Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest

Objectives and Investment Policy

Investment Objective

The Fund seeks to protect capital and generate attractive returns which exceed those available from similar duration Benchmark Government Bonds.

Investment Policy

The Muzinich ShortDurationHighYield Fund invests primarily in high yield (sub investment grade) corporate bonds, with short maturities or short duration-to-worst. Duration-to-worst denotes how sensitive a bond is to changes in the general interest rate environment with shorter durations denoting less sensitivity. It is calculated assuming a bond will be repaid at the date most advantageous to the issuer even if that occurs before the bond's stated maturity date. These bonds, which are mainly priced in US Dollars, are issued primarily by North American companies.

In order to control risk, the portfolio is well-diversified across more than 100 bond issuers and 20 industries.

The Investment Manager may use derivatives to hedge investments in the Fund's securities and their related assets, markets and currencies. Derivatives are financial instruments whose value is linked to the price of an underlying asset.

The Fund is actively managed and run on an entirely discretionary basis. The Fund is not managed in reference to any benchmark.

Fund Currency

The reference currency of the Fund is US Dollars.

Currency Policy: The Manager endeavours to reduce currency risk this unit class could face from assets held in currencies different from the unit class currency. For this purpose, the Manager may utilize derivatives such as currency forward contracts which lock in a future

price for buying or selling currency.

Income Policy

If you invest in Income Units, net income the Fund declares will be paid out to you. If you invest in Accumulation Units, net income will be reinvested in the Fund on behalf of investors.

Buying and selling units

You can buy and sell units in the Fund on any business day in London and New York (a "Dealing Day"). Purchase and sale orders must be received by the Administrator no later than 4.00PM Irish time on the relevant Dealing Day.

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

Why is this Fund in this category?

Your capital is at risk. The risk category shown above is a measure of how significant the rise and fall in the unit price (or that of a similar fund/benchmark) has been historically.

Key Risks

Credit Risk: Issuers of bonds held in the Fund may default on their obligations or have their credit rating downgraded, possibly resulting in a temporary or permanent decrease in the value of those bonds. Bonds in this Fund may be sub-investment grade, meaning that they may produce a higher level of income but also carry greater risk.

Liquidity Risk: The Fund may face difficulties in purchasing or selling its assets, although it endeavors to invest in liquid securities.

Interest Rate Risk: Fixed-rate bonds held in the Fund may fall in price with an increase in the prevailing level of interest rates in the economy. This risk usually decreases for bonds of lower rating and shorter durations.

Currency Risk: Fluctuations in exchange rates may cause the value of your investment to rise or fall. This unit class may be exposed to currencies other than the one in which the unit class is denominated. Although the Manager endeavours to

protect the Fund against currency risk, such hedging, achieved through derivatives (see "Derivative Risk" below), is at the Manager's discretion and it may not be possible or practical to protect against all currency risk.

Derivative Risk: The Fund may use derivative instruments to protect against potential risks as described under the other headings in this section. Derivative instruments may rise or fall in price or may be subject to risk of non-payment or non-delivery by a counterparty. There is no guarantee that derivatives will provide the anticipated protection.

Operational Risk: Operational processes, including those relating to the safekeeping of assets, may fail, resulting in losses.

Additional information about these and other risks may be found in the prospectus and supplement for the Fund, both of which are available at www.muzinich.com and www.fundinfo.com.
