INVESTMENT PROCESS

In actively managing the Compartment, the investment manager uses a combination of market and issuer analysis to identify those securities that offer the best performance in light of interest rate trends. The Compartment's management approach uses strict risk controls. It also applies an exclusion policy relating to direct investment in issuers that are deemed incompatible with Pictet Asset Management's approach to responsible investment. For further information, please refer to our exclusion framework in the Responsible Investment policy*. It methodically exercises voting rights and may engage with issuers in order to positively influence ESG practices. The portfolio composition is not constrained relative to the benchmark, so the similarity of the Compartment's performance to that of the benchmark may vary.

Terms to understand

Bonds Securities that represent an obligation to repay a debt, along with interest.

Derivatives Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

Money market instruments Financial instruments designed to provide stable value, interest and a very low risk of loss, as well as being readily convertible into cash.

Other characteristics

Designed for investors who understand the risks of this Compartment and plan to invest for less than 1 year(s) or may need to take their money out at any time. This is a distribution share class, meaning that it intends to pay income to the holder. Orders to buy, switch or redeem shares are ordinarily processed on any day that is a full bank business day in Luxembourg.

Risk and reward profile

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Compartment offers no capital guarantee or asset protection measures. The Compartment may be exposed to the following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.
- **Credit risk:** sudden losses may occur when issuers of debt securities default on their payment obligations.
- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Sustainability risk:** ESG related risk events or conditions could cause a material negative impact on the value of the investment if they were to occur.

Further information can be found in the prospectus.

The **ongoing charges** figure is based on expenses for the period ending on 17 June 2021. This figure may vary from year to year.
