2.	MANAGEMENT REPORT	10
3.	ANNUAL FINANCIAL STATEMENTS OF THE FUND	12
REF	PORT ON REMUNERATION IN APPLICATION OF THE UCITS V DIRECTIVE	41

1. INFORMATION ON INVESTMENTS AND MANAGEMENT OF THE FUND

1.1 Investment objective

The Fund's investment objective is to outperform the benchmark index (50% compounded €STR + 8.5 basis points and 50% EURO STOXX 50 NET RETURN calculated with dividends reinvested (Bloomberg code: SX5T INDEX)) over the minimum investment horizon of three years through a flexible allocation between the equity market and money market instruments.

1.2 Tax regime

The Fund may be used for unit-linked life insurance policies.

This annual report does not purport to set out the tax implications for investors of subscribing, redeeming, holding or selling the Fund's units. These implications will vary, depending on the laws and practices that apply in the country of residence, domicile or incorporation of the unitholders and on their personal situations.

Depending on your tax status, your country of residence or the jurisdiction from which you invest in the Fund, any capital gains and income resulting from the holding of units of the Fund may be subject to taxation. We advise you to consult a tax advisor in relation to the potential consequences of purchasing, holding, selling or redeeming units of the Fund according to the laws of your country of tax residence, ordinary residence or domicile.

Neither the Management Company nor the promoters shall accept any responsibility whatsoever for any tax consequences that may arise for investors following a decision to purchase, hold, sell or redeem units of the Fund.

1.3 Regulatory information

- The Fund does not hold any financial instruments issued by companies linked to the Oddo BHF group.
- UCITS held by the Fund and managed by the management company at the Fund's reporting date: see annual financial statements in the appendices.
- **Overall risk calculation method for the Fund**: the method chosen by Oddo BHF Asset Management to measure the overall risk to the Fund is the commitment approach.
- Environmental, social and governance criteria:
 - In accordance with European Regulation (EU) 2019/2088 and Articles L. 533-22-1 and D. 533-16-1 of the French Monetary and Financial Code, investors are informed that the underlying investments of the UCITS do not take into account EU criteria on environmentally sustainable economic activities, in accordance with its status as an Article 6 product under the EU Sustainable Finance Disclosure Regulation (SFDR). All information on these criteria is available on the Oddo BHF Asset Management SAS website at www.am.oddo-bhf.com.
- Within the framework of its risk management policy, the portfolio management company establishes, implements and maintains a risk management policy and procedures that are effective, appropriate and documented, thereby allowing risks associated with its activities, processes and systems to be identified.
 - For further information, please consult the KIID of this UCI, and particularly the "Risk and reward profile" section, or its full prospectus, which are available on request from the management company or on the website www.am.oddo-bhf.com.

• Portion of income eligible for the 40% allowance under Article 158 of the French general tax code (Code Général des Impôts): None

1.4 Code of ethics

Management of intermediaries

The management company has implemented a policy for the selection and evaluation of intermediaries and counterparties. The evaluation criteria used are intermediary fees, quality of execution in view of market conditions, quality of investment advice, quality of research and analysis documents and quality of back-office execution. This policy may be consulted on the management company's website at www.oddomeriten.eu.

Brokerage fees

FCP unitholders can consult the document entitled "Report on brokerage fees" on the Management Company's website, www.am.oddo-bhf.com.

Voting rights

No voting rights are attributed to unitholders, decisions concerning the Fund being taken by the Management Company. The voting rights attached to the securities held by the Fund are exercised by the Management Company, which has the sole power to take decisions, pursuant to regulations in force. The Management Company's voting policy may be consulted at its registered office or online at www.am.oddo-bhf.com, in accordance with article 314-100 of the AMF General Regulation.

Information on the remuneration policy

Regulatory information on remuneration is appended to this report.

1.5 Information on the efficient investment techniques and derivatives used in the fund

2. MANAGEMENT REPORT

2.1 Macroeconomic climate and equity market performances in 2023

Whilst scepticism continued to reign at the start of 2023, stock market sentiment gradually warmed during the course of January. This turnaround is partly linked to the reduction in risk related to energy supplies in Europe. The warm winter meant that stocks could be maintained and prices fell to summer 2021 levels. Secondly, the Chinese government abandoned its zero-COVID policy. This resulted in a rapid normalisation in economic activity in China, ending the recurring supply chain disruptions that had also had an impact on companies in western industrialised countries. Lastly, the third key factor was the launch in mid-March of ChatGPT 4.0 – a much more powerful version. ChatGPT has demonstrated to the general public the enormous technical and economic potential of artificial intelligence (AI), and has contributed to a revaluation of technology stocks related to AI. European equity markets performed strongly, making up for the losses suffered in 2022. The EURO STOXX returned a total of 19.5% (in EUR), driven by industrial and technology companies, while the consumer staples and energy sectors lagged behind.

2.2 Transactions

Last year we gradually increased the share of equities in the fund, which was relatively low. However, at the end of the year we were still underweighting them slightly in comparison to the benchmark. We increased our exposure to the European luxury goods sector by trimming the LVMH position and buying into Hermès and Moncler. We became more exposed to semiconductor equipment suppliers by strengthening positions in ASM International and BE Semiconductor Industries. We also acquired stakes in UK catering company Compass and Unilever in the consumer goods sector. In contrast, we closed positions in Norwegian oil & gas company Equinor, call centre specialist Teleperformance and transport solutions provider Thule Group. The number of equity holdings increased from 31 to 34.

The main purchases/sales during the last financial year:

Portfolio	Security	Acquisition	Disposal	Currency

ODDO BHF ProActif Europe	Deutschland 0% 23/21.02.24	9,844,446.95		EURO

2.3 Performance

Units	Annual performance	Benchmark index
ODDO BHF ProActif Europe CI-EUR	9.98%	
ODDO BHF ProActif Europe CN-EUR	9.98%	12.66%
ODDO BHF ProActif Europe CR-EUR	9.11%	12.66%
ODDO BHF ProActif Europe GC-EUR	9.98%	

Please note that past performance is not an indication of future results. Performance may vary over time.

2.4 Outlook

The supply shock caused by prices is declining. Whilst it is still a little early to state that all is well on the pricing front, inflation is declining. The timing of the cuts in interest rates that are expected by market participants is likely to depend primarily on economic developments. Economic indicators suggest a sustained period of lacklustre economic momentum. However, the situation remains favourable on employment markets. In addition, the financial situation of companies and households is generally rather sound, despite the increase in interest costs. Accordingly, we do not expect a serious recession. If these estimates are confirmed, we can expect cuts in key rates in Europe and the US during the course of the year. The period of zero and negative interest rates is behind us. The rise in yields should make bonds more attractive to investors holding mixed portfolios. This is particularly true as the correlation between equities and bonds, which had tightened considerably as a result of the supply shock, will probably return to a more normal level. The diversification – or risk mitigation – effect of adding bonds to a mixed portfolio will therefore increase again.

We prefer companies with highly efficient capital structures and moderate levels of indebtedness which are benefiting from long-term growth trends.

3. ANNUAL FINANCIAL STATEMENTS OF THE FUND

ODDO BHF PROACTIF EUROPE FCP

12, boulevard de la Madeleine 75009 Paris

Statutory Auditor's Report on the Annual Financial Statements

Financial year ended 29 December 2023

Dear unitholders of the ODDO BHF PROACTIF EUROPE FCP,

Opinion

Following our appointment by the management company, we have audited the annual financial statements of the ODDO BHF PROACTIF EUROPE FCP for the financial year ended 29 December 2023, which are appended to this report.

In our opinion, the annual financial statements, in accordance with French accounting rules and principles, give a true and fair view of the financial position and assets and liabilities of the FCP and of the results of its operations at the end of the financial year.

Basis for the opinion

Audit framework

We have conducted our audit in accordance with professional standards applicable in France. We consider that the evidence gathered is pertinent and sufficient to serve as a basis for our opinion.

Our responsibilities in light of these standards are described in this report in the section entitled "Responsibilities of the statutory auditor in relation to auditing the annual financial statements".

Independence

We conducted our audit assignment in accordance with the rules of independence set out in the French Commercial Code and the statutory auditors' code of ethics, for the period from 31 December 2022 to the date on which our report was issued.

Statutory Auditor's Report on the Annual Financial Statements Financial year ended 29 December 2023

Justification of assessments

In accordance with the provisions of articles L.823-9 and R.823-7 of the French Commercial Code regarding the justification of our evaluations, we hereby inform you that our most important evaluations, in our professional opinion, were focused on the appropriateness of the accounting principles applied, on whether material estimates used were reasonable, and on whether all accounts were presented as per the accounting standards applicable to undertakings for collective investment with variable capital, particularly as regards financial instruments held in the portfolio.

The evaluations were made in the context of the audit of the annual financial statements, taken as a whole, and the formation of the opinion expressed herein. We have not expressed an opinion regarding individual items in the annual financial statements.

Specific verifications

We have also carried out the specific verifications required by laws and regulations in accordance with the professional auditing standards applicable in France.

We have no comment as to the fair presentation and conformity with the annual financial statements of the information given in the management company's management report.

Responsibilities of management and the corporate governance hierarchy in relation to the annual financial statements

The management company is responsible for drawing up annual financial statements giving a fair view in accordance with French accounting rules and standards, as well as implementing the internal control system it deems necessary for the drafting of annual financial statements free of material misstatements, whether as a result of fraud or error.

When drawing up the annual financial statements, it is incumbent upon the management company to evaluate the ability of the fund to continue its operations, to present in these financial statements, where applicable, the necessary information regarding continuity of operations and to apply the going concern accounting principle, unless there is a plan to wind up the FCP or end its activities.

The annual financial statements were drawn up by the management company.

Statutory Auditor's Report on the Annual Financial Statements Financial year ended 29 December 2023

Responsibilities of the statutory auditor in relation to auditing the annual financial statements

It is our responsibility to draft a report on the annual financial statements. Our objective is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Such misstatements may result from fraud or error and are considered to be material when it is reasonable to expect that they may, taken individually or collectively, influence economic decisions that readers of the financial statements may make based on them.

As stipulated in article L.823-10-1 of the French Commercial Code, our certification of the financial statements does not constitute a guarantee of the viability or quality of the management of your FCP.

As part of an audit carried out in accordance with the standards of professional conduct applicable in France, the statutory auditor shall exercise its professional judgement throughout this audit. Furthermore:

- It identifies and assesses the risks of material misstatement of the financial statements, whether due to
 fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit
 evidence considered to be sufficient and appropriate to provide a basis for its opinion. The risk of
 material misstatement not being detected is considerably higher when it is the result of fraud rather
 than error, since fraud may involve collusion, falsification, voluntary omissions, false declarations or the
 circumvention of the internal control system;
- It assesses the internal control system that is relevant for the audit in order to define audit procedures that are appropriate in the circumstances, and not for the purpose of expressing an opinion on the internal control system;
- It evaluates the appropriateness of the accounting methods used and the reasonableness of the accounting estimates made by the management, as well as the related information in the annual financial statements:
- It evaluates the appropriateness of the management company's application of the going concern accounting principle and, based on the information gathered, the existence or absence of significant uncertainty linked to events or circumstances likely to cast doubt on the FCP's ability to continue its operations. This evaluation is based on the information gathered prior to the date of its report; however, it should be noted that subsequent circumstances or events may cast doubt on the continuity of its operations. If it concludes that significant uncertainty exists, it draws the attention of readers of its report to the information provided in the annual financial statements giving rise to this uncertainty or, if this information has not been provided or is not relevant, it certifies the annual financial statements with reservations or refuses to certify them;

Statutory Auditor's Report on the Annual Financial Statements Financial year ended 29 December 2023

it assesses the presentation of all of the annual financial statements and evaluates whether or

not the annual financial statements depict the underlying operations and events fairly.

APPENDIX

The fund has complied with the accounting rules prescribed by the regulations in force and, in particular, with the accounting standards applicable to UCITS.

The annual financial statements are presented in accordance with the provisions of ANC Regulation 2014-01, as amended.

The accounting currency is the euro.

ASSET VALUATION AND ACCOUNTING RULES

Asset valuation rules:

The calculation of the net asset value per unit is subject to the following valuation rules:

- Financial instruments and transferable securities traded on regulated markets are valued at their market price using the following principles:
- The valuation is based on the last official market price.

The market price used depends on the market on which the instrument is listed:

European markets:

Asian markets:

Last market price on the net asset value calculation day
Last market price on the net asset value calculation day
Last market price on the net asset value calculation day
Last market price on the net asset value calculation day

The prices used are those known the following day at 9:00 (Paris time) and collected from financial information providers: Fininfo or Bloomberg.

In the event that no price is available for a security, the last known price is used.

Debt securities and similar securities that are not traded in large volumes are valued by means of an actuarial method; the reference rate used is made up of:

- a risk-free rate obtained through linear interpolation of the OIS curve, updated daily;
- a credit spread obtained at the point of issue and kept constant throughout the lifecycle of the security.

However.

- transferable debt securities with a residual maturity of less than or equal to three months will be valued on the basis of the straight-line method.
- Government securities with a market price are then valued at the market price (see above for the valuation rule for financial instruments and securities traded on a regulated market).
- Financial contracts (futures, options or swap transactions concluded on over-the-counter markets) are valued at their market value or at a value estimated according to the terms and conditions determined by the Management Company. The method for valuing off-balance sheet commitments consists in valuing futures contracts at their market price and in converting options into the equivalent value of the underlying.
- Financial guarantees: in order to limit counterparty risk as much as possible while also factoring in operational constraints, the Management Company applies a daily margin call system, per fund and per counterparty, with an activation threshold set at a maximum of EUR 100,000 based on an evaluation of the mark-to-market price.

Deposits are recorded based on their nominal value plus the interest calculated daily.

The prices used for the valuation of futures or options are consistent with those of the underlying securities. They may vary depending on where they are listed:

European markets: Settlement price on the NAV calculation day, if different from the last price.

Asian markets: Last market price on the NAV calculation day, if different from the last price.

North and South American markets: Last market price on the NAV calculation day, if different from the last price.

If no price is available for a future or option contract, the last known price is used.

Securities subject to a temporary acquisition or sale agreement are valued in accordance with the regulations in force. Securities received under repurchase agreements are recorded on their acquisition date under the heading "Receivables on securities received under a repurchase agreement (pension)" at the value fixed in the contract by the counterparty of the liquidity account concerned. For as long as they are held they are recognised at that value plus the accrued interest from the securities in custody. Securities transferred under repurchase agreements are withdrawn from their account on the date of the transaction and the corresponding receivable is booked under the heading "Securities transferred under a repurchase agreement (pension)"; they are valued at their market value. Payables on securities transferred under repurchase agreements are recorded under the heading "Payables on securities transferred under a repurchase agreement (pension)" by the counterparty of the liquidity account concerned. It is maintained at the value determined in the contract plus any accrued interest on the debt

- Other instruments: Units or shares of UCITS are valued at their last known net asset value.
- Financial instruments whose prices have not been determined on the valuation day or whose prices have been adjusted are valued under the Management Company's responsibility at their foreseeable sale prices. These valuations and their justification are communicated to the statutory auditor at the time of the audit.

Accounting methods:

Income accounting:

The interest on bonds and debt securities is calculated using the accrued interest method.

Transaction cost accounting:

Transactions are recorded excluding fees.

Appropriation of distributable income

The net income for the financial year is equal to the amount of interest, arrears, dividends, premiums and prizes, and directors' fees as well as all income generated by the securities held in the portfolio of the Fund, plus income generated by temporary cash holdings, less management fees and borrowing costs.

The distributable income consists of:

- 1) The net income for the financial year plus retained earnings, plus or minus the balance of the income equalisation accounts for the last financial year.
- 2) The realised capital gains, net of fees, minus realised capital losses, net of fees, recorded during the financial year, plus net capital gains of the same kind recorded during previous financial years and that have not been subject to distribution or accumulation, plus or minus the balance of the capital gains equalisation accounts.

The categories of income referenced in points 1 and 2 respectively may be distributed, in full or in part, independently of each other.

The Portfolio Management Company decides on the allocation of distributable income.

For each unit class, where applicable, the Fund may adopt one of the following methods:

- pure accumulation: distributable income shall be fully accumulated, with the exception of those amounts which are subject to compulsory distribution by law;
- pure distribution: income shall be partially or fully distributed, rounded off to the nearest figure; the Fund may pay interim dividends;

- for funds that wish to choose whether to accumulate and/or distribute income, the portfolio management company decides on the allocation of distributable income each year.

The portfolio management company decides on the allocation of net income according to the distribution of income provided for in the prospectus and may pay interim dividends where applicable.

INFORMATION ON FEES

Management and administration fees

Fees charged to the Fund	Basis	Rate
Financial management fees* and administrative fees not payable to the Management Company (in particular the statutory auditor, custodian, distributors and lawyers)	Net assets	CR-EUR units: Maximum of 1.60%, inclusive of tax CI-EUR, CN-EUR and GC-EUR units: Maximum 0.80%, inclusive of tax
Performance fee	Net assets	CR-EUR, CN-EUR, GC-EUR units: 20% of the Fund's outperformance relative to the benchmark (50% compounded €STR + 8.5 basis points, and 50% EUROSTOXX 50 NET RETURN dividends reinvested), once any past underperformance over the last five financial years has been fully offset and provided that the Fund's absolute return is positive. CI-EUR units: Up to 20% of the Fund's outperformance relative to the benchmark (50% compounded €STR + 8.5 basis points, and 50% EUROSTOXX 50 NET RETURN dividends reinvested), once any past underperformance over the last five financial years has been fully offset.
Transaction fees charged by third parties: -Management Company: 100%	Payable on each transaction	Rate: Equities: depending on the markets, with a maximum of 0.50% inclusive of tax and a minimum of EUR 7.50 exclusive of tax for French equities and EUR 50 exclusive of tax for foreign equities. Bonds: 0.03% inclusive of tax with a minimum of EUR 7.50 exclusive of tax Money market instruments and derivatives: None

- *The performance fees will be charged in favour of the Management Company as follows:
- The performance fee is based on a comparison between the performance of the Fund and that of the benchmark index, and includes a method for clawing back past underperformance.
- The Fund's performance is determined on the basis of its book value after taking into account fixed management fees and before deduction of the performance fee.
- Outperformance is calculated on the basis of the "indexed asset" method, which is used to simulate a fictitious asset experiencing the same subscription and redemption conditions as the Fund, while enjoying the same performance as the benchmark index. This indexed asset is then compared with the Fund's assets. The difference between the two is the Fund's outperformance relative to the benchmark index.

- Whenever the NAV is calculated, provided that the Fund's performance exceeds that of the benchmark index, a performance fee provision is booked. In the event that the Fund underperforms its benchmark index between two net asset values, any previously accumulated provision shall be reduced accordingly. The amounts deducted from the provision cannot exceed the amount previously accumulated. The performance fee is calculated and provisioned separately for each Fund unit.
- The benchmark index will be calculated in the unit currency, regardless of the currency in which the relevant unit is denominated, except in the case of units hedged against currency risk, for which the benchmark index will be calculated in the Fund's reference currency.
- The performance fee is measured over a calculation period that corresponds to the Fund's financial year (the "Calculation Period"). Each Calculation Period starts on the last business day of the Fund's financial year, and ends on the last business day of the next financial year. For units launched during a Calculation Period, the first Calculation Period will last at least 12 months and end on the last business day of the next financial year. The total performance fee is payable to the Management Company annually after the Calculation Period has ended.
- In the event of redemptions, if a performance fee provision has been booked, then the proportion of the provision attributable to these redemptions is crystalised and definitively allocated to the Management Company.
- The horizon over which performance is measured is a rolling period of up to five years ("Performance Reference Period"). The clawback mechanism may be partially reset at the end of this period. This means that after five years of cumulative underperformance over the Performance Reference Period, underperformance may be partially reset on a rolling annual basis, wiping out the first year of underperformance during the Performance Reference Period concerned. In relation to the Performance Reference Period concerned, underperformance in the first year may be offset by outperformance in the following years of the Performance Reference Period.
- Over a given Performance Reference Period, any past underperformance must be clawed back before performance fees become payable again.
- Where a performance fee is crystalised at the end of a Calculation Period (except when due to redemptions), a new Performance Reference Period begins.
- For CR-EUR, CN-EUR and GC-EUR units: no performance fee is payable if the unit class's absolute return is negative. The absolute return is defined as the difference between the current net asset value and the last net asset value calculated at the end of the previous Calculation Period (Reference NAV).
- Holders of CI-EUR units should note that, provided the Fund outperforms, performance fees may be paid to the Management Company even if the absolute return is negative.

Report on remuneration in application of the UCITS V Directive

1- Quantitative information

	Fixed remuneration	Variable remuneration (*)	Number of beneficiaries (**)	
Total amount of				
remuneration paid from	15,071,546	15,182,204	208	
January to December 2023	, ,	, ,		

^(*) Variable remuneration awarded for 2023 but paid in 2024 and subsequent years

^(**) Beneficiaries shall be understood as all OBAM employees having received remuneration in 2023 (Permanent contract/Temporary contract/Apprenticeship/Internship/Foreign offices)

	Senior managers	Number of beneficiaries	Members of staff with the ability to affect the risk profile of the Fund	Number of beneficiaries
Aggregate amount of remuneration paid for the 2023 financial year (fixed and variable*)	3,432,024	6	18,865,257	60

^(*) Variable remuneration in respect of 2023 but paid in 2024 and subsequent years

2- Qualitative information

2.1. Fixed remuneration

Fixed remuneration is determined on a discretionary basis in line with the market. This allows us to meet our targets for the recruitment of qualified and operational staff.

2.2. Variable remuneration

Pursuant to the AIFM 2011/61 and UCITS V 2014/91 directives, ODDO BHF Asset Management SAS ("OBAM SAS") has established a remuneration policy intended to identify and describe the methods for implementing the variable remuneration policy, covering in particular the identification of the persons concerned, the establishment of governance, the remuneration committee and the payment terms for variable remuneration.

Variable remuneration paid within the Management Company is determined on a largely discretionary basis. As such, once fairly accurate estimates of the results for the year are available (mid-November), a budget for variable remuneration is determined and the various managers – in association with the group HRD – are invited to propose an individual budget breakdown.

This process takes place after the appraisal meetings, in which managers can discuss the quality of each employee's professional performance with them for the year under way (in relation to previously established targets) and set targets for the next year. This appraisal has a highly objective component that addresses whether responsibilities have been met (quantitative targets, sales figures or how the management places in a specific ranking, performance fees generated by the fund managed), as well as a qualitative component (the employee's attitude during the year).

It should be noted that, as part of their variable remuneration, some managers may receive a portion of the performance fees received by OBAM SAS. However, the amount to be allocated to each manager is determined in line with the abovementioned process and there are no individualised contractual packages that regulate the distribution and payment of these performance fees.

All OBAM SAS employees fall within the scope of application of the remuneration policy set out below, including employees who do not work in France.

3- Specific provisions for risk takers and deferred variable remuneration

3.1. Risk takers

Each year, OBAM SAS shall identify those persons who may be qualified as risk takers in accordance with the regulations in force. The list of employees thus identified as risk takers shall then be submitted to the Remuneration Committee and passed on to the relevant management body.

3.2. Deferred variable remuneration

OBAM SAS has set EUR 200,000 as the proportionality threshold triggering payment of a deferred variable remuneration amount.

As such, employees whose variable remuneration falls below this EUR 200,000 threshold will receive their variable remuneration immediately, regardless of whether or not they are risk takers. In contrast, an employee classed as a risk taker whose variable remuneration is more than EUR 200,000 must receive deferred payment of part of this variable remuneration in accordance with the terms set out below. To ensure consistency throughout OBAM SAS, a decision has been made to apply the same variable remuneration payment terms to all company employees, whether or not they are risk takers. An employee who is not a risk taker but whose variable remuneration exceeds EUR 200,000 will therefore receive deferred payment of part of this variable remuneration in accordance with the provisions set out below.

For the most significant variable remuneration, a second threshold is set at EUR 1,000,000. Variable remuneration allocated for a year which exceeds this threshold would then be paid, for the portion exceeding this threshold, according to the following terms: 40% in cash immediately, 60% in cash as part of a deferred payment under the conditions defined above. It should be noted that this remuneration will, for the portion below EUR 1,000,000, have given rise to the application of the payment rules exceeding the EUR 200,000 threshold specified above. All of this deferred portion will be subject to indexation as described below.

As regards the indexation of deferred remuneration applicable to all relevant persons at the management company, in accordance with the commitments made by OBAM SAS, the provisions relating to the deferred part of variable remuneration will be calculated using a tool introduced by OBAM SAS. This tool will consist of a basket of funds that are representative of each of the asset management strategies of OBAM SAS.

This indexation will not be capped, nor will a floor be applied. As such, provisions for variable remuneration will fluctuate in line with the outperformance or underperformance of the funds representing the OBAM SAS range against their benchmark, where applicable. Where there is no benchmark, absolute return is used.

4- Changes to the remuneration policy made during the last financial year

The Management Company's governing body met during 2023 to review the general principles of the remuneration policy with members of the Compliance team and in particular the calculation methods for indexed variable remuneration (composition of indexation basket).

The threshold triggering payment of a deferred variable remuneration amount has been changed in the remuneration policy.

It can be consulted on the management company's website (in the Regulatory Information section).
