

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Nordea 1 – European High Yield Bond Fund, BI-EUR Share Class

ISIN-Code: LU0141799097

The management company is Nordea Investment Funds S.A., a company of the Nordea Group.

Objectives and investment policy

The fund's objective is to provide shareholders with investment growth in the medium to long term.

In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment opportunities.

The fund mainly invests in European high yield bonds and credit default swaps.

Specifically, the fund invests at least two thirds of total assets in high yield debt securities, credit default swaps and other debt securities, including contingent convertible bonds, that are denominated in European currencies or issued by companies that are domiciled or conduct the majority of their business, in Europe.

The fund may invest in, or be exposed to up to 10% of its total assets in asset-backed securities including collateralised debt and loan obligations (CDOs and CLOs) and up to 20% of its total assets in contingent convertible bonds.

The fund's major part of currency exposure is hedged to the base currency, although it may also be exposed (through investments or cash) to other currencies.

The fund may use derivatives and other techniques for hedging (reducing risks), efficient portfolio management and to seek investment gains. A derivative is a financial instrument which derives its value from the value of an underlying asset. The use of derivatives is not cost or risk-free.

The fund is promoting environmental and/or social characteristics as per Article 8 of the EU Sustainable Finance Disclosure Regulation (SFDR). Further information regarding the way the fund takes environmental and/or social criteria into account is available in the fund's prospectus and accessible via nordea.lu.

The fund is subject to Nordea Asset Management's responsible investment policy.

Any investor may redeem its shares in the fund on demand, on a daily basis. This fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

While the fund compares its performance against the ICE BofA European Currency High Yield Constrained Index - Total Return 100% Hedged to EUR, it may freely select the securities that it will invest in. The risk characteristics of the fund's portfolio may bear some resemblance to those of the reference index.

This share class is not distributing dividends. Income from investments is reinvested.

The fund is denominated in EUR. Investments in this share class settle as well in EUR.

Risk and reward profile

The indicator measures the risk of fluctuations of the Net Asset Value of the share class based on the last 5 years volatility and places the fund in category 4. This means that the purchase of units in the fund is connected to **medium risk** of such fluctuations.

Please note that category 1 does not mean a risk free investment.

Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the UCITS, as the category might change in the future.

Following risks are materially relevant to the UCITS but are not adequately captured by the synthetic indicator and may cause additional loss:

- **ABS/MBS risk:** Mortgage-backed and asset-backed securities (MBSs and ABSs) typically carry prepayment and extension risk and can carry above-average liquidity risk.
- **CDO/CLO risk:** The lower tranches of CDOs and CLOs can experience significantly higher risk than upper tranches of the same CDOs or CLOs. These securities can be hurt by a decline in the underlying assets. Because of their complex structure, they can also be hard to value accurately and their behavior in different market conditions may be unpredictable.
- **CoCo bonds risk:** Issuers of contingent convertible securities (CoCo bonds or CoCos) can cancel or suspend scheduled income payments at will. CoCos carry extension risk, and they can be highly volatile.
- **Convertible securities risk:** Because convertible securities are structured as bonds that typically can, or must, be repaid with a predetermined quantity of equity shares, rather than cash, they carry both equity risk and the credit and default risks typical of bonds.
- **Credit risk:** A bond or money market security, whether from a public or private issuer, could lose value if the issuer's financial health deteriorates.
- **Derivatives risk:** Small movements in the value of an underlying asset can create large changes in the value of a derivative, making derivatives highly volatile in general, and exposing the fund to potential losses significantly greater than the cost of the derivative.
- **Hedging risk:** Any attempts to reduce or eliminate certain risks may not work as intended, and to the extent that they do work, they will generally eliminate potentials for gain along with risks of loss.
- **Liquidity Risk:** Certain securities may become hard to value or to buy or sell at a desired time and price which could affect the fund's value

and its ability to pay redemption proceeds or other obligations in a timely manner.

- **Prepayment and extension risk:** Any unexpected behaviour in interest rates could hurt the performance of callable debt securities (securities whose issuers have the right to pay off the security's principal before the maturity date).

For more information on risks the fund is exposed to, please refer to the section "Risk Descriptions" of the Prospectus.

Key Investor Information

Nordea 1 – European High Yield Bond Fund, BI-EUR

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.71%
Charges taken from the fund under certain specific conditions	
Performance fee	The share class is not subject to any performance fee.

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find the exact charges which will apply to your investment by contacting your financial adviser or distributor.

The ongoing charges figure is based on the last year's expenses, for the year ending December 2021, and this figure may vary from year to year. It excludes performance related fees and transaction costs including third party brokerage fees and bank charges on securities transactions.

For more information about charges, please see section "Share Class Fees" of the fund's prospectus, which is available at www.nordea.ch.

This fund is subject to swing pricing.

Past performance

- Such historical performance is only indicative and may not be met in the future.
- The past performance of the share class is calculated NAV to NAV excluding initial and exit charges.
- The fund was launched in 2006 and the share class in 2006.
- Performances are shown in EUR.
- Reference index for performance comparison is the ICE BofA European Currency High Yield Constrained Index - Total Return 100% Hedged to EUR.
