Nordea 1 – Swedish Short-Term Bond Fund, BP-SEK Share Class

ISIN-Code: LU0064321663

The management company is Nordea Investment Funds S.A., a company of the Nordea Group.

Objectives and investment policy

The fund's objective is to provide shareholders with investment growth in the short to medium term.

In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment opportunities. PAI is taken into consideration as part of the investment process.

The fund mainly invests in bonds denominated in SEK.

Specifically, the fund invests at least two thirds of total assets in debt securities that are denominated in SEK and issued by public authorities or companies. The fund may invest in securities with a residual maturity of 2 years or more. The fund's weighted average life is expected to be above 1 year.

The fund's main currency exposure is to the base currency, although it may also be exposed (through investments or cash) to other currencies.

The fund may use derivatives and other techniques for hedging (reducing risks), efficient portfolio management and to seek investment gains. A derivative is a financial instrument which derives its value from the value of an underlying asset. The use of derivatives is not cost or risk-free.

The fund is promoting environmental and/or social characteristics as per Article 8 of the EU Sustainable Finance Disclosure Regulation (SFDR). Further information regarding the way the fund takes environmental and/or social criteria into account is available in the fund's prospectus and accessible via nordea.lu.

The fund is subject to Nordea Asset Management's responsible investment policy.

Any investor may redeem its shares in the fund on demand, on a daily basis. This fund may not be appropriate for investors who plan to withdraw their money within a period of 1 year.

While the fund compares its performance against the 25% OMRX Mortgage Bond Index 1-3 Years and 75% OMRX T-Bill, it may freely select the securities that it will invest in. The risk characteristics of the fund's portfolio may bear some resemblance to those of the benchmark. The fund uses a benchmark which is not aligned with the environmental and social characteristics of the fund.

This share class is not distributing dividends. Income from investments is reinvested.

The fund is denominated in SEK. Investments in this share class settle as well in SEK.

Risk and reward profile

The indicator measures the risk of fluctuations of the Net Asset Value of the share class based on the last 5 years volatility and places the fund in category 2. This means that the purchase of units in the fund is connected to **lower risk** of such fluctuations.

Please note that category 1 does not mean a risk free investment.

Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the UCITS, as the category might change in the future.

Following risks are materially relevant to the UCITS but are not adequately captured by the synthetic indicator and may cause additional loss:

- **Concentration risk:** To the extent that the fund invests a large portion of its assets in a limited number of industries, sectors, or issuers, or within a limited geographical area, it can be more risky than a fund that invests more broadly.
- **Derivatives risk:** Small movements in the value of an underlying asset can create large changes in the value of a derivative, making derivatives highly volatile in general, and exposing the fund to potential losses significantly greater than the cost of the derivative.

For more information on risks the fund is exposed to, please refer to the section "Risk Descriptions" of the Prospectus.
