## What is this product?

### Type

This is a Luxembourg fund in the legal form of a société anonyme, established as a société d'investissement à capital variable according to the law of December 17, 2010 on undertakings for collective investment.

### Term

The fund is a perpetual fund.

### Objectives

The sustainability factors comprising the Sub-Fund's investment objective are analysed through SRI Research by the Investment Manager in order to assess how sustainable development and long-term issues are taken into account in the strategy of an issuer. "SRI Research" means the overall process of identifying potential risks as well as potential opportunities of an investment in securities of an issuer related to the analysis of sustainability factors. SRI Research data combines external research data (which might have some limitations) with internal analyses. Based on a combination of the results of the external and/or internal analyses of the sustainability factors, an internal rating is derived monthly (the "SRI Rating") and is afterwards assigned to a corporate or sovereign issuer. SRI Rating is to be understood as an internal rating assessment which is based on SRI Research. Each SRI Rating is therefore based upon the analysis of criteria considering the domains human rights, social, environmental, business behaviour and governance. SRI Ratings may be used to apply negative or positive screens on the Sub-Fund's investment universe in accordance with the investment objective of the Sub-Fund. While most holdings of the Sub Fund will have a corresponding SRI Rating, some investments cannot be rated according to the SRI Research methodology. Examples of instruments not attaining to the SRI Rating include, but are not limited to, cash, deposits, and non-rated investments. The Sub-Fund's internal SRI Rating is an integral part of the portfolio construction, supplemented by the GHG intensity which assesses GHG emissions of a company in tCO<sub>2</sub>e per millions of sales. Both the SRI Rating and the GHG intensity factor are used to rank and select or weight securities for the portfolio construction.

### Intended retail investor

This share class is aimed at professional clients and eligible counterparties. An investment in this Sub-Fund is suitable only for investors who are able to appraise the risks and economic value of the investment. The investor must be prepared to accept an increased volatility of the Sub-Fund and potentially high capital losses in order to achieve above-average potential investment performances. The Sub-Fund is intended for investors with a medium to long-term investment horizon. The investor may bear losses (up to the full loss of the invested capital). The Fund falls into risk class 4 on a scale of 1 (safety-oriented; very low return) to 7 (very risk-tolerant; highest return).

## What are the risks and what could I get in return?

### Risk Indicator

**The risk indicator assumes you keep the product for 4 years.**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period : 4 years			
Investment EUR10,000 Scenarios		If you exit after 1 year	If you exit after 4 years
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.		
<b>Stress</b>	What you might get back after costs	1,690 EUR	2,180 EUR
	Average return each year	-83.1%	-31.7%
<b>Unfavourable</b>	What you might get back after costs	9,350 EUR	12,740 EUR
	Average return each year	-6.5%	6.2%
<b>Moderate</b>	What you might get back after costs	11,130 EUR	18,310 EUR
	Average return each year	11.3%	16.3%
<b>Favourable</b>	What you might get back after costs	15,050 EUR	25,700 EUR
	Average return each year	50.5%	26.6%

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 12/2021 and 03/2024.

The moderate scenario occurred for an investment between 05/2017 and 05/2021.

The favourable scenario occurred for an investment between 03/2020 and 03/2024.

## What happens if Structured Invest S.A. is unable to pay out?

The default of the management company will have no direct effect on your fund shares, since the statutory provision provides that in the event of insolvency of the management company, the funds do not enter into the insolvency assets of the management company, but are ring-fenced.

## What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

## Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 4 years
<b>Total costs EUR</b>	EUR 142	EUR 839
<b>Annual cost impact (*)</b>	1.4%	1.6% per year

(\*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 18.0% before costs and 16.3% after costs.

## Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	We do not charge an entry fee.	EUR 0
<b>Exit costs</b>	We do not charge an exit fee for this product.	EUR 0
Ongoing costs taken each year		
<b>Management fees and other administrative or operating costs</b>	1.02% of the value of your investment per year. This is an estimate based on actual costs over the last year.	EUR 103
<b>Transaction costs</b>	0.38% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	EUR 38
Incidental costs taken under specific conditions		
<b>Performance fees</b>	There is no performance fee for this product.	EUR 0

## How long should I hold it and can I take money out early?

### Recommended holding period: 4 years.

The recommended holding period is based on our assessment of the risk and reward characteristics and costs of the product.
