### Nordea 1 – Swedish Short-Term Bond Fund, BP-NOK Share Class

ISIN-Code: LU0173923524

The fund is managed by Nordea Investment Funds S.A., a company of the Nordea Group.

#### Objectives and investment policy

The sub-fund's objective is to prudently invest the shareholder's capital and to provide a return on the investment.

The sub-fund invests at least two-thirds of its total assets (excluding cash) in debt securities denominated in SEK and issued by either public authorities or private borrowers. The sub-fund can invest in debt securities with residual maturity exceeding 2 years.

The weighted average life in this sub-fund is expected to be above 1 year. The interest rate for floating-rate debt securities must be adjusted to market conditions at least once a year in accordance with their issue conditions.

The sub-fund may be exposed to other currencies than the base currency through investments and/or cash holdings. The main currency exposure in the sub-fund is to the base currency.

The sub-fund may use derivatives to achieve an efficient portfolio management or with the aim of reducing risk and/or generating additional capital or income. A derivative is a financial instrument which derives its value from the value of an underlying asset. The use of derivatives is not cost or risk-free.

The sub-fund may take part in a securities lending program.

Any investor may redeem its shares in the sub-fund on demand, on a daily basis. This sub-fund may not be appropriate for investors who plan to withdraw their money within a period of 1 year.

The sub-fund does not compare its performance against any reference index, it may freely select the securities that it will invest in.

This share class is not distributing dividends. Income from investments is reinvested.

The sub-fund is denominated in SEK. Investments in this share class settle in NOK. SEK/NOK fluctuations may lead the performance in NOK of the share class to significantly deviate from the sub-fund performance in SEK.

#### Risk and reward profile

The indicator measures the risk of price fluctuations in the sub-fund certificates based on the last 5 years volatility and places the sub-fund in category 4. This means that the purchase of units in the sub-fund is connected to **medium risk** of such fluctuations.

Please note that category 1 does not mean a risk free investment.

Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the UCITS, as the category might change in the future.

Following risks are materially relevant to the UCITS but are not adequately captured by the synthetic indicator and may cause additional loss:

- **Counterparty risk:** A counterparty (i.e. any institution providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments) may become insolvent and may fail fulfilling its obligations to the sub-fund.
- **Credit risk:** Risk of loss resulting from a debt instrument issuer that may default and fails paying the coupons and the principal to the sub-fund.
- **Derivatives risk:** Derivatives are used to increase, lower or maintain the risk level of the sub-fund. These financial instruments depend on the value of an underlying asset. A small change in the price of the underlying asset may lead to large price change of the derivatives and significant losses.
- **Event risk:** Unforeseeable events such as devaluations, drops in interest rates, political events, etc., may negatively affect the sub-fund.
- **Liquidity risk:** Some assets may become difficult to sell at a reasonable price in certain circumstances and therefore may be sold below their valuation.

For more information on risks the sub-fund is exposed to, please refer to the section "Special Risk Considerations" of the Prospectus.
