

Muzinich Americayield Fund

Hedged USD Income Class (ISIN: IE0033150131)

a Sub-Fund of Muzinich Funds

This Fund is managed by Muzinich & Co. (Ireland) Limited, part of Muzinich & Co., Inc.

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and Investment Policy

Investment Objective

The Sub-Fund seeks to achieve a high level of income and attractive risk-adjusted returns.

Investment Policy

The Muzinich Americayield strategy focuses on buying U.S. Dollar-denominated high yield debt securities (bonds) issued primarily by North American corporations and exclusively with a minimum credit rating of B3/B- or higher. The portfolio is prudently diversified over more than 100 issuers and 20 industries with a market-like duration-to-worst of approximately four years. (Duration-to-worst, denoted in years, is the approximate amount by which a bond's price increases or decreases as the result of a 1% change in interest rates, assuming that a company will repay its bond at a date most advantageous to the company. This date might be earlier than the bond's stated maturity.)

The Manager endeavors to reduce currency risk this unit class could face from assets held in currencies different from the unit class currency. For this purpose, the Manager may employ protective derivatives such as currency forward contracts which lock in a future price for buying or selling currency.

Fund Currency

The reference currency of the Sub-Fund is USD.

Subscription and Redemption

Subscription, conversion, or redemption orders must be received by the Administrator no later than 4:00 PM Irish time any Trade Date preceding a Dealing Day. Orders will be processed at the Net Asset Value calculated at the close of business on the Trade Date.

The Net Asset Value of this Sub-Fund is calculated on each of the Sub-Fund's business days.

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Sub-Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

Why is this Fund in this category?

The Sub-Fund is not guaranteed in capital. The Sub-Fund is invested in financial markets and makes investments that are subject to some levels of variation which may result in either gains or losses.

Key Risks

Credit Risk: Risk that issuers of bonds held in the Sub-Fund may default on their obligations or have their credit rating downgraded, possibly resulting in a temporary or permanent decrease in the value of those bonds. Most bonds in this Sub-Fund are rated below investment grade.

Liquidity Risk: Risk that the Sub-Fund may face difficulties in purchasing or selling its assets, although it endeavors to invest in liquid securities.

Interest Rate Risk: Risk that fixed-rate bonds held in the Sub-Fund may fall in price with an increase in the prevailing level of interest rates in the economy. This risk usually decreases for bonds of lower rating and shorter duration-to-worst.

Currency Risk: Risk that the Sub-Fund may invest in multiple currencies or may have investors subscribe in multiple currencies which may fluctuate in value relative to each other. Additionally, the risk that this unit class may be exposed to currencies other than the one in which the unit class is denominated. Although the Manager endeavors to protect the Sub-Fund against currency risk, such hedging, achieved through derivative instruments (see "Derivative Risk" below), is at the Manager's discretion and it may not be possible or practical to protect the Sub-Fund or individual unit classes against all currency risk.

Derivative Risk: Risk that the Sub-Fund may use derivative instruments to protect against perceived risks as described under the other headings in this section. Derivative instruments may rise or fall in price or may be subject to risk of non-payment or non-delivery by a counterparty. There is no guarantee that derivatives will provide the anticipated protection. The Sub-Fund has not utilized derivatives in the past except to protect against currency risk.

Operational Risk: Risk that operational processes, including those relating to the safekeeping of assets, may fail, resulting in losses.

Additional information about these and other risks may be found in the prospectus and supplement for the Sub-Fund, both of which are available at www.muzinich.com.
