the Fund in the following manner:

- the environmental and social characteristics promoted by the Fund incorporate consideration of the following PAIs through binding exclusions:
- PAI indicator (4): Exposure to companies active in the fossil fuel sector;
- PAI indicator (14): Exposure to controversial weapons (using third-party data with a methodology that complies with the SFDR definition);
- engagement and stewardship with issuers across all relevant mandatory PAI indicators in the SFDR rules (except on controversial weapons as they are excluded) on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	7.82%	United States
ACCENTURE PLC	Information Technology	5.99%	United States
VISA INC	Financials	5.51%	United States
THERMO FISHER SCIENTIFIC INC	Health Care	4.90%	United States
DANAHER CORP	Health Care	4.54%	United States
PHILIP MORRIS INTERNATIONAL INC	Consumer Staples	4.50%	United States
INTERCONTINENTAL EXCHANGE INC	Financials	4.17%	United States
ALPHABET INC	Communication Services	3.52%	United States
TEXAS INSTRUMENTS INC	Information Technology	3.51%	United States
CONSTELLATION SOFTWARE INC/ CANADA	Information Technology	3.38%	Canada
BECTON DICKINSON & CO	Health Care	3.37%	United States
OTIS WORLDWIDE CORP	Industrials	3.27%	United States

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

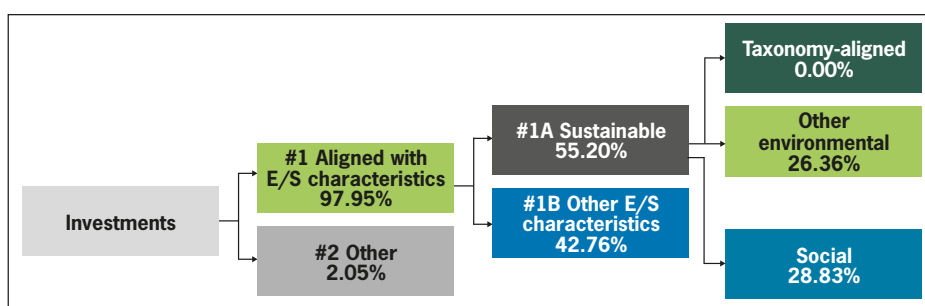

What was the proportion of sustainability-related investments?

97.87% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

68.03% of the Fund's assets were invested in Companies classified as sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

From 26 July 2023 the approach to measuring sustainable investments was updated to specify whether a company classified as a sustainable investment was contributing to an environmental or social objective. Prior to this, the proportion of sustainable investments was divided equally between environmental and social objectives solely for SFDR reporting purposes.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	29.97%
Health Care	24.07%
Financials	18.39%
Industrials	11.24%
Consumer Staples	9.30%
Communication Services	3.52%
Consumer Discretionary	1.46%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes “other” assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to invest a minimum portion of its assets in Companies classified as sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's assets invested in Companies classified as sustainable investments have been assessed by the Investment Adviser as aligned with the environmentally sustainable economic activities under the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

26.36% of the Fund's assets were invested in Companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned.

What was the share of socially sustainable investments?

28.83% of the Fund's assets were invested in Companies classified as sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.05% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and money market instruments for ancillary liquidity and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns. The investment process is focused on understanding the long-term viability of a company's returns on operating capital and engagement with management plays a vital role in this. It informs the Investment Adviser whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies and boards on financially material ESG risks and opportunities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Asia Opportunity Fund

Legal entity identifier: 549300A6F3VVR9QM8333

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Thermal coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, were screened against the Fund’s Restriction Screening Policy. During the reference period, 0% of the Fund’s investments were in violation of the Fund’s Restriction Screening Policy.

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, were screened against the Fund's Restriction Screening Policy. During the reference period, 0% of the Fund's investments were in violation of the Fund's Restriction Screening Policy.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (“PAI”) on sustainability factors only in part, as follows:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers which are involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly consider the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor (a) integrating ESG analysis within the research process and/or (b) engaging with management of investee companies. The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (2): Carbon footprint;
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

As a result, the Fund contributed to mitigating the Fund’s adverse impacts on these sustainability factors.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
HDFC BANK LTD	Financials	8.14%	India
ICICI BANK LTD	Financials	6.12%	India
COUPANG INC	Consumer Discretionary	5.77%	South Korea
MEITUAN	Consumer Discretionary	5.34%	China
TRIP.COM GROUP LTD	Consumer Discretionary	5.08%	China
KWEICHOW MOUTAI CO LTD	Consumer Staples	4.66%	China
HAIDILAO INTERNATIONAL HOLDING LTD	Consumer Discretionary	4.59%	China
KE HOLDINGS INC	Real Estate	4.48%	China
TENCENT HOLDINGS LTD	Communication Services	4.16%	China
TAIWAN SEMICONDUCTOR MANUFACTURING CO LT	Information Technology	3.83%	Taiwan

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

What was the proportion of sustainability-related investments?

97.87% of the Fund's investments attained the promoted environmental or social characteristics during the reference period through the application of environmental and social exclusions. The remainder of the investments during the reference period were investments in cash and/or derivatives held for efficient portfolio management purposes, and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

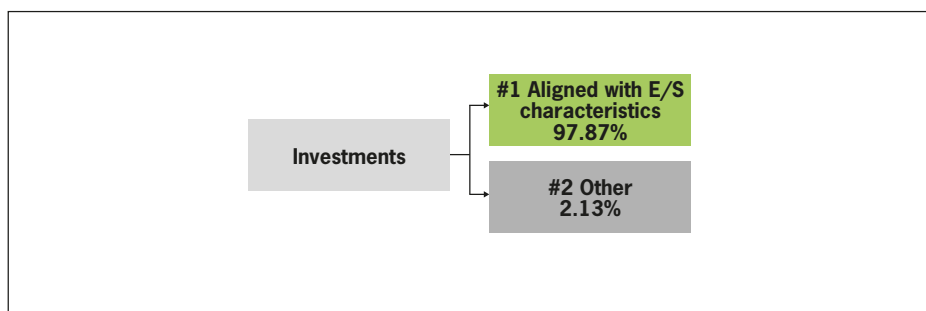

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	28.24%
Financials	27.45%
Consumer Staples	13.31%
Communication Services	11.54%
Real Estate	6.11%
Information Technology	5.37%
Industrials	3.32%
Materials	1.69%
Health Care	0.86%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	1.10%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and derivative instruments held for efficient portfolio management purposes.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

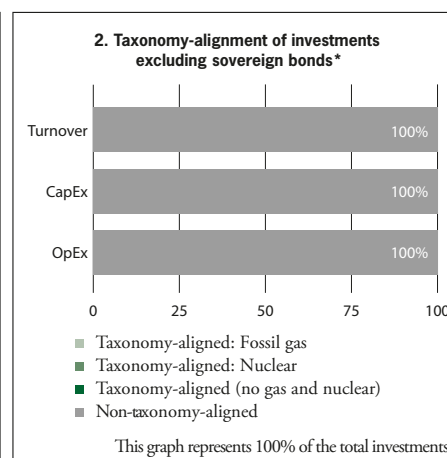

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.13% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised cash and/or derivatives held for efficient portfolio management purposes and they were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies’ management on topics specific to each business with a focus on material ESG risks and opportunities that may impact the value of a company’s securities. As part of a company quality assessment, the Investment Adviser has also analysed potential impacts to humanity’s health, environment, liberty and productivity and corporate governance practices to ensure agency, culture and trust within investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Asian Property Fund

Legal entity identifier: BZF8P9Z4J7SD7DK07X90

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund met its social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing or be damaging to social cohesion. The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies that do not have at least one female board member, excluding companies located in Japan (from 26 July 2023)	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under “How did the sustainability indicators perform?” above, the Fund did not knowingly invest in companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
MITSUI FUDOSAN CO LTD	Diversified	8.87%	Japan
LINK REIT	Diversified	8.80%	Hong Kong
SUN HUNG KAI PROPERTIES LTD	Diversified	6.55%	Hong Kong
REGION RE LTD	Retail	4.43%	Australia
GOODMAN GROUP	Industrial	4.40%	Australia
WHARF REAL ESTATE INVESTMENT CO LTD	Diversified	4.26%	Hong Kong
JAPAN REAL ESTATE INVESTMENT CORP	Office	3.97%	Japan
NATIONAL STORAGE REIT	Self Storage	3.85%	Australia
CAPITALAND INTEGRATED COMMERCIAL TRUST	Diversified	3.84%	Singapore
NIPPON BUILDING FUND INC	Office	3.84%	Japan

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

98.82% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were in cash instruments which did not align with the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Diversified	58.99%
Retail	9.88%
Office	8.47%
Industrial	8.28%
Lodging/Resorts	6.83%
Self Storage	3.85%
Industrial/Office Mixed	1.79%
Residential	0.73%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.18% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments which were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, to help manage ESG-related risks and opportunities, the Investment Adviser conducted engagements with select portfolio companies and prioritized active dialogue where positions were significant and/or issues were viewed as material. The Investment Adviser’s constructive dialogue sought to drive positive change, improve sustainability and enhance long-term value creation. As part of this ESG engagement, the Investment Adviser assessed how the company’s ESG risks and initiatives contributed to operating performance, and through conversation evaluated a range of environmental, social and governance topics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Calvert Global Equity Fund

Legal entity identifier: 254900YKPKYL7EFV9Z72

Reference period: 28 November 2023 to 31 December 2023

This Fund was launched on 28 November 2023.

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 29 December 2023.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective: ___%**
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: ___%**

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 71.66% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Through the application of the Calvert Principles for Responsible Investment (the “Calvert Principles”), the Fund promoted environmental sustainability and resource efficiency, equitable societies and respect for human rights, in addition to accountable governance and transparent operations.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Calvert Principles		
% of names held in the Fund that are considered eligible for investment in accordance with the Calvert Principles, measured as a % of portfolio:	90.00%	97.91%
Sustainable Investments		
% of the Fund’s investments which qualify as sustainable investments under SFDR	50.00%	71.66%

. . . and compared to previous periods?

Not applicable. The Fund was launched on 28 November 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Fund's approach to a sustainable investment was to ensure that an issuer was involved in an economic activity that made a contribution to an environmental or social challenge, did not cause significant harm, and practiced good governance. Issuers' involvement in economic activities making a positive contribution was determined using at least one of the following approaches:

- Companies considered leaders or improvers in managing financially material environmental or social risks and opportunities: Companies which performed in the top 20-40% of their peer group on environmental or social factors determined to be financially material to the company, while not falling in the bottom 20-40% in any other material environmental, social, or governance issue according to Calvert's proprietary quantitative and qualitative assessment;
- Companies considered to be addressing global challenges – climate change: Companies which addressed the climate transition, which was evaluated by selecting companies that perform in the top 20-40% of their peer group on material environmental factors, and supported with a qualitative assessment of companies' green solutions, carbon reduction commitments, carbon emission performance trends and/or their progress toward meeting any commitments through their products and services and/ or which demonstrated commitment to the goal of reaching transition;
- Companies considered to be addressing global challenges – diversity, equity and inclusion leaders and improvers: Companies that demonstrated leadership were evaluated based on the gender balance across different levels of the workforce and/or demonstrated leadership in ethnic diversity members relative to the country's demographic in certain applicable countries, as well as leadership in other dimensions of diversity among board members (including age, cultural background, and skill sets), and policies and procedures that adequately support equal opportunity in the hiring process, equal pay and fair promotion. Companies that demonstrated meaningful improvement in diversity practices was evidenced by 1) increased workforce diversity (gender or ethnicity), 2) demonstrated progress after a severe diversity or inclusion controversy, 3) resolved shareholder proposals (for companies based in US and Canada) on diversity and inclusion issues; or 4) identified as an engagement target by Calvert on diversity and inclusion issues.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limited exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by Calvert for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How did this financial product consider principal adverse impacts on sustainability factors? below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund firstly accounted for adverse impacts on sustainability factors through the application of Calvert’s existing policies and the Calvert Principles which, as noted previously, consider how the investee companies’ impacts – positive and negative – on the environment, society, and human rights (among other ESG issues) through their activities or corporate behaviour, can have financially material effects on their business.

Calvert additionally tested all sustainable investments against the PAIs which are mandatory to consider under the EU Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment. Calvert did this using a combination of quantitative and qualitative tests, using available third party and proprietary data for each PAI.

Calvert used data that was most closely aligned with each individual PAI. In some cases third party data was limited and if issuers or specific issues were not covered by a vendor for a particular PAI Calvert supplemented with best available proxy indicators or qualitative analysis.

Calvert applied the following types of tests on the PAIs to sustainable investments in order to determine if the investment was causing significant harm:

1. With respect to PAI indicators for which Calvert considers sufficient and reliable quantitative data was available across the investment universe, Calvert determined whether the adverse impact associated with the issuer’s activities was significant based on the issuer’s relative ranking within a peer group or benchmark universe, or based on an absolute standard of performance, as appropriate for the specific PAI.
2. For PAIs where data availability or quality was too limited to enable a quantitative analysis (e.g., activities negatively affecting biodiversity-sensitive areas) Calvert assessed significant harm on a qualitative basis using available proxy data. In cases where third party or vendor data suggested a sustainable investment may be causing significant harm, Calvert conducted additional desktop research to better understand and assess negative impacts. If Calvert concluded that the issuer was not causing significant harm based on the analysis, the rationale for that decision was documented.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Calvert concluded an issuer was not causing significant harm if:

- (i) the issuer had taken demonstrated steps and actions to address the potential significant harm such as through the adoption of time bound targets and goals or dedicated remediation activities and there were clear meaningful signs of improvement and positive change;
- (ii) the issuer had been identified by news sources and data vendors as being involved or potentially being involved in a controversy, however the controversy was at the level of unverified allegations; or the underlying issue appeared to be resolved through corporate, regulator or other action; or data vendor information available about the controversy was considered out of date by at least a year and further information showing steps towards positive resolution of the controversy was available;
- (iii) the underlying third party data point was subjective in nature (e.g. vendors made different assessments of UNGC compliance given differing proprietary methodologies in the absence of a UN-defined list of violators) and Calvert's own research provided an alternative viewpoint;
- (iv) Calvert had reason to believe that third party data was inaccurate (e.g. outdated, or based on estimates or flawed data assumptions) and Calvert's own research demonstrated that the issuer was not causing significant harm; or
- (v) Calvert had taken action to engage with the underlying issuer on the specific areas of potential harm to ensure adequate remedial steps were taken.

Calvert kept such investments under review.

In cases where Calvert determined that an issuer was causing significant harm according to PAIs, the investment was deemed not sustainable and was not counted towards the sustainable investment allocation of the Fund.

Calvert used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAIs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For its sustainable investments, Calvert monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. Calvert made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio as long as alignment with the portfolios environmental or social characteristics was maintained.

Through the application of the Calvert Principles to all investments in the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, application of the Calvert Principles considers whether issuers:

- demonstrate poor management of environmental risks or contribute significantly to local or global environmental problems;
- demonstrate a pattern of employing forced, compulsory or child labour;
- exhibit a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibit a pattern and practice of violating the rights and protections of Indigenous Peoples.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

In considering whether an investment held in the Fund should be regarded as a sustainable investment, Calvert determined each issuer's compliance with the themes and values set out in the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles, which are contained in PAI #10 and which is therefore considered for all investments in the Fund.

The Fund will make information available on how it has incorporated the PAIs in its periodic reports to investors.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 28 November 2023 to 31 December 2023.

Security	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	7.37%	United States
ALPHABET INC	Communication Services	5.25%	United States
AMAZON.COM INC	Consumer Discretionary	3.96%	United States
NESTLE SA	Consumer Staples	3.47%	Switzerland
VISA INC	Financials	3.42%	United States
INTUIT INC	Information Technology	3.07%	United States
SANOFI SA	Health Care	2.75%	France
COMPASS GROUP PLC	Consumer Discretionary	2.74%	United Kingdom
ZOETIS INC	Health Care	2.70%	United States
RECKITT BENCKISER GROUP PLC	Consumer Staples	2.66%	United Kingdom
VERISK ANALYTICS INC	Industrials	2.57%	United States
SIEMENS AG	Industrials	2.54%	Germany
DANAHER CORP	Health Care	2.52%	United States
IMCD NV	Industrials	2.42%	Netherlands
DOLLAR TREE INC	Consumer Staples	2.39%	United States

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

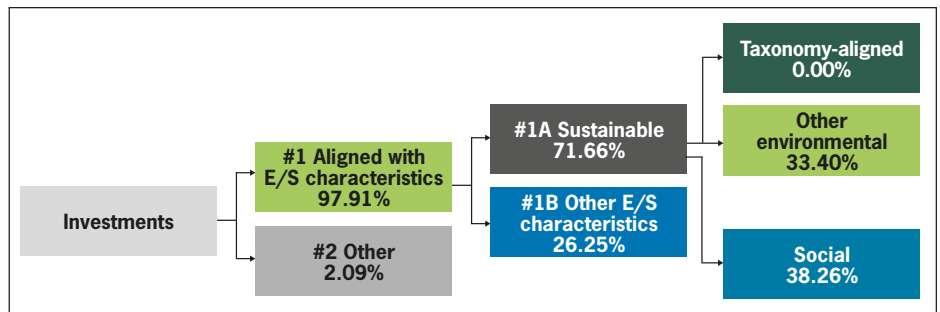

What was the proportion of sustainability-related investments?

97.91% of the Fund’s investments were aligned with the environmental and social characteristics of the Fund.

71.66% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	20.97%
Industrials	17.43%
Health Care	16.85%
Financials	14.11%
Consumer Discretionary	10.59%
Consumer Staples	8.53%
Communication Services	7.41%
Utilities	2.02%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	2.02%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy given that there is a lack of company-reported data available and a limited number of economic activities currently in scope for the EU Taxonomy regulation. As a result, the Investment Adviser has not reported the EU Taxonomy alignment of the Fund's investments, as such alignment is not an accurate reflection of the investment philosophy of the Fund. The EU Taxonomy eligible revenues – i.e. the revenues that are within scope of the EU Taxonomy regulation but which are not confirmed to be aligned with the regulation's technical screening criteria – were 15.71% for 2023. To produce this analysis, the Fund relies on data from a third party vendor which may be subject to errors, limitations and changes beyond the control of the Investment Adviser.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

33.40% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

38.26% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.09% of the Fund's investments were comprised of cash for ancillary liquidity. These investments are included in the "#2 Other" category and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, Calvert and the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. Calvert and the Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, Calvert and the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

During the reference period, Calvert and the Investment Adviser monitored the investment universe according to the Fund's sustainable investment methodology, to avoid any new investments in companies that did not meet the Calvert Principles or that were involved in activities that should be excluded by the Fund.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Calvert Sustainable Climate Aligned Fund

Legal entity identifier: 549300Q2RHPRD81Y4C87

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input checked="" type="checkbox"/> Yes | <input type="checkbox"/> No |
|---|--|
| <p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 99.28%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> | <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> |
| <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p> | <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p> |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies located in developed markets that are involved in economic activities that address climate transition and/or are those that the Investment Adviser assess to be contributing to the long-term de-carbonisation objectives of the Paris Agreement.

In addition, the Fund maintained a carbon footprint of at least 50% less than the MSCI World Index. The goal is to reduce the emissions year-on-year to reach net zero at portfolio level by 2050 or earlier.

In light of the above, this Fund has a reduction in carbon emissions as its objective. In pursuing this objective this Fund does not track or otherwise align with the methodology of an EU Climate Transition Benchmark or an EU Paris-Aligned Benchmark. The Investment Adviser, however, ensured that the continued effort of reducing carbon emissions was ensured in view of achieving the objectives of the Paris Agreement through the application of the characteristics described above.

The Fund's carbon reduction objective was aligned with the Paris Agreement and the Fund contributed towards the objectives of the Paris Agreement by maintaining a carbon footprint 50% lower than the benchmark, overweighting climate solution providers and aiming to achieve net zero at portfolio level by 2050 or earlier. These binding features contributed towards the objectives of the Paris Agreement including its long-term temperature goal, climate adaptation and climate mitigation.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.32%
Carbon footprint at least 50% lower than that of the MSCI World Index. Measured by tonnes of CO ₂ per \$1million enterprise value (including scope 1 and 2 emissions, and only including scope 3 emissions for certain sectors for which, in the view of the Investment Adviser, scope 3 emissions are likely to constitute a material factor in overall carbon emissions) The carbon footprint of the MSCI World Index was 445.04 Therefore, the carbon footprint threshold 50% lower than that of the MSCI World Index, and the actual carbon footprint of the Fund, were:	222.52	109.68
Portfolio holdings which demonstrated environmental and/or climate leadership or improvement in accordance with the Investment Adviser's proprietary methodology. The percentage of investee companies which the Investment Adviser aimed to be categorised as meeting its criteria and the percentage of portfolio holdings actually meeting this criteria were:	90.00%	99.28%
Reduction in emissions year-on-year to reach net zero at portfolio level by 2050 or earlier. For this purpose, the Fund considers scope 1 and 2 GHG emissions and scope 3 GHG emissions for all sectors currently required to be considered by the EU CTBs and UC PABs. The decarbonization trajectory per annum at overall portfolio which the Investment Adviser aimed to meet and the actual decarbonization trajectory of the fund were:	-7.00%	-7.23%
Exclusions:		
% of investee companies involved with:		
Severe ESG controversies without material remediation and improvement	0.00%	0.00%
Controversial weapons	0.00%	0.00%
Civilian firearms	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Gambling	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

During the reference period, some investments became restricted due to corporate actions (such as spin-offs or mergers) creating new securities lacking the data required to confirm adherence to the Fund's environmental and/or climate characteristics. Until these new securities could be classified with the appropriate characteristics, they were assigned the "Not Sustainable" category, as reflected in the table under the question "What was the asset allocation?"

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limits exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?” below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules and which are relevant to the investment. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

In cases where third party vendor data suggested that an investment was causing significant harm, the Investment Adviser conducted desktop research to better understand and assess potential negative impacts. This independent analysis led to some instances where the Investment Adviser concluded that an issuer was not causing significant harm, taking into account elements such as vendor data timeliness/accuracy, company responses to address issues flagged as potentially harmful, or feedback received through the Investment Adviser’s active engagement activities with the issuer. In such cases, the Investment Adviser proceeded with the investment, the rationale for the determination of harm was documented and the investment was kept under review.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third-party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
APPLE INC.	Information Technology	4.75%	United States
MICROSOFT CORPORATION	Information Technology	4.65%	United States
SCHNEIDER ELECTRIC SE	Industrials	2.94%	France
NVIDIA CORPORATION	Information Technology	2.29%	United States
S&P GLOBAL, INC.	Financials	1.69%	United States
PARKER-HANNIFIN CORPORATION	Industrials	1.64%	United States
GENERAL MILLS, INC.	Consumer Staples	1.50%	United States
ELI LILLY AND COMPANY	Health Care	1.35%	United States
PRUDENTIAL FINANCIAL, INC.	Financials	1.34%	United States
VISA INC. CLASS A	Financials	1.33%	United States
BOSTON SCIENTIFIC CORPORATION	Health Care	1.25%	United States
TORONTO-DOMINION BANK	Financials	1.20%	Canada
NOMURA HOLDINGS, INC.	Financials	1.15%	Japan
HOME DEPOT, INC.	Consumer Discretionary	1.15%	United States
SUN LIFE FINANCIAL INC.	Financials	1.08%	Canada

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

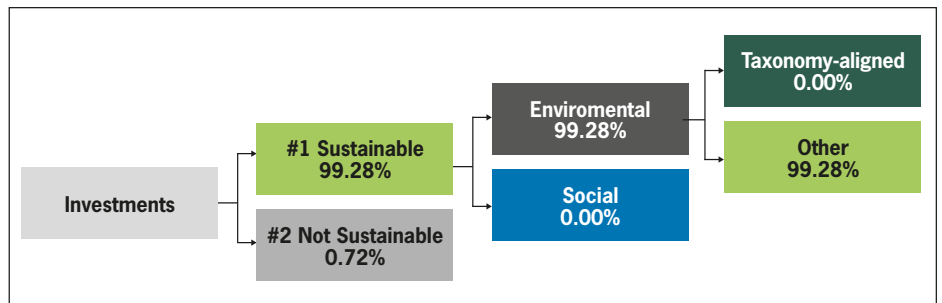

What was the proportion of sustainability-related investments?

99.28% of the Fund comprised sustainable investments with an environmental objective.

The Fund’s remaining assets were held in cash and hedging instruments. The remaining assets were also occasionally held in new securities created by corporate actions for which data was not available as of the date of measurement for the proportion of the Fund’s sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In addition to the Fund’s overarching environmental sustainable investment objective, through the Calvert Principles, the Fund’s methodology for evaluating investments as sustainable investments considered both environmental and social factors (as relevant) as set out above. The Investment Adviser then selected sustainable investments for inclusion in the Fund based on their contribution to the environmental sustainable investment objective of the Fund.

In view of this methodology and as this Fund has an environmental objective, for SFDR purposes the Investment Adviser has reported all sustainable investments in this question as environmentally focused sustainable investments for reporting purposes. However, please note that the sustainable investments may have also made a contribution to social factors.

The carbon tilt was applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have had a higher carbon footprint than the portfolio level average or target).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	26.29%
Financials	17.62%
Health Care	13.46%
Industrials	13.19%
Consumer Discretionary	7.54%
Communication Services	6.59%
Consumer Staples	4.23%
Utilities	4.09%
Materials	3.91%
Real Estate	2.41%
Energy	0.00%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	4.52%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captured issuers which derived any revenue from such activities as part of their business. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy given that there is a lack of company-reported data available and a limited number of economic activities currently in scope for the EU Taxonomy regulation. The Investment Adviser has reported the EU Taxonomy alignment of the Fund's investments given the particular investment philosophy of the Fund, which remains low for the two aforementioned reasons. The EU Taxonomy eligible revenues – i.e. the revenues that are within scope of the EU Taxonomy regulation but which are not confirmed to be aligned with the regulation's technical screening criteria – were 15.97% for 2023. To produce this analysis, the Fund relies on data from a third party vendor which may be subject to errors, limitations and changes beyond the control of the Investment Adviser.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

99.28% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments reported as having an environmental objective may additionally exhibit social characteristics.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

0.72% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards. These investments also occasionally included new securities created by corporate actions for which data was not available as of the date of measurement for the proportion of the Fund's sustainability-related investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

The Investment Adviser also regularly monitored investments in the Fund according to the Fund's sustainable investment methodology.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Calvert Sustainable Climate Transition Fund

Legal entity identifier: 549300XY4TIZJ6K41B80

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input checked="" type="checkbox"/> Yes | <input type="checkbox"/> No |
|---|--|
| <p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 95.77%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> | <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> |
| <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p> | <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p> |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that help to mitigate or adapt to climate change and that qualify as sustainable investments. The Fund achieved its climate change mitigation and adaptation objective by investing in companies which qualified as sustainable investments, and which may be involved directly or indirectly in, among other areas, renewable power, water management, waste management, electrification, battery storage, certain modes of mobility, hydrogen, biofuels, and certain types of agriculture, as well as other operations that help to facilitate a lower carbon environment.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	95.77%
% of the Fund's portfolio which the Investment Adviser aimed to be climate change-focused companies, and the actual percentage of the Fund's portfolio which met these criteria were:	90.00%	95.77%
Exclusions:		
% of Fund investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	93.95%
% of the Fund's portfolio which the Investment Adviser aimed to be climate change-focused companies, and the actual percentage of the Fund's portfolio which met these criteria were:	90.00%	93.95%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limits exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by Calvert for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?” below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund firstly accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. Calvert additionally tested all investments against the PAI indicators which are mandatory to consider under the EU SFDR rules and which are relevant to the investment. Calvert did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. Calvert used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when Calvert determines that sufficiently reliable data has become available. In cases where the PAI data suggested that an investment was causing significant harm, Calvert and the Investment Adviser conducted desktop research to better understand and assess potential negative impacts indicated by third party or proprietary data. This independent analysis led to some instances where Calvert concluded that an issuer was not causing significant harm, taking into account elements such as vendor data timeliness/accuracy, company responses to address issues flagged as potentially harmful, or feedback received through active engagement activities with the issuer. In such cases, the Investment Adviser proceeded with the investment, the rationale for the determination of harm was documented and the investment was kept under review.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Calvert monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. Calvert made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles for all equity investments in the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, Calvert and the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If Calvert determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third-party screen (for example because of historical instances of non-compliance which have since been remediated in Calvert's view), Calvert documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
TESLA INC	Consumer Discretionary	5.57%	United States
IBERDROLA SA	Utilities	5.49%	Spain
GFL ENVIRONMENTAL INC	Industrials	5.29%	Canada
REPUBLIC SERVICES INC	Industrials	4.85%	United States
EVERSOURCE ENERGY	Utilities	4.26%	United States
NATIONAL GRID PLC	Utilities	3.95%	United Kingdom
SEMPRA ENERGY	Utilities	3.76%	United States
HYDRO ONE LTD	Utilities	3.59%	Canada
CASH & EQUIV	Other	3.51%	United States
SCHNEIDER ELECTRIC SE	Industrials	3.30%	France
TERNA - RETE ELETTRICA NAZION	Utilities	3.13%	Italy
LG CHEM LTD	Materials	3.11%	South Korea
SOLAREEDGE TECHNOLOGIES INC	Information Technology	3.08%	United States

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

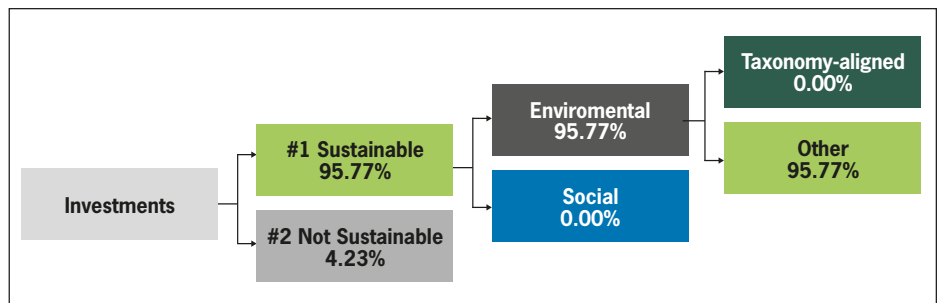

95.77% of the Fund’s investments were sustainable investments.

95.77% of the Fund comprised sustainable investments with an environmental objective.

The Fund’s remaining assets were held in cash and hedging instruments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

As this Fund has an environmental objective, for SFDR purposes all sustainable investments in this Fund are environmentally focused sustainable investments for reporting purposes. However, please note that the sustainable investments may have also made a contribution to social factors.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Utilities	38.90%
Industrials	31.61%
Consumer Discretionary	9.70%
Materials	7.94%
Information Technology	7.62%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	27.05%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captured issuers which derived any revenue from fossil fuels such as ownership of fossil fuel reserves, distribution of fossil fuels and power generation using fossil fuels. Given the Fund's sustainable investment objective is to invest in companies that help to mitigate or adapt to climate change, it had exposure to heavy emitting and capital intensive industries that are critical players in the climate transition such as utilities and power infrastructure companies. During the reference period, some of the investee companies had some power generation and revenues related to fossil fuels, however the Investment Adviser only invested in them if: i) they invested significant capital in Property, Plant and Equipment, technology and processes that can help facilitate a lower carbon emissions future; 2) the Investment Adviser believed their overall decarbonization strategy was credible; and 3) they were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment.

Calvert and the Investment Adviser regularly monitored all investee companies (including those with fossil fuel exposure) to ensure that they continued to meet the criteria required to be classified as a sustainable investment. According to the data sources used during the reference period the Fund had minimal exposure to investee companies which generated revenue from ownership of fossil fuel reserves.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy given that there is a lack of company-reported data available and a limited number of economic activities currently in scope for the EU Taxonomy regulation. Calvert has reported the EU Taxonomy alignment of the Fund's investments given the particular investment philosophy of the Fund, which remains low for the two aforementioned reasons. The EU Taxonomy eligible revenues – i.e. the revenues that are within scope of the EU Taxonomy regulation but which are not confirmed to be aligned with the regulation's technical screening criteria – were 63.98% for 2023. To produce this analysis, Calvert relies on data from a third party vendor which may be subject to errors, limitations and changes beyond the control of Calvert.

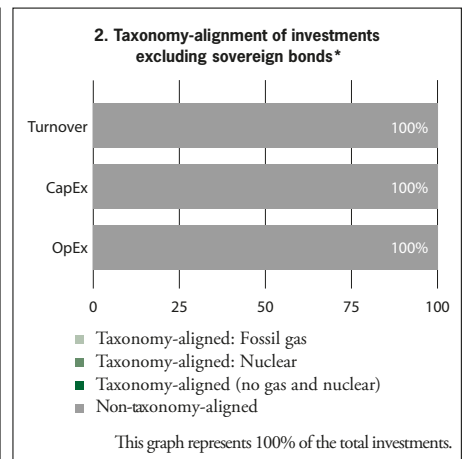

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

95.77% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments reported as having an environmental objective may additionally exhibit social characteristics.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

4.23% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, Calvert engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. Calvert and the Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, Calvert also supported shareholder resolutions of its investments related to executive remuneration, social and human rights, and environmental, health and safety issues.

The Investment Adviser also regularly monitored investments in the Fund according to the Fund's sustainable investment methodology.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Calvert Sustainable Developed Europe Equity Select Fund

Legal entity identifier: 549300UT4CY7ZR786J23

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input checked="" type="checkbox"/> Yes | <input type="checkbox"/> No |
|---|--|
| <p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 52.91%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> | <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> |
| <p><input checked="" type="checkbox"/> It made sustainable investments with a social objective: 46.33%</p> | <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p> |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that were either: (i) involved in economic activities that addressed global environmental or societal challenges in areas such as environmental sustainability, diversity, equity and inclusion, respect for human rights and valuing human capital, in addition to demonstrating accountable governance and transparent operations; or (ii) leaders in managing environmental or social risks and opportunities, and in each case that were determined to be sustainable investments by the Investment Adviser.

In addition to this primary objective, the Fund maintained a carbon profile lower than the MSCI Europe index and higher levels of board gender diversity at the portfolio-level than the MSCI Europe index.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.36%
Carbon footprint at least 50% lower than that of the MSCI Europe Index. Measured by weighted average carbon intensity, defined as tonnes of CO ₂ per \$1million revenue (excluding Scope 3 emissions) The carbon footprint of the MSCI Europe Index was 100.31. Therefore, the carbon footprint threshold 50% lower than that of the MSCI Europe Index, and the actual carbon footprint of the Fund were:	50.15	37.85
Higher level of board gender diversity at the portfolio-level than the MSCI Europe Index, measured by average number of women at board level). The gender diversity value of the MSCI Europe Index and that of the Fund were:	5.29	5.75
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	99.24%
Exclusions:		
% investee companies involved with:		
Severe ESG controversies without material remediation and improvement	0.00%	0.00%
Controversial weapons	0.00%	0.00%
Civilian firearms	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Gambling	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

During the reference period, some investments became restricted due to corporate actions (such as spin-offs or mergers) creating new securities lacking the data required to confirm adherence to the Fund's ESG characteristics. Until these new securities could be classified with the appropriate characteristics, they were assigned the "Not Sustainable" category, as reflected in the table under the question "What was the asset allocation?".

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.72%
Carbon footprint at least 50% lower than that of the MSCI Europe Index. Measured by weighted average carbon intensity, defined as tonnes of CO ₂ per \$1million revenue (excluding Scope 3 emissions) The carbon footprint of the MSCI Europe Index for 2022 was 114.77 Therefore, the carbon footprint threshold 50% lower than that of the MSCI Europe Index, and the actual carbon footprint of the Fund were:	57.39	41.04
Higher level of board gender diversity at the portfolio-level than the MSCI Europe Index, measured by average number of women at board level). The gender diversity value of the MSCI Europe Index and that of the Fund were:	5.11	5.45
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	99.72%
Exclusions:		
% investee companies involved with:		
Severe ESG controversies without material remediation and improvement	0.00%	0.00%
Controversial weapons	0.00%	0.00%
Civilian firearms	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Gambling	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limits exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?” below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules and which are relevant to the investment. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

In cases where third party vendor data suggested that an investment was causing significant harm, the Investment Adviser conducted desktop research to better understand and assess potential negative impacts. This independent analysis led to some instances where the Investment Adviser concluded that an issuer was not causing significant harm, taking into account elements such as vendor data timeliness/accuracy, company responses to address issues flagged as potentially harmful, or feedback received through the Investment Adviser’s active engagement activities with the issuer. In such cases, the Investment Adviser proceeded with the investment, the rationale for the determination of harm was documented and the investment was kept under review.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third-party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
L'OREAL S.A.	Consumer Staples	3.96%	France
NOVARTIS AG	Health Care	3.81%	Switzerland
NOVO NORDISK A/S CLASS B	Health Care	3.72%	Denmark
LVMH MOET HENNESSY LOUIS VUITTON SE	Consumer Discretionary	3.22%	France
AXA SA	Financials	3.06%	France

SCHNEIDER ELECTRIC SE	Industrials	2.85%	France
ASML HOLDING NV	Information Technology	2.81%	Netherlands
ASTRAZENECA PLC	Health Care	2.80%	United Kingdom
ROCHE HOLDING LTD DIVIDEND RIGHT CERT.	Health Care	2.47%	Switzerland
INTESA SANPAOLO S.P.A.	Financials	2.21%	Italy
MUNICH REINSURANCE COMPANY	Financials	2.08%	Germany
ABB LTD.	Industrials	1.87%	Switzerland
IBERDROLA SA	Utilities	1.71%	Spain
KONINKLIJKE AHOLD DELHAIZE N.V.	Consumer Staples	1.69%	Netherlands

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

99.24% of the Fund’s investments were sustainable investments.

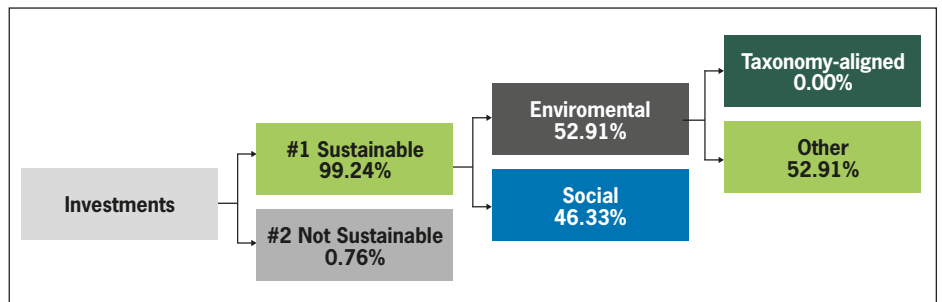

52.91% of the Fund comprised sustainable investments with an environmental objective.

46.33% of the Fund comprised sustainable investments with a social objective.

The Fund’s remaining assets were held in cash and hedging instruments, as described below. The remaining assets were also occasionally held in new securities created by corporate actions for which data was not available as of the date of measurement for the proportion of the Fund’s sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund’s methodology for categorising investments as sustainable investments assessed the investment’s overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may have also made a contribution to environmental or social factors respectively.

The carbon tilt and diversity tilt were both applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have had a higher weighted average carbon intensity and lower weighted average number of women at the board level than the portfolio level average or target).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	19.31%
Health Care	16.71%
Industrials	14.48%
Consumer Discretionary	14.47%
Information Technology	8.95%
Consumer Staples	8.54%
Communication Services	5.62%
Utilities	5.11%
Materials	5.00%
Real Estate	1.19%
Energy	0.00%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	5.84%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captured issuers which derived any revenue from such activities as part of their business. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy given that there is a lack of company-reported data available and a limited number of economic activities currently in scope for the EU Taxonomy regulation. As a result, the Investment Adviser has not reported the EU Taxonomy alignment of the Fund's investments, as such alignment is not an accurate reflection of the investment philosophy of the Fund. The EU Taxonomy eligible revenues – i.e. the revenues that are within scope of the EU Taxonomy regulation but which are not confirmed to be aligned with the regulation's technical screening criteria – were 22.26% for 2023. To produce this analysis, the Fund relies on data from a third party vendor which may be subject to errors, limitations and changes beyond the control of the Investment Adviser.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

52.91% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

46.33% of the Fund's investments were sustainable investments with a social objective.

As noted above some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

0.76% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards. These investments also occasionally included new securities created by corporate actions for which data was not available as of the date of measurement for the proportion of the Fund's sustainability-related investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

The Investment Adviser also regularly monitored investments in the Fund according to the Fund's sustainable investment methodology.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that were either: (i) involved in economic activities that addressed global environmental or societal challenges in areas such as environmental sustainability, diversity, equity and inclusion, respect for human rights and valuing human capital, in addition to demonstrating accountable governance and transparent operations; or (ii) leaders in managing environmental or social risks and opportunities, and in each case that were determined to be sustainable investments by the Investment Adviser.

In addition to this primary objective, the Fund maintained a carbon profile lower than the MSCI World index and higher levels of board gender diversity at the portfolio-level than the MSCI World index.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.17%
Carbon footprint at least 50% lower than that of the MSCI World Index. Measured by weighted average carbon intensity, defined as tonnes of CO ₂ per \$1million revenue (excluding Scope 3 emissions) The carbon footprint of the MSCI World Index was 116.07. Therefore, the carbon footprint threshold 50% lower than that of the MSCI World Index, and the actual carbon footprint of the Fund were:	58.04	44.62
Higher level of board gender diversity at the portfolio-level than the MSCI World Index, measured by average number of women at board level). The gender diversity value of the MSCI World Index and that of the Fund were:	4.05	4.46
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	99.14%
Exclusions:		
% Fund exposure to investee companies involved with:		
Severe ESG controversies without material remediation and improvement	0.00%	0.00%
Controversial weapons	0.00%	0.00%
Civilian firearms	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Gambling	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

During the reference period, some investments became restricted due to corporate actions (such as spin-offs or mergers) creating new securities lacking the data required to confirm adherence to the Fund's ESG characteristics. Until these new securities could be classified with the appropriate characteristics, they were assigned the "Not Sustainable" category, as reflected in the table under the question "What was the asset allocation?".

Appendix 9: Sustainable Finance Disclosure (unaudited)

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limits exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?” below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules and which are relevant to the investment. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

In cases where third party vendor data suggested that an investment was causing significant harm, the Investment Adviser conducted desktop research to better understand and assess potential negative impacts. This independent analysis led to some instances where the Investment Adviser concluded that an issuer was not causing significant harm, taking into account elements such as vendor data timeliness/accuracy, company responses to address issues flagged as potentially harmful, or feedback received through the Investment Adviser’s active engagement activities with the issuer. In such cases, the Investment Adviser proceeded with the investment, the rationale for the determination of harm was documented and the investment was kept under review.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third-party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
APPLE INC.	Information Technology	5.40%	United States
MICROSOFT CORPORATION	Information Technology	4.56%	United States
NVIDIA CORPORATION	Information Technology	2.27%	United States
MERCK & CO., INC.	Health Care	1.10%	United States

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

99.14% of the Fund’s investments were sustainable investments.

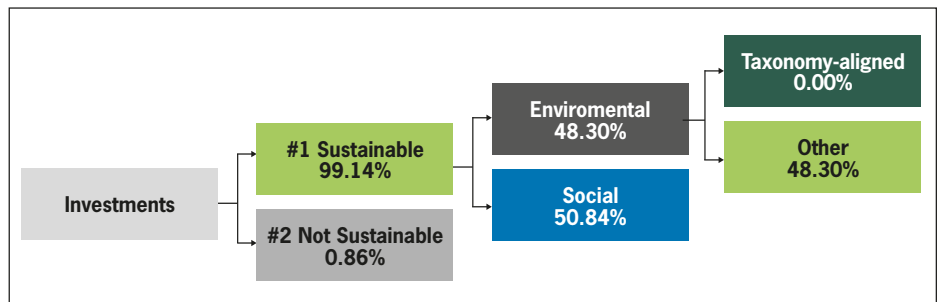

48.30% of the Fund comprised sustainable investments with an environmental objective.

50.84% of the Fund comprised sustainable investments with a social objective.

The Fund’s remaining assets were held in cash and hedging instruments, as described below. The remaining assets were also occasionally held in new securities created by corporate actions for which data was not available as of the date of measurement for the proportion of the Fund’s sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund’s methodology for categorising investments as sustainable investments assessed the investment’s overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may have also made a contribution to environmental or social factors respectively.

The carbon tilt and diversity tilt were both applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have had a higher weighted average carbon intensity and lower weighted average number of women at the board level than the portfolio level average or target).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	25.60%
Financials	18.69%
Health Care	14.12%
Industrials	10.64%
Consumer Discretionary	9.47%
Communication Services	6.27%
Consumer Staples	4.95%
Materials	4.19%
Real Estate	2.73%
Utilities	2.53%
Energy	0.00%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	4.97%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy given that there is a lack of company-reported data available and a limited number of economic activities currently in scope for the EU Taxonomy regulation. As a result, the Investment Adviser has not reported the EU Taxonomy alignment of the Fund's investments, as such alignment is not an accurate reflection of the investment philosophy of the Fund. The EU Taxonomy eligible revenues – i.e. the revenues that are within scope of the EU Taxonomy regulation but which are not confirmed to be aligned with the regulation's technical screening criteria – were 15.02% for 2023. To produce this analysis, the Fund relies on data from a third party vendor which may be subject to errors, limitations and changes beyond the control of the Investment Adviser.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

48.30% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

50.84% of the Fund's investments were sustainable investments with a social objective.

As noted above some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

0.86% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards. These investments also occasionally included new securities created by corporate actions for which data was not available as of the date of measurement for the proportion of the Fund's sustainability-related investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

The Investment Adviser also regularly monitored investments in the Fund according to the Fund's sustainable investment methodology. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund. During the reference period, investments became restricted due to ineligibility under the Calvert Principles.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Calvert Sustainable Diversity, Equity and Inclusion Fund

Legal entity identifier: 549300LM8EX1C25T5840

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input checked="" type="checkbox"/> Yes | <input type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective __%: <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that demonstrated leadership or meaningful improvement in having a diverse workforce and an equal and inclusive work culture.

In addition to this primary objective, the Fund ensured that its investee companies maintained higher levels of board gender and ethnic diversity considered at the portfolio level as compared to the MSCI World Index.

How did the sustainability indicators perform?

Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.31%
Portfolio holdings which had evidence of DEI leadership or improvement. Measured by % of Fund investee companies categorized as diversity leaders or diversity improvers (and not diversity neutral or diversity laggards). The percentage of investee companies which the Investment Adviser aimed to be diversity leaders/diversity improvers, and the percentage of portfolio holdings actually meeting this criteria were:	90.00%	99.13%
Higher levels of gender diversity than that of the MSCI World Index. Measured by the average number of women at board level. The gender diversity value of the MSCI World Index and that of the Fund were:	3.65	4.53
Higher levels of ethnic diversity than that of the MSCI World Index. Measured by average percentage of underrepresented ethnicities at board level. The ethnic diversity values of the MSCI World Index and that of the fund were:	21.11%	26.28%
Exclusions:		
% of investee companies involved with:		
Severe ESG controversies without material remediation and improvement	0.00%	0.00%
Controversial weapons	0.00%	0.00%
Civilian firearms	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Gambling	0.00%	0.00%
% of investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

During the reference period, some investments became restricted due to corporate actions (such as spin-offs or mergers) creating new securities lacking the data required to confirm adherence to

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts (PAI) are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limits exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?” below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules and which are relevant to the investment. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

In cases where third party vendor data suggested that an investment was causing significant harm, the Investment Adviser conducted desktop research to better understand and assess potential negative impacts. This independent analysis led to some instances where the Investment Adviser concluded that an issuer was not causing significant harm, taking into account elements such as vendor data timeliness/accuracy, company responses to address issues flagged as potentially harmful, or feedback received through the Investment Adviser’s active engagement activities with the issuer. In such cases, the Investment Adviser proceeded with the investment, the rationale for the determination of harm was documented and the investment was kept under review.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third-party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

99.13% of the Fund's investments were sustainable investments.

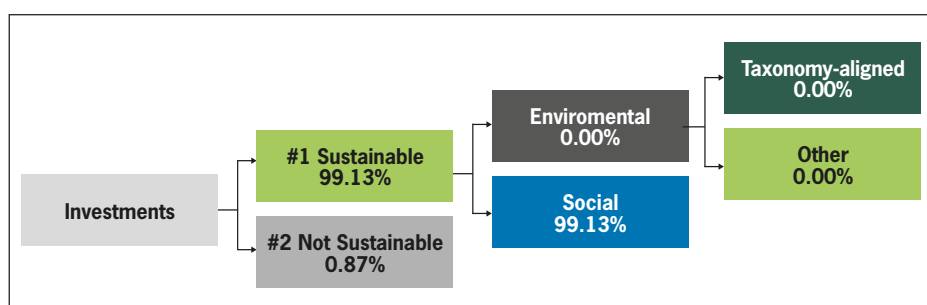

None of the Fund's sustainable investments had an environmental objective during the reference period.

99.13% of the Fund comprised sustainable investments with a social objective.

The Fund's remaining assets were held in cash and hedging instruments, as described below. The remaining assets were also occasionally held in new securities created by corporate actions for which data was not available as of the date of measurement for the proportion of the Fund's sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In addition to the Fund's overarching social sustainable investment objective, through the Calvert Principles, the Fund's methodology for evaluating investments as sustainable investments considered both environmental and social factors (as relevant) as set out above. The Investment Adviser then selected sustainable investments for inclusion in the Fund based on their contribution to the social sustainable investment objective of the Fund.

In view of this methodology and as this Fund has a social objective, for SFDR purposes the Investment Adviser has reported all sustainable investments in this question and in the question below ("What was the share of socially sustainable investments?") as socially focused sustainable investments for reporting purposes. However, please note that the sustainable investments may have also made a contribution to environmental factors.

The diversity commitments to be better than the MSCI World Index were applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have had a lower weighted average number of women or underrepresented ethnicities at the board level than the portfolio level average of target).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	29.60%
Financials	19.40%
Health Care	16.46%
Industrials	10.31%
Consumer Discretionary	7.74%
Consumer Staples	6.37%
Communication Services	5.45%
Materials	2.07%
Utilities	1.55%
Real Estate	0.37%
Energy	0.00%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	3.61%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captured issuers which derived any revenue from such activities as part of their business. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of socially sustainable investments?

99.13% of the Fund's investments were sustainable investments with a social objective.

As noted above, this Fund has social objective, so for SFDR purposes the Investment Adviser has reported all sustainable investments as social sustainable investments in this question. However, please note that the sustainable investments may additionally exhibit environmental characteristics.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

0.87% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards. These investments also occasionally included new securities created by corporate actions for which data was not available as of the date of measurement for the proportion of the Fund's sustainability-related investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

The Investment Adviser also regularly monitored investments in the Fund according to the Fund's sustainable investment methodology. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund. During the reference period, investments became restricted due to issuers experiencing ESG controversies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Calvert Sustainable Emerging Markets Equity Select Fund

Legal entity identifier: 549300VQZN51VK03CV16

Reference period: 01 January 2023 to 31 December 2023

The Fund launched on 11 May 2022

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective: 48.92%**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective: 50.01%**

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that were either: (i) involved in economic activities that addressed global environmental or societal challenges in areas such as environmental sustainability, diversity, equity and inclusion, respect for human rights and valuing human capital, in addition to demonstrating accountable governance and transparent operations; or (ii) leaders in managing environmental or social risks and opportunities, and in each case that were determined to be sustainable investments by the Investment Adviser.

In addition to this primary objective, the Fund maintained a carbon profile lower than the MSCI Emerging Markets index and higher levels of board gender diversity at the portfolio-level than the MSCI Emerging Markets index.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	98.92%
Carbon footprint at least 50% lower than that of the MSCI EM Index. Measured by weighted average carbon intensity, defined as tonnes of CO ₂ per \$1million revenue (excluding Scope 3 emissions) The carbon footprint of the MSCI EM Index was 320.53. Therefore, the carbon footprint threshold 50% lower than that of the MSCI EM Index, and the actual carbon footprint of the Fund were:	160.27	104.60
Higher level of board gender diversity at the portfolio-level than the MSCI Index, measured by average number of women at board level). The gender diversity value of the MSCI EM Index and that of the Fund were:	1.94	2.36
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	98.92%
Exclusions:		
% investee companies involved with:		
Severe ESG controversies without material remediation and improvement	0.00%	0.00%
Controversial weapons	0.00%	0.00%
Civilian firearms	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Gambling	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

During the reference period, some investments became restricted due to corporate actions (such as spin-offs or mergers) creating new securities lacking the data required to confirm adherence to the Fund's ESG characteristics. Until these new securities could be classified with the appropriate characteristics, they were assigned the "Not Sustainable" category, as reflected in the table under the question "What was the asset allocation?".

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	91.65%
Carbon footprint at least 50% lower than that of the MSCI EM Index. Measured by weighted average carbon intensity, defined as tonnes of CO ₂ per \$1million revenue (excluding Scope 3 emissions) The carbon footprint of the MSCI EM Index for 2022 was 326.53. Therefore, the carbon footprint threshold 50% lower than that of the MSCI EM Index, and the actual carbon footprint of the Fund were:	163.27	114.63
Higher level of board gender diversity at the portfolio-level than the MSCI Index, measured by average number of women at board level). The gender diversity value of the MSCI EM Index and that of the Fund were:	1.87	2.25
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	91.69%
Exclusions:		
% investee companies involved with:		
Severe ESG controversies without material remediation and improvement	0.00%	0.00%
Controversial weapons	0.00%	0.00%
Civilian firearms	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Gambling	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limits exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?” below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules and which are relevant to the investment. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

In cases where third party vendor data suggested that an investment was causing significant harm, the Investment Adviser conducted desktop research to better understand and assess potential negative impacts. This independent analysis led to some instances where the Investment Adviser concluded that an issuer was not causing significant harm, taking into account elements such as vendor data timeliness/accuracy, company responses to address issues flagged as potentially harmful, or feedback received through the Investment Adviser’s active engagement activities with the issuer. In such cases, the Investment Adviser proceeded with the investment, the rationale for the determination of harm was documented and the investment was kept under review.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third-party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING CO., LTD.	Information Technology	7.73%	Taiwan
BYD COMPANY LIMITED CLASS H	Consumer Discretionary	2.56%	China
CHINA INTERNATIONAL CAPITAL CORP. LTD. CLASS H	Financials	2.47%	China

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

98.92% of the Fund's investments were sustainable investments.

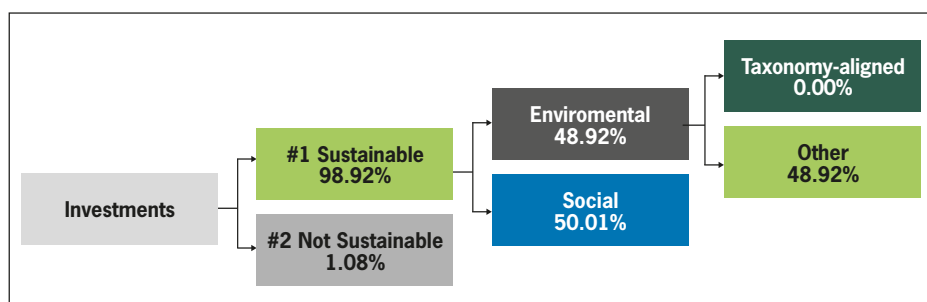

48.92% of the Fund comprised sustainable investments with an environmental objective.

50.01% of the Fund comprised sustainable investments with a social objective.

The Fund's remaining assets were held in cash and hedging instruments, as described below. The remaining assets were also occasionally held in new securities created by corporate actions for which data was not available as of the date of measurement for the proportion of the Fund's sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments assessed the investment's overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may have also made a contribution to environmental or social factors respectively.

The carbon tilt and diversity tilt were both applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have had a higher weighted average carbon intensity and lower weighted average number of women at the board level than the portfolio level average or target).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	25.22%
Information Technology	22.56%
Consumer Discretionary	13.03%
Communication Services	10.87%
Consumer Staples	9.43%
Industrials	4.97%
Health Care	4.69%
Real Estate	4.15%
Materials	2.90%
Utilities	1.11%
Energy	0.00%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	2.42%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captured issuers which derived any revenue from such activities as part of their business. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy given that there is a lack of company-reported data available and a limited number of economic activities currently in scope for the EU Taxonomy regulation. As a result, the Investment Adviser has not reported the EU Taxonomy alignment of the Fund's investments, as such alignment is not an accurate reflection of the investment philosophy of the Fund. The EU Taxonomy eligible revenues – i.e. the revenues that are within scope of the EU Taxonomy regulation but which are not confirmed to be aligned with the regulation's technical screening criteria – were 20.61% for 2023. To produce this analysis, the Fund relies on data from a third party vendor which may be subject to errors, limitations and changes beyond the control of the Investment Adviser.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

48.92% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

50.01% of the Fund's investments were sustainable investments with a social objective.

As noted above some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

1.08% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards. These investments also occasionally included new securities created by corporate actions for which data was not available as of the date of measurement for the proportion of the Fund's sustainability-related investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

The Investment Adviser also regularly monitored investments in the Fund according to the Fund's sustainable investment methodology. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund. During the reference period, investments became restricted due to ineligibility under the Calvert Principles.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The average carbon footprint of the Russell 1000 Index was 116.69		
Therefore, the carbon footprint threshold 50% lower than that of the Russell 1000 Index, and the actual carbon footprint of the Fund were:		
Higher level of board gender diversity at the portfolio-level than the Russell 1000 index, measured by average number of women at board level). The gender diversity value of the Russell 1000 index and that of the Fund were:	3.86	4.24
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	99.40%
Exclusions:		
% investee companies involved with:		
Severe ESG controversies without material remediation and improvement	0.00%	0.00%
Controversial weapons	0.00%	0.00%
Civilian firearms	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Gambling	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

During the reference period, some investments became restricted due to corporate actions (such as spin-offs or mergers) creating new securities lacking the data required to confirm adherence to the Fund's ESG characteristics. Until these new securities could be classified with the appropriate characteristics, they were assigned the "Not Sustainable" category, as reflected in the table under the question "What was the asset allocation?".

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.55%
Carbon footprint at least 50% lower than that of the Russell 1000 Index. Measured by weighted average carbon intensity, defined as tonnes of CO ₂ per \$1million revenue (excluding Scope 3 emissions) The carbon footprint of the Russell 1000 Index was 145.32 Therefore, the carbon footprint threshold 50% lower than that of the Russell 1000 Index, and the actual carbon footprint of the Fund were:	72.66	58.99
Higher level of board gender diversity at the portfolio-level than the Russell 1000 index, measured by average number of women at board level). The gender diversity value of the Russell 1000 index and that of the Fund were:	3.86	4.16
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	99.55%
Exclusions:		
% investee companies involved with:

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limits exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?” below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules and which are relevant to the investment. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

In cases where third party vendor data suggested that an investment was causing significant harm, the Investment Adviser conducted desktop research to better understand and assess potential negative impacts. This independent analysis led to some instances where the Investment Adviser concluded that an issuer was not causing significant harm, taking into account elements such as vendor data timeliness/accuracy, company responses to address issues flagged as potentially harmful, or feedback received through the Investment Adviser’s active engagement activities with the issuer. In such cases, the Investment Adviser proceeded with the investment, the rationale for the determination of harm was documented and the investment was kept under review.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
MICROSOFT CORPORATION	Information Technology	7.80%	United States
APPLE INC.	Information Technology	7.54%	United States
NVIDIA CORPORATION	Information Technology	3.01%	United States
MERCK & CO., INC.	Health Care	2.48%	United States

METLIFE, INC.	Financials	1.16%	United States
AMGEN INC.	Health Care	1.15%	United States

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

99.40% of the Fund’s investments were sustainable investments .

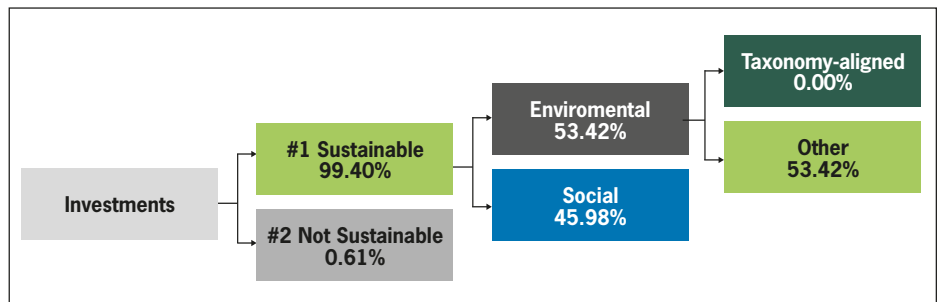

53.42% of the Fund comprised sustainable investments with an environmental objective .

45.98% of the Fund comprised sustainable investments with a social objective .

The Fund’s remaining assets were held in cash and hedging instruments, as described below. The remaining assets were also occasionally held in new securities created by corporate actions for which data was not available as of the date of measurement for the proportion of the Fund’s sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund’s methodology for categorising investments as sustainable investments assessed the investment’s overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may have also made a contribution to environmental or social factors respectively.

The carbon tilt and diversity tilt were both applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have had a higher weighted average carbon intensity and lower weighted average number of women at the board level than the portfolio level average or target).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	31.63%
Financials	15.92%
Health Care	12.64%
Industrials	10.57%
Consumer Discretionary	8.77%
Communication Services	5.08%
Consumer Staples	4.48%
Materials	3.78%
Real Estate	3.75%
Utilities	2.79%
Energy	0.00%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	3.61%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captured issuers which derived any revenue from such activities as part of their business. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy given that there is a lack of company-reported data available and a limited number of economic activities currently in scope for the EU Taxonomy regulation. As a result, the Investment Adviser has not reported the EU Taxonomy alignment of the Fund's investments, as such alignment is not an accurate reflection of the investment philosophy of the Fund. The EU Taxonomy eligible revenues – i.e. the revenues that are within scope of the EU Taxonomy regulation but which are not confirmed to be aligned with the regulation's technical screening criteria – were 13.56% for 2023. To produce this analysis, the Fund relies on data from a third party vendor which may be subject to errors, limitations and changes beyond the control of the Investment Adviser.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

 Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

53.42% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

45.98% of the Fund's investments were sustainable investments with a social objective.

As noted above some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

0.61% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards. These investments also occasionally included new securities created by corporate actions for which data was not available as of the date of measurement for the proportion of the Fund's sustainability-related investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

The Investment Adviser also regularly monitored investments in the Fund according to the Fund's sustainable investment methodology.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Counterpoint Global Fund

Legal entity identifier: 549300J08YVX2S8XG475

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Adviser:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
CLOUDFLARE INC	Information Technology	9.37%	United States
SNOWFLAKE INC	Information Technology	3.48%	United States
GLOBAL-E ONLINE LTD	Consumer Discretionary	3.04%	Israel
TESLA INC	Consumer Discretionary	3.01%	United States
UBER TECHNOLOGIES INC	Industrials	2.85%	United States
SHOPIFY INC	Information Technology	2.58%	Canada
ROYALTY PHARMA PLC	Health Care	2.40%	United States
MERCADOLIBRE INC	Consumer Discretionary	2.08%	United States
BILL HOLDINGS INC	Information Technology	2.03%	United States
FLOOR & DECOR HOLDINGS INC	Consumer Discretionary	2.01%	United States
ADYEN NV	Financials	2.00%	Netherlands
TRADE DESK INC/THE	Communication Services	1.93%	United States
DOORDASH INC	Consumer Discretionary	1.92%	United States
CARVANA CO	Consumer Discretionary	1.78%	United States
VICTORIA PLC	Consumer Discretionary	1.73%	United Kingdom

% Assets are calculated based on the average of the fund’s investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

92.10% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	28.13%
Consumer Discretionary	27.27%
Financials	9.19%
Health Care	9.10%
Industrials	8.10%
Communication Services	7.48%
Consumer Staples	1.48%
Materials	0.77%
Real Estate	0.32%
Energy	0.17%
Utilities	0.09%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.95%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

7.90% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilized its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organizing framework helped the investment team categorize and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Developing Opportunity Fund**

Legal entity identifier: **549300LLOEXEQPRYTK93**

Reference period: **01 January 2023 to 31 December 2023**

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Thermal coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, were screened against the Fund’s Restriction Screening Policy. During the reference period, 0% of the Fund’s investments were in violation of the Fund’s Restriction Screening Policy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Thermal coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, were screened against the Fund's Restriction Screening Policy. During the reference period, 0% of the Fund's investments were in violation of the Fund's Restriction Screening Policy.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (“PAI”) on sustainability factors only in part, as follows:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers which are involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly consider the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor (a) integrating ESG analysis within the research process and/or (b) engaging with management of investee companies. The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (2): Carbon footprint;
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

As a result, the Fund contributed to mitigating the Fund’s adverse impacts on these sustainability factors.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
MERCADOLIBRE INC	Consumer Discretionary	8.42%	United States
HDFC BANK LTD	Financials	7.42%	India
COUPANG INC	Consumer Discretionary	5.66%	South Korea
ICICI BANK LTD	Financials	5.56%	India
MEITUAN	Consumer Discretionary	4.49%	China
TRIP.COM GROUP LTD	Consumer Discretionary	4.27%	China
TAIWAN SEMICONDUCTOR MANUFACTURING CO LT	Information Technology	3.91%	Taiwan
KWEICHOW MOUTAI CO LTD	Consumer Staples	3.68%	China
NU HOLDINGS LTD/CAYMAN ISLANDS	Financials	3.60%	Brazil
KE HOLDINGS INC	Real Estate	3.60%	China

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

What was the proportion of sustainability-related investments?

97.08% of the Fund's investments attained the promoted environmental or social characteristics during the reference period through the application of environmental and social exclusions. The remainder of the investments during the reference period were investments in cash and/or derivatives held for efficient portfolio management purposes, and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

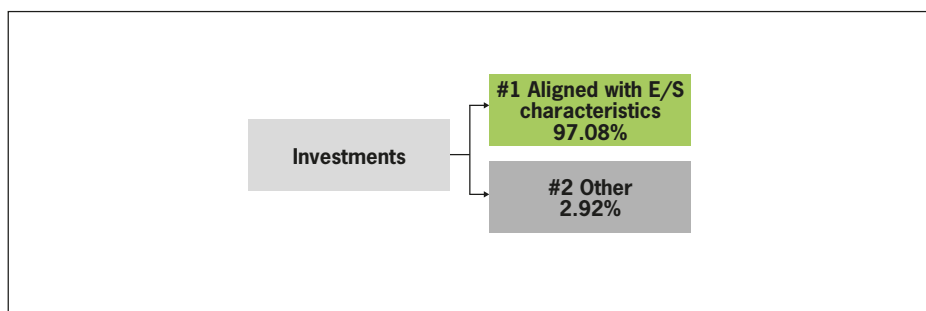

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	32.16%
Financials	27.23%
Communication Services	9.50%
Information Technology	8.54%
Consumer Staples	7.93%
Real Estate	4.73%
Industrials	4.69%
Materials	1.72%
Health Care	0.57%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	1.14%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and derivative instruments held for efficient portfolio management purposes.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.92% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised cash and/or derivatives held for efficient portfolio management purposes and they were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies’ management on topics specific to each business with a focus on material ESG risks and opportunities that may impact the value of a company’s securities. As part of a company quality assessment, the Investment Adviser has also analysed potential impacts to humanity’s health, environment, liberty and productivity and corporate governance practices to ensure agency, culture and trust within investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Leaders Equity Fund

Legal entity identifier: 549300RVZ11RNS16PV05

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, firstly, the Fund promoted the environmental characteristic of contributing towards climate change mitigation by seeking to achieve a lower carbon footprint than the MSCI Emerging Markets (Net) Index in aggregate at the portfolio level.

Secondly, the Fund avoided investments in certain industries with the potential to cause harm to the environment and to human health and wellbeing, such as tobacco and weapons, by applying binding exclusions. Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions:		
Sector-based exclusions:		
% of the Fund’s exposure to issuers involved in the manufacturing or production of which derive revenue from:	0.00%	0.00%
Tobacco (directly manufacture or >5% revenue)	0.00%	0.00%
Adult entertainment (directly produce or own a majority stake (>50%))	0.00%	0.00%
Manufacture of civilian firearms	0.00%	0.00%
Controversial Weapons (manufacture, or are a majority owner, or majority owned by)	0.00%	0.00%
Fossil fuels ¹ (>10% revenue)	0.00%	0.00%
Coal (>10% revenue from mining and extraction of thermal coal, or >10% revenue from coal-fired power)	0.00%	0.00%
Oil Sands (>5% revenue from extraction or production)	0.00%	0.00%
Arctic oil and gas ¹ (>5% revenue from oil extraction or production in the Arctic region)	0.00%	0.00%
Gambling (>5% revenue)		
Lower Carbon Footprint:		
Carbon Footprint lower than that of the MSCI Emerging Markets (Net) Index. Measured by weighted average carbon intensity, Scope 1 and 2 emissions. The carbon footprint of the index and that of the Fund were:	323.00	106.28
Reference universe reduction:		
The Investment Adviser aimed for a certain % reduction of the reference universe by the binding exclusions described above [and additional issuers based on indicators such as MSCI ESG ratings/scores or consideration of certain GICS sectors. The target % universe reduction, and the actual % universe reduction caused by the exclusions were:	20.00%	22.75%*

* Calculated based on the number of stocks in MSCI EM Index.

¹ The fossil fuel and Arctic gas exclusions were added on 8 November.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered some of the principal adverse impacts (“PAI”) on sustainability factors through the Fund’s exclusionary criteria as follows:

- The Fund excluded issuers whose core business is in fossil fuels, thermal coal mining and extraction and thermal coal power generation. The Fund therefore considered PAI indicator number 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derive any revenue from controversial weapons manufacturing or retail. The Fund therefore considered PAI indicator number 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
MERCADOLIBRE INC	Consumer Discretionary	6.75%	United States
SHENZHOU INTERNATIONAL GROUP HOLDINGS LT	Consumer Discretionary	6.28%	China
BAJAJ FINANCE LTD	Financials	5.75%	India
NU HOLDINGS LTD/CAYMAN ISLANDS	Financials	5.69%	Brazil
LOBANT SA	Information Technology	5.44%	Argentina
AU SMALL FINANCE BANK LTD	Financials	5.13%	India

The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

3.32% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. This is comprised of cash held for ancillary liquidity, which were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the promoted environmental and social characteristics were met through the application of exclusions and maintaining a lower carbon footprint than the index at the portfolio level. To ensure the attainment of these promoted environmental and social characteristics, automated tools/screens and portfolio surveillance tools were used by the Portfolio Surveillance team. In addition, the Investment Adviser performed periodic manual desk reviews to ensure compliance.

In evaluating environmental and social risks, the Investment Adviser also engaged with companies on issues most relevant to their businesses. For example, the Investment Adviser engaged companies on their use of carbon and renewable energy, and their decarbonization plans. The investment team also discussed social issues around a company's labor force, community, supply chain and diversity at the management level.

The Investment Adviser also continued to push for enhanced transparency and disclosure on issues relating to applicable sustainability metrics. In particular, the Investment Adviser engaged with companies on board composition, especially independence and gender diversity. Boards need to have a range of skills, opinions and experiences for optimal decision making and shareholder representation. Specifically, gender diversity acts as a proxy for stakeholders to evaluate whether the vetting and decision-making process on the board is thorough. When there is a lack of diversity represented at the board or management level, this can act as a red flag. The Investment Adviser also engaged with management on linking executive compensation to environmental, social and governance goals. In many cases, the first step of these conversations is merely obtaining of the data, as complex subsidiary structures within emerging markets can make this particularly hard to determine.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Europe Opportunity Fund

Legal entity identifier: 54930039WYT5E8WI3793

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Thermal coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, were screened against the Fund’s Restriction Screening Policy. During the reference period, 0% of the Fund’s investments were in violation of the Fund’s Restriction Screening Policy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Thermal coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, were screened against the Fund's Restriction Screening Policy. During the reference period, 0% of the Fund's investments were in violation of the Fund's Restriction Screening Policy.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (“PAI”) on sustainability factors only in part, as follows:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers which are involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly consider the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor (a) integrating ESG analysis within the research process and/or (b) engaging with management of investee companies. The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (2): Carbon footprint;
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

As a result, the Fund contributed to mitigating the Fund’s adverse impacts on these sustainability factors.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
DSV A/S	Industrials	8.93%	Denmark
MONCLER SPA	Consumer Discretionary	8.37%	Italy
HERMES INTERNATIONAL SCA	Consumer Discretionary	8.21%	France
SPOTIFY TECHNOLOGY SA	Communication Services	6.95%	United States
EVOLUTION AB	Consumer Discretionary	5.45%	Sweden
STRAUMANN HOLDING AG	Health Care	4.90%	Switzerland
ASML HOLDING NV	Information Technology	4.67%	Netherlands
KUEHNE + NAGEL INTERNATIONAL AG	Industrials	4.63%	Switzerland

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

What was the proportion of sustainability-related investments?

94.65% of the Fund's investments attained the promoted environmental or social characteristics during the reference period through the application of environmental and social exclusions. The remainder of the investments during the reference period were investments in cash and/or derivatives held for efficient portfolio management purposes, and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

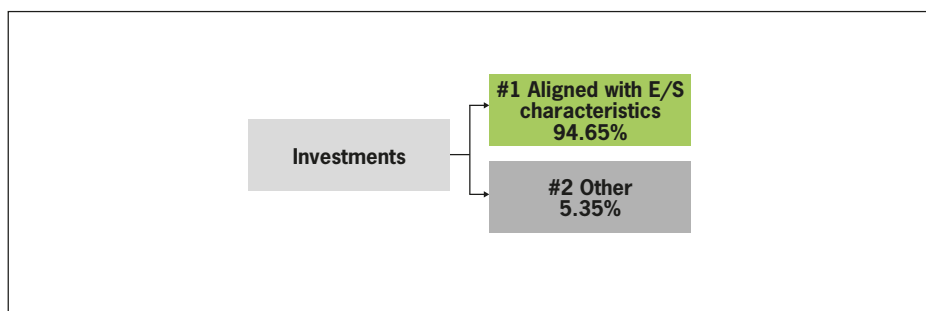

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	34.64%
Consumer Staples	18.65%
Industrials	14.99%
Communication Services	9.71%
Health Care	6.90%
Financials	5.09%
Information Technology	4.67%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and derivative instruments held for efficient portfolio management purposes.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

5.35% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised cash and/or derivatives held for efficient portfolio management purposes and they were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies’ management on topics specific to each business with a focus on material ESG risks and opportunities that may impact the value of a company’s securities. As part of a company quality assessment, the Investment Adviser has also analysed potential impacts to humanity’s health, environment, liberty and productivity and corporate governance practices to ensure agency, culture and trust within investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: European Property Fund

Legal entity identifier: TE6MWN7B3THSZYQWH072

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund met its social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing or be damaging to social cohesion. The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies that do not have at least one female board member (from 26 July 2023)	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under “How did the sustainability indicators perform?” above, the Fund did not knowingly invest in companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
SEGRO PLC	Industrial	8.71%	United Kingdom
VONOVIA SE	Residential	8.06%	Germany
GECINA SA	Office	4.99%	France
PSP SWISS PROPERTY AG	Diversified	4.71%	Switzerland
CARMILA SA	Retail	4.41%	France
LEG IMMOBILIEN SE	Residential	4.11%	Germany
UNITE GROUP PLC/THE	Residential	4.11%	United Kingdom
KLEPIERRE SA	Retail	4.11%	France
MERLIN PROPERTIES SOCIMI SA	Diversified	3.94%	Spain
AEDIFICA SA	Healthcare	3.69%	Belgium
CATENA AB	Industrial	3.49%	Sweden

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

98.72% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were in cash instruments which did not align with the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Residential	19.26%
Industrial	17.23%
Diversified	15.32%
Retail	14.37%
Office	14.22%
Industrial/Office Mixed	7.33%
Healthcare	5.36%
Self Storage	3.33%
Lodging/Resorts	2.30%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.28% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments which were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, to help manage ESG-related risks and opportunities, the Investment Adviser conducted engagements with select portfolio companies and prioritized active dialogue where positions were significant and/or issues were viewed as material. The Investment Adviser’s constructive dialogue sought to drive positive change, improve sustainability and enhance long-term value creation. As part of this ESG engagement, the Investment Adviser assessed how the company’s ESG risks and initiatives contributed to operating performance, and through conversation evaluated a range of environmental, social and governance topics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Brands Equity Income Fund

Legal entity identifier: 549300NOAL4YUQM4WM15

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.03% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in: (i) companies with any tie to fossil fuels; and (ii) companies in certain other energy intensive sectors. For the avoidance of any doubt, the Fund does not seek to make investments that contribute to climate change mitigation within the meaning of the EU Taxonomy.

In addition, the Fund considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involves weapons or civilian firearms; and (ii) that have any tie to controversial weapons.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests, which included evaluating investee companies' (each, a "Company", together the "Companies") net positive alignment with the UN Sustainable Development Goals (SDGs).

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Environmental Characteristics Exclusions		
Exclusions:		
% of the Fund invested in companies which:		
Have any tie to fossil fuels	0.00%	0.00%
Have been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), or metals and mining	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
Civilian firearms (>10% revenue)	0.00%	0.00%
Weapons (>10% revenue)	0.00%	0.00%
% of the Fund invested in companies which have any tie to controversial weapons	0.00%	0.00%
Sustainable Investments:		
% of the Fund invested in companies classified as sustainable investments	10.00%	68.03%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The positive contribution to environmental or social objectives test applied by the Investment Adviser sought to ensure that Companies classified as sustainable investments were classified based on their net positive alignment with the UN SDGs (which was primarily determined using alignment scores obtained from third party data providers). The UN SDGs include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The third party data providers' alignment scores indicate whether companies in the providers' coverage universe had a net positive alignment across the UN SDGs, either through their products and services (e.g. a health care company's essential medical products may be positively aligned with the Good Health and Well-Being SDG), or through business practices such as policies, actions and targets aimed at alignment with one or more of the SDGs (e.g. a company with robust carbon reduction plans may align with the Climate Action SDG by reducing its own emissions, switching to renewable energy or by seeking emission reductions in its value chain by engaging with suppliers and/or through product design).

The Investment Adviser classified a Company as having positive contribution to an environmental or social objective as simultaneously meeting three criteria assessed using third-party data: 1) having a net positive aggregate alignment score across all the SDGs (i.e. scores measuring positive alignment to individual SDGs have to, in total, be greater than the total of any negative alignment scores in the Investment Adviser's view), 2) having sufficient positive alignment (in the Investment Adviser's view) with at least one individual SDG and 3) not having any material mis-alignments on any of the SDGs (in the Investment Adviser's view).

In limited cases, and where it was satisfied that it was appropriate to do so based on its internal analysis (having regard to its engagements with the company or other data sources), the Investment Adviser treated an investment as passing its sustainable investment criteria, contrary to the position indicated by the third-party SDG alignment score. The Investment Adviser did this when, for example, it considered the third-party SDG alignment data to be out of date or incorrect based on the Investment Adviser's own engagement efforts or research.

More information on the UN SDGs can be found at: <https://www.undp.org/sustainable-development-goals>. The Investment Adviser recognises that the UN SDGs were written by Governments for Governments and therefore data that seeks to align corporate actions to the SDGs will not be perfectly representative.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The do no significant harm (“DNSH”) test applied by the Investment Adviser sought to ensure Companies classified as sustainable investments did not cause significant harm to any of the mandatory, SFDR-defined principal adverse impact (“PAI”) indicators which were relevant to the Company. This test also sought to ensure that Companies classified as sustainable investments are aligned with the minimum social safeguards including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund gained data to assess the relevant PAI indicators from third-party providers as well as internal research.

To determine whether significant harm was caused, initial thresholds for each of the relevant mandatory PAI indicators were set.

Where data was not available, the investment was deemed to fail the initial test and was not regarded as a sustainable investment.

However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the issuer, and therefore did not provide data on that PAI indicator, the investment was deemed to pass the initial test on the basis that the investment’s activities are unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

Additionally, in certain instances, the outcome of the initial test was supplemented (as appropriate) by the Investment Adviser’s internal qualitative assessments on significant harm (having regard to other data sources and/or its engagements with the investment) on one or more PAIs.

As part of its long-term investment approach, the investment team also sought to engage with company management teams and boards to encourage companies towards better ESG practices and to minimise or mitigate the principle adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considered a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of the Investment Adviser's DNSH test, Companies were not classified as sustainable investments if they failed to comply with the themes and values promoted by the OECD Guidelines for Multinational Enterprises or the UN Global Compact, or if they lack processes and compliance mechanisms to monitor compliance with the themes and values promoted by these global norms.

In each case, this assessment was based on information obtained from third-party data providers and/or internal assessments.

The Investment Adviser used the OECD Guidelines for Multinational Enterprises and the UN Global Compact as reasonable proxies.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

All the relevant mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund's investments as sustainable investments.

PAIs were also considered with respect to the other investments of the Fund in the following manner:

- the environmental and social characteristics promoted by the Fund incorporate consideration of the following PAIs through binding exclusions:
- PAI indicator (4): Exposure to companies active in the fossil fuel sector;
- PAI indicator (14): Exposure to controversial weapons (using third-party data with a methodology that complies with the SFDR definition);
- engagement and stewardship with issuers across all relevant mandatory PAI indicators in the SFDR rules (except on controversial weapons as they are excluded) on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	8.09%	United States
PHILIP MORRIS INTERNATIONAL INC	Consumer Staples	6.54%	United States
SAP SE	Information Technology	5.80%	Germany
ACCENTURE PLC	Information Technology	5.58%	United States
VISA INC	Financials	5.51%	United States
RECKITT BENCKISER GROUP PLC	Consumer Staples	5.35%	United Kingdom
DANAHER CORP	Health Care	4.61%	United States
THERMO FISHER SCIENTIFIC INC	Health Care	4.49%	United States
INTERCONTINENTAL EXCHANGE INC	Financials	3.98%	United States
BECTON DICKINSON & CO	Health Care	3.61%	United States

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

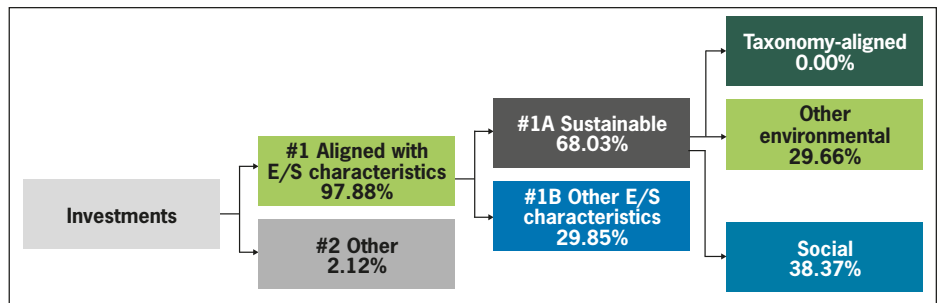

What was the proportion of sustainability-related investments?

97.88% of the Fund’s investments were aligned with the environmental and social characteristics of the Fund.

68.03% of the Fund’s assets were invested in Companies classified as sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

From 26 July 2023 the approach to measuring sustainable investments was updated to specify whether a company classified as a sustainable investment was contributing to an environmental or social objective. Prior to this, the proportion of sustainable investments was divided equally between environmental and social objectives solely for SFDR reporting purposes.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Consumer Staples	24.30%
Information Technology	23.81%
Health Care	18.60%
Financials	15.60%
Industrials	12.50%
Consumer Discretionary	2.79%
Communication Services	0.27%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes “other” assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to invest a minimum portion of its assets in Companies classified as sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's assets invested in Companies classified as sustainable investments have been assessed by the Investment Adviser as aligned with the environmentally sustainable economic activities under the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

29.66% of the Fund's assets were invested in Companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned.

What was the share of socially sustainable investments?

38.37% of the Fund's assets were invested in Companies classified as sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.12% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and money market instruments for ancillary liquidity as well as profits or losses through the swaps to options on equity indices. They were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns. The investment process is focused on understanding the long-term viability of a company's returns on operating capital and engagement with management plays a vital role in this. It informs the Investment Adviser whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies and boards on financially material ESG risks and opportunities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Brands Fund

Legal entity identifier: ZGTXPGVP03JQIVJJ255

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.03% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in: (i) companies with any tie to fossil fuels; and (ii) companies in certain other energy intensive sectors. For the avoidance of any doubt, the Fund does not seek to make investments that contribute to climate change mitigation within the meaning of the EU Taxonomy.

In addition, the Fund considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involves weapons or civilian firearms; and (ii) that have any tie to controversial weapons.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests, which included evaluating investee companies' (each, a "Company", together the "Companies") net positive alignment with the UN Sustainable Development Goals (SDGs).

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Environmental Characteristics		
Exclusions:		
% of the Fund invested in companies which:		
Have any tie to fossil fuels	0.00%	0.00%
Have been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), or metals and mining	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The positive contribution to environmental or social objectives test applied by the Investment Adviser sought to ensure that Companies classified as sustainable investments were classified based on their net positive alignment with the UN SDGs (which was primarily determined using alignment scores obtained from third party data providers). The UN SDGs include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The third party data providers' alignment scores indicate whether companies in the providers' coverage universe had a net positive alignment across the UN SDGs, either through their products and services (e.g. a health care company's essential medical products may be positively aligned with the Good Health and Well-Being SDG), or through business practices such as policies, actions and targets aimed at alignment with one or more of the SDGs (e.g. a company with robust carbon reduction plans may align with the Climate Action SDG by reducing its own emissions, switching to renewable energy or by seeking emission reductions in its value chain by engaging with suppliers and/or through product design).

The Investment Adviser classified a Company as having positive contribution to an environmental or social objective as simultaneously meeting three criteria assessed using third-party data: 1) having a net positive aggregate alignment score across all the SDGs (i.e. scores measuring positive alignment to individual SDGs have to, in total, be greater than the total of any negative alignment scores in the Investment Adviser's view), 2) having sufficient positive alignment (in the Investment Adviser's view) with at least one individual SDG and 3) not having any material mis-alignments on any of the SDGs (in the Investment Adviser's view).

In limited cases, and where it was satisfied that it was appropriate to do so based on its internal analysis (having regard to its engagements with the company or other data sources), the Investment Adviser treated an investment as passing its sustainable investment criteria, contrary to the position indicated by the third-party SDG alignment score. The Investment Adviser did this when, for example, it considered the third-party SDG alignment data to be out of date or incorrect based on the Investment Adviser's own engagement efforts or research.

More information on the UN SDGs can be found at: <https://www.undp.org/sustainable-development-goals>. The Investment Adviser recognises that the UN SDGs were written by Governments for Governments and therefore data that seeks to align corporate actions to the SDGs will not be perfectly representative.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The do no significant harm (“DNSH”) test applied by the Investment Adviser sought to ensure Companies classified as sustainable investments did not cause significant harm to any of the mandatory, SFDR-defined principal adverse impact (“PAI”) indicators which were relevant to the Company. This test also sought to ensure that Companies classified as sustainable investments are aligned with the minimum social safeguards including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund gained data to assess the relevant PAI indicators from third-party providers as well as internal research.

To determine whether significant harm was caused, initial thresholds for each of the relevant mandatory PAI indicators were set.

Where data was not available, the investment was deemed to fail the initial test and was not regarded as a sustainable investment.

However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the issuer, and therefore did not provide data on that PAI indicator, the investment was deemed to pass the initial test on the basis that the investment’s activities are unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

Additionally, in certain instances, the outcome of the initial test was supplemented (as appropriate) by the Investment Adviser’s internal qualitative assessments on significant harm (having regard to other data sources and/or its engagements with the investment) on one or more PAIs.

As part of its long-term investment approach, the investment team also sought to engage with company management teams and boards to encourage companies towards better ESG practices and to minimise or mitigate the principle adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considered a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of the Investment Adviser's DNSH test, Companies were not classified as sustainable investments if they failed to comply with the themes and values promoted by the OECD Guidelines for Multinational Enterprises or the UN Global Compact, or if they lack processes and compliance mechanisms to monitor compliance with the themes and values promoted by these global norms.

In each case, this assessment was based on information obtained from third-party data providers and/or internal assessments.

The Investment Adviser used the OECD Guidelines for Multinational Enterprises and the UN Global Compact as reasonable proxies.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

All the relevant mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund's investments as sustainable investments.

PAIs were also considered with respect to the other investments of the Fund in the following manner:

- the environmental and social characteristics promoted by the Fund incorporate consideration of the following PAIs through binding exclusions:
- PAI indicator (4): Exposure to companies active in the fossil fuel sector;
- PAI indicator (14): Exposure to controversial weapons (using third-party data with a methodology that complies with the SFDR definition);
- engagement and stewardship with issuers across all relevant mandatory PAI indicators in the SFDR rules (except on controversial weapons as they are excluded) on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	8.09%	United States
PHILIP MORRIS INTERNATIONAL INC	Consumer Staples	6.53%	United States
SAP SE	Information Technology	5.79%	Germany
ACCENTURE PLC	Information Technology	5.57%	United States

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

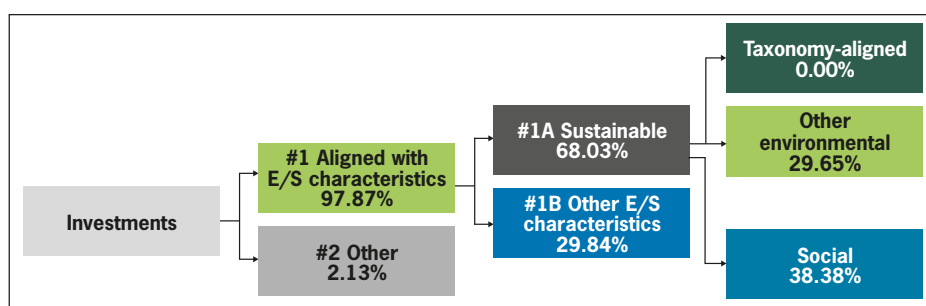

What was the proportion of sustainability-related investments?

97.87% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

68.03% of the Fund's assets were invested in Companies classified as sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

From 26 July 2023 the approach to measuring sustainable investments was updated to specify whether a company classified as a sustainable investment was contributing to an environmental or social objective. Prior to this, the proportion of sustainable investments was divided equally between environmental and social objectives solely for SFDR reporting purposes.

Appendix 9: Sustainable Finance Disclosure (unaudited)

Communication Services	0.27%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes “other” assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to invest a minimum portion of its assets in Companies classified as sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's assets invested in Companies classified as sustainable investments have been assessed by the Investment Adviser as aligned with the environmentally sustainable economic activities under the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

29.65% of the Fund's assets were invested in Companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned.

What was the share of socially sustainable investments?

38.38% of the Fund's assets were invested in Companies classified as sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.13% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and money market instruments for ancillary liquidity as well as profits or losses through the swaps to options on equity indices. They were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns. The investment process is focused on understanding the long-term viability of a company's returns on operating capital and engagement with management plays a vital role in this. It informs the Investment Adviser whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies and boards on financially material ESG risks and opportunities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Endurance Fund

Legal entity identifier: 549300M2W4IZFV5OHT61

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Adviser:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
VICTORIA PLC	Consumer Discretionary	7.81%	United States
CRICUT INC	Consumer Discretionary	7.18%	United States
APIIAN CORP	Information Technology	6.26%	United States
FLOOR & DECOR HOLDINGS INC	Consumer Discretionary	5.77%	United States
FASTLY INC	Information Technology	5.34%	United States
CARVANA CO	Consumer Discretionary	4.95%	United States
HUBSPOT INC	Information Technology	4.25%	United States
GLOBAL-E ONLINE LTD	Consumer Discretionary	4.24%	Israel
BILL HOLDINGS INC	Information Technology	3.77%	United States
BABCOCK INTERNATIONAL GROUP PLC	Industrials	3.75%	United Kingdom

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

What was the proportion of sustainability-related investments?

98.23% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

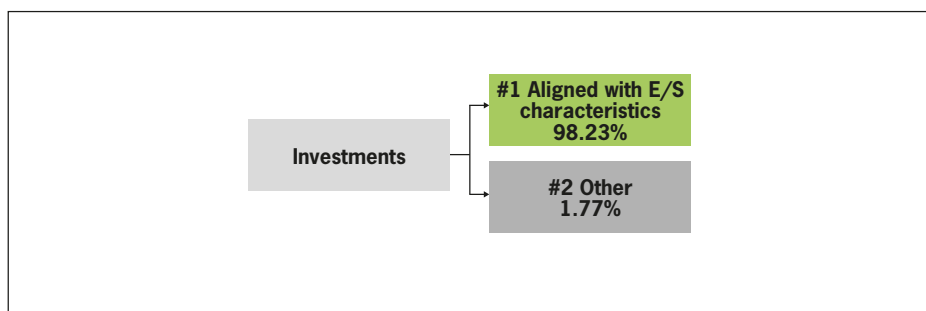

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	40.07%
Information Technology	24.18%
Health Care	10.06%
Communication Services	6.67%
Financials	5.48%
Industrials	5.40%
Consumer Staples	4.68%
Materials	1.05%
Energy	0.49%
Real Estate	0.15%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	1.85%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.77% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilized its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organizing framework helped the investment team categorize and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Focus Property Fund

Legal entity identifier: 549300RK04JPURNNL036

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund met its social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing or be damaging to social cohesion. The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies that do not have at least one female board member, excluding companies located in Japan (from 26 July 2023)	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under “How did the sustainability indicators perform?” above, the Fund did not knowingly invest in companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
PROLOGIS INC	Industrial	7.88%	United States
AMERICAN TOWER CORP	Infrastructure Reits	6.58%	United States
WELLTOWER INC	Healthcare	5.98%	United States
EQUINIX INC	Data Centers	5.56%	United States
PUBLIC STORAGE	Self Storage	4.33%	United States
AVALONBAY COMMUNITIES INC	Residential	3.55%	United States
MITSUI FUDOSAN CO LTD	Diversified	3.25%	Japan
SIMON PROPERTY GROUP INC	Retail	3.21%	United States
DIGITAL REALTY TRUST INC	Data Centers	3.19%	United States
AMERICAN HOMES 4 RENT	Residential	3.03%	United States
VICI PROPERTIES INC	Specialty	2.85%	United States
REALTY INCOME CORP	Retail	2.75%	United States

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

What was the proportion of sustainability-related investments?

99.06% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were in cash instruments which did not align with the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation (“SFDR”).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Industrial	15.29%
Residential	13.82%
Retail	12.77%
Diversified	12.61%
Data Centers	8.75%
Healthcare	8.34%
Infrastructure REITs	8.24%
Self Storage	7.34%
Specialty	4.43%
Lodging/Resorts	3.65%
Office	1.58%
Industrial/Office Mixed	1.48%
Timberland REITs	0.76%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.40%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope than the coal mining exclusion applied as a binding characteristic to the Fund. This exposure relates to a single issuer deriving approximately 1% of revenue from fossil fuel related activities.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.94% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments which were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, to help manage ESG-related risks and opportunities, the Investment Adviser conducted engagements with select portfolio companies and prioritized active dialogue where positions were significant and/or issues were viewed as material. The Investment Adviser’s constructive dialogue sought to drive positive change, improve sustainability and enhance long-term value creation. As part of this ESG engagement, the Investment Adviser assessed how the company’s ESG risks and initiatives contributed to operating performance, and through conversation evaluated a range of environmental, social and governance topics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Infrastructure Fund

Legal entity identifier: 549300FWCN1WWNKTBN70

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund met its social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing or be damaging to social cohesion. The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning or operating gambling activity; and	0.00%	0.00%
Owning or operating adult entertainment	0.00%	0.00%
% Fund exposure to investee companies that do not have at least one female board member (from 26 July 2023)	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning or operating gambling activity; and	0.00%	0.00%
Owing or operating adult entertainment	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under “How did the sustainability indicators perform?” above, the Fund did not knowingly invest in companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
GFL ENVIRONMENTAL INC	Industrials	7.10%	Canada
CHINA GAS HOLDINGS LTD	Utilities	5.95%	China
AMERICAN TOWER CORP	Real Estate	5.60%	United States
NATIONAL GRID PLC	Utilities	4.65%	United Kingdom
VINCI SA	Industrials	4.64%	France
ENBRIDGE INC	Energy	4.18%	Canada
SEMPRA ENERGY	Utilities	4.06%	United States
INFRASTRUTTURE WIRELESS ITALIA	Communication Services	4.01%	Italy
EXELON CORP	Utilities	3.04%	United States
CHENIERE ENERGY INC	Energy	3.03%	United States
PEMBINA PIPELINE CORP	Energy	2.83%	Canada
TRANSURBAN GROUP	Industrials	2.64%	Australia

% Assets are calculated based on the average of the Fund's investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

98.68% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were in cash instruments, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Utilities	39.41%
Industrials	22.74%
Energy	20.28%
Real Estate	9.90%
Communication Services	6.36%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	53.67%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.32% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised of cash instruments, and were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, in order to manage ESG-related risks and opportunities, the Investment Adviser generally engaged with company management at regular intervals, including engaging in active dialogues where the Fund held significant positions in a company and issues were viewed as material. The Investment Adviser’s constructive dialogue sought to drive positive change, improve sustainability and enhance long-term value creation. As part of this ESG engagement, the Investment Adviser assessed how the company’s ESG risks and initiatives contributed to operating performance, and through conversation evaluated a range of environmental, social and governance topics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Insight Fund

Legal entity identifier: 549300HWFDYTO3S36V14

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Adviser:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
CLOUDFLARE INC	Information Technology	7.37%	United States
SHOPIFY INC	Information Technology	6.30%	Canada
MERCADOLIBRE INC	Consumer Discretionary	6.07%	United States
ADYEN NV	Financials	5.91%	Netherlands
GLOBAL-E ONLINE LTD	Consumer Discretionary	5.48%	Israel
TRADE DESK INC/THE	Communication Services	5.19%	United States
UBER TECHNOLOGIES INC	Industrials	5.09%	United States
SNOWFLAKE INC	Information Technology	4.68%	United States
GRAB HOLDINGS LTD	Industrials	4.56%	Singapore

% Assets are calculated based on the average of the fund’s investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

95.03% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	27.68%
Information Technology	24.87%
Health Care	12.02%
Financials	10.30%
Communication Services	10.18%
Industrials	9.65%
Materials	0.32%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.77% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilized its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organizing framework helped the investment team categorize and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Opportunity Fund

Legal entity identifier: 5493000BFE8KBAX1S309

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Thermal coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, were screened against the Fund’s Restriction Screening Policy. During the reference period, 0% of the Fund’s investments were in violation of the Fund’s Restriction Screening Policy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Thermal coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, were screened against the Fund's Restriction Screening Policy. During the reference period, 0% of the Fund's investments were in violation of the Fund's Restriction Screening Policy.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (“PAI”) on sustainability factors only in part, as follows:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers which are involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly consider the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor (a) integrating ESG analysis within the research process and/or (b) engaging with management of investee companies. The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (2): Carbon footprint;
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

As a result, the Fund contributed to mitigating the Fund’s adverse impacts on these sustainability factors.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
UBER TECHNOLOGIES INC	Industrials	8.98%	United States
SERVICENOW INC	Information Technology	7.30%	United States
DSV A/S	Industrials	5.96%	Denmark
HDFC BANK LTD	Financials	5.79%	India
MERCADOLIBRE INC	Consumer Discretionary	5.53%	United States
META PLATFORMS INC	Communication Services	4.94%	United States
SHOPIFY INC	Information Technology	4.37%	Canada
ADOBE INC	Information Technology	4.06%	United States
AMAZON.COM INC	Consumer Discretionary	3.97%	United States
MONCLER SPA	Consumer Discretionary	3.89%	Italy

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

What was the proportion of sustainability-related investments?

97.69% of the Fund's investments attained the promoted environmental or social characteristics during the reference period through the application of environmental and social exclusions. The remainder of the investments during the reference period were investments in cash and/or derivatives held for efficient portfolio management purposes, and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

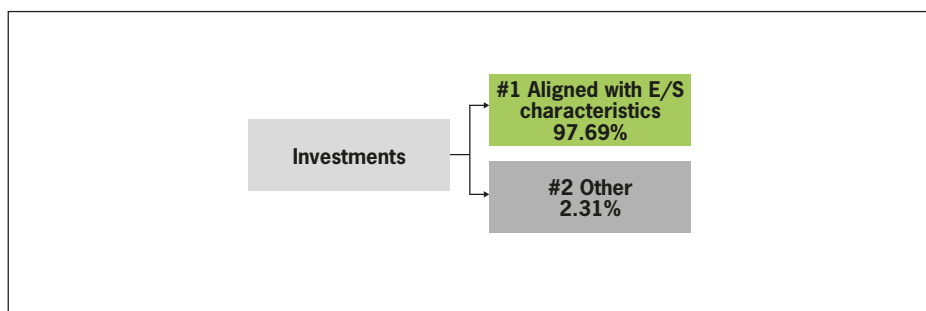

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	27.95%
Information Technology	22.27%
Financials	17.72%
Industrials	16.42%
Communication Services	13.33%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and derivative instruments held for efficient portfolio management purposes.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.31% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised cash and/or derivatives held for efficient portfolio management purposes and they were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies’ management on topics specific to each business with a focus on material ESG risks and opportunities that may impact the value of a company’s securities. As part of a company quality assessment, the Investment Adviser has also analysed potential impacts to humanity’s health, environment, liberty and productivity and corporate governance practices to ensure agency, culture and trust within investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Permanence Fund

Legal entity identifier: 549300BNIZDA1BSKNE57

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: ___%**
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective: ___%**

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
CLOUDFLARE INC	Information Technology	8.21%	United States
ROYALTY PHARMA PLC	Health Care	6.32%	United States
AMAZON.COM INC	Consumer Discretionary	5.91%	United States
RENTOKIL INITIAL PLC	Industrials	5.19%	United Kingdom
EUROFINS SCIENTIFIC SE	Health Care	5.03%	France
INTERCONTINENTAL EXCHANGE INC	Financials	4.77%	United States
TOPICUS.COM INC	Information Technology	4.39%	Canada
CONSTELLATION SOFTWARE INC/CANADA	Information Technology	4.39%	Canada
VICTORIA PLC	Consumer Discretionary	4.31%	United Kingdom
FLOOR & DECOR HOLDINGS INC	Consumer Discretionary	4.24%	United States

% Assets are calculated based on the average of the fund’s investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

98.03% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	23.61%
Consumer Discretionary	20.65%
Health Care	17.09%
Industrials	14.37%
Financials	10.91%
Consumer Staples	3.18%
Materials	3.10%
Communication Services	2.81%
Real Estate	1.36%
Energy	0.95%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	4.43%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

98.03% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Property Fund

Legal entity identifier: XBU1PE3KMQXHFSDLPA33

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund met its social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing or be damaging to social cohesion. The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies that do not have at least one female board member, excluding companies located in Japan (from 26 July 2023)	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under “How did the sustainability indicators perform?” above, the Fund did not knowingly invest in companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
PROLOGIS INC	Industrial	8.28%	United States
EQUINIX INC	Data Centers	5.47%	United States
WELLTOWER INC	Healthcare	5.37%	United States
PUBLIC STORAGE	Self Storage	3.87%	United States
AVALONBAY COMMUNITIES INC	Residential	3.70%	United States
SIMON PROPERTY GROUP INC	Retail	2.96%	United States
AMERICAN HOMES 4 RENT	Residential	2.91%	United States

SUN HUNG KAI PROPERTIES LTD	Diversified	1.93%	Hong Kong
MID-AMERICA APARTMENT COMMUNITIES INC	Residential	1.90%	United States
SUN COMMUNITIES INC	Residential	1.73%	United States

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

98.56% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were in cash instruments which did not align with the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Residential	16.29%
Industrial	16.11%
Retail	14.52%
Diversified	13.56%
Healthcare	8.78%
Data Centers	8.28%
Self Storage	7.65%
Lodging/Resorts	4.04%
Office	3.86%
Specialty	3.30%
Industrial/Office Mixed	1.93%
Telecommunication REITs	0.24%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.44% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments which were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, to help manage ESG-related risks and opportunities, the Investment Adviser conducted engagements with select portfolio companies and prioritized active dialogue where positions were significant and/or issues were viewed as material. The Investment Adviser’s constructive dialogue sought to drive positive change, improve sustainability and enhance long-term value creation. As part of this ESG engagement, the Investment Adviser assessed how the company’s ESG risks and initiatives contributed to operating performance, and through conversation evaluated a range of environmental, social and governance topics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Quality Fund

Legal entity identifier: 549300KY7ZHUESLHQ60

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62.48% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in: (i) companies with any tie to fossil fuels; and (ii) companies in certain other energy intensive sectors. For the avoidance of any doubt, the Fund does not seek to make investments that contribute to climate change mitigation within the meaning of the EU Taxonomy.

In addition, the Fund considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involves weapons or civilian firearms; and (ii) that have any tie to controversial weapons.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests, which included evaluating investee companies' (each, a "Company", together the "Companies") net positive alignment with the UN Sustainable Development Goals (SDGs).

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Environmental Characteristics		
Exclusions:		
% of the Fund invested in companies which:		
Have any tie to fossil fuels	0.00%	0.00%
Have been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), or metals and mining	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
Civilian firearms (>10% revenue)	0.00%	0.00%
Weapons (>10% revenue)	0.00%	0.00%
% of the Fund invested in companies which have any tie to controversial weapons	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The positive contribution to environmental or social objectives test applied by the Investment Adviser sought to ensure that Companies classified as sustainable investments were classified based on their net positive alignment with the UN SDGs (which was primarily determined using alignment scores obtained from third party data providers). The UN SDGs include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The third party data providers' alignment scores indicate whether companies in the providers' coverage universe had a net positive alignment across the UN SDGs, either through their products and services (e.g. a health care company's essential medical products may be positively aligned with the Good Health and Well-Being SDG), or through business practices such as policies, actions and targets aimed at alignment with one or more of the SDGs (e.g. a company with robust carbon reduction plans may align with the Climate Action SDG by reducing its own emissions, switching to renewable energy or by seeking emission reductions in its value chain by engaging with suppliers and/or through product design).

The Investment Adviser classified a Company as having positive contribution to an environmental or social objective as simultaneously meeting three criteria assessed using third-party data: 1) having a net positive aggregate alignment score across all the SDGs (i.e. scores measuring positive alignment to individual SDGs have to, in total, be greater than the total of any negative alignment scores in the Investment Adviser's view), 2) having sufficient positive alignment (in the Investment Adviser's view) with at least one individual SDG and 3) not having any material mis-alignments on any of the SDGs (in the Investment Adviser's view).

In limited cases, and where it was satisfied that it was appropriate to do so based on its internal analysis (having regard to its engagements with the company or other data sources), the Investment Adviser treated an investment as passing its sustainable investment criteria, contrary to the position indicated by the third-party SDG alignment score. The Investment Adviser did this when, for example, it considered the third-party SDG alignment data to be out of date or incorrect based on the Investment Adviser's own engagement efforts or research.

More information on the UN SDGs can be found at: <https://www.undp.org/sustainable-development-goals>. The Investment Adviser recognises that the UN SDGs were written by Governments for Governments and therefore data that seeks to align corporate actions to the SDGs will not be perfectly representative.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The do no significant harm (“DNSH”) test applied by the Investment Adviser sought to ensure Companies classified as sustainable investments did not cause significant harm to any of the mandatory, SFDR-defined principal adverse impact (“PAI”) indicators which were relevant to the Company. This test also sought to ensure that Companies classified as sustainable investments are aligned with the minimum social safeguards including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund gained data to assess the relevant PAI indicators from third-party providers as well as internal research.

To determine whether significant harm was caused, initial thresholds for each of the relevant mandatory PAI indicators were set.

Where data was not available, the investment was deemed to fail the initial test and was not regarded as a sustainable investment.

However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the issuer, and therefore did not provide data on that PAI indicator, the investment was deemed to pass the initial test on the basis that the investment’s activities are unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

Additionally, in certain instances, the outcome of the initial test was supplemented (as appropriate) by the Investment Adviser’s internal qualitative assessments on significant harm (having regard to other data sources and/or its engagements with the investment) on one or more PAIs.

As part of its long-term investment approach, the investment team also sought to engage with company management teams and boards to encourage companies towards better ESG practices and to minimise or mitigate the principle adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considered a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of the Investment Adviser's DNSH test, Companies were not classified as sustainable investments if they failed to comply with the themes and values promoted by the OECD Guidelines for Multinational Enterprises or the UN Global Compact, or if they lack processes and compliance mechanisms to monitor compliance with the themes and values promoted by these global norms.

In each case, this assessment was based on information obtained from third-party data providers and/or internal assessments.

The Investment Adviser used the OECD Guidelines for Multinational Enterprises and the UN Global Compact as reasonable proxies.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

All the relevant mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund's investments as sustainable investments.

PAIs were also considered with respect to the other investments of the Fund in the following manner:

- the environmental and social characteristics promoted by the Fund incorporate consideration of the following PAIs through binding exclusions:
- PAI indicator (4): Exposure to companies active in the fossil fuel sector;
- PAI indicator (14): Exposure to controversial weapons (using third-party data with a methodology that complies with the SFDR definition);
- engagement and stewardship with issuers across all relevant mandatory PAI indicators in the SFDR rules (except on controversial weapons as they are excluded) on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	5.81%	United States
ACCENTURE PLC	Information Technology	5.04%	United States
VISA INC	Financials	4.89%	United States
SAP SE	Information Technology	4.87%	Germany
PHILIP MORRIS INTERNATIONAL INC	Consumer Staples	4.40%	United States
THERMO FISHER SCIENTIFIC INC	Health Care	4.04%	United States
DANAHER CORP	Health Care	3.43%	United States
RECKITT BENCKISER GROUP PLC	Consumer Staples	3.19%	United Kingdom
INTERCONTINENTAL EXCHANGE INC	Financials	3.11%	United States
BECTON DICKINSON & CO	Health Care	3.11%	United States
CONSTELLATION SOFTWARE INC/ CANADA	Information Technology	3.01%	Canada
IQVIA HOLDINGS INC	Health Care	2.81%	United States
ALPHABET INC	Communication Services	2.65%	United States

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

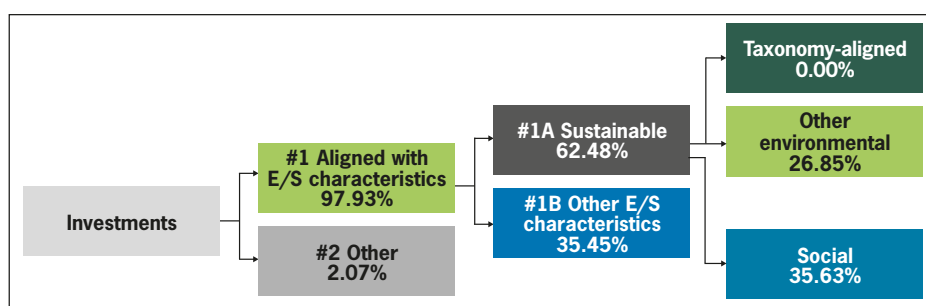

What was the proportion of sustainability-related investments?

97.93% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

62.48% of the Fund's assets were invested in Companies classified as sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

From 26 July 2023 the approach to measuring sustainable investments was updated to specify whether a company classified as a sustainable investment was contributing to an environmental or social objective. Prior to this, the proportion of sustainable investments was divided equally between environmental and social objectives solely for SFDR reporting purposes.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	28.44%
Health Care	19.04%
Financials	18.07%
Consumer Staples	16.11%
Industrials	10.80%
Communication Services	2.93%
Consumer Discretionary	2.55%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes “other” assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to invest a minimum portion of its assets in Companies classified as sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's assets invested in Companies classified as sustainable investments have been assessed by the Investment Adviser as aligned with the environmentally sustainable economic activities under the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

26.85% of the Fund's assets were invested in Companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned.

What was the share of socially sustainable investments?

35.63% of the Fund's assets were invested in Companies classified as sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.07% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and money market instruments for ancillary liquidity and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns. The investment process is focused on understanding the long-term viability of a company's returns on operating capital and engagement with management plays a vital role in this. It informs the Investment Adviser whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies and boards on financially material ESG risks and opportunities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Sustain Fund

Legal entity identifier: 549300QP5BPQ4JSACK62

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in: (i) companies with any tie to fossil fuels, (ii) companies in certain other energy intensive sectors; (iii) companies for which GHG emissions intensity estimates were not available and/or could not be estimated; and (iv) by applying a greenhouse gas (GHG) emissions intensity filter. The Fund promoted this characteristic by also seeking to achieve a GHG emissions intensity for the portfolio that is significantly lower than that of the reference universe. The reference universe is defined, only for the purposes of comparing GHG emissions intensity, as the MSCI AC World Index. For the avoidance of any doubt, the Fund does not seek to make investments that contribute to climate change mitigation within the meaning of the EU Taxonomy.

The Fund also considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involves weapons, civilian firearms, tobacco, alcohol, adult entertainment or gambling; and (ii) that have any tie to controversial weapons.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests, which included evaluating investee companies' (each, a "Company", together the "Companies") net positive alignment with the UN Sustainable Development Goals (SDGs).

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Environmental Characteristics		
Exclusions:		
% of the Fund invested in companies which:		
Have any tie to fossil fuels	0.00%	0.00%
Have been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), or metals and mining	0.00%	0.00%
Do not have GHG emissions intensity estimates available and/or which cannot be estimated (in the Investment Team's discretion)	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
Civilian firearms (>10% revenue)	0.00%	0.00%
Weapons (>10% revenue)	0.00%	0.00%
Tobacco (>5% revenue)	0.00%	0.00%
Alcohol (>10% revenue)	0.00%	0.00%
Adult entertainment (>10% revenue)	0.00%	0.00%
Gambling (>10% revenues)	0.00%	0.00%
% of the Fund invested in companies which:		
Have any tie to controversial weapons	0.00%	0.00%
Have been assigned any of the following sectors or industries under MSCI GICS: Brewers, Casinos & Gaming, Distillers & Vintners, or Tobacco	0.00%	0.00%
Sustainable Investments:		
% of the Fund invested in companies classified as sustainable investments	20.00%	65.75%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability Indicator	2023 Reference Universe Value	2023 Indicator Value
GHG Emission intensity:		
<p>The Investment Adviser seeks to achieve a GHG emissions intensity for the portfolio that is significantly lower (as measured by metric tonnes of GHG per \$1m of company sales using Scope 1 and 2 emissions) than that of the reference universe. The reference universe is defined, only for the purposes of comparing GHG emissions intensity, as the MSCI AC World Index (MSCI ACWI).</p> <p>The GHG emissions intensity of the reference universe and the portfolio were 146.75 and 21.47 respectively.</p> <p>This means the portfolio's GHG emissions intensity was 85.37% lower than that of the reference universe.</p>	146.75	21.47

Sustainability Indicator	Reference Universe Reduction Threshold	2023 Reference Universe Reduction Value
Reference universe reduction		
<p>The Investment Adviser committed to at least a 20% reduction in the reference universe through applying the following environmental exclusions:</p> <ol style="list-style-type: none"> 1. Companies with any tie to fossil fuels; 2. Companies that has been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), metals and mining; 3. Companies for which GHG emissions intensity estimates are not available and/or cannot be estimated (in the Investment Team's discretion); and 4. The remaining companies are then ranked according to their GHG emissions intensity estimates, and those with the highest intensity are excluded from the reference universe, with the view to ensuring that these binding criteria should collectively result in a reduction of the reference universe by at least 20% in a significantly engaging manner <p>The total aimed % reduction in the reference universe, and the actual total % reduction in the reference universe were:</p>	20.00%	20.12%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The positive contribution to environmental or social objectives test applied by the Investment Adviser sought to ensure that Companies classified as sustainable investments were classified based on their net positive alignment with the UN SDGs (which was primarily determined using alignment scores obtained from third party data providers). The UN SDGs include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The third party data providers' alignment scores indicate whether companies in the providers' coverage universe had a net positive alignment across the UN SDGs, either through their products and services (e.g. a health care company's essential medical products may be positively aligned with the Good Health and Well Being SDG), or through business practices such as policies, actions and targets aimed at aligning with one or more of the SDGs (e.g. a company with robust carbon reduction plans may align with the Climate Action SDG by reducing its own emissions, switching to renewable energy or by seeking emission reductions in its value chain by engaging with suppliers and/or through product design).

The Investment Adviser classified a Company as having a positive contribution to an environmental or social objective as simultaneously meeting three criteria assessed using third-party data: 1) having a net positive aggregate alignment score across all the SDGs (i.e. scores measuring positive alignment to individual SDGs have to, in total, be greater than the total of any negative alignment scores in the Investment Adviser's view), 2) having sufficient positive alignment (in the Investment Adviser's view) with at least one individual SDG and 3) not having any material mis-alignments on any of the SDGs (in the Investment Adviser's view).

In limited cases, and where it was satisfied that it was appropriate to do so based on its internal analysis (having regard to its engagements with the company or other data sources), the Investment Adviser treated an investment as passing its sustainable investment criteria, contrary to the position indicated by the third-party SDG alignment score. The Investment Adviser did this when, for example, it considered the third-party SDG alignment data to be out of date or incorrect based on the Investment Adviser's own engagement efforts or research.

More information on the UN SDGs can be found at: <https://www.undp.org/sustainable-development-goals>. The Investment Adviser recognises that the UN SDGs were written by Governments for Governments and therefore data that seeks to align corporate actions to the SDGs will not be perfectly representative.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The do no significant harm (“DNSH”) test applied by the Investment Adviser sought to ensure Companies classified as sustainable investments did not cause significant harm to any of the mandatory, SFDR-defined principal adverse impact (“PAI”) indicators which were relevant to the Company. This test also sought to ensure that Companies classified as sustainable investments are aligned with the minimum social safeguards including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund gained data to assess the relevant PAI indicators from third-party providers as well as internal research.

To determine whether significant harm was caused, initial thresholds for each of the relevant mandatory PAI indicators were set.

Where data was not available, the investment was deemed to fail the initial test and was not regarded as a sustainable investment.

However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the issuer, and therefore did not provide data on that PAI indicator, the investment was deemed to pass the initial test on the basis that the investment’s activities are unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

Additionally, in certain instances, the outcome of the initial test was supplemented (as appropriate) by the Investment Adviser’s internal qualitative assessments on significant harm (having regard to other data sources and/or its engagements with the investment) on one or more PAIs.

As part of its long-term investment approach, the investment team also sought to engage with company management teams and boards to encourage companies towards better ESG practices and to minimise or mitigate the principle adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considered a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of the Investment Adviser's DNSH test, Companies were not classified as sustainable investments if they failed to comply with the themes and values promoted by the OECD Guidelines for Multinational Enterprises or the UN Global Compact, or if they lack processes and compliance mechanisms to monitor compliance with the themes and values promoted by these global norms.

In each case, this assessment was based on information obtained from third-party data providers and/or internal assessments.

The Investment Adviser used the OECD Guidelines for Multinational Enterprises and the UN Global Compact as reasonable proxies.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

All the relevant mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund's investments as sustainable investments.

PAIs were also considered with respect to the other investments of the Fund in the following manner:

- the environmental and social characteristics promoted by the Fund incorporate consideration of the following PAIs through binding exclusions:
- PAI indicator (3): GHG intensity of investee companies (through restrictions based on Scope 1 and 2 GHG intensity);
- PAI indicator (4): Exposure to companies active in the fossil fuel sector;
- PAI indicator (14): Exposure to controversial weapons (using third-party data with a methodology that complies with the SFDR definition);
- engagement and stewardship with issuers across all relevant mandatory PAI indicators in the SFDR rules (except on controversial weapons as they are excluded) on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	6.50%	United States
ACCENTURE PLC	Information Technology	5.65%	United States
VISA INC	Financials	5.47%	United States
SAP SE	Information Technology	5.43%	Germany
THERMO FISHER SCIENTIFIC INC	Health Care	4.51%	United States
DANAHER CORP	Health Care	3.84%	United States
RECKITT BENCKISER GROUP PLC	Consumer Staples	3.56%	United Kingdom
INTERCONTINENTAL EXCHANGE INC	Financials	3.48%	United States
BECTON DICKINSON & CO	Health Care	3.47%	United States
CONSTELLATION SOFTWARE INC/ CANADA	Information Technology	3.38%	Canada
IQVIA HOLDINGS INC	Health Care	3.15%	United States

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

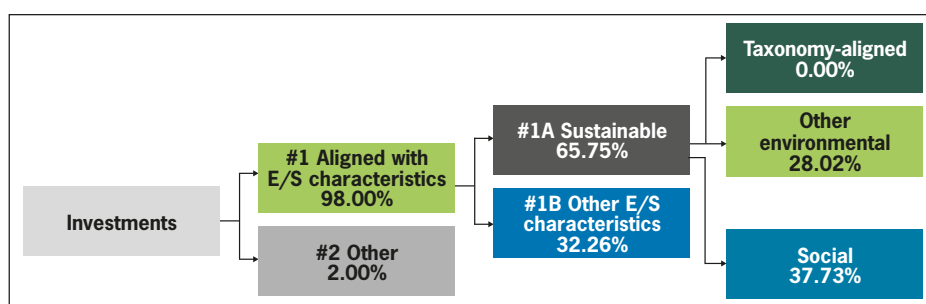

What was the proportion of sustainability-related investments?

98.00% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

65.75% of the Fund's assets were invested in companies classified as sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

From 26 July 2023 the approach to measuring sustainable investments was updated to specify whether a company classified as a sustainable investment was contributing to an environmental or social objective. Prior to this, the proportion of sustainable investments was divided equally between environmental and social objectives solely for SFDR reporting purposes.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	31.78%
Health Care	21.26%
Financials	20.20%
Industrials	12.05%
Consumer Staples	8.61%
Communication Services	3.29%
Consumer Discretionary	0.82%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes “other” assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to invest a minimum portion of its assets in Companies classified as sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's assets invested in Companies classified as sustainable investments have been assessed by the Investment Adviser as aligned with the environmentally sustainable economic activities under the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

28.02% of the Fund's assets were invested in Companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned.

What was the share of socially sustainable investments?

37.73% of the Fund's assets were invested in Companies classified as sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.00% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and money market instruments for ancillary liquidity and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns. The investment process is focused on understanding the long-term viability of a company's returns on operating capital and engagement with management plays a vital role in this. It informs the Investment Adviser whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies and boards on financially material ESG risks and opportunities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Japanese Equity Fund

Legal entity identifier: 549300Q8BUGJZ05GQE69

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the fund met its environmental and/or social characteristics through the following:

ESG tilt:

The Fund promoted environmental and social characteristics by maintaining a higher ESG score at portfolio level than the MSCI Japan Index, according to a proprietary ESG scoring methodology developed by the Investment Adviser¹.

The Investment Adviser monitored the attainment of the environmental and social characteristics promoted by the Fund by monitoring the Fund's ESG score against that of the MSCI Japan Index. The proprietary ESG scoring methodology developed by the Investment Adviser is based on external ESG data provided by third party vendors as well as the Investment Adviser's qualitative evaluation of investee companies. To determine the customized ESG score for a company, an industry-adjusted score, provided by a third-party data provider as determined by the Investment Adviser, is used as a quantitative base to reflect the company's ESG performance relative to the standards and performance of the company's industry peers. The Investment Adviser then adjusts this score based on their own qualitative assessment and expectations of how a company's ESG activities may improve corporate value, considering the following criteria:

- Attitude to Engagement;
- ESG Commitment;
- ESG Disclosure;
- Business Strategy including ESG;
- Business Risks from an ESG viewpoint; and
- Expectation for change.

The ESG scores of the Fund's investments are then aggregated at the portfolio level and monitored daily against the ESG score for the MSCI Japan Index, which may be subject to similar adjustment by the Investment Adviser based on its own qualitative assessment as described above.

Exclusions:

The Fund promoted:

- the environmental characteristic of contributing towards climate change mitigation by excluding companies involved in thermal coal mining and generation; and
- the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

The Fund also contributed to environmental and social themes by avoiding investments in issuers which experienced severe ESG controversies (and no appropriate remedial action had taken place), or which failed to adhere to certain international norms.

Further detail on the nature of these exclusions is set out in response to the question 'How did the sustainability indicators perform?'.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

¹ Unless otherwise noted, references to the Investment Adviser refer to the Investment Adviser of the Fund and/or any Sub-Investment Advisers engaged for management of the Fund (as appropriate).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
ESG Tilt:		
Portfolio level ESG score which is higher than MSCI Japan Index (shown in the Indicator Threshold column)	7.50	7.63
Exclusions:		
% Fund exposure to investee companies deriving revenue from:		
Thermal coal mining and/or thermal coal power generation (>10% revenue)	0.00%	0.00%
Supply of key products necessary for production of tobacco products & tobacco manufacturing (>5% revenue)	0.00%	0.00%
Adult entertainment (>5% revenue)	0.00%	0.00%
Civilian firearms production (>5% revenue)	0.00%	0.00%
Gambling (>5% revenue)	0.00%	0.00%
% of the Fund exposure to investee companies which:		
Manufacture whole weapon systems, intended use components, or are a majority owner of, or majority owned by, controversial weapons company, including cluster munitions	0.00%	0.00%
% Fund exposure to investee companies which breach International norms:		
Experienced ESG controversies without remedial action	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

- The Fund excluded companies which receive a certain percentage of their revenue from thermal coal mining and generation. The Fund therefore partly considers PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded companies which have committed violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. The Fund therefore considers PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded companies which have any exposure to controversial weapons. The Fund therefore considered the PAI indicator 14: exposure to controversial weapons.

In addition, the Investment Adviser also engaged with companies on the following PAIs on a materiality basis (i.e., if the Investment Adviser considered a particular PAI indicator to be materially relevant to, or impacted by, the activities of the issuer):

- PAI indicator 1: GHG emissions;
- PAI indicator 2: carbon footprint;
- PAI indicator 3: GHG intensity of investee companies;
- PAI indicator 5: share of non-renewable energy consumption and production;
- PAI indicator 6: energy consumption intensity per high impact climate sector; and
- PAI indicator 13: board gender diversity.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
HITACHI LTD	Industrials	5.81%	Japan
DAIICHI SANKYO CO LTD	Health Care	5.50%	Japan
SONY GROUP CORP	Consumer Discretionary	5.41%	Japan
TOYOTA MOTOR CORP	Consumer Discretionary	5.40%	Japan
mitsubishi corp	Industrials	4.92%	Japan
MITSUBISHI UFJ FINANCIAL GROUP INC	Financials	3.93%	Japan
NIPPON STEEL CORP	Materials	3.73%	Japan
MITSUBISHI HEAVY INDUSTRIES L	Industrials	3.69%	Japan
RENESAS ELECTRONICS CORP	Information Technology	3.26%	Japan
SWCC CORP	Industrials	2.87%	Japan
MARUBENI CORP	Industrials	2.65%	Japan
TOKIO MARINE HOLDINGS INC	Financials	2.55%	Japan
NIPPON TELEGRAPH & TELEPHONE CORP	Communication Services	2.45%	Japan

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

98.63% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Industrials	30.10%
Consumer Discretionary	15.72%
Materials	12.23%
Financials	12.07%
Information Technology	7.45%
Consumer Staples	7.09%
Health Care	6.23%
Communication Services	2.45%
Utilities	1.97%
Energy	1.85%
Real Estate	1.48%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	22.70%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. This indicator is therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.37% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Sub-Investment Adviser conducted engagements through dialogue on Business Strategy, Business Structures, Capital Structures, Corporate Governance, Proposals for General Meetings of Shareholders, and ESG issues.

The team focused on “Material ESG issues” which are common to all sectors as well as important issues that are material to individual companies. The Sub-Investment Adviser also conducted stewardship activities such as “Purpose-based dialogues” with companies in order to contribute to the enhancement of corporate value and sustainable growth of investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: NextGen Emerging Markets Fund

Legal entity identifier: 5493005T095BBNXCKP66

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, firstly the Fund promoted the environmental characteristic of contributing towards climate change mitigation by seeking to achieve a lower carbon footprint than the MSCI Frontier Emerging Markets Index in aggregate at the portfolio level.

Secondly, the Fund avoided investments in certain industries with the potential to cause harm to the environmental and to human health and well-being, such as tobacco and weapons, by applying binding exclusions. Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions:		
Sector-based exclusions based on the universe as defined in the prospectus:		
% of the Fund's exposure to issuers whose core business as defined by more than 10% revenues from:		
Fossil fuels	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered some of the principal adverse impacts (“PAI”) on sustainability factors through the Fund’s exclusionary criteria as follows:

- The Fund excluded issuers whose core business is in thermal coal mining and extraction, thermal coal power generation and fossil fuels. The Fund therefore partly considered PAI indicator number 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derive any revenue from controversial weapons manufacturing or retail. The Fund therefore considered PAI indicator number 14: exposure to controversial weapons.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

Lastly, the Fund considered and, where relevant engaged with issuers across, all relevant mandatory PAI indicators in the SFDR rules on a materiality basis (i.e., if the Investment Adviser considered a particular PAI indicator to be materially relevant to, or impacted by, the activities of the issuer, the Investment Adviser engaged on that PAI).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
FPT CORP	Information Technology	7.36%	Vietnam
11 BIT STUDIOS SA	Communication Services	5.55%	Poland
TEXT SA	Information Technology	5.46%	Poland
BANK MANDIRI PERSERO TBK PT	Financials	4.65%	Indonesia
NAC KAZATOMPROM JSC	Energy	4.18%	Kazakhstan
KASPI.KZ JSC	Financials	3.98%	Kazakhstan
MERCADOLIBRE INC	Consumer Discretionary	3.96%	United States
MOBILE WORLD INVESTMENT CORP	Consumer Discretionary	3.74%	Vietnam
INDUSTRI JAMU DAN FARMASI SIDO MUNCUL TB	Consumer Staples	3.58%	Indonesia
VIETNAM DAIRY PRODUCTS JSC	Consumer Staples	3.56%	Vietnam
MEDIKALOKA HERMINA TBK PT	Health Care	3.46%	Indonesia
LPP SA	Consumer Discretionary	3.45%	Poland

What was the proportion of sustainability-related investments?

90.59% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

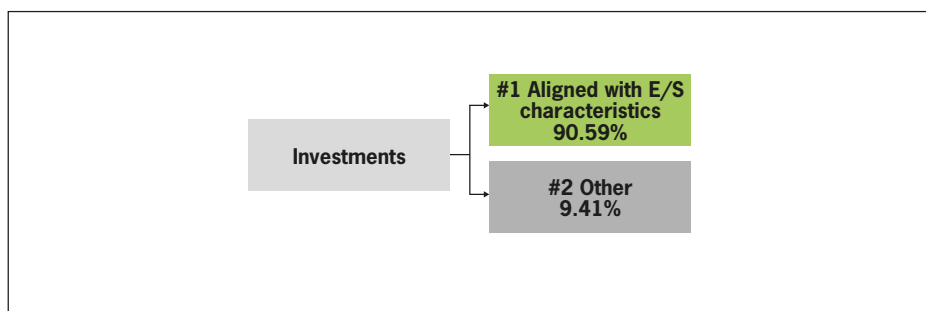

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The Fund's aim to maintain a lower carbon footprint than the MSCI Frontier Emerging Markets Index is applied at a portfolio level (and not at the level of individual holdings, some of which may on an individual basis have a higher carbon intensity than the portfolio-level average or target).

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	22.69%
Financials	17.93%
Consumer Discretionary	14.85%
Consumer Staples	14.18%
Communication Services	10.90%
Materials	5.67%
Energy	4.18%
Health Care	3.46%
Industrials	0.74%
Real Estate	0.38%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

9.41% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments were comprised of (i) companies where an ESG materiality assessment and/or a dedicated company engagement to supplement data points has not yet been completed, (ii) hedging instruments and/or (iii) cash held for ancillary liquidity. These investments were not subject to minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During 2023, MSIM's Emerging Markets Investment Advisor met with 50 companies from holdings across the team's platform to discuss environmental and social sustainability issues. Decarbonisation continued to be a priority theme in 2023 as the team continued to encourage company management teams to articulate detailed decarbonisation plans with both long and short-term targets that are high-quality, feasible and integrated within their business strategy. The team continued to leverage outside resources like Transition Pathway Initiative (TPI) and CDP to analyse large emitters plans for viability and alignment with global climate commitments. The team also engaged with companies on supply chain risks related to environmental and labor supply chain standards, focusing on companies which they felt had the biggest potential impact for change.

The team conducted research on green public policies, including implications on global emissions reduction, deglobalisation and demand for green metals, such as copper, zinc, aluminum and lithium. This, along with additional ESG regulatory research, allowed the team to engage with in-scope portfolio companies on their efforts to satisfy existing and upcoming regulatory requirements.

During the reference period, the Investment Adviser continued to engage with investee companies on labor management, employee safety and human rights risks within the supply chain. The team conducted deep research on best practices for human rights including expectations from management and success cases to aid in the assessment of portfolio companies' human rights risk management strategies. The team also led their first official collaborative engagement as part of the UN PRI Advance Initiative, an investor-led initiative with the objective to increase respect for human rights through investor stewardship.

The Investment Adviser continued to push for enhanced transparency and disclosure on issues relating to applicable sustainability metrics. The Investment Adviser continued to engage with companies on executive compensation and board composition, in an effort to understand incentives and alignment with minority shareholders.

The Investment Adviser also monitored investments in the Fund according to the Fund's environmental and social characteristics, to avoid any new investments in excluded countries or activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable Asia Equity Fund

Legal entity identifier: 3YN85S5L733W17SQIB18

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 39.26% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted environmental and social characteristics in the following ways.

Firstly, a proportion of the Fund's portfolio was thematically aligned towards sustainable development in one of the Investment Adviser's chosen environmental and social sub-themes, which were:

- responsible energy;
- sustainable production and circular economy;
- decent work and innovation; and
- access, affordability, and sustainable economic growth.

Secondly, the Fund avoided investments in certain industries with the potential to cause harm to the environmental and social characteristics described above by applying binding exclusions.

Thirdly, having regard to the low carbon aims of the Paris Agreement the Fund promoted the environmental characteristic of maintaining a lower carbon footprint than the MSCI AC Asia Ex Japan Index in aggregate at the portfolio level.

Finally, the Fund invested 39.26% of its portfolio in sustainable investments.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Thematic alignment to sustainable development:		
As stated above, the Investment Adviser aimed to ensure that a minimum of 40% of the Fund's assets were invested in chosen environmental and social sub-themes. The relevant criteria varied by sub-theme and are listed below. The %s of the Fund invested in each of the below sub-themes were:		
Responsible Energy Transition	n/a	11.05%
Sustainable Production & Circular Economy	n/a	6.88%
Improved Access, Affordability & Sustainable Economic Growth	n/a	29.73%
Decent Work & Innovation	n/a	23.00%
Total: Thematic alignment to sustainable development	40.00%	70.66%
Exclusions:		
Sector-based exclusions:		
% of the Fund's exposure to issuers which derive revenue from:		
Thermal coal mining or extraction (10% revenue)	0.00%	0.00%
Thermal coal based power generation (10% revenue)	0.00%	0.00%
Fossil fuels (10% revenue)	0.00%	0.00%
Oil sands (5% revenue)	0.00%	0.00%
Arctic oil (5% revenue)	0.00%	0.00%
Arctic gas (5% revenue)	0.00%	0.00%
Gambling (5% revenue)	0.00%	0.00%
Adult entertainment (10% revenue)	0.00%	0.00%
Producing, supplying or offering retail services for tobacco (10% revenue)	0.00%	0.00%
Producing, supplying or offering retail services for alcohol (10% revenue)	0.00%	0.00%
% of the Fund's exposure to issuers which have any tie to:		
Civilian firearms	0.00%	0.00%
Controversial weapons	0.00%	0.00%
% of the Fund invested in the MSCI AC Asia Ex Japan Index's highest carbon emitters, defined as:		
The top 80 emitters by emissions intensity	0.00%	0.00%
The top 20 emitters by absolute emissions	0.00%	0.00%
% of the Fund invested in state-owned enterprises. Defined by enterprises with >=35% state ownership, excluding financials, communication services and healthcare sectors		
	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
ESG Controversies & International norms exclusions:		
% of the Fund's exposure to issuers which have:	0.00%	0.00%
committed violations of the of UN Guiding Principles, UN Global Compact and the OECD Guidelines for Multinational Enterprises	0.00%	0.00%
an unremediated "Red" ESG controversy	0.00%	0.00%
Lower Carbon Footprint:		
Carbon Footprint lower than that of the MSCI AC Asia ex Japan Index. Measured by weighted average carbon intensity, Scope 1 and 2 emissions. The carbon footprint of the index and that of the Fund were:	289.09	92.43
Sustainable Investments:		
% of the Fund that are sustainable investments	20.00%	39.26%
Reference universe reduction:		
The Investment Adviser aimed for a certain % reduction of the reference universe by the binding exclusions described above. The target % universe reduction, and the actual % universe reduction caused by the exclusions were:	20.00%	24.61%*

* Calculated based on the number of stocks in the universe (as defined in the prospectus).

ESG Controversies & International norms exclusions:		
% of the Fund's exposure to issuers which have:	0.00%	0.00%
committed violations of the of UN Guiding Principles, UN Global Compact and the OECD Guidelines for Multinational Enterprises	0.00%	0.00%
an unremediated "Red" ESG controversy	0.00%	0.00%
Lower Carbon Footprint:		
Carbon Footprint lower than that of the MSCI AC Asia ex Japan Index. Measured by weighted average carbon intensity, Scope 1 and 2 emissions. The carbon footprint of the index and that of the Fund were:	285.20	88.40
Sustainable Investments:		
% of the Fund that are sustainable investments	20.00%	42.81%
Reference universe reduction:		
The Investment Adviser aimed for a certain % reduction of the reference universe by the binding exclusions described above. The target % universe reduction, and the actual % universe reduction caused by the exclusions were:	20.00%	21.50%*

* Calculated based on the number of stocks in the universe (as defined in the prospectus).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to at least one of the environmental or social sub-themes listed above. The Investment Adviser used metrics to ensure that the sustainable investments contribute to at least one of these themes, for example:

- by considering quantifiable positive metrics such as aligned revenues (being revenues from activities aligned with a theme, e.g. revenues from renewable energy generation in the case of the responsible energy theme) and aligned business activities; and
- other relevant metrics such as customer composition, Transitions Performance Index ("TPI") scores, above average wages, employee retention rates, research and development spend, international sales or private label sales (as indicators of investment in local economic growth and quality employment opportunities), diversity metrics such as women in the workforce or management, and operational metrics relating to inclusion or access to financial services communications or healthcare.

Each metric had a threshold or benchmark that the company met in order to be considered aligned with a sustainability theme, e.g. at least 20% for aligned revenues or above country or industry averages on other metrics. Further detail regarding the relevant metrics for each sub-theme is set out under "How did the sustainability indicators perform?" above.

The Investment Adviser obtained data on these metrics from company reporting and third-party sources.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the do no significant harm test for sustainable investments, the Fund assessed the mandatory PAI indicators that are (i) relevant to the investment, and (ii) deemed material to a particular issuer, based on third-party data providers’ assessment of materiality.

Companies with two missing PAI indicator data points were not considered sustainable investments due to lack of data.

For each mandatory PAI the Fund set thresholds specific to that PAI to determine whether significant harm was caused.

PAI indicators were sourced from company reported data, third-party data and the investment team’s engagements with company management. The Investment Adviser used third-party information, and supplemented individual data points based on company engagements or company websites in certain cases.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured workforce diversity as a reasonable proxy.

These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's investments were screened for minimum social safeguards, before going through the PAI screen described above.

The Investment Adviser used third party data sources to undertake minimum social safeguards screening. The screening undertaken included identification of companies which are subject to UNGC and OECD controversy and compliance flags, as well as flags for compliance with international norms. In addition, the Fund excluded investments in issuers that fail to comply with the UN Global Compact, or the OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI indicators on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above. The portion of the Fund that is not made of sustainable investments considered certain PAI through the Fund's exclusionary criteria as follows:

- The Fund excluded issuers whose core business is in thermal coal mining and extraction, thermal coal power generation and fossil fuels. The Fund therefore partly considered PAI indicator number 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derive any revenue from controversial weapons manufacturing or retail. The Fund therefore considered PAI indicator number 14: exposure to controversial weapons.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

Lastly, the Fund considered and, where relevant engaged with issuers across all relevant mandatory PAI indicators in the SFDR rules on a materiality basis, meaning if the Investment Adviser considered a particular PAI indicator to be materially relevant to, or impacted by, the activities of the issuer, the Investment Adviser engaged on that PAI.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
SAMSUNG ELECTRONICS CO LTD	Information Technology	6.90%	South Korea
TAIWAN SEMICONDUCTOR MANUFACTURING CO LT	Information Technology	4.76%	Taiwan
ICICI BANK LTD	Financials	4.54%	India
MAHINDRA & MAHINDRA LTD	Consumer Discretionary	3.94%	India
TAIWAN SEMICONDUCTOR MANUFACTURING CO LT	Information Technology	3.31%	Taiwan
TENCENT HOLDINGS LTD	Communication Services	3.25%	China
BANK RAKYAT INDONESIA PERSERO TBK PT	Financials	2.94%	Indonesia
RELIANCE INDUSTRIES LTD	Energy	2.53%	India
DELTA ELECTRONICS INC	Information Technology	2.52%	Taiwan
HDFC BANK LTD	Financials	2.46%	India
AIA GROUP LTD	Financials	2.40%	Hong Kong
DBS GROUP HOLDINGS LTD	Financials	2.28%	Singapore
BANK CENTRAL ASIA TBK PT	Financials	1.92%	Indonesia
STATE BANK OF INDIA	Financials	1.84%	India
INFOSYS LTD	Information Technology	1.84%	India

What was the proportion of sustainability-related investments?

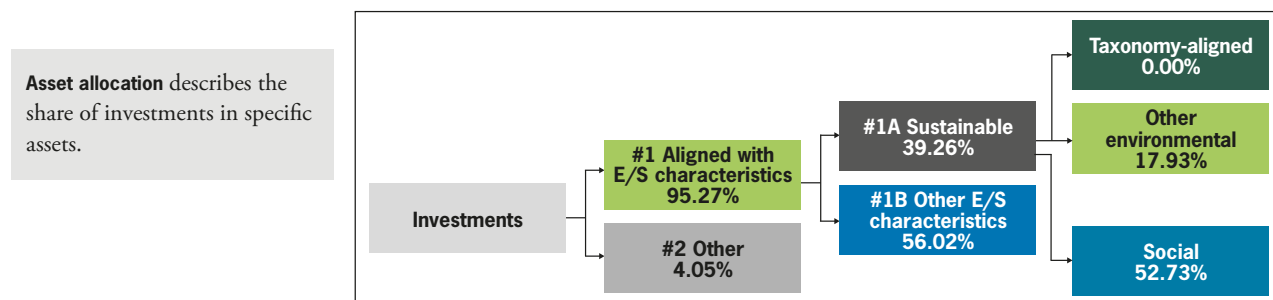

95.27% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

39.26% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's aim to maintain a lower carbon footprint than the MSCI AC Asia Ex Japan Index is applied at a portfolio level (and not at the level of individual holdings, some of which may on an individual basis have a higher carbon intensity than the portfolio-level average or target).

The Fund's methodology for categorising investments as sustainable investments assesses the investment's overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may also be making a contribution to environmental or social objectives respectively.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	34.44%
Information Technology	27.81%
Consumer Discretionary	12.15%
Industrials	5.33%
Consumer Staples	4.67%
Communication Services	4.46%
Materials	2.87%
Health Care	2.54%
Energy	2.53%
Real Estate	1.44%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	4.91%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the fossil fuel exclusions applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

17.93% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

52.73% of the Fund's investments were sustainable investments with a social objective during the reference period.

As noted above, this Fund has categorised investments as having either environmental or social objectives for the purposes of this report. However, please note that the sustainable investments with a social objective may additionally exhibit environmental characteristics.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

4.05% of the Fund's investments were comprised of (i) companies with no sustainable theme or where a dedicated company engagement to supplement data points has not yet been completed, (ii) hedging instruments and/or (iii) cash held for ancillary liquidity. These investments were not subject to minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During 2023, MSIM's Emerging Markets Investment Advisor met with 50 companies from holdings across the team's platform to discuss environmental and social sustainability issues. Decarbonization continued to be a priority theme in 2023 as the team continued to encourage company management teams to articulate detailed decarbonization plans with both long and short-term targets that are high-quality, feasible and integrated within their business strategy. The team continued to leverage outside resources like Transition Pathway Initiative (TPI) and CDP to analyze large emitters plans for viability and alignment with global climate commitments. The team also engaged with companies on supply chain risks related to environmental and labor supply chain standards, focusing on companies which they felt had the biggest potential impact for change.

The team conducted research on green public policies, including implications on global emissions reduction, deglobalization and demand for green metals, such as copper, zinc, aluminum and lithium. This, along with additional ESG regulatory research, allowed the team to engage with in-scope portfolio companies on their efforts to satisfy existing and upcoming regulatory requirements.

During the reference period, the Investment Adviser continued to engage with investee companies on labor management, employee safety and human rights risks within the supply chain. The team conducted deep research on best practices for human rights including expectations from management and success cases to aid in the assessment of portfolio companies' human rights risk management strategies. The team also led their first official collaborative engagement as part of the UN PRI Advance Initiative, an investor-led initiative with the objective to increase respect for human rights through investor stewardship.

The Investment Adviser continued to push for enhanced transparency and disclosure on issues relating to applicable sustainability metrics. The Investment Adviser continued to engage with companies on executive compensation and board composition, in an effort to understand incentives and alignment with minority shareholders.

The Investment Adviser also monitored investments in the Fund according to the Fund's environmental and social characteristics, to avoid any new investments in excluded countries or activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable Emerging Markets Equity Fund

Legal entity identifier: T65E8GUFX6U708NUAP89

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37.79% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy |

| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted environmental and social characteristics in the following ways.

Firstly, a proportion of the Fund's portfolio was thematically aligned towards sustainable development in one of the Investment Adviser's chosen environmental and social sub-themes, which were:

- responsible energy;
- sustainable production and circular economy;
- decent work and innovation; and
- access, affordability, and sustainable economic growth.

Secondly, the Fund avoided investments in certain industries with the potential to cause harm to the environmental and social characteristics described above by applying binding exclusions.

Thirdly, having regard to the low carbon aims of the Paris Agreement the Fund promoted the environmental characteristic of maintaining a lower carbon footprint than the MSCI Emerging Markets Index in aggregate at the portfolio level.

Finally, the Fund invested 37.79% of its portfolio in sustainable investments.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Thematic alignment to sustainable development:		
As stated above, the Investment Adviser aimed to ensure that a minimum of 40% of the Fund's assets were invested in chosen environmental and social sub-themes. The relevant criteria varied by sub-theme and are listed below. The %s of the Fund invested in each of the below sub-themes were:		
Responsible Energy Transition	n/a	13.63%
Sustainable Production & Circular Economy	n/a	14.68%
Improved Access, Affordability & Sustainable Economic Growth	n/a	27.43%
Decent Work & Innovation	n/a	18.42%
Total: Thematic alignment to sustainable development	40.00%	74.16%
Exclusions:		
Sector-based exclusions:		
% of the Fund's exposure to issuers which derive revenue from:		
Thermal coal mining or extraction (10% revenue)	0.00%	0.00%
Thermal coal based power generation (10% revenue)	0.00%	0.00%
Fossil fuels (10% revenue)	0.00%	0.00%
Oil sands (5% revenue)	0.00%	0.00%
Arctic oil (5% revenue)	0.00%	0.00%
Arctic gas (5% revenue)	0.00%	0.00%
Gambling (5% revenue)	0.00%	0.00%
Adult entertainment (10% revenue)	0.00%	0.00%
Producing, supplying or offering retail services for tobacco (10% revenue)	0.00%	0.00%
Producing, supplying or offering retail services for alcohol (10% revenue)	0.00%	0.00%
% of the Fund's exposure to issuers which have any tie to:		
Civilian firearms	0.00%	0.00%
Controversial weapons	0.00%	0.00%
% of the Fund invested in the MSCI EM index's highest carbon emitters, defined as:		
The top 80 emitters by emissions intensity	0.00%	0.00%
The top 20 emitters by absolute emissions	0.00%	0.00%
% of the Fund invested in state-owned enterprises. Defined by enterprises with >=35% state ownership, excluding financials, communication services and healthcare sectors	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
ESG Controversies & International norms exclusions:		
% of the Fund's exposure to issuers which have:	0.00%	0.00%
committed violations of the of UN Guiding Principles, UN Global Compact and the OECD Guidelines for Multinational Enterprises	0.00%	0.00%
an unremediated "Red" ESG controversy	0.00%	0.00%
Lower Carbon Footprint:		
Carbon Footprint lower than that of the MSCI AC Asia ex Japan Index. Measured by weighted average carbon intensity, Scope 1 and 2 emissions.	321.35	124.60
Sustainable Investments:		
% of the Fund that are sustainable investments	20.00%	37.79%
Reference universe reduction:		
The Investment Adviser aimed for a certain % reduction of the reference universe by the binding exclusions described above. The target % universe reduction, and the actual % universe reduction caused by the exclusions were:	20.00%	22.82%*

* Calculated based on the number of stocks in the universe (as defined in the prospectus).

Arctic oil (5% revenue)	0.00%	0.00%
Arctic gas (5% revenue)	0.00%	0.00%
Gambling (5% revenue)	0.00%	0.00%
Adult entertainment (10% revenue)	0.00%	0.00%
Producing, supplying or offering retail services for tobacco (10% revenue)	0.00%	0.00%
Producing, supplying or offering retail services for alcohol (10% revenue)	0.00%	0.00%
% of the Fund's exposure to issuers which have any tie to:		
Civilian firearms	0.00%	0.00%
Controversial weapons	0.00%	0.00%
% of the Fund invested in the MSCI EM index's highest carbon emitters, defined as:		
The top 80 emitters by emissions intensity	0.00%	0.00%
The top 20 emitters by absolute emissions	0.00%	0.00%
% of the Fund invested in state-owned enterprises. Defined by enterprises with >=35% state ownership, excluding financials, communication services and healthcare sectors	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
ESG Controversies & International norms exclusions:		
% of the Fund's exposure to issuers which have:	0.00%	0.00%
committed violations of the of UN Guiding Principles, UN Global Compact and the OECD Guidelines for Multinational Enterprises	0.00%	0.00%
an unremediated "Red" ESG controversy	0.00%	0.00%
Lower Carbon Footprint:		
Carbon Footprint lower than that of the MSCI AC Asia ex Japan Index. Measured by weighted average carbon intensity, Scope 1 and 2 emissions.	322.60	130.50
Sustainable Investments:		
% of the Fund that are sustainable investments	20.00%	43.84%
Reference universe reduction:		
The Investment Adviser aimed for a certain % reduction of the reference universe by the binding exclusions described above. The target % universe reduction, and the actual % universe reduction caused by the exclusions were:	20.00%	21.90%*

* Calculated based on the number of stocks in the universe (as defined in the prospectus).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to at least one of the environmental or social sub-themes listed above. The Investment Adviser used metrics to ensure that the sustainable investments contribute to at least one of these themes, for example:

- by considering quantifiable positive metrics such as aligned revenues (being revenues from activities aligned with a theme, e.g. revenues from renewable energy generation in the case of the responsible energy theme) and aligned business activities; and
- other relevant metrics such as customer composition, Transitions Performance Index (“TPI”) scores, above average wages, employee retention rates, research and development spend, international sales or private label sales (as indicators of investment in local economic growth and quality employment opportunities), diversity metrics such as women in the workforce or management, and operational metrics relating to inclusion or access to financial services communications or healthcare.

Each metric had a threshold or benchmark that the company met in order to be considered aligned with a sustainability theme, e.g. at least 20% for aligned revenues or above country or industry averages on other metrics. Further detail regarding the relevant metrics for each sub-theme is set out under “How did the sustainability indicators perform?” above.

The Investment Adviser obtained data on these metrics from company reporting and third-party sources.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the do no significant harm test for sustainable investments, the Fund assessed the mandatory PAI indicators that are (i) relevant to the investment, and (ii) deemed material to a particular issuer, based on third-party data providers’ assessment of materiality.

Companies with two missing PAI indicator data points were not considered sustainable investments due to lack of data.

For each mandatory PAI the Fund set thresholds specific to that PAI to determine whether significant harm was caused.

PAI indicators were sourced from company reported data, third-party data and the investment team’s engagements with company management. The Investment Adviser used third-party information, and supplemented individual data points based on company engagements or company websites in certain cases.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured workforce diversity as a reasonable proxy.

These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's investments were screened for minimum social safeguards, before going through the PAI screen described above.

The Investment Adviser used third party data sources to undertake minimum social safeguards screening. The screening undertaken included identification of companies which are subject to UNGC and OECD controversy and compliance flags, as well as flags for compliance with international norms. In addition, the Fund excluded investments in issuers that fail to comply with the UN Global Compact, or the OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI indicators on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above. The portion of the Fund that is not made of sustainable investments considered certain PAI through the Fund's exclusionary criteria as follows:

- The Fund excluded issuers whose core business is in thermal coal mining and extraction, thermal coal power generation and fossil fuels. The Fund therefore partly considered PAI indicator number 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derive any revenue from controversial weapons manufacturing or retail. The Fund therefore considered PAI indicator number 14: exposure to controversial weapons.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

Lastly, the Fund considered and, where relevant engaged with issuers across all relevant mandatory PAI indicators in the SFDR rules on a materiality basis, meaning if the Investment Adviser considered a particular PAI indicator to be materially relevant to, or impacted by, the activities of the issuer, the Investment Adviser engaged on that PAI.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING CO LT	Information Technology	5.75%	Taiwan
SAMSUNG ELECTRONICS CO LTD	Information Technology	5.72%	South Korea
TENCENT HOLDINGS LTD	Communication Services	3.26%	China
RELIANCE INDUSTRIES LTD	Energy	2.76%	India
ICICI BANK LTD	Financials	2.43%	India
TAIWAN SEMICONDUCTOR MANUFACTURING CO LT	Information Technology	2.32%	Taiwan
WAL-MART DE MEXICO SAB DE CV	Consumer Staples	2.26%	Mexico
ITAU UNIBANCO HOLDING SA	Financials	2.05%	Brazil
MONDI PLC	Materials	1.95%	United Kingdom
LPP SA	Consumer Discretionary	1.93%	Poland
GRUMA SAB DE CV	Consumer Staples	1.86%	Mexico
BANK RAKYAT INDONESIA PERSERO TBK PT	Financials	1.84%	Indonesia
SK HYNIX INC	Information Technology	1.76%	South Korea
ANGLO AMERICAN PLC	Materials	1.69%	South Africa
CAPITEC BANK HOLDINGS LTD	Financials	1.67%	South Africa

What was the proportion of sustainability-related investments?

95.45% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

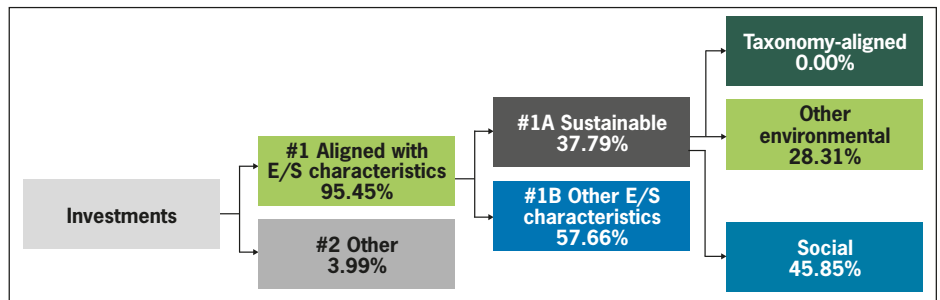

37.79% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's aim to maintain a lower carbon footprint than the MSCI Emerging Markets Index is applied at a portfolio level (and not at the level of individual holdings, some of which may on an individual basis have a higher carbon intensity than the portfolio-level average or target).

The Fund's methodology for categorising investments as sustainable investments assesses the investment's overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may also be making a contribution to environmental or social objectives respectively.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	25.75%
Information Technology	22.48%
Consumer Discretionary	13.06%
Materials	12.40%
Consumer Staples	9.56%
Industrials	5.19%
Communication Services	3.26%
Energy	2.76%
Health Care	2.69%
Real Estate	0.82%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	4.40%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the fossil fuel exclusions applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

28.31% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

45.85% of the Fund's investments were sustainable investments with a social objective during the reference period.

As noted above, this Fund has categorised investments as having either environmental or social objectives for the purposes of this report. However, please note that the sustainable investments with a social objective may additionally exhibit environmental characteristics.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.99% of the Fund's investments were comprised of (i) companies with no sustainable theme or where a dedicated company engagement to supplement data points has not yet been completed, (ii) hedging instruments and/or (iii) cash held for ancillary liquidity. These investments were not subject to minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During 2023, MSIM's Emerging Markets Investment Advisor met with 50 companies from holdings across the team's platform to discuss environmental and social sustainability issues. Decarbonization continued to be a priority theme in 2023 as the team continued to encourage company management teams to articulate detailed decarbonization plans with both long and short-term targets that are high-quality, feasible and integrated within their business strategy. The team continued to leverage outside resources like Transition Pathway Initiative (TPI) and CDP to analyze large emitters plans for viability and alignment with global climate commitments. The team also engaged with companies on supply chain risks related to environmental and labor supply chain standards, focusing on companies which they felt had the biggest potential impact for change.

The team conducted research on green public policies, including implications on global emissions reduction, deglobalization and demand for green metals, such as copper, zinc, aluminum and lithium. This, along with additional ESG regulatory research, allowed the team to engage with in-scope portfolio companies on their efforts to satisfy existing and upcoming regulatory requirements.

During the reference period, the Investment Adviser continued to engage with investee companies on labor management, employee safety and human rights risks within the supply chain. The team conducted deep research on best practices for human rights including expectations from management and success cases to aid in the assessment of portfolio companies' human rights risk management strategies. The team also led their first official collaborative engagement as part of the UN PRI Advance Initiative, an investor-led initiative with the objective to increase respect for human rights through investor stewardship.

The Investment Adviser continued to push for enhanced transparency and disclosure on issues relating to applicable sustainability metrics. The Investment Adviser continued to engage with companies on executive compensation and board composition, in an effort to understand incentives and alignment with minority shareholders.

The Investment Adviser also monitored investments in the Fund according to the Fund's environmental and social characteristics, to avoid any new investments in excluded countries or activities.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Tailwinds Fund

Legal entity identifier: 254900DU06ANON660Y60

Reference period: 21 November 2023 to 31 December 2023

The Fund was launched on 21 November 2023.

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 29 December 2023.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: ___%**
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective: ___%**

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

. . . and compared to previous periods?

Not applicable. The Fund was launched on 21 November 2023.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Adviser:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 21 November 2023 to 31 December 2023.

Security	Sector	% Assets	Country
UBER TECHNOLOGIES INC	Industrials	4.01%	United States
AXON ENTERPRISE INC	Industrials	3.95%	United States
WASTE CONNECTIONS INC	Industrials	3.59%	United States
PROCORE TECHNOLOGIES INC	Information Technology	3.55%	United States
AMAZON.COM INC	Consumer Discretionary	3.47%	United States
ECOLAB INC	Materials	3.35%	United States
INTERCONTINENTAL EXCHANGE INC	Financials	3.19%	United States
ELI LILLY & CO	Health Care	2.94%	United States
BALL CORP	Materials	2.90%	United States
HOME DEPOT INC/THE	Consumer Discretionary	2.88%	United States
MICROSOFT CORP	Information Technology	2.44%	United States
NU HOLDINGS LTD/CAYMAN ISLANDS	Financials	2.40%	Brazil
MATCH GROUP INC	Communication Services	2.38%	United States
MERCADOLIBRE INC	Consumer Discretionary	2.35%	United States
BRUNELLO CUCINELLI SPA	Consumer Discretionary	2.17%	Italy

% Assets are calculated based on the average of the fund’s investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

98.29% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	21.25%
Industrials	20.47%
Consumer Discretionary	19.99%
Health Care	13.66%
Materials	8.32%
Communication Services	6.40%
Financials	6.09%
Consumer Staples	2.11%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	5.84%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

98.29% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Advantage Fund

Legal entity identifier: 2NPF4LYIICQVCUT1Q64

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy |
| | <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Adviser:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
UBER TECHNOLOGIES INC	Industrials	7.79%	United States
CLOUDFLARE INC	Information Technology	7.29%	United States
SHOPIFY INC	Information Technology	7.11%	Canada
SNOWFLAKE INC	Information Technology	6.98%	United States
TRADE DESK INC/THE	Communication Services	6.57%	United States
DOORDASH INC	Consumer Discretionary	5.11%	United States
ROBLOX CORP	Communication Services	4.77%	United States
ROYALTY PHARMA PLC	Health Care	4.47%	United States

% Assets are calculated based on the average of the fund’s investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

95.98% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	28.27%
Consumer Discretionary	24.25%
Communication Services	16.48%
Health Care	9.80%
Financials	8.33%
Industrials	8.30%
Other	4.02%
Materials	0.55%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.51%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

95.98% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Focus Property Fund

Legal entity identifier: 5493001SWQDPM7UXE392

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund met its social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing or be damaging to social cohesion. The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Manufacturing or production of coal mining	0.00%	0.00%
Manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies that do not have at least one female board member (from 26 July 2023)	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under “How did the sustainability indicators perform?” above, the Fund did not knowingly invest in companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
AMERICAN TOWER CORP	Telecommunications Reits	8.68%	United States
PROLOGIS INC	Industrial	8.58%	United States
WELLTOWER INC	Health Care	8.41%	United States
EQUINIX INC	Data Centers	8.02%	United States
PUBLIC STORAGE	Self Storage	5.09%	United States
AVALONBAY COMMUNITIES INC	Apartments	4.40%	United States
AMERICAN HOMES 4 RENT	Single Family Homes	4.14%	United States
DIGITAL REALTY TRUST INC	Data Centers	4.06%	United States

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

99.18% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were in cash instruments which did not align with the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Industrial	14.98%
Telecommunications REITs	12.97%
Data Centers	12.09%
Health Care	9.41%
Apartments	8.76%
Self Storage	8.17%
Free Standing	6.93%
Shopping Centers	5.47%
Single Family Homes	5.24%
Regional Malls	4.01%
Gaming REITs	3.93%
Specialty	2.69%
Lodging/Resorts	1.72%
Timberland REITs	1.23%
Manufactured Homes	0.88%
Office	0.72%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.63%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope than the coal mining exclusion applied as a binding characteristic to the Fund. This exposure relates to a single issuer deriving approximately 1% of revenue from fossil fuel related activities.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.82% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments which were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, to help manage ESG-related risks and opportunities, the Investment Adviser conducted engagements with select portfolio companies and prioritized active dialogue where positions were significant and/or issues were viewed as material. The Investment Adviser’s constructive dialogue sought to drive positive change, improve sustainability and enhance long-term value creation. As part of this ESG engagement, the Investment Adviser assessed how the company’s ESG risks and initiatives contributed to operating performance, and through conversation evaluated a range of environmental, social and governance topics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Growth Fund

Legal entity identifier: 3G53TROTP001D767EJ04

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
UBER TECHNOLOGIES INC	Industrials	7.50%	United States
SHOPIFY INC	Information Technology	7.29%	Canada
CLOUDFLARE INC	Information Technology	7.28%	United States
SNOWFLAKE INC	Information Technology	7.01%	United States
TRADE DESK INC/THE	Communication Services	6.80%	United States
DOORDASH INC	Consumer Discretionary	4.95%	United States
ROBLOX CORP	Communication Services	4.78%	United States
ROYALTY PHARMA PLC	Health Care	4.38%	United States

% Assets are calculated based on the average of the Fund’s investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

92.95% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	30.58%
Consumer Discretionary	20.57%
Communication Services	12.41%
Health Care	12.20%
Industrials	9.54%
Financials	7.31%
Materials	0.34%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

92.95% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Insight Fund

Legal entity identifier: 549300ZCDS88ZDMP4R16

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Adviser:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
CLOUDFLARE INC	Information Technology	8.33%	United States
AMAZON.COM INC	Consumer Discretionary	6.30%	United States
FLOOR & DECOR HOLDINGS INC	Consumer Discretionary	5.30%	United States
INTERCONTINENTAL EXCHANGE INC	Financials	4.97%	United States
ROYALTY PHARMA PLC	Health Care	4.81%	United States
DANAHER CORP	Health Care	3.72%	United States
RENTOKIL INITIAL PLC	Industrials	3.67%	United Kingdom
EUROFINS SCIENTIFIC SE	Health Care	3.30%	France
ALPHABET INC	Communication Services	3.24%	United States
ILLUMINA INC	Health Care	3.07%	United States
TOPICUS.COM INC	Information Technology	2.71%	Canada
UNION PACIFIC CORP	Industrials	2.64%	United States

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

96.33% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	23.97%
Consumer Discretionary	21.91%
Health Care	16.82%
Industrials	10.40%
Financials	9.16%
Communication Services	4.19%
Materials	3.78%
Consumer Staples	3.76%
Other	3.67%
Real Estate	1.38%
Energy	0.96%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	3.78%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

3.67% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Property Fund

Legal entity identifier: HVED7LWVFTE5K53NJP05

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund met its social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing or be damaging to social cohesion. The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies that do not have at least one female board member (from 26 July 2023)	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under “How did the sustainability indicators perform?” above, the Fund did not knowingly invest in companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
PROLOGIS INC	Industrial	9.64%	United States

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.16% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments which were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, to help manage ESG-related risks and opportunities, the Investment Adviser conducted engagements with select portfolio companies and prioritized active dialogue where positions were significant and/or issues were viewed as material. The Investment Adviser’s constructive dialogue sought to drive positive change, improve sustainability and enhance long-term value creation. As part of this ESG engagement, the Investment Adviser assessed how the company’s ESG risks and initiatives contributed to operating performance, and through conversation evaluated a range of environmental, social and governance topics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Value Fund

Legal entity identifier: 54930ORD1Y0V604C3B19

Reference period: 27 December 2023 to 31 December 2023

This Fund's classification as Article 8 under SFDR became effective on 27 December 2023

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 29 December 2023.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of [•]% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy |
| | <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics.

- The Fund promotes the environmental characteristic of limiting environmental externalities by excluding investments in coal mining, arctic drilling, and nuclear power.
- The Fund promotes the social characteristic of limiting exposure to investments in certain activities which can cause harm to human health and wellbeing, including tobacco, gambling, civilian firearms, controversial weapons, and white phosphorous. Finally, Companies that fail to comply with the UN Global Compact or have experienced severe controversies without material remediation and improvement will also be excluded.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions:		
% of the Fund's exposure to companies which derived revenue from or were involved with:		
Tobacco (>5% revenue)	0.00%	0.00%
Gambling (>5% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Controversial weapons (Any tie)	0.00%	0.00%
Coal mining (>0% revenue)	0.00%	0.00%
Arctic drilling (>0% revenue)	0.00%	0.00%
Nuclear power (>25% revenue)	0.00%	0.00%
White phosphorus (0% revenue)	0.00%	0.00%
% of the Fund's exposure to companies which:	0.00%	0.00%
Failed to comply with the UN Global Compact	0.00%	0.00%
Experienced severe controversies without material remediation and improvement	0.00%	0.00%

... and compared to previous periods?

Not applicable. This Fund's classification as Article 8 under SFDR became effective on 27 December 2023.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through application of the Fund’s exclusionary criteria:

- The Fund excluded companies which derive any revenue from thermal coal mining and arctic drilling. Through these exclusions, the Fund therefore considered in part PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded companies which fail to comply with the UN Global Compact or have experienced severe controversies, without material remediation and improvement. The Fund therefore considered PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded companies which derived any revenue from controversial weapons. The Fund therefore considered PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 27 December 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
AMERICAN INTERNATIONAL GROUP INC	Financials	4.55%	United States
MICRON TECHNOLOGY INC	Information Technology	4.49%	United States
WELLS FARGO & CO	Financials	4.41%	United States
CHARLES SCHWAB CORP/THE	Financials	4.24%	United States

ZOETIS INC	Health Care	3.32%	United States

What was the proportion of sustainability-related investments?

98.53% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

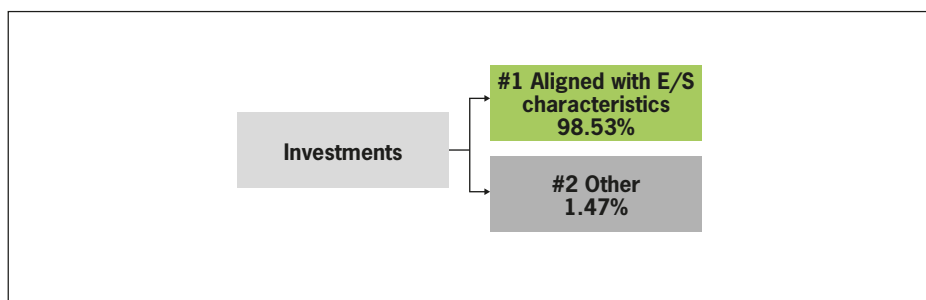

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Financials	17.29%
Health Care	14.14%
Consumer Staples	13.81%
Industrials	13.24%
Information Technology	10.88%
Materials	8.12%
Real Estate	5.96%
Utilities	5.68%
Energy	3.64%
Communication Services	3.13%
Consumer Discretionary	2.65%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	12.01%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the fossil fuel exclusions applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.47% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash and derivatives which were used for efficient portfolio management and currency management. These instruments were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

The Investment Adviser monitored investments in the Fund according to the Fund’s environmental and social characteristics.

The investment team engages with companies’ management teams on ESG issues that are central to the Fund’s underlying fundamental thesis through direct dialogue with companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Vitality Fund**

Legal entity identifier: **5493007UKKJN3WEI4Y14**

Reference period: **01 January 2023 to 31 December 2023**

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Adviser:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
ELI LILLY & CO	Health Care	6.32%	United States
UNITEDHEALTH GROUP INC	Health Care	5.06%	United States
THERMO FISHER SCIENTIFIC INC	Health Care	4.98%	United States
10X GENOMICS INC	Health Care	4.89%	United States
ARGENX SE	Health Care	4.68%	Belgium
VERTEX PHARMACEUTICALS INC	Health Care	4.36%	United States
INTUITIVE SURGICAL INC	Health Care	4.16%	United States
EXACT SCIENCES CORP	Health Care	4.06%	United States
ALNYLAM PHARMACEUTICALS INC	Health Care	3.44%	United States
INSPIRE MEDICAL SYSTEMS INC	Health Care	3.43%	United States
ALIGN TECHNOLOGY INC	Health Care	2.95%	United States
STEVANATO GROUP SPA	Health Care	2.90%	Italy

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

91.70% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Health Care	90.37%
Other	8.30%
Consumer Discretionary	1.32%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited) As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

 Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

8.30% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Calvert Global High Yield Bond Fund

Legal entity identifier: 254900B55Q8A1KYLJN18

Reference period: 28 November 2023 to 31 December 2023

This Fund launched on 28 November 2023

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 29 December 2023.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 44.49% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- **Eligibility in line with Principles-based ESG Materiality Framework:** Through the application of the Calvert Principles for Responsible Investment (the “Calvert Principles”), the Fund promoted environmental sustainability and resource efficiency, equitable societies and respect for human rights, in addition to accountable governance and transparent operations. The Calvert Principles assess investee company activities and behaviours across a number of ESG themes deemed to be material by Calvert, and only issuers whose business practices and governance structure assessed to be consistent with the Calvert Principles were eligible for inclusion in the Fund’s portfolio.
- **Low carbon intensity and portfolio-level decarbonisation:** The Fund promoted the environmental characteristic of climate change mitigation by:
 - maintaining a lower carbon intensity than the ICE BofA Developed Markets High Yield Ex-Subordinated Financial Index (USD-hedged); and
 - aiming to reduce the Fund’s portfolio-level carbon intensity by 50% by year-end 2030, compared to March 30, 2022.
- **Exclusions:** The Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform”).
- **Sustainable Investments:** 44.49% of the Fund’s investments were sustainable investments in:
 - Corporate issuers that were involved in economic activities that address global environmental or societal challenges, or were leaders in managing financially material environmental or social risks and opportunities; or
 - Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, and which passed the ‘do no significant harm’ and good governance requirements of the SFDR. See further details in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Alignment with Principles-based ESG Materiality Framework		
% Fund exposure to issuers that are aligned with the Calvert Principles:	80.00%	95.10%
Carbon intensity		
The Fund's corporate investments will maintain a lower carbon intensity than the ICE BofA Developed Markets High Yield Ex-Subordinated Financial Index (USD-hedged). Carbon intensity is measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue.	248.88%	218.18%
The carbon intensity of the Index and that of the Fund were:		
The Fund aims to reduce its portfolio level WACI by 50% by year-end 2030, compared to the baseline of March 30, 2022.		
The WACI of the baseline is 400.88 tons CO ₂ e/US\$ million revenue.		
While the binding element of this environmental characteristic refers to the year 2030, the Investment Adviser pursues a yearly decarbonisation pathway to achieve this longer-term target, and to correct any potential deviations from such pathway.		
The Fund's annual decarbonisation rate for year-end 2023	n/a	n/a
The Fund's cumulative decarbonisation rate since 30 March 2022 is:	-50% by 2030	-45.57%
Exclusions:		
Corporates:		
% of the Fund's exposure to issuers which derive revenue from:		
Controversial weapons manufacturing or retail (>0% revenue)	0.00%	0.00%
Thermal coal based power generation (10% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Civilian firearms manufacturing or retail (>5% revenue)	0.00%	0.00%
Gambling (>10% revenue)	0.00%	0.00%
Tobacco retail and distribution (>10% revenue)	0.00%	0.00%
% Fund exposure to corporate issuers experiencing very severe ESG controversies	0.00%	0.00%
Sustainable Investments		
% Fund investments that are sustainable investments	30.00%	44.49%

The Fund's decarbonisation pathway represents a continuation of a previous Sustainable Global High Yield Strategy, and therefore the baseline WACI of the Fund's binding characteristic has been calculated by reference to a specified high yield portfolio as of 30 March 2022 (consistent with the previous Sustainable Global High Yield Strategy). This Fund's assets have continued, and will continue, to be managed in line with the original Sustainable Global High Yield Strategy decarbonisation pathway, however, a portion of the cumulative decarbonisation rate represented above took place prior to the launch of this Fund (which occurred on 28 November 2023). Although not a binding characteristic of this Fund, in the interests of transparency to investors, the cumulative decarbonisation rate since the launch of the Fund is -4.96%.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Not applicable. The Fund launched on 28 November 2023.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Bonds from corporate issuers that are involved in economic activities that address global environmental or societal challenges, or are leaders in managing financially material environmental or social risks and opportunities. Environmental or social challenges include environmental sustainability and resource efficiency, diversity, equity and inclusion. This is determined using at least one of the following approaches:
 - Companies that are considered leaders or improvers in managing financially material environmental or social risks and opportunities: Companies performing in the top 20-40% of their peer group on environmental or social factors determined to be financially material to the company, while not falling in the bottom 20-40% in any other material environmental, social, or governance issue according to Calvert's proprietary quantitative and qualitative assessment;
 - Companies considered to be addressing global challenges – climate change: Companies addressing the climate transition, which is evaluated by selecting companies that perform in the top 20-40% of their peer group on material environmental factors, and supported with a qualitative assessment of companies' green solutions, carbon reduction commitments, carbon emission performance trends and/or their progress toward meeting any commitments through their products and services and/ or which demonstrate commitment to the goal of reaching transition to reach net zero greenhouse gas emissions by 2050 or sooner; or
 - Companies considered to be addressing global challenges – diversity, equity and inclusion leaders and improvers: Companies that demonstrate leadership are evaluated based on the gender balance across different levels of the workforce and/or demonstrating leadership in ethnic diversity members relative to the country's demographic in certain applicable countries, as well as leadership in other dimensions of diversity among board members (including age, cultural background, and skill sets), and policies and procedures that adequately support equal opportunity in the hiring process, equal pay and fair promotion. Companies that demonstrate meaningful improvement in diversity practices is evidenced by 1) increased workforce diversity (gender or ethnicity); 2) demonstrated progress after a severe diversity or inclusion controversy; 3) resolved shareholder proposals (for companies based in US and Canada) on diversity and inclusion issues; or 4) identified as an engagement target by Calvert on diversity and inclusion issues.
- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer commits to allocate the proceeds to projects making a positive environmental or social contribution. This includes, but is not limited to, bonds that align with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines. Sustainable Bonds mobilise financing directly towards a multiplicity of environmental and social projects whose focus spans across a number of sustainability objectives. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security, which can include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion. To qualify as sustainable investments, Sustainable

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Bonds held in the Fund must be deemed eligible for investment according to Calvert's proprietary sustainable bond assessment framework, through which the robustness, expected impact and transparency of all such instruments in the Fund are evaluated. All issuances held in the portfolio must be determined by Calvert to be of sufficient quality and rigor. Typically, issuers must receive a score of at least 3 (out of 5, where 5 is best) on the sustainable bond assessment framework to be considered for inclusion in the portfolio.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund seeks to ensure that the sustainable investments of the Fund do not cause significant harm to relevant environmental or social sustainable investment objectives by:

- avoiding investments in issuers that violate minimum social safeguards; and
- excluding issuers which breach thresholds set for the principal adverse impact ("PAI") indicators which Calvert is required to consider by the EU Sustainable Finance Disclosure Regulation ("SFDR") rules, and which are relevant to the investment.

This assessment is conducted using in-house proprietary as well as third-party research on the sustainability characteristics of the Fund's holdings.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund firstly accounted for adverse impacts on sustainability factors through the application of Calvert's existing policies and the Calvert Principles which, as noted previously, consider how the investee companies' impacts – positive and negative – on the environment, society, and human rights (among other ESG issues) through their activities or corporate behaviour, can have financially material effects on their business.

The “do no significant harm” methodology applied by Calvert on sustainable investments additionally excluded investments that cause harm to any of the PAI indicators which are mandatory for Calvert to consider under the EU SFDR rules, and which were relevant to the investment.

Calvert has determined specific metrics and quantitative thresholds for what constitutes significant harm to screen PAI indicators that are relevant to the investment, using third-party data as well as in-house research. The thresholds are set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. Different metrics or thresholds may apply to issuers located in developed markets and in emerging markets, respectively. This is intended to reflect the different extent to which Calvert deems that meeting minimum sustainability standards in these markets is currently achievable.

Calvert used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. The use of proxy indicators will be kept under review, and will be replaced by data from third-party data providers when Calvert determines that sufficiently reliable data has become available.

Calvert concluded an issuer was not causing significant harm if desktop research supports such a conclusion for one of the following reasons:

- (i) the issuer had taken demonstrated steps and actions to address the potential significant harm such as through the adoption of time bound targets and goals or dedicated remediation activities and there were clear meaningful signs of improvement and positive change;
- (ii) the issuer had been identified by news sources and data vendors as being involved or potentially being involved in a controversy, however the controversy was at the level of unverified allegations; or the underlying issue appeared to be resolved through corporate, regulator or other action; or data vendor information available about the controversy was considered out of date by at least a year and further information showing steps towards positive resolution of the controversy was available;
- (iii) the underlying third party data point was subjective in nature (e.g. vendors made different assessments of UNGC compliance given differing proprietary methodologies in the absence of a UN-defined list of violators) and Calvert's own research provided an alternative viewpoint;
- (iv) Calvert had reason to believe that third party data was inaccurate (e.g. outdated, or based on estimates or flawed data assumptions) and Calvert's own research demonstrated that the issuer was not causing significant harm; or
- (v) Calvert had taken action to engage with the underlying issuer on the specific areas of potential harm to ensure adequate remedial steps were taken.

Calvert generally conducted the PAI assessment at the issuer level. However, where appropriate the assessment was done at security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that are directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through Calvert's proprietary Sustainable Bond Evaluation Framework. As an example, the Fund invested in a Green Bond issued by a utility company that has a negative assessment under the PAI indicators related

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

to carbon intensity, however Calvert evaluated that the issuer has a credible strategy to reduce its GHG emissions, and that the Green Bond purchased for the Fund specifically contributes towards such goal. Other PAI indicators that were unrelated to the Sustainable Bond's use of proceeds were still assessed at the issuer level. The Fund's PAI assessment was supported, on a qualitative basis, by Calvert's engagement with selected issuers.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excluded from the entirety of the portfolio issuers which have experienced very severe controversies, including those related to violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, the ILO Fundamental Principles, or the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

Through the application of the Calvert Principles to all investments in the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles.

In particular, application of the Calvert Principles considers whether issuers:

- demonstrate poor management of environmental risks or contribute significantly to local or global environmental problems;
- demonstrate a pattern of employing forced, compulsory or child labour;
- exhibit a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibit a pattern and practice of violating the rights and protections of Indigenous Peoples.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The Fund considers the PAI indicators through some of the Fund’s binding criteria as follows:

- The Fund maintained a lower carbon intensity than the reference benchmark, and aimed to halve its portfolio-level carbon intensity by 2030. The Fund therefore considered in whole the PAI indicator 3: GHG intensity of investee companies.
- Through Calvert’s proprietary sustainable bond assessment framework, the Investment Adviser considered whether the Fund’s Green Bond investments were associated with an issuer operating in a fossil fuel sector, and/or with any projects related to fossil fuels. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered in whole the PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 28 November 2023 to 31 December 2023.

What were the top investments of this financial product?

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

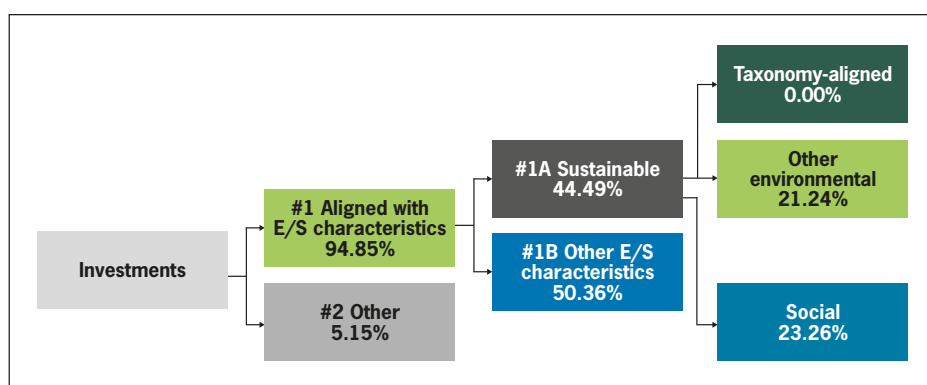

What was the proportion of sustainability-related investments?

94.85% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

44.49% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Industrials	18.75%
Consumer Discretionary	14.01%
Communication Services	13.17%
Materials	12.37%
Health Care	10.11%
Information Technology	7.32%
Utilities	5.92%
Consumer Staples	5.50%
Financials	4.80%
Energy	1.48%
Real Estate	1.42%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	6.42%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

21.24% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

23.26% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

5.15% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics, to avoid any new investments in excluded countries or activities.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Calvert Sustainable Global Green Bond Fund

Legal entity identifier: 549300Q43ZZQCDYRE581

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective: 93.32%**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective: 5.31%**

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in certain types of bonds, which included the following instruments:

- bonds that were labelled “Green” by the issuer, whose proceeds were targeted to environmentally beneficial projects
- Sustainability Bonds, with a proportion of the proceeds targeted to environmentally beneficial projects; and
- Sustainability-linked Bonds, with environmental key performance indicators and targets.

All of the bonds above are referred to as “Green Bonds” in this disclosure.

On an ancillary basis, and as further described in the section “What was the asset allocation?” below, the Fund also invested in bonds which were deemed by the Investment Adviser to make a significant social positive contribution based on the Investment Adviser’s proprietary sustainability bond assessment framework.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
% of the Fund’s portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund’s portfolio which was compliant with the Calvert Principles were:	90.00%	98.63%
Fund investments deemed eligible according to its Sustainable Bond Assessment framework, by receiving a score of at least three (on a scale of one to five, where five is best). The percentage of Fund investments which the Investment Adviser aimed to be deemed eligible according to its Sustainable Bond Evaluation Framework, and the actual percentage of Fund investments which met these criteria were:	90.00%	98.63%
Exclusions:		
% Fund exposure to corporate issuers deriving revenue from:		
manufacturing or production of controversial weapons	0.00%	0.00%
manufacturing or production of civilian firearms (>0% revenue until 26 December 2023 and >5% revenue from 27 December 2023)	0.00%	0.00%
manufacturing or production of tobacco	0.00%	0.00%
% Fund exposure to corporate issuers deriving more than 10% of revenue from:		
distribution or retail of tobacco	0.00%	0.00%
gambling	0.00%	0.00%
adult entertainment (until 27 December 2023)	0.00%	0.00%
% Fund exposure to corporate issuers which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund's sustainable investments did not cause significant harm to any environmental or social objective by avoiding investments in issuers that violated minimum social safeguards and by excluding issuers which breached thresholds set for the principal adverse impact ("PAI") indicators which the Investment Adviser is required to consider by the Sustainable Finance Disclosure Regulation ("SFDR") rules, and which are relevant to the investment.

This assessment was conducted using in-house proprietary as well as third-party research on the sustainability characteristics of the Fund's holdings.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules and which are relevant to the investment.

The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser used an indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy.

These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, where appropriate the assessment was conducted at security level in whole or in part (for example, PAI indicators directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level), with respect to the assets underlying a securitised investment or taking into account the activities of the originator.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third-party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”

What were the top investments of this financial product?

Security	Sector	% Assets	Country

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

98.63% of the Fund’s investments were sustainable investments.

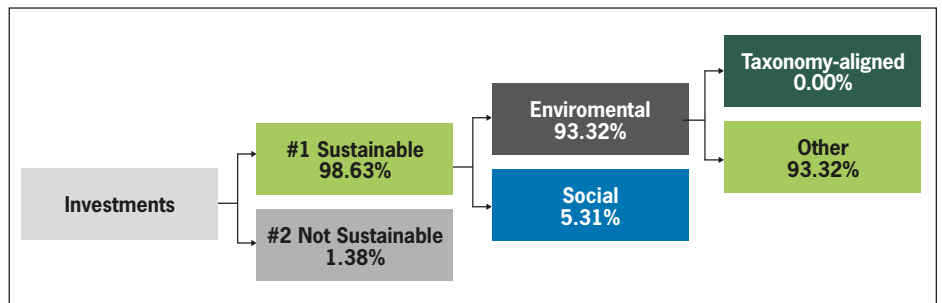

93.32% of the Fund comprised sustainable investments with an environmental objective.

5.31% of the Fund comprised sustainable investments with a social objective.

The Fund’s remaining assets were held in cash and hedging instruments, as described below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund’s methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	44.42%
Securitised	11.47%
Utilities	11.46%
Sovereigns	9.71%
Supranationals & Agencies	7.13%
Real Estate	5.65%
Consumer Discretionary	2.84%
Industrials	2.22%
Communication Services	2.05%
Materials	0.94%
Information Technology	0.38%
Health Care	0.35%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	1.06%

The investments in this Fund include primarily green and sustainability use of proceeds bonds, which contribute to environmental projects that help reduce GHG emissions associated with fossil fuels. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures two issuers deriving some revenue from such activities as part of their business. Of those two investments, one is a sustainability-linked bond with a commitment by the issuer to reduce its GHG emissions and increase renewable energy capacity, and the other one is a pure-play renewable energy company, with minimal revenue exposure (<2%) to fossil fuel power generation.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

93.32% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments which the Investment Adviser has assessed and reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

5.31% of the Fund's investments were sustainable investments with a social objective.

As noted above, some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

1.38% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's sustainable investment objective. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, some investments became restricted due to issuers becoming ineligible according to the Calvert Principles.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Corporate Debt Fund

Legal entity identifier: 5493007BB7NIVVCOWZ40

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31.57% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments. in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	10.00%	31.57%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	10.00%	31.80%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

“The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

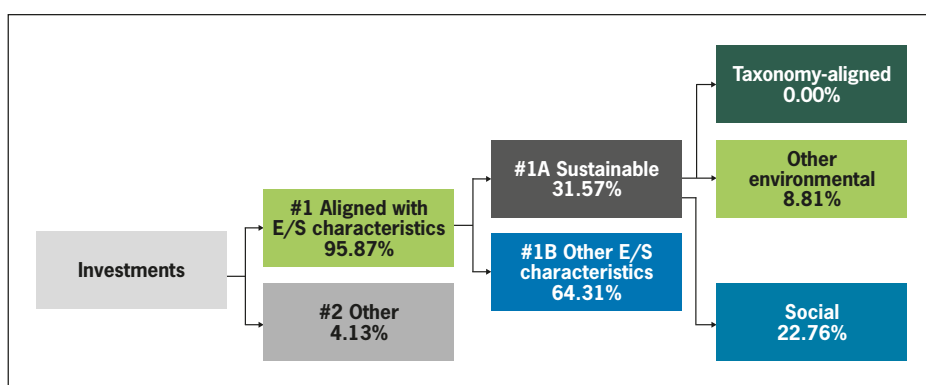

What was the proportion of sustainability-related investments?

95.87% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

31.57% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	32.69%
Energy	13.06%
Utilities	10.11%
Materials	8.78%
Consumer Discretionary	7.05%
Communication Services	6.07%
Industrials	5.94%
Consumer Staples	4.98%
Real Estate	3.51%
Supranationals & Agencies	1.79%
Sovereigns	0.97%
Health Care	0.94%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	19.93%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers with any ties to such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

8.81% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

22.76% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

4.13% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Debt Fund

Legal entity identifier: LTF85HOHIJ7QD9N5L226

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the social characteristic of avoiding investments in sovereign issuers that significantly violate social rights and in investments which can cause harm to human health and wellbeing. In addition, the Fund promoted the environmental characteristic of climate change mitigation by avoiding investments where thermal coal mining and extraction represents a certain percentage of a company's revenue.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

There were some minor exceptions to the Fund's attainment of certain environmental and social characteristics, which are explained in more detail below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Exclusions – Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries social violations	0.00%	0.02%

As of end of Q2 2023, the Fund held an average of 0.02% of its net asset value in a derivative instrument providing indirect exposure to a country that does not satisfy the Fund's social characteristic of excluding investments in the bottom-10% ranked countries on social violations. Given this investment is a derivative instrument, it is classified under the "Other" category, as per the Fund's asset allocation table further below. As such, the investment is not subject to the environmental and social criteria applied to the Fund. Notwithstanding this, the Investment Adviser is disclosing this holding in the spirit of transparency, and in line with the Fund's non-binding aim not to invest in derivatives associated with underlying assets, currencies or interest rates related to countries that would otherwise be subject to the social violations, the Investment Adviser sold such investment at the beginning of Q3 2023, keeping in mind the best interests of the Fund's shareholders.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Exclusions – Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries social violations	0.00%	0.03%

As of December 31, 2022, the Fund held 0.03% of its Net Asset Value in a derivative instrument providing indirect exposure to a country that does not satisfy the Fund's social characteristic of excluding investments in the bottom-10% ranked countries on social violations. Given this investment was a derivative instrument, it was classified under the "Other" category, and as such it was not subject to the environmental and social criteria applied to the Fund. Notwithstanding this, the Investment Adviser disclosed this holding in the spirit of transparency. The Investment Adviser sold this investment in Q3 2023, as described above.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) in part through its exclusionary criteria, as follows:

- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on a custom indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.
- The Fund excluded any corporate issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded any corporate issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

The Fund did not consider any other PAI indicators.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

94.70% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging or investment purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards, as described below (in answer to the question, "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?").

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Sovereigns	59.88%
Energy	9.49%
Financials	5.61%
Materials	5.31%
Communication Services	4.09%
Consumer Staples	2.99%
Utilities	2.48%
Industrials	2.29%
Health Care	0.88%
Real Estate	0.83%
Consumer Discretionary	0.45%
Supranationals & Agencies	0.42%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	11.28%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund may include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

5.30% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for investment or hedging purposes, and they were not subject to any minimum environmental or social safeguards. For the avoidance of doubt, the Fund, nevertheless, did not invest in any derivatives associated with underlying assets, currencies, or interest rates related to countries that would otherwise be subject to the social violations exclusion described under the binding characteristics of the Fund. Any exceptions have been disclosed under “How did the sustainability indicators perform?” above.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser engaged with selected sovereign and corporate bond issuers on their governance practices, as well as on other material sustainability issues related to the Sustainable Development Goals, including sustainability-related controversies or breaches of international norms and principles. Such engagement activities supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Debt Opportunities Fund

Legal entity identifier: 54930003QKRHK5C2BJ98

Reference period: 11 August 2023 to 31 December 2023

The Fund launched on 11 August. The Eaton Vance International (Ireland) Emerging Markets Debt Opportunities Fund merged with this Fund on the same date.

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the social characteristic of avoiding investments in sovereign issuers that significantly violate social rights and in investments which can cause harm to human health and wellbeing. In addition, the Fund promoted the environmental characteristic of climate change mitigation by avoiding investments where thermal coal mining and extraction represents a certain percentage of a company's revenue.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Exclusions – Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries social violations	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

The Fund launched on 11 August. The information for previous periods is available in the Periodic Disclosure for Eaton Vance International (Ireland) Emerging Markets Debt Opportunities Fund.

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Exclusions – Sovereigns:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: from 11 August 2023 to 31 December 2023.

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

85.51% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging or investment purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards, as described below (in answer to the question, "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?").

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Sovereigns	50.44%
Financials	10.77%
Energy	6.12%
Materials	5.19%
Communication Services	3.57%
Consumer Staples	2.66%
Utilities	2.55%
Industrials	1.95%
Real Estate	0.96%
Health Care	0.74%
Consumer Discretionary	0.59%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	7.83%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund may include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

14.50% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for investment or hedging purposes, and they were not subject to any minimum environmental or social safeguards. For the avoidance of doubt, the Fund, nevertheless, did not invest in any derivatives associated with underlying assets, currencies, or interest rates related to countries that would otherwise be subject to the social violations exclusion described under the binding characteristics of the Fund.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser engaged with selected sovereign and corporate bond issuers on their governance practices, as well as on other material sustainability issues related to the Sustainable Development Goals, including sustainability-related controversies or breaches of international norms and principles. Such engagement activities supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Exclusions – Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries social violations	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) in part through its exclusionary criteria, as follows:

- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on a custom indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.
- The Fund excluded any corporate issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded any corporate issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

The Fund did not consider any other PAI indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

93.34% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging or investment purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards, as described below (in answer to the question, "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?").

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Sovereigns	91.69%
Financials	1.64%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund may include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

The Fund did not have any exposure to securities or issuers deriving revenue from the fossil fuel related activities listed in the table above.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

6.67% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for investment or hedging purposes, and they were not subject to any minimum environmental or social safeguards. For the avoidance of doubt, the Fund, nevertheless, did not invest in any derivatives associated with underlying assets, currencies, or interest rates related to countries that would otherwise be subject to the social violations exclusion described under the binding characteristics of the Fund.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser engaged with selected sovereign and corporate bond issuers on their governance practices, as well as on other material sustainability issues related to the Sustainable Development Goals, including sustainability-related controversies or breaches of international norms and principles. Such engagement activities supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Fixed Income Opportunities Fund

Legal entity identifier: 549300Y6JEXZ00JBV556

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the social characteristic of avoiding investments in sovereign issuers that significantly violate social rights and in investments which can cause harm to human health and wellbeing. In addition, the Fund promoted the environmental characteristic of climate change mitigation by avoiding investments where thermal coal mining and extraction represents a certain percentage of a company's revenue.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Exclusions – Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries social violations	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

90.38% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging or investment purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards, as described below (in answer to the question, "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?").

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Sovereigns	56.36%
Financials	8.04%
Energy	6.46%
Materials	5.25%
Communication Services	4.45%
Consumer Staples	2.63%
Industrials	2.45%
Utilities	2.39%
Health Care	0.90%
Real Estate	0.82%
Consumer Discretionary	0.59%
Supranationals & Agencies	0.04%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	8.04%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund may include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

9.62% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for investment or hedging purposes, and they were not subject to any minimum environmental or social safeguards. For the avoidance of doubt, the Fund, nevertheless, did not invest in any derivatives associated with underlying assets, currencies, or interest rates related to countries that would otherwise be subject to the social violations exclusion described under the binding characteristics of the Fund.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser engaged with selected sovereign and corporate bond issuers on their governance practices, as well as on other material sustainability issues related to the Sustainable Development Goals, including sustainability-related controversies or breaches of international norms and principles. Such engagement activities supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Local Income Fund

Legal entity identifier: 54930003MCFYJBQA4A94

Reference period: 11 August 2023 to 31 December 2023

The Fund launched on 11 August. The Eaton Vance International (Ireland) Emerging Markets Local Income Fund merged with this Fund on the same date.

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the social characteristic of avoiding investments in sovereign issuers that significantly violate social rights and in investments which can cause harm to human health and wellbeing. In addition, the Fund promoted the environmental characteristic of climate change mitigation by avoiding investments where thermal coal mining and extraction represents a certain percentage of a company's revenue.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusions – Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries social violations	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) in part through its exclusionary criteria, as follows:

- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on a custom indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.
- The Fund excluded any corporate issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded any corporate issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

The Fund did not consider any other PAI indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 11 August 2023 to 31 December 2023.

% Assets are calculated based on the average of the fund's investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

78.17% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging or investment purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards, as described below (in answer to the question, "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?").

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Sovereigns	74.42%
Financials	3.27%
Industrials	0.25%
Communication Services	0.18%
Consumer Staples	0.05%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund may include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

The Fund did not have any exposure to securities or issuers deriving revenue from the fossil fuel related activities listed in the table above.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

21.84% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for investment or hedging purposes, and they were not subject to any minimum environmental or social safeguards. For the avoidance of doubt, the Fund, nevertheless, did not invest in any derivatives associated with underlying assets, currencies, or interest rates related to countries that would otherwise be subject to the social violations exclusion described under the binding characteristics of the Fund.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser engaged with selected sovereign and corporate bond issuers on their governance practices, as well as on other material sustainability issues related to the Sustainable Development Goals, including sustainability-related controversies or breaches of international norms and principles. Such engagement activities supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Euro Bond Fund

Legal entity identifier: GUL4X2DG7SIORG2PJB64

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 55.43% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of certain environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%

Sustainable Investments:		
% Fund investments that are sustainable investments	30.00%	52.67%

In Q1 2023 the Investment Adviser sold one investment held since 2022, which no longer met the Fund's exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from the extraction of thermal coal, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association (“ICMA”)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

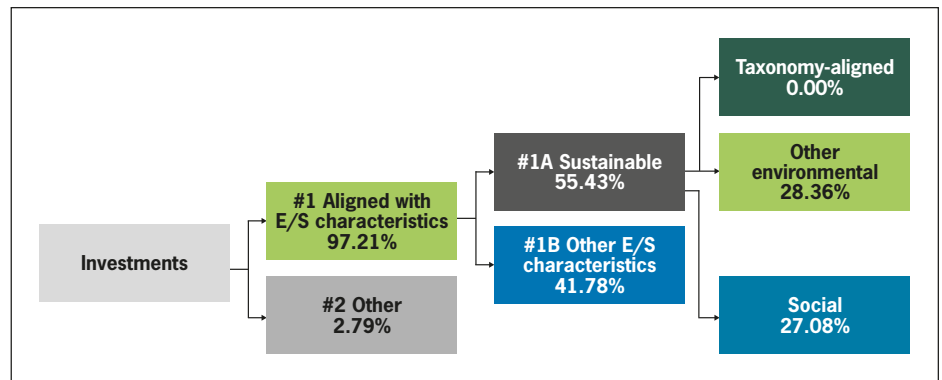

What was the proportion of sustainability-related investments?

97.21% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

55.43% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	46.95%
Sovereigns	28.61%
Supranationals & Agencies	7.56%
Industrials	3.74%
Utilities	2.45%
Energy	1.48%
Real Estate	1.48%
Communication Services	1.22%
Securitized	1.19%
Consumer Discretionary	1.15%
Materials	0.65%
Health Care	0.41%
Consumer Staples	0.34%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.30%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

28.36% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

27.08% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.79% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, some investments became restricted due to issuers exceeding revenue thresholds for restricted activities.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Euro Corporate Bond – Duration Hedged Fund

Legal entity identifier: 549300AEOIVRQNYMMX43

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 54.60% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : __% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments. in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of certain environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	40.00%	54.60%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.55%
Sustainable Investments:		
% Fund investments that are sustainable investments	40.00%	50.70%

In Q1 2023 the Investment Adviser sold one investment held since 2022, which no longer met the Fund's exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from the extraction of thermal coal, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

96.57% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

54.60% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	46.66%
Utilities	14.25%
Real Estate	7.75%
Energy	5.69%
Communication Services	4.71%
Health Care	4.54%
Consumer Discretionary	4.19%
Industrials	4.09%
Materials	3.00%
Consumer Staples	1.36%
Supranationals & Agencies	0.33%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	16.26%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

29.03% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

25.57% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.44% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, some investments became restricted due to issuers exceeding revenue thresholds for restricted activities.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Euro Corporate Bond Fund

Legal entity identifier: 28WYH088EMGB02JCXS87

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 57.26% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	40.00%	57.26%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.42%
Sustainable Investments:		
% Fund investments that are sustainable investments	40.00%	50.32%

In Q1 2023 the Investment Adviser sold one investment held since 2022, which no longer met the Fund's exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from the extraction of thermal coal, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

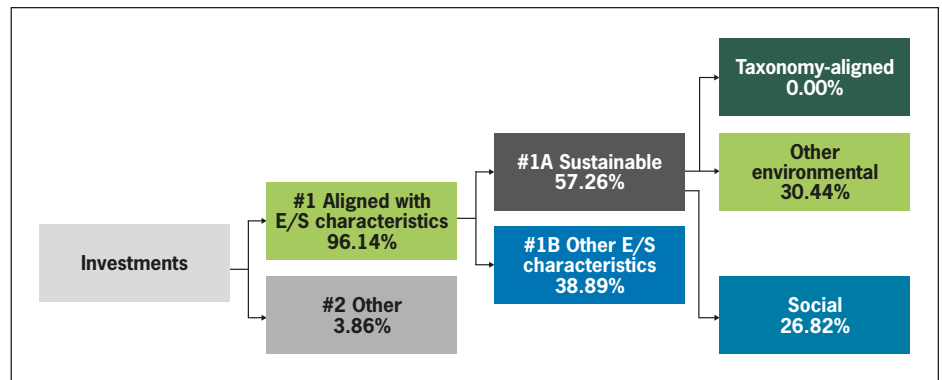

What was the proportion of sustainability-related investments?

96.14% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

57.26% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	49.27%
Utilities	13.31%
Communication Services	5.47%
Industrials	5.02%
Real Estate	4.75%
Health Care	4.47%
Energy	4.34%
Consumer Discretionary	3.93%
Materials	2.73%
Consumer Staples	2.20%
Information Technology	0.40%
Supranationals & Agencies	0.28%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	12.44%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers with any ties to such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

30.44% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

26.82% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.86% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, some investments became restricted due to issuers exceeding revenue thresholds for restricted activities.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Euro Strategic Bond Fund

Legal entity identifier: WJOVQOXBWMTMJ8MSW75

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50.62% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of certain environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries for social violations	0.00%	0.00%
Securitisations:		
% Fund exposure to securitisations affected by:		
Predatory lending	0.00%	0.00%
Consumer protection breach	0.00%	0.00%
Controversies	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	30.00%	50.62%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Consumer protection breach	0.00%	0.00%
Controversies	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	30.00%	43.95%

In Q1 2023 the Investment Adviser sold one investment held since 2022, which no longer met the Fund's exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from the extraction of thermal coal, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association (“ICMA”)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

97.76% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

50.62% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	37.56%
Sovereigns	28.19%
Utilities	7.07%
Supranationals & Agencies	5.36%
Communication Services	3.04%
Consumer Discretionary	2.90%
Energy	2.84%
Industrials	2.68%
Real Estate	2.04%
Health Care	1.99%
Materials	1.69%
Consumer Staples	1.21%
Securitised	1.20%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	7.22%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

25.74% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

27.08% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

24.89% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, some investments became restricted due to issuers exceeding revenue thresholds for restricted activities.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: European Fixed Income Opportunities Fund

Legal entity identifier: 549300NSROFF1GG4P265

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 44.15% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association (“ICMA”)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

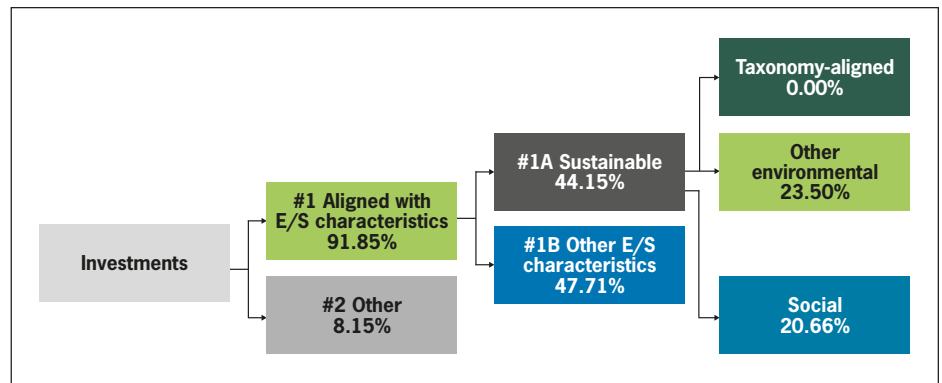

What was the proportion of sustainability-related investments?

91.85% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

44.15% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	31.79%
Sovereigns	17.76%
Utilities	9.97%
Securitized	9.96%
Consumer Discretionary	3.96%
Communication Services	3.42%
Industrials	3.28%
Energy	2.88%
Real Estate	2.52%
Health Care	2.16%
Materials	1.89%
Consumer Staples	1.18%
Supranationals & Agencies	1.11%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	7.51%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

23.50% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

20.66% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

8.15% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: European High Yield Bond Fund

Legal entity identifier: CV1X7ZNWEZI3HOSHCK68

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 34.74% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	34.74%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	32.73%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
TELEFONICA EUROPE BV HYBRID-P 4.375 31-DEC-2079 REG-S (CAPSEC (BTP))	Communication Services	2.32%	Spain

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

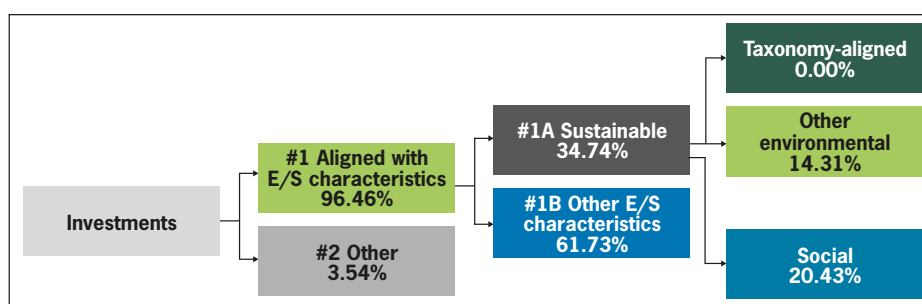

What was the proportion of sustainability-related investments?

96.46% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

34.74% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Communication Services	24.45%
Consumer Discretionary	18.57%
Industrials	13.18%
Materials	12.34%
Health Care	8.82%
Financials	6.11%
Utilities	3.95%
Energy	3.09%
Consumer Staples	2.97%
Real Estate	2.03%
Information Technology	0.97%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	6.77%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

 Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

14.31% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

20.43% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.54% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Floating Rate ABS Fund

Legal entity identifier: 549300T7UJE2TXHL2Z08

Reference period: 07 February 2023 to 31 December 2023

The Fund was launched on 7 February 2023.

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: ___%**
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective: ___%**

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the social characteristic of avoiding investments in securitisations that violate responsible business or lending practices.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Securitisations:		
Predatory lending	0.00%	0.00%
Severe malpractice	0.00%	0.00%
Severe consumer protection breach	0.00%	0.00%
Very severe controversies	0.00%	0.00%

. . . and compared to previous periods?

Not applicable. The Fund was launched on 7 February 2023.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund did not consider principal adverse impact (“PAI”) indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 07 February 2023 to 31 December 2023.

% Assets are calculated based on the average of the fund’s investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

97.45% of the Fund's investments attained the promoted social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes which did not attain the promoted environmental characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Asset-Backed Securities	59.34%
Commercial Mortgage-Backed Securities	36.71%
Collateralised Mortgage Obligations	1.40%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund did not have any exposure to securities or issuers deriving revenue from the fossil fuel related activities listed in the table above.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.55% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s social characteristics, to avoid any new investments in excluded countries or activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Asset Backed Securities Fund

Legal entity identifier: 5493000D3CS7FYLIY330

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the social characteristic of avoiding investments in securitisations that violate responsible business or lending practices.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Securitisations:		
Predatory lending	0.00%	0.00%
Severe malpractice	0.00%	0.00%
Severe consumer protection breach	0.00%	0.00%
Very severe controversies	0.00%	0.00%

... and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Securitisations:		
Predatory lending	0.00%	0.00%
Severe malpractice	0.00%	0.00%
Severe consumer protection breach	0.00%	0.00%
Very severe controversies	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund did not consider principal adverse impact (“PAI”) indicators.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
UMBS 30YR TBA CASH 5.5	Mortgage-Backed Securities	1.43%	United States

% Assets are calculated based on the average of the fund’s investments at each quarter end during the reference period.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

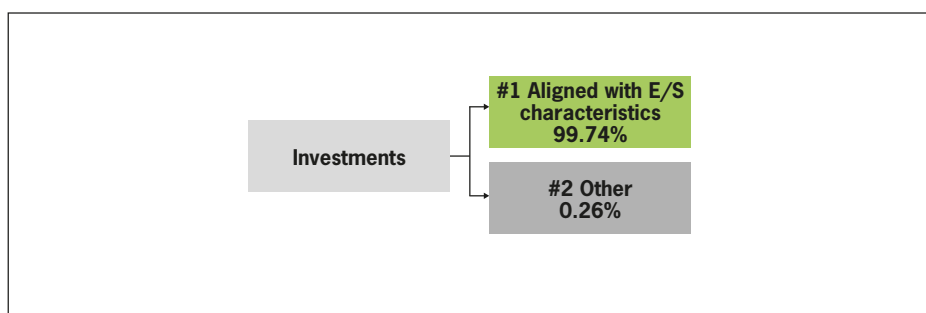

What was the proportion of sustainability-related investments?

99.74% of the Fund's investments attained the promoted social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes which did not attain the promoted environmental characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Mortgage-Backed Securities	28.78%
Asset-Backed Securities	32.15%
Collateralised Mortgage Obligations	21.57%
Commercial Mortgage-Backed Securities	15.24%
Financials	2.00%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund did not have any exposure to securities or issuers deriving revenue from the fossil fuel related activities listed in the table above.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.26% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s social characteristics, to avoid any new investments in excluded countries or activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Bond Fund

Legal entity identifier: XTIK5CR06MPXCNP7M95

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 24.95% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association (“ICMA”)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

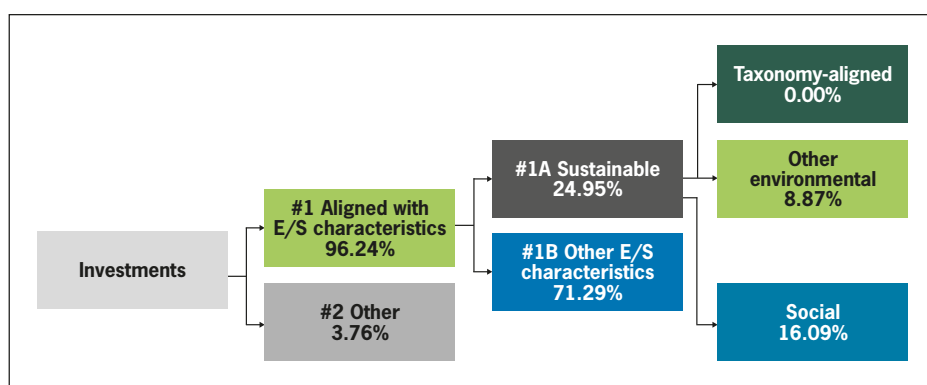

What was the proportion of sustainability-related investments?

96.24% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

24.95% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Sovereigns	31.87%
Securitised	25.78%
Financials	16.16%
Supranationals & Agencies	4.02%
Communication Services	3.57%
Energy	3.01%
Utilities	2.44%
Consumer Discretionary	2.29%
Industrials	1.89%
Materials	1.76%
Real Estate	1.13%
Health Care	1.07%
Information Technology	1.05%
Consumer Staples	0.23%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	5.05%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

8.87% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

16.09% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.76% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, some investments became restricted due to issuers exceeding revenue thresholds for restricted activities.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Convertible Bond Fund

Legal entity identifier: K3YUM7KVVWUDP746NXC39

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 59.61% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	59.61%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	51.01%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
CELLNEX TELECOM SA 0.5 05-JUL-2028 Reg-S (SENIOR)	Communication Services	1.50%	Spain

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

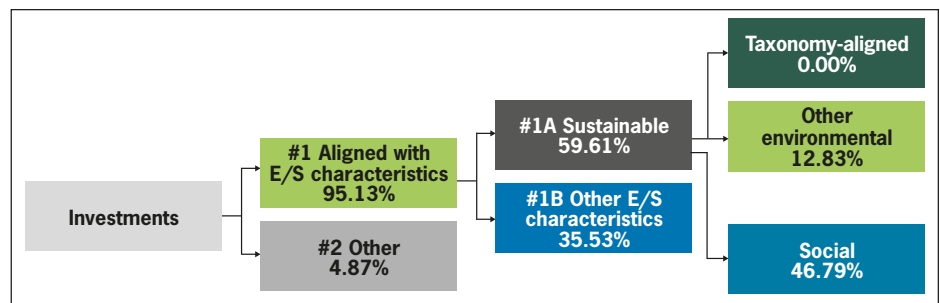

What was the proportion of sustainability-related investments?

95.13% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

59.61% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	21.98%
Consumer Discretionary	13.59%
Financials	12.84%
Health Care	11.84%
Industrials	11.22%
Communication Services	8.49%
Materials	5.80%
Utilities	4.40%
Consumer Staples	3.17%
Energy	1.44%
Real Estate	0.37%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	8.26%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Sustainable Investments		
% Fund investments that are sustainable investments	40.00%	57.35%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

“The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

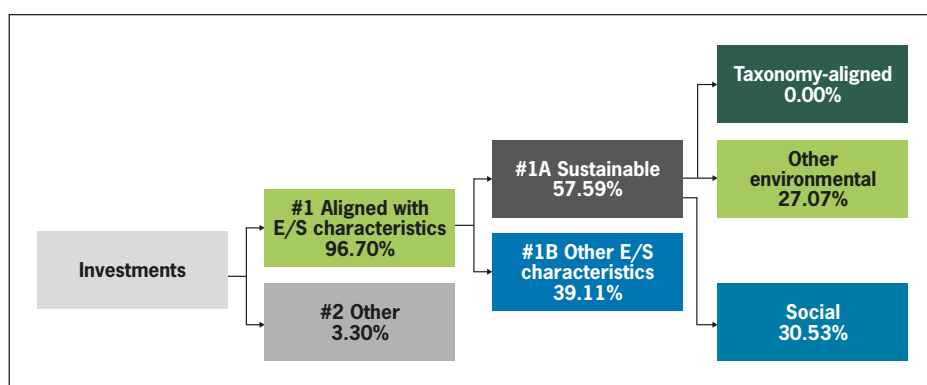

What was the proportion of sustainability-related investments?

96.70% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

57.59% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	47.90%
Utilities	10.74%
Communication Services	7.17%
Industrials	5.77%
Energy	5.28%
Health Care	4.81%
Real Estate	4.02%
Consumer Discretionary	3.25%
Information Technology	2.89%
Materials	2.51%
Consumer Staples	2.39%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	11.37%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers with any ties to such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

27.07% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

30.53% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.30% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Credit Opportunities Fund

Legal entity identifier: 549300RJVHWGXPDQLQ16

Reference period: 28 February 2023 to 31 December 2023

The Fund was launched on 28 February 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50.20% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Sustainable Investments		
% Fund investments that are sustainable investments	30.00%	50.20%

. . . and compared to previous periods?

Not applicable. The Fund was launched on 28 February 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

96.55% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

50.20% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	38.07%
Energy	9.52%
Utilities	8.43%
Communication Services	7.21%
Materials	7.18%
Real Estate	5.57%
Consumer Discretionary	5.39%
Industrials	4.91%
Health Care	4.52%
Information Technology	3.13%
Consumer Staples	1.51%
Supranationals & Agencies	1.12%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	15.90%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers with any ties to such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

22.05% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

28.15% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.45% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Fixed Income Opportunities Fund

Legal entity identifier: 549300GM4KLC6LR0TV49

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 26.03% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association (“ICMA”)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

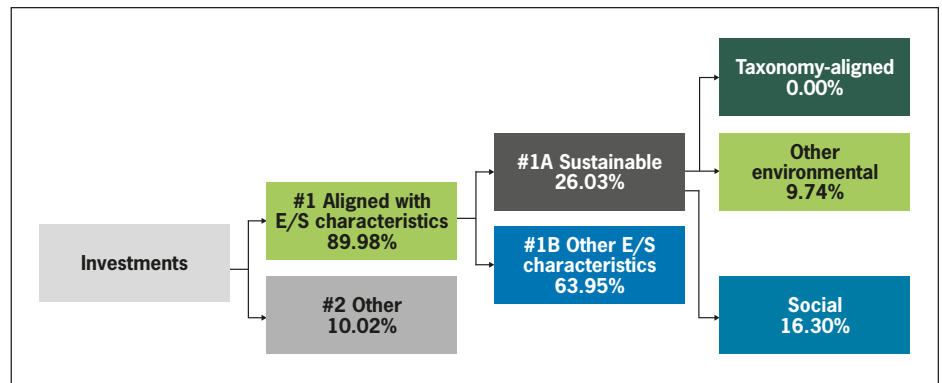

What was the proportion of sustainability-related investments?

89.98% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

26.03% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Securitised	34.86%
Financials	17.42%
Sovereigns	15.68%
Consumer Discretionary	3.69%
Communication Services	3.29%
Industrials	3.00%
Energy	2.84%
Utilities	2.60%
Materials	2.36%
Health Care	1.81%
Information Technology	0.80%
Real Estate	0.73%
Supranationals & Agencies	0.64%
Consumer Staples	0.26%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	4.88%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

9.74% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

16.30% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

10.02% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global High Yield Bond Fund (previously named Sustainable Global High Yield Bond Fund)

Legal entity identifier: 549300IGC07J6GON2H29

Reference period: 01 January 2023 to 31 December 2023

This Fund was renamed on 20 October.

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure. The Fund's sustainability indicators were amended on 20 October 2023. Please see additional detail in response to "How did the sustainability indicators perform?"

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 36.21% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
20 October 2023 - 31 December 2023		
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Thermal coal mining and extraction (>5% revenue)	0%	0.0%
Controversial weapons (>0% revenue)	0%	0.0%
Civilian firearms (>0% revenue)	0%	0.0%
Tobacco manufacturing (>0% revenue)	0%	0.0%
Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	30.24%
1 January 2023 - 19 October 2023		
Carbon intensity footprint lower than the corporate portion of the ICE BofA Developed Markets High Yield Ex-Subordinated Financial Index (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	271.66	174.50
Net zero emissions by 2050 - emissions compared to baseline (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	n/a	n/a
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Thermal coal mining and extraction (>0% revenue)	0%	0.0%
Controversial weapons (>0% revenue)	0%	0.0%
Civilian firearms (>0% revenue)	0%	0.0%
Tobacco manufacturing (>0% revenue)	0%	0.0%
Oil sands extraction (>5% revenue)	0%	0.0%
Arctic oil & gas production (>5% revenue)	0%	0.0%
Coal-fired power generation (>10% revenue)	0%	0.0%
Gambling (>10% revenue)	0%	0.0%
Tobacco retail and distribution (>10% revenue)	0%	0.0%
Adult entertainment (>10% revenue)	0%	0.0%
% Fund exposure to corporate issuers experiencing very severe ESG controversies	0%	0.0%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
ESG Tilt:		
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	94.13%
Calvert Principles (20% investible universe reduction)	20.00%	22.71%
Sustainable Investments:		
% Fund investments that are sustainable investments	20.00%	38.19%

On 20 October 2023, the Fund's investment policy was amended and the Fund was renamed (the "Portfolio Changes"). As part of these Portfolio Changes, the Fund's restriction screening policy was amended, its net zero objective and positive ESG tilt were removed, and the minimum commitment to sustainable investments with an environmental or social objective was reduced from 20% to 5%.

The sustainability indicator values presented above are based on the applicable quarter-end values, (before and after 20 October 2023), that the Fund's respective investment policies were in place. The annual reduction in carbon intensity has not been calculated for 2023, as the applicable sustainability indicator (which relies on year-end values) was no longer in place at the end of the year.

% Fund investments that are sustainable investments	20.00%	36.42%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

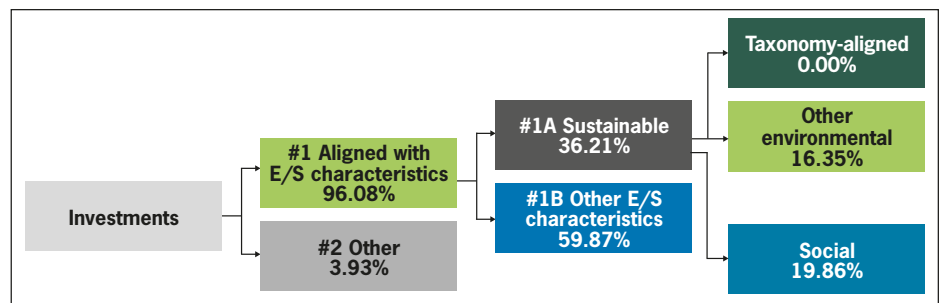

What was the proportion of sustainability-related investments?

96.08% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

36.21% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Industrials	17.96%
Communication Services	14.72%
Consumer Discretionary	14.32%
Materials	12.58%
Health Care	10.78%
Information Technology	6.45%
Financials	5.84%
Utilities	4.41%
Consumer Staples	4.32%
Real Estate	2.48%
Energy	2.23%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	5.92%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

16.35% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

19.86% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.93% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global High Yield Bond Fund

Legal entity identifier: 549300FVQG82AXROU687

Reference period: 01 January 2023 to 20 October 2023

This Fund merged with the Sustainable Global High Yield Bond (LEI: 549300IGC07J6G0N2H29) on 20 October 2023. The merged fund was renamed Global High Yield Bond on the same date. A separate periodic disclosure for the merged fund is contained in this Annex.

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 29 December 2023.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 25.56% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

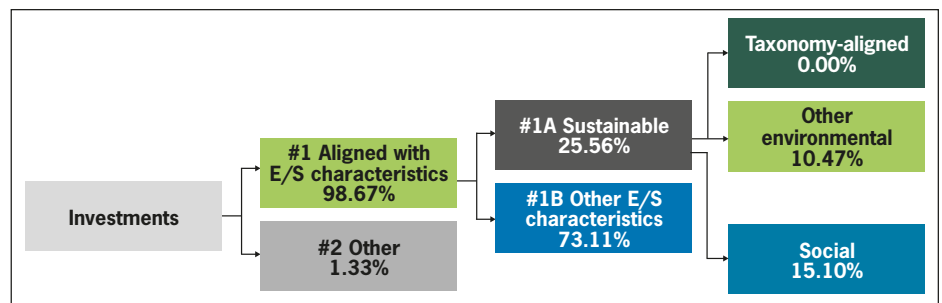

What was the proportion of sustainability-related investments?

98.67% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

25.56% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Industrials	20.71%
Consumer Discretionary	19.58%
Communication Services	13.00%
Materials	10.68%
Health Care	8.48%
Energy	6.65%
Financials	5.94%
Information Technology	4.92%
Consumer Staples	3.31%
Utilities	3.14%
Real Estate	2.27%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	9.86%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

10.47% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

15.10% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.33% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Short Maturity Euro Bond Fund

Legal entity identifier: IQZY8EWFJYACW1750M88

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50.87% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association (“ICMA”)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

96.59% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

50.87% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	54.77%
Sovereigns	20.99%
Supranationals & Agencies	4.43%
Consumer Discretionary	3.33%
Utilities	2.78%
Real Estate	2.18%
Industrials	2.11%
Energy	1.63%
Communication Services	1.50%
Health Care	1.39%
Consumer Staples	1.20%
Materials	0.29%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.21%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

24.20% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

26.68% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.42% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Short Maturity Euro Corporate Bond Fund

Legal entity identifier: 549300TGXT6HICNUSW15

Reference period: 28 February 2023 to 31 December 2023

The Fund was launched on 28 February 2023.

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.44% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Sustainable Investments		
% Fund investments that are sustainable investments	40.00%	68.44%

. . . and compared to previous periods?

Not applicable. The Fund was launched on 28 February 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 28 February 2023 to 31 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

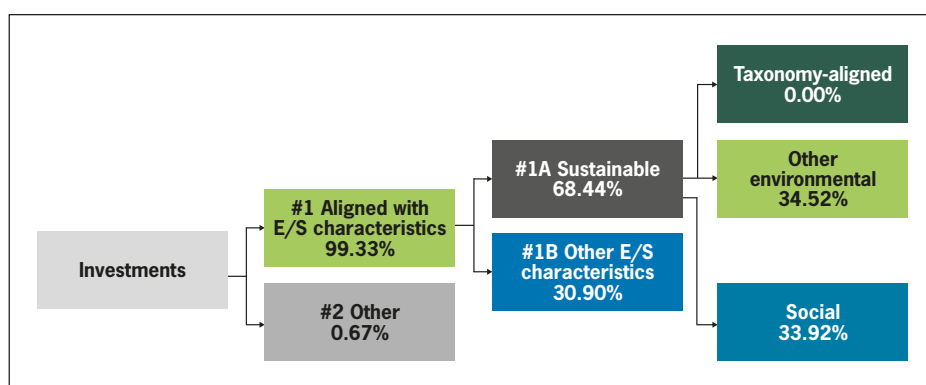

What was the proportion of sustainability-related investments?

99.33% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

68.44% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	65.36%
Utilities	7.70%
Consumer Discretionary	7.19%
Communication Services	4.78%
Industrials	2.85%
Health Care	2.72%
Energy	2.63%
Consumer Staples	2.54%
Real Estate	1.86%
Materials	1.70%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	8.28%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers with any ties to such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

34.52% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

33.92% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.67% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, some investments became restricted due to issuers exceeding revenue thresholds for restricted activities.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Legal entity identifier: 549300GCM5BJ69ZMX437

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 77.28% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- Low carbon intensity and net zero target: The Fund promoted the environmental characteristic of climate change mitigation by:
 - Maintaining a lower carbon intensity than the Bloomberg Euro Aggregate Corporate index; and
 - Aiming to achieve net zero emissions at the portfolio-level for corporate investments by 2050, with an interim target to halve the Fund's carbon intensity by year-end 2030, compared to year-end 2020.
- Exclusions: The Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain business activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").
- Best-in-class ESG tilts: The Fund also invested in companies that it considers to be best-in-class on ESG matters, based on relative or absolute proprietary ESG scores calculated by the Investment Adviser, and in doing so, it promoted environmental and social themes such as, but not limited to climate change mitigation, responsible use of natural resources, sustainable waste management, inclusive human capital management and gender equality.
- Sustainable Investments: The Fund made sustainable investments in:
 - Corporate issuers whose business practices, products or solutions, made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs"); or
 - Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were some minor exceptions to the Fund's attainment of certain environmental and social characteristics, which are explained in more detail below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Carbon intensity lower than the corporate portion of the Bloomberg Euro Aggregate Index (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	106.74	55.38
<p>The Fund aims to achieve net zero emissions at the portfolio-level for corporate investments by 2050. As an interim target for net zero, the Fund aims to halve its WACI at the portfolio level for all corporate investments by year-end 2030, compared to the baseline of December 31, 2020.</p> <p>The WACI of the baseline is 100.72 tons CO₂e/US\$ million revenue.</p> <p>While the binding elements of this environmental characteristic refer to the years 2030 and 2050, the Investment Adviser aims to pursue a yearly decarbonisation pathway to achieve those longer-term targets.</p>		
The Fund's annual decarbonisation rate for year-end 2023 is:	n/a	-20.42%
The Fund's cumulative decarbonisation rate since December 31, 2020 is:	n/a	-49.51%
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Thermal coal mining and extraction (>0% revenue)	0.00%	0.00%
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Oil sands extraction (>5% revenue)	0.00%	0.00%
Arctic oil & gas production (>5% revenue)	0.00%	0.00%
Coal-fired power generation (>10% revenue)	0.00%	0.00%
Gambling (>10% revenue)	0.00%	0.00%
Tobacco retail and distribution (>10% revenue)	0.00%	0.00%
Adult entertainment (>10% revenue)	0.00%	0.00%
% Fund exposure to corporate issuers experiencing very severe ESG controversies	0.00%	0.00%
ESG Tilt:		
Corporates - ESG Corporate Score - % Fund Exposure to corporate issuers that fall within the bottom 20% of each corporate sub-sector	0.00%	2.23%
Sustainable Investments:		
% Fund investments that are sustainable investments	60.00%	77.28%

Over 2023, the Fund held an average of 2.23% asset value in investments that, while already held in the Fund, became non-compliant with the Fund's characteristic of not investing in the bottom-20% ESG-scored corporates of each sub-sector of the Bloomberg Euro Aggregate Corporate Index. These exceptions, which were driven by the ESG scores of those investments becoming relatively lower within their sub-sector, happened in Q1 and Q2. The Investment Adviser rectified these exceptions by selling the holdings within the pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Carbon intensity lower than the corporate portion of the Bloomberg Euro Aggregate Index (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	125.26	63.91
Net zero emissions by 2050 - emissions compared to baseline Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	100.72	63.91
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Thermal coal mining and extraction (>0% revenue)	0.00%	0.00%
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Oil sands extraction (>5% revenue)	0.00%	0.00%
Arctic oil & gas production (>5% revenue)	0.00%	0.43%
Coal-fired power generation (>10% revenue)	0.00%	0.00%
Gambling (>10% revenue)	0.00%	0.00%
Tobacco retail and distribution (>10% revenue)	0.00%	0.00%
Adult entertainment (>10% revenue)	0.00%	0.00%
% Fund exposure to corporate issuers experiencing very severe ESG controversies	0.00%	1.18%
ESG Tilt:		
Corporates - ESG Corporate Score - % Fund Exposure to corporate issuers that fall within the bottom 20% of each corporate sub-sector	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	60.00	[•]%

In Q1 2023 the Investment Adviser sold one investment held since 2022, which no longer met the Fund's exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from the extraction of Arctic gas, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that align with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which do not have any material mis-alignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser used an indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.
- The Fund excluded issuers which committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered in whole the PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Security	Sector	% Assets	Country
BPCE SA T2 1.5 13-JAN-2042 Reg-S (SUB)	Financials	1.22%	France

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

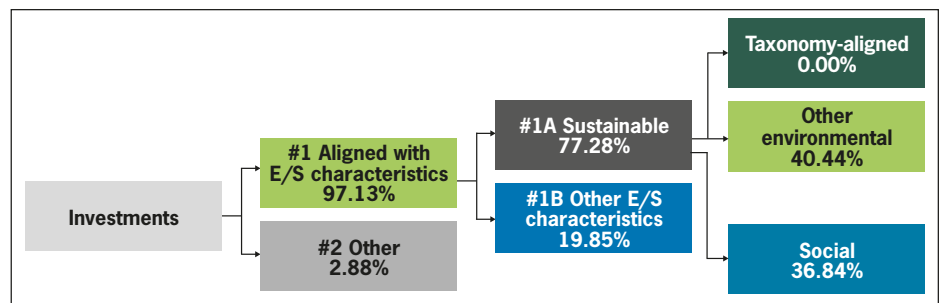

What was the proportion of sustainability-related investments?

97.13% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

77.28% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	55.30%
Utilities	10.73%
Communication Services	9.75%
Industrials	5.09%
Consumer Discretionary	4.32%
Real Estate	4.02%
Health Care	3.82%
Consumer Staples	2.90%
Energy	1.66%
Materials	0.76%
Information Technology	0.70%
Supranationals & Agencies	0.33%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	5.87%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the other fossil fuel exclusions applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

40.44% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

36.84% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.88% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

In addition, as stated above, one of the Fund's investments did not meet the environmental or social characteristics of the Fund during the reference period and during its period in breach, it was included in the "other" category, since it was not aligned with the environmental or social characteristics of the Fund during this period. Please see the answer to the question above, "How did the sustainability indicators perform?" for further details.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, some investments became restricted due to issuers exceeding revenue thresholds for restricted activities, or issuers' ESG scores moving into the lowest 20% of their sub-sector in the Bloomberg Euro Aggregate Corporate Index.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable Euro Strategic Bond Fund

Legal entity identifier: 5493001NHR60KNHKPZ06

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 66.79% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- Low carbon intensity and net zero target: The Fund promoted the environmental characteristic of climate change mitigation by:
 - Maintaining a lower carbon intensity than the corporate portion of the Bloomberg Euro Aggregate index; and
 - Aiming to achieve net zero emissions at the portfolio-level for corporate investments by 2050, with an interim target to halve the Fund's carbon intensity by year-end 2030, compared to year-end 2020.
- Exclusions: The Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain business activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices. Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").
- Best-in-class ESG tilts: The Fund also invested in companies, sovereigns and securitisations that it considers to be best-in-class on ESG matters, based on relative or absolute proprietary ESG scores calculated by the Investment Adviser, and in doing so, it promoted environmental and social themes such as, but not limited to the following:
 - Climate change mitigation, responsible use of natural resources, sustainable waste management, inclusive human capital management, and gender equality, for corporate issuers;
 - Climate change mitigation and adaptation, and human economic welfare standards, for sovereign issuers;
 - Energy efficiency, inclusive and affordable lending, for securitisations.
- Sustainable Investments: The Fund made sustainable investments in:
 - Corporate issuers whose business practices, products or solutions, made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
 - Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
 - Sustainable Bonds, from any type of issuer, which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were some minor exceptions to the Fund's attainment of certain environmental and social characteristics, which are explained in more detail below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Carbon footprint lower than the corporate portion of the Bloomberg Euro Aggregate Index (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	92.80	77.09
<p>The Fund aims to achieve net zero emissions at the portfolio level for corporate investments by 2050. As an interim target for net zero, the Fund aims to halve its WACI at the portfolio level for all corporate investments by year-end 2030, compared to the baseline of 31 December 2020.</p> <p>The WACI of the baseline is 79.92 tons CO₂e/US\$ million revenue.</p> <p>While the binding elements of this environmental characteristic refer to the years 2030 and 2050, the Investment Adviser aims to pursue a yearly decarbonisation pathway to achieve those longer-term targets.</p>		
The Fund's annual decarbonisation rate for year-end 2023 is:	n/a	-22.43%
The Fund's cumulative decarbonisation rate since 31 December 2020 is:	n/a	-12.17%
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Thermal coal mining and extraction (>0% revenue)	0.00%	0.00%

% Fund exposure to securitisations affected by:	0.00%	0.00%
Predatory lending	0.00%	0.00%
Severe malpractice	0.00%	0.00%
Severe consumer protection breach	0.00%	0.00%
Very severe controversies	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
ESG Tilt:		
Corporates - ESG Corporate Score - % Fund Exposure to corporate issuers that fall within the bottom 20% of each corporate sub-sector	0.00%	0.67%
Sovereigns - ESG Sovereign Score (>=2 (1-5, where 5 is best)) - per income group	2.00	2.94
Securitisations - ESG Securitised Score (>=3 (1-5, where 5 is best))	3.00	3.00
Sustainable Investments:		
% Fund investments that are sustainable investments	50.00%	66.79%

Over 2023, the Fund held an average of 0.67% asset value in investments that, while already held in the Fund, became non-compliant with the Fund's characteristic of not investing in the bottom-20% ESG-scored corporates of each sub-sector of the Bloomberg Euro Aggregate Index. These exceptions, which were driven by the ESG scores of those investments becoming relatively lower within their sub-sector, happened in Q1 and Q2. The Investment Adviser rectified these exceptions by selling the holdings within the pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

In addition, during the reporting period the Fund temporarily deviated from its pathway towards meeting its environmental characteristics of maintaining a lower carbon intensity than the index, and of halving its carbon intensity by 2030. As of end of Q3, the Fund's carbon intensity (tons CO₂e/\$US million revenue, for corporate investments) was higher than that of the index and of its own year-end 2020 baseline. This temporary deviation was, in part, associated with investments in labelled Green and Sustainability Bonds from corporate issuers with high carbon intensities, but with proceeds intended to finance projects that support a low carbon transition.

In relation to the Fund's annual decarbonisation rate being higher than the decarbonisation rate since year-end 2020, this is due to the fact that in 2022, the Fund had a higher carbon intensity than the index and of its baseline, as shown below in the section "...and compared to previous periods?".

The Investment Adviser will continue to monitor the Fund's carbon intensity, and to take appropriate steps to reduce it in line with the Fund's targets, keeping in mind the circumstances and the best interests of the shareholders of the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Sustainable Investments:		
% Fund investments that are sustainable investments	50.00%	64.09%

In Q1 2023 the Investment Adviser sold one investment held since 2022, which no longer met the Fund's exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from the extraction of Arctic gas, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that align with the International Capital Market Association (ICMA)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which do not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the EU Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain securities the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.
- The Fund excluded issuers which committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered in whole the PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom-10% ranked countries on an indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

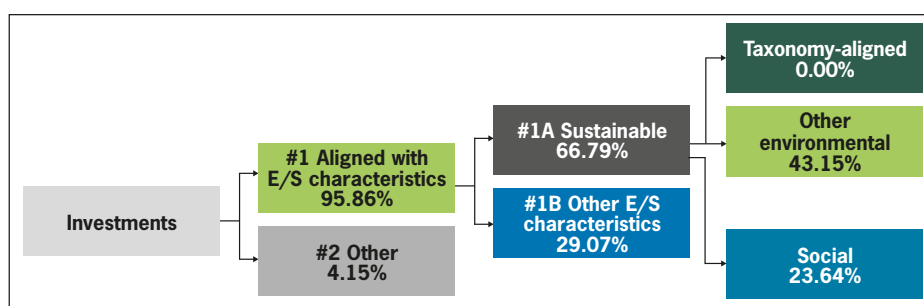

What was the proportion of sustainability-related investments?

95.86% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

66.79% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	38.82%
Sovereigns	27.45%
Utilities	5.74%
Supranationals & Agencies	5.09%
Consumer Discretionary	4.68%
Industrials	4.30%
Communication Services	4.21%
Real Estate	2.33%
Health Care	1.76%
Energy	0.79%
Consumer Staples	0.69%
Materials	0.37%
Securitised	0.31%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the other fossil fuel exclusions applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

43.15% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

23.64% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

4.15% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

In addition, as stated above, some of the Fund's investments did not meet the environmental or social characteristics of the Fund during the reference period and during the period(s) in breach, they were included in the "other" category, since they were not aligned with the environmental or social characteristics of the Fund during this period. Please see the answer to the question above, "How did the sustainability indicators perform?" for further details

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, some investments became restricted due to issuers exceeding revenue thresholds for restricted activities, or issuers' ESG scores moving into the lowest 20% of their sub-sector in the Bloomberg Euro Aggregate index.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Dollar Corporate Bond Fund

Legal entity identifier: 549300A8CL51MXFJCN13

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 46.05% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments. in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%

Sustainable Investments:		
% Fund investments that are sustainable investments	40.00%	42.85%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

96.92% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

46.05% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	38.55%
Utilities	9.56%
Energy	8.74%
Communication Services	7.24%
Health Care	6.12%
Information Technology	6.00%
Industrials	5.80%
Consumer Discretionary	4.88%
Materials	3.56%
Consumer Staples	3.27%
Real Estate	2.81%
Securitized	0.31%
Supranationals & Agencies	0.09%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	17.89%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers with any ties to such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

20.19% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

25.87% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.08% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, some investments became restricted due to issuers exceeding revenue thresholds for restricted activities.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Dollar Short Duration Bond Fund

Legal entity identifier: 5493008B8KBFODOHZX52

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 53.34% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association (“ICMA”)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the proportion of sustainability-related investments?

95.34% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

53.34% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	49.39%
Securitised	11.72%
Health Care	7.65%
Consumer Discretionary	6.83%
Utilities	3.38%
Information Technology	3.10%
Industrials	2.98%
Sovereigns	2.81%
Consumer Staples	2.67%
Communication Services	2.07%
Materials	1.00%
Energy	0.84%
Real Estate	0.67%
Supranationals & Agencies	0.25%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	6.88%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

16.74% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

36.60% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

4.67% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Dollar Short Duration High Yield Bond Fund

Legal entity identifier: 549300ZADDUEM9Q8605

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 22.77% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	22.77%

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	15.33%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
FORD MOTOR CREDIT CO LLC 4.125 17-AUG-2027 (SENIOR)	Financials	1.75%	United States
ENVIRI CORP 5.75 31-JUL-2027 144a (SENIOR)	Industrials	1.35%	United States

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

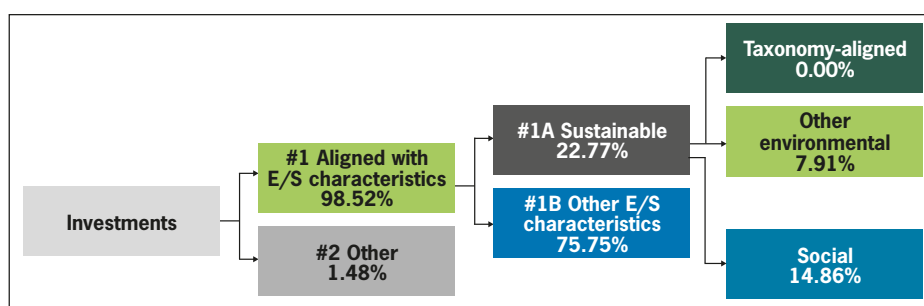

What was the proportion of sustainability-related investments?

98.52% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

22.77% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Industrials	23.21%
Consumer Discretionary	16.95%
Energy	12.17%
Communication Services	11.13%
Financials	8.15%
Health Care	7.99%
Materials	5.71%
Real Estate	4.17%
Consumer Staples	4.13%
Utilities	3.71%
Information Technology	1.19%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	14.11%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

7.91% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

14.86% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.48% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US High Yield Bond Fund

Legal entity identifier: 54930007SWUXWYEHVP32

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure. The Fund's sustainability indicators were amended on 31 August 2023. Please see additional detail in response to "How did the sustainability indicators perform?"

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective: ___%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.07% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective: ___%**

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
31 August 2023 - 31 December 2023		
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Thermal coal mining and extraction (>0% revenue)	0%	0.0%
Controversial weapons (>0% revenue)	0%	0.0%
Civilian firearms (>0% revenue)	0%	0.0%
Tobacco manufacturing (>0% revenue)	0%	0.0%
Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	28.23%
1 January 2023 - 30 August 2023		
Carbon intensity footprint lower than the corporate portion of the ICE BofA U.S. High Yield Index (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	308.08	139.15
Net zero emissions by 2050 - emissions compared to baseline (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	n/a	n/a
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Thermal coal mining and extraction (>0% revenue)	0%	0.0%
Controversial weapons (>0% revenue)	0%	0.0%
Civilian firearms (>0% revenue)	0%	0.0%
Tobacco manufacturing (>0% revenue)	0%	0.0%
Oil sands extraction (>5% revenue)	0%	0.0%
Arctic oil & gas production (>5% revenue)	0%	0.0%
Coal-fired power generation (>10% revenue)	0%	0.0%
Gambling (>10% revenue)	0%	0.0%
Tobacco retail and distribution (>10% revenue)	0%	0.0%
Adult entertainment (>10% revenue)	0%	0.0%
% Fund exposure to corporate issuers experiencing very severe ESG controversies	0%	0.0%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
ESG Tilt:		
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	95.88%
Calvert Principles (20% investible universe reduction)	20.00%	26.86%
Sustainable Investments:		
% Fund investments that are sustainable investments	20.00%	39.91%

On 31 August 2023, the Fund's investment policy was amended and the Fund was renamed (the "Portfolio Changes"). As part of these Portfolio Changes, the Fund's restriction screening policy was amended, its net zero objective and positive ESG tilt were removed, and the minimum commitment to sustainable investments with an environmental or social objective was reduced from 20% to 5%.

The sustainability indicator values presented above are based on the applicable quarter-end values, (before and after 31 August 2023), that the Fund's respective investment policies were in place. The annual reduction in carbon intensity has not been calculated for 2023, as the applicable sustainability indicator (which relies on year-end values) was no longer in place at the end of the year.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the top investments of this financial product?

Security	Sector	% Assets	Country

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What was the proportion of sustainability-related investments?

96.61% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

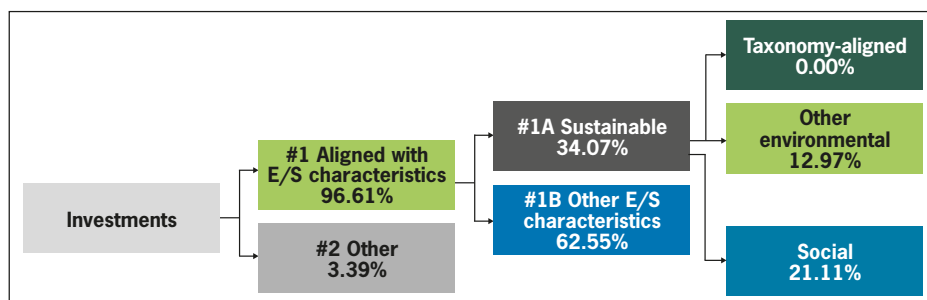

34.07% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	17.94%
Industrials	16.70%
Communication Services	11.60%
Health Care	11.34%
Materials	8.80%
Information Technology	7.45%
Financials	6.79%
Consumer Staples	5.16%
Utilities	4.53%
Energy	4.15%
Real Estate	2.17%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	9.30%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

12.97% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

21.11% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.39% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US High Yield Middle Market Bond Fund

Legal entity identifier: 5493001L587BVK8II004

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 22.13% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions:

Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	17.96%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
FORD MOTOR COMPANY 3.25 12-FEB-2032 (SENIOR)	Consumer Discretionary	1.88%	United States

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

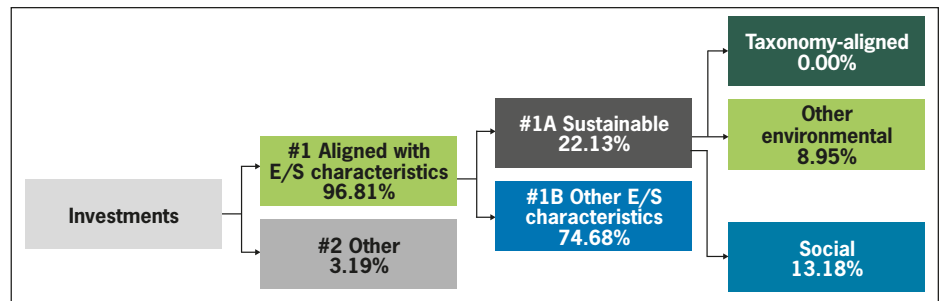

What was the proportion of sustainability-related investments?

96.81% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

22.13% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Industrials	21.95%
Consumer Discretionary	20.98%
Communication Services	10.83%
Materials	9.43%
Energy	8.10%
Health Care	6.98%
Information Technology	5.31%
Financials	5.31%
Consumer Staples	3.20%
Utilities	2.48%
Real Estate	2.24%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	11.82%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

8.95% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

13.18% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.19% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Balanced Fund

Legal entity identifier: 5493001XMV1F05VL2L46

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted a number of binding environmental and social characteristics, as described below.

Equity investments

- Exclusions: The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which caused severe environmental harm where appropriate remedial action had not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the implementation of these exclusions is set out below in response to the question “How did the sustainability indicators perform?”.
- ESG tilt: the Fund promoted environmental objectives (such as: reducing carbon emissions; and preventing pollution and waste), social objectives (such as: tackling inequality or fostering social cohesion; promoting social integration and labour relations; investing in human capital; promoting access to finance and healthcare; and promoting nutrition and health) and governance objectives (such as good corporate governance and corporate behaviour) by applying an ESG tilt within the portfolio for all equity securities, using the MSCI ESG score and the MSCI Low Carbon Transition score.

Government bonds

- The Fund promoted the environmental and social characteristic of encouraging countries to manage their ESG risks. The Fund achieved this through: (1) excluding investing in the government bonds of countries performing poorly on managing their ESG risks; and (2) applying an ESG tilt to the government bonds benchmark, so that the Fund’s investments in government bonds tracked a better ESG profiled benchmark in this regard. The process, however, remained subject to the Investment Adviser’s credit research overlay, which resulted in changes to the weightings of sovereigns resulting from the process described to account for the Investment Adviser’s views on the credit quality of those sovereigns.

Credit

- Exclusions: The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which have caused severe environmental harm where appropriate remedial action has not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below in response to the question “How did the sustainability indicators perform?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions:		
Equity & Credit investments:		
% of the Fund's exposure to corporate issuers or issuers of directly held corporate bond investments which derive revenue from:		
thermal Coal Mining (>5% revenue)	0.00%	0.00%
oil Sands Extraction (>5% revenue)	0.00%	0.00%
manufacturing or production of controversial weapons	0.00%	0.00%
manufacturing of civilian firearms	0.00%	0.00%
tobacco (>10% revenue)	0.00%	0.00%
gambling (>10% revenue)	0.00%	0.00%
adult entertainment (>10% revenue)	0.00%	0.00%
% of the Fund's exposure to corporate issuers which have experienced ESG controversies	0.00%	0.00%
Government Bonds:		
% of the Fund's exposure to sovereign issuers which have MSCI ESG Government Score of 'CCC'	0.00%	0.00%
ESG Tilt:		
Equity investments:		
The Fund allocated its global equity investments to five regional baskets. The Investment Adviser aimed to ensure:		
(1) that each regional basket outperformed the equivalent benchmark for that region with regard to the ESG score and the Low Carbon Transition score; and		
(2) that the core equity as a whole outperformed the MSCI ACWI index with regard to those scores.		
ESG Score of the benchmark named below that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.64	7.79
Europe (Reference Index MSCI Europe)	7.88	8.84
Japan Basket (Reference Index MSCI Japan)	7.32	8.26
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	5.56	6.50
Asia-ex Japan Basket (Reference Index MSCI Asia ex-Japan)	5.77	6.45
Total ESG Score of the MSCI ACWI index and that of the Fund:	6.75	7.87
Low Carbon Transition Score of the benchmark named below for the region and that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.21	6.33
Europe (Reference Index MSCI Europe)	5.98	6.35
Japan Basket (Reference Index MSCI Japan)	6.05	6.39

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	5.88	6.25
Asia-ex Japan Basket (Reference Index MSCI Asia ex-Japan)	5.95	6.34
Total Low Carbon Transition Score of the MSCI ACWI index and that of the Fund:	6.07	6.34
Government Bonds:		
The Fund overweighted sovereigns which were outperforming the average performance in the Bloomberg Global G7 Total Return Index (excluding elements of the index concerning Canada) and underweighted those underperforming the average performance of the benchmark, with regard to the GBaR Government ESG score (and subsequently applied a credit overlay), to create a proprietary Sovereign ESG benchmark. The GBaR ESG Gov Score of the benchmark and that of the Fund (after the credit overlay had been applied) were:	5.97	6.07

The GBaR ESG Gov Score of the benchmark and that of the Fund (after the credit overlay had been applied) were:	5.87	5.90

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following PAI indicators through the application of the Fund's binding environmental or social characteristics:

- PAI indicators numbers 1-3 (GHG emissions, carbon footprint and GHG intensity of investee companies):** The Fund considered PAI indicators numbers 1-3 regarding GHG emissions in part through its direct equity and corporate credit investments. The Fund considered these indicators because it applied a tilt considering the Low Carbon Transition score to the equities held in the equity baskets. The Low Carbon Transition score takes into account GHG emissions (scopes 1-3).
- PAI indicator number 4 (exposure to companies active in the fossil fuel sector):** The Fund considered this PAI indicator in part through its direct investments in equities and corporate credit because it excluded issuers with high exposure to carbon-intensive activities, with a view to mitigation of climate-related financial risks. Namely, the fund excluded companies that derive 5% or more of their revenue from the mining of thermal coal or the extraction of oil sands.
- PAI indicators numbers 7-9 (activities negatively affecting biodiversity-sensitive areas, emissions to water and hazardous waste and radioactive waste ratio):** The Fund considered these indicators in part through its direct investments in equities and corporate credit because it excluded investments in companies involved in ongoing severe structural controversy cases related to environmental harm where the Investment Adviser believed appropriate remedial action had not been taken. These controversies include controversies relating to Biodiversity & Land Use, Toxic Emissions & Waste, Water Stress, Operational Waste (Non-Hazardous), Supply Chain Management amongst others.
- PAI indicator number 10 (violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises):** The Fund considered this PAI indicator through its direct investments in equities and corporate credit because it excluded investments in issuers flagged in breach of selected global norms and conventions, including the United Nations Global Compact Principles (UNGC) and OECD Guidelines for Multinational Enterprises.
- PAI indicator number 14 (exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)):** The Fund considered this PAI indicator through its direct investments in equities and corporate credit because it excluded investments in issuers which derive any revenue from controversial weapons (including all the controversial weapons listed for PAI number 14).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

69.96% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

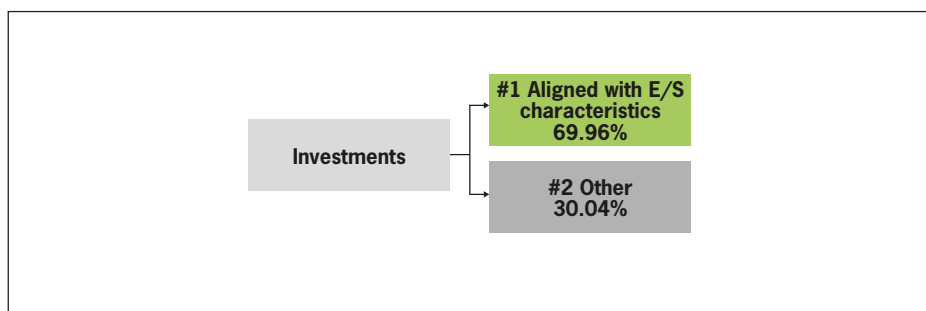

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The relevant environmental and social characteristics vary depending on the nature of the Fund's investment. The Investments that were aligned with the environmental and social characteristics of the Fund were made up of approximately:

- 56% equity investments
- 17% investments in government bonds
- 5% investments in corporate credit

The ESG tilt of the equity investments was applied at the level of the five regional baskets and the portfolio of equity investments, and not at the level of individual holdings. Some investee companies may therefore have had an ESG score or Low Carbon Transition score lower than the average for the regional basket or for the whole portfolio of equity investments. Similarly, the carbon budget of the equity investments was applied at the portfolio level of all the equity investments (and not at the level of the individual holdings, which may on an individual basis have had higher carbon emissions than the average for all the equity investments).

Appendix 9: Sustainable Finance Disclosure (unaudited)

Credit Default Swap	0.28%
Options	0.01%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	6.19%

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining and oil sands extraction exclusion applied as a binding characteristic to the Fund.

As described throughout this document, the Investment Adviser excludes from the Fund any companies that derive 5% or more of their revenues from the mining of thermal coal or extraction of oil sands. Remaining equity holdings are subject to tilts considering ESG and Low Carbon Transition assessment scores seeking to overweight leaders and underweight laggards with regard to those scores. The Fund may therefore have some exposure to fossil fuel activities beyond those expressly prohibited through the binding characteristics of the Fund.

Additionally, the Fund has some exposure to fossil fuel activities through indirect portfolio holdings such as ETFs and funds. Please note that the Fund's binding exclusions, as set out in the Fund's pre-contractual disclosure, currently applies only to the directly held ESG equity and corporate credit securities. The Investment Adviser prefers ETFs and funds which have committed to a level of ESG integration, in order to align with the portfolio's overall objective to promote ESG characteristics, the Investment Adviser does not commit on a binding basis to invest in such ETFs and funds.

The table above only includes investments made by the Fund and excludes other assets held by the Fund, such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

30.04% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised: (i) hedging instruments, (ii) cash held as ancillary liquidity, (iii) investments for which the investment team was lacking data in order to assess if they qualified as promoting environmental or social characteristics, (iv) any other investments which did not promote environmental or social characteristics (such as derivatives used for speculative purposes which do not have any ESG features). These investments were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

The Investment Advisor carried out enhanced monitoring of the Fund to meet the environmental and social characteristics during the reference period. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Advisor's Breach Remediation Policy. During the reference period investments became restricted due to issuers exceeding revenue thresholds for restricted activities or issuers experiencing ESG controversies.

The Investment Advisor regularly engaged with the companies in which it invested and exercised proxy voting and other rights as shareholders with the Fund's environmental and social characteristics in mind. These activities gave the Investment Advisor the opportunity to guide companies in which it invests towards better ESG practices, potentially enhancing the environmental and social characteristics of the Fund.

The Investment Advisor's stewardship objectives are tied to E/S related outcomes that include amongst others:

- enhanced disclosure of sustainability related information
- securing and encouraging improved management of material sustainability related risks and opportunities; and
- improving and enhancing the Investment Advisor's own understanding of sustainability related risks in the Fund

The Investment Advisor voted by proxy in a prudent and diligent manner, based on MSIM's proxy voting policies and in the best interests of the Fund's clients. Morgan Stanley Investment Management (MSIM) retained research providers to analyse ballot items and to make vote recommendations, however the Investment Advisor is in no way obligated to follow such recommendations.

For more information on the Investment Advisor's engagement and voting with reference to the Fund please see the Stewardship Report.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Balanced Income Fund

Legal entity identifier: 549300V1TBJVKZCB8M65

Reference period: 27 December 2023 to 31 December 2023

This Fund's classification as Article 8 under SFDR became effective on 27 December 2023

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 29 December 2023.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: ___%**
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective: ___%**

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted a number of binding environmental and social characteristics, as described below.

Equity investments

- Exclusions: The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which caused severe environmental harm where appropriate remedial action had not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the implementation of these exclusions is set out below in response to the question “How did the sustainability indicators perform?”.
- ESG tilt: the Fund promoted environmental objectives (such as: reducing carbon emissions; and preventing pollution and waste), social objectives (such as: tackling inequality or fostering social cohesion; promoting social integration and labour relations; investing in human capital; promoting access to finance and healthcare; and promoting nutrition and health) and governance objectives (such as good corporate governance and corporate behaviour) by applying an ESG tilt within the portfolio for all equity securities, using the MSCI ESG score and the MSCI Low Carbon Transition score.

Government bonds

- The Fund promoted the environmental and social characteristic of encouraging countries to manage their ESG risks. The Fund achieved this through: (1) excluding investing in the government bonds of countries performing poorly on managing their ESG risks; and (2) applying an ESG tilt to the government bonds benchmark, so that the Fund’s investments in government bonds tracked a better ESG profiled benchmark in this regard. The process, however, remained subject to the Investment Adviser’s credit research overlay, which resulted in changes to the weightings of sovereigns resulting from the process described to account for the Investment Adviser’s views on the credit quality of those sovereigns.

Credit

- Exclusions: The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which have caused severe environmental harm where appropriate remedial action has not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below in response to the question “How did the sustainability indicators perform?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions:		
Equity & Credit investments:		
% of the Fund's exposure to corporate issuers or issuers of directly held corporate bond investments which derive revenue from:		
thermal Coal Mining (>5% revenue)	0.00%	0.00%
oil Sands Extraction (>5% revenue)	0.00%	0.00%
manufacturing or production of controversial weapons	0.00%	0.00%
manufacturing of civilian firearms	0.00%	0.00%
tobacco (>10% revenue)	0.00%	0.00%
gambling (>10% revenue)	0.00%	0.00%
adult entertainment (>10% revenue)	0.00%	0.00%
% of the Fund's exposure to corporate issuers which have experienced ESG controversies	0.00%	0.00%
Government Bonds:		
% of the Fund's exposure to sovereign issuers which have MSCI ESG Government Score of 'CCC'	0.00%	0.00%
ESG Tilt:		
Equity investments:		
The Fund allocated its global equity investments to five regional baskets. The Investment Adviser aimed to ensure:		
(1) that each regional basket outperformed the equivalent benchmark for that region with regard to the ESG score and the Low Carbon Transition score; and		
(2) that the core equity as a whole outperformed the MSCI ACWI index with regard to those scores.		
ESG Score of the benchmark named below that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.66	7.80
Europe (Reference Index MSCI Europe)	7.83	8.79
Japan Basket (Reference Index MSCI Japan)	7.36	8.28
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	5.68	6.63
Asia-ex Japan Basket (Reference Index MSCI Asia ex-Japan)	5.88	6.61
Total ESG Score of the MSCI ACWI index and that of the Fund:	6.80	7.85
Low Carbon Transition Score of the benchmark named below for the region and that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.25	6.36
Europe (Reference Index MSCI Europe)	6.00	6.38
Japan Basket (Reference Index MSCI Japan)	6.04	6.39

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	5.84	6.22
Asia-ex Japan Basket (Reference Index MSCI Asia ex-Japan)	5.89	6.36
Total Low Carbon Transition Score of the MSCI ACWI index and that of the Fund:	6.08	6.36
Government Bonds:		
The Fund overweighted sovereigns which were outperforming the average performance in the Bloomberg Global G7 Total Return Index (excluding elements of the index concerning Canada) and underweighted those underperforming the average performance of the benchmark, with regard to the GBaR Government ESG score (and subsequently applied a credit overlay), to create a proprietary Sovereign ESG benchmark. The GBaR ESG Gov Score of the benchmark and that of the Fund (after the credit overlay had been applied) were:	5.97	5.94

As described in the Fund's pre-contractual disclosure and above, the application of the Investment Adviser's credit research overlay process may occasionally result in sovereign bonds held by the fund not outperforming the benchmark on ESG issues. In Q4 the Fund's ESG Government Score was 0.03 lower than the benchmark for this reason.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

... and compared to previous periods?

Not applicable. The Fund's classification as Article 8 under SFDR became effective on 27 December 2023.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following PAI indicators through the application of the Fund's binding environmental or social characteristics:

- PAI indicators numbers 1-3 (GHG emissions, carbon footprint and GHG intensity of investee companies):** The Fund considered PAI indicators numbers 1-3 regarding GHG emissions in part through its direct equity and corporate credit investments. The Fund considered these indicators because it applied a tilt considering the Low Carbon Transition score to the equities held in the equity baskets. The Low Carbon Transition score takes into account GHG emissions (scopes 1-3).
- PAI indicator number 4 (exposure to companies active in the fossil fuel sector):** The Fund considered this PAI indicator in part through its direct investments in equities and corporate credit because it excluded issuers with high exposure to carbon-intensive activities, with a view to mitigation of climate-related financial risks. Namely, the fund excluded companies that derive 5% or more of their revenue from the mining of thermal coal or the extraction of oil sands.
- PAI indicators numbers 7-9 (activities negatively affecting biodiversity-sensitive areas, emissions to water and hazardous waste and radioactive waste ratio):** The Fund considered these indicators in part through its direct investments in equities and corporate credit because it excluded investments in companies involved in ongoing severe structural controversy cases related to environmental harm where the Investment Adviser believed appropriate remedial action had not been taken. These controversies include controversies relating to Biodiversity & Land Use, Toxic Emissions & Waste, Water Stress, Operational Waste (Non-Hazardous), Supply Chain Management amongst others.
- PAI indicator number 10 (violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises):** The Fund considered this PAI indicator through its direct investments in equities and corporate credit because it excluded investments in issuers flagged in breach of selected global norms and conventions, including the United Nations Global Compact Principles (UNGC) and OECD Guidelines for Multinational Enterprises.
- PAI indicator number 14 (exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)):** The Fund considered this PAI indicator through its direct investments in equities and corporate credit because it excluded investments in issuers which derive any revenue from controversial weapons (including all the controversial weapons listed for PAI number 14).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 27 December 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
UNITED STATES TREASURY	Government Bond	6.55%	United States
S&P 500 INDEX FUTURE	Futures	6.10%	United States
UNITED STATES TREASURY	Government Bond	4.27%	United States
MS INVF GLOBAL ASSET BACKED SECURITIES F	Collective Investment Scheme - Ucits	4.07%	Luxembourg
UNITED STATES TREASURY	Government Bond	2.39%	United States
STOXX EUROPE 600 OIL & GAS FUTURE	Futures	2.10%	Germany
MICROSOFT CORP	Information Technology	2.06%	United States
APPLE INC	Information Technology	1.56%	United States
GREECE (GOVERNMENT)	Government Bond	1.53%	Greece
ALPHABET INC	Communication Services	1.13%	United States
MS INVF - EMERGING MARKETS DOMESTIC DEBT	Collective Investment Scheme - Ucits	1.12%	Luxembourg
MEXICO (UNITED MEXICAN STATES)	Government Bond	1.09%	Mexico
GERMANY (FEDERAL REPUBLIC OF)	Government Bond	1.03%	Germany
MS INVF EMERGING MARKETS CORPORATE DEBT	Collective Investment Scheme - Ucits	1.01%	Luxembourg
JAPAN (GOVERNMENT OF)	Government Bond	0.87%	Japan

What was the proportion of sustainability-related investments?

75.46% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

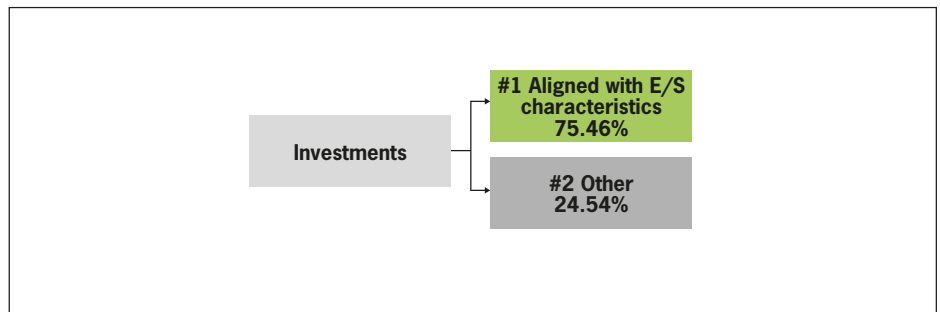

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The relevant environmental and social characteristics vary depending on the nature of the Fund's investment. The Investments that were aligned with the environmental and social characteristics of the Fund were made up of approximately:

- 52% equity investments
- 18% investments in government bonds
- 5% investments in corporate credit

The ESG tilt of the equity investments was applied at the level of the five regional baskets and the portfolio of equity investments, and not at the level of individual holdings. Some investee companies may therefore have had an ESG score or Low Carbon Transition score lower than the average for the regional basket or for the whole portfolio of equity investments. Similarly, the carbon budget of the equity investments was applied at the portfolio level of all the equity investments (and not at the level of the individual holdings, which may on an individual basis have had higher carbon emissions than the average for all the equity investments).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Equity & Corporate Bond	61.83%
Information Technology	12.09%
Financials	10.96%
Consumer Discretionary	7.17%
Health Care	6.96%
Industrials	6.43%
Communication Services	4.64%
Consumer Staples	4.49%
Energy	2.73%
Materials	2.54%
Utilities	2.36%
Real Estate	1.46%
Government Bond	22.22%
Collective Investment Scheme - UCITS	6.20%
Credit Default Swap	0.40%
Futures	0.35%
Options	-0.13%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	5.29%

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining and oil sands extraction exclusion applied as a binding characteristic to the Fund.

As described throughout this document, the Investment Adviser excludes from the Fund any companies that derive 5% or more of their revenues from the mining of thermal coal or extraction of oil sands. Remaining equity holdings are subject to tilts considering ESG and Low Carbon Transition assessment scores seeking to overweight leaders and underweight laggards with regard to those scores. The Fund may therefore have some exposure to fossil fuel activities beyond those expressly prohibited through the binding characteristics of the Fund.

Additionally, the Fund has some exposure to fossil fuel activities through indirect portfolio holdings such as ETFs and funds. Please note that the Fund's binding exclusions, as set out in the Fund's pre-contractual disclosure, currently applies only to the directly held ESG equity and corporate credit securities. The Investment Adviser prefers ETFs and funds which have committed to a level of ESG integration, in order to align with the portfolio's overall objective to promote ESG characteristics, the Investment Adviser does not commit on a binding basis to invest in such ETFs and funds.

The table above only includes investments made by the Fund and excludes other assets held by the Fund, such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund’s investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

30.04% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised: (i) financial derivative instruments such as on or off exchange traded options, which may be written on indices; single securities; or currencies, (ii) hedging instruments, (iii) cash held as ancillary liquidity, (iv) investments for which the investment team was lacking data in order to assess if they qualified as promoting environmental or social characteristics, (v) any other investments which did not promote environmental or social characteristics (such as derivatives used for speculative purposes which do not have any ESG features). These investments were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

The Investment Advisor carried out enhanced monitoring of the Fund according to the Fund's environmental and social characteristics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Balanced Sustainable Fund

Legal entity identifier: 549300UMQ7ETEXI51419

Reference period: 01 January 2023 to 31 December 2023

Unless stated otherwise, the values below have been calculated based on the average of the fund's investments at each quarter end during the reference period. This calculation methodology also applied to the fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37.11% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted a number of binding environmental and social characteristics, as described below.

Equity investments

- Exclusions: The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which caused severe environmental harm where appropriate remedial action had not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below in response to the question “How did the sustainability indicators perform?”.
- ESG tilt: the Fund promoted environmental objectives (such as: reducing carbon emissions; and preventing pollution and waste), social objectives (such as: tackling inequality or fostering social cohesion; promoting social integration and labour relations; investing in human capital; promoting access to finance and healthcare; and promoting nutrition and health) and governance objectives (such as good corporate governance and corporate behaviour) by applying an ESG tilt within the portfolio for all equity securities, using the MSCI ESG score and the MSCI Low Carbon Transition score.
- Carbon budget: The Fund promoted the environmental characteristic of reducing carbon emissions, by applying a carbon budget to all equity securities in the Fund’s portfolio every year. This carbon budget characteristic applied to investments in equity securities made directly by the Fund, but did not apply to equity securities held by the fund indirectly through investments in exchange-traded funds (ETFs) or other types of fund.

Government bonds

- The Fund promoted the environmental and social characteristic of encouraging countries to manage their ESG risks. The Fund achieved this through: (1) excluding investing in the government bonds of countries performing poorly on managing their ESG risks; and (2) applying an ESG tilt to the government bonds benchmark, so that the Fund’s investments in government bonds tracked a better ESG profiled benchmark in this regard. The process, however, remained subject to the Investment Adviser’s credit research overlay, which resulted in changes to the weightings of sovereigns resulting from the process described to account for the Investment Adviser’s views on the credit quality of those sovereigns.

Credit

- Exposure to ESG CDS: The Fund sold credit protection under index credit default swaps (“CDS”) in order to gain exposure to corporate credit. The Fund gained this exposure through one ESG-aligned CDS, which referenced the iTraxx MSCI ESG Screened Europe Index. Exposure to this index meant that the Fund’s credit exposure was targeted towards issuers that exhibit stronger performance with respect to management of ESG risks, as the index is screened by MSCI to exclude issuers with exposure to certain activities that have the potential to be harmful to human health and wellbeing, that have been subject to ESG controversies, or that have an MSCI ESG rating of BBB and below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Solution providers

- The Fund promoted the characteristic of contributing to a number of social and environmental themes, by allocating a minimum percentage of investments to products offered by solution providers (i.e., external fund managers) who invested in businesses and activities that provided solutions across a number of social and environmental themes. The selection process examined the manager's target themes, investment philosophy, investment process and (for solution providers which invest in equities) the weighted average revenue-alignment of the manager's funds to environmental and social themes.

Sustainable investments

- The Fund made a certain number of sustainable investments, as explained in response to the question, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
Exclusions:		
Equity & Credit investments:		
% of the Fund's exposure to corporate issuers or issuers of directly held corporate bond investments which derive revenue from:		
thermal coal mining (>5% revenue)	0.00%	0.00%
oil Sands Extraction (>5% revenue)	0.00%	0.00%
controversial weapons	0.00%	0.00%
civilian firearms	0.00%	0.00%
tobacco (>10% revenue)	0.00%	0.00%
gambling (>10% revenue)	0.00%	0.00%
adult entertainment (>10% revenue)	0.00%	0.00%
% of the Fund's exposure to corporate issuers which have experienced ESG controversies	0.00%	0.00%
Government Bonds:		
% of the Fund's exposure to sovereign issuers which have MSCI ESG Government Score of 'CCC'	0.00%	0.00%

ESG Tilt:

Equity investments:

The Fund allocated its global equity investments to five regional baskets. The Investment Adviser aimed to ensure:

- that each regional basket outperformed the equivalent benchmark for that region with regard to the ESG score and the Low Carbon Transition score; and
- that the core equity as a whole outperformed the MSCI ACWI index with regard to those scores.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Sustainability Indicator	Indicator Threshold	2023 Indicator Value
ESG Score of the benchmark named below that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.64	7.79
Europe (Reference Index MSCI Europe)	7.88	8.81
Japan Basket (Reference Index MSCI Japan)	7.32	8.25
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	5.56	6.70
Asia-ex Japan Basket (Reference Index MSCI Asia ex-Japan)	5.77	6.57
Total ESG Score of the MSCI ACWI index and that of the Fund:	6.75	7.96
Low Carbon Transition Score of the benchmark named below for the region and that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.21	6.39
Europe (Reference Index MSCI Europe)	5.98	6.34
Japan Basket (Reference Index MSCI Japan)	6.05	6.45
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	5.88	6.38
Asia-ex Japan Basket (Reference Index MSCI Asia ex-Japan)	5.95	6.47
Total Low Carbon Transition Score of the MSCI ACWI index and that of the Fund:	6.07	6.40
Government Bonds:		
The Fund overweighted sovereigns which were outperforming the average performance in the Bloomberg Global G7 Total Return Index (excluding elements of the index concerning Canada) and underweighted those underperforming the average performance of the benchmark, with regard to the GBaR Government ESG score (and subsequently applied a credit overlay), to create a proprietary Sovereign ESG benchmark. The MSCI ESG Gov Score of the benchmark and that of the Fund (after the credit overlay had been applied) were:	5.97	6.05
Equity Investments Carbon Budget:		
The Investment Adviser aimed to ensure that the equity securities in each regional basket reduced their weighted average carbon intensity (total scope 1 and 2 GHG emissions/ EVIC) each year by 7%, as compared to the basket for that region for the previous year.		
The carbon intensity of each regional basket for the year 2021, and the % reduction over the reference period were:		
US Basket (Reference Index S&P 500)	20.42	-7.53%
Europe (Reference Index MSCI Europe)	33.59	-8.22%
Japan Basket (Reference Index MSCI Japan)	26.45	-7.52%
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	71.18	-7.53%
Asia-ex Japan Basket (Reference Index MSCI Asia ex-Japan)	55.16	-7.55%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the Fund (which consisted of directly held equity investments, government bonds or investments made indirectly through solution providers) fell within one of the below categories:

- i. Equity investments which demonstrated a positive environmental or social contribution via revenue alignment. The Fund used a combination of data sources (including MSCI Sustainable Impact Metrics data and ISS alignment data) to determine if more than 20% of the revenue of the sustainable investment aligned with any of the ISS SDG or MSCI impact themes;
- ii. Equity investments which demonstrated operational contribution to environmental themes (for example, by key resource efficiency indicators on the use of energy, or on the production of waste & greenhouse gas emissions) or social themes (for example, labour relations, community relations or investment in human capital). An investment met this test if:
 - a. it had an environmental ESG pillar score, as defined by MSCI, which was within the range of environmental ESG pillar scores of the top 10 percentile of MSCI ACWI, provided that its social pillar score was not within the range of the pillar scores of the bottom 10 percentile of MSCI ACWI; or
 - b. it had a social ESG pillar score, as defined by MSCI, which was within the range of social ESG score of the top 10 percentile of MSCI ACWI, provided that its environmental pillar scores were not within the range of the pillar scores of the bottom 10 percentile of MSCI ACWI.
 - c. Additionally, a security was not deemed to be operationally contributing to climate change or social themes if the environmental or social pillar score which was in the top 10 percentile of MSCI ACWI was deemed “not material” to the security by MSCI. MSCI deems environmental or social pillars as “not material” to the company if the company has limited effect on the environmental or social themes.
- iii. sovereign bonds with a Government ESG Rating A or above, as determined by the MSCI ESG Government Rating.

Where the Fund invested via solution providers (i.e., external fund managers), all of the underlying investee companies fulfilled either:

- a) the 20% revenue alignment threshold described in (i) above; or
- b) criteria (ii) above by, demonstrating operational contribution to environmental themes or social themes.

Only those underlying investee companies which satisfied the tests described above were treated as constituting sustainable investments on a look-through basis and contributing towards the proportion of the Fund’s assets allocated towards sustainable investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the EU Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser excluded from the sustainable investments of the Fund, investments that caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules, and which were relevant to the investment. The Investment Adviser has determined specific thresholds for significant harm based on third-party data. PAI indicators:

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

These proxies were and will continue to be kept under review and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Investment Adviser excluded from the sustainable investments of the Fund, any issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainable investments of the Fund considered all of the mandatory PAI indicators on sustainability factors which were relevant to the investment, by screening out investments which did not meet certain thresholds set by the Investment Adviser for each of the mandatory indicators, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors been taken into account?”.

The equity investments of the Fund (including the portion that was not comprised of sustainable investments) considered the following PAI indicators through the application of the Fund’s binding environmental or social characteristics (as described elsewhere in this document):

PAI indicators numbers 1-3 (GHG emissions, carbon footprint and GHG intensity of investee companies): The Fund considered these indicators because:

- it ensured that each regional basket of equity investments reduced its weighted average Scope 1 and 2 carbon emissions/EVIC by 7% each year as compared against the basket for that region for the previous year and
- it applied a tilt considering the Low Carbon Transition score to the equities held in the equity baskets. The Low Carbon Transition score is designed to identify potential leaders and laggards by measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition and assesses carbon intensity of each of the equity securities. The Low Carbon Transition score takes into account GHG emissions (scopes 1-3).
- **PAI indicator number 4 (exposure to companies active in the fossil fuel sector):** The Fund considered this PAI indicator in part through its direct investments in equities because it excluded issuers with high exposure to carbon-intensive activities, with a view to mitigation of climate-related financial risks. Namely, the fund excluded companies that derive 5% or more of their revenue from the mining of thermal coal or the extraction of oil sands.
- **PAI indicators numbers 7-9 (activities negatively affecting biodiversity-sensitive areas, emissions to water and hazardous waste and radioactive waste ratio):** The Fund considered these indicators in part through its direct investments in equities because it excluded investments in companies involved in ongoing severe structural controversy cases related to environmental harm where the Investment Adviser believed appropriate remedial action had not been taken. These controversies include controversies relating to Biodiversity & Land Use, Toxic Emissions & Waste, Water Stress, Operational Waste (Non-Hazardous), Supply Chain Management amongst others.
- **PAI indicator number 10 (violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises):** The Fund considered this PAI indicator through its direct investments in equities because it excluded investments in issuers flagged in breach of selected global norms and conventions, including the United Nations Global Compact Principles (UNGC) and OECD Guidelines for Multinational Enterprises.
- **PAI indicator number 14 (exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)):** The Fund considered this PAI indicator through its direct investments in equities because it excluded investments in issuers which derive any revenue from controversial weapons (including all the controversial weapons listed for PAI number 14).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2023 to 31 December 2023.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
UNITED STATES TREASURY	Government Bond	4.20%	United States
UNITED STATES TREASURY	Government Bond	3.87%	United States
GERMANY (FEDERAL REPUBLIC OF)	Government Bond	3.03%	Germany
FRANCE GOVERNMENT BOND OAT	Government Bond	2.74%	France
WELLINGTON GLOBAL IMPACT FUND	Collective Investment Scheme - Ucits	2.64%	Ireland
SPAIN GOVERNMENT BOND	Government Bond	2.31%	Spain
UNITED STATES TREASURY	Government Bond	2.31%	United States
IMPAX ENVIRONMENTAL MARKETS IRELAND FUND	Collective Investment Scheme - Ucits	2.20%	Ireland
REGNAN UMBRELLA FUND ICAV - REGNAN GLOBA	Collective Investment Scheme - Ucits	1.76%	Ireland
KBI FUND ICAV - KBI WATER FUND	Collective Investment Scheme - Ucits	1.64%	Ireland
MICROSOFT CORP	Information Technology	1.50%	United States
JAPAN (GOVERNMENT OF)	Government Bond	1.49%	Japan
UNITED STATES TREASURY	Government Bond	1.43%	United States
APPLE INC	Information Technology	1.15%	United States
MEXICO (UNITED MEXICAN STATES)	Government Bond	1.01%	Mexico

What was the proportion of sustainability-related investments?

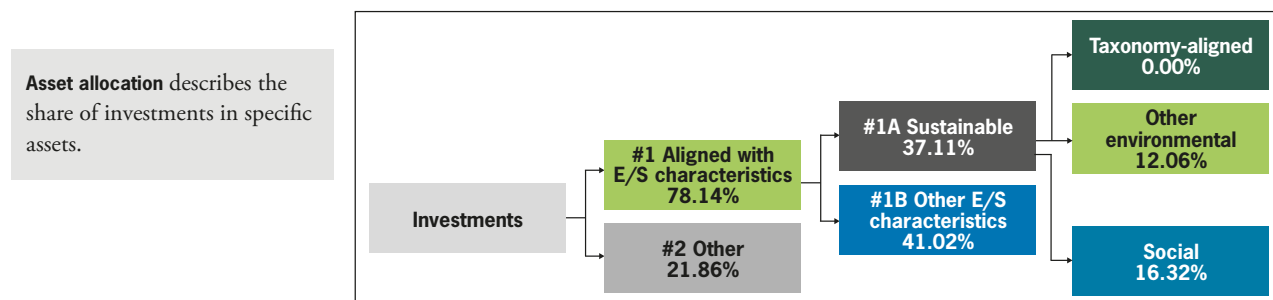

78.14% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

37.11% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram on the next page.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The relevant E/S characteristics vary depending on the nature of the Fund's investment. The Investments that were aligned with the E/S characteristics of the Fund were made up of:

- 53% equity investments
- 21% investments in government bonds
- 4.8% investments in solution providers (i.e., external fund managers)
- 0.27% investments in ESG aligned CDS

The ESG tilt of the portfolio was applied at the level of the five regional baskets and the portfolio as a whole, and not at the level of individual holdings.

Equity investments classified as sustainable investments

The Fund's methodology for categorising equity investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not seek to prioritise one over the other in its investment process and presents the breakdown for SFDR reporting purposes only.

Sovereign investments classified as sustainable investments

The Fund's methodology for categorising sovereign investments as sustainable investments considers both environmental and social factors (as relevant) and as set out above, the Fund does not categorise its sovereign sustainable investments as having either an environmental objective or a social objective.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sovereign sustainable investments into environmental and social categories in this question and the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Equity & Corporate Bond	52.73%
Information Technology	9.76%
Financials	8.54%
Health Care	6.74%
Consumer Discretionary	6.60%
Industrials	6.57%
Consumer Staples	4.51%
Communication Services	4.02%
Energy	2.00%
Materials	1.78%
Real Estate	1.55%
Utilities	0.68%
Government Bond	28.84%
Collective Investment Scheme - UCITS	8.96%
Futures	3.00%
Exchange Traded Fund	0.51%
Credit Default Swap Contract	0.29%
Options	0.01%
Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade, of Fossil Fuels	3.22%

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining and oil sands extraction exclusion applied as a binding characteristic to the Fund.

As described throughout this document, the Investment Adviser excludes from the Fund any company that derives 5% or more of its revenue from the mining of thermal coal or extraction of oil sands. Remaining equity holdings are subject to tilts considering ESG and Low Carbon Transition assessment scores seeking to overweight leaders and underweight laggards with regard to those scores. Additionally, the Fund applies a carbon budget to its equity investments which may underweight certain sectors such as those involved in fossil fuels. The Fund may therefore have some exposure to fossil fuel activities beyond those expressly prohibited through the binding characteristics of the Fund.

Additionally, the Fund has some exposure to fossil fuel activities through indirect portfolio holdings such as ETFs and funds. Please note that the Fund's binding exclusions, as set out in the Fund's pre-contractual disclosure, currently applies only to the directly held ESG equity and corporate credit securities. The Investment Adviser prefers ETFs and funds which have committed to a level of ESG integration, in order to align with the portfolio's overall objective to promote ESG characteristics, the Investment Adviser does not commit on a binding basis to invest in such ETFs and funds.

The table above only includes investments made by the Fund and excludes other assets held by the Fund, such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

12.06% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective. Solely for SFDR reporting purposes, the Investment Adviser has divided the proportion of the Fund’s sustainable investments into environmental and social categories, as per the methodology set out above.

What was the share of socially sustainable investments?

16.32% of the Fund’s investments were sustainable investments with a social objective during the reference period.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective. Solely for SFDR reporting purposes, the Investment Adviser has divided the proportion of the Fund’s sustainable investments into environmental and social categories, as per the methodology set out above.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

21.86% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised: (i) hedging instruments, (ii) cash held as ancillary liquidity, (iii) investments for which the investment team was lacking data in order to assess if they qualified as sustainable investments or if they promoted environmental or social characteristics, (iv) any other investments which neither promoted environmental or social characteristics, nor qualified as sustainable investments (such as derivatives used for speculative purposes which do not have any ESG features). These investments were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

The Investment Advisor carried out enhanced monitoring of the Fund to meet the environmental and social characteristics during the reference period. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period investments became restricted due to issuers exceeding revenue thresholds for restricted activities.

The Investment Advisor regularly engaged with the companies in which it invested and exercised proxy voting and other rights as shareholders with the Fund's environmental and social characteristics in mind. These activities gave the Investment Advisor the opportunity to guide companies in which it invested towards better ESG practices, potentially enhancing the environmental and social characteristics of the Fund.

The Investment Advisor's stewardship objectives are tied to E/S related outcomes that include amongst others:

- enhanced disclosure of sustainability related information
- securing and encouraging improved management of material sustainability related risks and opportunities; and
- improving and enhancing the Investment Advisor's own understanding of sustainability related risks in the Fund.

The Investment Advisor voted by proxy in a prudent and diligent manner, based on MSIM's proxy voting policies and in the best interests of the Fund's clients. Morgan Stanley Investment Management (MSIM) retained research providers to analyse ballot items and to make vote recommendations, however the Investment Adviser is in no way obligated to follow such recommendations.

For more information on the Investment Advisor's engagement and voting with reference to the Fund please see the Stewardship Report.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2023 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Article 6 Funds
