Material changes to the Fund

The following material changes to the Fund were undertaken during the financial year ended 31 December 2023, having received prior approval from the Board of Directors, the Commission de Surveillance du Secteur Financier ('CSSF') and where required Shareholders. Where appropriate, notices were sent to Shareholders notifying them of the respective changes:

Sub-Fund launches

- Launch of the Global Macro Currency Fund on 30 August 2023.

Sub-Fund closures

- Liquidation of the Global Income Opportunities Fund on 10 January 2023.
- Liquidation of the Latin American Investment Grade Corporate Debt Fund on 12 July 2023.
- Liquidation of the Target Return Bond Fund on 7 December 2023.

Other Material changes

- Amendment to the investment objective and policy, target benchmark and global exposure calculation method for the Global Multi-Asset Sustainable Growth Fund and Global Multi-Asset Sustainable Growth Fund (Euro) effective 31 May 2023.
- Increase in the sustainable investments levels of the European Equity Fund effective 31 May 2023.
- Amendments to reflect the classification of the Latin American Corporate Debt Fund as meeting the requirements of article 8 of the sustainable finance disclosures regulations (SFDR) effective 31 May 2023.
- Amendments to reflect the creation of a new sub-fund, the Global Macro Currency Fund.
- Amendments to SFDR pre-contractual disclosure templates in Appendix 3 to include the new questions on taxonomy alignment of sustainable investments in fossil gas and nuclear, as well as some tidying and improvements to the disclosures relating to the do 'no significant harm' principle for the sub-funds which make sustainable investments effective 31 May 2023.
- Amendments to reflect a change in the expected leverage levels of certain sub-funds in Appendix 4 of the Prospectus.
- Change of Danish paying agent effective 4 May 2023.
- Renaming of the Registrar and Transfer Agent from RBC Investor Services Bank S.A. to CACEIS Investor Services Bank S.A. effective 3 July 2023, following its acquisition by the CACEIS group.
- Amendments to reflect the change of name of the Global Total Return Credit Fund to the Global Credit Income Fund and reduction of the management fee of the A share class of the sub-fund effective 30 November 2023.
- Amendments to reflect a management fee reduction to 0.65% for the I/IX and the J/JX share class of the European Equity Fund effective 30 November 2023.
- Amendments to reflect a management fee reduction to 0.75% for the I/IX share class of the Latin American Corporate Debt Fund effective 30 November 2023.
- Amendments to reflect the appointment of Ninety One SA Proprietary Limited as subinvestment

Material changes to the Fund (continued)

manager of the Emerging Markets Local Currency Debt Fund, Emerging Markets Local Currency Dynamic Debt Fund and Emerging Markets Local Currency Total Return Debt Fund effective 30 November 2023

- Effective 30 November 2023 amendments to the SFDR pre-contractual disclosures to:
 - Increase the minimum sustainable investment levels to 50% for the Emerging Markets Sustainable Equity Fund, Global Multi-Asset Sustainable Growth Fund, Global Multi-Asset Sustainable Growth Fund (Euro) and the Global Sustainable Equity Fund.
 - Update the minimum taxonomy alignment to 1% for the Global Environment Fund, Emerging Markets Sustainable Equity Fund, Global Multi-Asset Sustainable Growth Fund, Global Multi-Asset Sustainable Growth Fund (Euro) and Global Sustainable Equity Fund.
 - Update the objectives towards which sustainable investments contribute and the associated sustainability indicators for the Emerging Markets Sustainable Equity Fund, Global Multi-Asset Sustainable Growth Fund, Global Multi-Asset Sustainable Growth Fund (Euro) and Global Sustainable Equity Fund.
 - Streamline the sustainability indicators used to attain the environmental and/or social characteristics promoted for the Emerging Markets Sustainable Equity Fund, Global Macro Allocation Fund, Global Multi-Asset Income Fund, Global Multi-Asset Sustainable Growth Fund, Global Multi-Asset Sustainable Growth Fund (Euro), Global Sustainable Equity Fund, Emerging Markets Blended Debt Fund (on portion invested in sovereign debt), Emerging Markets Hard Currency Debt Fund, Emerging Markets Local Currency Debt Fund, Emerging Markets Local Currency Dynamic Debt Fund and Emerging Markets Local Currency Total Return Debt Fund,
- Amendments to the Prospectus to improve the description of the derogation from the 5/10/40 rule for a Sub-Fund which is not a Money Market Sub-Fund investing in government and public securities issued or guaranteed by a single issuer above 35% and a Money Market Sub-Fund investing in government and public securities issued or guaranteed by a single issuer above 5% effective 30 November 2023
- Amendments to the Prospectus to add further risk disclosure in the Fund's smoothing policy for the Inc-2 Share Classes that in extreme cases distribution payments in the later months of a financial year may be nil effective 30 November 2023.
- Amendments to the Prospectus to disclose that the Investment Manager may utilise the dealing desk services and ancillary services provided by companies in the Ninety One Group, including executing through brokers non-discretionary spot foreign exchange transactions required for the settlement of executed orders in the Fund's investments instructed by the Investment Manager effective 30 November 2023.
- A new risk warning titled 'Account Bank Risk: Distress Events' explaining the risk that monies held in Global Strategy Fund's and the Global Distributor's bank accounts, such as the subscription and redemption bank account, may not be covered at all or sufficiently by deposit guarantee

Material changes to the Fund (continued)

schemes and may be lost in the event of the account bank's failure and that neither Global Strategy Fund nor Ninety One will be liable in the event of an account bank's failure for any lost monies or to take any action on shareholder's behalf to recover monies that may be owing by the account bank.

- Effective 30 November 2023 amendments to reflect the change of record date for dividends as follows:
 - second to last business day of December for annual dividends,
 - second to last business day of June and December for semi-annual dividends,
 - second to last business day of March, June, September and December for quarterly dividends, and
 - second to last business day of each month for monthly dividends.
- Amendments to reflect the use of the 'net-of-tax' series of the JPMorgan Government Bond – Emerging Markets Global Diversified Index as the performance comparison index for the Emerging Markets Local Currency Debt Fund, Emerging Markets Local Currency Dynamic Debt Fund and Emerging Markets Local Currency Total Return Debt Fund effective 30 November 2023.

Past performance should not be taken as a guide to the future. Performance would have been lower had any initial charge been included.

Performance will vary between different Share Classes reflecting the fee levels of those Share Classes. As with any investment it is possible to lose capital and any yields will vary over time. Investment benefits to individual Shareholders will vary in accordance with personal circumstances.

Morningstar category percentage averages are those of relevant Morningstar category filtered to include only the funds on the Morningstar Offshore Mutual Funds (Major Offshore Domiciles) database. Source: Morningstar, NAV based, gross income reinvested (with the exception of Global Gold Fund which has no income reinvested), measured in Sub-Fund reference currency as indicated. All periods and measures to 31.12.23 based on the prices issued to the market at that date. All market indicators are total return. Three year volatility is annualised volatility as measured by standard deviation of monthly returns.

Performance will vary between different Share Classes reflecting the fee levels of those Share Classes. As with any investment it is possible to lose capital and any yields will vary over time. Investment benefits to individual Shareholders will vary in accordance with personal circumstances.

Morningstar category percentage averages are those of relevant Morningstar category filtered to include only the funds on the Morningstar Offshore Mutual Funds (Major Offshore Domiciles) database. Source: Morningstar, NAV based, gross income reinvested (with the exception of Global Gold Fund which has no income reinvested), measured in Sub-Fund reference currency as indicated. All periods and measures to 31.12.23 based on the prices issued to the market at that date. All market indicators are total return indices except# which are price indices with no income reflected. Three year volatility is annualised volatility as measured by standard deviation of monthly returns.

Performance (continued)

Sub-Fund performance record

(Calendar year performance over 5 years) (continued)

Equity Sub-Funds (continued)

No performance has been shown for the Global Macro Currency Fund as this Sub-Fund was launched on 30.08.2023

Past performance should not be taken as a guide to the future. Performance would have been lower had any initial charge been included. Performance will vary between different Share Classes reflecting the fee levels of those Share Classes. As with any investment it is possible to lose capital and any yields will vary over time. Investment benefits to individual Shareholders will vary in accordance with personal circumstances.

Morningstar category percentage averages are those of relevant Morningstar category filtered to include only the funds on the Morningstar Offshore Mutual Funds (Major Offshore Domiciles) database. Source: Morningstar, NAV based, gross income reinvested (with the exception of Global Gold Fund which has no income reinvested), measured in Sub-Fund reference currency as indicated. All periods and measures to 31.12.23 based on the prices issued to the market at that date. All market indicators are total return indices except[#] which are price indices with no income reflected. Three year volatility is annualised volatility as measured by standard deviation of monthly returns.

The Fund

The Fund

Ninety One Global Strategy Fund (the 'Fund') was initially established in Guernsey on 5 January 1984 and was re-domiciled to Luxembourg on 1 July 2008. The Fund is authorised under Part I of the Luxembourg law of 17 December 2010 relating to collective investment undertakings (loi concernant les organismes de placement collectif) (the 'Law of 2010'). The Fund qualifies as an Undertaking for Collective Investment in Transferable Securities ('UCITS') under Article 1 paragraph 2, points a) and b) of the Directive 2009/65/EC of 13 July 2009 of the European Parliament and the Council (the 'Directive 2009/65/EC'), and may therefore be offered for sale in European Union ('EU') Member States (subject to registration in EU Member States other than Luxembourg). In addition, applications to register the Fund may be made in other countries.

The Fund has appointed Ninety One Luxembourg S.A. (previously Investec Asset Management Luxembourg S.A.) (the 'Management Company') on 30 November 2014, to serve as its designated management company in accordance with the Law of 2010. The Management Company is a public limited company (societe anonyme) incorporated on 8 July 2011 under registration number B 162485. The Management Company has been authorised by the CSSF to manage the business and affairs of the Fund pursuant to Chapter 15 of the Law of 2010. The Management Company has also been authorised by the CSSF as an alternative investment fund manager (an 'AIFM') pursuant to the Law of 2013 on alternative investment fund managers and currently acts as an AIFM to three alternative investment funds.

The Fund consisted of the following 46 Sub-Funds as at 31 December 2023:

Channel Islands

Gregory Cremen

19, rue de Bitbourg
L-1273 Luxembourg
Grand Duchy of Luxembourg

Matthew Francis

c/o Ninety One UK Limited
55 Gresham Street
London EC2V 7EL
United Kingdom

Report of the Directors

The Directors submit their Report and the Audited Accounts for the period ended 31 December 2023.

Results

The results for the period are shown in the Statement of Operations on pages 348 to 355. The Sub-Funds performance records are shown on pages 5 to 15.

Directors

The Directors of the Fund as at 31 December, 2023 are set out on page 17. There are no service contracts proposed or in existence between any of the Directors and the Fund, but the Directors may receive remuneration as provided in the Articles of Incorporation. There are no contracts of significance during or at the end of the period in which a Director of the Fund is or was materially interested.

Directors' responsibilities

The Directors are responsible for preparing financial statements for each financial year which give a true and fair view of the state of affairs of the Fund and of the Statement of Operations of the Fund for that period and are in accordance with applicable laws. In preparing those financial statements the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed subject to any material departures disclosed and explained in the financial statements; and
- prepare financial statements on the going concern basis unless it is inappropriate to presume that the Fund will continue in business.

The Directors are responsible for keeping proper accounting records which disclose, with reasonable accuracy at any time, the financial position of the Fund and to enable them to ensure that the financial statements have been properly prepared in accordance with Luxembourg law on Undertakings for Collective Investment. They are also responsible for safeguarding the assets of the Fund and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Auditors

PricewaterhouseCoopers, Société coopérative was appointed as Auditor of Global Strategy Fund at the last annual general meeting held on 8 June 2023 for a term until the next annual general meeting to be held in 2024.

Signed on behalf of the Board of Directors

24 April 2024

K M McFarland
Chairperson

G D Cremen
Director

Notes forming part of the financial statements

1. Principal accounting policies

The following accounting principles have been applied consistently in dealing with items which are considered material in relation to the financial statements of the Fund:

a) Basis of preparation

The financial statements are presented in US Dollars and rounded to the nearest thousand. Where the reference currency of the Sub-Fund is not US Dollars, the presentation is in the reference currency of the Sub-Fund. The financial statements have been prepared in accordance with the Luxembourg law on Undertakings for Collective Investment. The preparation of financial statements requires management to make estimates and assumptions that may affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

The financial statements have been prepared on a going concern basis, except for the sub-funds Global Income Opportunities Fund which was liquidated on 10 January 2023, Latin American Investment Grade Corporate Debt Fund which was liquidated on 12 July 2023 and Target Return Bond Fund which liquidated on 7 December 2023.

The use of the non-going concern basis of accounting for liquidated sub-funds implies that its financial statements are adjusted to include the liquidation costs, the depreciation of any remaining unamortized formation expenses attributable to these sub-funds (if any), and that the valuation of investments reflect its net realizable value at liquidation date.

The use of the non-going concern has no material impact on the financial statements of liquidated sub-funds.

b) Presentation of combined totals

The combined totals presented in the financial statements represent the aggregation of all the Sub-Funds net assets and operations in US Dollars. Cross-holdings between Sub-Funds within the Fund have not been eliminated from these totals. On 31 December 2023, the cross Sub-Fund investments represent 0.64% of the combined net assets.

c) Foreign currency translation

Items are recorded in the Fund's records in the relevant reference currency of each Sub-Fund, which includes British Pound Sterling, Euro and US Dollars. These currencies are identified in the Prospectus.

The Fund is presented in US Dollars and the results of the Sub-Funds have been aggregated into US Dollars using the exchange rate ruling at the period-end date for the Statement of Assets and Liabilities and the average rate for the Statement of Operations and the Statement of Changes in Shareholders' Equity. The adjustment in US dollar terms arising from this aggregation is classified as a currency adjustment in the Statement of Changes in Shareholders' Equity. This adjustment has no effect on the value of the net assets allocated to individual Sub-Funds.

Transactions in foreign currencies are translated into the reference currency of the relevant Sub-Fund at the exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated to the reference currency of the relevant Sub-Fund at the closing exchange rate ruling at the Statement of Assets and Liabilities date.

Notes forming part of the financial statements (continued)

Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of monetary assets and liabilities are recognised in the Statement of Operations. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to the reference currency of the relevant Sub-Fund at the foreign exchange rate ruling at the dates the values were determined. Foreign currency exchange differences relating to investments are included in gains and losses on investments. All other foreign currency exchange differences relating to monetary items, including cash and cash equivalents, are presented separately in the note 6 - Net gains/(losses) on investments under caption 'Net realised gain/(loss) on foreign currencies and forward currency contracts'.

d) Valuation of financial Instruments

The value of any cash on hand or on deposit, bills and demand notes, accounts receivable, prepaid expenses, cash dividends and interest declared and accrued as aforesaid, and not yet received, shall be equal to the entire nominal or face amount thereof, unless the same is unlikely to be paid or received in full, in which case the value thereof shall be determined after making such discount as the Board of Directors may consider appropriate, to reflect the true value thereof.

The value of Transferable Securities and Money Market Instruments and any other assets which are quoted or dealt in on any stock exchange is based on the latest available price. Each Transferable Security and Money Market Instrument and any other assets traded on any Other Regulated Market shall be valued in a manner as similar as possible to that provided for quoted securities.

The fair value of investments is based on their quoted market prices at the Statement of Assets and Liabilities date. Financial assets are priced at current market prices. If a quoted market price is not available on a recognized stock exchange or from a broker/dealer for a non exchange-traded financial instrument, the fair value of the instrument is estimated using valuation techniques. If none of the above methods of valuation are appropriate for any investment or if in any case a particular value is not ascertainable, or if the Directors shall, having first sought appropriate advice, consider that some other method of valuation better reflects the fair value of the relevant investment then in any such case the method of valuation of the relevant investment shall be such as the Directors shall decide having regard to the circumstances and/or the nature of the investment.

Swaps, comprising Credit Default Swaps, Interest Rate Swaps and Total Return Swaps, are contracts by which two parties commit themselves during a given period to exchange two flows, one in exchange of the other, determined on the basis of a nominal value. The flows may be linked to interest rate(s), exchange rate(s), share(s), index(es) or credit event(s). Swap contracts are valued using the difference between the values of forecasted flows the counterparty is to pay to the Sub-Fund and those owed by the Sub-Fund to its counterparties.

Contracts for Difference are valued based on the closing market price of the underlying security, less any financing charges attributable to each contract. Upon entering into Contracts for Difference, the Fund may be required to pledge to the broker an amount of cash and/or other assets equal to a certain percentage of the contract amount ('initial margin'). Subsequently, payments known as 'variation margin' are made or received by the Fund periodically, depending on fluctuations in the value of the underlying security. During the period the contracts are open, changes in the value of the contracts are recognised as unrealised gains and losses by marking to market at each valuation date in order to reflect the value of the underlying security. Realised gains or losses upon closure of the contract are equal to the difference between the value of the contract at the time it was opened

Notes forming part of the financial statements (continued)

including financial charges and the value at the time it was closed.

The fair value of the forward contracts and futures contracts is estimated as the amount the Sub-Fund would receive or pay to terminate the contract at the Statement of Assets and Liabilities date.

Shares or units of underlying open-ended Undertakings for Collective Investment (UCIs) are valued at their last determined and available Net Asset Value.

Money market instruments are valued at their market price.

The liquidation value of futures, forward and options contracts not traded on exchanges or on Other Regulated Markets shall mean their net liquidating value determined, pursuant to the policies established by the Board of Directors. The liquidating value of futures, forward and options contracts traded on exchanges or on Other Regulated Markets shall be based upon the last available settlement prices of these contracts on exchanges and/or Regulated Markets on which the particular futures, forward or options contracts are traded by the Sub-Fund.

The Fund generates income from investments it may hold in the most junior class of securities of Collateralized Loans Obligations (CLOs) (typically preferred shares or subordinated securities) managed by other asset management companies. These junior class securities are subordinated to senior bond holders who typically receive a fixed rate of return on their investment. The CLOs are leveraged funds and any excess cash flow or “excess spread” (interest earned by the underlying securities in the fund less payments made to senior bond holders and less fund expenses and management fees) is paid to the holders of the CLOs’ subordinated securities or preferred shares. The Fund recognizes a portion of these cash payments as interest income based on an expected rate of return through expected maturity, and any excess is then recognized as a return of capital.

For any senior class CLO securities the Fund may hold, interest is earned at a fixed rate or a fixed spread relative to the LIBOR index, and is recognized as interest income on the accrual basis.

The Money Market Funds (U.S. Dollar Money Fund and Sterling Money Fund) are variable NAV Sub-Funds (VNAV). Under a VNAV all investments are valued at Mark-to-Market.

e) Fair value adjustments

Events may occur between the determination of an investment’s last available price and the determination of a Sub-Fund’s Net Asset per Share at the valuation point that may, in the opinion of the Directors, mean that the last available price does not truly reflect the true market value of the investment. In such circumstances, a fair value adjustment factor is applied to the price of such investments in accordance with applicable trigger rules.

f) Swing Pricing

The actual cost of acquiring or disposing of assets and investments in a Sub-Fund may deviate from the mid-market prices normally used in calculating the Sub-Fund’s Net Asset Value per Share, due to dealing charges, taxes and spreads between acquisition and disposal prices of assets dealt in that Sub-Fund on that Valuation Day. These costs may have an adverse effect on the Net Asset Value per Share, known as “dilution”. In order to mitigate the effect of dilution and to protect Shareholder’s interests the Board of Directors may at their discretion estimate and allocate these costs to anyone dealing in Shares on a relevant Valuation Day by adjusting the Net Asset Value per Share in a Sub-Fund to take into account the possible effects of dilution.

Notes forming part of the financial statements (continued)

The Net Asset Value per Share of a Sub-Fund may be adjusted on any Valuation Day where in the opinion of the Board of Directors it is in the interests of Shareholders. An adjustment may be applied on a 'partial' (i.e. ad hoc) or 'full' (i.e. daily) basis. A partial (i.e. ad hoc) adjustment will be applied on any Valuation Day when the aggregate total of subscriptions, conversions (for Shares of another Sub-Fund) and/or redemptions of Shares of all Classes of a Sub-Fund result in net subscriptions (inflows) or redemptions (outflows) which exceeds a pre-determined threshold, as determined and reviewed by the Management Company from time to time for that Sub-Fund. A full (i.e. daily) adjustment will be applied only in certain circumstances (e.g. where a Sub-Fund is experiencing consistent net subscriptions and/or redemptions over a period of time, or, in the period leading up to a merger or liquidation of a Sub-Fund). In this case the full (i.e. daily) adjustment will be applied regardless of the size of the net subscriptions or redemptions of the Shares of a Sub-Fund. The Net Asset Value per Share will be adjusted upwards for subscriptions and adjusted downwards for redemptions. In certain circumstances, the Board of Directors may decide, at its sole discretion, that it is not appropriate to make an adjustment to the Net Asset Value per Share of a Sub-Fund.

As at the date of this report the Board of Directors has determined that the adjustment, based on normal dealing and other costs for the particular assets in which a Sub-Fund invests or disinvests, will not exceed 2% of the unadjusted Net Asset Value per Share of the Sub-Fund in normal market conditions.

As any such adjustment will be dependent on the aggregate net transactions in Shares in a Sub-Fund, it is not possible to accurately predict whether it will occur at any future point in time and consequently how frequently it will need to be made. Additionally, as the markets and jurisdictions in which the Sub-Funds invest may have different charging structures on the purchase and sale of assets, the resulting adjustment may differ between Sub-Funds and may be different for subscriptions than for redemptions.

The Board of Directors has delegated the day to day operational decisions to adjust the Net Asset Value per Share to the Management Company. The Management Company makes, and periodically reviews, the operational decisions to adjust the Net Asset Value per Share, including the application of a partial or full adjustment, the thresholds which would trigger an adjustment on a partial basis and the extent of the adjustment in each case, in accordance with its swing pricing mechanism policy. Currently, the Board of Directors has determined that all Sub-Funds, save for the U.S. Dollar Money Fund and Sterling Money Fund, may be subject to the adjustment mechanisms.

During the period from 1 January 2023 to 31 December 2023 following Sub-Funds have swung: All China Bond Fund, All China Equity Fund, Asia Dynamic Bond Fund, Asia Pacific Equity Opportunities Fund, Asia Pacific Franchise Fund, Asian Equity Fund, China A Shares Fund, Emerging Markets Blended Debt Fund, Emerging Markets Hard Currency Debt Fund, Emerging Markets Investment Grade Corporate Debt Fund, Emerging Markets Local Currency Debt Fund, Emerging Markets Local Currency Total Return Debt Fund, Emerging Markets Multi-Asset Fund, Emerging Markets Sustainable Blended Debt Fund, Emerging Markets Sustainable Equity Fund, Global Dynamic Fund, Global Environment Fund, Global Gold Fund, Global High Yield Fund, Global Income Opportunities Fund, Global Multi-Asset Sustainable Growth Fund, Global Multi-Asset Sustainable Growth Fund (Euro), Global Natural Resources Fund, Global Sustainable Equity Fund, Global Credit Income Fund, Investment Grade Corporate Bond Fund, Latin American Equity Fund, Latin American Investment Grade Corporate Debt Fund, Latin American Smaller Companies Fund and Target Return Bond Fund. The remaining Sub-Funds did not swing because their flows did not meet the threshold set up by the Management Company.

Notes forming part of the financial statements (continued)

Swing pricing as at the year end, if any, is recorded under the Swing adjustment caption of the Statement of Assets and Liabilities and of the Statement of Changes in Shareholders' Equity. As at year end there was swing adjustment recorded on the Investment Grade Corporate Bond Fund, the Global Dynamic Fund, the Global High Yield Fund and the Latin American Smaller Companies Fund.

g) Cash and cash equivalents

Cash comprises current accounts as well as term deposits with banks. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of change in value.

h) Interest income

Interest income is recognised in the Statement of Operations as it accrues, using the interest rate of the instrument calculated at the period-end on an effective interest rate basis.

Interest income or other income may include the amortisation of any discount or premium with regards to zero coupon bonds and money market instruments valued at amortised cost, transaction costs or other differences between the initial carrying amount of an interest bearing instrument and its amount at maturity.

i) Dividend income

Dividend income is recognised in the Statement of Operations on the ex-dividend date.

In some cases, the Sub-Fund may receive dividends in the form of additional shares rather than cash. In such cases the Sub-Fund recognises the value of the cash dividend alternative as dividend income.

j) Expenses

All expenses are recognised in the Statement of Operations on an accruals basis. Where formation costs have been incurred, these are capitalised and amortised over a period not exceeding five years.

k) Income and expense allocation

The allocation of income and expenses to each Share Class is based upon the proportion of the Sub-Fund's net assets of each Share Class on the day the income is earned or the expense is incurred.

l) Taxation

The Fund is not subject to any Luxembourg income tax, nor are dividends paid by the Fund subject to any withholding tax.

However, the Fund is liable in Luxembourg to a subscription tax (taxe d'abonnement) of 0.05% per annum, such tax being payable quarterly and calculated on the total Net Asset Value of the respective Class of Share at the end of the relevant quarter.

A reduced tax rate of 0.01% per annum of the net assets will be applicable to the I, J, S and Z Share Classes which are only sold to and held by Institutional Investors and to all Classes of the U.S. Dollar Money Fund and the Sterling Money Fund. Such tax is payable quarterly and calculated on the net assets of such Class at the end of the relevant quarter.

m) Performance Fees

There are no performance fees charged on the Ninety One - Global Strategy Fund.

Notes forming part of the financial statements (continued)

n) Distribution

The distributions are recorded on the ex date in the financial statements.

2. Equalisation

The Net Asset Value per Share of each Income Share includes a payment for equalisation representing undistributed income accrued since the last ex-dividend date.

Equalisation is a payment by a person who subscribes for Shares, and is calculated by dividing the relevant proportion of the net undistributed income of the Share Classes, by the number of such Shares in issue at the date on which the subscription is made. Equalisation is repaid to the Shareholders on the occurrence of the redemption of the Shares or on the payment of a dividend.

3. Currency exchange rates

The currency exchange rates against the US Dollar as at the following year-end dates were as follows:

	31 December 2023
Argentine peso	808.4735
Australian dollar	1.4662

10. Material contracts

The following material contracts have been entered into by the Fund:

- A management company services agreement between the Fund and the Management Company dated 30 November 2014 pursuant to which the Management Company is appointed as the management company for the Fund. This agreement was entered into for an unlimited period and is terminable by either party upon 90 days' written notice. The agreement was amended with effect from 25 May 2018 introducing terms for compliance with the General Data Protection Regulation (EU) 2016/679.
- An investment management agreement between the Fund, the Management Company and the Investment Manager dated 30 November 2014 pursuant to which the latter acts as investment manager of the Fund. This agreement was entered into for an unlimited period and is terminable by either party upon 90 days' written notice. According to an agreement entered into between the investment manager (in its capacity as a QFI) and Hong Kong and Shanghai Banking Corporation Limited ("HSBC") on or about 22 April 2015, as amended (the "QFI Schedule"), the latter has been appointed by the investment manager as its directly contracted agent. The QFI Schedule shall apply in full to all actions taken by HSBC under the QFI Schedule which are performed by HSBC as the investment manager's directly contracted agent.
- An agreement between the Fund and State Street Bank International GmbH, Luxembourg Branch (the legal successor of State Street Bank Luxembourg S.C.A. following this entity's merger into State Street Bank International GmbH on 4 November 2019) dated 10 May 2016 pursuant to which the latter is appointed Depositary of the assets of the Fund. The agreement was entered into for an unlimited period and may be terminated by either party upon 90 days' written notice provided that no such notice shall take effect until the appointment of a successor to the Depositary. According to the QFI Schedule entered into between the investment manager (in its capacity as a QFI) and HSBC on or about 22 April 2015 as amended, the latter has been appointed by the investment manager as the sub-custodian of the assets in China of Sub-Funds permitted to invest via the QFI licence. However, the depositary agreement between the Fund and State Street Bank International GmbH, Luxembourg Branch shall apply in full to all actions taken by HSBC under the QFI Schedule acting in its capacity as sub-custodian of the assets of the above-mentioned Sub-Funds, notwithstanding the direct appointment of HSBC by the investment manager of the Fund. The agreement was amended with effect from 25 May 2018 introducing terms for compliance with the General Data Protection Regulation (EU) 2016/679.
- An agreement between the Fund, the Management Company and State Street Bank International GmbH, Luxembourg Branch (the legal successor of State Street Bank Luxembourg S.C.A. following this entity's merger into State Street Bank International GmbH on 4 November 2019) dated 30 November 2014 pursuant to which the latter is appointed Administrator and Domiciliary Agent of the Fund. The agreement was entered into for an unlimited period and may be terminated by either party upon 90 days' written notice. The agreement was amended with effect from 25 May 2018 introducing terms for compliance with the General Data Protection Regulation (EU) 2016/679.
- An agreement between the Fund, the Management Company and the Global Distributor and Service Provider dated 30 November 2014 pursuant to which the latter was appointed Global Distributor and Service Provider of the Fund. The agreement was entered into for an unlimited period and may be terminated by either party upon 90 days' written notice. The agreement was amended with effect from 25 May 2018 introducing terms for compliance with the General Data Protection Regulation (EU) 2016/679.

Notes forming part of the financial statements (continued)

10. Material contracts (continued)

- An agreement between the Fund, the Management Company and CACEIS Investor Services Bank S.A. dated 23 November 2021 pursuant to which the latter was appointed Registrar and Transfer Agent of the Fund. The agreement was entered into for an unlimited period and may be terminated by either party upon 90 days' written notice.

Annual Management Fee

The Global Sustainable Equity, TX, Acc, GBP share class was launched on 3 February 2023. For the period from launch date to 31 December 2023 the management fee paid for the share class was 5,469.98 USD all of which was donated to a charity.

The annual management fees at 31 December 2023 were:

11. Transactions with connected persons

There have been no transactions with connected persons except as detailed below:

- Grant Cameron, Director of the Fund, is also a Director of the Management Company and the Global Distributor and Service Provider. Transactions with the Global Distributor and Service Provider are detailed in note 10.
- Kim McFarland, Director of the Fund, is also a Director of the Investment Manager. Transactions with the Investment Manager are detailed in note 10.
- Claude Niedner, a Director of the Fund, is a Partner at Arendt & Medernach, who are contracted as Legal Advisers to the Fund. During the period under review, Arendt & Medernach has provided legal services totalling 232,296 EUR to the Fund (inclusive of VAT). As at 31 December 2023, 46,971 EUR was outstanding and due to be paid.
- State Street Bank International GmbH, Luxembourg Branch, who is contracted as Depositary to the Fund is also the Fund's Administrator and Domiciliary Agent. During the period under review it provided services to the Fund for administration, fair value, tax and reporting for estimated value of 3,152,864 GBP (inclusive of VAT). During the period under review State Street Bank and Trust Company, a related party to State Street Bank International GmbH, Luxembourg Branch, provided hedging services to the Fund for 507,931 USD (inclusive of VAT) and collateral services estimated value of 388,780 GBP (inclusive of VAT). The Depositary has appointed State Street Bank and Trust Company as Fund's global custodian for which it provided services for estimated value of 10,945,206 GBP (inclusive of VAT) for the period under review.
- With the exception of the above points, there were no additional service contracts proposed or in existence between any of the Directors and the Fund.
- With the exception of the above points, there were no contracts of significance during or at the end of the period in which a Director of the Fund is or was initially interested.
- Transactions detailed in points above, have been entered into in the ordinary course of business and on normal commercial terms.

12. Dealing commissions arrangements

The Investment Manager does not use dealing commissions for the purchase of research services. Dealing commissions paid will only be for execution services. Research services are paid for by the Investment Manager.

13. Ongoing Charges

The method for calculation is Total Operating Expenses (not including negative investment income) divided by the average Net Asset Value for the period. This is calculated on a Share Class basis.

Ongoing charges were calculated in accordance with the ESMA's guidelines on the methodology for calculation of the ongoing charges figure in the Key Investor Information Document CESR/10-674, as well as with the ALFI (Association of the Luxembourg Fund Industry) guidelines.

14. Distribution (continued)

Distribution policy

Income Shares in the Fund are denoted by the word “Inc”, “Inc-2” or “Inc-3” in the Share Class name. In determining the distribution policy for any Class of Income Share (whether Inc, Inc-2 or Inc-3), the Board of Directors may determine, as permitted under Luxembourg Law, the extent to which expenses of that Class may be deducted from its income and/or capital account. In particular, the Board of Directors may determine that the distribution policy of any Class of Income Share is to distribute the whole of the income attributable to that Class to Shareholders after the deduction of the Management Fee (as defined in the Prospectus Section 9.1), the Administration Servicing Fee, the Distribution Fee where relevant, the Depositary Fee and all other expenses attributable to that Class and potentially a portion of capital to Shareholders before deduction of the Management Fee, the Administration Servicing Fee, the Distribution Fee where relevant, the Depositary Fee and all other expenses attributable to that Class of Income Share.

The Board of Directors may also determine if and to what extent distributions may include distributions from both net realised and net unrealised capital gains. Where Classes pay distributions that include net realised capital gains or net unrealised capital gains, or, in the case of Share Classes’ which distribute income gross of expenses, dividends may include initially subscribed capital. Shareholders should note that dividends distributed in this manner may be taxable as income, depending on the local tax legislation, and should seek their own professional tax advice in this regard.

The Board of Directors has determined that for any Inc Share Class, the distribution policy is to distribute net income. Accordingly, the expenses related to such a Share Class will be deducted from its income account. Where the income generated is insufficient to cover the expenses, the residual expenses shall be deducted from the relevant Share Class’ capital account.

The Board of Directors has determined that for any Inc-2 Share Class, the distribution policy is to distribute gross income. Accordingly, the expenses related to such a Share Class will be deducted from its capital account. This will have the effect of increasing that Share Class’ distributions (which may be taxable) whilst reducing its capital to an equivalent extent. This could constrain future capital and income growth.

The Board of Directors has determined that for an Inc-3 Share Class, the distribution policy is to distribute the long term expected level of gross income. The distribution will be calculated at the discretion of the Board of Directors on the basis of the expected gross income over a given period (such period to be at the Board of Director’s discretion) with a view to providing a consistent monthly distribution to Shareholders during such period. The distribution rate for each Inc-3 Share Class will typically be reviewed on a quarterly basis, but at least semi-annually, but may be adjusted more frequently to reflect changes in the portfolio’s expected yield. The expenses related to such a Share Class will be deducted from its capital account and may include net realised and net unrealised capital gains. This will have the effect of increasing that Share Class’ distributions (which may be taxable) whilst reducing its capital to an equivalent extent. This could constrain future capital and income growth.

The Board of Directors may determine, as permitted under Luxembourg law, the extent to which a dividend for any Class of Income Share may include distributions of income and/or capital. For the All China Bond Fund and the Global Credit Income Fund, the Board of Directors has determined that its distributable income may also include any implied yield accrued by certain investments the purchase of which is driven by an income-generating objective (e.g. foreign exchange forward contracts). The distribution policy for any Class of Income Share may change from time to time as determined by the Board of Directors.

The frequency of distributions varies across the different Sub-Funds and Share Classes, the detail of which can be found in the Fund’s Prospectus.

The distributions are recorded on the ex date in the financial statements.

Notes forming part of the financial statements (continued)

15. Securities on Loan

The Fund does not engage in securities lending.

16. Contingent Liabilities

There were no contingent liabilities as at 31 December 2023.

17. Bank Overdrafts

Any bank overdraft is secured against the assets of the Sub-Fund.

18. Commitments on Futures

As of 31 December 2023, the commitments on futures were:

Sub-Fund	Total commitment USD
Emerging Markets Local Currency Debt Fund	17,155,936
Emerging Markets Local Currency Dynamic Debt Fund	82,773,990
Emerging Markets Local Currency Total Return Debt Fund	74,188,154
Emerging Markets Sustainable Blended Debt Fund	3,305,664
Global Credit Income Fund	38,471,344
Investment Grade Corporate Bond Fund	42,255,819

20. Statement of significant changes in the portfolio

The list of changes in the composition of the investment portfolio, for the year ended 31 December 2023, shall be available on request and free of charge to investors. Please contact your local Ninety One office to request a copy.

21. Subsequent events

The Latin American Smaller Companies Fund was liquidated on 20 February 2024.

The following Sub-Funds merged after the period ended 31 December 2023.

- the Global Dynamic Fund merged all of its assets and liabilities into the Global Equity Fund on 19 January 2024.
- the Global High Yield Fund merged all of its assets and liabilities into the Global Credit Income Fund on 2 February 2024.
- the Investment Grade Corporate Bond Fund merged all of its assets and liabilities into the Global Credit Income Fund on 2 February 2024.

Audit report

To the Shareholders of
Ninety One Global Strategy Fund

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Ninety One Global Strategy Fund (the “Fund”) and of each of its sub-funds as at 31 December 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the Portfolio details - Schedule of Investments as at 31 December 2023;
- the Statement of Operations for the year then ended;
- the Statement of Changes in Shareholders’ Equity for the year then ended;
- the Statement of Assets and Liabilities as at 31 December 2023; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg

*Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256)
R.C.S. Luxembourg B 65 477 - TVA LU25482518*

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds (except for Latin American Smaller Companies and Target Return Bond Fund where a decision to liquidate exists) to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other information (Unaudited)

Class action

Class action against Volkswagen AG ('the Litigation').

The Litigation relates to the installation by Volkswagen AG of 'defeat software' in vehicles sold worldwide between 2009 and September 2015 ('the Emissions Scandal'). Proceedings (which include statutory and civil law claims) have been brought in the German Courts on behalf of shareholders who acquired Ordinary or Preference Volkswagen shares on any German stock exchange between 1 January 2009 and 18 September 2015 inclusive, and who had not sold all of those shares prior to 21 September 2015, relating to losses as a result of the Emissions Scandal ('the Class Action').

As a shareholder in Volkswagen AG during the relevant period, the Ninety One Global Strategy Fund, on behalf of the Global Equity Fund, Global Strategic Equity Fund and Global Strategic Managed Fund, is participating as a Claimant in the Class Action.

Class Action against BHP Billiton Ltd

The litigation relates to BHP Billiton Ltd ("BHP"). BHP is alleged to have made a series of false representations and not made certain disclosures in relation to the Fundão Dam at the Germano iron ore mine in Brazil. On 5 November 2015, the Fundão Dam collapsed, which is alleged to have caused environmental damage and loss of life. As a result BHP's stock price drop. The class action litigation against BHP commenced in the Australian courts.

The Ninety One Global Strategy Fund on behalf of: Asia Pacific Equity Opportunities Fund, Global Equity Fund, Global Strategic Managed Fund, Global Natural Resources Fund, Global Strategic Equity Fund, and U.K. Alpha Fund, as shareholders in BHP during the relevant period, is participating in the class action.

Remuneration disclosure

The remuneration policy of the Ninety One group, as it applies to the Management Company (the 'Remuneration Policy') sets out the policies and practices that are consistent with and promote sound and effective risk management, across all categories of risks, including sustainability risks. It does not encourage risk-taking which is inconsistent with the risk profiles, rules or articles of incorporation of the Fund. The Remuneration Policy is in line with the business strategy, objectives, values and interests of the Management Company and the Fund and its Shareholders, and includes measures to avoid conflicts of interest. It includes a description as to how remuneration and benefits are calculated (see further below) and identifies those individuals responsible for awarding remuneration and benefits.

With regard to the internal organization of the Management Company, the assessment of performance is set in a multi-year framework appropriate to the holding period recommended to the investors of the funds managed by the Management Company in order to ensure that the assessment process is based on longer-term performance and its investment risks and that the actual payment of performance-based components of remuneration is spread over the same period. The Remuneration Policy includes fixed and variable components of salaries and discretionary pension benefits that are appropriately balanced and the fixed component represents a sufficiently high proportion of the total remuneration to allow the operation of a fully flexible policy on variable remuneration components, including the possibility to pay no variable remuneration component.

Other information (Unaudited) (continued)

The Remuneration Policy applies to those categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that falls within the remuneration bracket of senior management and risk takers in each case whose professional activities have a material impact on the risk profile of the Management Company ('Identified Staff'). We have included below the relevant sections from the Remuneration Policy which summarize how remuneration and benefits have been calculated for Identified Staff.

Fixed Remuneration and Benefits

- Fixed remuneration, including salaries, is reviewed annually and designed to reflect the relative skills and experience of, and contribution made, by each employee. Advisors may be engaged, as appropriate, to obtain general market information or to benchmark specific positions to help assesses the extent to which remuneration levels are competitive and appropriate in the context of attracting and retaining people. In addition, fixed remuneration as a proportion of overall remuneration levels is reviewed and taken into account in the balance between salary, other fixed remuneration and performance-related awards.
- Employee benefits include:
 - Life and permanent health insurances and medical cover, which vary according to local market norms.
 - Employer pension contributions, which are based on annual salary only and not on other fixed remuneration, bonuses or the value of other benefits. No discretionary pension benefits are paid.

Discretionary annual variable compensation

- Ninety One operates an annual discretionary cash bonus scheme and an annual discretionary deferred bonus scheme. The primary determinant of the variable compensation pool available for distribution is Ninety One's own annual profit. The percentage of profit allocated to the variable compensation pool has been agreed (at a fixed rate) and has been approved by Ninety One Human Capital and Remuneration Committee. Given our business is orientated towards meeting the long-term objectives of our clients, there are not significant fluctuations in profit levels (and therefore bonus pools) year on year.
- Bonus pools are calculated taking into account input from the Chair of the Ninety One Management Risk Committee and the Head of Compliance to ensure that bonus pools are at an appropriate level given the current and likely future risks inherent in the business. The pool is divided between the business divisions based on considerations of both financial and non-financial performance.
- All employees of Ninety One are currently eligible to be considered for a cash bonus payment under the scheme, although this does not mean that employees will automatically receive a cash bonus. Any payments made under the scheme are at the discretion of Ninety One and based on a number of factors including multi-year performance and non-financial metrics such as compliance and risk awareness.

Other information (Unaudited) (continued)

- Where Ninety One’s financial performance is subdued or negative, total variable remuneration would be contracted in line with weaker financial results, taking into account both current remuneration and potential reductions in payouts of amounts previously earned. Ninety One’s total variable remuneration should therefore not limit its ability to strengthen its capital base as it is paid out of profits. This structure has been a key contributor to the long-term success of Ninety One and encourages the staff to behave like owners. Ninety One believes in aligning the longterm interests of clients, shareholders and staff.
- Compliance and Risk team bonuses are determined with primary reference to functional performance and not company financial performance.
- Both qualitative and quantitative factors are integral to determining remuneration levels. Specific factors considered include the following:
 - The profit of the overall firm;
 - Multi-year investment and financial performance of specific business units;
 - Behavior consistent with the culture and values of the firm;
 - Scope of responsibility and individual contribution to the performance of the business;
 - The attitude and behavior of employees towards risk consciousness, internal controls, risk management and regulatory compliance;
 - Specific input from risk and compliance functions regarding concerns about the behavior of individual employees;
 - Market sector norms and peer group comparisons; and
 - The quality and level of leadership and collaboration, the ability to grow and develop business and client relationships, and the development of self and others;
 - Current and likely future risks inherent in the business.

The details of the up-to-date Remuneration Policy, including but not limited to, further information regarding how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits, including the composition of the remuneration committee where such a committee exists, are available at www.ninetyone.com/remuneration and a paper copy will be made available free of charge upon request from the registered office of the Management Company.

The Remuneration Policy is reviewed on an annual basis by the Management Company (in its supervisory function). There are no irregularities to report as a result of this review.

Other information (Unaudited) (continued)

The table below shows the total amount of remuneration paid by the Management Company to its staff for the financial year ending 31 March 2023, split into fixed and variable remuneration, and showing the number of beneficiaries. No performance fees or any other type of remuneration was paid directly by the Fund.

Total Remuneration	\$5,757,404
Fixed Remuneration	\$3,231,796
Variable Remuneration	\$2,525,608
Number of Beneficiaries	23

The table below shows, for the same period, the aggregate amount of remuneration paid to Identified/Code Staff in respect of activities related to the Management Company and the Fund. Identified/Code Staff are staff and other individuals identified by the Management Company whose activities have a material impact on the risk profile of the Management Company or the Fund. This table excludes Identified/Code Staff activities subject to a delegation agreement.

Aggregate Remuneration	\$4,861,357
Senior Management	\$1,017,712
Other individuals with material impact	\$3,843,647

Risk management (Unaudited)

Risk management

The Fund uses a risk management process that allows monitoring the risk of the portfolio positions and their share of the overall risk profile of the portfolios of each Sub-Fund at any time. In accordance with the Law of 17 December 2010 and the applicable regulatory requirements of the Commission de Surveillance du Secteur Financier ('CSSF') the Management Company reports to the CSSF on a regular basis on the risk management process. The Management Company ensures, on the basis of appropriate and reasonable methods, that the overall risk, associated with derivatives is limited. The Fund uses the following methods:

Commitment approach

The 'commitment approach' is based on the positions of derivative financial instruments, converted into their corresponding underlying equivalents using the delta approach. Netting and Hedging might be considered for derivative financial instruments and their underlying assets. The sum of these underlying equivalents must not exceed the net asset value of the relevant Sub-Fund.

VaR approach

The value-at-Risk (VaR) is a mathematical-statistical concept and is used as a standard measure of risk in the financial sector. The VaR represents the potential loss of a portfolio over a given period (so-called holding period), which is with a certain probability (so-called confidence level).

Absolute VaR approach

In the absolute VaR approach the VaR (99% confidence level, 20-day holding period) of the relevant Sub-Fund can not exceed 20% of its net assets.

Relative VaR approach

The relative VaR concept determines the VaR based on a reference portfolio. Under this approach the VaR cannot be more than twice the VaR of a reference portfolio. The reference portfolio normally relates to an index or composite relevant to the Sub-Fund's investment policy.

VaR add ons

The following table shows the method used to calculate global exposure as well as the applicable reference portfolio for those Sub-Funds using the relative VaR approach.

Global risk measurement methods

Absolute VaR

The table below shows Sub-Funds utilizing an absolute VaR approach to risk measurement in 2023. Minimum utilisation and Maximum utilisation are the minimum and maximum VaR over the period divided by the VaR limit. Average Utilization is the average of VaR divided by the VaR limit.

The VaR has been calculated daily using the Monte-Carlo calculation approach with a confidence interval of 99%, a holding period of 20 days, a (historical) given period of 200 weeks.

Sub-Fund Name	Absolute VaR		
	Minimum Utilisation	Maximum Utilisation	Average Utilisation
Emerging Markets Local Currency Total Return Debt Fund	8.39%	47.14%	30.54%
Global Income Opportunities Fund	1.94%	22.28%	18.77%
Global Macro Allocation Fund	23.40%	37.96%	31.08%
Global Macro Currency Fund	26.27%	33.61%	28.23%
Global Multi-Asset Income Fund	21.50%	31.91%	25.21%
Global Credit Income Fund	30.04%	45.42%	35.49%
Target Return Bond Fund	4.55%	35.08%	12.08%

Relative VaR

The table below shows Sub-Funds utilizing a relative VaR approach to risk measurement in 2023. This is the VaR of the Sub-Fund relative to the VaR of the benchmark. Minimum utilisation and Maximum utilisation are the minimum and maximum ratio VaR over the period divided by the VaR limit. Average Utilization is the average of ratio VaR divided by the VaR limit.

The VaR has been calculated daily using the Monte-Carlo calculation approach with a confidence interval of 99%, a holding period of 20 days, a (historical) given period of 200 weeks.

Sub-Fund Name	Relative VaR		
	Minimum Utilisation	Maximum Utilisation	Average Utilisation
All China Bond Fund	24.74%	60.15%	54.67%
Asia Dynamic Bond Fund	44.05%	69.38%	58.65%
Emerging Markets Blended Debt Fund	56.16%	70.35%	59.51%
Emerging Markets Corporate Debt Fund	76.19%	94.23%	85.55%
Emerging Markets Hard Currency Debt Fund	45.53%	90.93%	70.95%

Risk management (Unaudited) (continued)

Sub-Fund Name	Relative VaR		
	Minimum Utilisation	Maximum Utilisation	Average Utilisation

Level of leverage

For Sub-Funds where the VaR approach is used to measure the overall risk associated with derivatives, the table below shows leverage using both the sum-of-notionals approach and the commitment approach. Shareholders should note that expected leverage levels for these Sub-Funds are a representative guide only and should not be regarded as imposing limits which may not be exceeded.

During the reported period, the average leverage based on the sum of the notionals of the derivatives used was:

Sub Fund Name	Global Exposure		
	Calculation Method	Level of Leverage (Sum of Notionals)	Commitment Method
Emerging Markets Local Currency Total Return Debt Fund	Absolute VaR	272.54%	83.08%
Global Income Opportunities Fund	Absolute VaR	0.00%	0.00%
Global Macro Allocation Fund	Absolute VaR	399.90%	199.14%
Global Macro Currency Fund	Absolute VaR	256.47%	102.79%
Global Multi-Asset Income Fund	Absolute VaR	225.00%	34.90%
Global Credit Income Fund	Absolute VaR	109.17%	26.21%

Risk management (Unaudited) (continued)

Sub Fund Name	Global Exposure Calculation Method	Level of Leverage (Sum of Notionals)	Commitment Method
Target Return Bond Fund*	Absolute VaR	1487.70%	14.30%
All China Bond Fund	Relative VaR	93.58%	34.47%
Asia Dynamic Bond Fund	Relative VaR	3.14%	0.00%
Emerging Markets Blended Debt Fund	Relative VaR	193.75%	64.83%
Emerging Markets Corporate Debt Fund	Relative VaR	4.37%	0.01%
Emerging Markets Hard Currency Debt Fund	Relative VaR	32.69%	1.91%
Emerging Markets Investment Grade Corporate Debt Fund	Relative VaR	2.37%	0.00%
Emerging Markets Local Currency Debt Fund	Relative VaR	207.83%	78.57%
Emerging Markets Local Currency Dynamic Debt Fund	Relative VaR	231.26%	87.79%
Emerging Markets Multi-Asset Fund	Relative VaR	58.09%	17.42%
Emerging Markets Sustainable Blended Debt	Relative VaR	123.36%	39.08%
Global Multi-Asset Sustainable Growth Fund	Relative VaR	213.65%	76.33%
Global Multi-Asset Sustainable Growth Fund (Euro)	Relative VaR	286.65%	73.36%
Global High Yield Fund	Relative VaR	78.82%	16.32%
Global Strategic Managed Fund	Relative VaR	117.51%	53.14%
Investment Grade Corporate Bond Fund	Relative VaR	70.47%	17.04%

* The Target Return Bond Fund was closed on 7 December 2023.

IMPORTANT NOTICE: Shareholders should please note that the above expected leverage levels have been calculated using the specific methodology prescribed under CSSF Circular 11/512, CSSF Regulation 10-4 or the ESMA (formerly CESR) Guidelines 10-788 on Risk Measurement and the Calculation of Global Exposure and Counterparty Risk for UCITS. This methodology might differ from the methodology used in other jurisdictions and/or general market practice regarding how leverage is understood. Shareholders should note that under this methodology, where a Sub-Fund uses derivatives for the purposes of efficient portfolio management, this will in some cases be included in the leverage calculation. This will inevitably inflate the leverage level for that Sub-Fund. Shareholders should note that the Fund uses a different methodology for its internal monitoring of leverage levels in the Sub-Funds. Shareholders should note further that the level of leverage does not include borrowings which are made only on a temporary basis in accordance Section 10.1(B)(3) of the prospectus.

Fair value hierarchy (Unaudited)

as at 31 December 2023

The three levels of the fair value hierarchy as determined by the Board are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 – Quoted prices in markets that are not active or financial instruments for which significant inputs are observable (including but not limited to quoted prices for similar securities, interest rates, foreign exchange rates, volatility and credit risk spreads), either directly or indirectly;

Level 3 – Prices or valuations that require significant unobservable inputs (including the Competent Persons assumptions in determining fair value measurement).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety shall be determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The following tables show financial assets and financial liabilities recognised at fair value, analysed between the three levels described above:

	Level 1 (000) GBP	Level 2 (000) GBP	Level 3 (000) GBP	Total (000) GBP

Notice to investors in Switzerland

The Fund has appointed CACEIS Investor Services Bank S.A., Esch-sur-Alzette, Zurich Branch as Representative and Paying Agent of the Fund in Switzerland. Consequently the place of performance and place of jurisdiction for Shares tendered in or distributed from Switzerland has been established at the registered office of CACEIS Investor Services Bank S.A., Esch-sur-Alzette, Zurich Branch in Zurich. Investors in Switzerland may therefore place application and redemption orders and may receive information on the Sub-Funds at the offices of:

CACEIS Investor Services Bank S.A., Esch-sur-Alzette Zurich Branch
Bleicherweg 7,
CH-8027 Zurich
Switzerland

In addition, Swiss investors may obtain copies of the Prospectus, Key Information Document, Articles of Incorporation, Report and Accounts and interim reports, list of purchases and sales, as well as other publications of the Fund, free of charge from the Swiss Representative and Paying Agent:

CACEIS Investor Services Bank S.A., Esch-sur-Alzette Zurich Branch
Bleicherweg 7,
CH-8027 Zurich
Switzerland

All notices and information requiring publication in Switzerland will be published on the electronic platform www.fundinfo.com. Any pending changes to the Prospectus may be listed on our website; see www.ninetyone.com for further details.

Notice of Meeting

Ninety One Global Strategy Fund
Société d'investissement à capital variable
49, Avenue J.F. Kennedy
L-1855 Luxembourg
R.C.S.: B139420
(the 'Company')

Convening Notice

Dear Shareholder,

Notice is hereby given and you are invited to participate in the

ANNUAL GENERAL MEETING

of Shareholders of the Company which will be held at 4 p.m. (CET) at 49 Avenue J.F. Kennedy L-1855 Luxembourg*, on 06 June 2024, with the following agenda:

AGENDA

1. Presentation of the Report of the Board of Directors.
2. Presentation of the Report of the Auditor.
3. Approval of the audited financial statements for the year ended 31 December 2023.
4. Allocation of the net results for the year ended 31 December 2023.
5. Discharge of Directors with respect to the performance of their duties during the year ended 31 December 2023.
6. To re-elect as Directors for a term ending at the next Annual General Meeting to be held in 2024:
 - Mr. Grant Cameron;
 - Mr. Gregory Cremen;
 - Mr. Matthew Francis;
 - Ms. Kim McFarland;
 - Mr. Claude Niedner
7. To re-elect PricewaterhouseCoopers, Société coopérative as Auditor of the Company for a term ending at the next Annual General Meeting to be held in 2025.
8. To vote upon payment of total combined remuneration of the Directors up to but not exceeding USD 200,000 to be apportioned between the re-elected and elected Directors, with no single Director receiving more than USD 35,000 for the period from this Annual General Meeting to the next Annual General Meeting to be held in 2025.

Notice of Meeting (continued)

9. Any other business.

Voting

The Annual General Meeting may validly deliberate on the items of the agenda without any quorum requirement and the resolution on each item of the agenda may validly be passed by the majority of the votes validly cast at such Annual General Meeting. Each share is entitled to one vote.

Voting arrangements

1. A shareholder entitled to participate and vote at the Annual General Meeting may do so by appointing a proxy to attend and to vote instead of them.
2. Please be advised that only shareholders on record by 4:00p.m. (CET) on 31 May 2024 may be entitled to vote at this Annual General Meeting.
3. Should you not be able to attend this Annual General Meeting, you are kindly requested to date, sign and return the Form of Proxy to the registered office of the Company at 49, Avenue J.F. Kennedy, L-1855 Luxembourg, by fax on (+352) 464 010 413, by email to luxembourg-domiciliarygroup@statestreet.com or by mail in the enclosed business reply envelope, no later than 4:00 p.m. (CET) on 04 June 2024.

Copies of the Annual Report & Accounts for the Company can be found on our website www.ninetyone.com. If you would like to request a copy of the Annual Report & Accounts once they are made available, free of charge, please contact us on +44 (0)20 3938 1800 or by email to enquiries@ninetyone.com.

By order of the Board of Directors,
Ninety One Global Strategy Fund
Chairperson, 24 April 2024

Sustainable Finance Disclosure Regulation (SFDR) disclosure (unaudited)

The Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector, known as the “Sustainable Finance Disclosure Regulation” (the “SFDR”), seeks to create a regulatory framework around sustainable investment in the EU. Amongst other requirements, it mandates disclosures on how sustainability-related financial risks are managed and, for products promoting certain environmental or social characteristics or objectives, how those characteristics or objectives are met.

The accompanying Regulation (EU) 2020/852, the “EU Taxonomy Regulation”, introduces a framework that defines what can be considered an ‘environmentally sustainable economic activity’ based on certain criteria. Certain financial products (including funds) are required to disclose against the Taxonomy criteria on how ‘aligned’ their investments are with these criteria, or otherwise indicate that they do not take the Taxonomy criteria into account.

Both the above Regulations require disclosure in the ‘periodic reports’ of the relevant financial products relating to the above requirements, which is provided below.

Article 6

Funds: All Sub-Funds of the Global Strategy Fund with the exception of the ones mentioned below

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities, as per the EU Taxonomy Regulation.

Article 8

Article 9

Please refer to annex V for:
Global Environment Fund

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: American Franchise Fund
Legal entity identifier: 2138006273FO5D85L614

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics: and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
--	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes better carbon outcomes (i.e. maintaining a carbon profile lower than the Sub-Fund's benchmark) by making investments in companies that meet the standards of the Investment Manager's proprietary sustainability assessments and by excluding investments in certain sectors or business areas (deemed incompatible with a net zero future).

Given the Investment Manager's consistent focus on high-quality, capital-light sustainable businesses, with zero exposure to heavily capital intensive, high-emission sectors such as energy, utilities and resources, the Sub-Fund's carbon profile remains far better relative to the broader market. As such, the environmental characteristics promoted by this product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2023	47.5	237.9	-80%
		2022	59.1	274.3	72%

The Sub-Fund maintained a carbon profile that is 80% lower than the broader market. The biggest contributors to the increase in absolute emissions at the Sub-Fund level (in line with the benchmark) were Nestle, Microsoft & Alphabet.

The 5 largest contributors to the sub-fund's carbon profile were, in order of magnitude (position sizes are shown in brackets):

- O'Reilly Automotive (2.18%)
- Nestle (2.62%)
- Booking Holdings (2.52%)
- Stryker (2.14%)
- ASML (1.91%)

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

There has been no material change in the Sub-Fund's carbon profile versus the benchmark this year compared to last year. The biggest contributors to the increase in absolute emissions at the sub-fund level (in line with the benchmark) were the same as the previous period's, as were the largest 5 contributors to the Sub-Fund's carbon profile.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis of an individual company, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI indicator	Metric	Year	Value	Commentary
GHG emissions	Scope 1, 2 & 3 GHG Emissions Contribution (EVIC) tCO ₂ e	2023	12,078.4	Nestle was the largest contributor to the Sub-Fund’s GHG emissions and carbon footprint. This was deemed not to be a material negative impact, as Nestle has made significant climate-related commitments, including SBTi-validated decarbonisation targets, including reducing GHG emissions by 50% by 2030.
Carbon footprint	Scope 1, 2 & 3 Carbon Footprint Contribution tCO ₂ e/m € invested	2023	50.8	
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO ₂ e/m € revenue	2023	358.4	St James’s Place (SJP) was the largest contributor to the Sub-Fund’s GHG intensity. This was deemed not to be a material negative impact, as St James’s Place are a capital light business, with the majority of its GHG intensity driven by scope 3 emissions rather than direct scope 1 or 2 emissions. Equally, SJP have committed to achieving net zero in their investments by 2050.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principle adverse impacts:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Exposure to companies active in the fossil fuel sector
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Where material adverse impacts are identified, the Investment Manager will engage directly with company management or sovereign stakeholders and/or exercise proxy voting rights in an effort to catalyse change.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2023

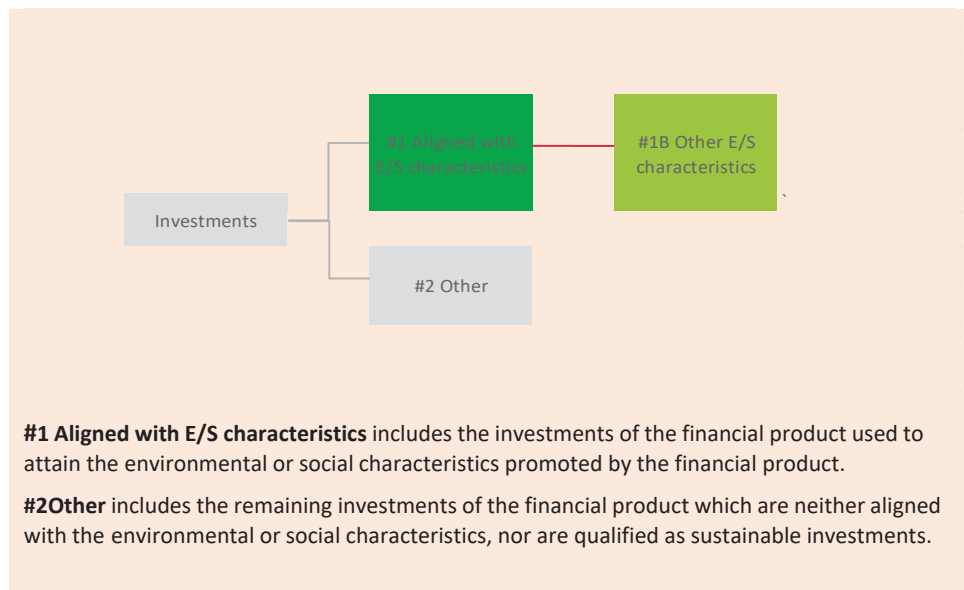

Largest investments	Sector	% Assets	Country
Microsoft Corp	Information Technology	8.8	United States
Alphabet Inc	Communication Services	6.0	United States
Autodesk Inc	Information Technology	4.4	United States
Adobe Inc	Information Technology	3.9	United States

What was the proportion of sustainability-related investments?

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	95.1
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	4.9
#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	95.1

In which economic sectors were the investments made?

Communication Services; Consumer Discretionary; Consumer Staples; Financials; Health Care; Industrials; Information Technology; Real Estate.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

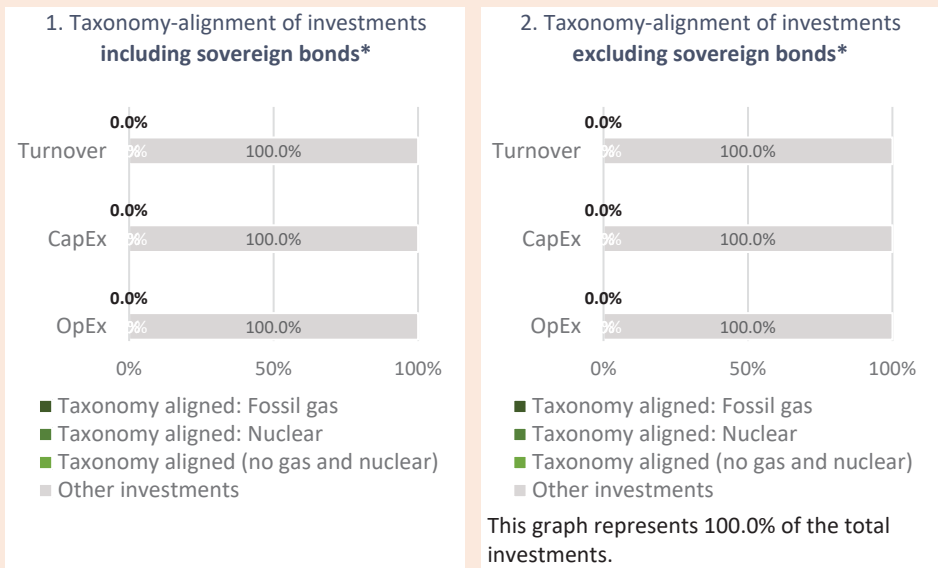

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

- Yes:
- in fossil gas in nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.0
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been no change in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

● **What was the share of socially sustainable investments?**

N/A

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund, such as:

- equities that are considered not aligned with E/S characteristics;
- and
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments

No minimum environmental or social safeguards are applied.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

Carbon analysis is fully integrated into the Investment Manager's research process and ongoing monitoring of underlying holdings. The Investment Manager actively uses a proprietary Climate Strategy Assessment for all existing holdings, as well as new ideas, which evaluates companies across fifteen criteria, including: net zero commitments, short- and long-term quantitative targets for reducing emissions and whether these are SBTi certified, CDP disclosure, executive remuneration linked to climate change performance, and the appointment of a board member or committee with responsibility for the company's climate change strategy.

The output of this analysis helps the Investment Manager prioritise engagement with those companies identified as having little or no carbon emissions disclosure, and/or do not yet have credible net zero targets and transition pathways in place that are aligned with the Paris Agreement. During the period, the Investment Manager proactively engaged with the lowest scoring companies, according to its proprietary Climate Strategy Assessment. Whilst acknowledging that many of these holdings do not have inherently carbon intensive business models, the Investment Manager has continued to monitor and engage Sub-Fund companies to take the lead on decarbonisation and implement further steps towards climate change.

In addition, over the last 12 months, the Investment Manager has developed a toolkit on unbundled Renewable Energy Certificates and carbon offsets to support engagement efforts further, in particular with the highest scoring companies on the Climate Strategy Assessment. Given their size and geographical location, many of the highest scoring holdings are in a prime position to take the lead on these aspects of decarbonisation, hence the Investment Manager initiating engagement on these issues.

During the reporting period (12 months to 31 December 2023), the investment team engaged with 14 of the Sub-Fund companies on climate change.

Examples of positive steps subsequent to engagement include:

Company	Sector	Outcome
Booking Holdings	Consumer Discretionary	The company is considering incorporating climate targets into their executive compensation now that they have reported against their climate action plan for the first time. They mentioned they might incorporate such climate targets into the 2024 compensation plan.
FactSet Research	Financials	They have made significant progress in monitoring and disclosing their GHG scope 1 & 2 emissions and are currently developing their first scope 3 inventory. Additionally, they are conducting a climate risk assessment in line with TCFD recommendations, which will inform the development of their climate transition plan, emissions reduction strategies, and ultimately, our SBTi target, which ought to be verified in 2024.
Dolby Laboratories	Information Technology	They have started disclosing to the CDP and have had their carbon reduction targets validated by the SBTi in 2023. They also hired a new Director of

		Sustainability to oversee their sustainability and decarbonisation efforts.
--	--	---

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

● ***How does the reference benchmark differ from a broad market index?***

N/A

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

● ***How did this financial product perform compared with the reference benchmark?***

N/A

● ***How did this financial product perform compared with the broad market index?***

N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Asia Dynamic Bond Fund

Legal entity identifier: 213800NEGHZ7ZICLLZ03

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

No

It **promoted Environmental/Social (E/S) characteristics**: and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain borrowers.

Issuers in the Sub-Fund are scored following the proprietary sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question,

related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In addition, the Investment Manager can confirm that there are no investments in excluded issuers. Thus, the characteristics promoted by this financial product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
Proportion of investments in borrowers with proprietary bottom-up ESG scores between 51-100	%	2023	85%	<p>The proportion is well above the required 50% threshold, highlighting the tilt of issuers with a favourable bottom-up sustainability profile. The distribution of issuers with favourable ESG scores is diversified by region, country and sector.</p> <p>As ESG factors are typically structural in nature, this aligns with the Investment Manager's philosophy of looking to identify businesses with a strong fundamental underpinning relative to their perceived credit quality. While this total percentage number is likely to fluctuate through time, the Investment Manager expects it to remain above the threshold.</p>
Proportion of companies invested in the business groups or activities (in some cases subject to specific revenue thresholds) prohibited under the Sub-Fund's exclusions criteria.	%	2023	0%	<p>Given the Sub-Fund has zero exposure to prohibited issuers, the Investment Manager has met the requirements of this sustainability indicator. This is assessed through a deep understanding of the issuers owned in the Sub-Fund.</p>

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

The Sub Fund's ESG metrics have improved year on year, and have complied with the indicators set above.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI Indicator	Metric	Year	Value	Commentary
GHG Emissions	Scope 1, 2 & 3 GHG Financed Emissions Contribution (EVIC) tCO2e	2023	27,431.9 vs. 27,505.2	The level of financed emissions in the Sub-Fund is broadly in line with than the comparison index*. The majority of the Sub-Fund’s emissions understandably come from issuers in the heavier emitting sectors (such as oil & gas, metals & mining and utilities). The emissions are concentrated in a small proportion of issuers; the top 10 issuers by financed emissions account for <20% of the Sub-Fund’s NAV but >80% of its financed emissions.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO2e/m € invested	2023	606.2 vs. 639.5	The Sub-Fund's carbon footprint is lower than the comparison index*. This is largely a function of having a lower exposure in heavier emitting utility issuers, which dominate the overall index. The majority of the Sub-Fund's carbon footprint understandably comes from issuers in the heavier emitting sectors (such as oil & gas, metals & mining and utilities). Within those sectors, however, the Sub-Fund is skewed towards issuers with a lower footprint. The carbon footprint is concentrated in a small proportion of issuers; the top 10 issuers by carbon footprint contribution account for c.18% of the Sub-Fund's NAV but c.86% of its carbon footprint.
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO2e/m € revenue	2023	1,595.9 vs. 1,400.9	The Sub-Fund's Greenhouse Gas (GHG) intensity is higher than the comparison index*. This is largely a function of having a higher exposure in more GHG-intense oil and gas issuers, which dominate the overall footprint of the index. The majority of the Sub-Fund's footprint understandably comes from issuers in the heavier emitting sectors (such as oil & gas, metals & mining and utilities). Within those sectors, however, the Sub-Fund is skewed towards issuers with a lower GHG intensity. The GHG intensity is concentrated in a small proportion of issuers; the top 10 issuers by GHG intensity contribution account for <20% of the Sub-Fund's NAV but >80% of its GHG intensity.

*Comparator Index = JP Morgan Asia Credit Index. The index consists of a combination of corporate and sovereign bonds. Due to the incompatibility of combining emissions of corporate and sovereign issuers, here only corporate bond emissions are considered and grossed up for fair comparison vs. the Sub-Fund.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principal adverse impacts:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023

Largest investments	Sector	% Assets	Country
Philippine Government Internat 3.229 Mar 29 27	Sovereign	2.2	Philippines
Greenko Solar Mauritius Ltd 5.95 Jul 29 26	Utilities	2.1	India
Star Energy Geothermal Darajat 4.85 Oct 14 38	Utilities	2.0	Indonesia
Sarana Multi Infrastruktur Per 2.05 May 11 26	Financial	1.9	Indonesia
Medco Bell Pte Ltd 6.375 Jan 30 27	Oil & Gas	1.8	Indonesia
Dp World Salaam 6 Jan 01 73	Infrastructure	1.8	U.A.E

Azure Power Energy Ltd 3.575 Aug 19 26	Utilities	1.8	India
Jsw Hydro Energy Ltd 4.125 May 18 31	Utilities	1.7	India
Continuum Energy Levanter Pte 4.5 Feb 09 27	Utilities	1.7	India
Bangkok Bank Pcl/hong Kong 5 Mar 23 72	Financial	1.7	Thailand
Dianjian Haiyu Ltd 4.3 Dec 20 72	Quasi-sov	1.7	China
Adani Electricity Mumbai Ltd 3.949 Feb 12 30	Utilities	1.6	India
Kasikornbank Pcl/hong Kong 3.343 Oct 02 31	Financial	1.6	Thailand
Sands China Ltd 5.65 Aug 08 28	Consumer	1.6	Macao

What was the proportion of sustainability-related investments?

● What was the asset allocation?

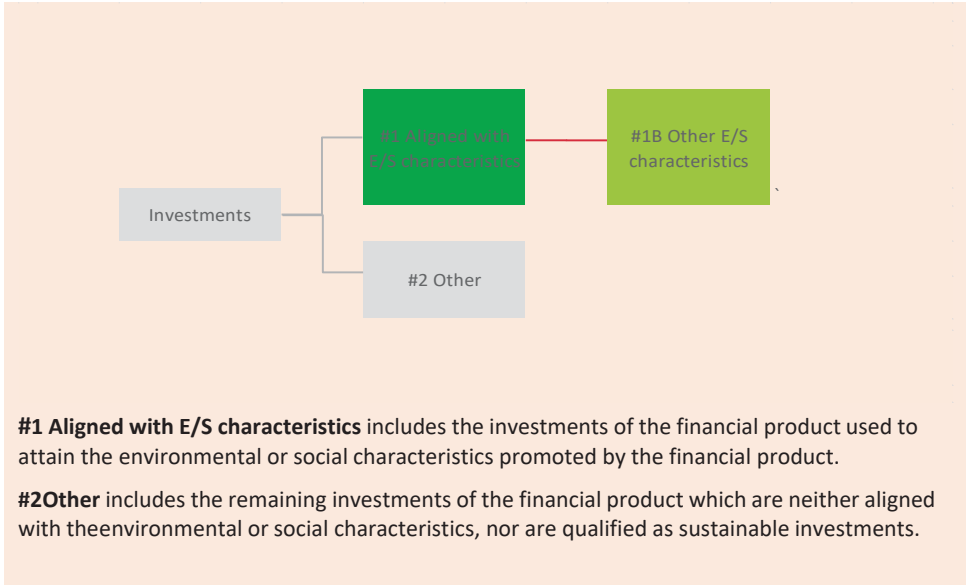

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with Sub-Fund's promoted environmental or social characteristics	85.0
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	85.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	15.0

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **In which economic sectors were the investments made?**
Consumer; Financial; Industrial; Infrastructure; Metals & Mining; Oil & Gas; Pulp & Paper; Quasi-sov; Real Estate; Sovereign; Tmt; Transport; Utilities.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

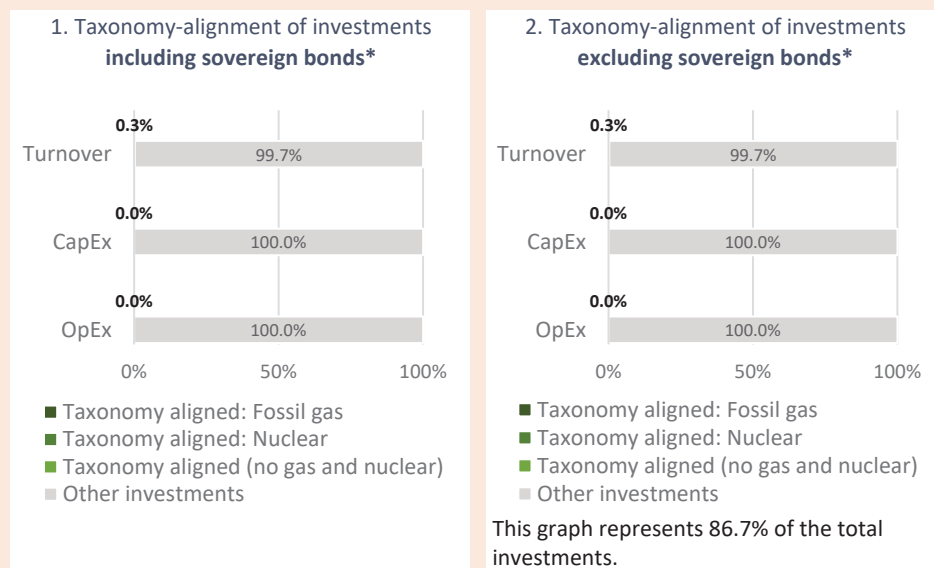

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**
 Yes:
 in fossil gas in nuclear energy
 No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Sovereign exposure accounts for 13.3 % of the total Sub-Fund value.

The Taxonomy regulation does not currently provide an appropriate methodology to calculate the extent to which central governments, central banks and supranational issuers (‘sovereign exposure’) are exposed to environmentally sustainable economic activities.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.3
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.1

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been a slight increase in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments.
- shares or units in other funds and exchange traded funds in which the Investment Manager does not have direct control of the underlying investments.

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements, the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply integrated into the investment process as per the Investment Manager’s sustainability framework. With regards to corporate bond issuers, the Investment Manager’s approach to engagement includes requesting information to understand company policies and activities. The Investment Manager shares insights and concerns with management to help them understand why it will not invest/disinvest if the corporate issuer has material weaknesses that it is not addressing. The point of the Investment Manager’s engagement is to improve a company’s overall credit quality and structural resilience which in turn will directly determine the discount factor or cost of debt. The Investment Manager also works with market participants and global

organisations to progress ESG adoption across the companies it invests in and improve visibility of ESG across the financial industry, working with bankers, index providers, charities, and specialist agencies. The Investment Manager encourages investee companies to sign up to the Science Based Targets Initiative (SBTi), Carbon Disclosure Project (CDP) and, most importantly, to adopt Paris-alignment targets and good governance practices. Engagements with sovereign and corporate bond issuers are typically continual and there is rarely a clearly defined beginning and end date, therefore, the Investment Manager does not measure (and record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

● ***How does the reference benchmark differ from a broad market index?***

N/A

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

● ***How did this financial product perform compared with the reference benchmark?***

N/A

● ***How did this financial product perform compared with the broad market index?***

N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Asia Pacific Franchise Fund

Legal entity identifier: 213800LUPSVZ4YRLGV11

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics: and while it did not have as its objective a sustainable investment, it had a proportion of <u> </u> % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes better carbon outcomes (i.e. maintaining a carbon profile lower than the Sub-Fund’s benchmark) by making investments in companies that meet the standards of the Investment

Manager’s proprietary sustainability assessments and by excluding investments in certain sectors or business areas (deemed incompatible with a net zero future).

Given the Investment Manager’s consistent focus on high-quality, capital-light sustainable businesses, with zero exposure to heavily capital intensive, high-emission sectors such as energy, utilities and resources, the Sub-Fund’s carbon profile remains far better relative to the broader market. As such, the environmental characteristics promoted by this product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2023	98.9	608.7	-84%
		2022	123.6	658.6	-81%

The Sub-Fund maintained a carbon profile that is 84% lower than the broader market. The biggest contributors to the increase in absolute emissions at the sub-fund level (in line with the benchmark) were Samsung Electronics, Taiwan Semiconductor Manufacturing Company, ASML.

The 5 largest contributors to the Sub-Funds carbon profile were, in order of magnitude (position sizes are shown in brackets):

- Samsung Electronics (9.55%)
- Vietnam Dairy (2.57%)
- Kone (1.28%)
- Heineken (1.75%)
- Meituan Dianping (2.27%)

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

There has been no material change in the Sub-Fund’s carbon profile versus the benchmark this year compared to last year. The biggest contributors to the increase in absolute emissions at the sub-fund level (in line with the benchmark) were the same as the previous period’s, except for ASML replacing Alibaba, as the latter is no longer held in the Sub-Fund.

Similarly, the largest 5 contributors to the Sub-Fund’s carbon profile were broadly the same as during the previous period, except for Kone and Meituan Dianping replacing Amcor and Alibaba, both of which were sold from the Sub-Fund since the previous period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis of an individual company, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI indicator	Metric	Year	Value	Commentary
GHG emissions	Scope 1, 2 and 3 GHG Emissions Contribution (EVIC) tCO2e	2023	5,121.1	Samsung Electronics was the largest contributor to the Sub-Fund’s GHG emissions and carbon footprint. Considering the sector, this was deemed not to be a material negative impact and in line with expectations.
Carbon footprint	Scope 1, 2 and 3 Carbon Footprint Contribution tCO2e/m € invested	2023	105.2	
GHG intensity	Scope 1, 2 and 3 GHG intensity of investee companies tCO2e/m € revenue	2023	479.1	Taiwan Semiconductor Manufacturing Company was the largest contributor to the sub-fund’s GHG intensity. Considering the sector, this was deemed not to be a material negative impact and in line with expectations.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principle adverse impacts:

Exposure to companies active in the fossil fuel sector

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Where material adverse impacts are identified, the Investment Manager will engage directly with company management or sovereign stakeholders and/or exercise proxy voting rights in an effort to catalyse change.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023

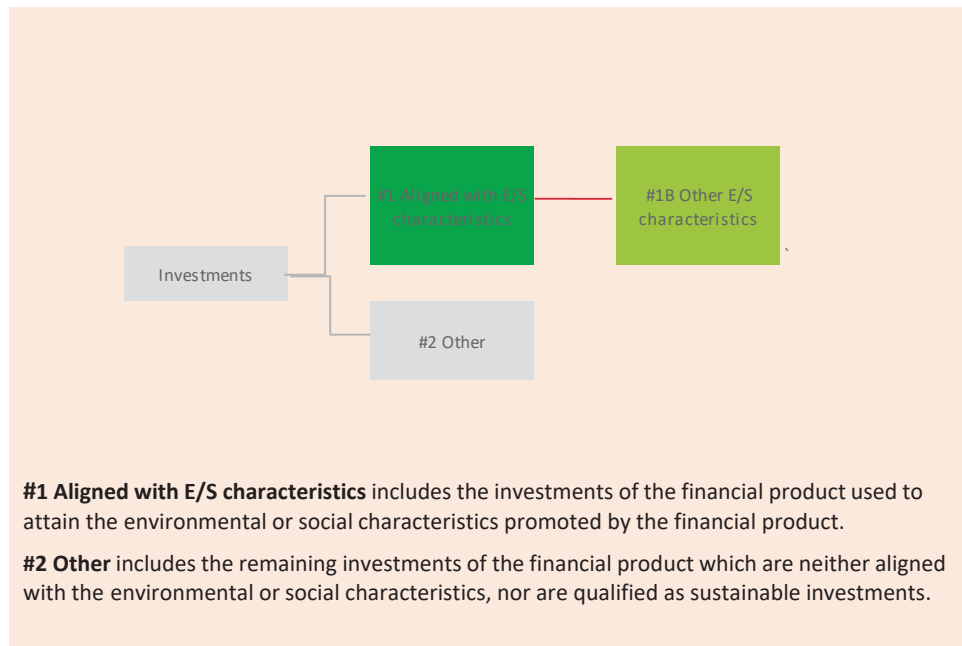

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufactu	Information Technology	9.7	Taiwan
Samsung Electronics Co Ltd	Information Technology	8.7	South Korea
Tencent Holdings Ltd	Communication Services	8.5	China
Kweichow Moutai Co Ltd	Consumer Staples	6.2	China
Aia Group Ltd	Financials	5.1	Hong Kong
Hdfc Bank Ltd	Financials	4.9	India
Csl Ltd	Health Care	4.5	Australia
Netease Inc	Communication Services	4.3	China
Aristocrat Leisure Ltd	Consumer Discretionary	3.5	Australia
Alibaba Group Holding Ltd	Consumer Discretionary	3.4	China
Shenzhen Mindray Bio-medical E	Health Care	3.4	China
Glodon Co Ltd	Information Technology	2.9	China
Rea Group Ltd	Communication Services	2.8	Australia
Hangzhou Tigermed Consulting C	Health Care	2.8	China
Vietnam Dairy Products Jsc	Consumer Staples	2.7	Vietnam

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-fund's promoted environmental or social characteristics	100.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	0.0
#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	100.0

● *In which economic sectors were the investments made?*

Communication Services; Consumer Discretionary; Consumer Staples; Financials; Health Care; Industrials; Information Technology; Materials

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

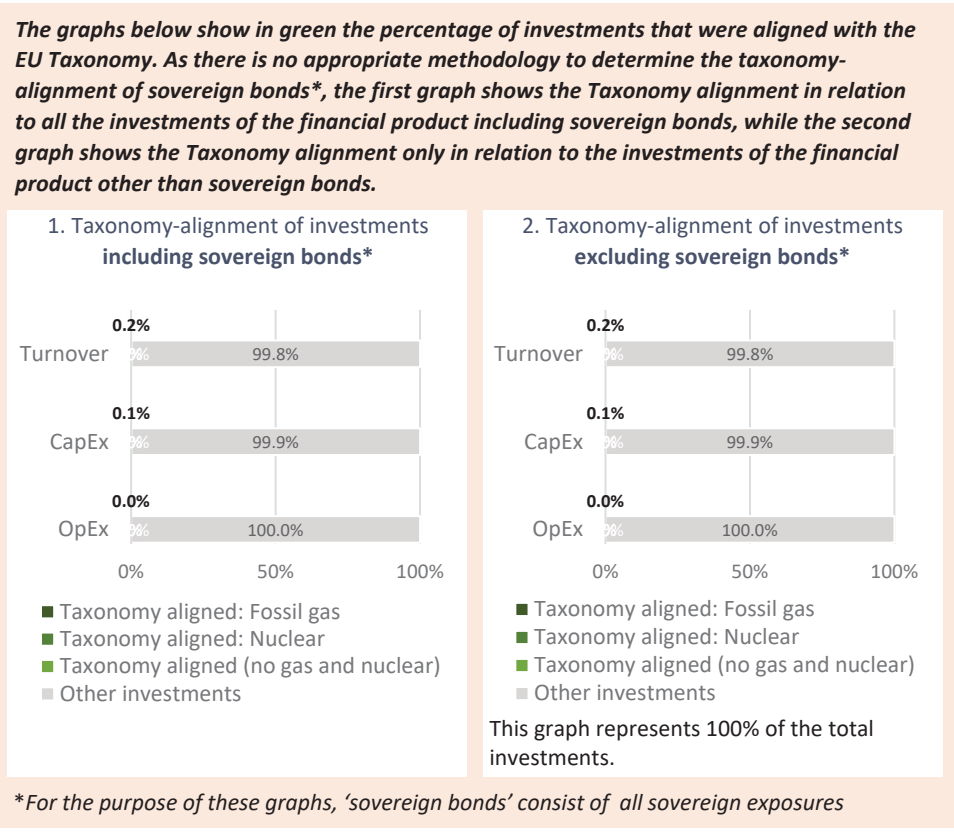

Yes:

in fossil gas in nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.2

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Climate change adaptation	0.0
---------------------------	-----

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.2

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been a minor increase in the percentage of investments that are aligned with the EU Taxonomy versus the previous period, with Kone qualifying as being aligned to enabling activities by revenue.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

 **What was the share of socially sustainable investments?**

N/A

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

'#2 Other' includes investments, as described in the Sub-Fund's investment policy, that support the financial objective and other management activities of the Sub-Fund such as:

- equities that are considered not aligned with E/S characteristics and
- cash held for liquidity purposes as an ancillary asset, deposits, and money market instruments; and

No minimum environmental or social safeguards are applied. Such investments will not usually represent a material proportion of the Sub-Fund's portfolio.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

Carbon analysis is fully integrated into the Investment Manager’s research process and ongoing monitoring of underlying holdings. The Investment Manager actively uses a proprietary Climate Strategy Assessment for all existing holdings, as well as new ideas, which evaluates companies across fifteen criteria, including: net zero commitments, short- and long-term quantitative targets for reducing emissions and whether these are SBTi certified, CDP disclosure, executive remuneration linked to climate change performance, and the appointment of a board member or committee with responsibility for the company’s climate change strategy.

The output of this analysis helps the Investment Manager prioritise engagement with those companies identified as having little or no carbon emissions disclosure, and/or do not yet have credible net zero targets and transition pathways in place that are aligned with the Paris Agreement. During the period, the Investment Manager proactively engaged with the lowest scoring companies, according to its proprietary Climate Strategy Assessment. Whilst acknowledging that many of these holdings do not have inherently carbon intensive business models, the Investment Manager has continued to monitor and engage Sub-Fund companies to take the lead on decarbonisation and implement further steps towards climate change.

In addition, over the last 12 months, the Investment Manager has developed a toolkit on unbundled Renewable Energy Certificates and carbon offsets to support engagement efforts further, in particular with the highest scoring companies on the Climate Strategy Assessment. Given their size and geographical location, many of the highest scoring holdings are in a prime position to take the lead on these aspects of decarbonisation, hence the Investment Manager initiating engagement on these issues.

During the reporting period (12 months to 31 December 2023), the investment team engaged with 8 of the Sub-Fund companies on climate change.

Examples of positive steps subsequent to engagement include:

Company	Sector	Outcome
Samsung Electronics	Information Technology	The company confirmed that they have set internal interim targets for Scope 1 & 2 emissions reduction by 2030, including for the Semiconductor division, which makes up the bulk of their Scope 1 & 2 emissions. They have also set internal interim targets for Scope 3 emissions for their Device Experience division and are in the process of restating their Scope 3 emissions, including for their Semiconductor division, to allow for target setting.
Glodon	Information Technology	Glodon has improved its carbon emissions disclosure, publishing Scope 1 and 2 carbon emissions and reduction targets. They are also currently working on finalising a carbon neutral plan and are seeking to help decarbonise their industry by participating in the formulation of standards such as guidelines for urban building energy consumption and operational carbon emission calculations methodology.
Taiwan Semiconductor Manufacturing Company	Information Technology	As a member of RE100, they have a target of 100% renewable energy by 2040 and given their Net Zero target by 2050, they confirmed that they continue to work with the Taiwanese government, Taipower, and renewable energy suppliers to increase renewable energy supply in Taiwan.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Hard Currency Debt Fund

Legal entity identifier: 213800EZ65Z2M6MXXZ41

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics : and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : %	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager’s proprietary sustainability framework and by excluding investments in certain borrowers.

100% of issuers in the Sub-Fund are scored following the proprietary sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the

question, related to the Sub-Fund, stating: "what investment strategy does this financial product follow". Thus, the characteristics promoted by this financial product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
Proportion of investments invested in countries that have an ESG trend score that is greater than the lower of 0 or the benchmark* ESG trend score	%	Dec 23	69.7	The Sub-Fund has exposure to 69.7% of investments that have an ESG trend score that is greater than the lower of a 0 or the benchmark ESG trend score.
Proportion of investments in borrowers rated -3 as per the Investment Manager's ESG trend scores.	%	Dec 23	0.3	There have been no new long investments in issuers scoring -3. Venezuela remains a -3 and now secondary trading has opened up following sanction removal we have begun exiting our position in a prudent manner in line with the need to treat clients fairly and achieve fair value.

*Benchmark in this context refers to the the Sub-Fund's performance comparison benchmark: JP Morgan EMBI Global Diversified Index.

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

The Sub Funds ESG metrics have improved year on year, and have complied with the indicators set above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year	Value	Commentary
GHG intensity	GHG intensity of investee countries tCO2e/million GDP	Dec 2023	230.7 vs.276.8*	Within its emerging market sovereign debt investments, the Investment Manager focuses on weighted average carbon intensity based on the Taskforce for Climate-Related Disclosures (TCFD) recommendations. This metric is defined as tonnes of CO2 emissions per US\$m of GDP (purchasing power parity) and it incorporates all CO2 emissions in the country of question. This is called ‘territorial emissions’ and is in line with UNFCCC emission inventory submissions. It is, therefore, closer in spirit to Scope 3, than direct Scope 1+2 emissions of the government. This calculation is done directly by The Emissions Database for Global Atmospheric Research (EDGAR) and the data covers all markets. While some countries report data, most global datasets use estimated data – hence there can be differences between datasets. There are also valid questions around production versus consumption approaches (consumption approaches include the CO2 emissions embedded in global trade). The Investment Manager focuses on data that uses the production approach as it believes this is more comprehensive and more accurately measured, albeit a regressive measure – making emerging market emissions appear worse given the globalisation of supply chains. The Sub-Fund today

				has a lower intensity than that of the representative index.
Investee countries subject to social violations	Percentage of investee countries subject to social violations (relative number divided by all investee countries) as referred to in international treaties and conventions, United Nations principles and, where applicable national law	Dec 2023	0.00%	The violation (0.0002%) relates to the Sub-Fund's exposure to Ukraine. We note that our data provider's classification is based on actions by the previous (pro-Russian) political regime. In our view, while these considerations may be relevant in terms of, e.g., ongoing sanctions against individuals involved in that regime, they are not relevant to an assessment of the country's current political regime. The Investment Manager is not looking to exit the position on the basis of these social violations.

*Benchmark JP Morgan EMBI Global Diversified Index.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	69.7

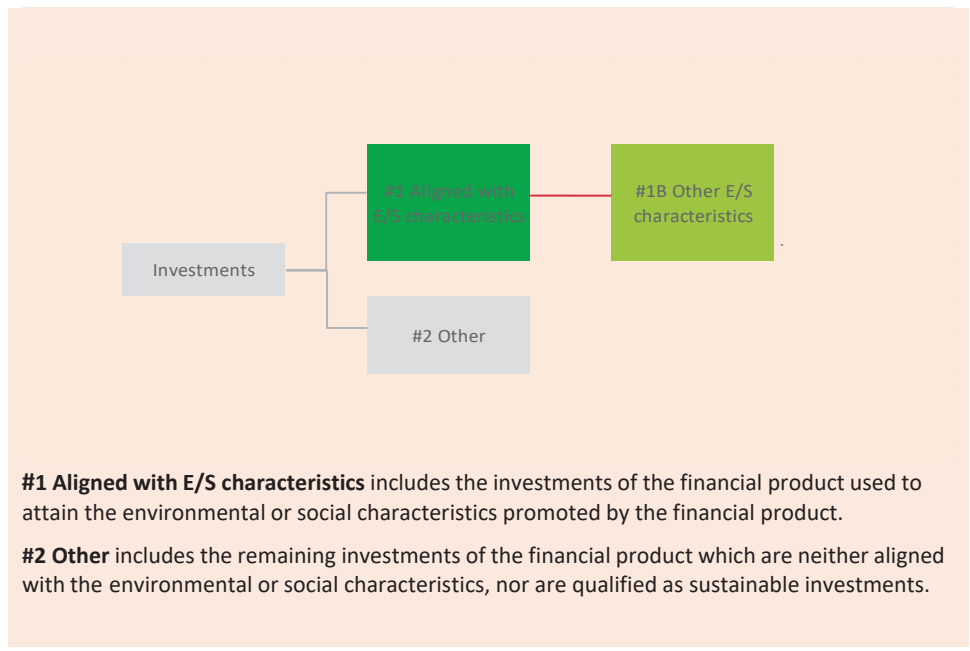

Asset allocation describes the share of investments in specific assets.

#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	69.7
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	30.3

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **In which economic sectors were the investments made?**
Corporate;Quasi;Sovereign.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**
 - Yes:
 - in fossil gas in nuclear energy
 - No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Sovereign exposure accounted for 93.7% of the total Sub-Fund value.

The Taxonomy regulation does not currently provide an appropriate methodology to calculate the extent to which central governments, central banks and supranational issuers (‘sovereign exposures’) are exposed to environmentally sustainable economic activities.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.0
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been no change in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments.

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply intergrated into the investment process as per the Investment Manager’s sustainability framework. Additionally, the Investment Manager regularly engages with issuer companies of bonds held in the Sub-Fund. As an investor in sovereign assets, the Investment Manager is in a privileged position to have access to EM policymakers. This privilege comes with a responsibility to engage on ESG matters. The Investment Manager takes a holistic approach to sovereign engagement. It engages with policymakers on country trips – both virtual and in-person when possible. These trips give the Investment Manager access not just to finance ministries and central banks, but also other parts of government, including executive offices and energy ministries. The Investment Manager engages with government officials on ESG issues in one-to-one meetings, with bond roadshows and IMF bi-annual meetings providing additional forums for engagement. It also works with NGO partners and industry bodies to provide a collective voice

and shape the debate. While the Investment Manager engages broadly on matters that span the entire ESG spectrum, it mainly focuses its strategic engagements on two areas where it has strong expertise: climate and nature risks – where it applies its Climate and Nature Sovereign Index and Net Zero Sovereign Index work – and budget transparency.

The nature of engagements with sovereign and corporate bond issuers is typically continual and there is rarely a clearly defined beginning and end date, therefore, the Investment Manager does not measure (and record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Yes

 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: _____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _____%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics: and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
--	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain borrowers. Issuers in the Sub-Fund are scored following the proprietary sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question, related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In addition, the Investment Manager can confirm that there have been no investments into sovereign issuers with an ESG trend score of -3, as measured using the Investment Manager's proprietary sustainability framework. During the reporting period, The Sub-Fund

has divested from Russian Sovereign bonds over the year and has 0% exposure to Sovereign borrowers with a -3 ESG trend score. Thus, the characteristics promoted by this financial product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
Proportion of investments invested in countries that have an ESG trend score that is greater than the lower of 0 or the benchmark* ESG trend score	%	Dec 23	66.9%	The sub-fund has exposure to 66.9% of investments that have an ESG trend score that is greater than the lower of a 0 or the benchmark ESG trend score

We note that our data provider's classification is based on actions by the previous (pro-Russian) political regime. In our view, while these considerations may be relevant in terms of, e.g., ongoing sanctions against individuals involved in that regime, they are not relevant to an assessment of the country's current political regime. The Investment Manager is not looking to exit the position on the basis of these social violations.

* Sub-Fund exposure to sovereign/quasi issuers = 94.6%

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

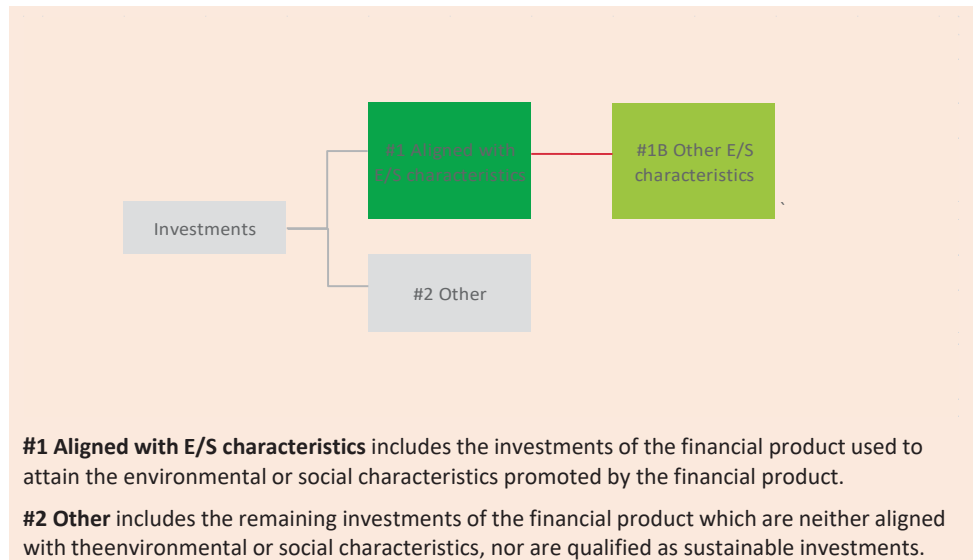

Asset allocation describes the share of investments in specific assets.

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	66.9
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	66.9
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	33.1

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● *In which economic sectors were the investments made?*

Corporate; Quasi; Sovereign.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● *Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?*

Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

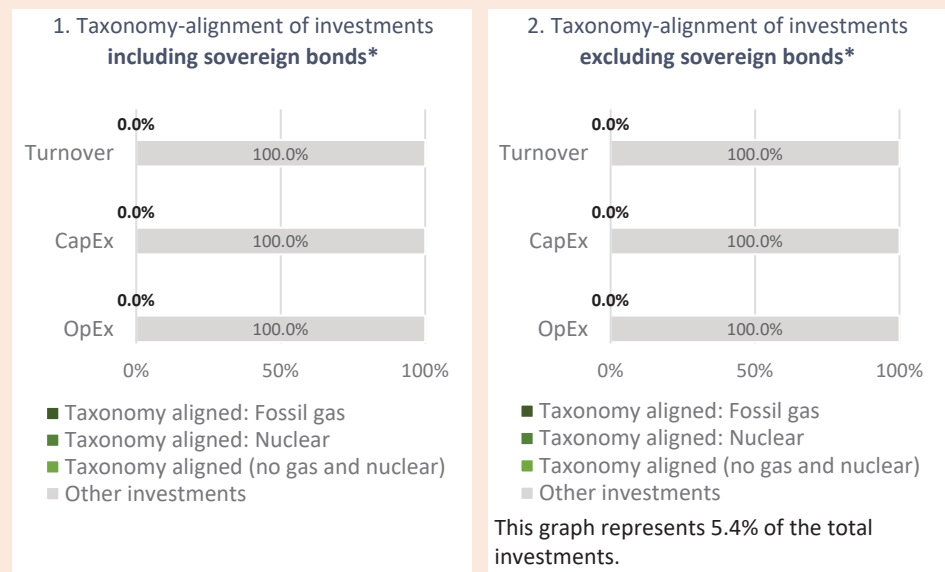

in fossil gas in nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the “greenness” of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Sovereign exposure accounted for 94.6% of the total Sub-Fund value.

The Taxonomy regulation does not currently provide an appropriate methodology to calculate the extent to which central governments, central banks and supranational issuers (‘sovereign exposures’) are exposed to environmentally sustainable economic activities.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.0
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0

Enabling activities	0.0
---------------------	-----

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been no change in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments, as described in the Sub-Fund’s investment policy, that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- Cash held for liquidity purposes as an ancillary asset, deposits and money market instruments; and

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply intergrated into the investment process as per the Investment Manager’s sustainability framework. Additionally, the Investment Manager regularly engages with issuer companies of bonds held in the Sub-Fund. As an investor in sovereign assets, the Investment Manager is in a privileged position to have access to EM policymakers. This privilege comes with a responsibility to engage on ESG matters. The Investment Manager takes a holistic approach to sovereign engagement. It engages with policymakers on country trips – both virtual and in-person when possible. These trips give the Investment Manager access not just to finance ministries and central banks, but also other parts of government, including executive offices and energy ministries. The Investment Manager engages with government officials on ESG issues in one-to-

one meetings, with bond roadshows and IMF bi-annual meetings providing additional forums for engagement. It also works with NGO partners and industry bodies to provide a collective voice and shape the debate. While the Investment Manager engages broadly on matters that span the entire ESG spectrum, it mainly focuses its strategic engagements on two areas where it has strong expertise: climate and nature risks – where it applies its Climate and Nature Sovereign Index and Net Zero Sovereign Index work – and budget transparency.

The nature of engagements with sovereign and corporate bond issuers is typically continual and there is rarely a clearly defined beginning and end date, therefore, the Investment Manager does not measure (and record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

Reference benchmarks
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Local Currency Dynamic Debt Fund

Legal entity identifier: 213800WJ8RS9FV2T2337

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : %	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics : and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager’s proprietary sustainability framework and by excluding investments in certain borrowers.

Issuers in the Sub-Fund are scored following the proprietary sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question, related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In

In addition, the Investment Manager can confirm that there have been no investments into sovereign issuers with an ESG trend score of -3, as measured using the Investment Manager's proprietary sustainability framework. During the reporting period, The Sub Fund has divested from Russian Sovereign bonds over the year and has 0% exposure to Sovereign borrowers with a -3 ESG trend score.. Thus, the characteristics promoted by this financial product have been met

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
Proportion of investments invested in countries that have an ESG trend score that is greater than the lower of 0 or the benchmark* ESG trend score	%	Dec 23	67.8%	The Sub-Fund has exposure to 67.8% of investments that have an ESG trend score that is greater than the lower of a 0 or the benchmark* ESG trend score.
Proportion of investments in borrowers rated -3 as per the Investment Manager's ESG trend scores.	%	Dec 23	0.0%	The Sub-Fund has divested from Russian Sovereign bonds over the year and has 0% exposure to Sovereign borrowers with a -3 ESG trend score.

*Benchmark in this context refers to the the Sub-Fund's performance comparison benchmark: JP Morgan GBI-EM Global Diversified Index.

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

The Sub Funds ESG metrics have improved year on year, and have complied with the indicators set above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year	Value	Commentary
GHG intensity	GHG intensity of investee countries tCO2e/million GDP	Dec 2023	249.8* vs.283.2	Within its emerging market sovereign debt investments, the Investment Manager focuses on weighted average carbon intensity based on the Taskforce for Climate-Related Disclosures (TCFD) recommendations. This metric is defined as tonnes of CO2 emissions per US\$m of GDP (purchasing power parity) and it incorporates all CO2 emissions in the country of question. This is called ‘territorial emissions’ and is in line with UNFCCC emission inventory submissions. It is, therefore, closer in spirit to Scope 3, than direct Scope 1+2 emissions of the government. This calculation is done directly by The Emissions Database for Global Atmospheric Research (EDGAR) and the data covers all markets. While some countries report data, most global datasets use estimated data – hence there can be differences between datasets. There are also valid questions around production versus consumption approaches (consumption approaches include the CO2 emissions embedded in global trade). The Investment Manager focuses on data that uses the production approach as it believes this is more comprehensive and more accurately measured, albeit a regressive measure – making emerging market emissions appear worse given the globalisation of

				supply chains. The Sub-Fund today has a neutral intensity versus its representative index.
Investee countries subject to social violations	Percentage of investee countries subject to social violations (relative number divided by all investee countries) as referred to in international treaties and conventions, United Nations principles and, where applicable national law	Dec 2023	0.0%	The Sub-Fund has no exposure to social violations.

* Sub-Fund exposure to sovereign/quasi issuers = 95.0%

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	66.9
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	66.9
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	33.1

In which economic sectors were the investments made?

Corporate; Quasi; Sovereign.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

Yes:

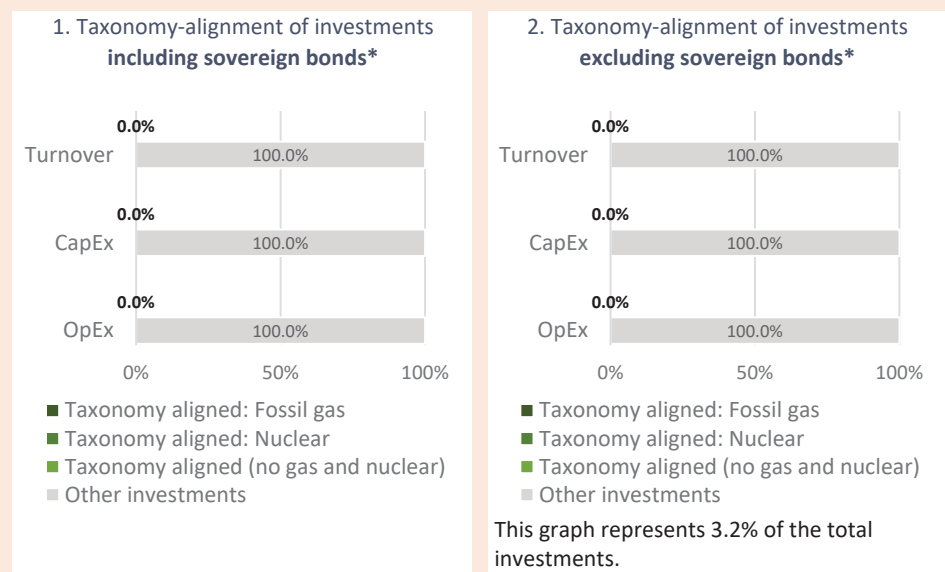

in fossil gas in nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

Sovereign exposure accounted for 96.8% of the total Sub-Fund value.

The Taxonomy regulation does not currently provide an appropriate methodology to calculate the extent to which central governments, central banks and supranational issuers (‘sovereign exposures’) are exposed to environmentally sustainable economic activities.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.0
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been no change in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments, as described in the Sub-Fund’s investment policy, that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- Cash held for liquidity purposes as an ancillary asset, deposits and money market instruments; and

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply intergated into the investment process as per the Investment Manager's sustainability framework. Additionally, the Investment Manager regularly engages with issuer companies of bonds held in the Sub-Fund. As an investor in sovereign assets, the Investment Manager is in a privileged position to have access to EM policymakers. This privilege comes with a responsibility to engage on ESG matters. The Investment Manager takes a holistic approach to sovereign engagement. It engages with policymakers on country trips – both virtual and in-person when possible. These trips give the Investment Manager access not just to finance ministries and central banks, but also other parts of government, including executive offices and energy ministries. The Investment Manager engages with government officials on ESG issues in one-to-one meetings, with bond roadshows and IMF bi-annual meetings providing additional forums for engagement. It also works with NGO partners and industry bodies to provide a collective voice and shape the debate. While the Investment Manager engages broadly on matters that span the entire ESG spectrum, it mainly focuses its strategic engagements on two areas where it has strong expertise: climate and nature risks – where it applies its Climate and Nature Sovereign Index and Net Zero Sovereign Index work – and budget transparency.

The nature of engagements with sovereign and corporate bond issuers is typically continual and there is rarely a clearly defined beginning and end date, therefore, the Investment Manager does not measure (and record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Blended Debt Fund

Legal entity identifier: 213800P9L93YEXUHBG67

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : %	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics : and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
--	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain borrowers.

Issuers in the portfolio are scored following the proprietary sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question, related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In

In addition, the Investment Manager can confirm that there have been no investments into sovereign issuers with an ESG trend score of -3. During the reporting period, The Sub-Fund has divested from Russian Sovereign bonds over the year and has 0% exposure to Sovereign borrowers with a -3 ESG trend score. In addition, the Investment Manager can confirm that there are no investments in excluded business areas or activities prohibited for corporate bond issuers. Thus, the characteristics promoted by this financial product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Emerging Markets Corporate Borrowers

Indicator	Metric	Year	Value	Commentary
Proportion of investments in Emerging Markets Corporate Borrowers with proprietary sector specific ESG scores between 51-100	%	2023	80%	There is a substantial skew towards issuers scoring above 50. The distribution of issuers with favourable ESG scores is diversified by region, country and sector.
Proportion of investments in Emerging Markets Corporate Borrowers in the business groups or activities (in some cases subject to specific revenue thresholds) prohibited under the Sub-Fund's exclusions criteria	%	2023	0.0%	Given the Sub-Fund has zero exposure to prohibited issuance, the Investment Manager has met the requirements of this sustainability indicator. This is constantly assessed through a deep understanding of the issuers owned in the Sub-Fund.

Emerging Markets Sovereign Borrowers

Indicator	Metric	Year	Value	Commentary
Proportion of investments invested in countries that have an ESG trend score that is greater than the lower of 0 or the benchmark* ESG trend score	%	2023	66.8%	The sub-fund has exposure to 66.8% of investments that have an ESG trend score that is greater than the lower of a 0 or the benchmark ESG trend score
Proportion of investments in Emerging	%	2023	0.0%	The Sub-Fund has divested from Russian Sovereign bonds over the year and has

Markets Sovereign Borrowers rated -3 as per the Investment Manager's ESG trend scores				0% exposure to Sovereign borrower's with a -3 ESG trend score.
---	--	--	--	--

*Benchmark in this context refers to the sovereign component of the Sub-Fund's performance comparison benchmark: JPMorgan GBI-EM Global Diversified and the JPMorgan EMBI Global Diversified.

● ***...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]***

The Sub-Fund's ESG metrics have improved year on year, and have complied with the indicators set above.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund's investments:

Emerging Markets Corporate Borrowers

PAI Indicator	Metric	Year	Value	Commentary
GHG Emissions	Scope 1, 2 & 3 GHG Financed Emissions Contribution (EVIC) tCO ₂ e	2023	16,528.6 vs. 25,113.2	The level of financed emissions in the Sub-Fund is slightly lower than that of the corporate comparison index*. This is a function of a lower contribution from the utilities sector, which accounts for the largest portion of the benchmark's financed emissions. More generally, however, the Sub-Fund's corporate bond exposure is largely in heavier emitting sectors (such as oil & gas, metals & mining and utilities). But within those sectors, the Sub-Fund is skewed towards issuers with a lower emissions intensity.
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO ₂ e/m € invested	2023	768.4 vs. 1,018	The Sub-Fund's carbon footprint is slightly higher than that of the corporate comparison index, when both measures are grossed up. This is predominantly a function of the Sub-Fund's corporate bond exposure largely being in heavier emitting sectors (such as oil & gas, metals & mining and utilities). But within those sectors, the Sub-Fund is skewed towards issuers with a lower carbon footprint.
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO ₂ e/m € revenue	2023	1,486.5 vs 1,950.23	The Sub-Fund's Greenhouse Gas intensity is higher than that of the corporate comparison index when both indices are grossed up. This is predominantly a function of the Sub-Fund's corporate bond exposure largely being in heavier emitting sectors (such as oil & gas, metals & mining and utilities). But within those sectors, the Sub-Fund is skewed towards issuers with a lower GHG intensity.

*The corporate portion of the index is represented by the JP Morgan CEMBI Broad Diversified.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Emerging Markets Sovereign Borrowers

PAI Indicator	Metric	Year	Value	Commentary
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee countries	2023	241.1 vs. 212.8	<p>Within its emerging market sovereign debt investments, the Investment Manager focuses on weighted average carbon intensity based on the Taskforce for Climate-Related Disclosures (TCFD) recommendations. This metric is defined as tonnes of CO2 emissions per US\$m of GDP (purchasing power parity) and it incorporates all CO2 emissions in the country of question. This is called ‘territorial emissions’ and is in line with UNFCCC emission inventory submissions. It is, therefore, closer in spirit to Scope 3, than direct Scope 1+2 emissions of the government. This calculation is done directly by The Emissions Database for Global Atmospheric Research (EDGAR) and the data covers all markets. While some countries report data, most global datasets use estimated data – hence there can be differences between datasets. There are also valid questions around production versus consumption approaches (consumption approaches include the CO2 emissions embedded in global trade). The Investment Manager focuses on data that uses the production approach as it believes this is more comprehensive and more accurately measured, albeit a regressive measure – making emerging market emissions appear worse given the globalisation of supply chains. The Sub-Fund today has a marginally higher intensity than that of the representative index.</p>
Investee countries subject to social violations	Percentage of investee countries subject to social violations (relative number divided by all investee countries) as referred to in international treaties and conventions, United Nations principles and, where applicable national law	2023	0.01%	<p>The violation (0.01%) relates to the Sub-Fund’s exposure to Ukraine. We note that our data provider’s classification is based on actions by the previous (pro-Russian) political regime. In our view, while these considerations may be relevant in terms of, e.g., ongoing sanctions against individuals involved in that regime, they are not relevant to an assessment of the country’s current political regime. The Investment Manager is not looking to exit the position on the basis of these social violations.</p>

*Sovereign/quasi portion of the portfolio represented 87.4%

In addition, the Sub-Fund has not invested in companies in relation to the following principal adverse impacts:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Overall Asset Allocation	% of Total Portfolio Value
#1 Investments aligned with sub-fund's promoted environmental or social characteristics	66.8
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	66.8

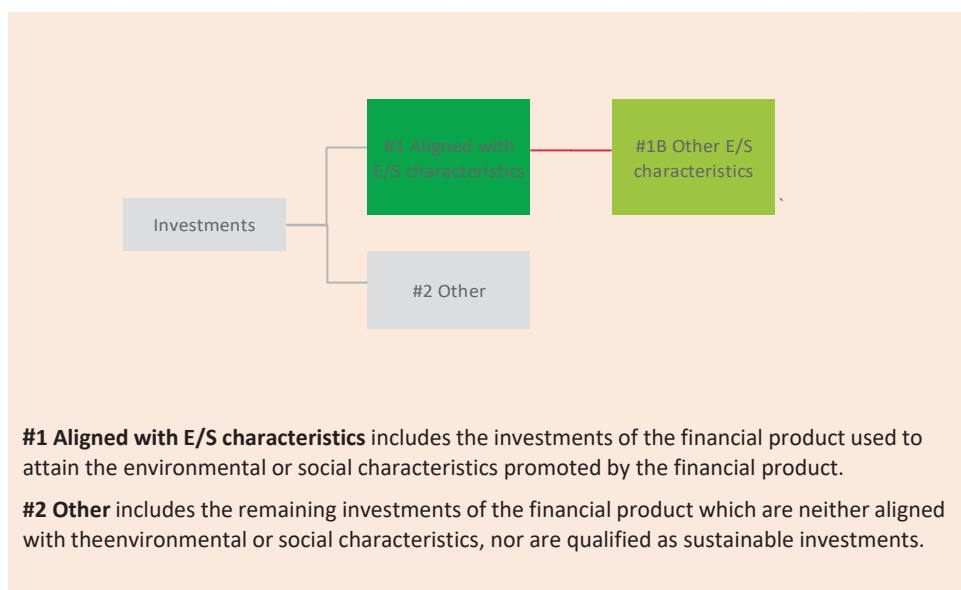

Asset allocation describes the share of investments in specific assets.

#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	33.2
--	------

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● ***In which economic sectors were the investments made?***

Corporate; Quasi; Sovereign.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?***

- Yes:
- in fossil gas in nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Sovereign exposure accounted for 87.4% of the total portfolio value.

The Taxonomy regulation does not currently provide an appropriate methodology to calculate the extent to which central governments, central banks and supranational issuers (‘sovereign exposures’) are exposed to environmentally sustainable economic activities.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Portfolio Value
Climate change mitigation	0.0
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Portfolio Value
Transitional activities	0.0
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been no change in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to investing in any sustainable investments within the meaning of Article 2(17) SFDR.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments.

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply intergated into the investment process as per the Investment Manager’s sustainability framework. Additionally, the Investment Manager regularly engages with issuer companies of bonds held in the Sub-Fund. As an investor in sovereign assets, the Investment Manager is in a privileged position to have access to EM policymakers. This privilege comes with a responsibility to engage on ESG matters. The Investment Manager takes a holistic approach to sovereign engagement. It engages with policymakers on country trips – both virtual and in-person when possible. These trips give the Investment Manager access not just to finance ministries and central banks, but also other parts of government, including executive offices and energy ministries. The Investment Manager engages with government officials on ESG issues in one-to-one meetings, with bond roadshows and IMF bi-annual meetings providing additional forums for

engagement. It also works with NGO partners and industry bodies to provide a collective voice and shape the debate. While the Investment Manager engages broadly on matters that span the entire ESG spectrum, it mainly focuses its strategic engagements on two areas where it has strong expertise: climate and nature risks – where it applies its Climate and Nature Sovereign Index and Net Zero Sovereign Index work – and budget transparency.

With regards to corporate debt, the Investment Manager’s approach to engagement with issuers includes requesting information to understand company policies and activities. The Investment Manager shares insights and concerns with management to help them understand why it will not invest/disinvest if the corporate issuer has material weaknesses that it is not addressing. The point of the Investment Manager’s engagement is to improve a company’s overall credit quality and structural resilience which in turn will directly determine the discount factor or cost of debt. The Investment Manager also works with market participants and global organisations to progress ESG adoption across the companies it invests in and improve visibility of ESG across the financial industry, working with bankers, index providers, charities, and specialist agencies. The Investment Manager encourages investee companies to sign up to the Science Based Targets Initiative (SBTi), Carbon Disclosure Project (CDP) and, most importantly, to adopt Paris-alignment targets and good governance practices.

The nature of engagements with sovereign and corporate bond issuers is typically continual and there is rarely a clearly defined beginning and end date, therefore, the Investment Manager does not measure (and record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Corporate Debt Fund

Legal entity identifier: 213800UKABOFL2FFQV69

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics : and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : % <ul style="list-style-type: none"> <input type="checkbox"/> with a social objective 	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager’s proprietary sustainability framework and by excluding investments in certain borrowers.

Issuers in the Sub-Fund are scored following the sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question, related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In addition the

Investment Manager can confirm that there are no investments into excluded issuers. Thus, the characteristics promoted by this financial product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
Proportion of investments in borrowers with proprietary bottom-up ESG scores between 51-100	%	Dec 23	86.4%	The proportion is well above the required 50% threshold, highlighting the tilt towards issuers with a favourable bottom-up sustainability profile. The distribution of issuers with favourable ESG scores is diversified by region, country, and sector. As ESG factors are typically structural in nature, this aligns with the Investment Manager’s philosophy of looking to identify businesses with a strong fundamental underpinning relative to their perceived credit quality. While this total percentage number is likely to fluctuate through time, the Investment Manager expects it to remain above the threshold.
Proportion of companies invested in the business groups or activities (in some cases subject to specific revenue thresholds) prohibited under the Sub-Fund's exclusions criteria.	%	Dec 23	0%	Given the Sub-Fund has zero exposure to prohibited issuers, the Investment Manager has met the requirements of this sustainability indicator. This is assessed through a deep understanding of the issuers owned in the Sub-Fund.

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

The Sub Funds ESG metrics have remained within the expected outcome range and thus have complied with the indicators set above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year	Value	Commentary
GHG Emissions	Scope 1, 2 & 3 GHG Financed Emissions Contribution (EVIC) tCO2e	2023	2,061,061 vs. 1,572,763	The level of financed emissions in the Sub-Fund is higher than the comparison index*. This is a function overweight in heavier emitting sectors (such as oil & gas and metals & mining). The emissions are concentrated in a small proportion of issuers; the top 10 issuers by financed emissions account for <20% of the Sub-Fund's NAV but >60% of its financed emissions.
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO2e/m € invested	2023	1,336 vs. 1,018	The Sub-Fund's carbon footprint is slightly higher than the comparison index*. This is predominantly a function of the Sub-Fund being overweight in heavier emitting

				sectors (such as oil & gas and metals & mining). Within those sectors, however, the Sub-Fund is skewed towards issuers with a lower carbon footprint. The carbon footprint is concentrated in a small proportion of issuers; the top 10 issuers by carbon footprint contribution account for <20% of the Sub-Fund's NAV but >60% of its carbon footprint.
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO2e/m € revenue	2023	2,374 vs. 2,005	The Sub-Fund's Greenhouse Gas (GHG) intensity is slightly lower than that of the comparison index.* Although the Sub-Fund has a relatively higher exposure to heavier emitting sectors (such as oil & gas and metals & mining), it is skewed towards issuers with a lower GHG intensity within those sectors. Furthermore, the Sub-Fund's emissions intensity is concentrated in a small proportion of issuers: the top 10 issuers by GHG intensity contribution account for <20% of the Sub-Fund's NAV but >60% of its GHG intensity.

*Comparator Index = JP Morgan CEMBI Broad Diversified

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principal adverse impacts:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

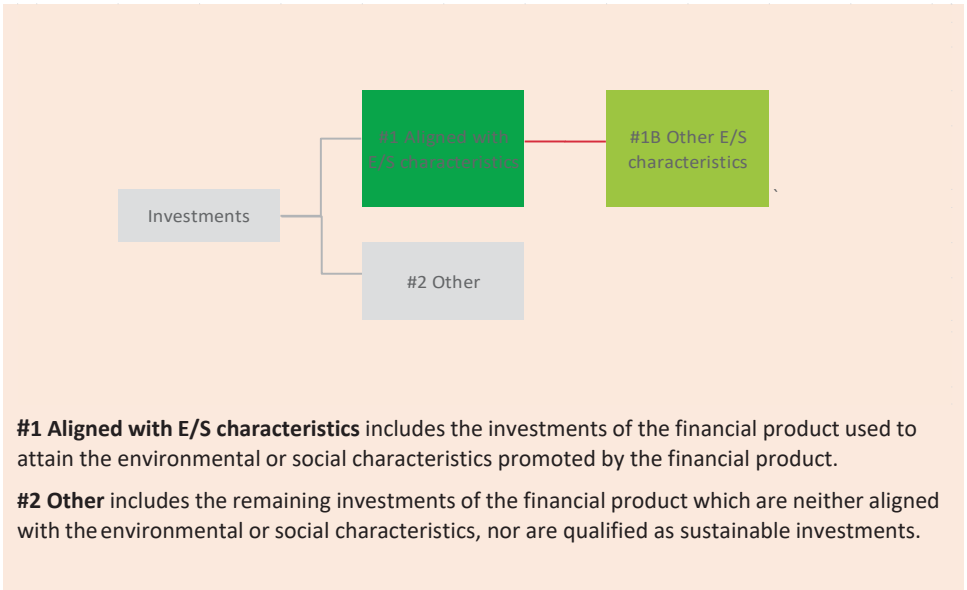

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the asset allocation?**

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund’s promoted environmental or social characteristics	86.0
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	86.0
#2 Other, i.e., investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	14.0

● **In which economic sectors were the investments made?**

Consumer;Diversified;Financial;Industrial;Infrastructure;Metals & Mining;Oil & Gas;Pulp & Paper;Quasi-sov;Real Estate;Sovereign;Tmt;Transport;Utilities.

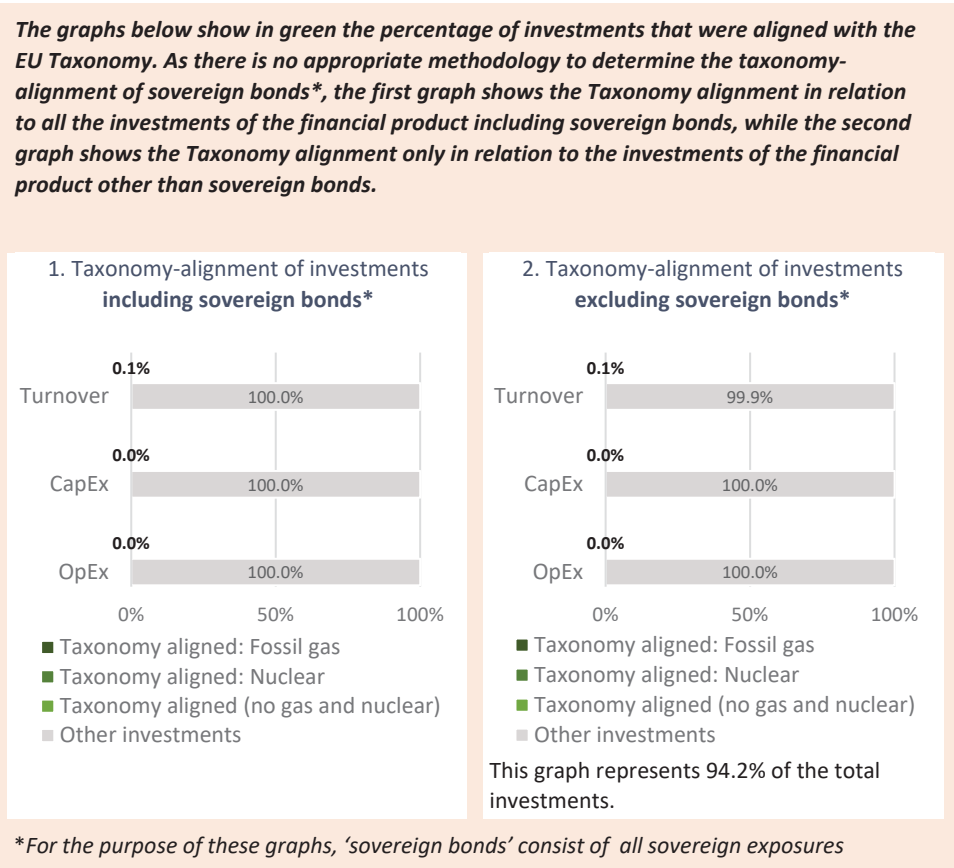

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

- Yes:
- in fossil gas in nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.1
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.1
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been no significant change in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments.

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply integrated as per the Investment Manager's sustainability framework. With regards to corporates, the Investment Manager's approach to engagement with issuers includes requesting information to understand company policies and activities. The Investment Manager shares insights and concerns with management to help them understand why it will not invest/disinvest if the corporate issuer has material weaknesses that it is not addressing. The point of the Investment Manager's engagement is to improve a company's overall credit quality and structural resilience which in turn will directly determine the discount factor or cost of debt. The Investment Manager also works with market participants and global organisations to progress ESG adoption across the companies it invests in and improve visibility of ESG across the financial industry, working with bankers, index providers, charities, and specialist agencies. The Investment Manager encourages investee companies to sign up to the Science Based Targets Initiative (SBTi), Carbon Disclosure Project (CDP) and, most importantly to adopt Paris-alignment targets and good governance practices. The nature of engagements with sovereign and corporate bond issuers are typically continual and there is rarely a clearly defined beginning and end date, therefore, the Investment Manager does not measure (and record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system and this is then summarised for client communication.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Investment Grade Corporate Debt Fund

Legal entity identifier: 2138004JBACWLKEABL54

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics : and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : %	<input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager’s proprietary sustainability framework and by excluding investments in certain borrowers.

Issuers in the Sub-Fund are scored following the sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question, related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In addition, the

Investment Manager can confirm that there are no investments into excluded issuers. Thus, the characteristics promoted by this financial product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
Proportion of investments in borrowers with proprietary bottom-up ESG scores between 51-100	%	Dec 23	87.0%	The proportion is well above the required 50% threshold, highlighting the tilt towards issuers with a favourable bottom-up sustainability profile. The distribution of issuers with favourable ESG scores is diversified by region, country, and sector. As ESG factors are typically structural in nature, this aligns with the Investment Manager’s philosophy of looking to identify businesses with a strong fundamental underpinning relative to their perceived credit quality. While this total percentage number is likely to fluctuate through time, the Investment Manager expects it to remain above the threshold.
Proportion of companies invested in the business groups or activities (in some cases subject to specific revenue thresholds) prohibited under the Sub-Fund's exclusions criteria.	%	Dec 23	0x%	Given the Sub-Fund has zero exposure to prohibited issuers, the Investment Manager has met the requirements of this sustainability indicator. This is assessed through a deep understanding of the issuers owned in the Sub-Fund.

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

The Sub-Fund’s ESG metrics have improved remained within the expected outcome range year on year, and thus have complied with the indicators set above.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI Indicator	Metric	Year	Value	Commentary
GHG Emissions	Scope 1, 2 & 3 GHG Financed Emissions Contribution (EVIC) tCO2e	2023	329,766.8 1 vs. 327,239.9 0	The level of financed emissions in the Sub-Fund is broadly in line with that of the comparison index*. The emissions are concentrated in a small proportion of issuers in higher emitting sectors (such as oil & gas, metals & mining, and utilities), with the top 10 issuers by financed emissions accounting for <15%% of the Sub-Fund's NAV but >60%% of its financed emissions.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO2e/m € invested	2023	845.0 vs. 837.1	The Sub-Fund's carbon footprint is broadly in line with that of the comparison index*. The carbon footprint is concentrated in a small proportion of issuers in higher emitting sectors (such as oil & gas, metals & mining, and utilities). Within those sectors, however, the Sub-Fund is skewed towards issuers with a lower carbon footprint. The carbon footprint is concentrated in a small proportion of issuers; the top 10 issuers by carbon footprint contribution account for <15% of the Sub-Fund's NAV but >70% of its carbon footprint.
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO2e/m € revenue	2023	1,659.8 vs 1,838.3	The Sub-Fund's Greenhouse Gas (GHG) intensity is slightly lower than that of the comparison index.* Although the Sub-Fund has a relatively higher exposure to heavier emitting sectors (such as oil & gas, metals & mining, and utilities), it is skewed towards issuers with a lower GHG intensity within those sectors. Furthermore, the Sub-Fund's emissions intensity is concentrated in a small proportion of issuers: the top 10 issuers by GHG intensity contribution account for <20% of the Sub-Fund's NAV but >60% of its GHG intensity.

*Comparator Index = JP Morgan CEMBI Broad Diversified Investment Grade.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principal adverse impacts:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?***

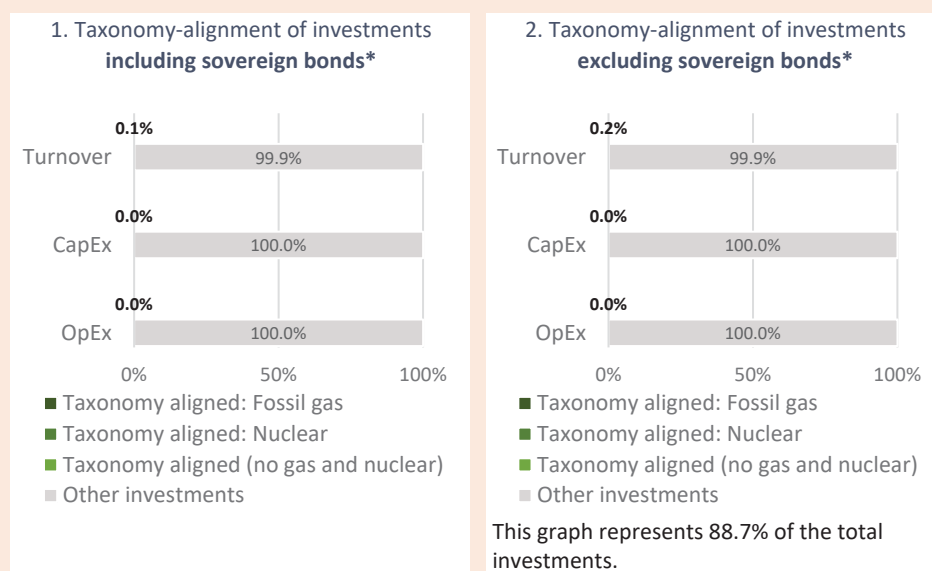

- Yes:
- in fossil gas in nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Sovereign debt exposure accounted for 11.3% of the total Sub-Fund value.

The Taxonomy regulation does not currently provide an appropriate methodology to calculate the extent to which central governments, central banks and supranational issuers (‘sovereign exposure’) are exposed to environmentally sustainable economic activities.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.1
Climate change adaptation	0.0

The aforementioned investment/s have not been subject to an assurance by an auditor or a third party.

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been no significant change in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments.
- shares or units in other funds and exchange traded funds in which the Investment Manager does not have direct control of the underlying investments.

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements, the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply integrated into the investment process as per the Investment Manager’s sustainability framework. With regards to corporate bond issuers, the Investment Manager’s approach to engagement includes requesting information to understand company policies and activities. The Investment Manager shares insights and concerns with management to help them understand why it will not invest/disinvest if the corporate issuer has material weaknesses that it is not addressing. The point of the Investment Manager’s engagement is to improve a company’s overall credit quality and structural resilience which in turn will directly determine the discount

factor or cost of debt. The Investment Manager also works with market participants and global organisations to progress ESG adoption across the companies it invests in and improve visibility of ESG across the financial industry, working with bankers, index providers, charities, and specialist agencies. The Investment Manager encourages investee companies to sign up to the Science Based Targets initiative (SBTi), Carbon Disclosure Project (CDP) and, most importantly to adopt Paris-alignment targets and good governance practices. The nature of engagements with sovereign and corporate bond issuers are typically continual and there is rarely a clearly defined beginning and end date, therefore, the Investment Manager does not measure (and therefore record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Sustainable Blended Debt Fund

Legal entity identifier: 213800XOLR7T4UJV7379

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes **No**

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics: and while it did not have as its objective a sustainable investment, it had a proportion of 43.6% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective</p>
<p><input type="checkbox"/> It made sustainable investments with a social objective: %</p>	<p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in borrowers that meet the standards of the Investment Manager’s proprietary sustainability framework and by excluding investments in certain borrowers.

The Sub-Fund will limit making investments that are not 'sustainable investments' from borrowers with an ESG trend score below 0 to a maximum of 10% and not invest in investments that are not 'sustainable investments' from borrowers with an ESG trend score below -1.

Issuers in the portfolio are scored according to the proprietary sustainability framework for the Sub-Fund, as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question, related to the Sub-Fund, stating:"what investment strategy does this financial product follow". In addition, the Investment Manager can confirm it has made no investment in issuers with an ESG trend score below -1. Thus the characteristics promoted by this financial product have been met.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Metric	Year	Value	Commentary
The extent of the positive tilt* of the Sub-Fund relative to its benchmark**	%	2023	+51%	<p>The overall tilt is positive. While the measurement window of a rolling five-year period means the overall tilt could fluctuate over time, in aggregate, the Investment Manager expects the tilt to remain materially positive, given the sustainable-oriented nature of the Sub-Fund.</p> <p>Only sovereign and quasi-sovereign bond issuers are scored in the Sub-Fund. The majority of these issuers have a positive score, with a very small proportion having negative scores. The benchmark scores are more balanced between positive and negative, thus the overall positive tilt predominantly comes from the Sub-Fund's relatively low exposure to issuers with negative scores vs. the benchmark. The positive tilt represented is somewhat lower than expected and not a true reflection of the portfolios positive ESG trend due to the funds investment in sustainable bonds (Green, Social, Sustainable, Supranational) in countries with negative scores (c8.5%).</p>
Proportion of investments that are not 'sustainable investments' from borrowers with an ESG trend score below 0	%	2023	0.0%	The Sub-Fund is compliant with the <10% threshold given its exposure is zero.
Proportion of investments that are not 'sustainable	%	2023	0.0%	The Sub-Fund is compliant with the 0% threshold given its exposure is zero.

investments' from borrowers with an ESG trend score below -1				
--	--	--	--	--

*The extent of the positive tilt is measured by comparing the weighted average ESG trend score of the Sub-Fund to that of its benchmark. On average, over a market cycle, the aggregated active weights of positions in borrowers with positive scores will be more than the aggregated active weight of borrowers with negative scores.

** Benchmark in this context refers to the Sub-Fund's performance composite comparison benchmark: 50% JP Morgan GBI-EM Global Diversified Index + 50% JP Morgan EMBI Global Diversified Index.

● ***...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]***

The Sub Fund's ESG metrics have improved year on year, and have complied with the indicators set above.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund focuses on sustainable investments with environmental and/or social objectives. To do this, the Sub-Fund intends to make sustainable investments in bonds whose proceeds are used to finance solutions that address environmental and/or social challenges (e.g., green bonds, social bonds and sustainability-linked bonds). These challenges include climate change, social housing, education and healthcare.

Sustainable investments may also include investments in debt instruments issued by Development Finance Institutions, if the Investment Manager deems these to be sustainable investments.

The Sub-Fund commits to allocating at least 15% of its assets in investments with environmental objectives, social objectives, or a combination of both environmental and social objectives. In essence, that means bonds that are either green bonds, social bonds, sustainable bonds or sustainability-linked bonds, as well as bonds issued by supranationals. As at the reporting date, the Sub-Fund had a 43.6% exposure to sustainable investments, thus it has met the required objective.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the in-depth fundamental analysis on a borrower, the two mandatory principal adverse impact (PAI) indicators have been taken into account when assessing if significant harm is caused by the Sub-Fund's sustainable investments.

The Investment Manager has used quantitative data, where available, and applied a qualitative assessment – based on the Investment Manager's knowledge, experience and judgement – to the quantitative PAI data to form a conclusion which considers the context of the borrower's policies and activities.

Where material adverse impacts are identified, the Investment Manager may engage with a borrower directly in an effort to catalyse change.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and UN Guiding Principles, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights, are considered as part of the application of the Investment Manager’s sustainability framework. Third-party data from providers whose methodologies are consistent with international norms represented in numerous widely accepted global conventions complements the identification of these considerations.

In addition, the Sub-Fund did not invest in companies the Investment Manager deemed to be in violation of the UN Global Compact principles.

There have been no significant breaches or flags on these international principles and guidelines for the period in review.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year	Value	Commentary
GHG intensity	GHG intensity of investee countries tCO2e/million GDP	2023	196.6 vs. 280.0	Within its emerging market sovereign debt investments, the Investment Manager focuses on weighted average carbon intensity based on the Taskforce for Climate-Related Disclosures (TCFD) recommendations. This metric is defined as tonnes of CO2 emissions per US\$m of GDP (purchasing power parity) and it incorporates all CO2 emissions in the country of question. This is called ‘territorial emissions’ and is in line with UNFCCC emission inventory submissions. It is, therefore, closer in spirit to Scope 3, than direct Scope 1+2 emissions of the government. This calculation is done directly by The Emissions Database for Global Atmospheric

				Research (EDGAR) and the data covers all markets. While some countries report data, most global datasets use estimated data – hence there can be differences between datasets. There are also valid questions around production versus consumption approaches (consumption approaches include the CO2 emissions embedded in global trade). The Investment Manager focuses on data that uses the production approach as it believes this is more comprehensive and more accurately measured, albeit a regressive measure – making emerging market emissions appear worse given the globalisation of supply chains. The Sub-Fund today has a lower intensity than that of the representative index.
Investee countries subject to social violations	Percentage of investee countries subject to social violations (relative number divided by all investee countries) as referred to in international treaties and conventions, United Nations principles and, where applicable national law	2023	0.01%	The violation (0.01%) relates to the Sub-Fund’s exposure to Ukraine. We note that our data provider’s classification is based on actions by the previous (pro-Russian) political regime. In our view, while these considerations may be relevant in terms of, e.g., ongoing sanctions against individuals involved in that regime, they are not relevant to an assessment of the country’s current political regime. The Investment Manager is not looking to exit the position on the basis of these social violations.

*Portion of the portfolio in sovereign/quasi issuers = 91.6%

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	91.6
#1A Sustainable investments within the meaning of Article 2(17) SFDR	43.6
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	48.1
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	8.4

Sustainable Investments (#1A) Breakdown	% of Total Sub-Fund Value *	% of Sustainable Investments
Taxonomy-aligned investments, weighted by Taxonomy-aligned revenue**	0.1	0.1
Investments with an environmental objective but not aligned with the Taxonomy	13.2	30.3
Investments with a social objective	30.3	69.6

*Includes Taxonomy-aligned revenue from all securities, including those not classified as sustainable investments within the meaning of Article 2(17) SFDR.

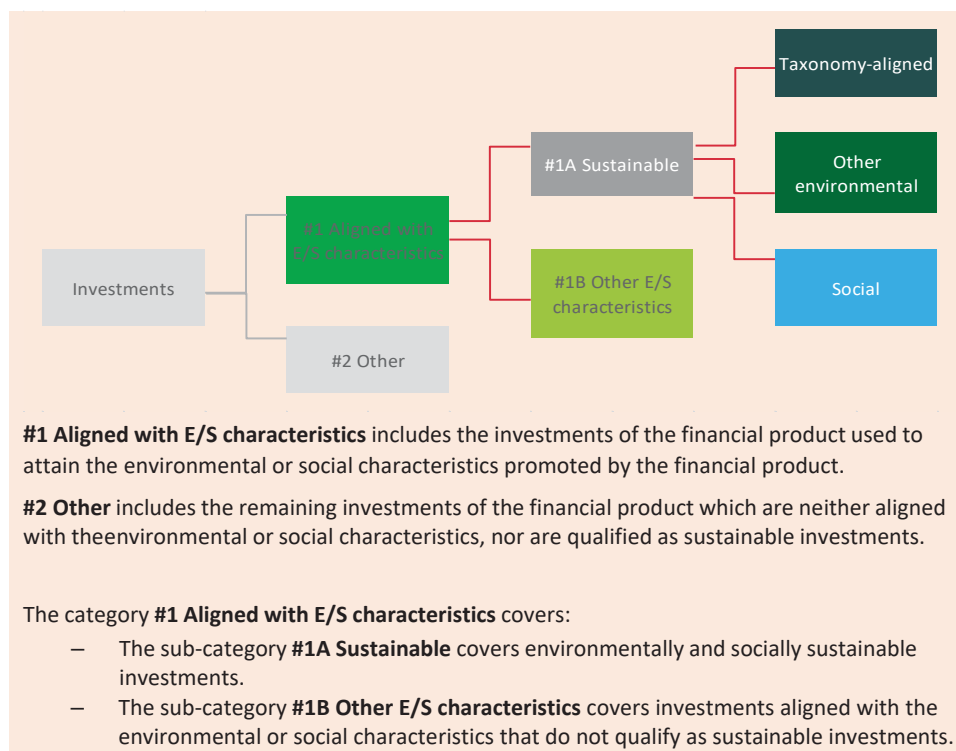

**Underlying entity revenue that can be matched to eligible economic activities as defined under the Commission Delegated Regulation (EU) 2022/1214 meeting all requirements to be deemed Taxonomy aligned.

Asset allocation
describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● ***In which economic sectors were the investments made?***

Corporate; Quasi; Sovereign.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?***

- Yes:
- in fossil gas in nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the “greenness” of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Sovereign exposures account for 91.6% of the total Sub-Fund value.

The Taxonomy regulation does not currently provide an appropriate methodology to calculate the extent to which central governments, central banks and supranational issuers (‘sovereign exposure’) are exposed to environmentally sustainable economic activities.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.1
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	% of Sustainable Investments
Transitional activities	0.1	0.1
Enabling activities	0.0	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been a slight increase in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

	% of Total Sub-Fund Value	% of Sustainable Investments
Investments with an environmental objective but not aligned with the Taxonomy (i.e. Other Environmental), weighted by non-Taxonomy aligned revenue	13.2	30.3

Currently the coverage of the EU Taxonomy Regulation does not include certain sectors and economic activities within the Sub-Fund’s investment strategy. Therefore, investments by the Sub-Fund in these sectors and activities cannot qualify as environmentally sustainable for the purposes of Article 3 of the EU Taxonomy.

What was the share of socially sustainable investments?

	% of Total Sub-Fund Value	% of Sustainable Investments
Investments with a social objective	30.3	69.6

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments.

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements, the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply integrated into the investment process as per the Investment Manager's sustainability framework. Additionally, the Investment Manager regularly engages with issuer companies of bonds held in the Sub-Fund. As an investor in sovereign assets, the Investment Manager is in a privileged position to have access to EM policymakers. This privilege comes with a responsibility to engage on ESG matters. The Investment Manager takes a holistic approach to sovereign engagement. It engages with policymakers on country trips – both virtual and in-person when possible. These trips give the Investment Manager access not just to finance ministries and central banks, but also other parts of government, including executive offices and energy ministries. The Investment Manager engages with government officials on ESG issues in one-to-one meetings, with bond roadshows and IMF bi-annual meetings providing additional forums for engagement. It also works with NGO partners and industry bodies to provide a collective voice and shape the debate. While the Investment Manager engages broadly on matters that span the entire ESG spectrum, it mainly focuses its strategic engagements on two areas where it has strong expertise: climate and nature risks – where it applies its Climate and Nature Sovereign Index and Net Zero Sovereign Index work – and budget transparency.

The nature of engagements are typically continual and there is rarely a clearly defined beginning and end date, thus the Investment Manager does not measure (and therefore record data pertaining to) success in a binary fashion. It does, however, keep a log of all engagements within its central research system, and this is then summarised for client communication.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

● ***How does the reference benchmark differ from a broad market index?***

N/A

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

● ***How did this financial product perform compared with the reference benchmark?***

N/A

● ***How did this financial product perform compared with the broad market index?***

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier: 2138004MWBSGWC7QET33

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes
 No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: %</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: %</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics: and while it did not have as its objective a sustainable investment, it had a proportion of 61.7% of sustainable investments</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	--

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in companies that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding direct investments in certain business groups or activities.

The Investment Manager uses a proprietary sustainability framework to analyse the material harmful and/or beneficial effects that a company has on society or the environment.

In accordance with the proprietary sustainability framework, the Investment Manager has appraised that all of the companies owned within the Sub-Fund are deemed to promote environmental and social characteristics. As such, the environmental and/or social characteristics promoted by this product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Direct equity investments

Indicator	Metric	Year*	Value	Commentary
Scope 1, 2 & 3 carbon footprint	in tonnes of CO2e per US\$m invested	2023	112.1	The carbon footprint and carbon intensity are both considerably lower than MSCI Emerging Markets.
Scope 1, 2 & 3 – weighted average carbon intensity	in tonnes of CO2e per US\$m or revenue	2023	385.3	
Proportion of companies in the Sub-Fund which disclose carbon emissions figures	%	2023	Scope 1 & 2 = 44.1% All Scope 3 categories = 23.5%	In general, the progress of emerging market companies in reporting carbon data is slower than developed market companies, which is reflected in this value. We will continue to engage with companies to improve Scope 1 & 2, and all Scope 3 categories' disclosure.
Percentage of direct equity holdings with credible net zero plans in place**	%	2023	20.6%	There has been growth in the adoption of SBTi approved net zero plans. The Investment Manager will continue to engage with all companies to set and deliver credible net zero plans.
Percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria	% of equity	2023	0.0%	There is no exposure to companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.

*The above carbon disclosure is based on data from companies as at the end of financial year 2021 where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

**For the purposes of this reporting, "companies with credible net zero plans" are defined as those companies with plans approved by the Science-Based Target initiative ("SBTi"). This is therefore a conservative assessment as the Sub-Fund additionally includes companies with net zero plans that are not yet SBTi approved.

See the question below on 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives' for information on:

- Carbon avoided – footprint
- Percentage of direct equity holdings contributing to financial inclusion, digital inclusion, access to education, healthcare impact and climate adaption.

● ***...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]***

Over 2023, the Sub-Fund saw an increase in the carbon emissions measures. This is largely a function of changes in asset allocation within the Sub-Fund, and in particular an increased portfolio weighting to Samsung Electronics, a material contributor to the portfolio's emissions. We continue to engage with the company about plans to reduce their emissions.

Over 2023, the Sub-Fund saw a slight reduction in the proportion of companies disclosing Scope 1 and 2, and All Scope 3 carbon emissions figures. This is a result of the sale of some companies that reported across these categories, and the new addition of some companies that do not currently report carbon emission figures. In general, the progress of emerging market companies in reporting carbon data is slower than developed market companies. We will continue to engage with companies to improve reporting of carbon data, particularly relating to all Scope 3 categories' disclosure.

Over 2023, the Sub-Fund saw an increase in the proportion of companies with credible net zero plans in place. This is a result of the increased adoption of SBTi approved net zero plans in existing companies within the Sub-Fund. In general the progress of emerging market companies in adopting Science Based Target initiative (SBTi) approved net zero plans is slower than developed market companies. We will continue to engage with all our companies to set and deliver credible net zero plans.

We have continued to hold zero percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.

As per the information provided below relating to 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives':

- the carbon avoided for the Sub-Fund increased over the period due to a combination of new companies being added that have positive carbon avoided as well as increases in the carbon avoided from existing companies
- the percentage of direct equity holdings contributing to financial inclusion increased over the period.
- Note that the percentage of direct equity holdings relating to digital inclusion, access to education, healthcare impact and climate adaption measures are a new set of sustainability indicators compared to the last period.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund focuses on sustainable investments with environmental and/or social objectives.

To do this, currently, the Sub-Fund intends to make sustainable investments in companies believed by the Investment Manager to contribute to:

- positive environmental change through sustainable decarbonisation (the process of reducing carbon dioxide emissions). The Sub-Fund currently uses 'carbon avoided' as an indicator to assess, measure and monitor the carbon impact associated with a company.
- supporting and improving socio-economic resilience and outcomes by facilitating financial inclusion (i.e., access to useful and affordable financial products and services that meet the needs of underserved individuals and businesses delivered in a responsible manner).
- digital inclusion by providing access to products and/or services that support digital take-up and infrastructure expansion.
- access to education by providing access to high quality educational and training products and/or services for underserved groups.
- healthcare impact by providing access to products and/or services that facilitate access to healthcare in underserved or underperforming markets.

- climate adaptation through products and/or services which mitigate against the impacts of climate change, driven by longer-term shifts in climate patterns and/or acute event-driven climate risks.

Direct equity investments

Indicator	Metric	Year*	Value	Commentary
Carbon avoided – footprint	in tonnes per CO2e per US\$m invested	2023	31.4	Six companies (out of 34) in the portfolio produced positive carbon avoided.
Percentage of direct equity holdings contributing to financial inclusion	% equity	2023	23.5%	Eight companies (out of 34) in the portfolio facilitate financial inclusion.
Percentage of direct equity holdings contributing to digital inclusion	% equity	2023	17.6%	Six companies (out of 34) in the portfolio facilitate digital inclusion.
Percentage of direct equity holdings contributing to access to education	% equity	2023	0.0%	There are currently no companies (out of 34) in the portfolio that facilitate access to education.
Percentage of direct equity holdings contributing to healthcare impact	% equity	2023	2.9%	One company (out of 34) in the portfolio facilitates healthcare impact.
Percentage of direct equity holdings contributing to climate adaptation	% equity	2023	0.0%	There are currently no companies (out of 34) in the portfolio that facilitate climate adaptation.

A note on 'carbon avoided'

'Carbon avoided' are the carbon emissions avoided by using a product or service that has less carbon emissions than the status quo thereby contributing to decarbonisation. The carbon avoided in aggregate at the Sub-Fund level can change due to the overall allocation to companies that generate carbon avoided, and the mix of companies within the Sub-Fund.

*The above carbon avoided disclosure is based on data from companies as at the end of financial year 2021. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager uses a proprietary sustainability framework to analyse the material harmful effects that a company has on society or the environment. The Investment Manager's sustainability framework helps to identify business groups and activities (in some cases subject to specific revenue thresholds) in which the Investment Manager will not invest, typically because after applying the sustainability framework it is evident that the harmful effects of the business group or activity outweighs the beneficial effects.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager assesses sustainable investments in relation to the 14 mandatory principal adverse impacts to determine that the investment does not cause significant harm to other sustainable investment objectives.

The investment process allows the Investment Manager to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

As part of the in-depth fundamental analysis on an individual company, the mandatory principal adverse impacts are taken into account for the Sub-Fund's intended sustainable investments.

The Investment Manager draws on quantitative data, where available, and combines this with a qualitative assessment.

Where material adverse impacts are identified, the Investment Manager may engage directly with company management and/or exercise proxy voting rights in an effort to catalyse change or promote improvement in a given metric.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and UN Guiding Principles including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are considered as part of the application of the Investment Manager's sustainability framework and assessment of material negative externalities. Based on this analysis, the Investment Manager deems whether sustainable investments are aligned with these considerations. Third party data from providers whose methodologies are consistent with international norms represented in numerous widely accepted global conventions including those mentioned above, complements the identification of these considerations.

In addition, the Sub-Fund did not invest in companies the Investment Manager deemed to be in violation of the UN Global Compact principles.

There have been no significant breaches or flags on these international principles and guidelines for the period in review.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The investment process implemented by the Investment Manager allows it to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year*	Value	Commentary
GHG Emissions	Scope 1, 2 and 3 GHG Emissions Contribution (EVIC) tCO2e	2023	4,561.5	These values have been scaled up so that corporate exposure represents the fund's total value. These carbon measures are dominated by Antofagasta, Alibaba and Samsung Electronics. Antofagasta is a Chilean company responsible for the mining of materials important for the energy transition. We are engaging with Samsung Electronic, one of the largest technology companies in emerging markets, about plans to reduce their emissions. We are engaging with Alibaba, one of the largest technology platform companies in emerging markets, about plans to reduce their emissions and the company has submitted its science-based target for validation from SBTi. Exposure to these companies are deemed not to result in material negative impacts
Carbon Footprint	Scope 1, 2 and 3 Carbon Footprint Contribution (EVIC) tCO2e/m € invested	2023	108.3	
GHG Intensity	Scope 1, 2 and 3 GHG intensity of investee companies tCO2e/m € revenue	2023	441.5	
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	2023	0.0%	There are no companies active in the fossil fuel sector in the Sub-Fund.
Board Gender Diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	2023	20.7%	Board gender diversity will continue to be an important topic for engagement, particularly within emerging markets. These results are consistent with expectations, and deemed not to result in material negative impacts.

*The above carbon disclosure is based on data from companies as at the end of financial year 2021 where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to

calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufactu	Information Technology	9.0	Taiwan
Samsung Electronics Co Ltd	Information Technology	7.4	South Korea
Tencent Holdings Ltd	Communication Services	6.7	China
Alibaba Group Holding Ltd	Consumer Discretionary	5.1	China
Bank Rakyat Indonesia Persero	Financials	3.2	Indonesia
Ping An Insurance Group Co Of	Financials	3.1	China
Meituan Dianping	Consumer Discretionary	3.1	Hong Kong
Hindustan Unilever Ltd	Consumer Staples	3.0	India
Aia Group Ltd	Financials	2.9	Hong Kong
Mercadolibre Inc	Consumer Discretionary	2.7	Argentina
Grupo Financiero Banorte Sab D	Financials	2.6	Mexico
Raia Drogasil Sa	Consumer Staples	2.4	Brazil
Delta Electronics Inc	Information Technology	2.3	Taiwan
Antofagasta Plc	Materials	2.3	Chile
Hdfc Bank Ltd	Financials	2.3	India

What was the proportion of sustainability-related investments?

What was the asset allocation?

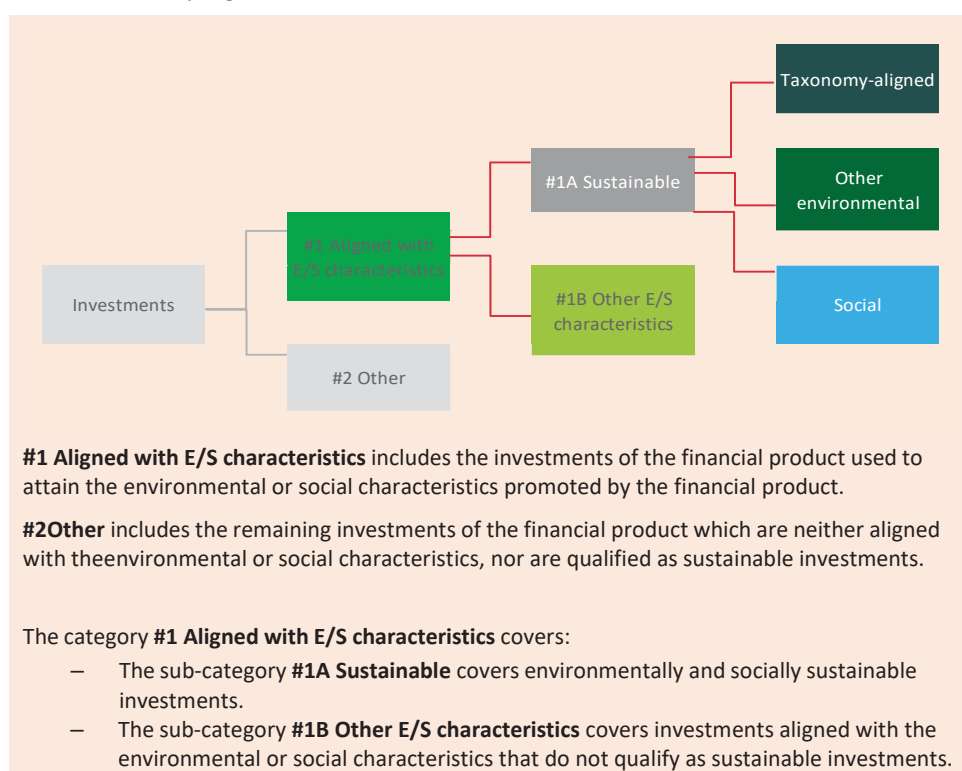

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	99.3
#1A Sustainable investments within the meaning of Article 2(17) SFDR	61.7
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	37.6
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	0.7

Asset allocation describes the share of investments in specific assets.

Sustainable Investments (#1A) Breakdown	% of Total Sub-Fund Value*	% of Sustainable Investments
Taxonomy-aligned investments, weighted by Taxonomy-aligned revenue**	1.2	2.0
Investments with an environmental objective but not aligned with the Taxonomy	18.6	30.9
Investments with a social objective	41.9	67.9

*Includes Taxonomy-aligned revenue from all securities, including those not classified as sustainable investments within the meaning of Article 2(17) SFDR.

**Underlying entity revenue that can be matched to eligible economic activities as defined under the Commission Delegated Regulation (EU) 2022/1214 meeting all requirements to be deemed Taxonomy aligned.

● ***In which economic sectors were the investments made?***

Communication Services; Consumer Discretionary; Consumer Staples; Financials; Health Care; Industrials; Information Technology; Materials.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

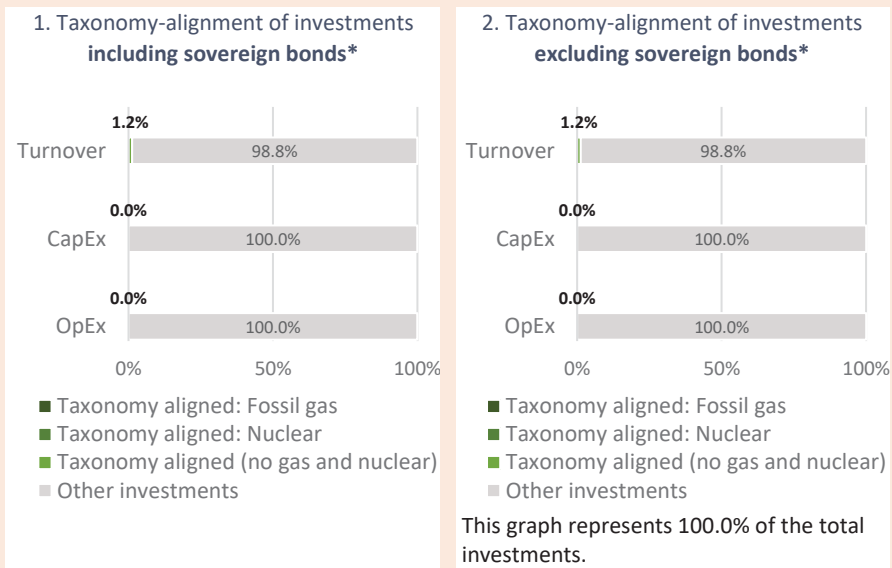

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

- Yes:
- in fossil gas in nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives
 - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	1.2
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	% of Sustainable Investments
Transitional activities	0.0	0.0
Enabling activities	0.8	1.3

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy slightly decreased in 2023 relative to the previous reference period. This is a function of the sale of a company that had a material proportion of its revenues with reported alignment to the EU taxonomy (given the Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data).

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

	% of Total Sub-Fund Value	% of Sustainable Investments
Investments with an environmental objective but not aligned with the Taxonomy (i.e., Other Environmental), weighted by non-Taxonomy aligned revenue	18.6	30.9

Currently the coverage of the EU Taxonomy Regulation does not include certain sectors and economic activities within the Sub-Fund's investment strategy. Therefore, investments by the Sub-Fund in these sectors and activities cannot qualify as environmentally sustainable for the purposes of Article 3 of the EU Taxonomy.

The Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data, therefore this may represent a more conservative figure.

The aforementioned investments have not been subject to an assurance by an auditor or a third party.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

	% of Total Sub-Fund Value	% of Sustainable Investments
Investments with a social objective	41.9	67.9

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes (1) investments previously ‘#1 aligned with E/S characteristics’ which are under the Investment Manager’s review due to an unforeseen event (e.g. a controversy); and (2) investments that support the financial objective and other management activities of the Sub-Fund, such as:

- Cash held for liquidity purposes as an ancillary asset and overnight deposits;

No minimum environmental or social safeguards are applied to investments held for liquidity purposes (e.g. Cash or deposits). These investments are not expected to affect the delivery of the sustainable investment objective on a continuous basis as they do not form a material part of the Sub-Fund’s portfolio.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients’ assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements, the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

In accordance with the proprietary sustainability framework, the Investment Manager has appraised that all of the companies owned within the Sub-Fund are deemed to promote environmental and social characteristics. As such, the environmental and/or social characteristics promoted by this product have been met.

Over the period, the Investment Manager has engaged with companies on a broad range of topics including climate change, health and safety, and Board diversity. For example, it engaged with financial services companies such as AIA and HDFC on their progress in setting science-based targets. The Investment Manager engaged with Delivery Hero about improving health and safety measures. Finally it engaged with a number of companies including Aspeed Technology, Kingdee and Mercadolibre about improving gender diversity at the Board and senior management level.

The Investment Manager has voted all proxies.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: European Equity Fund

Legal entity identifier: 213800WYXNEU5CDV6M15

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**:

It **promoted Environmental/Social (E/S) characteristics**: and while it did not have as its objective a sustainable investment, it had a proportion of 28.2% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics (i.e. maintaining a lower blended environmental intensity than its benchmark) by making investments in companies that meet the standards of the Investment Manager's proprietary sustainability assessments and by excluding investments in certain sectors or business areas.

Given the Investment Manager's focus on these characteristics, the Sub-Fund's blended environmental intensity is lower than the broader market, which is expressed as the Sub-Fund's benchmark. As such, the environmental characteristics promoted by this Sub-Fund have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

	GHG (tonnes/€m)	Waste (tonnes/€m)	Water (m3/€m)
MSCI Europe weighted-average	170.13	4.09	2761.62
Portfolio weighted-average	173.70	1.99	576.79
Relative difference	2%	-51%	-79%
% of Sub-Fund lower than benchmark weighted-average	79.58%	85.18%	95.99%

As at year-end 2023 (31 December 2023), the Sub-Fund had a blended environmental intensity that was 42.8% lower than the broader market.

The blended environmental intensity is a proprietary metric representing an equally weighted combination of greenhouse gas (GHG) emissions intensity*, landfill waste intensity, and water purchased intensity. The relative blended environmental intensity is an average of the percentage (%) differences in each the three weighted-average environmental intensities (GHG, waste and water) calculated for the Sub-Fund and its benchmark, where the weights represent the size of each holding.

For GHG, waste and water intensities, the percentage of the Sub-Fund invested in companies with an intensity lower than the benchmark’s weighted-average was 79.58%, 85.18% and 95.99% respectively.

*The Investment Manager has used Carbon Direct + First Tier indirect intensity which comprises of Scope 1 & 2 greenhouse gas intensity, plus a company’s first-tier upstream supply chain.

For GHG, waste and water intensities, the percentage of the Sub-Fund invested in companies with an intensity lower than the benchmark’s weighted average was 79.58%, 85.18% and 95.99% respectively.

See the question below on ‘What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives’ for information on:

- Carbon avoided – footprint
- Percentage of direct equity holdings contributing to financial inclusion, access to education, healthcare impact and climate adaption.

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

Over 2023, the sub-fund’s blended environmental intensity remained lower than the benchmark. The magnitude of this difference increased over the period as a function of improvements in the methodology from the data provider to calculate water purchased intensity, changes in asset allocation within the Sub-Fund and improvements in the companies’ operations.

We have continued to hold zero percentage of companies invested in the business groups or activities prohibited under the Sub-Fund’s exclusions criteria.

Note that the carbon avoided for the Sub-Fund, and the percentage of direct equity holdings relating to access to education, healthcare impact and climate adaption measures are a new set of sustainability indicators compared to the last period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund focuses on sustainable investments with environmental and/or social objectives.

To do this, currently, the Sub-Fund intends to make sustainable investments in companies believed by the Investment Manager to contribute to:

- positive environmental change through sustainable decarbonisation (the process of reducing carbon dioxide emissions). The Sub-Fund currently uses ‘carbon avoided’ as an indicator to assess, measure and monitor the carbon impact associated with a company.
- supporting and/or improving socio-economic resilience and outcomes by facilitating financial inclusion (i.e., access to useful and affordable financial products and services that meet the needs of underserved individuals and businesses delivered in a responsible manner).
- access to education by providing access to high quality educational and training products and/or services for underserved groups.
- healthcare impact by providing access to products and/or services that facilitate access to healthcare in underserved or underperforming markets.
- climate adaption through products and/or services which mitigate against the impacts of climate change, driven by longer-term shifts in climate patters and/or acute event-driven climate risks.

Indicator	Metric	Year	Value	Commentary
Carbon avoided – footprint	in tonnes per CO2e per US\$m invested	2023	1197.3	Seven companies (out of 53) in the portfolio produced positive carbon avoided.
Percentage of direct equity holdings contributing to financial inclusion	% equity	2023	1.9%	One company (out of 53) in the portfolio facilitate financial inclusion.
Percentage of direct equity holdings contributing to access to education	% equity	2023	0.0%	There are currently no companies (out of 53) in the portfolio that facilitate access to education.
Percentage of direct equity holdings contributing to healthcare impact	% equity	2023	3.8%	Two companies (out of 53) in the portfolio facilitates healthcare impact.
Percentage of direct equity holdings contributing to climate adaptation	% equity	2023	0.0%	There are currently no companies (out of 53) in the portfolio that facilitate climate adaptation.

A note on ‘carbon avoided’

‘Carbon avoided’ are the carbon emissions avoided by using a product or service that has less carbon emissions than the status quo thereby contributing to decarbonisation. The carbon avoided in aggregate at the Sub-Fund level can change due to the overall allocation to companies that generate carbon avoided, and the mix of companies within the Sub-Fund.

The above carbon avoided disclosure is based on data from companies relating to the end of financial years 2021 and 2022. This data has been applied to portfolio position weightings as at the end of

financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager assesses sustainable investments in relation to the 14 mandatory principle adverse impacts to determine that the investment does not cause significant harm to other sustainable investment objectives. This Do No Significant Harm test is applied to the whole investment.

As detailed in the question below on ‘what investment strategy does this financial product follow?’ the Investment Manager uses a proprietary sustainability framework to analyse the material harmful effects that a company has on society or the environment.

In addition, to mitigate potential negative impact of the Investment Manager’s investment decisions on other sustainable investment objectives, the Investment Manager assesses the material negative externalities (i.e., harmful effects) of a potential investment on its stakeholders and, as a result, the Sub-Fund does not invest in certain business groups or activities.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager assesses sustainable investments in relation to the 14 mandatory principal adverse impacts to determine that the investment does not cause significant harm to other sustainable investment objectives.

The investment process allows the Investment Manager to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

As part of the in-depth fundamental analysis on an individual company, the mandatory principal adverse impacts are considered for the Sub-Fund’s intended sustainable investments.

The Investment Manager draws on quantitative data, where available, and combines this with a qualitative assessment.

Where material adverse impacts are identified, the Investment Manager may engage directly with company management and/or exercise proxy voting rights in an effort to catalyse change or promote improvement in a given metric.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and UN Guiding Principles including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are considered as part of the application of the Investment Manager’s sustainability framework and assessment of material negative externalities. Based on this analysis, the Investment Manager deems whether sustainable investments are aligned with these considerations. Third party data from providers whose methodologies are consistent with international norms represented in numerous widely accepted global conventions including those mentioned above, complements the identification of these considerations.

In addition, the Sub-Fund did not invest in companies the Investment Manager deemed to be in violation of the UN Global Compact principles.

There have been no significant breaches or flags on these international principles and guidelines for the period in review.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual company, the following principal adverse impact indicators are currently considered for the Sub-Fund’s investments:

GHG Emissions	Scope 1, 2 & 3 GHG Emissions Contribution (EVIC) tCO2e	2023	262,363.9	<p>BP was the largest contributor to the Sub-Fund’s GHG emissions and footprint. BP has made efforts in transitioning the business away from legacy hydrocarbons and pivoting towards low carbon growth areas and convenience and mobility solutions.</p> <p>Rio Tinto was the largest contributor to the Sub-Fund’s GHG intensity. Rio Tinto is the second largest mining company in the world. Rio has high scope 3 emissions given their iron ore is used in blast furnace steelmaking. In addition, their aluminium division generates high scope 1 and 2 emissions. Rio’s activities are important in enabling the energy transition and it has a carbon emission reduction plan in place. Their intention to substantially reduce emissions has resulted in the sale of all their coal mining assets.</p> <p>Exposure to these companies is deemed not to result in material negative impacts.</p>
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO2e/m EUR invested	2023	542.3	
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO2e/m EUR revenue	2023	1001.5	

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

In addition, the Sub-Fund has not invested in companies in relation to the following principal adverse impacts:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023

Largest investments	Sector	% Assets	Country
Lvmh Moet Hennessy Louis Vuitton	Consumer Discretionary	4.5	France
Astrazeneca Plc	Health Care	3.9	United Kingdom
Hsbc Holdings Plc	Financials	3.8	United Kingdom
Asml Holding Nv	Information Technology	3.6	Netherlands
Sap Se	Information Technology	3.4	Germany
Bp Plc	Energy	3.1	United Kingdom
Unicredit Spa	Financials	3.0	Italy
Siemens Ag	Industrials	2.9	Germany
Novo Nordisk A/s	Health Care	2.9	Denmark
Ferrari Nv	Consumer Discretionary	2.6	Italy
Totalenergies Se	Energy	2.5	France
Novo Nordisk A/s B	Health Care	2.3	Denmark
Be Semiconductor Industries Nv	Information Technology	2.1	Netherlands
Bank Of Ireland Group Plc	Financials	2.1	Ireland
Infineon Technologies Ag	Information Technology	2.0	Germany

What was the proportion of sustainability-related investments?

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	87.0
#1A Sustainable investments within the meaning of Article 2(17) SFDR	28.2
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	58.8
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	13.0

Sustainable Investments (#1A) Breakdown	% of Total Sub-Fund Value*	% of Sustainable Investments
Taxonomy-aligned investments, weighted by Taxonomy-aligned revenue**	2.9	7.1
Investments with an environmental objective but not aligned with the Taxonomy	17.6	70.8
Investments with a social objective	7.7	27.2

*Includes Taxonomy-aligned revenue from all securities, including those not classified as sustainable investments within the meaning of Article 2(17) SFDR.

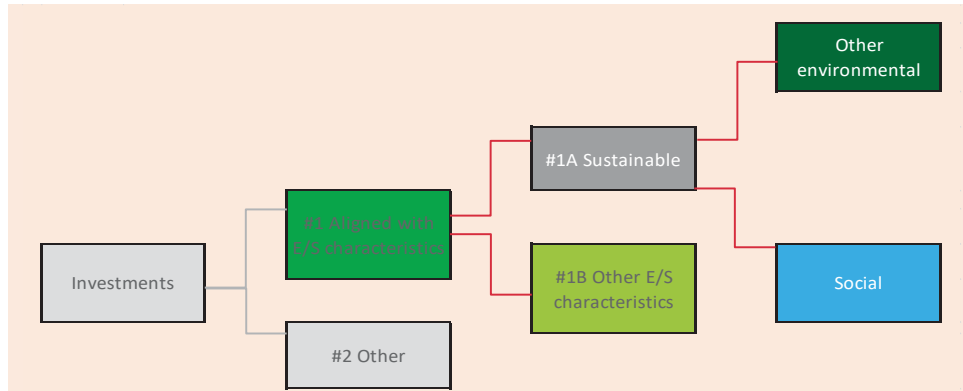

**Underlying entity revenue that can be matched to eligible economic activities as defined under the Commission Delegated Regulation (EU) 2022/1214 meeting all requirements to be deemed Taxonomy aligned.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

Communication Services;Consumer Discretionary;Consumer Staples;Energy;Financials;Health Care;Industrials;Information Technology;Materials;Real Estate;Utilities.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?***

Yes:

in fossil gas in nuclear energy

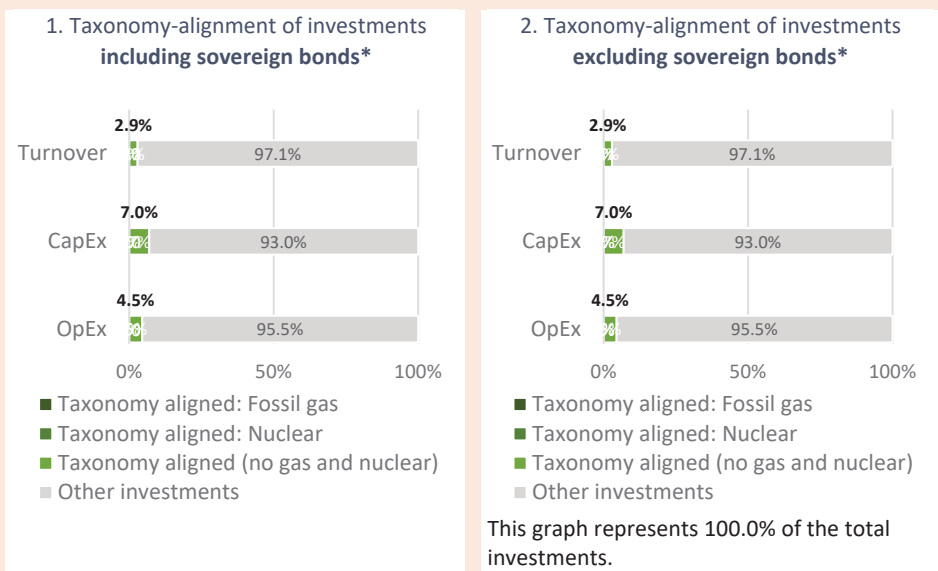

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	2.9
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	% of Sustainable Investments
Transitional activities	0.7	2.4
Enabling activities	1.0	2.5

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of the investments that were aligned with the EU Taxonomy rose over the period. This is a function of asset allocation changes as well as improvements in the reporting of this data by underlying companies.

The aforementioned investments have not been subject to an assurance by an auditor or a third party.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

	% of Total Sub-Fund Value	% of Sustainable Investments
Investments with an environmental objective but not aligned with the Taxonomy (i.e. Other Environmental), weighted by non-Taxonomy aligned revenue	17.6	70.8

Currently the coverage of the EU Taxonomy Regulation does not include certain sectors and economic activities within the Sub-Fund’s investment strategy. Therefore, investments by the Sub-Fund in these sectors and activities cannot qualify as environmentally sustainable for the purposes of Article 3 of the EU Taxonomy.

The Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data, therefore this may represent a more conservative figure.

The aforementioned investments have not been subject to an assurance by an auditor or a third party.

What was the share of socially sustainable investments?

	% of Total Sub-Fund Value	% of Sustainable Investments
Investments with a social objective	7.7	27.2

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes (1) investments previously ‘#1 aligned with E/S characteristics’ which are under the Investment Manager’s review due to an unforeseen event (e.g. a controversy), and (2) investments, as described in the Sub-Fund’s investment policy, that support the financial objective and other management activities of the Sub-Fund such as:

- equities that are considered not aligned with E/S characteristics;
- derivatives for hedging, and/or Efficient Portfolio Management;
- Cash held for liquidity purposes as an ancillary asset, deposits, and money market instruments; and

- shares or units in other funds and exchange traded funds in which the Investment Manager does not have direct control of the underlying investments.

No minimum environmental or social safeguards are applied. Such investments will not usually represent a material proportion of the Sub-Fund's portfolio. These investments are not expected to affect the promotion of environmental or social characteristics of the Sub-Fund on a continuous basis as they do not form a material part of the Sub-Fund's portfolio.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements, the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

During the reporting period (12 months to end of December 2023), the European Equity team was involved with eight company-specific engagements. These engagements covered a range of issues covering sustainability reporting, governance, remuneration, diversity and inclusion, health and safety and carbon emissions.

The Investment Manager has voted all proxies.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Credit Income Fund

Legal entity identifier: 21380038HF8IE6XMBV22

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes **No**

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics: and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p>
<p><input type="checkbox"/> It made sustainable investments with a social objective: %</p>	<p><input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes better carbon outcomes (i.e., maintaining a carbon profile lower than typical global credit indices) by making investments in borrowers that meet the standards of the Investment Manager’s proprietary sustainability frameworks and by excluding direct investments in certain sectors or business areas that are deemed to have less favourable sustainability characteristics.

Issuers in the Sub-Fund are scored following the proprietary sustainability framework for the Sub-Fund as outlined in Appendix 3 of the Prospectus of the Ninety One Global Strategy Fund under the question,

related to the Sub-Fund, stating: "what investment strategy does this financial product follow". In addition, the Investment Manager can confirm that there are no investments into excluded issuers. Thus, the characteristics promoted by this financial product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value for fund	Value for benchmark index
Scope 1 & 2 weighted-average carbon intensity	in tonnes per CO2e per US\$m of revenue	Dec 23	87.8	254.8

The Sub-Fund exhibits a weighted-average carbon intensity (WACI) that is 65% lower than that of global credit indices (as represented by 50% BofA Global High Yield and 50% BofA Global Corporate), thus the characteristics promoted have been met.

The methodology behind this figure is as follows. For each entity/addressable security, the carbon emissions per US\$1 million of products or services sold (revenue) is measured. To determine an overall carbon intensity at the Sub-Fund or index level, the weighted average carbon intensity of each assessable security in the Sub-Fund or index is then calculated.

The above data represents Scope 1 and 2 carbon intensity. Unsurprisingly, heavy emitters are predominantly found in sectors involved in more carbon-intensive industries. However, within such sectors, the Sub-Fund's exposure is in aggregate skewed towards issuers which the Investment Manager believes are aligned to a net-zero ambition.

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

The scope 1 and 2 carbon intensity remains lower than the benchmark and thus compliant with the sustainability indicator, consistent with compliance during the prior period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis on an individual borrower, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI Indicator	Metric	Year	Value	Commentary
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC)	2023	392.3 vs. global credit indices* of 639.8 tCO2e/m EUR invested	The Sub-Fund exhibits a materially lower carbon footprint than comparable credit indices* owing to the lower weighting in higher emitting issuers. Within higher emitting sectors, the Sub-Fund is also skewed more towards best-in-class issuers with credible net-zero plans. The Investment Manager often observes that the heavy emitting sectors/corporates are most advanced in their transition planning and execution.
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies	2023	659.7 vs. global credit indices* of 1,126.4 tCO2e/m EUR revenue	The Sub-Fund exhibits a materially lower Greenhouse Gas (GHG) intensity than comparable credit indices* owing to a lower weighting in issuers with a relatively high GHG intensity. Within sectors that have a higher GHG intensity, the Sub-Fund is also skewed more towards best-in-class issuers with credible net-zero plans. The Investment Manager often observes that sectors/corporates with the highest GHG intensity are most advanced in their transition planning and execution.

*As represented by 50% BofA Global High Yield and 50% BofA Global Corporate

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principal adverse impacts:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023

Largest investments	Sector	% Assets	Country
Banijay Group Sas 6.5 Mar 01 26	Short Duration High Yield	1.5	France

What was the proportion of sustainability-related investments?

● What was the asset allocation?

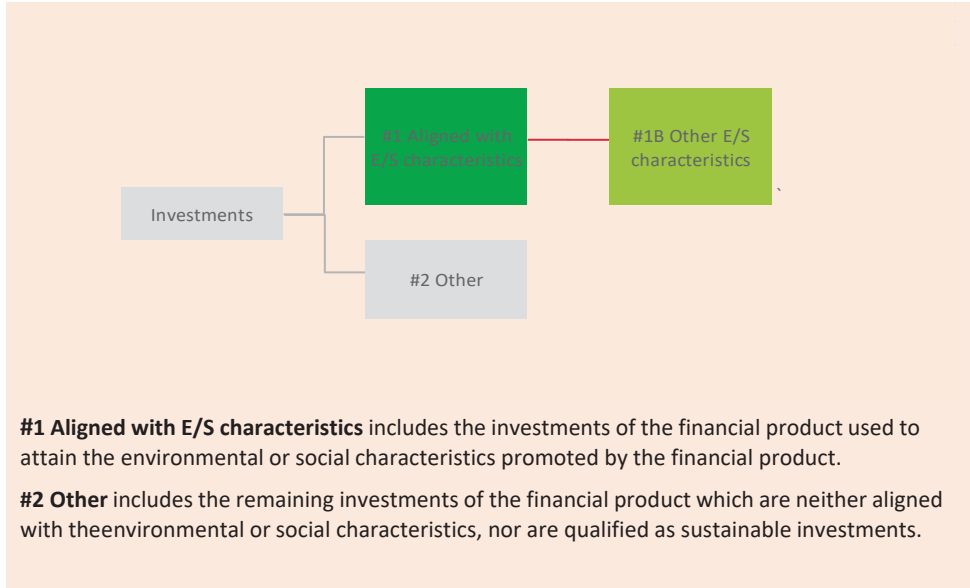

Asset allocation describes the share of investments in specific assets.

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	97.1
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	97.1
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	2.9

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Bank Capital; Corporate Hybrids; Em Credit; European High Yield; European Investment Grade; Floating Rate Notes; Short Duration High Yield; Structured Credit; Synthetics; Us High Yield; Us Investment Grade.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

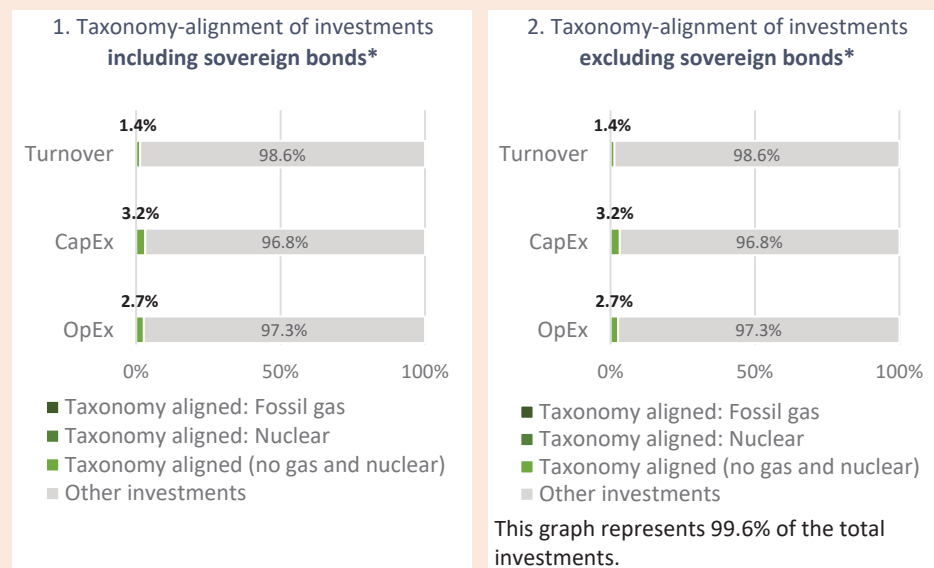

- Yes:
 - in fossil gas in nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	1.4
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.2
Enabling activities	0.5

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been a slight increase in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

'#2 Other' includes investments that support the financial objective and other management activities of the Sub-Fund such as:

- borrowers that are considered not aligned with E/S characteristics;
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management;
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments.

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

ESG is deeply integrated into the investment process as per the Investment Manager's sustainability framework. Additionally, the Investment Manager regularly engages with issuer companies. The Investment Manager believes engagement is an important investment tool to help preserve and grow the real value of the assets entrusted to it by its clients over the long term. Engagement activity also provides the Investment Manager with valuable ESG information, helps it to understand management intentions, and enables it to advocate for improved ESG practices and disclosure. The Investment Manager recognises that it must prioritise its engagement activity and typically considers the size and duration of holdings, credit quality, degree of transparency, and the materiality of ESG risks and opportunities. The nature of engagements with corporate bond issuers is typically continual and there is rarely a clearly defined beginning and end date – therefore, the Investment Manager does not measure (and record data pertaining to) success in a binary fashion. It does, however, keep a log of all

engagements within its central research system, and this is then summarised for client communication within quarterly sustainability reports.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Franchise Fund

Legal entity identifier: 213800ENHEQTIA6IRV12

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : %	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics : and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes better carbon outcomes (i.e. maintaining a carbon profile lower than the Sub-Fund’s benchmark) by making investments in companies that meet the standards of the Investment Manager’s proprietary sustainability assessments and by excluding investments in certain sectors or business areas (deemed incompatible with a net zero future).

Given the Investment Manager’s consistent focus on high-quality, capital-light sustainable businesses, with zero exposure to heavily capital intensive, high-emission sectors such as energy, utilities and resources, the Sub-Fund’s carbon profile remains far better relative to the broader market. As such, the environmental characteristics promoted by this product have been met.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2023	63.8	379.8	-83%
		2022	80.7	442.1	-82%

The Sub-Fund maintained a carbon profile that is 83% lower than the broader market. The biggest contributors to the increase in absolute emissions at the Sub-Fund level (in line with the benchmark) were Samsung Electronics , Nestle and Microsoft.

The 5 largest contributors to the Sub-Funds carbon profile were, in order of magnitude (position sizes are shown in brackets):

- Samsung Electronics (2.01%)
- Nestle (3.92%)
- St James Place (1.03%)
- Booking Holdings (6.23%)
- Beiersdorf (4.4%)

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

There has been no material change in the Sub-Fund’s carbon profile versus the benchmark this year compared to last year. The biggest contributors to the increase in absolute emissions at the Sub-Fund level (in line with the benchmark) were the same as the previous period’s, as were the largest 5 contributors to the Sub-Fund’s carbon profile.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis of an individual company, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI indicator	Metric	Year	Value	Commentary
GHG emissions	Scope 1, 2 and 3 GHG Emissions Contribution (EVIC) tCO2e	2023	526,030.9	Nestle was the largest contributor to the Sub-Fund’s GHG emissions and carbon footprint. This was deemed not to be a material negative impact, as Nestle has made significant climate-related commitments, including SBTi-validated decarbonisation targets, including reducing GHG emissions by 50% by 2030.
Carbon footprint	Scope 1, 2 and 3 Carbon Footprint Contribution tCO2e/m € invested	2023	70.4	
GHG intensity	Scope 1, 2 and 3 GHG intensity of investee companies tCO2e/m € revenue	2023	484.0	St James’s Place (SJP) was the largest contributor to the Sub-Fund’s GHG intensity. This was deemed not to be a material negative impact, as St James’s Place are a capital light business, with the majority of its GHG intensity driven by scope 3 emissions rather than direct scope 1 or 2 emissions. Equally, SJP have committed to achieving net zero in their investments by 2050.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principle adverse impacts:

- Exposure to companies active in the fossil fuel sector

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Where material adverse impacts are identified, the Investment Manager will engage directly with company management or sovereign stakeholders and/or exercise proxy voting rights in an effort to catalyse change.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023

Largest investments	Sector	% Assets	Country
Visa Inc	Financials	9.4	United States
Asml Holding Nv	Information Technology	7.1	Netherlands
Microsoft Corp	Information Technology	7.0	United States
Booking Holdings Inc	Consumer Discretionary	6.0	United States

Icon Plc	Health Care	3.4	Ireland
Netease Inc	Communication Services	3.3	China
Electronic Arts Inc	Communication Services	2.9	United States
Becton Dickinson & Co	Health Care	2.8	United States

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	98.0

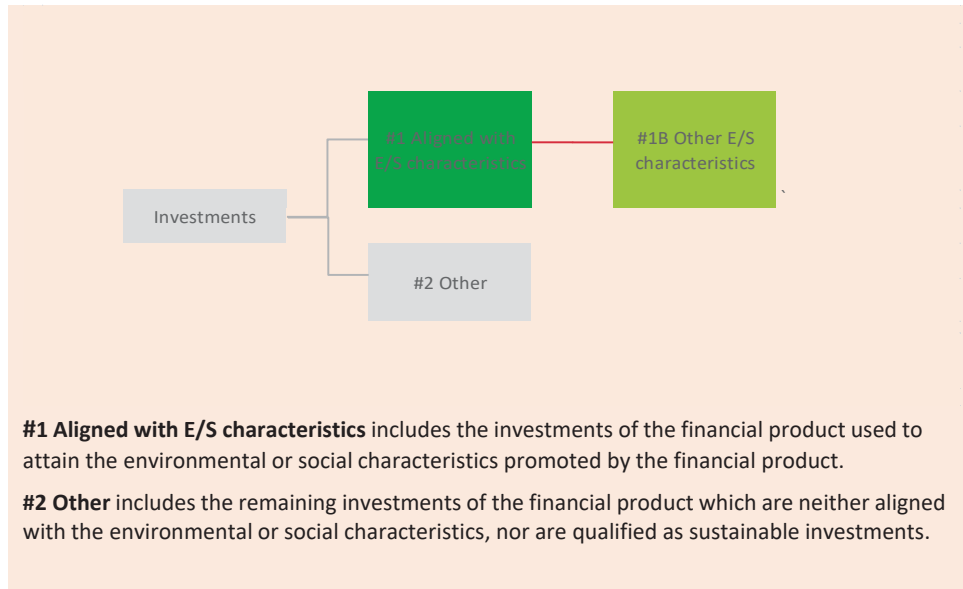

Asset allocation describes the share of investments in specific assets.

#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	2.0
#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	98.0

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Communication Services; Consumer Discretionary; Consumer Staples; Financials; Health Care; Industrials; Information Technology.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

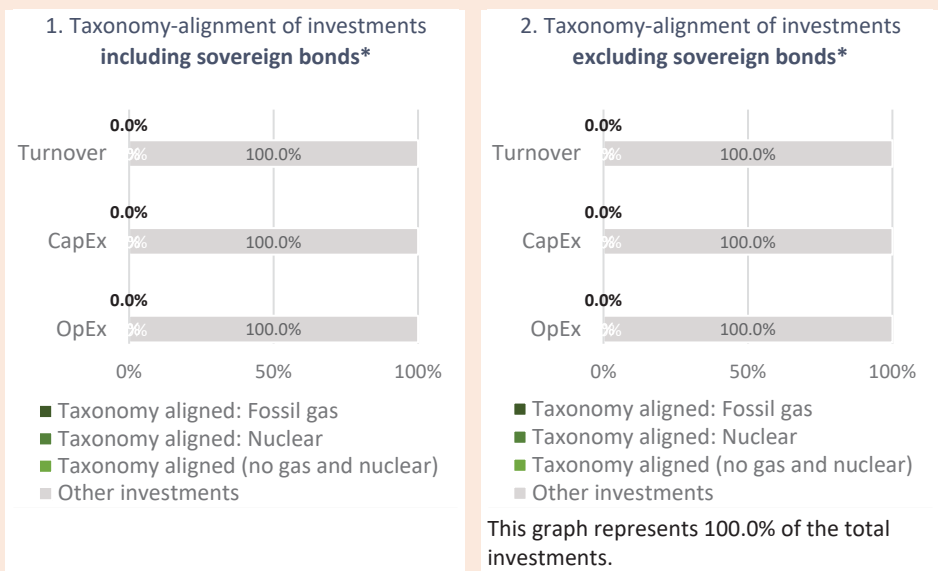

- Yes:
- in fossil gas in nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.0
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been no change in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation, accordingly the minimum share of sustainable investments with an environmental objective that was not aligned with the EU Taxonomy is 0%.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments, as described in the Sub-Fund’s investment policy, that support the financial objective and other management activities of the Sub-Fund such as:

- equities that are considered not aligned with E/S characteristics;
- Cash held for liquidity purposes as an ancillary asset, deposits, and money market instruments;

No minimum environmental or social safeguards are applied. Such investments will not usually represent a material proportion of the Sub-Fund’s portfolio.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients’ assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

Carbon analysis is fully integrated into the Investment Manager’s research process and ongoing monitoring of underlying holdings. The Investment Manager actively uses a proprietary Climate Strategy Assessment for all existing holdings, as well as new ideas, which evaluates companies across fifteen criteria, including: net zero commitments, short- and long-term quantitative targets for reducing emissions and whether these are SBTi certified, CDP disclosure, executive remuneration linked to climate change performance, and the appointment of a board member or committee with responsibility for the company’s climate change strategy.

The output of this analysis helps the Investment Manager prioritise engagement with those companies identified as having little or no carbon emissions disclosure, and/or do not yet have credible net zero targets and transition pathways in place that are aligned with the Paris Agreement. During the period, the Investment Manager proactively engaged with the lowest scoring companies, according to its proprietary Climate Strategy Assessment. Whilst acknowledging that many of these holdings do not have inherently carbon intensive business models, the Investment Manager has continued to monitor and engage Sub-Fund companies to take the lead on decarbonisation and implement further steps towards climate change.

In addition, over the last 12 months, the Investment Manager has developed a toolkit on unbundled Renewable Energy Certificates and carbon offsets to support engagement efforts further, in particular with the highest scoring companies on the Climate Strategy Assessment. Given their size and geographical location, many of the highest scoring holdings are in a prime position to take the lead on these aspects of decarbonisation, hence the Investment Manager initiating engagement on these issues.

During the reporting period (12 months to 31 December 2023), the investment team engaged with 10 of the Sub-Fund companies on climate change.

Examples of positive steps subsequent to engagement include:

Company	Sector	Outcome
Samsung Electronics	Information Technology	They confirmed that they have set internal interim targets for Scope 1 & 2 emissions reduction by 2030, including for the Semiconductor division, which makes up the bulk of their Scope 1 & 2 emissions. They have also set internal interim targets for Scope 3 emissions for their Device Experience division and are in the process of restating their Scope 3 emissions, including for their Semiconductor division, to allow for target setting.
FactSet Research	Financials	They have made significant progress in monitoring and disclosing their GHG scope 1 & 2 emissions and are currently developing their first scope 3 inventory. Additionally, they are conducting a climate risk assessment in line with TCFD recommendations, which will inform the development of their climate transition plan, emissions reduction strategies, and ultimately, our SBTi target, which ought to be verified in 2024.
Electronic Arts	Communication Services	They have disclosed Scope 1 and 2 emissions for the first time as well as some Scope 3 emissions, with FY2023 being the baseline for their decarbonisation efforts. They are also currently evaluating whether to disclose to CDP.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

● **How does the reference benchmark differ from a broad market index?**

N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Macro Allocation Fund

Legal entity identifier: 213800Q7XLCIZ4JK4842

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : %	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics : and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in companies and countries that meet the standards of the Investment Manager’s proprietary sustainability framework and by excluding investments in certain business groups and activities.

The Sub-Fund invests across various areas in which the Investment Manager sees opportunity to promote environmental/social characteristics, examples of these:

- environmental characteristics can include transition to net zero and climate change amongst others; and
- social characteristics can include digital infrastructure, healthcare and financial inclusion amongst others.

In accordance with the proprietary sustainability framework, the Investment Manager has appraised that over 51% of the assets held in the Sub-Fund are deemed to promote environmental and social characteristics. As such, the environmental and/or social characteristics promoted by this product have been met.

● **How did the sustainability indicators perform?**

Direct equity investments

(Note as at 31/12/2023 there were no directly owned corporate bonds in the portfolio)

Indicator	Metric	Year*	Value	Commentary
Scope 1, 2 & 3 carbon footprint	in tonnes of CO2e per US\$m invested	2023	214.0	A steel manufacturer (SSAB) and a mining company (Rio Tinto) are material contributors to these measures given the carbon intensive nature of their businesses. Their activities are important in enabling the energy transition and both have carbon emission reduction plans in place, with SSAB's being Science Based Target Initiative ("SBTi") approved. In addition, a renewable energy/utilities provider (NextEra Energy) is responsible for a large proportion of intensity. This company is at the forefront of decarbonisation through renewable energy.
Scope 1, 2 & 3 – weighted average carbon intensity	in tonnes per CO2e per US\$m or revenue	2023	462.8	
Proportion of companies in the portfolio which disclose carbon emissions figures	%	2023	Scope 1 & 2 = 78.0% At least some Scope 3 categories = 30.0%	Over time the Investment Manager has seen improvement in portfolio companies' reporting of carbon data and will continue to engage with companies to improve Scope 1, 2 & 3 disclosure.
Percentage of direct equity holdings with credible net zero plans in place**	%	2023	36.0%	There has been growth in the adoption of SBTi approved net zero plans. The Investment Manager will continue to engage with companies to set credible net zero plans.
Percentage of companies invested in the business groups or activities	% of equity	2023	0.0%	There is no exposure to companies invested in the business groups or activities

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

prohibited under the Sub-Fund's exclusions criteria				prohibited under the Sub-Fund's exclusions criteria.
---	--	--	--	--

*The above carbon disclosure is based on data from companies where available. This data has been applied to portfolio position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

**For the purposes of this reporting, the Investment Manager has defined "companies with credible net zero plans" as those companies with plans approved by the Science-Based Target Initiative ("SBTi"). This is therefore a conservative assessment as the portfolio additionally includes companies with net zero plans that are not yet SBTi approved.

Country investments

Country carbon emissions (Emissions intensity per GDP basis):

Country	Emissions intensity per GDP basis (tCO2e/million \$ GDP)*
Brazil	1014.6
Chile	196.6
Mexico	560.3
New Zealand	334.7
South Africa	1515.5
United States	253.1

*Given the complexities of calculating the emissions data for countries, there is a significant time lag. This data relates to 2020.

Brazil: The Lula administration took power in 2023 and have been working to slowly improve Brazil's climate commitments. The latest NDC submitted in 2023 reverts to the original stronger emissions targets set out in 2016. Under the previous administration, annual deforestation reached the highest levels in a decade representing a key climate risk; however the new government have taken swift action, pledging to work towards zero deforestation as a top priority. The government is also working towards a plan to implement carbon pricing mechanisms and emission caps for corporates in order to align both private and public policy actions. The Amazon Fund has been revived with both the US and Europe resuming contributions.

Chile: Chile continues to make strong progress on climate action and its commitment to be carbon neutral by 2050 is credible. This commitment was enshrined in law in June 2022 through the Climate Change Framework legislation. If the country's coal phase-out and renewable energy plans continue to be implemented, the government would establish Chile as a front-runner on climate action, putting emissions on a declining trend only slightly above a 1.5°C-compatible pathway. Alternative energy sources are emerging such as green hydrogen with the country signing a memorandum of understanding with the European Union in June 2023 to finance new projects. If successful Chile could become a key net exporter of green hydrogen.

Mexico: Mexico's climate policy actions are going backwards under President Lopez Obrador's administration with fossil fuel use prioritised and climate targets reduced. In spite of the lack of progress and backtracking at the macro level, there have been some encouraging initiatives at the micro-level with the development of a green taxonomy and a push to mobilise resources at the corporate level to align with green investment on the back of the UN's SDG framework

New Zealand: New Zealand's Climate Change Response (Zero Carbon) Amendment Act 2019 sets out a framework to reduce GHG emissions to net zero by 2050 (except biogenic methane, which has a target of 24-47% below 2017 levels). The country has also established an independent Climate Change Commission to provide advice to government on the transition to a low emissions economy. The country is a success story for the development of renewable energy, including

hydropower and geothermal energy, without government subsidies. The updated NDC in November 2021 strengthens the country's 2030 target.

South Africa: South Africa remains heavily reliant on coal, supplying approximately 80% of energy capacity, meaning emissions per GDP are very high. Efforts to reduce emissions have faced challenges from the extremely poor performance of existing power plants, which have been driven by corruption, mismanagement, politics and coal lobby/incentives. While IRP2019 plans to decommission 83% of the total coal power by 2050 and increase clean energy generation, government policy has recently gone against this as some old power stations are having their lives extended to maintain energy capacity. There are some encouraging signs however, including a meaningful pipeline of renewables, as well as President Ramaphosa's efforts to fix the energy situation by establishing a "Ministry of Electricity" under the presidency. This has additionally been supported by private households who have been moving away from reliance on Eskom through the build out of solar panels supported by government tax incentives.

US: The passage of the US\$700 billion Inflation Reduction Act (IRA) in 2022 marked a key milestone in US climate policy, sparking a notable clean investment drive and acceleration in both state and local action on climate solutions. This act forms a key part of the new US emissions policy which targets a c. 50% reduction in greenhouse gas pollution from 2005 levels by 2030. The outcome of the 2024 presidential election will be key for indicating the longevity of these climate commitments and is something that the Investment Manager is monitoring closely. The Federal system somewhat offsets the risks of a presidential change, giving the States' considerable power. According to the EIA, 31 states and the District of Columbia had renewable portfolio standards (RPS) or clean energy standards (CES). These policies require electricity suppliers to supply a set share of their electricity from designated renewable resources or carbon-free eligible technologies.

● ***...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]***

Over 2023, the Sub-Fund saw a reduction in the carbon emissions measures. This is a function of a combination of positive progress by individual companies held in the Sub-Fund, portfolio activity involving the sale of some companies and the purchase of new companies, as well as changes in the asset allocation between these companies.

Over 2023, the Sub-Fund saw an increase in the proportion of companies disclosing Scope 1, 2 and Scope 3 carbon emissions figures. This is a function of increased disclosure from existing companies, and the addition of new companies that report these measures. We will continue to engage with companies to improve reporting of carbon data, particularly relating to all Scope 3 categories' disclosure.

Over 2023, the Sub-Fund saw an increase in in the proportion of companies with credible net zero plans in place. This is a result of the new addition of companies with credible net zero plans in place as well as the increased adoption of SBTi approved net zero plans in existing companies within the Sub-Fund. We will continue to engage with all our companies to set and deliver credible net zero plans.

We have continued to hold zero percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.

Noting the complexities of calculating the emissions data for countries and the resulting significant time lag which has meant that the data relates to 2020, the emissions on a per GDP basis slightly reduced for Chile, New Zealand and the US, slightly increased for Mexico and South Africa, and materially increased for Brazil.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The investment process implemented by the Investment Manager allows it to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

PAI Indicator	Metric	Year*	Value	Commentary
GHG Emissions	Scope 1, 2 and 3 GHG Emissions Contribution (EVIC) tCO2e	2023	232,903.6	These values have been scaled up so that corporate exposure represents the fund’s total value. One steel manufacturers (SSAB) and a mining company (Rio Tinto) are material contributors to these measures given the carbon intensive nature of their businesses. Their activities are important in enabling the energy transition and both have carbon emission reduction plans in place, with SSAB’s being Science Based Target Initiative (“SBTi”) approved. In addition, a
Carbon Footprint	Scope 1, 2 and 3 Carbon Footprint Contribution (EVIC) tCO2e/m € invested	2023	360.9	
GHG intensity	Scope 1, 2 and 3 GHG intensity of investee companies tCO2e/m € revenue	2023	931.5	

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

				renewable energy/utilities provider (NextEra Energy) is responsible for a large proportion of intensity. This company is at the forefront of decarbonisation through renewable energy. Exposure to these companies is deemed not to result in material negative impacts.
--	--	--	--	--

*The above carbon disclosure is based on data from companies where available. This data has been applied to portfolio position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2023

Largest investments	Sector	% Assets	Country
New Zealand Government Bond 1.75 May 15 41	Developed Market Sovereign	3.4	New Zealand
New Zealand Government Bond 1.5 May 15 31	Developed Market Sovereign	3.1	New Zealand
New Zealand Government Bond 5.5 May 04 23	Developed Market Sovereign	1.7	New Zealand
Aia Group Ltd	Equity	1.7	Hong Kong

Rio Tinto Plc	Equity	1.3	United Kingdom
Jd.com Inc	Equity	1.3	China
Chongqing Fuling Zhacai Group	Equity	1.2	China
Agnico Eagle Mines Ltd	Equity	1.2	Canada
Amadeus It Group Sa	Equity	1.2	Spain
Johnson & Johnson	Equity	1.2	United States

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

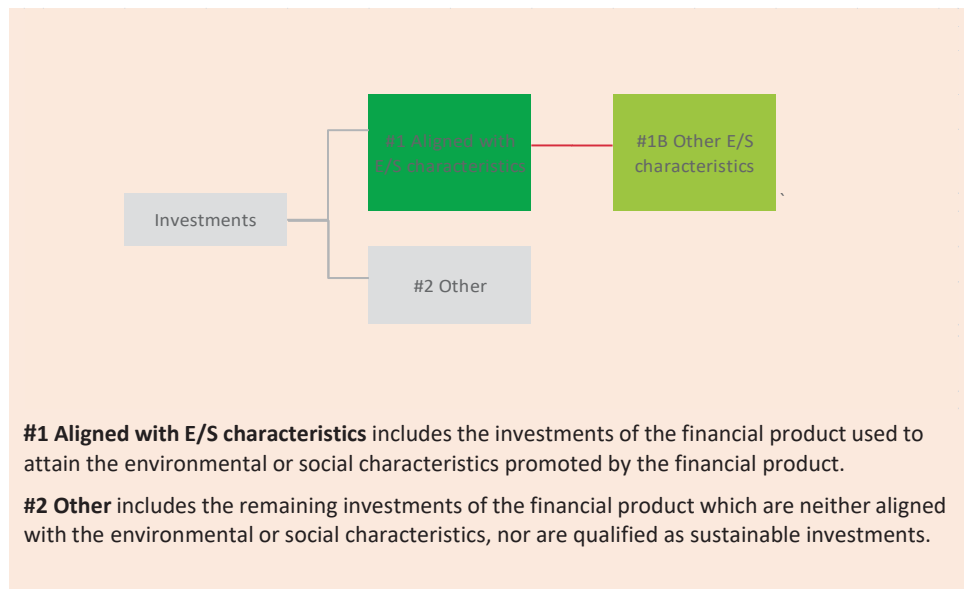

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	87.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	13.0
#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	87.0

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Developed Market Sovereign; Emerging Market Hard Currency Debt; Emerging Market Local Currency Debt; Equity; Investment Trust.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to

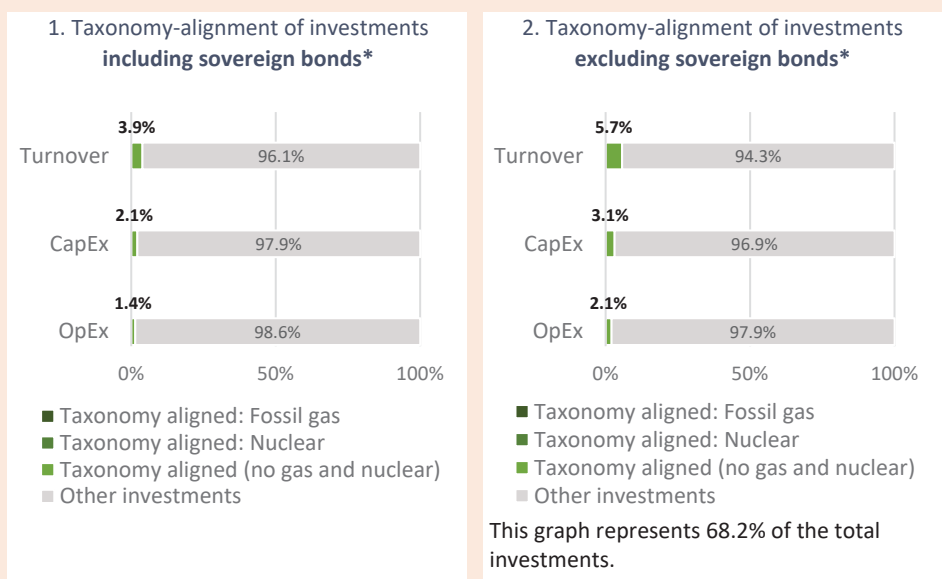

in fossil gas in nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	3.9
Climate change adaptation	0.0

limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.1
Enabling activities	2.9

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy slightly decreased in 2023 relative to the previous reference period. This is largely a function of changes in asset allocation and portfolio activity involving the sale of some companies and the purchase of new companies.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes (1) investments previously ‘#1 Aligned with E/S characteristics’ which are under the Investment Manager’s review due to an unforeseen event (e.g., a controversy); and (2) investments that support the financial objective and other management activities of the Sub-Fund, such as:

- Cash held for liquidity purposes as an ancillary asset or overnight deposits; and
- derivatives used for hedging, Efficient Portfolio Management and/or Investment Purposes.

No minimum environmental or social safeguards are applied

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

Over the period, the Investment Manager has engaged with companies on a broad range of topics including climate change, corporate governance, employee engagement and diversity and inclusion. For example, it engaged with financial services companies such as AIA and HDFC on their progress in setting science-based targets. It engaged with NextEra Energy on a number of topics throughout the year including diversity and inclusion, carbon reporting and supply chain decarbonisation. Finally, it also wrote to some companies in the portfolio regarding their employee engagement based on the Investment Manager's view that a firm with engaged employees is likely to see greater ability to capture growth opportunities, resilience in tough times, and longevity with greater talent retention.

The Investment Manager has voted all proxies.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

Reference benchmarks
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Multi-Asset Income Fund

Legal entity identifier: 213800ATCFTXLMWF1N08

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p>●● <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: %</p>	<p>●○ <input checked="" type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics: and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in companies and countries that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain business groups and activities.

The Sub-Fund invests across various areas in which the Investment Manager sees opportunity to promote environmental/social characteristics, examples of these:

- environmental characteristics can include transition to net zero and climate change amongst others; and
- social characteristics can include digital infrastructure, healthcare and financial inclusion amongst others.

In accordance with the proprietary sustainability framework, the Investment Manager has appraised that over 51% of the assets held in the Sub-Fund are deemed to promote environmental and social characteristics. As such, the environmental and/or social characteristics promoted by this product have been met.

● **How did the sustainability indicators perform?**

Direct equity investments

Indicator	Metric	Year*	Value	Commentary
Scope 1, 2 & 3 carbon footprint	in tonnes of CO2e per US\$m invested	2023	56.0	One chemicals company (OCI Global) and a mining company (Rio Tinto) are material contributors to these measures given the carbon intensive nature of their businesses. OCI's products aim to help decarbonise sectors including agriculture and cleaner fuels, while Rio Tinto's activities are important in enabling the energy transition. Both companies have carbon emission reduction plans in place.
Scope 1, 2 & 3 – weighted average carbon intensity	in tonnes per CO2e per US\$m or revenue	2023	88.9	
Proportion of companies in the Sub-Fund which disclose carbon emissions figures	%	2023	Scope 1 & 2 = 89.1% At least some Scope 3 categories = 41.3%	Over time the Investment Manager has seen improvement in portfolio companies' reporting of carbon data and will continue to engage with companies to improve Scope 1, 2 & 3 disclosure.
Percentage of direct equity holdings with credible net zero plans in place**	%	2023	45.7%	There has been growth in the adoption of SBTi approved net zero plans. The Investment Manager will continue to engage with companies to set credible net zero plans.
Percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria	% of equity	2023	0.0%	There is no exposure to companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

*The above carbon disclosure is based on data from companies where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

**For the purposes of this reporting, we have defined “companies with credible net zero plans” as those companies with plans approved by the Science-Based Target Initiative (“SBTi”). This is therefore a conservative assessment as the Sub-Fund additionally includes companies with net zero plans that are not yet SBTi approved.

Country investments

Country carbon emissions (Emissions intensity per GDP basis):

The following table shows the top 10 country exposures by Sub-Fund weighting:

Country	Emissions intensity per GDP basis (tCO2e/million \$ GDP)*
Brazil	1014.55
Canada	444.59
Chile	196.60
Indonesia	1394.02
Mexico	560.26
New Zealand	334.66
Peru	891.31
South Africa	1515.54
Turkey	661.62
United States	253.14

Source: ClimateWatch

*Given the complexities of calculating the emissions data for countries, there is a significant time lag. This data relates to 2020.

Country carbon emissions on a per GDP basis with accompanying qualitative commentary:

Brazil: The Lula administration took power in 2023 and have been working to slowly improve Brazil’s climate commitments. The latest NDC submitted in 2023 reverts to the original stronger emissions targets set out in 2016. Under the previous administration, annual deforestation reached the highest levels in a decade representing a key climate risk; however the new government have taken swift action, pledging to work towards zero deforestation as a top priority. The government is also working towards a plan to implement carbon pricing mechanisms and emission caps for corporates in order to align both private and public policy actions. The Amazon Fund has been revived with both the US and Europe resuming contributions.

Canada: Canada continues to shift its power generation away from coal with this due to be phased out entirely by 2030; however it remains a significant exporter of oil. In June 2021, the government passed the Canadian Net-Zero Emissions Accountability Act, which enshrines its 2050 net zero target into law and added a stronger NDC target. It will now aim to cut emissions by at least 40-45% below 2005 levels by 2030, up from the previous target of 30% (incl. LULUCF). Canada has had mandatory carbon pricing in effect since 2019 in order to align economic development with climate goals. The carbon price is set to rise by C\$15 from 2023 – 2030 to a peak of C\$170.

Chile: Chile continues to make strong progress on climate action and its commitment to be carbon neutral by 2050 is credible. This commitment was enshrined in law in June 2022 through the

Climate Change Framework legislation. If the country's coal phase-out and renewable energy plans continue to be implemented, the government would establish Chile as a front-runner on climate action, putting emissions on a declining trend only slightly above a 1.5°C-compatible pathway. Alternative energy sources are emerging such as green hydrogen with the country signing a memorandum of understanding with the European Union in June 2023 to finance new projects. If successful Chile could become a key net exporter of green hydrogen.

Colombia: Colombia's unconditional NDC target was updated in 2020 to an absolute emissions limit equivalent to 51% emissions reduction compared to business as usual. This is heavily reliant on reducing deforestation. Colombia has a net-zero policy target by 2050 and a policy instrument called Estrategia 2050, which defines goals combining long-term trajectories of socioeconomic development and GHG emission reduction by identifying priorities for public and private investments. The government developed a local green bond market as a public funding tool to meet the country's environmental, climate and sustainability targets and issued the first green emerging market sovereign bond in local currency. In April 2022, Colombia became the first country in the Western Hemisphere to adopt a national green taxonomy. Having made strides to create an enabling regulatory environment for sustainable financing, Colombia has built a strong foundation to achieve its ambitious climate and biodiversity conservation goals.

Indonesia: Indonesia continues to face considerable conflicts between its off-grid coal pipeline and its climate goals and responsibilities. The influx of newly operational coal plants have driven total emissions up and the planned pipeline of further coal production to come has forced a revision of the Just Energy Transition Partnership (JETP) targets. The new goals aim to cap on-grid emissions at 250 MtCO₂ in 2030 but key concerns remain on the sourcing of international financing to meet these commitments. Progress has been made on new renewable energy sources with two major renewable projects coming online in 2023 including the largest floating solar PV plant and Indonesia's first green hydrogen refinery.

Mexico: Mexico's climate policy actions are going backwards under President Lopez Obrador's administration with fossil fuel use prioritised and climate targets reduced. In spite of the lack of progress and backtracking at the macro level, there have been some encouraging initiatives at the micro-level with the development of a green taxonomy and a push to mobilise resources at the corporate level to align with green investment on the back of the UN's SDG framework

New Zealand: New Zealand's Climate Change Response (Zero Carbon) Amendment Act 2019 sets out a framework to reduce GHG emissions to net zero by 2050 (except biogenic methane, which has a target of 24-47% below 2017 levels). The country has also established an independent Climate Change Commission to provide advice to government on the transition to a low emissions economy. The country is a success story for the development of renewable energy, including hydropower and geothermal energy, without government subsidies. The updated NDC in November 2021 strengthens the country's 2030 target.

Peru: Peru is in the process of revising its NDC targets and is expected to tighten its previous goals, set in 2020 which included a commitment to carbon neutrality by 2050 and to limit absolute emissions to 123 MtCO_{2e} by 2030. The country continues to explore alternative energy sources for its high emitting sectors with the launch of its largest wind farm in July 2023 to provide power to the Quellaveco copper mine and a further two in the pipeline for 2024. The government's Green Finance Roadmap, launched in August 2023, is looking to attract \$2bn in finance to fund sustainable developments.

South Africa: South Africa remains heavily reliant on coal, supplying approximately 80% of energy capacity, meaning emissions per GDP are very high. Efforts to reduce emissions have faced challenges from the extremely poor performance of existing power plants, which have been driven by corruption, mismanagement, politics and coal lobby/incentives. While IRP2019 plans to decommission 83% of the total coal power by 2050 and increase clean energy generation, government policy has recently gone against this as some old power stations are having their lives extended to maintain energy capacity. There are some encouraging signs however, including a meaningful pipeline of renewables, as well as President Ramaphosa's efforts to fix the energy situation by establishing a "Ministry of Electricity" under the presidency. This has additionally been supported by private households who have been moving away from reliance on Eskom through the build out of solar panels supported by government tax incentives.

Turkey: In April 2023 Turkey updated its 2030 NDC target with a 41% reduction (vs 21% previously) in GHG emissions relative to the business-as-usual level. However, changes to the baseline lessen the impact and overall, Climate Action Tracker projects that the target equates to a 36% increase in GHG emissions by 2030 vs current levels, scoring it as 'Critically Insufficient'. A national energy plan was published in 2023 which sees renewable share of installed power capacity moving to 65% by 2035 from 52% in 2020. With its recently unveiled National Energy Plan for 2035, Türkiye has taken an important step to increase renewable energy power by setting the target of increasing installed solar power capacity from 6.7 GW in 2020 to 52.9 GW by 2035 and tripling its installed wind power capacity. Recent renewable trends have generally been encouraging, improving at a better rate than many income and regional peers.

US: The passage of the US\$700 billion Inflation Reduction Act (IRA) in 2022 marked a key milestone in US climate policy, sparking a notable clean investment drive and acceleration in both state and local action on climate solutions. This act forms a key part of the new US emissions policy which targets a c. 50% reduction in greenhouse gas pollution from 2005 levels by 2030. The outcome of the 2024 presidential election will be key for indicating the longevity of these climate commitments and is something that the Investment Manager is monitoring closely. The Federal system somewhat offsets the risks of a presidential change, giving the States' considerable power. According to the EIA, 31 states and the District of Columbia had renewable portfolio standards (RPS) or clean energy standards (CES). These policies require electricity suppliers to supply a set share of their electricity from designated renewable resources or carbon-free eligible technologies.

● ***...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]***

Over 2023, the Sub-Fund saw a reduction in the carbon emissions measures. This is a function of a combination of positive progress by individual companies held in the Sub-Fund, portfolio activity involving the sale of some companies and the purchase of new companies, as well as changes in the asset allocation between these companies.

Over 2023, the Sub-Fund saw an increase in the proportion of companies disclosing Scope 1, 2 and Scope 3 carbon emissions figures. This is a function of increased disclosure from existing companies, and the addition of new companies that report these measures. We will continue to engage with companies to improve reporting of carbon data, particularly relating to all Scope 3 categories' disclosure.

Over 2023, the Sub-Fund saw an increase in the proportion of companies with credible net zero plans in place. This is a result of the new addition of companies with credible net zero plans in place as well as the increased adoption of SBTi approved net zero plans in existing companies within the Sub-Fund. We will continue to engage with all our companies to set and deliver credible net zero plans.

We have continued to hold zero percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.

Noting the complexities of calculating the emissions data for countries and the resulting significant time lag which has meant that the data relates to 2020, the emissions on a per GDP basis slightly reduced for Canada, Chile, New Zealand and the US, slightly increased for Mexico, Peru, South Africa and Turkey, materially increased for Brazil, and materially decreased for Indonesia.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The investment process implemented by the Investment Manager allows it to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

PAI Indicator	Metric	Year*	Value	Commentary
GHG Emissions	Scope 1, 2 & 3 GHG Emissions Contribution (EVIC) tCO ₂ e	2023	521,084.1	These values have been scaled up so that corporate exposure (including corporate bonds) represents the fund’s total value. One chemicals company (OCI Global) and a mining company (Rio Tinto) are material contributors to these measures given the carbon intensive nature of their businesses. OCI’s products aim to help decarbonise sectors including agriculture and cleaner fuels, while Rio Tinto’s activities are important in enabling the energy transition. Both companies have
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO ₂ e/m € invested	2023	335.6	
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO ₂ e/m € revenue	2023	592.2	

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

				carbon emission reduction plans in place. Exposure to these companies is deemed not to result in material negative impacts.
--	--	--	--	---

*The above carbon disclosure is based on data from companies where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023

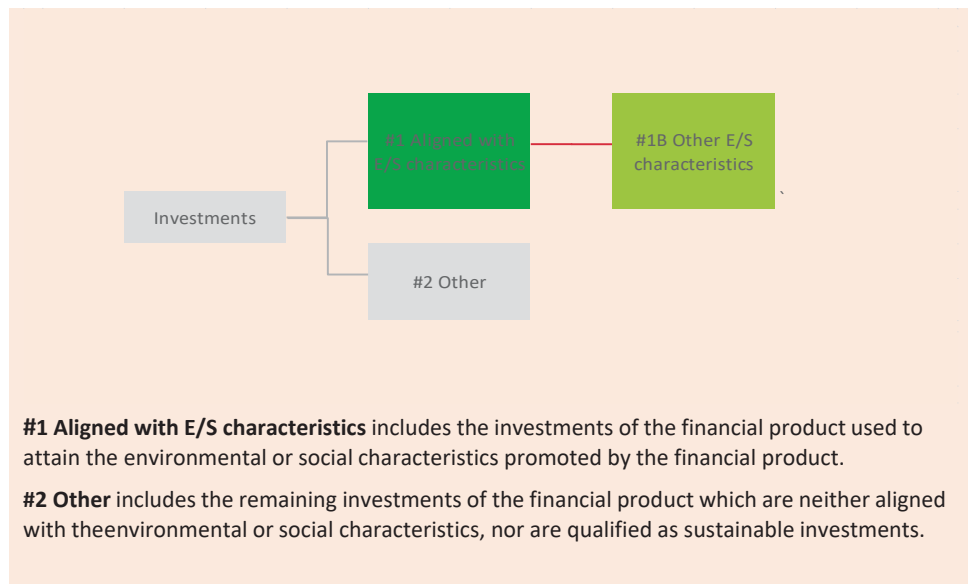

Largest investments	Sector	% Assets	Country
United States Treasury Note/bo 2.75 Nov 15 42	Developed Market Sovereign	4.5	United States

What was the proportion of sustainability-related investments?

What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	95.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	5.0
#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	95.0

In which economic sectors were the investments made?

Developed Market Sovereign; Emerging Market Hard Currency Debt; Emerging Market Local Currency Debt; Equity; Fixed Income Fund; High Yield Corporate; Infrastructure; Investment Grade Corporate; Property.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

- Yes:
- in fossil gas in nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Sovereign exposure accounts for 70.1% of the total Sub-Fund value.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

The EU Taxonomy regulation does not currently provide an appropriate methodology to calculate to what extent exposures to central governments, central banks and supranational issuers ('sovereign exposures') are exposed to environmentally sustainable economic activities.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.

- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.5%
Climate change adaptation	0.0%

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.1%
Enabling activities	0.3%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy slightly increased in 2023 relative to the previous reference period. This is largely a function of changes in asset allocation and portfolio activity involving the sale of some companies and the purchase of new companies.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other' includes (1) investments previously '#1 aligned with E/S characteristics' which are under the Investment Manager's review due to an unforeseen event (e.g. a controversy); and (2) investments that support the financial objective and other management activities of the Sub-Fund, such as:

- Cash held for liquidity purposes as an ancillary asset or overnight deposits; and
- derivatives used for hedging, efficient portfolio management and/or investment purposes

No minimum environmental or social safeguards are applied to investments held for liquidity purposes (e.g. cash or deposits).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

Over the period, the Investment Manager has engaged with companies on a broad range of topics including climate change, corporate governance, employee engagement and diversity and inclusion. For example, it engaged with Iberdrola on a number of topics throughout the year including remuneration, carbon reporting and biodiversity. It also wrote to some companies in the portfolio regarding their employee engagement based on the Investment Manager's view that a firm with engaged employees is likely to see greater ability to capture growth opportunities, resilience in tough times, and longevity with greater talent retention.

The Investment Manager has voted all proxies.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

● ***How does the reference benchmark differ from a broad market index?***

N/A

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

● ***How did this financial product perform compared with the reference benchmark?***

N/A

● ***How did this financial product perform compared with the broad market index?***

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Quality Dividend Growth Fund

Legal entity identifier: 213800J8SZF5T21OWQ46

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: %</p>	<p><input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics: and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes better carbon outcomes (i.e. maintaining a carbon profile lower than the Sub-Fund's benchmark) by making investments in companies that meet the standards of the Investment Manager's proprietary sustainability assessments and by excluding investments in certain sectors or business areas (deemed incompatible with a net zero future).

Given the Investment Manager’s consistent focus on high-quality, capital-light sustainable businesses, with zero exposure to heavily capital intensive, high-emission sectors such as energy, utilities and resources, the Sub-Fund’s carbon profile remains far better relative to the broader market. As such, the environmental characteristics promoted by this product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2023	78.2	379.8	-79%
		2022	88.1	442.1	-80%

The Sub-Fund maintained a carbon profile that is 79% lower than the broader market. The biggest contributors to the increase in absolute emissions at the Sub-Fund level (in line with the benchmark) were Samsung Electronics, Taiwan Semiconductor Manufacturing Company and Microsoft.

The 5 largest contributors to the Sub-Funds carbon profile were, in order of magnitude (position sizes are shown in brackets):

- Samsung Electronics (2.36%)
- Siemens Healthineers (3.54%)
- Kone (2.91%)
- Reckitt Benckiser (2.53%)
- Nike (2.94%)

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

There has been no material change in the Sub-Fund’s carbon profile versus the benchmark this year compared to last year. The biggest contributors to the increase in absolute emissions at the sub-fund level (in line with the benchmark) were very similar, with the only change being Microsoft – an existing holding in both periods – replacing Unilever. Similarly, the largest 5 contributors to the Sub-Fund’s carbon profile were the same compared to the previous period bar for Nike, which was held in both periods and which replaced Unilever over 2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis of an individual company, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI indicator	Metric	Year	Value	Commentary
GHG emissions	Scope 1, 2, & 3 GHG Emissions Contribution (EVIC) tCO2e	2023	28,874.9	Siemens Healthineers was the largest contributor to the Sub-Fund’s GHG emissions and carbon footprint. This was deemed not to be a material negative impact. Environmental concerns for Siemens Healthineers are low and the company have introduced emissions targets, committing to reduce Scope 1 and 2 emissions by 90% and Scope 3 by 28% by FY2030 and 90% by FY2050. The former target is SBTi-validated, whereas they are in the process of getting the latter validated.
Carbon footprint	Scope 1, 2, & 3 Carbon Footprint Contribution tCO2e/m € invested	2023	83.5	
GHG intensity	Scope 1, 2, & 3 GHG intensity of investee companies tCO2e/m € revenue	2023	380.7	ASML was the largest contributor to the Sub-Fund’s GHG intensity. Considering the sector, this was deemed not to be a material negative impact and in line with expectations.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principle adverse impacts:

- Exposure to companies active in the fossil fuel sector

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Where material adverse impacts are identified, the Investment Manager will engage directly with company management or sovereign stakeholders and/or exercise proxy voting rights in an effort to catalyse change.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023

Largest investments	Sector	% Assets	Country
Microsoft Corp	Information Technology	8.6	United States
Visa Inc	Financials	7.0	United States
Asml Holding Nv	Information Technology	5.4	Netherlands
Accenture Plc	Information Technology	4.5	United States
Philip Morris International In	Consumer Staples	4.4	United States
Netease Inc	Communication Services	4.4	China
Broadridge Financial Solutions	Industrials	4.3	United States
Automatic Data Processing Inc	Industrials	4.2	United States
Siemens Healthineers Ag	Health Care	3.5	Germany
Nike Inc	Consumer Discretionary	3.0	United States
Kone Oyj	Industrials	2.9	Finland
Starbucks Corp	Consumer Discretionary	2.8	United States
Reckitt Benckiser Group Plc	Consumer Staples	2.7	United Kingdom
Novartis Ag	Health Care	2.7	Switzerland
Johnson & Johnson	Health Care	2.7	United States

What was the proportion of sustainability-related investments?

● What was the asset allocation?

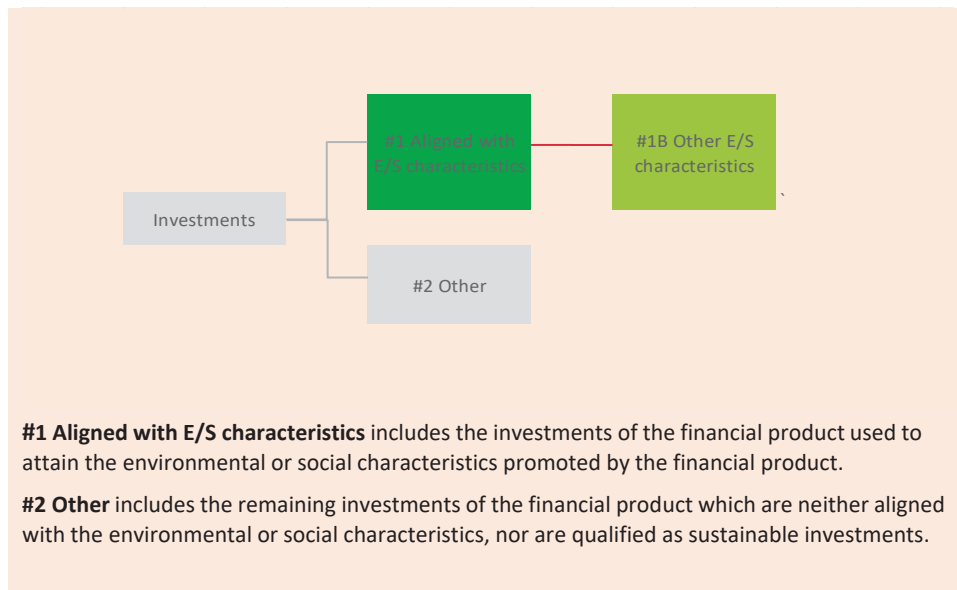

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	97.6
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	2.4
#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	97.6

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● ***In which economic sectors were the investments made?***

Communication Services; Consumer Discretionary; Consumer Staples; Financials; Health Care; Industrials; Information Technology; Real Estate.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?***

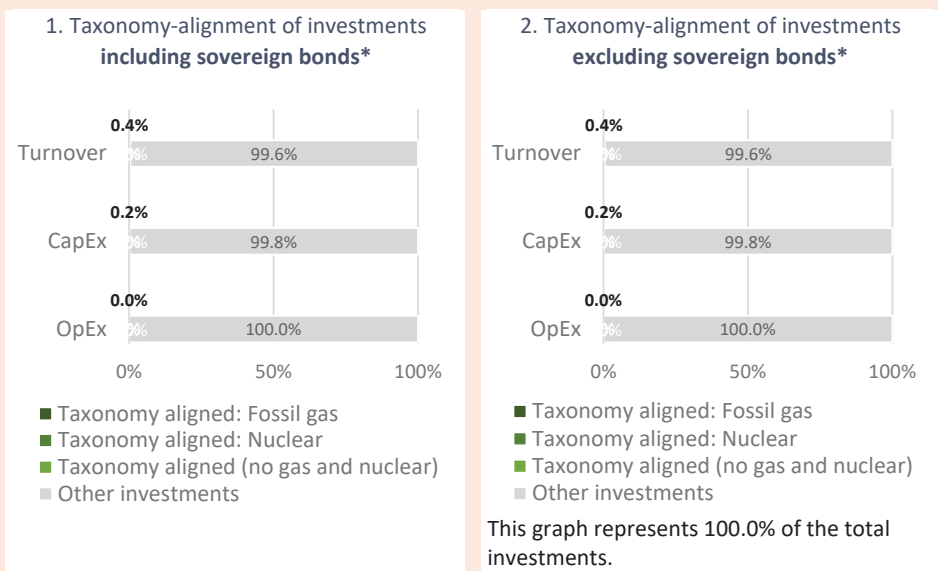

- Yes:
- in fossil gas in nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.4
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.4

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been a minor increase in the percentage of investments that are aligned with the EU Taxonomy versus the previous period, with Kone qualifying as being aligned to enabling activities by revenue.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund, such as:

- equities that are considered not aligned with E/S characteristics;
and
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments;

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

Carbon analysis is fully integrated into the Investment Manager’s research process and ongoing monitoring of underlying holdings. The Investment Manager actively uses a proprietary Climate Strategy Assessment for all existing holdings, as well as new ideas, which evaluates companies across fifteen criteria, including: net zero commitments, short- and long-term quantitative targets for reducing emissions and whether these are SBTi certified, CDP disclosure, executive remuneration linked to climate change performance, and the appointment of a board member or committee with responsibility for the company’s climate change strategy.

The output of this analysis helps the Investment Manager prioritise engagement with those companies identified as having little or no carbon emissions disclosure, and/or do not yet have credible net zero targets and transition pathways in place that are aligned with the Paris

Agreement. During the period, the Investment Manager proactively engaged with the lowest scoring companies, according to its proprietary Climate Strategy Assessment. Whilst acknowledging that many of these holdings do not have inherently carbon intensive business models, the Investment Manager has continued to monitor and engage Sub-Fund companies to take the lead on decarbonisation and implement further steps towards climate change.

In addition, over the last 12 months, the Investment Manager has developed a toolkit on unbundled Renewable Energy Certificates and carbon offsets to support engagement efforts further, in particular with the highest scoring companies on the Climate Strategy Assessment. Given their size and geographical location, many of the highest scoring holdings are in a prime position to take the lead on these aspects of decarbonisation, hence the Investment Manager initiating engagement on these issues.

During the reporting period (12 months to 31 December 2023), the investment team engaged with 10 of the Sub-Fund companies on climate change.

Examples of positive steps subsequent to engagement include:

Company	Sector	Outcome
Samsung Electronics	Information Technology	They confirmed that they have set internal interim targets for Scope 1 & 2 emissions reduction by 2030, including for the Semiconductor division, which makes up the bulk of their Scope 1 & 2 emissions. They have also set internal interim targets for Scope 3 emissions for their Device Experience division and are in the process of restating their Scope 3 emissions, including for their Semiconductor division, to allow for target setting.
Taiwan Semiconductor Manufacturing Company (TSMC)	Information Technology	As a member of RE100, they have a target of 100% renewable energy by 2040 and given their Net Zero target by 2050, they confirmed that they continue to work with the Taiwanese government, Taipower, and renewable energy suppliers to increase renewable energy supply in Taiwan.
Automatic Data Processing (ADP)	Information Technology	They have been rightsizing their real estate footprint and moving into more energy efficient/greener facilities to reduce their GHG Scope 1 & 2 emissions by 25.2% by 2025 (versus a 2019 baseline). They have also expanded their Scope 3 emissions reporting to now include six rather than four categories, making these the most applicable scope 3 categories for ADP.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

How does the reference benchmark differ from a broad market index?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Quality Equity Fund

Legal entity identifier: 2138006WDR4Z341GGA33

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: %</p>	<p><input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics: and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes better carbon outcomes (i.e. maintaining a carbon profile lower than the Sub-Fund's benchmark) by making investments in companies that meet the standards of the Investment Manager's proprietary sustainability assessments and by excluding investments in certain sectors or business areas (deemed incompatible with a net zero future).

Given the Investment Manager’s consistent focus on high-quality, capital-light sustainable businesses, with zero exposure to heavily capital intensive, high-emission sectors such as energy, utilities and resources, the Sub-Fund’s carbon profile remains far better relative to the broader market. As such, the environmental characteristics promoted by this product have been met

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Year	Fund	Benchmark	Fund carbon profile vs benchmark
Carbon profile	Tons of CO2e / US\$m invested	2023	67.0	379.8	-82%
		2022	86.0	442.1	-81%

The Sub-Fund maintained a carbon profile that is 82% lower than the broader market. The biggest contributors to the increase in absolute emissions at the sub-fund level (in line with the benchmark) were Samsung Electronics, Nestle, and Taiwan Semiconductor Manufacturing Company

The 5 largest contributors to the Sub-Funds carbon profile were, in order of magnitude (position sizes are shown in brackets)

- Samsung Electronics (2.08%)
- Nestle (4.38%)
- Siemens Healthineers (0.05%)
- St James’s Place (1.22%)
- Reckitt Benckiser (0.07%)

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

There has been no material change in the Sub-Fund’s carbon profile versus the benchmark this year compared to last year. The biggest contributors to the increase in absolute emissions at the sub-fund level (in line with the benchmark) were the same as the previous period’s. Similarly, the largest 5 contributors to the Sub-Fund’s carbon profile were the same as during the previous period, except for Reckitt Benckiser which replaced Beiersdorf (both holdings were held in both periods).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the in-depth fundamental analysis of an individual company, the following principal adverse impacts have been considered as part of the Sub-Fund’s investments:

PAI indicator	Metric	Year	Value	Commentary
GHG emissions	Scope 1, 2 & 3 GHG Emissions Contribution (EVIC) tCO2e	2023	87,412.6	Nestle was the largest contributor to the Sub-Fund’s GHG emissions and carbon footprint. This was deemed not to be a material negative impact, as Nestle has made significant climate-related commitments, including SBTi-validated decarbonisation targets, including reducing GHG emissions by 50% by 2030.
Carbon footprint	Scope 1, 2 & 3 Carbon Footprint Contribution tCO2e/m € invested	2023	74.3	
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO2e/m € revenue	2023	517.0	St James’s Place (SJP) was the largest contributor to the Sub-Fund’s GHG intensity. This was deemed not to be a material negative impact, as St James’s Place are a capital light business, with the majority of its GHG intensity driven by scope 3 emissions rather than direct scope 1 or 2 emissions. Equally, SJP have committed to achieving net zero in their investments by 2050.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

In addition, the Sub-Fund has not invested in companies in relation to the following principle adverse impacts:

- Exposure to companies active in the fossil fuel sector
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Where material adverse impacts are identified, the Investment Manager will engage directly with company management or sovereign stakeholders and/or exercise proxy voting rights in an effort to catalyse change.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023

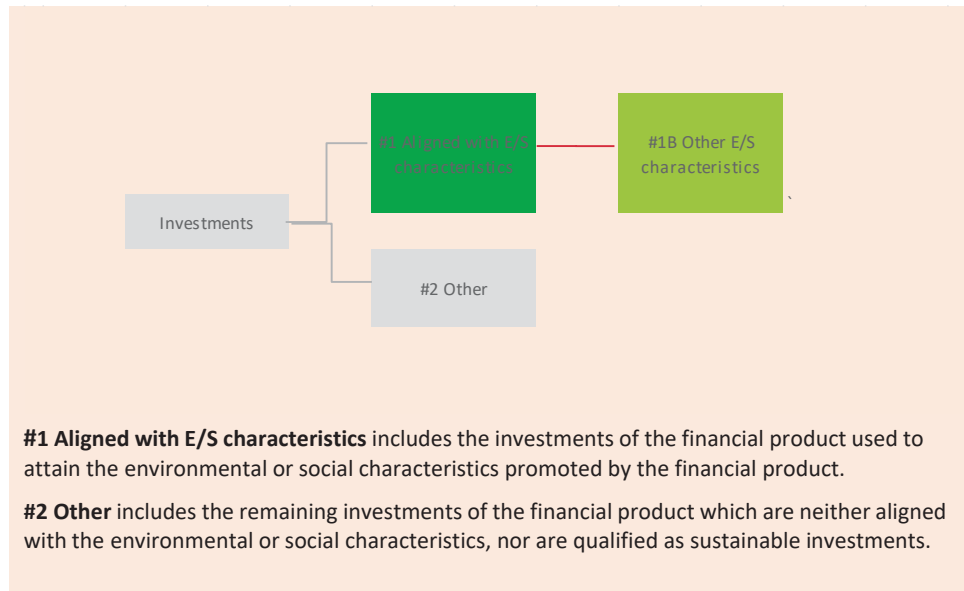

Largest investments	Sector	% Assets	Country
Visa Inc	Financials	9.5	United States
Microsoft Corp	Information Technology	7.2	United States
Asml Holding Nv	Information Technology	6.6	Netherlands
Booking Holdings Inc	Consumer Discretionary	6.2	United States
Nestle Sa	Consumer Staples	4.8	Switzerland
Moody's Corp	Financials	4.8	United States
Verisign Inc	Information Technology	4.6	United States
Intuit Inc	Information Technology	4.5	United States
Philip Morris International In	Consumer Staples	4.3	United States
Beiersdorf Ag	Consumer Staples	4.0	Germany
Johnson & Johnson	Health Care	3.8	United States
Factset Research Systems Inc	Financials	3.5	United States
Icon Plc	Health Care	3.3	Ireland
Autodesk Inc	Information Technology	3.3	United States
Check Point Software Technolog	Information Technology	3.2	Israel

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	97.8
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	2.2
#1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	97.8

● In which economic sectors were the investments made?

Communication Services; Consumer Discretionary; Consumer Staples; Financials; Health Care; Industrials; Information Technology.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

- Yes:
- in fossil gas in nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.0
Climate change adaptation	0.0

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been no change in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund, such as:

- equities that are considered not aligned with E/S characteristics;
- and
- cash held for liquidity purposes as an ancillary asset, deposits and money market instruments;

No minimum environmental or social safeguards are applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager’s approach to engagement is available on its website:

www.ninetyone.com/sustainability

Carbon analysis is fully integrated into the Investment Manager’s research process and ongoing monitoring of underlying holdings. The Investment Manager actively uses a proprietary Climate Strategy Assessment for all existing holdings, as well as new ideas, which evaluates companies across fifteen criteria, including: net zero commitments, short- and long-term quantitative targets for reducing emissions and whether these are SBTi certified, CDP disclosure, executive remuneration linked to climate change performance, and the appointment of a board member or committee with responsibility for the company’s climate change strategy.

The output of this analysis helps the Investment Manager prioritise engagement with those companies identified as having little or no carbon emissions disclosure, and/or do not yet have credible net zero targets and transition pathways in place that are aligned with the Paris Agreement. During the period, the Investment Manager proactively engaged with the lowest scoring companies, according to its proprietary Climate Strategy Assessment. Whilst acknowledging that many of these holdings do not have inherently carbon intensive business models, the Investment Manager has continued to monitor and engage Sub-Fund companies to take the lead on decarbonisation and implement further steps towards climate change.

In addition, over the last 12 months, the Investment Manager has developed a toolkit on unbundled Renewable Energy Certificates and carbon offsets to support engagement efforts further, in particular with the highest scoring companies on the Climate Strategy Assessment. Given their size and geographical location, many of the highest scoring holdings are in a prime position to take the lead on these aspects of decarbonisation, hence the Investment Manager initiating engagement on these issues.

During the reporting period (12 months to 31 December 2023), the investment team engaged with 10 of the Sub-Fund companies on climate change.

Examples of positive steps subsequent to engagement include:

Company	Sector	Outcome
Samsung Electronics	Information Technology	They confirmed that they have set internal interim targets for Scope 1 & 2 emissions reduction by 2030, including for the Semiconductor division, which makes up the bulk of their Scope 1 & 2 emissions. They have also set internal interim targets for Scope 3 emissions for their Device Experience division and are in the process of restating their Scope 3 emissions, including for their Semiconductor division, to allow for target setting.
FactSet Research	Financials	They have made significant progress in monitoring and disclosing their GHG scope 1 & 2 emissions and are currently developing their first scope 3 inventory. Additionally, they are conducting a climate risk assessment in line with TCFD recommendations, which will inform the development of their climate transition plan, emissions reduction strategies, and ultimately, our SBTi target, which ought to be verified in 2024.
Electronic Arts	Communication Services	They have disclosed Scope 1 and 2 emissions for the first time as well as some Scope 3 emissions, with FY2023 being the baseline for their decarbonisation efforts. They are also currently evaluating whether to disclose to CDP.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Sustainable Equity Fund

Legal entity identifier: 213800C7HX6C1SFXEZ41

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : %	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics : and while it did not have as its objective a sustainable investment, it had a proportion of <u>98.9%</u> of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in companies that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding direct investments in certain business groups or activities.

The Investment Manager uses a proprietary sustainability framework to analyse the material harmful and/or beneficial effects that a company has on society or the environment.

In accordance with the proprietary sustainability framework, the Investment Manager has appraised that all of the companies owned within the Sub-Fund are deemed to promote environmental and social characteristics. As such, the environmental and/or social characteristics promoted by this product have been met.

● **How did the sustainability indicators perform?**

Direct equity investments

Indicator	Metric	Year*	Value	Commentary
Scope 1, 2 & 3 carbon footprint	in tonnes of CO2e per US\$m invested	2023	92.7	Over time, we expect to see carbon emissions measures reduce for the Sub-Fund. The carbon footprint is lower than MSCI ACWI. There are three companies – NextEra Energy, Carlisle Companies and Schneider Electric - that in aggregate contribute to more than half of the carbon emissions measures. These companies are at the forefront of decarbonisation with NextEra a leading renewable energy provider, Carlisle providing commercial roofing systems that deliver energy efficiency improvements, and Schneider Electric a leader in energy management products and solutions.
Scope 1, 2 & 3 – weighted average carbon intensity	in tonnes of CO2e per US\$m or revenue	2023	439.6	
Proportion of companies in the portfolio which disclose carbon emissions figures	%	2023	Scope 1 & 2 = 100.0% All Scope 3 categories = 65.4%	Over time, the Investment Manager has seen improvement in portfolio companies' reporting of carbon data and will continue to engage with companies to improve Scope 1 & 2, and all Scope 3 categories' disclosure.
Percentage of direct equity holdings with credible net zero plans in place**	%	2023	42.3%	There has been growth in the adoption of SBTi approved net zero plans. The Investment Manager will continue to engage with all companies to set and deliver credible net zero plans.
Percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria	% of equity	2023	0.0%	There is no exposure to companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

*The above carbon disclosure is based on data from companies as at the end of financial year 2021 where available. This data has been applied to portfolio position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

**For the purposes of this reporting, “companies with credible net zero plans” are defined as those companies with plans approved by the Science-Based Target initiative (“SBTi”). This is therefore a conservative assessment as the portfolio additionally includes companies with net zero plans that are not yet SBTi approved.

See the question below on ‘What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives’ for information on:

- Carbon avoided – footprint
- Percentage of direct equity holdings contributing to financial inclusion, digital inclusion, access to education, healthcare impact and climate adaption.

● ***...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]***

Over 2023, the Sub-Fund saw a reduction in the carbon emissions measures. This is a function of a combination of positive progress by individual companies held in the Sub-Fund as well as changes in the asset allocation between these companies.

Over 2023, the Sub-Fund saw an increase in the proportion of companies disclosing Scope 1 and 2, and All Scope 3 carbon emissions figures. This is a function of increased disclosure from existing companies, and the addition of new companies that report these measures. We will continue to engage with companies to improve reporting of carbon data, particularly relating to all Scope 3 categories’ disclosure.

Over 2023, the Sub-Fund saw an increase in in the proportion of companies with credible net zero plans in place. This is a result of the new addition of companies with credible net zero plans in place as well as the increased adoption of SBTi approved net zero plans in existing companies within the Sub-Fund. We will continue to engage with all our companies to set and deliver credible net zero plans.

We have continued to hold zero percentage of companies invested in the business groups or activities prohibited under the Sub-Fund’s exclusions criteria.

As per the information provided below relating to ‘What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives’:

- the carbon avoided for the Sub-Fund increased over the period due to a combination of new companies being added that have positive carbon avoided as well as increases in the carbon avoided from existing companies
- the percentage of direct equity holdings contributing to financial inclusion increased over the period.
- Note that the percentage of direct equity holdings relating to digital inclusion, access to education, healthcare impact and climate adaption measures are a new set of sustainability indicators compared to the last period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund focuses on sustainable investments with environmental and/or social objectives.

To do this, currently, the Sub-Fund intends to make sustainable investments in companies believed by the Investment Manager to contribute to:

- positive environmental change through sustainable decarbonisation (the process of reducing carbon dioxide emissions). The Sub-Fund currently uses ‘carbon avoided’ as an indicator to assess, measure and monitor the carbon impact associated with a company
- supporting and improving socio-economic resilience and outcomes by facilitating financial inclusion (i.e., access to useful and affordable financial products and services that meet the needs of underserved individuals and businesses delivered in a responsible manner).
- digital inclusion by providing access to products and/or services that support digital take-up and infrastructure expansion.
- access to education by providing access to high quality educational and training products and/or services for underserved groups.
- Healthcare impact by providing access to products and/or services that facilitate access to healthcare in underserved or underperforming markets.
- climate adaptation through products and/or services which mitigate against the impacts of climate change, driven by longer-term shifts in climate patterns and/or acute event-driven climate risks.

Following the Investment Manager’s assessment, the investments that meet one of the above mentioned environmental and/or social objectives and pass the Do No Significant Harm test are considered sustainable investments in their entirety (i.e. the whole company is a sustainable investment).

Indicator	Metric	Year	Value	Commentary
Carbon avoided – footprint	in tonnes per CO2e per US\$m invested	2023	206.2	Nine companies (out of 26) in the portfolio produced positive carbon avoided.
Percentage of direct equity holdings contributing to financial inclusion	% equity	2023	23.1%	Six companies (out of 26) in the portfolio facilitate financial inclusion.
Percentage of direct equity holdings contributing to digital inclusion	% equity	2023	3.8%	One company (out of 26) in the portfolio facilitates access to digital inclusion.
Percentage of direct equity holdings contributing to access to education	% equity	2023	3.8%	One company (out of 26) in the portfolio facilitates access to education.
Percentage of direct equity holdings	% equity	2023	23.1%	Six companies (out of 26) in the portfolio facilitate healthcare impact.

contributing to healthcare impact				
Percentage of direct equity holdings contributing to climate adaptation	% equity	2023	11.5%	Three companies (out of 26) in the portfolio facilitate climate adaptation.

A note on 'carbon avoided'

'Carbon avoided' are the carbon emissions avoided by using a product or service that has less carbon emissions than the status quo thereby contributing to decarbonisation. The carbon avoided in aggregate at the Sub-Fund level can change due to the overall allocation to companies that generate carbon avoided, and the mix of companies within the Sub-Fund.

The above carbon avoided disclosure is based on data from companies as at the end of financial year 2021. This data has been applied to portfolio position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager uses a proprietary sustainability framework to analyse the material harmful effects that a company has on society or the environment.

The Investment Manager's sustainability framework helps to identify business groups and activities (in some cases subject to specific revenue thresholds) in which the Investment Manager will not invest, typically because after applying the sustainability framework it is evident that the harmful effects of the business group or activity outweigh the beneficial effects.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager assesses sustainable investments in relation to the 14 mandatory principal adverse impacts to determine that the investment does not cause significant harm to other sustainable investment objectives.

The investment process allows the Investment Manager to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

As part of the in-depth fundamental analysis on an individual company, the mandatory principal adverse impacts are considered for the Sub-Fund's intended sustainable investments.

The Investment Manager draws on quantitative data, where available, and combines this with a qualitative assessment.

Where material adverse impacts are identified, the Investment Manager may engage directly with company management and/or exercise proxy voting rights in an effort to catalyse change or promote improvement in a given metric.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and UN Guiding Principles including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental

Principles and Rights at Work and the International Bill of Human Rights are considered as part of the application of the Investment Manager’s sustainability framework and assessment of material negative externalities. Based on this analysis, the Investment Manager deems whether sustainable investments are aligned with these considerations. Third party data from providers whose methodologies are consistent with international norms represented in numerous widely accepted global conventions including those mentioned above, complements the identification of these considerations.

In addition, the Sub-Fund did not invest in companies the Investment Manager deemed to be in violation of the UN Global Compact principles.

There have been no significant breaches or flags on these international principles and guidelines for the period in review.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The investment process implemented by the Investment Manager allows it to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

PAI Indicator	Metric	Year*	Value	Commentary
GHG Emissions	Scope 1, 2 and 3 GHG Emissions Contribution (EVIC) tCO2e	2023	953.6	These values have been scaled up so that corporate exposure represents the fund’s total value. There are three companies – NextEra Energy, Carlisle Companies and Schneider Electric - that in aggregate contribute to more than half of these measures. These companies are at the forefront of decarbonisation with NextEra a leading renewable energy provider, Carlisle providing commercial roofing systems that deliver energy efficiency improvements, and Schneider Electric a leader in energy management products and solutions. Exposure to these companies is deemed not to result in material negative impacts.
Carbon Footprint	Scope 1, 2 and 3 Carbon Footprint Contribution (EVIC) tCO2e/m € invested	2023	83.6	
GHG Intensity	Scope 1, 2 and 3 GHG intensity of investee companies tCO2e/m € revenue	2023	505.8	

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Exposure to companies active in the fossil fuel sector	%	2023	3.8%	One company (out of 26) – NextEra Energy – has exposure to the fossil fuel sector. This exposure mainly relates to legacy business. This company is at the forefront of decarbonisation through renewable energy. Exposure to this company is deemed not to result in material negative impacts.
Board Gender Diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	2023	33.1%	Board gender diversity will continue to be an important topic for engagement, particularly within emerging markets. These results are consistent with expectations, and deemed not to result in material negative impacts.

*The above carbon disclosure is based on data from companies as at the end of financial year 2021 where available. This data has been applied to portfolio position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

What were the top investments of this financial product?

Schneider Electric Se	Industrials	3.2	France
-----------------------	-------------	-----	--------

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	98.9
#1A Sustainable investments within the meaning of Article 2(17) SFDR	98.9
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	0.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	1.1

Sustainable Investments (#1A) Breakdown	% of Total Sub-Fund Value*	% of Sustainable Investments
Taxonomy-aligned investments, weighted by Taxonomy-aligned revenue**	4.6	4.6
Investments with an environmental objective but not aligned with the Taxonomy	26.9	27.2
Investments with a social objective	67.5	68.2

*Includes Taxonomy-aligned revenue from all securities, including those not classified as sustainable investments within the meaning of Article 2(17) SFDR.

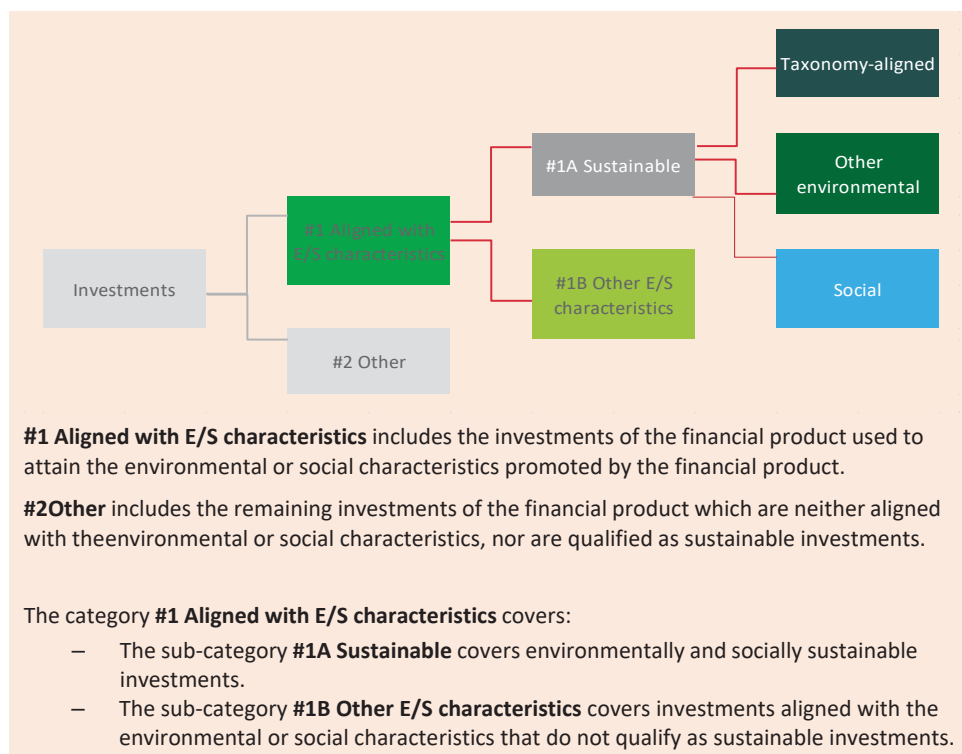

**Underlying entity revenue that can be matched to eligible economic activities as defined under the Commission Delegated Regulation (EU) 2022/1214 meeting all requirements to be deemed Taxonomy aligned.

Asset allocation
describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Communication Services; Consumer Discretionary; Financials; Health Care; Industrials; Information Technology; Materials; Utilities.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

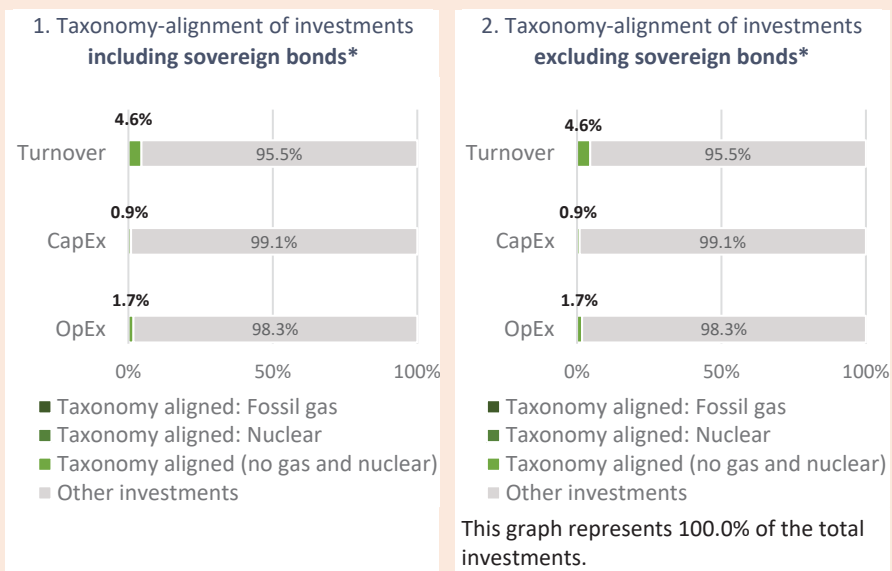

- Yes:
- in fossil gas in nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives
 - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the “greenness” of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	4.6
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	% of Sustainable Investments
Transitional activities	0.0	0.0
Enabling activities	2.3	2.3

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy increased in 2023 relative to the previous reference period. This is a function of an increase in reported data (given the Taxonomy-alignment figure is determined using vendor data which only includes

alignment based on reported data), changes in the asset allocation between companies and the addition of a new company that reports a proportion of alignment.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

	% of Total Sub-Fund Value	% of Sustainable Investments
Investments with an environmental objective but not aligned with the Taxonomy (i.e., Other Environmental), weighted by non-Taxonomy aligned revenue	26.9	27.2

Currently the coverage of the EU Taxonomy Regulation does not include certain sectors and economic activities within the Sub-Fund's investment strategy. Therefore, investments by the Sub-Fund in these sectors and activities cannot qualify as environmentally sustainable for the purposes of Article 3 of the EU Taxonomy. The Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data, therefore this may represent a more conservative figure.

The aforementioned investments have not been subject to an assurance by an auditor or a third party.

What was the share of socially sustainable investments?

	% of Total Sub-Fund Value	% of Sustainable Investments
Investments with a social objective	67.5	68.2

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

'#2 Other' includes (1) investments previously '#1 aligned with E/S characteristics' which are under the Investment Manager's review due to an unforeseen event (e.g. a controversy); and (2) investments that support the financial objective and other management activities of the Sub-Fund, such as:

- Cash held for liquidity purposes as an ancillary asset and overnight deposits;

No minimum environmental or social safeguards are applied to investments held for liquidity purposes (e.g. Cash or deposits). These investments are not expected to affect the delivery of the sustainable investment objective on a continuous basis as they do not form a material part of the Sub-Fund's portfolio.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it

invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

In accordance with the proprietary sustainability framework, the Investment Manager has appraised that all of the companies owned within the Sub-Fund are deemed to promote environmental and social characteristics. As such, the environmental and/or social characteristics promoted by this product have been met.

Over the period, the Investment Manager has engaged with companies on a broad range of topics including climate change, corporate governance, employee engagement and diversity and inclusion. For example, it engaged with KLA Corp on increasing carbon disclosure (including carbon avoided). The Investment Manager engaged with Waste Management, the largest waste-collection and processing company in the US, on its aims to increase female representation on their Board and to increase the representation of ethnic minority employees at manager level and above. Finally, it wrote to companies in the portfolio regarding their employee engagement based on the Investment Manager's view that a firm with engaged employees is likely to see greater ability to capture growth opportunities, resilience in tough times, and longevity with greater talent retention.

The Investment Manager has voted all proxies.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Latin American Equity Fund

Legal entity identifier: 213800L5S3HWPA12AY26

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : %	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics : and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental characteristics through targeting improved greenhouse gas (GHG) emission data disclosure and a commitment to credible net-zero transition plans from the companies held by the Sub-Fund that are considered high-intensity GHG emitters*, as well as investing in companies that are not considered high-intensity GHG emitters, and excluding investments in certain sectors or business areas.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Sub-Fund has complied with these standards and has therefore met the environmental and social characteristics promoted. None of the high GHG emitters within our Sub-Fund failed our disclosure and alignment standards. For details regarding these standards, please view the table below. In addition, during the 2023 reporting period, the Sub-Investment Manager undertook 63 engagements with high GHG emitters.

* The Sub-Investment Manager considers high-intensity GHG emitters as companies that emit the equivalent of 1,000 CO2 tonnes per USD mm of annual revenues or more, or companies that are in one of the following industry sectors: Construction Materials, Oil & Gas, Steel, Aviation, Power Generation. This definition is going to be revised by the Sub-Investment Manager on an annual basis.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
Proportion of companies in the Sub-Fund that are considered high-intensity GHG emitters and disclose GHG emissions data in line with an internationally recognised standard	%	2023	38.2	13 out of 34 companies in the Sub-Fund are high-intensity emitters. All 13 out of 13 companies in the Sub-Fund that are considered high-intensity GHG emitters disclose GHG emissions data in line with an internationally recognised standard.
Proportion of companies held in the Sub-Fund that are considered high-intensity GHG emitters and are committed to achieving net zero before 2050	%	2023	23.5	8 out of 13 companies in the Sub-Fund that are considered high-intensity GHG emitters are committed to reducing emissions in order to achieve net zero by 2050.
Proportion of companies held in the Sub-Fund that are considered high-intensity GHG emitters and are committed to a net-zero implementation plan that is verified by an internationally recognised third-party	%	2023	8.8	3 out of 13 companies in the Sub-Fund that are considered high-intensity GHG emitters are committed to a net-zero implementation plan that is in alignment with an internationally recognised third party, namely SBTi.
Proportion of companies held in the Sub-Fund that are considered high-intensity GHG emitters and adhere to their credible net zero implementation plans, disclosing investments and management actions aligned with the plan and/or GHG emissions data, on at least an annual basis	%	2023	Data not available yet	It is too soon to assess the adherence of companies to report on their credible net-zero implementation plans, disclosing investments and management actions aligned with the plan and/or GHG emissions data. We will be evaluating the companies' implementation plans on a year-on-year basis.

- ***...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]***

There has been no change in this regard when compared to the previous reference period.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following principle adverse impacts have been considered as part of the Sub-Fund's investments:

PAI Indicator	Metric	Year	Value	Commentary
GHG Emissions	Scope 1, 2 & 3 GHG Emissions Contribution (EVIC) tCO2e	2023	204,594.4	Compared with 4Q 2022, emissions decreased by 66.98% in 4Q 2023.
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO2e/m € invested	2023	1,142.4	Compared with 4Q 2022, emissions decreased by 73.36% in 4Q 2023.
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO2e/m € revenue	2023	2,392.4	Compared with 4Q 2022, emissions decreased by 59.67% in 4Q 2023.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

Where material adverse impacts are identified, the Sub-Investment Manager will engage directly with company management where it is believed that there is a significant chance of positively affecting the behaviour of a company and/or exercise proxy voting rights in an effort to catalyse change.

An assessment of the principal adverse impacts at the aggregate Sub-Fund level will be reported on an annual basis in the annual report as required by Article 11 SFDR.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	68.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	32.0
#1B Other E/S characteristics cover investments aligned with the environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	68.0

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

— **turnover** reflects the “greenness” of investee companies today.

— **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

— **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **In which economic sectors were the investments made?**

Communication Services; Consumer Discretionary; Consumer Staples; Energy; Financials; Health Care; Industrials; Information Technology; Materials; Real Estate; Utilities.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

- Yes:
- in fossil gas in nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.5
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.4
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been a minor change in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund does not currently commit to investing in sustainable investments within the meaning of Article 2(17) SFDR.

● **What was the share of socially sustainable investments?**

N/A

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

‘#2 Other’ is made of direct investment in high GHG emitters that are not yet aligned with E/S characteristics; and investments as described in the Sub-Fund’s investment policy, that support the financial objective and other management activities of the Sub-Fund, such as:

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- derivatives for hedging and/or Efficient Portfolio Management;
- Cash held for liquidity purposes as an ancillary asset, deposits and money market instruments;
- shares or units in other funds and exchange traded funds in which the Sub-Investment Manager does not have direct control of the underlying investments.

No minimum environmental or social safeguards are applied, however, good governance practices are applied to all direct investments. Such investments will not usually represent a material proportion of the Sub-Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Members of the investment team met regularly with management teams of high emitters throughout the year. During the reference period, the Firm met 63 times with the management teams of the listed high emitters, and discussed 29 ESG topics with them:

91 High Emitters	GHG Data	Net Zero Commitment	SBTi Aligned	#Meetings

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Latin American Corporate Debt Fund

Legal entity identifier: 213800W5RKKRQZ4LS820

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : %	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics : and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making most of its investment 90% in issuers that meet the standards of Compass Group’s proprietary sustainability framework, as measured by Compass’ internal ESG minimum score of 60.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
proportion of investments in borrowers with proprietary bottom-up ESG scores above 60	%	2023	93.2	Out of 82 total issuers for the strategy, 74 provided material ESG data. All 74 of these issuers obtained an ESG score of over 60, implying a proportion of 93.22% of the fund's total market cap or 90.2% of the total number of issuers in the fund.

● **...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]**

N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following principle adverse impacts have been considered as part of the Sub-Fund's investments:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year	Value	Commentary
GHG Emissions	Scope 1, 2 and 3 GHG Emissions Contribution (EVIC) tCO ₂ e	2023	681,619.7	Compared with 4Q 2022, emissions decreased by 5.84% in 4Q 2023.
Carbon Footprint	Scope 1, 2, and 3 Carbon Footprint Contribution (EVIC) tCO ₂ e/m € invested	2023	1,389.5	Compared with 4Q 2022, emissions increased by 28.94% in 4Q 2023.
GHG intensity	Scope 1, 2, and 3 GHG intensity of investee companies tCO ₂ e/m € revenue	2023	2,345.7	Compared with 4Q 2022, emissions increased by 8.97% in 4Q 2023.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

Where material adverse impacts are identified, the Investment Manager will engage directly with company management where it is believed that there is a significant chance of positively affecting the behaviour of a company and/or exercise proxy voting rights in an effort to catalyse change.

An assessment of the principal adverse impacts at the aggregate Sub-Fund level will be reported on an annual basis in the annual report as required by Article 11 SFDR.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

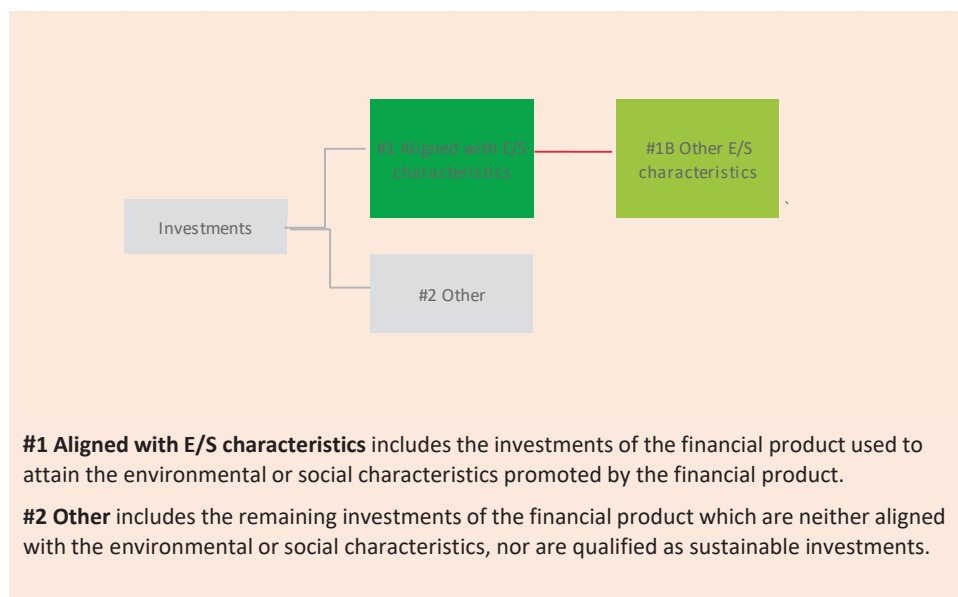

● What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	93.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	7.0
#1B Other E/S characteristics cover investments aligned with the environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	93.0

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● ***In which economic sectors were the investments made?***

Basic Materials; Communications; Consumer, Cyclical; Consumer, Non-cyclical; Energy; Financial; Government; Industrial; Utilities.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● ***Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?***

- Yes:
- in fossil gas in nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.3
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.3
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N /A

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to investing in sustainable investments within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ is made of direct investment in high GHG emitters that are not yet aligned with E/S characteristics; and investments as described in the Sub-Fund’s investment policy, that support the financial objective and other management activities of the Sub-Fund, such as:

- borrowers that are considered not aligned with E/S characteristics; and
- derivatives for hedging and/or Investment Purposes and/or Efficient Portfolio Management; and
- Cash held for liquidity purposes as an ancillary asset, deposits and money market instruments; and
- shares or units in other funds and exchange traded funds in which the Sub-Investment Manager does not have direct control of the underlying investments.

No minimum environmental or social safeguards are applied, however, good governance practices are applied to all direct investments. Such investments will not usually represent a material proportion of the Sub-Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The investment team has diligently worked on incorporating ESG considerations into the overwhelming majority of the Fund, successfully designating 93.22% of portfolio issuers with an appropriate score for the Firm's ESG rating.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

How does the reference benchmark differ from a broad market index?

N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Latin American Smaller Companies Fund

Legal entity identifier: 213800AZ67GL3I1NSK94

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : %	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics : and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental characteristics through targeting improved greenhouse gas (GHG) emission data disclosure and a commitment to credible net-zero transition plans from the companies held by the Sub-Fund that are considered high-intensity GHG emitters*, as well as by investing in companies that are not considered high-intensity GHG emitters, and excluding investments in certain sectors or business areas.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Sub-Fund has complied with these standards and has therefore met the environmental and social characteristics promoted. None of the high-GHG emitters within our Sub-Fund failed our disclosure and alignment standards. For details regarding these standards, please view the table below. In addition, during the 2023 reporting period, the Sub-Investment Manager undertook 31 engagements with high-GHG emitters.

* The Sub-Investment Manager considers high-intensity GHG emitters as companies that emit the equivalent of 1,000 CO2 tonnes per USD mm of annual revenues or more, or companies that are in one of the following industry sectors: Construction Materials, Oil & Gas, Steel, Aviation, and Power Generation. This definition is going to be revised by the Sub-Investment Manager on an annual basis.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year	Value	Commentary
Proportion of companies in the Sub-Fund that are considered high-intensity GHG emitters and disclose GHG emissions data in line with an internationally recognised standard	%	2023	38.2	6 out of 34 companies in the Sub-Fund are high-intensity emitters. All 6 out of 6 companies in the Sub-Fund that are considered high-intensity GHG emitters disclose GHG emissions data in line with an internationally recognised standard. Thus, 13 out of the 14 companies determined to be high-intensity emitters disclose data in accordance with an internationally recognised standard.
Proportion of companies held in the Sub-Fund that are considered high-intensity GHG emitters and are committed to achieving net zero before 2050	%	2023	22.6	4 out of 6 companies that were determined to be high-intensity emitters disclose data have plans to reduce emissions in order to achieve net zero by 2050. Thus, 7 out of 31 companies in the Sub-Fund are committed to reducing emissions in order to achieve net zero by 2050.
Proportion of companies held in the Sub-Fund that are considered high-intensity GHG emitters and are committed to a net zero implementation plan that is verified by an internationally recognised third-party	%	2023	5.9	2 out of the 6 companies that have plans to reduce emissions to net zero as explained above, do so in alignment with SBTi.

Proportion of companies held in the Sub-Fund that are considered high-intensity GHG emitters and adhere to their credible net zero implementation plans, disclosing investments and management actions aligned with the plan and/or GHG emissions data, on at least an annual basis	%	2023	Data not available yet	It is too soon to assess the adherence of companies to report on their credible net-zero implementation plans, disclosing investments and management actions aligned with the plan and/or GHG emissions data. We will be evaluating the companies' implementation plans on a year-on-year basis.
---	---	------	------------------------	---

- ***...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]***

There has been no change in this regard when compared to the previous reference period.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

N/A

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following principle adverse impacts have been considered as part of the Sub-Fund's investments:

PAI Indicator	Metric	Year	Value	Commentary
GHG Emissions	Scope 1, 2, and 3 GHG Emissions Contribution (EVIC) tCO2e	2023	34,313.0	Compared with 4Q 2022, emissions decreased by 55.38% in 4Q 2023.
Carbon Footprint	Scope 1, 2, and 3 Carbon Footprint Contribution (EVIC) tCO2e/m € invested	2023	876.9	Compared with 4Q 2022, emissions decreased by 82.60% in 4Q 2023.
GHG intensity	Scope 1, 2, and 3 GHG intensity of investee companies tCO2e/m € revenue	2023	1,470.0	Compared with 4Q 2022, emissions decreased by 51.17% in 4Q 2023.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

Carbon numbers are based on most recently reported underlying company figures, combined with MSCI modelled data and where neither are available an internally calculated sector average. Where portfolio coverage is below 100% figures are linearly scaled to eligible instruments.

Where material adverse impacts are identified, the Investment Manager will engage directly with company management where it is believed that there is a significant chance of positively affecting the behaviour of a company and/or exercise proxy voting rights in an effort to catalyse change.

An assessment of the principal adverse impacts at the aggregate Sub-Fund level will be reported on an annual basis in the annual report as required by Article 11 SFDR.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Banco Abc Brasil Sa	Financials	5.9	Brazil
Gcc Sab De Cv	Materials	5.7	Mexico
Vitru Ltd	Consumer Discretionary	5.3	Brazil
Vivara Participacoes Sa	Consumer Discretionary	4.9	Brazil
Prologis Property Mexico Sa De	Real Estate	4.6	Mexico

Intelbras Sa Industria De Tele	Information Technology	4.1	Brazil
La Comer Sab De Cv	Consumer Staples	3.7	Mexico
Corp Inmobiliaria Vesta Sab De	Real Estate	3.6	Mexico

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2023

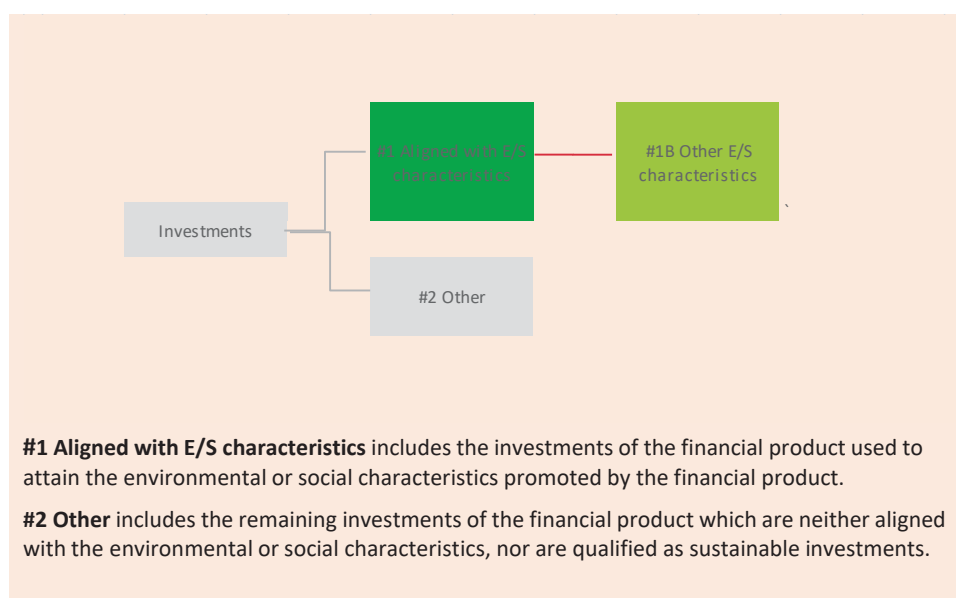

Embraer Sa	Industrials	3.5	Brazil
Track & Field Co Sa	Consumer Discretionary	3.1	Brazil
Arezzo Industria E Comercio Sa	Consumer Discretionary	3.0	Brazil
Bradespar Sa	Materials	2.8	Brazil
Embotelladora Andina Sa	Consumer Staples	2.8	Chile

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	96.0
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	4.0
#1B Other E/S characteristics cover investments aligned with the environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	96.0

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Consumer Discretionary; Consumer Staples; Energy; Financials; Health Care; Industrials; Information Technology; Materials; Real Estate; Utilities.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

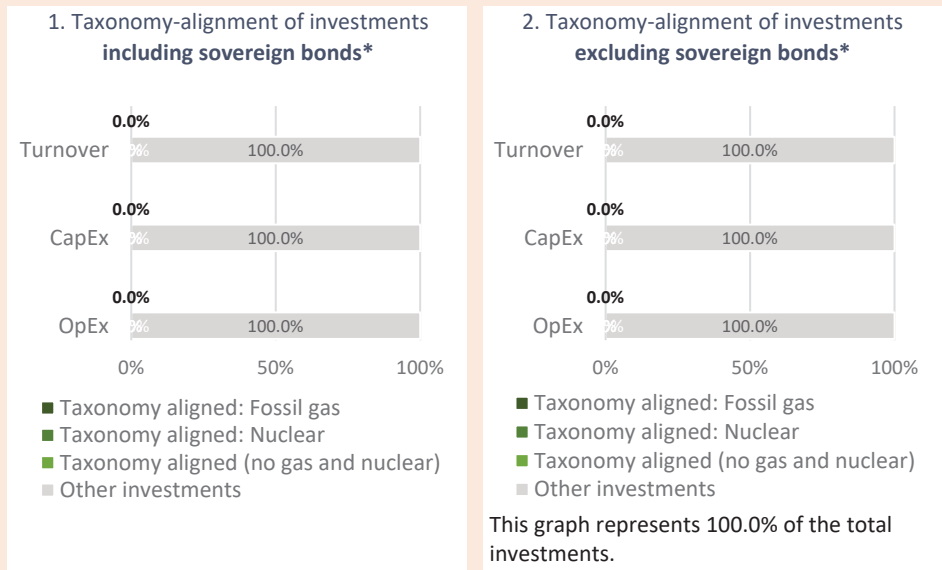

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

- Yes:
- in fossil gas in nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	0.0
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Transitional activities	0.0
Enabling activities	0.0

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

There has been no change in the percentage of investments that are aligned with the EU Taxonomy compared to last year.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to investing in sustainable investments within the meaning of Article 2(17) SFDR.

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Other’ is made of direct investment in high GHG emitters that are not yet aligned with E/S characteristics; and investments as described in the Sub-Fund’s investment policy, that support the financial objective and other management activities of the Sub-Fund, such as:

- derivatives for hedging and/or Efficient Portfolio Management;
- Cash held for liquidity purposes as an ancillary asset, deposits and money market instruments;
- shares or units in other funds and exchange traded funds in which the Sub-Investment Manager does not have direct control of the underlying investments.

No minimum environmental or social safeguards are applied, however, good governance practices are applied to all direct investments. Such investments will not usually represent a material proportion of the Sub-Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Members of the investment team met regularly with management teams of high emitters throughout the year. During the reference period, the Firm met 31 times with the management teams of the listed high emitters, and discussed 8 ESG topics with them.

91 High Emitters	GHG Data	Net Zero Commitment	SBTi Aligned	#Meetings
GCC SAB de CV	y	y	y	5
Metalurgica Gerdau SA	y	y	n	5
Energisa SA	y	n	n	4
Alupar Investimento SA	y	y	n	4
Enel Chile SA	y	y	y	13
3R Petroleum Oleo e Gas SA	y	n	n	0

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- **How does the reference benchmark differ from a broad market index?**
N/A
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
N/A
- **How did this financial product perform compared with the reference benchmark?**
N/A
- **How did this financial product perform compared with the broad market index?**
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Multi Asset Sustainable Growth Fund (EURO)

Legal entity identifier: 213800MUCC24QASMSQ32

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ___%

It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of 53.9% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in companies and countries that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain business groups and activities.

The Sub-Fund invests across various areas in which the Investment Manager sees opportunity to promote environmental/social characteristics, examples of these:

- environmental characteristics can include transition to net zero and climate change amongst others; and
- social characteristics can include digital infrastructure, healthcare and financial inclusion amongst others.

As at 31 December 2023 the Global Multi-Asset Sustainable Growth Euro Fund had less than the stated commitment of 90% (88.4%) of the assets held in the Sub-Fund deemed to promote environmental and social characteristics. This temporary drop was as a result of ensuring the Sub-Fund had sufficient liquidity to meet redemption requests, meaning that there was a higher proportion held in cash deposits (which are not deemed to promote environmental and social characteristics).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Direct equity investments (Note as at 31/12/2023 there were no directly owned corporate bonds in the Sub-Fund)

Indicator	Metric	Year*	Value	Commentary
Scope 1, 2 & 3 carbon footprint	in tonnes of CO2e per US\$m invested	2023	206.5	Trane Technologies dominates the Sub-Fund's footprint and intensity measures given its reported Scope 3 figure. It is a leader in efficient HVAC (heating, ventilation and air conditioning) products/solutions with aggressive carbon reduction targets approved by the Science Based Target Initiative ("SBTi"). A steel manufacturer (SSAB) is also a material contributor to these measures given the carbon intensive nature of its businesses. Its activities are important in enabling the energy transition with SSAB's carbon emission reduction plans Science Based Target Initiative ("SBTi") approved. Finally, In addition, a renewable energy/utilities provider (NextEra Energy) is also responsible for a large proportion of the intensity measure. This company is at the forefront of decarbonisation through renewable energy.
Scope 1, 2 & 3 – weighted average carbon intensity	in tonnes of CO2e per US\$m or revenue	2023	601.4	
Proportion of companies in the portfolio which disclose carbon emissions figures	%	2023	Scope 1 & 2 = 79.2% At least some Scope 3 categories = 35.4%	In general, the progress of emerging market companies in reporting carbon data is slower than developed market companies, which is reflected in this value. We will continue to engage with companies to improve Scope 1, 2 & 3 disclosure.
Percentage of direct equity holdings with credible net zero plans in place**	%	2023	41.7%	There has been growth in the adoption of SBTi approved net zero plans. The Investment Manager will continue to engage with all companies to set and deliver credible net zero plans.

Percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria	% of equity	2023	0.0%	There is no exposure to companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.
---	-------------	------	------	--

*The above carbon disclosure is based on data from companies where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

**For the purposes of this reporting, the Investment Manager has defined "companies with credible net zero plans" as those companies with plans approved by the Science-Based Target Initiative ("SBTi"). This is therefore a conservative assessment as the Sub-Fund additionally includes companies with net zero plans that are not yet SBTi approved.

See the question below on 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives' for information on:

- Carbon avoided – footprint
- Percentage of holdings, where applicable, contributing to the following environmental and/or social objectives:
- financial inclusion
- digital inclusion
- access to education
- healthcare impact
- climate adaption

Country investments

Country carbon emissions (Emissions intensity per GDP basis):

Country	Emissions intensity per GDP basis (tCO2e/million \$ GDP)*
Chile	196.60
Germany	177.09
New Zealand	334.66
South Africa	1515.54
United States	253.14

Source: ClimateWatch

*Given the complexities of calculating the emissions data for countries, there is a significant time lag. This data relates to 2020.

Qualitative commentary

Country carbon emissions on a per GDP basis with accompanying qualitative commentary:

Chile: Chile continues to make strong progress on climate action and its commitment to be carbon neutral by 2050 is credible. This commitment was enshrined in law in June 2022 through the Climate Change Framework legislation. If the country's coal phase-out and

renewable energy plans continue to be implemented, the government would establish Chile as a front-runner on climate action, putting emissions on a declining trend only slightly above a 1.5°C-compatible pathway. Alternative energy sources are emerging such as green hydrogen with the country signing a memorandum of understanding with the European Union in June 2023 to finance new projects. If successful Chile could become a key net exporter of green hydrogen.

Germany: Germany's installed energy capacity remains reliant on coal and gas (40% installed capacity); however it is increasingly building out its alternative renewable sources with onshore wind and Solar PV across residential, commercial utility scale providing over 25% of installed capacity each. The Ukraine war pushed the government to increase spending rapidly on renewables and reduce its reliance on Russian gas. The three-party coalition government has been in place since December 2021 and began by laying out clear climate measures in its initial coalition contract. If all implemented, Climate Action Tracker project that these policies and actions will lead to emission reductions of between 49-51% below 1990 levels by 2030 excluding LULUCF. While this falls short of Germany's 2030 target of at least a 65% reduction below 1990 levels, it does place notable restrictions on the energy sector (electricity and heat supply) and requires it limit its GHG emissions to 108 MtCO_{2e} by 2030, a target which is legislated in to law. Coal-fired power generation has halved over the past five years and is set to be phased out entirely by 2030 with the help of the renewable energy expansion. While further measures are likely required on the transport and building sectors in order for Germany to meet its promised 1.5C compliant path there has notable progress on the energy sector and policies are moving in the right direction.

New Zealand: New Zealand's Climate Change Response (Zero Carbon) Amendment Act 2019 sets out a framework to reduce GHG emissions to net zero by 2050 (except biogenic methane, which has a target of 24-47% below 2017 levels). The country has also established an independent Climate Change Commission to provide advice to government on the transition to a low emissions economy. The country is a success story for the development of renewable energy, including hydropower and geothermal energy, without government subsidies. The updated NDC in November 2021 strengthens the country's 2030 target.

South Africa: South Africa remains heavily reliant on coal, supplying approximately 80% of energy capacity, meaning emissions per GDP are very high. Efforts to reduce emissions have faced challenges from the extremely poor performance of existing power plants, which have been driven by corruption, mismanagement, politics and coal lobby/incentives. While IRP2019 plans to decommission 83% of the total coal power by 2050 and increase clean energy generation, government policy has recently gone against this as some old power stations are having their lives extended to maintain energy capacity. There are some encouraging signs however, including a meaningful pipeline of renewables, as well as President Ramaphosa's efforts to fix the energy situation by establishing a "Ministry of Electricity" under the presidency. This has additionally been supported by private households who have been moving away from reliance on Eskom through the build out of solar panels supported by government tax incentives.

US: The passage of the US\$700 billion Inflation Reduction Act (IRA) in 2022 marked a key milestone in US climate policy, sparking a notable clean investment drive and acceleration in both state and local action on climate solutions. This act forms a key part of the new US emissions policy which targets a c. 50% reduction in greenhouse gas pollution from 2005 levels by 2030. The outcome of the 2024 presidential election will be key for indicating the longevity of these climate commitments and is something that the Investment Manager is monitoring closely. The Federal system somewhat offsets the risks of a presidential change, giving the States' considerable power. According to the EIA, 31 states and the District of Columbia had renewable portfolio standards (RPS) or clean energy standards (CES). These policies require electricity suppliers to supply a set share of their electricity from designated renewable resources or carbon-free eligible technologies.

See the question below on 'sustainable investment objectives partially made by the product and how the sustainable investments contributed to those objectives?' for information on:

'Use of proceeds' for relevant green, social and sustainability bonds

● ***...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]***

Over 2023, the Sub-Fund saw a mild increase in the carbon emissions measures. This is a function of higher reported emissions from Trane Technologies, portfolio activity involving the purchase of SSAB, as well as changes in the asset allocation between companies in the portfolio.

Over 2023, the Sub-Fund saw an increase in the proportion of companies disclosing Scope 1, 2 and Scope 3 carbon emissions figures. This is a function of increased disclosure from existing companies, and the addition of new companies that report these measures. We will continue to engage with companies to improve reporting of carbon data, particularly relating to all Scope 3 categories' disclosure.

Over 2023, the Sub-Fund saw an increase in the proportion of companies with credible net zero plans in place. This is a result of the new addition of companies with credible net zero plans in place as well as the increased adoption of SBTi approved net zero plans in existing companies within the Sub-Fund. We will continue to engage with all our companies to set and deliver credible net zero plans.

We have continued to hold zero percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.

Noting the complexities of calculating the emissions data for countries and the resulting significant time lag which has meant that the data relates to 2020, the emissions on a per GDP basis slightly reduced for Chile, Germany, New Zealand and the US, and slightly increased for South Africa.

As per the information provided below relating to 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives':

- the carbon avoided for the Sub-Fund slightly increased over the period
- the percentage of direct equity holdings contributing to financial inclusion increased over the period.
- Note that the percentage of direct equity holdings relating to digital inclusion, access to education, healthcare impact and climate adaption measures are a new set of sustainability indicators compared to the last period.
- the percentage of 'Use of proceeds' for green, social and sustainability bonds increased slightly over the period.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund focuses on sustainable investments with environmental and/or social objectives.

To do this, currently, the Sub-Fund has made sustainable investments in companies believed by the Investment Manager to contribute to:

- Positive environmental change through sustainable decarbonisation (the process of reducing carbon-dioxide emissions). The Sub-Fund currently uses 'carbon avoided' as an indicator to assess, measure and monitor the carbon impact associated with a company.
- Supporting and improving socio-economic resilience and outcomes by facilitating financial inclusion (i.e., access to useful and affordable financial products and services that meet the needs of underserved individuals and businesses delivered in a responsible manner).
- digital inclusion by providing access to products and/or services that support digital take-up and infrastructure expansion.

- access to education by providing access to high quality educational and training products and/or services for underserved groups.
- healthcare impact by providing access to products and/or services that facilitate access to healthcare in underserved or underperforming markets.
- climate adaptation through products and/or services which mitigate against the impacts of climate change, driven by longer-term shifts in climate patterns and/or acute event-driven climate risks.

In addition, the Sub-Fund intends to make sustainable investments in debt instruments:

- issued by any borrower (e.g. companies or countries), whose proceeds are used to finance solutions that address environmental or social challenges, such as climate change (e.g. green bonds) or housing needs
- issued by Development Finance Institutions if the Investment Manager deems these to be sustainable investments.

Indicator	Metric	Year	Value	Commentary
Carbon avoided – footprint	in tonnes per CO2e per US\$m invested	2023	108.9	Twenty one companies (out of 48) in the portfolio produced positive carbon avoided.
Percentage of direct equity holdings contributing to financial inclusion	% equity	2023	10.4%	Five companies (out of 48) in the portfolio facilitate financial inclusion.
Percentage of direct equity holdings contributing to digital inclusion	% equity	2023	2.1%	One company (out of 48) in the portfolio facilitates digital inclusion.
Percentage of direct equity holdings contributing to access to education	% equity	2023	0.0%	There are currently no companies (out of 48) in the portfolio that facilitate access to education.
Percentage of direct equity holdings contributing to healthcare impact	% equity	2023	12.5%	Six companies (out of 48) in the portfolio facilitates healthcare impact.
Percentage of direct equity holdings contributing to climate adaptation	% equity	2023	2.1%	One company (out of 48) in the portfolio facilitates climate adaptation.

A note on ‘carbon avoided’

‘Carbon avoided’ are the carbon emissions avoided by using a product or service that has less carbon emissions than the status quo thereby contributing to decarbonisation. The carbon avoided in aggregate at the Sub-Fund level can change due to the overall allocation to companies that generate carbon avoided, and the mix of companies within the Sub-Fund.

The above carbon avoided disclosure is based on data from companies as at the end of financial year 2021. This data has been applied to portfolio position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag.

Country investments

Indicator	Metric	Year	Value	Commentary
'Use of proceeds' for green, social and sustainability bonds	%	2023	12.8%	Investments were made in the following bonds where the proceeds will be/have been used for a variety of activities including addressing environmental and social needs: Asia Infrastructure bond, Chile green bond, Chile social bond, New Zealand housing bonds, Australia state green bonds, Australia housing bonds.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager uses a proprietary sustainability framework to analyse the material harmful effects that a company or country has on society or the environment.

The Investment Manager's sustainability framework helps to identify business groups and activities (in some cases subject to specific revenue thresholds) in which the Investment Manager will not invest, typically because after applying the sustainability framework it is evident that the harmful effects of the business group or activity outweighs the beneficial effects.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager assesses sustainable investments in relation to the 14 mandatory principal adverse impacts to determine that the investment does not cause significant harm to other sustainable investment objectives.

The investment process allows the Investment Manager to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

As part of the in-depth fundamental analysis on an individual company or country, the mandatory principal adverse impacts are considered for the Sub-Fund's intended sustainable investments.

The Investment Manager draws on quantitative data, where available, and combines this with a qualitative assessment.

Where material adverse impacts are identified, the Investment Manager may engage directly with company management and/or exercise proxy voting rights to catalyse change or promote improvement in a given metric.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and UN Guiding Principles including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are considered

as part of the application of the Investment Manager’s sustainability framework and assessment of material negative externalities. Based on this analysis, the Investment Manager deems whether sustainable investments are aligned with these considerations. Third party data from providers whose methodologies are consistent with international norms represented in numerous widely accepted global conventions including those mentioned above, complements the identification of these considerations.

In addition, the Sub-Fund did not invest in companies the Investment Manager deemed to be in violation of the UN Global Compact principles.

There have been no significant breaches or flags on these international principles and guidelines for the period in review.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year*	Value	Commentary
GHG Emissions	Scope 1, 2 & 3 GHG Emissions Contribution (EVIC) tCO2e	2023	78,631.1	These values have been scaled up so that corporate exposure represents the fund’s total value. Trane Technologies dominates the Sub-Fund’s footprint and intensity measures given its reported Scope 3 figure. It is a leader in efficient HVAC (heating, ventilation and air conditioning) products/solutions with aggressive carbon reduction targets approved by the Science Based Target Initiative (“SBTi”). A steel manufacturer (SSAB) is also a material contributors to these measures given the carbon intensive nature of its businesses. Its activities are important in enabling the energy transition
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO2e/m EUR invested	2023	372.5	
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO2e/m EUR revenue	2023	1,361.9	

				with SSAB's carbon emission reduction plans Science Based Target Initiative ("SBTi") approved. Finally, In addition, a renewable energy/utilities provider (NextEra Energy) is also responsible for a large proportion of the intensity measure. This company is at the forefront of decarbonisation through renewable energy.Exposure to these companies are deemed not to result in material negative impacts.
Board Gender Diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	2023	33.2%	Board gender diversity will continue to be an important topic for engagement, particularly within emerging markets. These results are consistent with expectations, and deemed not to result in material negative impacts.

* The above carbon disclosure is based on data from companies as at the end of financial year 2021 where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Housing New Zealand Ltd 1.534 Sep 10 35	Developed Market Sovereign	3.0	New Zealand
New Zealand Government Bond 1.75 May 15 41	Developed Market Sovereign	2.6	New Zealand
Housing New Zealand Ltd 3.42 Oct 18 28	Developed Market Sovereign	2.5	New Zealand
New Zealand Government Bond 1.5 May 15 31	Developed Market Sovereign	2.4	New Zealand
Iberdrola Sa	Equity	1.9	Spain
Nextera Energy Inc	Equity	1.8	United States
Wuxi Lead Intelligent Equipment	Equity	1.6	China

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2023

Hicl Infrastructure Plc	Equity	1.5	United Kingdom
Contemporary Amperex Technology	Equity	1.5	China
Taiwan Semiconductor Manufacturing Company	Equity	1.3	Taiwan
New Zealand Government Bond 5.5 May 04 23	Developed Market Sovereign	1.3	New Zealand
Kla Corp	Equity	1.2	United States
Antofagasta Plc	Equity	1.1	Chile
Infinion Technologies Ag	Equity	1.1	Germany
Hdfc Bank Ltd	Equity	1.1	India

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	88.4
#1A Sustainable investments within the meaning of Article 2(17) SFDR	53.9
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	34.5
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	11.6

Sustainable Investments (#1A) Breakdown	% of Total Sub-Fund Value*	% of Sustainable Investments
Taxonomy-aligned investments, weighted by Taxonomy-aligned revenue**	5.5	9.6
Investments with an environmental objective but not aligned with the Taxonomy	22.1	45.4
Investments with a social objective	26.7	49.5

*Includes Taxonomy-aligned revenue from all securities, including those not classified as sustainable investments within the meaning of Article 2(17) SFDR.

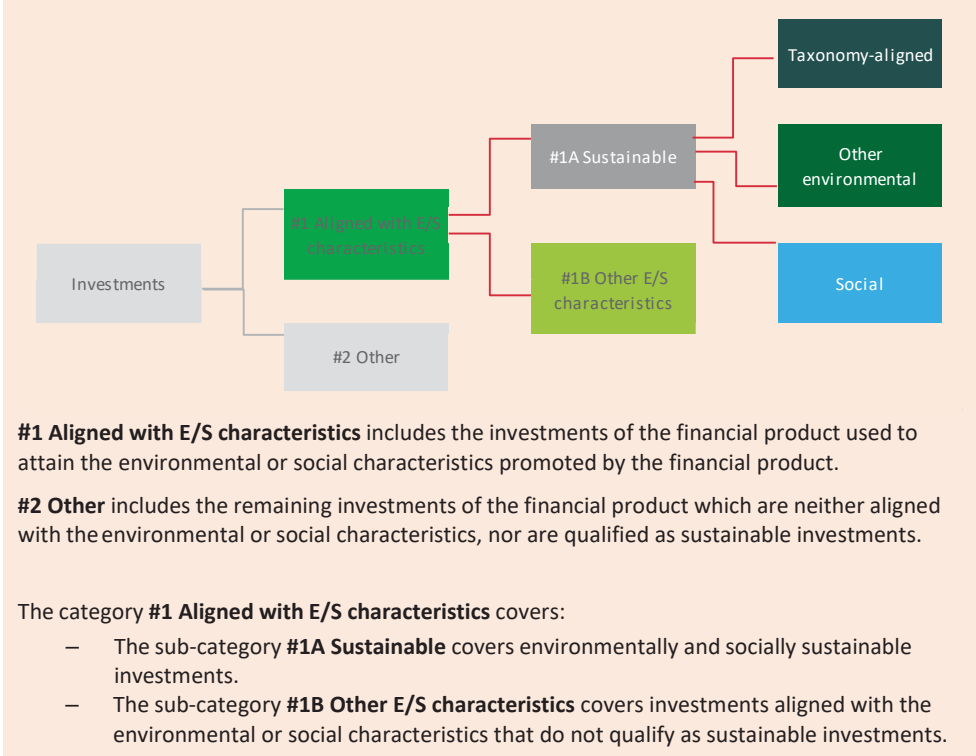

**Underlying entity revenue that can be matched to eligible economic activities as defined under the Commission Delegated Regulation (EU) 2022/1214 meeting all requirements to be deemed Taxonomy aligned.

Asset allocation
describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **In which economic sectors were the investments made?**
Developed Market Sovereign; Emerging Market Hard Currency Debt; Emerging Market Local Currency Debt; Equity; Investment Trust.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

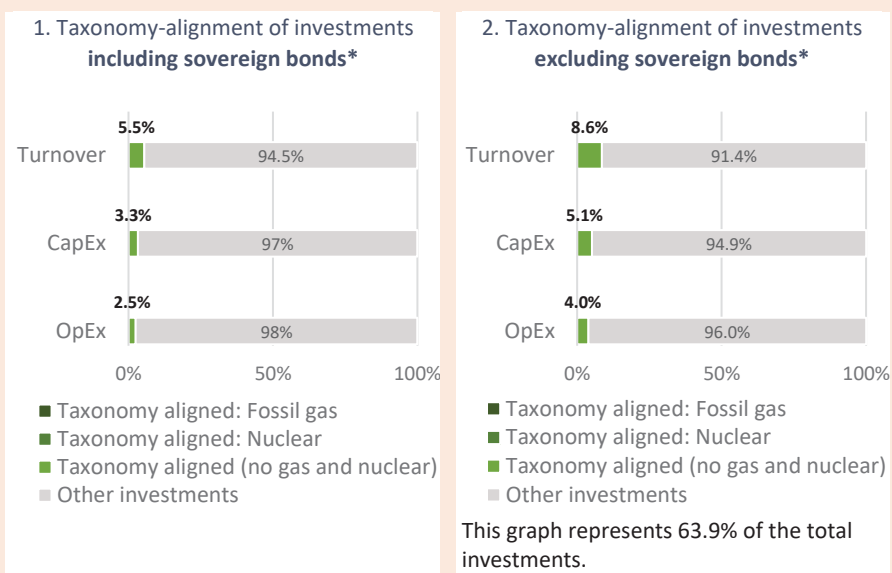

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**
 - Yes:
 - in fossil gas in nuclear energy
 - No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives
- see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Sovereign exposure accounts for 36.1% of the total Sub-Fund value (including shorter-dated bonds).

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

The Taxonomy regulation does not currently provide an appropriate methodology to calculate to what extent exposures to central governments, central banks and supranational issuers (‘sovereign exposures’) are exposed to environmentally sustainable economic activities.

Taxonomy aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	5.5
Climate change adaptation	0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	% of Sustainable Investments
Transitional activities	0.3	0.5
Enabling activities	3.3	6.1

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy increased in 2023 relative to the previous reference period. This is a function of an increase in reported data (given the Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data) and changes in the asset allocation between companies.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

	% of Total Sub-Fund Value	% of Sustainable Investments
Investments with an environmental objective but not aligned with the Taxonomy (i.e. Other Environmental), weighted by non-Taxonomy aligned revenue	22.1	45.4

Currently the coverage of the EU Taxonomy Regulation does not include certain sectors and economic activities within the Sub-Fund’s investment strategy. Therefore, investments by the Sub-Fund in these sectors and activities cannot qualify as environmentally sustainable for the purposes of Article 3 of the EU Taxonomy.

The Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data, therefore this may represent a more conservative figure.

The aforementioned investments have not been subject to an assurance by an auditor or a third party.

What was the share of socially sustainable investments?

	% of Total Sub-Fund Value	% of Sustainable Investments
Investments with a social objective	26.7	49.5

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund, such as:

- cash held for liquidity purposes as an ancillary asset and overnight deposits; and
- derivatives used for hedging, efficient portfolio management and/or investment purposes

No minimum environmental or social safeguards are applied to investments held for liquidity purposes (e.g. cash or deposits).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

Over the period, the Investment Manager has engaged with companies on a broad range of topics including climate change, corporate governance, employee engagement and diversity and inclusion. For example, it engaged with financial services companies such as AIA and HDFC on their progress in setting science-based targets. It engaged with NextEra Energy on a number of topics throughout the year including diversity and inclusion, carbon reporting and supply chain decarbonisation. Finally, it also wrote to some companies in the portfolio regarding their employee engagement based on the Investment Manager's view that a firm with engaged employees is likely to see greater ability to capture growth opportunities, resilience in tough times, and longevity with greater talent retention.

The Investment Manager has voted all proxies.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Multi-Asset Sustainable Growth Fund

Legal entity identifier: 213800ILQPLKWNXSFQ32

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

It **promoted Environmental/Social (E/S) characteristics**: and while it did not have as its objective a sustainable investment, it had a proportion of 55.5% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by making investments in companies and countries that meet the standards of the Investment Manager's proprietary sustainability framework and by excluding investments in certain business groups and activities.

The Sub-Fund invests across various areas in which the Investment Manager sees opportunity to promote environmental/social characteristics, examples of these:

- environmental characteristics can include transition to net zero and climate change amongst others; and
- social characteristics can include digital infrastructure, healthcare and financial inclusion amongst others.

In accordance with the proprietary sustainability framework, the Investment Manager has appraised that over 90% of the assets held in the Sub-Fund are deemed to promote environmental and social characteristics. As such, the environmental and/or social characteristics promoted by this product have been met.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Direct equity investments (Note as at 31/12/2023 there were no directly owned corporate bonds in the Sub-Fund)

Indicator	Metric	Year*	Value	Commentary
Scope 1, 2 & 3 carbon footprint	in tonnes of CO2e per US\$m invested	2023	213.4	Trane Technologies dominates the Sub-Fund's footprint and intensity measures given its reported Scope 3 figure. It is a leader in efficient HVAC (heating, ventilation and air conditioning) products/solutions with aggressive carbon reduction targets approved by the Science Based Target Initiative ("SBTi"). A steel manufacturer (SSAB) is also a material contributors to these measures given the carbon intensive nature of its businesses. Its activities are important in enabling the energy transition with SSAB's carbon emission reduction plans Science Based Target Initiative ("SBTi") approved. Finally, In addition, a renewable energy/utilities provider (NextEra Energy) is also responsible for a large proportion of the intensity measure. This company is at the forefront of decarbonisation through renewable energy.
Scope 1, 2 & 3 – weighted average carbon intensity	in tonnes of CO2e per US\$m or revenue	2023	622.8	
Proportion of companies in the portfolio which disclose carbon emissions figures	%	2023	Scope 1 & 2 = 79.2% At least some Scope 3 categories = 35.4%	In general, the progress of emerging market companies in reporting carbon data is slower than developed market companies, which is reflected in this value. We will continue to engage with companies to improve Scope 1, 2 & 3 disclosure.
Percentage of direct equity holdings with credible net zero plans in place**	%	2023	41.7%	There has been growth in the adoption of SBTi approved net zero plans. The Investment Manager will continue to engage with all companies to set and deliver credible net zero plans.

Percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria	% of equity	2023	0.0%	There is no exposure to companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.
---	-------------	------	------	--

*The above carbon disclosure is based on data from companies where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available from CDP or MSCI, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

**For the purposes of this reporting, the Investment Manager has defined "companies with credible net zero plans" as those companies with plans approved by the Science-Based Target Initiative ("SBTi"). This is therefore a conservative assessment as the Sub-Fund additionally includes companies with net zero plans that are not yet SBTi approved.

See the question below on 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives' for information on:

- Carbon avoided – footprint
- Percentage of direct equity holdings contributing to financial inclusion, digital inclusion, access to education, healthcare impact and climate adaption.

Country investments

Country carbon emissions (Emissions intensity per GDP basis):

Country	Emissions intensity per GDP basis (tCO2e/million \$ GDP)*
Chile	196.60
New Zealand	334.66
South Africa	1515.54
United States	253.14

Source: ClimateWatch

*Given the complexities of calculating the emissions data for countries, there is a significant time lag. This data relates to 2020.

Country carbon emissions on a per GDP basis with accompanying qualitative commentary:

Chile: Chile continues to make strong progress on climate action and its commitment to be carbon neutral by 2050 is credible. This commitment was enshrined in law in June 2022 through the Climate Change Framework legislation. If the country's coal phase-out and renewable energy plans continue to be implemented, the government would establish Chile as a front-runner on climate action, putting emissions on a declining trend only slightly above a 1.5°C-compatible pathway. Alternative energy sources are emerging such as green hydrogen with the country signing a memorandum of understanding with the European Union in June 2023 to finance new projects. If successful Chile could become a key net exporter of green hydrogen.

New Zealand: New Zealand's Climate Change Response (Zero Carbon) Amendment Act 2019 sets out a framework to reduce GHG emissions to net zero by 2050 (except biogenic methane, which has a target of 24-47% below 2017 levels). The country has also established an independent Climate Change Commission to provide advice to government on the transition to a low emissions economy. The country is a success story for the development of renewable energy, including hydropower and geothermal energy, without government subsidies. The updated NDC in November 2021 strengthens the country's 2030 target.

South Africa: South Africa remains heavily reliant on coal, supplying approximately 80% of energy capacity, meaning emissions per GDP are very high. Efforts to reduce emissions have faced challenges from the extremely poor performance of existing power plants, which have been driven by corruption, mismanagement, politics and coal lobby/incentives. While IRP2019 plans to decommission 83% of the total coal power by 2050 and increase clean energy generation, government policy has recently gone against this as some old power stations are having their lives extended to maintain energy capacity. There are some encouraging signs however, including a meaningful pipeline of renewables, as well as President Ramaphosa's efforts to fix the energy situation by establishing a "Ministry of Electricity" under the presidency. This has additionally been supported by private households who have been moving away from reliance on Eskom through the build out of solar panels supported by government tax incentives.

US: The passage of the US\$700 billion Inflation Reduction Act (IRA) in 2022 marked a key milestone in US climate policy, sparking a notable clean investment drive and acceleration in both state and local action on climate solutions. This act forms a key part of the new US emissions policy which targets a c. 50% reduction in greenhouse gas pollution from 2005 levels by 2030. The outcome of the 2024 presidential election will be key for indicating the longevity of these climate commitments and is something that the Investment Manager is monitoring closely. The Federal system somewhat offsets the risks of a presidential change, giving the States' considerable power. According to the EIA, 31 states and the District of Columbia had renewable portfolio standards (RPS) or clean energy standards (CES). These policies require electricity suppliers to supply a set share of their electricity from designated renewable resources or carbon-free eligible technologies.

See the question below on 'sustainable investment objectives partially made by the product and how the sustainable investments contributed to those objectives?' for information on:

- 'Use of proceeds' for relevant green, social and sustainability bonds

● ***...and compared to previous periods? [include for financial products where at least one previous periodic report was provided]***

Over 2023, the Sub-Fund saw a mild increase in the carbon emissions measures. This is a function of higher reported emissions from Trane Technologies, portfolio activity involving the purchase of SSAB, as well as changes in the asset allocation between companies in the portfolio.

Over 2023, the Sub-Fund saw an increase in the proportion of companies disclosing Scope 1, 2 and Scope 3 carbon emissions figures. This is a function of increased disclosure from existing companies, and the addition of new companies that report these measures. We will continue to engage with companies to improve reporting of carbon data, particularly relating to all Scope 3 categories' disclosure.

Over 2023, the Sub-Fund saw an increase in in the proportion of companies with credible net zero plans in place. This is a result of the new addition of companies with credible net zero plans in place as well as the increased adoption of SBTi approved net zero plans in existing companies within the Sub-Fund. We will continue to engage with all our companies to set and deliver credible net zero plans.

We have continued to hold zero percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.

Noting the complexities of calculating the emissions data for countries and the resulting significant time lag which has meant that the data relates to 2020, the emissions on a per

GDP basis slightly reduced for Chile, New Zealand and the US, and slightly increased for South Africa.

As per the information provided below relating to 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives':

- the carbon avoided for the Sub-Fund slightly increased over the period
- the percentage of direct equity holdings contributing to financial inclusion increased over the period.
- Note that the percentage of direct equity holdings relating to digital inclusion, access to education, healthcare impact and climate adaption measures are a new set of sustainability indicators compared to the last period.
- the percentage of 'Use of proceeds' for green, social and sustainability bonds increased slightly over the period.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund focuses on sustainable investments with environmental and/or social objectives.

To do this, currently, the Sub-Fund has made sustainable investments in companies believed by the Investment Manager to contribute to :

- positive environmental change through sustainable decarbonisation (the process of reducing carbon-dioxide emissions). The Sub-Fund currently uses 'carbon avoided' as an indicator to assess, measure and monitor the carbon impact associated with a company.
- supporting and improving socio-economic resilience and outcomes by facilitating financial inclusion (i.e., access to useful and affordable financial products and services that meet the needs of underserved individuals and businesses delivered in a responsible manner).
- digital inclusion by providing access to products and/or services that support digital take-up and infrastructure expansion.
- access to education by providing access to high quality educational and training products and/or services for underserved groups.
- healthcare impact by providing access to products and/or services that facilitate access to healthcare in underserved or underperforming markets.
- climate adaptation through products and/or services which mitigate against the impacts of climate change, driven by longer-term shifts in climate patterns and/or acute event-driven climate risks.
- To do this, currently, the Sub-Fund has made sustainable investments in debt instruments:
 - issued by any borrower (e.g. companies or countries), whose proceeds are used to finance solutions that address environmental or social challenges, such as climate change (e.g. green bonds) or housing needs.
 - issued by Development Finance Institutions if the Investment Manager deems these to be sustainable investments

Direct equity investments

Indicator	Metric	Year	Value	Commentary
Carbon avoided – footprint	in tonnes per CO2e per US\$m invested	2023	111.9	Twenty one companies (out of 48) in the portfolio produced positive carbon avoided.
Percentage of direct equity holdings contributing to financial inclusion	% equity	2023	10.4%	Five companies (out of 48) in the portfolio facilitate financial inclusion.
Percentage of direct equity holdings contributing to digital inclusion	% equity	2023	2.1%	One company (out of 48) in the portfolio facilitates digital inclusion.
Percentage of direct equity holdings contributing to access to education	% equity	2023	0.0%	There are currently no companies (out of 48) in the portfolio that facilitate access to education.
Percentage of direct equity holdings contributing to healthcare impact	% equity	2023	12.5%	Six companies (out of 48) in the portfolio facilitates healthcare impact.
Percentage of direct equity holdings contributing to climate adaptation	% equity	2023	2.1%	One company (out of 48) in the portfolio facilitates climate adaptation.

A note on 'carbon avoided'

'Carbon avoided' are the carbon emissions avoided by using a product or service that has less carbon emissions than the status quo thereby contributing to decarbonisation. The carbon avoided in aggregate at the Sub-Fund level can change due to the overall allocation to companies that generate carbon avoided, and the mix of companies within the Sub-Fund.

The above carbon avoided disclosure is based on data from companies as at the end of financial year 2021. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag.

Country investments

Indicator	Metric	Year	Value	Commentary
'Use of proceeds' for green, social and sustainability bonds	%	2023	13%	Investments were made in the following bonds where the proceeds will be/have been used for a variety of activities including addressing environmental and social needs: Asia Infrastructure bond, Chile green bond, Chile social bond, New Zealand housing bonds, Australia state green bonds, Australia housing bonds.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager uses a proprietary sustainability framework to analyse the material harmful effects that a company or country has on society or the environment.

The Investment Manager's sustainability framework helps to identify business groups and activities (in some cases subject to specific revenue thresholds) in which the Investment Manager will not invest, typically because after applying the sustainability framework it is evident that the harmful effects of the business group or activity outweighs the beneficial effects.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager assesses sustainable investments in relation to the 14 mandatory principal adverse impacts to determine that the investment does not cause significant harm to other sustainable investment objectives.

The investment process allows the Investment Manager to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

As part of the in-depth fundamental analysis on an individual company or country, the mandatory principal adverse impacts are taken into account for the Sub-Fund's intended sustainable investments.

The Investment Manager draws on quantitative data, where available, and combines this with a qualitative assessment.

Where material adverse impacts are identified, the Investment Manager may engage directly with company management and/or exercise proxy voting rights in an effort to catalyse change or promote improvement in a given metric.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and UN Guiding Principles including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are considered as part of the application of the Investment Manager's sustainability framework and assessment of material negative externalities. Based on this analysis, the Investment Manager deems whether sustainable investments are aligned with these considerations. Third party data from providers whose methodologies are consistent with international norms represented in numerous widely accepted global conventions including those mentioned above, complements the identification of these considerations.

In addition, the Sub-Fund did not invest in companies the Investment Manager deemed to be in violation of the UN Global Compact principles.

There have been no significant breaches or flags on these international principles and guidelines for the period in review.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The investment process implemented by the Investment Manager allows it to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

PAI Indicator	Metric	Year*	Value	Commentary
GHG Emissions	Scope 1, 2 & 3 GHG Emissions Contribution (EVIC) tCO ₂ e	2023	25,946.7	These values have been scaled up so that corporate exposure represents the fund's total value. Trane Technologies dominates the Sub-Fund's footprint and intensity measures given its reported Scope 3 figure. It is a leader in efficient HVAC (heating, ventilation and air conditioning) products/solutions with aggressive carbon reduction targets approved by the Science Based Target Initiative (“SBTi”). A steel manufacturer (SSAB) is also a material contributors to these measures given the carbon intensive nature of its businesses. Its activities are important in enabling the energy transition with SSAB's carbon emission reduction plans Science Based Target Initiative (“SBTi”) approved. Finally, In addition, a renewable energy/utilities provider (NextEra Energy) is also responsible for a large proportion of the intensity measure. This company is at the forefront of decarbonisation through
Carbon Footprint	Scope 1, 2 & 3 Carbon Footprint Contribution (EVIC) tCO ₂ e/m EUR invested	2023	374.8	
GHG intensity	Scope 1, 2 & 3 GHG intensity of investee companies tCO ₂ e/m EUR revenue	2023	1,372.3	

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

				renewable energy. Exposure to these companies are deemed not to result in material negative impacts.
Board Gender Diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	2023	33.1%	Board gender diversity will continue to be an important topic for engagement, particularly within emerging markets. These results are consistent with expectations, and deemed not to result in material negative impacts.

*The above carbon disclosure is based on data from companies where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

What were the top investments of this financial product?

New Zealand Government Bond 5.5 May 04 23	Developed Market Sovereign	1.2	New Zealand

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023

Hdfc Bank Ltd	Equity	1.2	India
Infineon Technologies Ag	Equity	1.2	Germany
Antofagasta Plc	Equity	1.1	Chile

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Investments aligned with the Sub-Fund's promoted environmental or social characteristics	91.9
#1A Sustainable investments within the meaning of Article 2(17) SFDR	55.5
#1B Investments aligned with environmental or social characteristics that do not qualify as sustainable investments within the meaning of Article 2(17) SFDR	36.4
#2 Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	8.1

Sustainable Investments (#1A) Breakdown	% of Total Sub-Fund Value*	% of Sustainable Investments
Taxonomy-aligned investments, weighted by Taxonomy-aligned revenue**	5.7	9.7
Investments with an environmental objective but not aligned with the Taxonomy	22.9	46.2
Investments with a social objective	26.9	48.5

*Includes Taxonomy-aligned revenue from all securities, including those not classified as sustainable investments within the meaning of Article 2(17) SFDR.

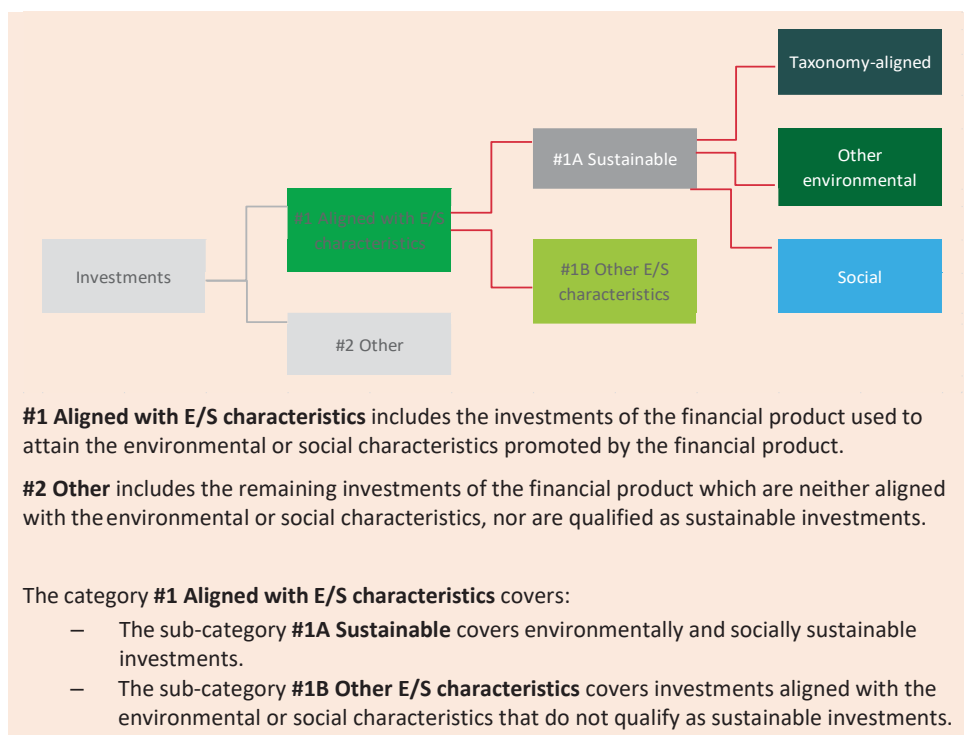

**Underlying entity revenue that can be matched to eligible economic activities as defined under the Commission Delegated Regulation (EU) 2022/1214 meeting all requirements to be deemed Taxonomy aligned.

Asset allocation
describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Developed Market Sovereign; Emerging Market Hard Currency Debt; Emerging Market Local Currency Debt; Equity; Investment Trust.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

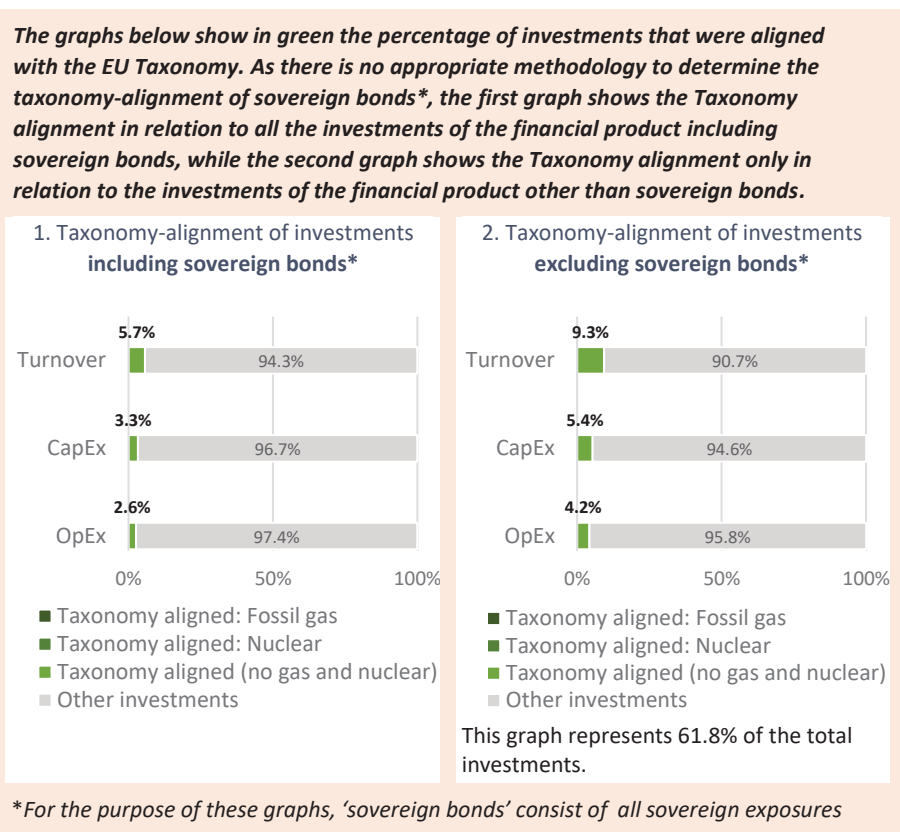

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

- Yes:
- in fossil gas in nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives
 - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Sovereign exposure accounts for 38.2% of the total Sub-Fund value (including shorter-dated bonds)

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

The Taxonomy regulation does not currently provide an appropriate methodology to calculate to what extent exposures to central governments, central banks and supranational issuers (‘sovereign exposures’) are exposed to environmentally sustainable economic activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	5.7
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	% of Sustainable Investments
Transitional activities	0.3	0.5
Enabling activities	3.5	6.3

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy increased in 2023 relative to the previous reference period. This is a function of an increase in reported data (given the Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data) and changes in the asset allocation between companies.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

	% of Total Sub-Fund Value	% of Sustainable Investments
Investments with an environmental objective but not aligned with the Taxonomy (i.e. Other Environmental), weighted by non-Taxonomy aligned revenue	22.9	46.2

Currently the coverage of the EU Taxonomy Regulation does not include certain sectors and economic activities within the Sub-Fund’s investment strategy. Therefore, investments by the Sub-Fund in these sectors and activities cannot qualify as environmentally sustainable for the purposes of Article 3 of the EU Taxonomy.

The Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data, therefore this may represent a more conservative figure.

The aforementioned investments have not been subject to an assurance by an auditor or a third party

What was the share of socially sustainable investments?

	% of Total Sub-Fund Value	% of Sustainable Investments
Investments with a social objective	26.9	48.5

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other’ includes investments that support the financial objective and other management activities of the Sub-Fund, such as:

- Cash held for liquidity purposes as an ancillary asset and overnight deposits; and
- derivatives used for hedging, efficient portfolio management and/or investment purposes

No minimum environmental or social safeguards are applied to investments held for liquidity purposes (e.g. cash or deposits).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All new investments have been selected in line with the Investment Manager's sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

Over the period, the Investment Manager has engaged with companies on a broad range of topics including climate change, corporate governance, employee engagement and diversity and inclusion. For example, it engaged with financial services companies such as AIA and HDFC on their progress in setting science-based targets. It engaged with NextEra Energy on a number of topics throughout the year including diversity and inclusion, carbon reporting and supply chain decarbonisation. Finally, it also wrote to some companies in the portfolio regarding their employee engagement based on the Investment Manager's view that a firm with engaged employees is likely to see greater ability to capture growth opportunities, resilience in tough times, and longevity with greater talent retention.

The Investment Manager has voted all proxies.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Global Environment Fund

Legal entity identifier: 213800LQ2Q46VNU9L735

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** 99.1%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

It **promoted Environmental/Social (E/S) characteristics:** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Sub-Fund's environmental objective is to make sustainable investments that aim to contribute to positive environmental change through sustainable decarbonisation.

The methodology used to determine the Sub-Fund is making sustainable investments that aim to contribute to positive environmental change through sustainable decarbonisation is called 'carbon avoided'. 'Carbon avoided' refers to the carbon emissions avoided by using a product or service that has less carbon emissions than the status quo thereby contributing to decarbonisation.

As at 31/12/2023 and over the course of 2023, every company held in the Sub-Fund, excluding cash, contributed to positive environmental change through sustainable decarbonisation as evidenced by every holding having positive 'carbon avoided', and the Sub-Fund overall having positive 'carbon avoided'. Therefore the Sub-Fund met its environmental objective and therefore its sustainable investment objective.

Further evidence of this attainment at a company-by-company level is available in the Impact Report for the Sub-Fund, available on Ninety One's website and updated on an annual basis.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator	Metric	Year*	Value	Commentary
Scope 1, 2 and 3 absolute carbon emissions	in tonnes of CO2e	2023	22,359,620.1	Over time we expect to see carbon emissions measures reducing for the Sub-Fund. The capital-intensive nature of several companies in the Sub-Fund's (e.g. Utilities and Industrials) combined with the Sub-Fund's concentration in these sectors can skew the emissions data upwards. We believe this data should be assessed in conjunction with the carbon avoided data. Trane Technologies is a material contributor to the Sub-Fund's footprint and intensity measures given its reported Scope 3 figure. It is a leader in efficient HVAC (heating, ventilation and air conditioning) products/solutions with aggressive carbon reduction targets approved by the Science Based Target Initiative (SBTi).
Scope 1, 2 and 3 carbon footprint	in tonnes of CO2e per US\$m invested	2023	430.6	
Scope 1, 2 and 3 – weighted average carbon intensity	in tonnes per CO2 e per US\$m or revenue	2023	1,504.2	
Proportion of companies in the Sub-Fund which disclose carbon emissions figures	(%)	2023	Scope 1 & 2 = 95.8% All Scope 3 categories = 45.8%	Over the longer-term, we have seen improvement in Sub-Fund companies' reporting of carbon data albeit with some shorter-term variability as a result of new holdings in companies that may not currently report. We will continue to engage with companies to improve reporting of carbon data, particularly relating to all Scope 3 categories' disclosure.

Percentage of companies with credible net zero plans in place**	%	2023	41.7%	Over the longer-term there has been growth in the adoption of SBTi approved net zero plans, albeit with some shorter-term variability as a result of new holdings in companies that may not currently have these plans in place. We will continue to engage with all our companies to set and deliver credible net zero plans.
Percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria	% of equity	2023	0.0%	There is no exposure to companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.
Carbon avoided – footprint	in tonnes per CO2 e per US\$1m invested	2023	2,359.2	Every company in the Sub-Fund produced positive carbon avoided.

*The above carbon disclosure is based on data from companies as at the end of financial year 2021 where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

**For the purposes of this reporting, we have defined “companies with credible net zero plans” as those companies with plans approved by the Science-Based Target Initiative (“SBTi”). This is therefore a conservative assessment as the Sub-Fund additionally includes companies with net zero plans that are not yet SBTi approved.

A note on ‘carbon avoided’

‘Carbon avoided’ are the carbon emissions avoided by using a product or service that has less carbon emissions than the status quo thereby contributing to decarbonisation. The carbon avoided in aggregate at the Sub-Fund level can change due to the overall allocation to companies that generate carbon avoided, and the mix of companies within the Sub-Fund.

The above carbon avoided disclosure is based on data from companies as at the end of financial year 2021. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag.

● **...and compared to previous periods?**

Over 2023, the Sub-Fund saw a reduction in the carbon emissions measures and an increase in its carbon avoided. This is a function of a combination of positive progress on both fronts by individual companies held in the Sub-Fund as well as changes in the asset allocation between these companies.

Over 2023, the Sub-Fund saw a slight reduction in the proportion of companies disclosing Scope 1 and 2, and All Scope 3 carbon emissions figures. This is a result of the new addition of a company, which does not currently report carbon emission figures, and the sale of a company, which

reported Scope 1, 2 and 3 figures. We will continue to engage with companies to improve reporting of carbon data, particularly relating to all Scope 3 categories' disclosure.

Over 2023, the Sub-Fund saw a slight reduction in the proportion of companies with credible net zero plans in place. This is a result of the new addition of three companies which do not currently have credible net zero plans in place and the sale of two companies with credible net zero plans in place. We also saw the increased adoption of SBTi approved net zero plans in existing companies within the Sub-Fund. We will continue to engage with all our companies to set and deliver credible net zero plans.

We have continued to hold zero percentage of companies invested in the business groups or activities prohibited under the Sub-Fund's exclusions criteria.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

How were the indicators for adverse impacts on sustainability factors taken into account?

The investment process allows the Investment Manager to identify and prioritise the potential adverse sustainability impacts of investment decisions (particularly as part of the fundamental analysis stage) and to demonstrate that each investment decision made by the Investment Manager does not significantly harm other environmental or social objectives.

As part of the in-depth fundamental analysis on an individual company, the 14 mandatory principal adverse impacts are taken into account when assessing if significant harm is caused by the Sub-Fund's intended sustainable investments.

The Investment Manager uses quantitative data (i.e., the metrics for the mandatory principal adverse sustainability indicators as outlined in Annex I of the Commission Delegated Regulation (EU) 2022/1288), where available, and applies a qualitative assessment where the Investment Manager applies their knowledge, experience and judgement to the quantitative PAI data to form a conclusion which considers the context of the company's business model and its activities. For material principal adverse impacts, the Investment Manager focuses assessment on progress made against the principal adverse impact and/or the policies, business models and operations the company has in place to manage adverse impacts.

Where material adverse impacts are identified, the Investment Manager may engage directly with company management and/or exercise proxy voting rights in an effort to catalyse change or promote improvement in a given metric.

Where indicators for adverse impacts on sustainability factors are not available (i.e. not reported by an investee company), the Investment Manager engages with companies in the Sub-Fund to disclose against all mandatory indicators.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and UN Guiding Principles including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are considered as part of the application of the Investment Manager's sustainability framework. Third party data from providers whose methodologies are consistent with international norms represented in numerous widely accepted global conventions complements the identification of these considerations.

In addition, the Sub-Fund did not invest in companies the Investment Manager deemed to be in violation of the UN Global Compact principles.

There have been no significant breaches or flags on these international principles and guidelines for the period in review.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI Indicator	Metric	Year*	Value	Commentary
GHG Emissions	Scope 1, 2 and 3 GHG Emissions Contribution (EVIC) tCO ₂ e	2023	354,618.4	These values have been scaled up so that corporate exposure represents the fund's total value. Over time we expect to see carbon emissions measures reducing for the Sub-Fund. The capital-intensive nature of several companies in the Sub-Fund's (e.g. Utilities and Industrials) combined with the Sub-Fund's concentration in these sectors can skew the emissions data upwards. Trane Technologies is a material contributor to the Sub-Fund's footprint and intensity measures given its reported Scope 3 figure. It is a leader in efficient HVAC (heating, ventilation and air conditioning) products/solutions with aggressive carbon reduction targets approved by the Science Based Target Initiative (SBTi). Exposure to these companies is deemed not to result in material negative impacts.
Carbon Footprint	Scope 1, 2 and 3 Carbon Footprint Contribution (EVIC) tCO ₂ e/m EUR invested	2023	373.3	
GHG intensity	Scope 1, 2 and 3 GHG intensity of investee companies tCO ₂ e/m EUR revenue	2023	1,725.5	
Exposure to companies active in the fossil fuel sector	%	2023	12.5%	3 companies out of 24 – NextEra Energy, Iberdrola and Orsted – have exposure to the fossil fuel sector. This exposure mainly relates to legacy exposure. These companies are at the forefront of decarbonisation through renewable energy. Exposure to these companies are deemed not to result in material negative impacts.
Board Gender Diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	2023	31.5%	Board gender diversity will continue to be an important topic for engagement, particularly within emerging markets. The Sub-Fund's relatively high exposure to emerging markets skews this measure downwards. These results are consistent with expectations, and deemed not

				to result in material negative impacts.
--	--	--	--	---

*The above carbon disclosure is based on data from companies as at the end of financial year 2021 where available. This data has been applied to Sub-Fund position weightings as at the end of financial year 2023. While carbon reporting is improving significantly, it is still subject to a significant time lag. Where company reported emissions data is not available, estimates from MSCI have been used. Carbon data can be subject to significant variation depending on the data provider used.

It is important to note that there remain significant limitations in Scope 3 data given the complexity of value chains and the variability in reporting and estimation methodologies used to calculate Scope 3 emissions. Therefore, Scope 3 data should not currently be treated as a reliable means to fully understand the carbon footprint of a company, nor to compare companies or portfolios.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Waste Management Inc	Industrials	6.4	United States
Iberdrola Sa	Utilities	5.7	Spain
Ansys Inc	Information Technology	5.4	United States
Te Connectivity Ltd	Information Technology	5.1	United States
Nextera Energy Inc	Utilities	4.9	United States

Contemporary Amperex Technolog	Industrials	4.0	China

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Overall Asset Allocation	% of Total Sub-Fund Value
#1 Sustainable investments within meaning of Article 2(17) SFDR	99.1
#2 Not sustainable investments within meaning of Article 2(17) SFDR	0.9

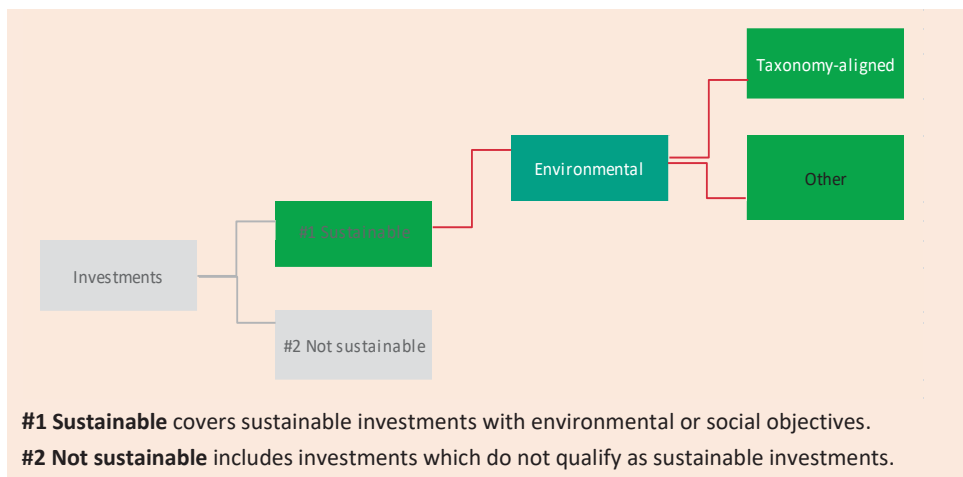

Asset allocation describes the share of investments in specific assets.

Environmental investments within meaning of Article 2(17) SFDR	99.1
Other, i.e. investments neither aligned with environmental or social characteristics, nor qualified as sustainable investments within the meaning of Article 2(17) SFDR	0.9

Sustainable Investments (#1) Breakdown	% of Total Sub-Fund Value *	% of Sustainable Investments
Taxonomy-aligned investments, weighted by Taxonomy-aligned revenue**	31.5	31.7
Investments with an environmental objective but not aligned with the Taxonomy	67.7	68.5

*Includes Taxonomy-aligned revenue from all securities, including those not classified as sustainable investments within the meaning of Article 2(17) SFDR.

**Underlying entity revenue that can be matched to eligible economic activities as defined under the Commission Delegated Regulation (EU) 2022/1214 meeting all requirements to be deemed Taxonomy aligned.

- **In which economic sectors were the investments made?**
Consumer Discretionary; Industrials; Information Technology; Materials; Utilities.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

in fossil gas in nuclear energy

No

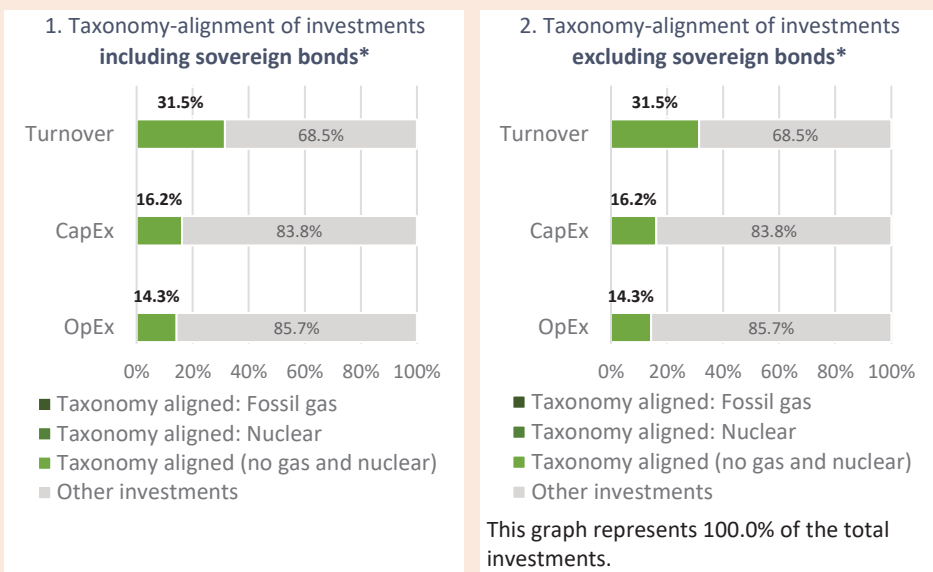

Taxonomy-aligned activities are expressed as a share of:

— **turnover** reflecting the share of revenue from green activities of investee companies.

— **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

— **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

EU Taxonomy data is sourced from a specialist third party data provider Clarity AI, which is a combination of company reported EU Taxonomy alignment figures and company reported data that is mapped to EU Taxonomy aligned activities.

Taxonomy-aligned investments contributed to environmental objectives set out in Regulation (EU) 2020/852 as follows:

EU Taxonomy-alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value
Climate change mitigation	31.5
Climate change adaptation	0.0

● **What was the share of investments made in transitional and enabling activities?**

EU Taxonomy Alignment, weighted by Taxonomy-aligned revenue	% of Total Sub-Fund Value	% of Sustainable Investments
Transitional activities	0.0	0.0
Enabling activities	23.4	23.6

limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy increased in 2023 relative to the previous reference period. This is a function of an increase in reported data (given the Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data) and changes in the asset allocation between companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

	% of Total Sub-Fund Value	% of Sustainable Investments
Investments with an environmental objective but not aligned with the Taxonomy (i.e. Other Environmental), weighted by non-Taxonomy aligned revenue	67.7	68.5

Currently the coverage of the EU Taxonomy Regulation does not include certain sectors and economic activities within the Sub-Fund’s investment strategy. Therefore, investments by the Sub-Fund in these sectors and activities cannot qualify as environmentally sustainable for the purposes of Article 3 of the EU Taxonomy.

The Taxonomy-alignment figure is determined using vendor data which only includes alignment based on reported data, therefore this may represent a more conservative figure.

The aforementioned investments have not been subject to an assurance by an auditor or a third party.

What was the share of socially sustainable investments?

N/A

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

‘#2 Not sustainable’ includes investment held for liquidity purposes (e.g. Cash, deposits, money market instruments).

No minimum environmental or social safeguards are applied to investments held for liquidity purposes (e.g. Cash and deposits). These investments have not affected the delivery of the sustainable investment objective as they do not form a material part of the Sub-Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

All new investments have been selected in line with the Investment Manager’s sustainability framework. Existing investments are monitored against the same framework.

The Investment Manager implements active stewardship and its right as a shareholder to preserve and grow its clients' assets, including engagement with the companies in which it invests. The extent of engagement activities will vary depending on the materiality of any adverse impacts, ability to exert influence, and the nature and severity of the potential issue.

In addition, where significant adverse impacts are identified or there is potential non-compliance with good governance requirements the Investment Manager will identify the materiality of these and the potential need for engagement to address these issues. Further information on the Investment Manager's approach to engagement is available on its website:

www.ninetyone.com/sustainability

The Investment Manager has determined that all companies have contributed to positive environmental change through sustainable decarbonisation. This is evidenced by every holding, excluding cash, being measured as having positive carbon avoided over the period in question.

Over the period, the Investment Manager has engaged with every company in the Sub-Fund on a range of issues covering sustainability reporting, governance, diversity and inclusion, health and safety and carbon emissions.

The Investment Manager has voted all proxies.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

- ***How does the reference benchmark differ from a broad market index?***
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***
N/A
- ***How did this financial product perform compared with the reference benchmark?***
N/A
- ***How did this financial product perform compared with the broad market index?***
N/A

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Appendix 1

Total Expense Ratio

The method for calculation is Total Operating Expenses (not including negative investment income) divided by the average Net Asset Value for the period. This is calculated on a Share Class basis.

Ongoing charges were calculated in accordance with the ESMA's guidelines on the methodology for calculation of the ongoing charges figure in the Key Investor Information Document CESR/10-674, as well as with the ALFI (Association of the Luxembourg Fund Industry) guidelines.

The total expense ratios (TER) were calculated according to the guidelines of the Swiss Funds & Assets Management Association (SFAMA).
