1. Legal structure

Pictet (the “Fund”) is an open-ended investment company (SICAV) with multiple compartments incorporated under Luxembourg law, in accordance with the provisions of Part I of the Law of 20 December 2002 governing undertakings for collective investment. The Fund was incorporated for an indefinite period on 20 September 1991 under the name of Pictet Umbrella Fund. Its Articles of Association were last amended by notarial act dated 9 April 2010. The Fund has designated Pictet Funds (Europe) S.A. (the “Management Company”) to act as management company in compliance with section 13 of the Law of 20 December 2002.

2. Investment policy and objectives

This compartment aims to achieve growth by investing in equities or similar securities issued by biopharmaceutical companies that are at the forefront of innovation in the medical sector. The compartment will invest at least two-thirds of its total assets or wealth in equities issued by companies operating in this sector. Geographically, the compartment’s investment universe is not restricted to a particular area. However, in light of the particularly innovative nature of the pharmaceutical industry in North America and Western Europe, the vast majority of investments will focus on these regions.

To capitalise on particularly innovative projects in the drugs industry, the Biotech Compartment may invest up to 10% of its net assets in “Private Equity” and/or unlisted securities.

This compartment will hold a diversified portfolio composed of securities issued by listed companies, within the limits allowed by the investment restrictions. These securities may be ordinary or preferred shares and, to a lesser extent, warrants on transferable securities and options. In addition, the Compartment may also invest up to 10% of its net assets in UCIs.

The compartment may also invest in structured products, such as bonds or other transferable securities whose returns are linked to the performance of an index, transferable securities or a basket of transferable securities, or an undertaking for collective investment, for example.

The compartment may use derivative techniques and instruments for efficient management, within the limits specified in the investment restrictions.

3. Risk profile of the Compartment

The Compartment is subject to certain risks inherent in each investment, such as the following:

- risks specific to a given market
- variations in exchange rates
- variations in interest rates.

Invested capital may fluctuate downwards as well as upwards, and investors may not recuperate the entire value of the capital initially invested.

Investors should be aware that the acquisition of derivative instruments involves certain risks that could have a negative effect on the performance of the compartment. In addition, due to their volatility, warrants present an above-average economic risk.

For further information regarding the risks associated with the investment policy, please refer to the full prospectus.
