This Key Information Document is accurate as at 30 November 2023.

What is this product?

Type

This product is a sub-fund of an open-ended umbrella fund authorised by the Central Bank of Ireland pursuant to the UCITS Regulations (as amended).

Term

The Fund has no maturity date.

Objectives

The Fund seeks long-term capital appreciation. There can be no assurance that the investment objective will be achieved. The Fund will seek to achieve its investment objective by investing in equity and equity-related securities of companies located around the world that the Sub-Investment Manager believes are involved in activities that will reduce global carbon emissions and aid in the transition to a clean energy future.

The benchmark of the Fund is the MSCI ACWI IMI (All Country World Investable Market Index) (the "Benchmark"); however, the Sub-Investment Manager has discretion over the investments of the Fund. The Fund will be actively managed and does not intend to track the Benchmark. The Benchmark is being used by the Fund for performance comparison purposes only.

The Sub-Investment Manager looks for companies that it believes contribute towards the clean energy transition through areas such as fuel decarbonisation, carbon capture and storage, electrification, renewables, infrastructure modernisation, and energy efficiency. The Fund may invest in companies that the Sub-Investment Manager believes will support improved sustainability practices over time, such as natural gas companies.

The Fund may invest in securities of issuers of any market capitalisation size. The Fund can invest without limit in non-U.S. equity and equity-related securities, typically invests in a number of different countries, and may invest a significant portion of its assets in companies located in emerging markets. The Fund may also invest in China A Shares through the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect programs.

The Fund may also hold cash, on an ancillary basis, and invest in money market instruments, which may comprise fixed term deposits, fixed and floating rate instruments including (but not limited to) certificates of deposit, banker acceptances, freely transferable promissory notes, commercial paper, floating rate notes, debentures, asset backed commercial paper, government bonds, corporate bonds, asset backed securities and money market funds. The Fund may not be leveraged in

excess of 100% of its net asset value, through the use of derivatives.

The Fund promotes the reduction of carbon emissions (a sustainability characteristic) through its incorporation of environmental, social and governance ("ESG") factors into its investment process and is therefore classified under Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR"). The Fund does not invest in companies listed on certain exclusion lists published by third parties and based on ESG considerations, as detailed in the Supplement for the Fund. Although the Fund promotes a sustainability characteristic, it does not have sustainable investment as its investment objective.

It is not currently anticipated that dividends will be declared in respect of the Class. Net investment income attributable to the Class is expected to be retained by the Fund, which will increase the net asset value per share of the Class.

Investors can buy and sell their shares on each business day of the Fund.

The shares are denominated in Pound Sterling. The base currency of the Fund is the US Dollar.

The Fund is intended for investors who want long-term exposure to publicly traded equity and equity-related securities. Investors of the Fund should be prepared to accept the risks associated with investing in equities markets.

The Fund's assets are held through the Company's Depository, which is State Street Fund Services (Ireland) Limited. You can obtain further and other practical information, including the current prospectus and supplement (including the SFDR annex), net asset value per share of the Fund, and most recent financial statements from the applicable distributor or from our website: www.pgim.com/ucits. All such documents are available in English on paper and are free of charge on request. The prospectus is also available in German. The assets of the Fund are segregated from other funds in the Company. This means that the assets of one fund cannot be used to meet the liabilities of another fund. This Key Information Document describes the Fund only, the prospectus and the annual and interim reports and accounts are prepared for the Company rather than the Fund. You may at any time switch all or some of your shares in the Fund for shares in any other fund of the Company and may obtain further information about this from the Conversion of Shares section of the prospectus.

Intended Retail Investor

The Fund is intended for retail and institutional investors. The investor's objective for this investment should be aligned with that of the product as outlined above.

What are the risks and what could I get in return?

Risk Indicator

Lower Risk

Higher Risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk. This rates the potential losses from future performance at a medium-high level.

If the product currency differs from your investment currency, the following applies: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Due to effects of unusual market conditions, other risks could be triggered, such as: counterparty risk and liquidity risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between August 2022 and September 2023.

The moderate scenario occurred for an investment between June 2017 and June 2022.

The favourable scenario occurred for an investment between January 2016 and January 2021.

Recommended holding period: 5 years.

Example Investment: GBP 10,000.

What happens if PGIM Funds plc is unable to pay out?

You may face a financial loss due to a default of the Fund. These losses are not covered by an investor compensation or guarantee scheme. The assets of the Fund are segregated from the assets of the manufacturer. Therefore, in case of a default of the manufacturer, the assets of the Fund will not be affected.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- GBP 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	60 GBP	300 GBP
Annual cost impact (*)	0.6%	0.7% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 16.0% before costs and 15.3% after costs.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years.

This product has no required holding period; however it is recommended that you hold the product for at least 5 years. The product is designed to be held over the medium term and investors should not expect to obtain short term gains as performance may be more volatile over shorter periods. This product has an open-ended structure, allowing you to redeem your shares before the recommended holding period. There are no fees or penalties charged by the product or the issuer for cashing out prior to the end of the recommended holding period.

How can I complain?
