The Transfer Agent dealing cut off is 12.00 noon GMT on Valuation Day for all Sub-Funds.

*Trade receipt deadline 4.00pm GMT on Valuation Day, 31 December 2023 for the Annual Accounts.

**Trade receipt deadline 9.00am GMT on Valuation Day, 31 December 2023 for the Annual Accounts.

***Trade receipt deadline 11.30am GMT on Valuation Day, 31 December 2023 for the Annual Accounts.

****Trade receipt deadline 1.00pm GMT on Valuation Day, 31 December 2023 for the Annual Accounts.

†Sub-Funds registered with the Securities and Futures Commission in Hong Kong.

‡Sub-Funds not authorised in Hong Kong and not available to the public in Hong Kong.

‡Sub-Funds available for sale in Germany. Fund documentation (Key Information Document ("KID"), Prospectus, Trust Deed, Semi-Annual and Annual Accounts) and information on issue and redemption of prices are available from the office of the German Paying/Information Agent.

Each of the Sub-Funds which are registered with the Securities and Futures Commission (the "SFC") in Hong Kong are regulated under an equivalent jurisdiction in the form of the UCITS Regulations. While the SFC recognises that annual reports of recognised jurisdiction schemes will vary in content, annual reports are expected to offer investors comparable disclosure.

Background to the Fund (continued)

The following Sub-Funds have terminated operations in prior years and are pending revocation by the CBI. Termination audited financial statements continue to be prepared for the below Sub-Funds as the Sub-Funds still hold residual cash balances at the balance sheet date.

- PineBridge Emerging Europe Equity Fund
- PineBridge Global Emerging Markets Bond Fund
- PineBridge Global Emerging Markets Local Currency Bond Fund
- PineBridge Global Strategic Income Fund

PineBridge Investments Ireland Limited (the "Manager") may create additional Sub-Funds, with the prior approval of the Central Bank and the Trustee. Each Sub-Fund will bear its own liabilities and shall not bear the liabilities of any other Sub-Funds.

The Prospectus, Key Investor Information Documents ("KIIDs") / KIDs, the unaudited semi-annual report and the annual report and audited financial statements as well as a listing of the schedule of portfolio changes during the financial year under review can be obtained free of charge from the Manager at the address shown on page 2.

Investment Objectives

The assets of each Sub-Fund will be invested separately in accordance with the investment objectives and policies of the relevant Sub-Fund as set out in the Prospectus and outlined in each Investment Manager's Report. Material changes to the investment objectives of each Sub-Fund will not be made without unitholder approval and in the event of any such change, notice will be given to unitholders to enable them to redeem their units before the changes take effect.

Calculation of Net Asset Value

The Net Asset Value (the "NAV") per unit is calculated for each Dealing Day by dividing the value of the assets of the relevant Sub-Fund less its liabilities to include a provision for duties and charges, by the number of units then outstanding. The value of the underlying assets is adjusted for accrued income and liabilities excluding management fees, unitholder servicing and maintenance fees (as appropriate) and other Class specific charges, where applicable. It is then allocated between the various Classes based on their pro rata closing NAVs as of the previous Dealing Day. Where applicable, Class currency hedging impact is applied to the relevant unit Class. The management fee, the unitholder servicing and maintenance fee (as appropriate) and other Class specific charges are then applied to each Class.

The NAV of each Sub-Fund is calculated in the Functional Currency of that Sub-Fund. For Sub-Funds with Classes denominated in a currency other than the Functional Currency, the NAV of such Classes is translated to the relevant Sub-Fund currency. The NAV per unit for each class is available on www.pinebridge.com.

Irish Funds Corporate Governance Code

The Irish Funds ("IF"), in association with the Central Bank has published a corporate governance code (the "Code") to be adopted by Irish authorised collective investment schemes. The Board of Directors of the Manager voluntarily adopted the code effective from 31 December 2012 and the Fund operates in full compliance with the Code.

Significant Events During the Financial Year

The prospectus supplement for PineBridge Asian High Yield Total Return Bond Fund was updated on 16 January 2023 for the addition of

- VAG driven restrictions language (non IG exposure),
- PBI Singapore as a Sub Investment Manager,
- Indonesia and Macau added to the list of countries included in the "Asia Pacific Region" definition.

The prospectus supplement for PineBridge Asia ex Japan Small Cap Equity Fund was updated on 16 January 2023 for the addition of PBI Singapore as a Sub Investment Manager.

Background to the Fund (continued)

Significant Events During the Financial Year (continued)

The main prospectus and supplements were updated on 25 April 2023 for the following changes:

- Director resignation;
- Change of Legal Advisors;
- Update of Taxonomy Regulation;
- Principal Adverse Impact;
- Investment Restrictions;
- Initial Offer Period;
- Change of Investment Managers;
- Taxation wording;
- Dealing Terms;
- Addition of new share classes.

Please refer to the investor notice letter that was made available at PineBridge Global Funds website on 26 April 2023.

Prospectus supplement for PineBridge Europe Small Cap Equity Fund was updated on 29 June 2023 for benchmark change with effective date of 1 July 2023.

On 7 November 2023, the investment policy of the PineBridge Global Bond Fund was amended to note that the Sub-Fund may invest less than 30% of its net asset value in debt securities that are issued in Mainland China directly via the China Interbank Bond Market access, Bond Connect and/or the qualified foreign investor(s) (QFI) scheme.

Please see Note 11 for details of share class launches and terminations during the financial year.

The continued Russian engagement in military actions across Ukraine may still affect the Sub-Funds over the coming period as it will continue to cause instability on the global and European markets. The Investment Manager is leveraging established risk frameworks as the crisis in Ukraine continues to evolve. To maintain the protection and security of client assets, the Investment Manager is closely monitoring for any emerging risks impacting portfolios and will continue to monitor this situation and take appropriate actions as needed.

There have been no other significant events affecting the Fund during the financial year.

Significant Events Since the Financial Year End

PineBridge Global Emerging Markets SDG Corporate Bond Fund terminated on 17 January 2024.

PineBridge USD Investment Grade Credit Fund Class YYDC USD launched on 9 February 2024.

Since the financial year-end, PineBridge Global Emerging Markets Focus Equity Fund has had redemptions amounting to 26.26% of the Net Asset Value.

There have been no other significant events affecting the Fund since the financial year end.

Investment Manager's Report

PINEBRIDGE ASIA EX JAPAN EQUITY FUND

Portfolio Objective

PineBridge Asia ex Japan Equity Fund seeks long-term capital appreciation by investing in equity and equity related securities of companies whose assets, product or operations are in the Asian Region. The Sub-Fund may also, to a lesser extent, invest in equity-related securities of companies whose assets, products or operations are in Australia and New Zealand.

Portfolio Performance

For the year 1st January to December 31st 2023, the PineBridge Asia ex-Japan Equity Fund Class "A", "A5H", "C", "L", "Y" and "Z" returned 0.16%, (1.75%), (0.29%), 0.71%, 0.97%, and 1.98% respectively. Over the same period, the benchmark index, MSCI All Country Asia ex Japan Daily Total Return Net (USD) and (SGD) returned 5.98% and 4.24% respectively.

Portfolio Overview

2023 had been another rollercoaster ride for investors in Asia. We started the year strongly with the excitement of China re-opening after 'zero Covid-19' but fizzled by mid of quarter one. Sentiment turned south on the back of subdued consumption demand, wobbly property sector, patchy economic recovery, slowing factory output, weaker than expected credit growth environment and falling exports due to slowing global economy. These led to some selloffs as investors started to doubt the recovery in China despite low base in 2022. Additionally, the heightened US-China tension had worsened the selloff in the China equity market, putting investors in fear. Not everything was bad - investor enthusiasm towards the developing artificial intelligent (AI) themed opportunities and technology segments were increasing throughout 2023 making Taiwan and Korean the hubs for long term opportunities.

Asian equities continued to be under stress in early part of second half of 2023 as interest rates continued to rise, oil price heading north while global demand was slowing, coupled with domestic economic issues unique to each geography led the selloff in Asian equities. Both rate sensitive and technology heavy markets were sold off. As inflation started to peak out, bond yields and USD were lower. Asian equities reacted favorably, especially those markets sensitive to interest rate and global growth. However, China was the outlier ending the year with a negative print. China continued to grapple with a weak domestic growth, real estate sector crisis and slow demand recovery on the ground. Investors remained cautious while awaiting government announcement for more targeted fiscal measures against a deflationary backdrop. For 2023, Taiwan, Korea and India led in return, while Hong Kong, China and Thailand posted double digit losses.

The fund underperformed its benchmark in 2023, this was largely due to the underperformance in the first half of 2023. By geographic location, our overweight position in China in the first half of 2023 was the key detractor, while our positions in Taiwan, Korea and India contributed to the fund performance. By sector, consumer staples and real estate dragged the fund performance, while utilities and industrials contributed to the performance of the fund.

Portfolio Outlook

Asia ex Japan equities have ended the year 2023 on a strong note post Federal Reserve (Fed) pivotal decision towards probable rate cuts. In 2024, peaking bond yields and a weakening USD should provide solid tailwinds for the Asia ex Japan equities. Despite being the worst performing market in 2023, we remain constructive on China and we believe stock selection will play a crucial role. We find good quality companies in China which are trading within historical low valuation band and when compared to peers in the region those valuation multiples are very attractive.

Additionally, we are positive on India as the growth outlook is much clearer compared to its peers in Asia, and its earnings growth outlook continue to be resilient as the broader capex cycle is still in early stage. Despite overall valuation looks a bit hefty optically, we manage to find interesting opportunities in India that are trading at attractive valuations which will give us decent upside.

Investment Manager's Report (continued)

PINEBRIDGE ASIA EX JAPAN EQUITY FUND (continued)

Portfolio Outlook (continued)

We are also positive on tech heavy countries Korea and Taiwan as earnings have bottomed out and are expected to turnaround in 2024. Earnings visibility has improved as the inventory for technology-related products has corrected to a healthy level. Similarly, we are optimistic in Philippines on the back of attractive valuation with improving earnings visibility going forward coupled with better macro environment. We are cautious in Singapore as do not find the valuation attractive.

PineBridge Investments Asia Ltd.
January 2024

Investment Manager's Report (continued)

PINEBRIDGE ASIA EX JAPAN SMALL CAP EQUITY FUND

Portfolio Objective

PineBridge Asia ex Japan Small Cap Equity Fund seeks long-term capital appreciation by investing in smaller to medium-sized companies in the Asian Region, i.e. companies whose assets, products or operations are in the Asian Region. In practice, at least 50% of the Sub-Fund's investment will be in companies whose free float adjusted market capitalisation at the time of purchase is less than USD\$1.5 billion.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge Asia ex Japan Small Cap Equity Fund Class "A", "A5CP", "A12", "A5", "R", "R1", "R1H", "R2", "R2D", "R2HD", "SR", "SR1", "SR1H", "SR2D", "SR2DH", "Y", "Y1H", "Y2", "Y2HD" and "YD" returned 11.60%, 9.89%, 6.59%, 9.56%, 12.61%, 8.38%, 9.89%, 6.58%, 6.58%, 11.45%, 12.78%, 8.54%, 10.06%, 6.74%, 11.67%, 12.50%, 9.78%, 6.47%, 11.35% and 12.50%, respectively. Over the same period, the benchmark index, MSCI All Country Asia Pacific ex Japan Small Cap Daily Total Return Net Index (EUR), (GBP), (SEK), (SGD) and (USD), returned 13.96%, 11.30%, 14.09%, 16.01%, and 17.96% respectively.

Portfolio Overview

Asia ex-Japan equities marked an eventful year in 2023 with its own share of ups and downs keeping investors on the edge for most part of the year.

The year started with a strong quarter where the markets remained cautiously optimistic on China's post pandemic recovery. China's decision, in the last quarter of 2022, to relax the three-year long zero-covid restrictions strengthened the optimism toward a steady recovery in the domestic economic activity. As we entered the second quarter of the year, we saw softer than expected macro indicators and subdued high frequency indicators data pressured market sentiment. The investors grew cautious towards China's recovery path, which resulted in some sell-offs. While the spillover effect of this was felt in the neighboring economies like Hong Kong, overall we saw continued positive momentum in the Asia ex-Japan Small Cap market led by strong share price gains in India and Taiwan. This positive performance in the market continued to the third quarter led by India which reported positive returns on the back of improving credit growth environment and robust growth prospects. While on the other hand, China and Hong Kong remained under stress with the worsening property sector woes. However, the quarter saw the Chinese leadership coming to the forefront to announce targeted policy measures which led to a glimmer of hope among the investors. However, amidst a prolonged hawkish stance by the US Federal Reserve (Fed), slowing global demand and rising bond yields we expected the volatility to continue in Asia ex-Japan Small Cap market going into the last quarter.

The year ended with positive performance by the MSCI All Country Asia Pacific ex-Japan Small Cap Daily Total Return Net Index as the market cheered on the Fed's signals to probable interest rate cuts in 2024. Most of the markets remained in the positive territory with Taiwan being the lead driver for this performance. Taiwan posed as a good investment opportunity for most of last year, as investor interest continued to accelerate around artificial intelligence and re-stocking demand for consumer electronics. The information technology and chip making stocks saw price share gains in Korea and Taiwan on the back of this wave. India also caught investors attention with its resilient growth trajectory and expanding credit rate.

As expected, sentiment for China remained weak given subdued economic growth prints and ongoing concerns around the property sector woes. The investors remained in wait and watch mode while the government's easing measures remained deliberate and gradual. Overall, the ongoing uncertainty around economic recovery path amid a deflationary backdrop is delaying the investor confidence towards Chinese stocks.

The fund underperformed the index (gross and net) for 2023. By geographic location, our stock selection in Taiwan and Singapore contributed to the performance. While our overweight position in China detracted the performance. By sector, stock selection in information technology contributed to the performance while our stock selection in industrials detracted the performance.

Investment Manager's Report (continued)

PINEBRIDGE ASIA EX JAPAN SMALL CAP EQUITY FUND (continued)

Portfolio Overview (continued)

By stock, a Taiwan semi design service provider outperformed, due to strong revenue growth from AI chip demand, and order book growth into 2024. Another holding, an India IT consultant company was the top contributor due to the optimistic company guidance. On the other hand, a China capacitor manufacturer underperformed due to the concern over new energy supply chain pricing pressure. Another holding, a China express carrier underperformed due to the concern over pricing pressure and volume amid weak China end demand.

Portfolio Outlook

Asia ex-Japan small cap equity space continues to present niche long term growth opportunities. Last quarter of the year brought back some confidence in the equity markets as the Fed signaled probable interest rate cuts in 2024. However, the anticipation around the timing and magnitude of that might result in some volatility in the equity markets going ahead.

We maintain our positive stance on China. The valuations continue to be attractive compared to historical levels as well as versus its Asian peers. The real estate sector challenges and a weak job market against a deflationary environment dampened consumption environment and investors' sentiment. However, China is undergoing structural transition and the leadership has made its stance clear to make tech innovation as their top economic priority with development of digital economy, high-end manufacturing, and artificial intelligence being the key focus.

While the last quarter of the year ended with an encouraging optimism towards the equities market, we expect to see some underlying volatility in the Asia ex-Japan region as individual geographies strategize to outperform in a globally slowing environment. We aim to stay true to our investment process and keep our focus on finding high conviction quality names in a market which offers structural long-term opportunities available at reasonable valuations.

PineBridge Investments Asia Ltd.

January 2024

Investment Manager's Report (continued)

PINEBRIDGE ASIA PACIFIC INVESTMENT GRADE BOND FUND

Portfolio Objective

The investment objective of PineBridge Asia Pacific Investment Grade Bond Fund is to provide investors with stable return and long-term capital growth through investment in a wide range of investment grade debt securities within the Asia Pacific Region.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge Asia Pacific Investment Grade Bond Fund Class "A", "A5HD", "ADC", "R", "SR", "SRD", "X", "Y", "Y1H", "Z5H" and "YD" returned 7.66%, 5.93%, 7.51%, 8.36%, 8.68%, 8.68%, 8.79%, 8.36%, 6.02%, 7.28% and 8.36% respectively. Over the same period, the benchmark index, the JP Morgan Asia Credit (JACI) Investment Grade Total Return (SGD), (USD) and (EUR) returned 5.81%, 7.42% and 3.78%. For the period 22nd March 2023 to 31st December 2023, the PineBridge Asia Pacific Investment Grade Bond Fund Class "SR5HD" returned 5.24%. Over the same period, the benchmark index, the JACI Investment Grade Total Return (SGD) returned 3.85%. For the period 31st May 2023 to 31st December 2023, the PineBridge Asia Pacific Investment Grade Bond Fund Class "RD", "W", "W5HD", "WD" and "WDC" returned 4.83%, 4.64%, 3.61%, 4.64%, and 4.74%. Over the same period, the benchmark index, the JACI Investment Grade Total Return (USD) and (SGD) returned 4.06% and 3.01%. For the period 5th July 2023 to 31st December 2023, the PineBridge Asia Pacific Investment Grade Bond Fund Class "SR1H", "SR1HD" and "SR2HD" returned 3.96%, 3.96% and 4.71%. Over the same period, the benchmark index, the JACI Investment Grade Total Return (EUR) and (GBP) returned 2.94% and 3.35%. For the period 3rd November 2023 to 31st December 2023, the PineBridge Asia Pacific Investment Grade Bond Fund Class "W5H" and "W5HDC" returned 6.05% and 6.03% respectively. Over the same period, the benchmark index, the JACI Investment Grade Total Return (SGD) returned 5.09%.

Portfolio Overview

The first quarter started on a positive note, driven by expectations that central banks are close to ending their hiking cycle. This thesis was challenged by stronger-than-expected economic data and financial stability issues within the US regional banking segment. Within Asia, the volatility remained relatively subdued. Initial corporate earnings announcements show that corporate credit trends are broadly stable, with some segments showing a positive trend.

During the second quarter, the market increasingly focused on China's disappointing economic recovery. Bond issuance continues to be tepid, particularly out of China and some Southeast Asian countries.

Despite lower inflationary trends broadly, safe haven bond yields rose meaningfully in the third quarter. The "higher for longer" rates narrative permeated the markets and expectations of a recession, particularly in the United States, receded. Within Asia, the focus was on underwhelming economic data out of China and a series of targeted counter cyclical measures. Outside of China, the economic landscape continues to be relatively benign, with inflation trending lower in most of the region.

The fixed income markets staged a very strong bounce back in November and December of 2023. This was on the back of growing signs of economic deceleration, especially when it comes to inflationary trends. Within Asia, Chinese growth showed some tentative signs of stabilization. However, our investment theme remains unchanged when it comes to segments, we think we will continue to be challenged.

Portfolio Outlook

Going into 2024, signs of global economic deceleration are increasing, although we see major variations across regions, sectors and countries. Within Asia, we continue to think that the economic environment is more benign than other regional blocs, with some deceleration expected, but we do not see recession in the major markets. The team continues to believe that Chinese growth has downshifted, and some downside growth risks exist for the year.

Investment Manager's Report (continued)

PINEBRIDGE ASIA PACIFIC INVESTMENT GRADE BOND FUND (continued)

Portfolio Outlook (continued)

Within credit, the Asian investment grade market should remain well anchored by resilient fundamentals, low issuance and increasing investor demand. We continue to believe that we will see significant returns dispersion, and as such, we remain highly selective in our credit allocation.

PineBridge Investments Asia Ltd./PineBridge Investments Singapore Ltd.
January 2024

Investment Manager's Report (continued)

PINEBRIDGE ASIAN HIGH YIELD TOTAL RETURN BOND FUND

Portfolio Objective

The investment objective of PineBridge Asian High Yield Total Return Bond Fund is to maximize total return by primarily investing in high yielding, sub-investment grade debt securities of issuers domiciled in or exercising a predominant part of their economic activities in the Asia Pacific Region.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge Asian High Yield Total Return Bond Fund Class "Z", "A", "A5HD", "XD" and "Y" returned 6.89%, 5.42%, 3.65%, 6.68% and 6.20% respectively. Over the same period, the benchmark index, the JP Morgan Asia Credit Non-Investment Grade Total Return Index (USD) and (SGD) returned 4.76% and 3.03% respectively. For the period 7th February to 31st December 2023, the PineBridge Asian High Yield Total Return Bond Fund Class "Y1HD" returned (0.47%). Over the same period, the benchmark index, the JP Morgan Asia Credit Non-Investment Grade Total Return Index (EUR) returned (4.28%).

Portfolio Overview

Asia high yield market started the year on a positive note on the back of optimism of China's reopening recovery and expectation that the Fed is close to ending the hiking cycle. China's weaker the expected recovery, as well as shifting expectations on the Fed's policies have been driving overall market volatilities during the year. The JP Morgan Asia Credit Non-Investment Grade Total Return index finished the year with 4.76% total return. The China HY component, which is c28% of the index weight, delivered (19.94%), a major drag for the broad market performance. The rest of the market has been resilient, delivering low double digit percentage return. China's policy support towards the property only led to a temporary rebound in first quarter and defaults among the high yield developers further emerged. Aside from the real estate sector, China's recovery is proving to be uneven with strength in some segments (e.g. services sector) offset by weakness in others (e.g. manufacturing). Economic data from major economies in the region such as India and Indonesia broadly revealed a more benign economic environment, particularly given the fact that inflationary pressures are not as strong as other markets. High yield corporate issuers from the rest of Asia have maintained broadly steady to improving credit profile and adequate access to cheaper alternative fundings in the respective local markets, resulting in very minimal default rate in the year. The fund outperformed the benchmark on the back of strong security selection, while asset allocation and duration positioning were detractors. Securities selection in China (particularly the property sector) and Hong Kong contributed to the outperformance. Overweight in Indonesia, India, Macau and Australia were positive contributors. Underweight country allocation to frontier sovereigns Pakistan and Sri Lanka were detractors as these rebounded from very distressed levels.

Portfolio Outlook

We expect return dispersion to persist in the Asia high yield market. Going into 2024, signs of global economic deceleration are increasing, although we see major variations across regions, sectors and countries. Within Asia, we continue to think that the economic environment is more benign than other regional blocs, with some deceleration expected but we do not see recession in the major markets. Incremental policy easing in China is a welcome development, and we expect more measures to be rolled out if data continues to be weak. That said, we expect the policy focus to be on downside protection and stabilization as opposed to driving major stimulation. We think the property sector related measures remain insufficient to support the weak names. We are highly defensive in the China high yield space. Outside of China property, we expect fundamentals to remain broadly robust and default rates to stay low. Issuers are broadly seeing stable to improving credit trends, and generally benefitting from strong onshore funding access. We continue to favor high quality credits benefitting from the consumption recovery theme, the renewable energy sector, and commodity related issuers with strong liquidity profiles. In terms of geography, we prefer India, Indonesia and Macau.

PineBridge Investments Asia Ltd.
January 2024

Investment Manager's Report (continued)

PINEBRIDGE CHINA A-SHARES QUANTITATIVE FUND

Portfolio Objective

PineBridge China-A Shares Quantitative Fund seeks to provide long-term capital growth by primarily investing mainly in equity and equity-related securities of companies listed on stock exchanges in the People's Republic of China (PRC) or related to the economic development and growth of PRC.

Portfolio Performance

For the year 1st January to December 31st 2023, the PineBridge China-A Shares Quantitative Fund Class "X", "Y11D" and "Z" returned (7.23%), (5.96%) and (7.00%) respectively. Over the same period, the benchmark index, the MSCI China A International Total Return Net Index (USD) and (CNH) returned (12.35%) and (9.79%) respectively

Portfolio Overview

Investor attention was initially focused on popular themes like AI and the "valuation system with Chinese characteristics" in the first half of the year. However, attention shifted towards policy developments before and after the Politburo meeting in July, as macroeconomic conditions deteriorated. A-Shares fell towards the end of the year due to lingering concerns about the weak economy and a perceived lack of sufficient policy support.

Despite a reversion in the second half of the year, AI related sectors such as hardware & semiconductor, media, and software remained the strongest in terms of the full-year performance. Energy also performed well, supported by resilient energy prices. Conversely, new energy, consumer discretionary, real estate, and their supply chains suffered the most. Specifically, subindustries within new energy, including Lithium battery, solar power and wind power, experienced sharp declines due to overcapacity, weaker-than-expected demand, and the trade barriers imposed by the European Union and the US.

In 2023, the fund outperformed (gross and net of fees) its benchmark, the MSCI China A International Total Return Net Index. The alpha model contributed positively. The fundamental surprise, value, and quality groups all made positive contributions.

Portfolio Outlook

From a beta perspective, we maintain the belief that current market valuations of China A-Shares have already factored in much of the pessimistic forecasts. The downside risk appears limited while the upside opportunity seems fairly attractive. Firstly, the liquidity environment is expected to remain favorable. The Federal Reserve's decision to halt further rate hikes probably indicates the end of the rate hike cycle. Domestically, there is room for further interest rate cuts due to reduced pressure on the CNY-USD foreign exchange rate. Secondly, the remaining half of the 1 trillion additional government bonds will be spent by 2024, and we expect more fiscal support to come. Lastly, the relaxation of housing market regulations in tier-one cities demonstrates policymakers' determination to stimulate demand in the property market. With these supportive measures in place, a turnaround in the macroeconomic condition, as well as the stock market performance, can be anticipated.

From an alpha perspective, despite the crowded speculation in themes and policies by investors, the aggregate alpha contribution for the year 2023 remained positive. Looking ahead, we believe that fundamentals will likely regain their position as key drivers of stock prices, as both thematic investing and policy speculation come to an end. In this scenario, we believe our stock selection model will be able to stay on track and generate better results in the coming year.

Investment Manager's Report (continued)

PINEBRIDGE EUROPE RESEARCH ENHANCED EQUITY FUND

Portfolio Objective

PineBridge Europe Research Enhanced Equity Fund seeks to achieve a superior rate of return by making equity and equity-related investments in companies whose assets, products or operations are located in Europe. Up to 10% of the value of the Sub-Fund may be invested in other companies which are listed on a European recognised Stock Exchange.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge Europe Research Enhanced Equity Fund Class "A", "L" and "Y" returned 16.68%, 16.98% and 17.80% respectively. Over the same period, the benchmark index, the MSCI Europe Daily Total Return Net Index (USD) returned 19.89%.

Portfolio Overview

2023 started off with relatively strong performance in the Valuation cluster, which then dipped in April 2023. At the same time, the Quality cluster began to pick up and then relatively stable, although positive, for the remainder of the year. After declining in the spring, the valuation cluster improved steadily throughout the year, reaching its peak in October 2023. Sentiment lagged the other two clusters for the first 3 quarters of the year, with improvement and then subsequent decline in the 4th quarter. We see a relatively similar performance pattern for the year on both a cap-weight and equal-weight basis.

Overall, the fund underperformed the benchmark in 2023. In terms of growth categorization, underweight in the mature defensive growth category contributed positively to performance due to strong selection effect. The largest detractor to performance was the high stable growth category, due to negative allocation and selection effects. The fund was overweight this growth category. On a sector basis, the overweight in the communication services sector was the top contributor over the year, due to the positive selection effect. The underweight in the industrials sector was the largest detractor due to the negative selection effect.

Portfolio Outlook

Equity market drivers are expected to soften gross domestic product (GDP) growth and downside risks to corporate profit. The Eurozone's expected earnings per share (EPS) growth remains flat for 2024. With Eurozone equities presenting as relatively cheap at 12x Forward (Fwd) price to earnings (P/E) – this could prove beneficial for equity markets later in the year. The European Central bank (ECB) is expected to cut rates in 3rd Quarter 2024, which could be threatened by strong wage growth in the Eurozone. 4th Quarter earnings will play a considerable role in determining the equity outlook, as 2024 EPS projections keep coming down in most regions. Corporate profitability is expected to be under pressure in 2024. Manufacturing purchasing managers Index (PMI) needs to improve as well. Thus far, European equity markets have priced in a rate cut in either April or June. European equity markets will also depend on China's recovery path, as European manufacturing is heavily tied to Chinese exports. We maintain a positive outlook on our quality cluster, as we anticipate recovery in many euro-area markets to begin towards the second half of the year.

PineBridge Investments Europe Ltd./PineBridge Investments LLC
January 2024

Investment Manager's Report (continued)

PINEBRIDGE EUROPE SMALL CAP EQUITY FUND

Portfolio Objective

PineBridge Europe Small Cap Equity Fund seeks to achieve a high rate of return by making equity and equity-related investments in small companies, whose assets, products or operations are in Europe.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge Europe Small Cap Equity Fund Class "A1", "Y" and "Y1" returned respectively 7.93%, 12.61% and 8.79%. Over the same period, the benchmark index, the MSCI Europe Small Cap Index (EUR) and (USD) returned 12.70% and 16.65% respectively.

Portfolio Overview

Labor tightness and inflation appear to be easing, which has increased market expectations for a potential "soft landing". This combined with signs from the Fed that they are set to pause and perhaps pivot to easing eventually, led to the year ending with a strong rally in equity markets.

Consumer spending is holding up despite some slowing in the lower-income brackets, and rolling de-stocking continues across various industries but seems close to ending. At the company/industry level, the tech outlook remains muted though de-stocking in semiconductors appears to be ending, with the exception of auto/industrial semiconductors which are still over-inventoried. Industrial sales growth has turned negative as we enter the de-stocking cycle for multi-industry companies. Healthcare spending remains solid though investors continue to assess the impact of GLP-1 on long term demand trends. While the markets have risen recently, we are still finding investment ideas as there is a lot of dispersion in the economic outlook between and within regions.

During the fiscal year 2023, the PineBridge Europe Small Cap Equity Fund underperformed its benchmark, the MSCI Europe Small Cap Index. Underperformance was largely the result of adverse selection, driven by near-term weakness among select holdings. This was partially offset by positive allocation. Overall, health care, real estate, and materials were the top contributors to excess returns. By contrast, information technology, financials, and consumer discretionary were the main sector laggards.

The fund remains overweight industrials, health care, communication services, consumer staples and consumer discretionary and underweight financials, materials, energy, real estate, utilities, and information technology.

Portfolio Outlook

The team continues to believe that risk reward is attractive for fundamental investors over the medium-term. Short-term market disruptions (rising interest rates, weakness in China economic activity) are masking several underlying secular trends. These include the massive investments needed to achieve the Paris agreement's net-zero carbon emissions targets, the diversification of global supply chains, and increasing digitalization across all industries.

The disconnect between these short-term and long-term forces may create attractive buying opportunities in companies set to benefit from longer-term secular trends but whose valuations have dropped amid the generalized equity declines.

The Fund continues to be constructed style-neutral through stock selection, with the principal themes expressed in the portfolio that include corporate transformation, global capex investment, technology enablers, and global affluence.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL BOND FUND

Portfolio Objective

PineBridge Global Bond Fund seeks a high level of return from a combination of current income and capital appreciation by investing in a portfolio of debt securities denominated in US Dollars and a range of other currencies including, Euro, Australian Dollar, New Zealand Dollar, Canadian Dollar, Swiss Franc, Danish Krone, Swedish Krona, Norwegian Krone, British Sterling, Japanese Yen, Polish Zloty, Hungarian Forint, South African Rand, Singapore Dollar, Slovak Koruna and Mexican Peso.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge Global Bond Fund Class "A", "X7H" and "Y" returned 5.45%, 2.54% and 6.51% respectively. Over the same period, the benchmark index, the Bloomberg Global Aggregate Total Return Index (USD) and (CHF) returned 7.15% and 2.52% respectively.

Portfolio Overview

2023 was an incredibly eventful year in markets, with plenty of forces for investors to navigate. In March, there was significant turmoil following the collapse of Silicon Valley Bank, leading to some of the biggest bond market moves in decades. In May, we saw growing excitement about the potential growth impact from artificial intelligence (AI), leading to a major outperformance from big tech stocks. Then from the summer, the prospect of interest rates remaining higher for longer led to a major bond selloff, which briefly pushed the 10year treasury yield above 5% for the first time since the global financial crisis. Geopolitical events remained in focus too, particularly after Hamas' attack on Israel in October. But from late-October onwards there was an astonishing rally across several asset classes, as declining inflation led investors to grow increasingly excited about a soft landing. That then gained further momentum in December, particularly after the Federal Reserve (Fed) signaled 75 Basis Point (bps) of rate cuts for 2024.

The fund outperformed (gross of fees) its benchmark, the Bloomberg Global Aggregate Total Return Index (USD Hedged), during the annual reporting period ending December 31, 2023. The fund's relative outperformance was driven mainly by security selection, slightly offset by negative contribution from asset allocation.

Portfolio Outlook

The team expects continued volatility in the fixed income markets, especially during the first months of the year, as investors adjust their expectations on central bank's monetary policy.

The central banks will continue to be a key driver of financial markets as they move to their next phase in monetary policy that is rate cuts. Rate markets will react to economic data but ultimately, the team's view is that rates will be lower at the end of the year. The move towards lower rates should be driven by lower inflation, a slow down on growth and a small uptick in unemployment, together with the start of the rate cut cycle from the Fed, European Central Bank (ECB) and Bank of England (BoE).

In credit, the team expects credit spreads to move sideways to slightly tighter during the first six months of the year as the asset class has strong technical support and stable fundamentals. For that reason, we have increased the funds' allocation to credit. In terms of sector views, the team expects financials to outperform industrials.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL DYNAMIC ASSET ALLOCATION FUND

Portfolio Objective

PineBridge Global Dynamic Asset Allocation Fund seeks long-term capital appreciation by identifying new and changing worldwide economic and investment trends and investing in assets globally to benefit therefrom.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge Global Dynamic Asset Allocation Fund Class "A", "AA", "ADC", "ADCT", "C", "Y", "Y2H" and "Y5H" returned 5.30%, 5.36%, 5.30%, 5.30%, 5.17%, 6.42%, 5.46% and 4.58% respectively. For the period 23rd March 2023 to 31st December 2023, the PineBridge Global Dynamic Asset Allocation Fund Class "A5H" returned 3.50%. For the period 7th December 2023 to 31st December 2023, the PineBridge Global Dynamic Asset Allocation Fund Class "Y1H" returned 3.43%.

Portfolio Overview

Markets experienced significant volatility in 2023, alternating between six months of gains and six months of losses, driven by investors' sharp reactions to economic data and central bank rhetoric at each turn. Early on, market appreciation was narrowly driven by the 'Magnificent Seven'. However, the subsequent three months featured a pullback as markets recognized the challenges of tighter financial conditions and the resilience of the US economy. Markets surged again in the last two months of the year amid signs of cooling economic and inflation data, pivoting investor expectations that the Federal Reserve (Fed) would shift from a restrictive to a more accommodative policy sooner than initially anticipated.

We entered the year positioned defensively and retained this positioning for much of the year. This decision was driven by accelerated liquidity withdrawal by central banks, creating a less attractive environment for risk assets. The scenario we deemed unlikely—favourable market performance amidst central bank tightening and sticky inflation—unfolded. Our positioning anticipated a slowdown in growth, yet markets, initially narrowly driven and later expanding, demonstrated remarkable resilience. Although the fund's absolute performance closely aligned with the return objective, our risk positioning had a negative impact on performance in this context. However, the fund's performance benefited from dynamic duration positioning within fixed income and high-growth themes in equity, which proved advantageous in a declining yield environment. Alpha generated by the active managers through security selection was also a positive contributor to performance.

Our capital market line continues to flatten compared to historical levels, due to deteriorating liquidity from quantitative tightening and an acceleration of Treasury issuance. Meanwhile, the demand-side support from excess fiscal stimulus is waning. Yet with very significant dispersion around the line, this landscape continues to present opportunities for more targeted investment strategies. These strategies focus on new secular growth in a period of rapid technological change or are aimed at areas emerging from rolling recessions even as others potentially slip into their own. With most of the strategy's value historically being derived from asset allocation, we are confident in our ability to position the Fund to best take advantage of the dislocations, across the wide array of asset classes, that lie ahead.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL DYNAMIC ASSET ALLOCATION FUND (continued)

Portfolio Outlook

The last six months of supply-side-driven disinflation essentially ensure that developed market rate hikes are over. The Fed wishes not to appear as eager as it likely is to cut rates in the March-to-May timeframe. Merely hinting at this pull-forward of its pivot has already eased financial conditions quite substantially, which will diminish much of the remaining monetary lags percolating through the system, lowering recession odds. Rate cuts preceding a recession (an oddity), should a recession still unfold, could soften the downside to markets relative to the uncertainty they have typically faced when sudden recessions caught central banks behind the curve. With the Fed moving toward a "mission accomplished" stance on inflation (despite pro forma attempts to project the contrary), the primary remaining risk to markets is a reacceleration of inflation. We don't dismiss this risk, yet given the progress in super-core inflation in recent months, we moved our Risk Dial Score toward neutral, to 3.2 from 3.5, in mid-December after Powell's press conference. This stepped-up risk budget is focused on the dispersion of opportunities created by 2023, instead of on a continued rising tide.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL DYNAMIC PRESERVATION PLUS FUND

Portfolio Objective

PineBridge Global Dynamic Preservation Plus Fund seeks long-term capital appreciation by investing worldwide in equities and fixed income securities, in cash, cash equivalents and derivatives.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge Global Dynamic Preservation Plus Fund Class "XD" and "Z" returned 4.82% and 4.85% respectively.

Portfolio Overview

Markets experienced significant volatility in 2023, alternating between six months of gains and six months of losses, driven by investors' sharp reactions to economic data and central bank rhetoric at each turn. Early on, market appreciation was narrowly driven by the 'Magnificent Seven'. However, the subsequent three months featured a pullback as markets recognized the challenges of tighter financial conditions and the resilience of the US economy. Markets surged again in the last two months of the year amid signs of cooling economic and inflation data, pivoting investor expectations that the Fed would shift from a restrictive to a more accommodative policy sooner than initially anticipated.

The fund aims to provide absolute returns that are uncorrelated to traditional risk drivers such as equity, fixed income and currency markets. This strategy combines independent alpha sources and a dependable beta layer, thus making it less reliant on pure alpha to reach the return objective. The primary driver of returns during this timeframe has been a sub-strategy that focuses alpha generation through the selection of relative value pairs. This involves pairing an attractive asset class (long position) with relatively less attractive (short position), while ensuring they both possess shared macroeconomic and sector fundamentals.

Our capital market line continues to flatten compared to historical levels, due to deteriorating liquidity from quantitative tightening and an acceleration of treasury issuance. Meanwhile, the demand-side support from excess fiscal stimulus is waning. Yet with very significant dispersion around the line, this landscape continues to present opportunities for more targeted investment strategies and for security selection alpha.

Portfolio Outlook

The last six months of supply-side-driven disinflation essentially ensure that developed market rate hikes are over. The Fed wishes not to appear as eager as it likely is to cut rates in the March-to-May timeframe. Merely hinting at this pull-forward of its pivot has already eased financial conditions quite substantially, which will diminish much of the remaining monetary lags percolating through the system, lowering recession odds. Rate cuts preceding a recession (an oddity), should a recession still unfold, could soften the downside to markets relative to the uncertainty they have typically faced when sudden recessions caught central banks behind the curve. With the Fed moving toward a "mission accomplished" stance on inflation (despite pro forma attempts to project the contrary), the primary remaining risk to markets is a reacceleration of inflation. We don't dismiss this risk, yet given the progress in supercore inflation in recent months, we moved our risk dial score toward neutral, to 3.2 from 3.5, in mid-December after Powell's press conference. This stepped-up risk budget is focused on the dispersion of opportunities created by 2023, instead of on a continued rising tide.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS SDG CORPORATE BOND FUND

Portfolio Objective

PineBridge Global Emerging Markets SDG Corporate Bond Fund has a sustainable investment objective through which it seeks to advance certain United Nations Sustainable Development Goals ("SDGs"). The Sub-Fund seeks to achieve long-term, capital appreciation through investment in bonds issued primarily by corporate entities and financial institutions located in Emerging Markets. Such securities may be denominated in the local currency of any of the OECD member countries or the local currency of the emerging countries in which the Sub-Fund is permitted to invest as per investment guidelines.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge Global Emerging Markets SDG Corporate Bond Fund Class "A", "Y2H", "YY2H" returned 3.92%, 3.94% and 4.42% respectively. Over the same period, the benchmark index, the JP Morgan JESG CEMBI Broad Diversified benchmark (the "Index") (USD) and (GBP) returned 9.2% and 8.27% respectively. For the period 22nd March to 31st December 2023, the PineBridge Global Emerging Markets SDG Corporate Bond Fund Class "YY" returned 6.61%. Over the same period, the benchmark index, the JP Morgan JESG CEMBI Broad Diversified benchmark (the "Index") (USD) returned 7.61%.

Portfolio Overview

2023 began with a strong start, as markets reacted favorably to a modest decline in US consumer prices and expectations that the US Federal Reserve (Fed) could soon conclude its current rate hike cycle. Emerging market (EM) sentiment was further supported by the reopening of China's economy which would support economic activity among many of China's trading partners across the EM. The Fed increased rates by 25 bps in February and did not provide guidance regarding the future path of policy, as inflation was above target and the labor market remained tight. In March markets, the failure of Silicon Valley Bank in the US and Credit Suisse in Switzerland provided a sharp illustration of risks associated with the tightening of global financial conditions. Although the Fed maintained a second successive 25 basis point rate hike and expectations that policy tightening had not yet reached its terminal point, markets focused more on the tightening of financial conditions within the banking systems and its associated economic risks, as nominal treasury yields declined in March.

As concerns regarding systemic risks within the banking system subsided in April market sentiment improved. Markets were further bolstered by an easing of inflation data in the US, providing encouraging signs that the Fed might soon end its rate hike cycle. Returns turned negative in May, as strong employment data in the US raised concern that the Fed might view its fight against inflation as unresolved and continue raising its policy rate. Concern also gathered regarding the possibility that the US would fail to extend its debt ceiling. Performance turned positive again in June, due in large part to another soft reading of US inflation that drove markets to expect a pause in policy tightening by the Fed, expectations that were validated with the Fed decision to leave rates unchanged at its June meeting. Expectations for an acceleration of EM economic growth over developed markets (DM) growth further contributed to positive returns for EM corporate debt.

In July, a cooling of inflation and the labor market in the US balanced by resilient consumer sentiment and purchasing managers index (PMIs) suggested that the ultimate impact of rate hikes may not result in bear case expectations. Data in China showed the country's economic recovery losing momentum; however, the incremental impact across emerging markets of a modest resetting of China's growth outlook did not derail expectations for an acceleration of EM growth over DM. Returns turned negative in August under the weight of US treasury volatility and global economic uncertainty. Fitch's downgrade of US treasuries from AAA to AA+ began an increase of treasury yields which was furthered by comments from Fed Chair Jerome Powell, citing the strength of both labor markets and consumer confidence – that the Fed may resume rate hikes in the coming months. Expectations for further rate hikes prevailed in September as the resilience of the US labor market and consumer sentiment continued to suggest the US economy may yet navigate a soft landing rather than recession following 5% of rate hikes over the past two years.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS SDG CORPORATE BOND FUND (continued)

Portfolio Overview (continued)

In October, the continued resilience of the US economy and persistent inflation drove expectations that the Fed may pursue additional rate hikes. Payroll data early in the month nearly doubled expectations for job creation in the US, as the US labor market remains strong despite the Fed's tightening of monetary policy. The resilience of the US labor market and persistent inflation drove expectations that the Fed could increase rates yet again heading before year-end, and as a result Treasury yields rose, and credit spreads widened. Returns turned positive in November, as expectations of a shift in federal Reserve policy supported a decline of treasury yields. At the early November the federal open market committee (FOMC) meeting, Fed chair Powell gave indications that the current rate hike cycle was near its end as policy had become restrictive, prompting markets to begin pricing in a higher likelihood of rate cuts in the coming months. EM debt continued to rally in December, supported by further signals of rate cuts by the Fed. Economic data provided little signs of a material economic slowdown in the US, with stability in most economic indicators, most notably jobless claims and inflation. But with inflation seemingly under control, the Fed maintained the dovish stance that it struck in November, stating that the next move in rates would likely be a reduction with an increase in 2024 expectations to 75 basis points of cuts.

For the year, the portfolio underperformed the JP Morgan JESG CEMBI Broad Diversified Index due to negative contributions from country and security selection as well as yield curve positioning. Country selection was negative, as underweight positions in Argentina, Ukraine, Macau and Kazakhstan detracted from performance. Security selection was negative as detractors within Brazil and Colombia overshadowed contributions within China and Mexico. A long duration position relative to the benchmark during the third quarter also detracted from performance.

Portfolio Outlook

The Fed's pivot toward more dovish monetary policy has quickly resulted in a repricing of risk across capital markets. Stabilization of consumer prices and the potential for further declines of inflation in the coming months support the Fed's shift in policy. The treasury rally has been supportive of asset prices, which will now react to indications for whether the Fed can successfully navigate a slow landing or if restrictive policy will lead to US recession. Within emerging markets, China will remain a barometer of market sentiment, as the country's expected growth recovery has fallen short of expectations this year. We expect policy makers to provide the support necessary to deliver stable economic growth in the mid four percent range. While that figure is below the long-term average, structural economic changes across other emerging market economies factor into a positive economic outlook where the EM growth premium over DM will likely accelerate in 2024. 2024 is a busy election year across EM and the US, providing country-specific risk events which investors will need to monitor, but ultimately, we remain constructive on the fundamental outlook for EM debt.

Across EM debt markets, the positive fundamental outlook has factored into a resiliency of valuations throughout the year despite macro-economic uncertainty and treasury volatility. While idiosyncratic risks have challenged the perception of EM debt among some market participants, contagion across the broader market has been relatively limited and is indicative of a more mature asset class. As such, while EM carry is attractive, the evaluation of opportunities and selectivity of risk within those market segments that come under pressure will be critical over the near-term. Looking past macro-economic volatility the longer-term fundamental backdrop and potential for rate hikes in the coming quarters casts current valuations as attractive across regions and ratings categories. The recent decline of treasury yields, treasury futures and the inversion of yield curves suggest that while rates may remain volatile, they are also likely to decline, which should eventually reignite a global search for yield and provide EM debt markets with a strong underpinning of technical support over the longer-term. We also note that unlike most rate hike cycles through history, many emerging market central banks were first to increase rates to control inflation and now find themselves in a more favorable position to ease policy than their DM counterparts. Ultimately, while EM debt may experience short-lived periods of volatility stemming from macro-economic risk, we believe investors should take advantage of potential market weakness as an opportunity to make longer-term allocations to emerging market debt.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS FOCUS EQUITY FUND

Portfolio Objective

PineBridge Global Emerging Markets Focus Equity Fund seeks to achieve a relatively high rate of growth, on a long-term basis, through careful selection of equity and equity-related securities in global Emerging Markets whilst seeking to protect the Sub-Fund from downside risk.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge Global Emerging Markets Focus Equity Fund Class "A", "Y" and "Z" returned 11.87%, 12.76%, and 13.90% respectively. Over the same period, the benchmark index, the MSCI Emerging Markets Daily Total Return Net Index (USD) returned 9.83%.

Portfolio Overview

Global Emerging Markets began 2023 with continuation of some of the same drivers with which it ended 2022. The most notable of these were the end of US rate rising cycle and China's economic reopening post-Covid. A less significant, but increasingly important driver, was the growing role of AI and its earnings impact on attendant component suppliers. As trade frictions with US continued to grow, investors began to search for Chinese semiconductor names that could potentially fill the void of high-end chips. As a result of the above, the year began very strongly, with improving GDP expectations for China in 2023 and optimistic earnings forecasts for many Chinese companies. At the time some players in the internet platform space indicated that they would focus less on the market share and concentrate on the profit margins, which was another optimistic signal for the sector. All this drove the MSCI GEM Index to return 4.02% in the first quarter, with the strongest performance coming from information technology and communication services sectors

In quarter two investor confidence about US rates peaking began to decline, and so did the outlook for China's economic growth. High frequency data was disappointing and several companies in the industrial sector offered revenue guidance that implied lower than previously expected demand, which came from domestic weakness and foreign competition. Evidence began to emerge that internet platforms continued to pursue market share gains. At the same time, signs of wage pressures in the service industry did not bode well for the profits of many retail companies. In quarter two MSCI GEM Index continued to produce positive returns with 2.69%. However, the China segment was down (7.96%). Within China, industrials were down (7.09%) and consumer discretionary (13.22%). We were now observing bifurcation of returns that would persist for the remainder of the year.

As it became clear that US rates had not peaked yet and China's economy was not on nearly as strong of a footing as previously thought, emerging markets entered quarter three with a negative mindset. Volatility rose substantially and investors sold off some stocks even if they saw earnings upgrades – simply for being in China and industrials. Those that had just minor earnings misses would be penalised by significant sell-offs. It appeared for a time that sector and geography mattered more than underlying fundamentals and rationality gave way to sentiment. In quarter three, MSCI GEM Index fell (2.97%). While it may seem minor, the energy sector was up 6.3% and consumer discretionary 0.67%, driven by speculation on China stimulus. Outside of that, other sectors' declines were more pronounced.

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL EMERGING MARKETS FOCUS EQUITY FUND (continued)

Portfolio Overview (continued)

In quarter four 2023 emerging markets were impacted by several new dynamics. One, the US economic data once again led investors to a view that US rates have peaked. Two, China began to take informal steps towards less economic regulation in the tech sector – a tacit recognition that the previous approach was an overreach. Three, major Asian chip manufacturers have made several cuts to their production capex which is helping the sector reach the bottom of the pricing cycle, together with the traditional demand growth. This seems to be working as some of the key manufacturers reported improved chip prices and led to more hikes in the upcoming quarters. Finally, Chinese equities reached the lowest multiples that they have seen in years. The outcome is that in quarter four MSCI GEM Index returned 8.03%, with information technology being by far the key driver, which returned 17.93%. Geographically, the divergence was once again very notable. China lagged, being down (4.0%) and Hong Kong down (11.2%). It must be said that during 2023 AI became an increasingly discussed topic and by quarter four it was identified one of the key themes for 2024. There are several companies in global emerging markets that are well placed to benefit from AI and our strategy has had a long-term exposure to this segment. 2023 saw broader adoption of ESG principles by a larger number of corporates. In addition to dividends and independent board directors, more companies are gradually engaging in environmentally and socially conscious behavior and are becoming more consistent in communicating their ESG attributes to the shareholders. Net Zero is an oft-cited environmental goal. Investors, in turn, are adding greater weight to ESG considerations in their decision-making. The fund exceeded (gross and net of fees) its benchmark, the MSCI Emerging Markets Index, during the annual reporting period ending December 31st, 2023, due to the outperformance in stock selection and underperformance in allocation. The strongest contributors to the relative performance were in the consumer staples and information technology sectors, while the largest detractors were energy and health care.

Portfolio Outlook

Looking ahead to 2024, the outlook for Global Emerging Markets is cautiously positive. Many of the top-down concerns seen in 2023 remain in place, such as two wars, trade frictions and high inflation. However, US rates have likely peaked, the impact of geopolitical conflicts is reflected in assets prices and consumer price index (CPI) in many countries has also peaked. Earnings estimates are beginning to see upgrades, especially in the semiconductor sector. Geographically Brazil and Mexico are seeing the most upward revisions. Stock valuations are at reasonable levels, with healthy balance sheets, cash flows and dividend payouts. Therefore, many emerging markets companies are well situated to capitalize on improvement in economic activity, should it occur.

The portfolio is invested in forty-two companies with strong management, governance and business models mainly in consumer, technology, automation, clean energy, industrials and pharma sectors. Since many share prices have declined, we see investment opportunities that were not as compelling a few months ago, even after the year-end rally of 2023. The team continues to identify companies that are best positioned to succeed in the current economic environment and are mispriced relative to their investment characteristics. We seek to construct style-neutral, high-conviction differentiated portfolios of companies whose business success is driven by unique competitive attributes and have strong ESG characteristics. Sectorally, our largest current overweights are in the consumer staples and information technology, while we are most underweight utilities and materials.

PineBridge Investments LLC
January 2024

Investment Manager's Report (continued)

PINEBRIDGE GLOBAL FOCUS EQUITY FUND

Portfolio Objective

PineBridge Global Focus Equity Fund seeks to achieve growth at a reasonable price (meaning securities that have a growth potential and are reasonably priced as determined by conventional measures, such as priced earnings or by comparison to other securities in the same market and the same industry) by making equity and equity-related investments in global markets with a focus on superior and sustainable earnings performance.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge Global Focus Equity Fund Class "A", "L", "Y", "Z5H" and "ZD" returned 26.41%, 27.11%, 27.43%, 26.45% and 28.71% respectively. Over the same period, the benchmark index, the MSCI All Country World Index Daily Total Return Net Index (USD) and (SGD) returned 22.20% and 18.11%. For the period 11th May 2023 to 31st December 2023, the PineBridge Global Focus Equity Fund Class "SR", returned 15.66%. Over the same period, the benchmark index, the MSCI All Country World Index Daily Total Return Net Index (USD) returned 12.90%. For the period 10th October 2023 to 31st December 2023, the PineBridge Global Focus Equity Fund Class "M", returned 10.06%. Over the same period, the benchmark index, the MSCI All Country World Index Daily Total Return Net Index (USD) returned 9.92%.

Portfolio Overview

Labor tightness and inflation appear to be easing, which has increased market expectations for a potential "soft landing". This, combined with signs from the Fed that they are set to pause and perhaps pivot to easing eventually, led to the year ending with a strong rally in equity markets.

Consumer spending is holding up despite some slowing in the lower-income brackets, and rolling de-stocking continues across various industries but seems close to ending. At the company/industry level, the tech outlook remains muted though de-stocking in semiconductors appears to be ending, with the exception of auto/industrial semiconductors which are still over-inventoried. Industrial sales growth has turned negative as we enter the de-stocking cycle for multi-industry companies. Healthcare spending remains solid though investors continue to assess the impact of GLP-1 on long term demand trends. While the markets have risen recently, we are still finding investment ideas as there is a lot of dispersion in the economic outlook between and within regions.

During the fiscal year 2023, the PineBridge Global Focus Equity Fund outperformed its benchmark, the MSCI All Country World Net Index. Outperformance was driven by strong security selection as well as favorable allocation effect. Overall, industrials and communication services were the top contributing sectors to excess returns. By contrast, consumer discretionary was the main lagard.

The Fund remains overweight industrials, information technology, communication services, and health care and underweight energy, materials, financials, utilities, real estate, consumer discretionary, and consumer staples. The Fund seeks to outperform its benchmark through bottom-up stock selection, rather than from top-down allocation, and has benefited by owning select companies globally that are improving their market positions and exercising stronger-than-peer pricing power through new technologies and operating processes.

Portfolio Outlook

The team continues to believe that risk reward is attractive for fundamental investors over the medium-term. Short-term market disruptions (rising interest rates, weakness in China economic activity) are masking several underlying secular trends. These include the massive investments needed to achieve the Paris Agreement's net-zero carbon emissions targets, the diversification of global supply chains, and increasing digitalization across all industries.

The disconnect between these short-term and long-term forces may create attractive buying opportunities in companies set to benefit from longer-term secular trends but whose valuations have dropped amid the generalized equity declines.

PINEBRIDGE GLOBAL FOCUS EQUITY FUND (continued)

Portfolio Outlook (continued)

The fund continues to be constructed style-neutral through stock selection, with the principal themes expressed in the portfolio that include corporate transformation, global capex investment, technology enablers, and global affluence.

PineBridge Investments LLC
January 2024

Investment Manager's Report (continued)

PINEBRIDGE GREATER CHINA EQUITY FUND

Portfolio Objective

PineBridge Greater China Equity Fund seeks to provide long-term capital growth by investing in equity and equity related securities of companies whose assets, products or operations are in the Greater China Region.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge Greater China Equity Fund Class "A" returned (2.81%). Over the same period, the benchmark index, the MSCI Golden Dragon 10/40 Index Net Return (Net) (USD) returned (2.06%).

Portfolio Overview

Hong Kong and China equities declined notably in the year of 2023. High expectation on the economic recovery at the beginning of the year was followed by the quicker-than-expected fading of pent-up demand and disappointing economic trend. Elevated inflation in the US led to persistently hawkish Fed as well as global central banks, which weighed on equity market sentiment and stock valuations. Tension between the US and China worsened, with Biden's fresh investment curbs against China's high technology sector and Tsai's meeting with Kevin McCarthy both leading to increased concern on the bilateral relationship. Conflict in the Middle East was also an added geopolitical risk factor. Meanwhile, domestically weak company earnings results, lackluster company guidance for 2024, and softening RMB currency were attributable to the downward pressure on the market. As a result, despite continued policy support from Chinese government, such as favorable policies towards property sector, rate & reserve required ratio (cuts etc., Hong Kong and China equities trended down during the year. On the other hand, however, Taiwan equities rallied quite strongly in 2023, driven mainly by the improving outlook of the tech sector broadly, and the growing expectation on generative AI related stocks. With the support of Taiwan equities, Greater China equity market as a whole stayed largely resilient during the year.

Portfolio Outlook

Towards end of 2023, China's economic indicators stayed rather mixed, with some data showing year over year improvement on low base, and some industries such as property seeing sales and prices disappointing. Into year 2024, we expect Chinese government to continue rolling out accommodative policies. With continued policy support, low expectations, attractive valuations, bottom-up stock selection opportunities will likely continue to emerge in Greater China equity market.

Investment Manager's Report (continued)

PINEBRIDGE INDIA EQUITY FUND

Portfolio Objective

PineBridge India Equity Fund seeks to provide long-term capital appreciation by investing in equity and equity-related securities of companies listed on stock exchanges in India or closely related to the economic development and growth of India.

Portfolio Performance

For the year 1st January to December 31st 2023, the PineBridge India Equity Fund Class "A", "A5", "A5CP", "R", "R1", "R2D", "RD", "Y", "Y3", "YD" and "Z" returned 23.08%, 21.14%, 21.51%, 24.37%, 19.58%, 17.48%, 24.37%, 24.06%, 33.28%, 24.06%, and 25.31% respectively. Over the same period, the benchmark index, the MSCI India Daily Total Return Net (USD), (SGD), (EUR), (GBP) and (JPY) returned 20.81%, 18.81%, 16.72%, 13.99% and 29.78% respectively.

Portfolio Overview

The market was buoyed for most of the year on the back of a confluence of many positives. The market remained highly optimistic led by strong domestic and foreign inflows, favorable electoral results, resilient GDP data, positive high frequency prints and credit growth expansion. The last quarter especially was cheerful, where market returns in the quarter contributed to nearly 60% of the total returns of the market for the full year, 2023.

The fund outperformed the index in the whole year 2023 due to its overweight in information technology and industrials. The outlook for the portfolio is very positive, given the careful curation of stocks which avoids high valuation-low growth companies.

Portfolio Outlook

The markets are reacting to good high frequency data which is reflecting an economy that is in fine fettle. Average valuations are high compared to history as well as other markets. However, valuations need to be looked into from the context of growth rates as well as the fact that averages hide a lot of granularity especially in a market that is as broad as India. Most large cap stocks underperformed the index in 2023 and are trading at reasonable valuations, especially banks. On the other hand, smaller cap stocks have given returns which are in fifties and hundreds of percentage points for the year, careful curation of stocks in the portfolio should be able to provide handsome returns for the investors. We as a bottom-up stock manager are committed to delivering the same.

PineBridge Investments Asia Ltd.
January 2024

Investment Manager's Report (continued)

PINEBRIDGE JAPAN EQUITY FUND

Portfolio Objective

PineBridge Japan Equity Fund seeks to achieve long term capital growth by making at least two-thirds of its total investments in equity and equity-related investments in Japanese companies, i.e. companies incorporated in Japan or companies whose assets, products or operations are in Japan.

Portfolio Performance

For the year 1st January to 31st December 2023 the PineBridge Japan Equity Fund Class "A", "Y" and "Z" returned 16.88%, 17.83% and 19.00% respectively. Over the same period, the benchmark index, the TOPIX Total Return Net Index (USD) returned 19.58%.

Portfolio Overview

The Japanese equity market, the broad market index of Topix Total Return, gained by 28.26% in the local currency. The Japanese market gained during the 1st half due to the decline in interest rates and the expectations for Tokyo-Stock-Exchange-led corporate governance reforms although it once dipped in March for the concerns on global financial crisis. Foreign investors' purchases were reported and large -cap names drove the bullish market and small-cap underperformed. The market slightly gained during the 2nd half. It went up in 3rd Quarter driven by value-names due to the rise in interest rates which took place as Bank of Japan (BoJ) took a more flexible stance in implementing yield curve control (YCC) policy and the markets concerned that the US Fed would continue monetary tightening. The Japanese market was almost flat in Quarter 4 which experienced reversal movements as growth outperformed and value underperformed amid the lowering interest rates conditions.

Top performing sectors were commodity which are mostly low price-to-book ratio companies and outperformed amid the rising interest rates, and bottom performing sectors were defensives, especially healthcare sector which are mostly high price-to-book ratio companies and underperformed amid the rising interest rates.

As for corporate fundamentals, earning revisions were negative from late 2022 to July 2023, but turned neutral to positive since then. As for the supply/demand situation of equities, foreign investors and the Japanese corporates were the major buyers, and others, such as individual investors and financial institutions, were major sellers.

The fund underperformed (gross and net of fees) its benchmark, the TOPIX Total Return Net Index. Sector allocation was negative as the negative impact of cash holdings and an underweight to commodity was larger than the positive impact of an overweight to global cyclicals and an underweight to financials. Stock selection was beneficial since positive contribution from the stocks in global cyclicals and domestic cyclicals was larger than the negative contribution from the stocks in financials and defensives.

Portfolio Outlook

While we have heard many companies say that supply chain problems have almost ended, we are still facing some concerns, such as the Russia-Ukraine situation, the Middle East situation, the central banks' stance on interest rate hikes, the outlook of the macro-economy (either no-landing, hard-landing, or soft-landing), etc. We also need to keep a careful eye on the potential frictions in the regions, such as US-China relations, North Korea, etc.

Investment Manager's Report (continued)

PINEBRIDGE JAPAN EQUITY FUND (continued)

Portfolio Outlook (continued)

The Japan equity market may be volatile due to the above-mentioned concerns in the short term. The potential changes in the Bank of Japan's policies need to be closely monitored. In the medium term, however, the team believes that the Tokyo-Stock-Exchange-led reforms, which require the listed companies traded under a price-to-book ratio of 1.0x to submit plans to raise their valuation from financial year 2023, will support the corporate earnings and equity market. The Japanese stock market whose estimated Price to Earning ration for fiscal year Mar/25 is around 14.5x is in the middle range over the past 10 years.

The team has maintained the fund's slight overweight position in global cyclicals to take advantage of the market and cyclical recovery while carefully balancing the portfolio weights so as not to take too much risk on sector allocation.

PineBridge Investments Japan Co., Ltd.

January 2024

Investment Manager's Report (continued)

PINEBRIDGE JAPAN SMALL CAP EQUITY FUND

Portfolio Objective

PineBridge Japan Small Cap Equity Fund seeks to achieve long- term capital growth by making at least two-thirds of its total investments in equity and equity- related investments in small Japanese companies, i.e. companies incorporated in Japan or companies whose assets, products or operations are in Japan.

Portfolio Performance

For the year 1st January to December 31st 2023, the PineBridge Japan Small Cap Equity Fund Class "A", "A12", "A3", "M", "R1D", "RD", "R2D", "Y", "Y1H" and "Y3" returned (8.99%), (13.08%), (2.61%), (9.07%), (11.48%), (8.17%), (13.09%), (8.26%), 1.17% and (1.83%) respectively. Over the same period, the benchmark index, the MSCI Japan Small Cap Daily Total Return Net Index (USD), (EUR), (SEK), (JPY) and (GBP) returned 13.16%, 9.50%, 9.03%, 21.09% and 6.94% respectively.

Portfolio Overview

The Japanese small cap market delivered a strong performance in 2023, rising 21.1% in local currency terms and 13.3% in US dollar terms. The main drivers of this performance were stocks with low price-to-book and low return-on-equity ratios, as well as electronics and generative AI beneficiaries. Value stocks significantly outperformed growth stocks, as inflationary pressures and rising global bond yields triggered a style rotation that favored low PBR stocks and hurt growth stocks. By sector, electronics was the best performer, driven by the increasing demand for generative AI, followed by low PBR sectors, such as regional banks, construction, materials, and automobile, while growth sectors, such as commercial services and healthcare, lagged behind.

In this market environment, the fund underperformed its benchmark, the MSCI Japan Small Cap Daily Total Return Net Index, on both a net and gross of fees basis, mainly due to our growth bias. Our domestic stable and exceptional growth holdings faced profit taking as low PBR stocks dominated the market. Our overall portfolio valuation was in line with the benchmark by price-to-earnings, but significantly higher by price-to-book, as our portfolio was tilted towards higher ROE stocks. As price-to-book was the dominant factor, our high ROE, high price-to-book portfolio suffered. The sector allocation had a slightly negative impact. The positive contribution from overweighting electronics and underweighting Real estate investment trust was offset by underweighting regional banks, which benefited from high bond yields, and commodities, and overweighting commercial services.

Portfolio Outlook

Inflation has eased, showing that most of the monetary tightening is over. Small cap growth stocks may recover after lagging for three years because of their link to global bond yields. The Bank of Japan's change from the zero-interest-rate policy would not change the trend, as CPI and labor data will be soft in Japan. For market valuations, price-to-book is below 1.1x, and price to earnings for fiscal year (FY) 2024 is 13.3x, which is attractive compared to other assets. During the growth correction, many growth companies, especially domestic ones, became undervalued, making the fund's price to earnings for FY 2024 12.6x and below the benchmark, while the ROE is 15.7% and much higher than 8.9% of the benchmark, offering attractive valuations for their long-term fundamentals and high return on invested capital. For the portfolio's positioning, the team is overweighting growth companies that are reasonably priced and that could gain from the pandemic recovery and long-term structural changes, such as digital transformation and demography.

PineBridge Investments Japan Co., Ltd.
January 2024

Investment Manager's Report (continued)

PINEBRIDGE LATIN AMERICA EQUITY FUND

Portfolio Objective

PineBridge Latin America Equity Fund seeks to achieve a superior rate of return by making equity and equity-related investments in companies operating in the economies of Latin America.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge Latin America Equity Fund Class "A" and "Y" returned 28.23% and 29.27% respectively. Over the same period, the benchmark index, the MSCI Emerging Markets Latin America Daily Total Return Net Index (USD) returned 31.72%.

Portfolio Overview

In 2023, the MSCI EM Latin America DTR Net Index rose 31.72%, outperforming the MSCI Emerging Market Index, which rose 9.87% in a year marked by much better-than-expected GDP growth in Brazil versus initial estimates, considerably better inflation outlook despite a hot labor market, and a record high trade surplus.

Mexico, Peru, and Brazil were the strongest performers in the region. Elevated energy and commodity prices continued to benefit the region in 2023, especially in Brazil which had a record year in terms of agricultural output. Mexico has been a beneficiary of nearshoring as the country consolidates its market share of US imports and surpassed China in 2023. Brazil's rise was led by an aggressive interest rate cutting cycle and dovish comments from the Central Bank as inflation subsided. Peru's performance was driven by a key constituent in the materials sector as well as a key bank in the index. Chile and Colombia were the weakest due to part of political uncertainty as well as fears of excessive interventionist policy that obfuscated the investment outlook. However, both countries did manage to post a positive return in 2023 despite significantly underperforming the index. At a sector level, energy and real estate led the Index, while health care and consumer discretionary lagged.

Latin American markets rallied strongly in the first half of 2023 led by energy, real estate, and industrial, while materials, health care, and consumer discretionary were the main laggards. In the second half of the year, energy, real estate, and materials outperformed the index while health care, communication services, and consumer discretionary were the main laggards. Several healthcare companies had significant cost pressures as well as balance sheet concerns in 2023. Latin America posted an 18.52% return in the first half 2023 followed by an 11.97% in the second half 2023. The main driver of the region's performance was multiple expansion; however, earnings growth is expected to accelerate in 2024.

The fund lagged its benchmark, the MSCI Emerging Markets Latin America Daily Total Return Net Index, during the year 2023 gross and net of fees. Positive contributors to the fund's relative performance were stock selection in Brazil, allocation in Chile, and an idiosyncratic position in Argentina. They were offset by stock selection in Mexico, Chile, and Peru. At a sector level, the largest contributors to relative returns were stock selection in communication services, consumer discretionary, and consumer staples while the main headwinds came from selection in financials, energy, and industrials.

Portfolio Outlook

Looking ahead, valuations in Latin America do not look as low priced as they were a year ago; however, consensus expects earnings to move to positive territory led by lower inflation, lower financing costs, and relatively easy year over year competitions, especially in Brazil. The fiscal deficit remains as a key concern in Brazil. Although valuations for the Latin America region are now close to historical averages, Brazilian equities are still trading at a significant discount to the ten-year historical median. Latin America is largely isolated from geopolitical tensions, and stronger than expected economic growth in the US and China could provide positive optionality to the region. The political noise has calmed down in Chile relative to the significant concerns in 2023, which is positive for equities. Mexico's nearshoring phenomenon remains a strong underlying investment thesis; however, a major election in the US as well as a slowdown in growth would affect Mexico. Mexico's general elections are scheduled to be held in June of this year where the citizens will decide who is President. The consumer backdrop remains very strong in Mexico. The outlook for Colombia and Peru is less certain, but higher energy and commodity prices would provide positive upside.

PINEBRIDGE LATIN AMERICA EQUITY FUND (continued)

Portfolio Outlook (continued)

The team continues to identify companies that are best positioned to succeed in the current economic environment and are mispriced relative to their investment characteristics. We seek to construct style-neutral, high-conviction differentiated portfolios of companies whose business success is driven by unique competitive attributes, who have strong ESG (Environmental, Social and Governance) characteristics.

PineBridge Investments LLC

January 2024

Investment Manager's Report (continued)

PINEBRIDGE US LARGE CAP RESEARCH ENHANCED FUND

Portfolio Objective

The investment objective of the Fund is to attain long term growth of capital by means of a diversified portfolio through investment in equity and equity-related securities of companies, at least 90% of which have assets, products or operations based in the United States or are included in the Russell 1000 index. Up to 10% of the value of the Sub-Fund may be invested in other companies which have a US Stock Exchange listing. The Russell 1000 Index is constructed by the Russell Investment Group to provide a comprehensive and unbiased barometer for the large-cap segment of the US equity universe and is completely reconstituted annually to ensure new and growing equities are reflected.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge US Large Cap Research Enhanced Fund Class "A", "A5CP", "A5H", "Y" and "YYD" returned 22.31%, 20.30%, 20.27%, 22.92% and 23.98% respectively. Over the same period, the benchmark index, the Standard & Poor's 500 Total Return Net Index (USD) and (SGD) returned 25.67% and 23.60% respectively.

Portfolio Overview

The year 2023 started off with relatively strong performance in the valuation cluster, only for all three clusters to decline starting in April, hitting their bottom in June and July. The market rallied from there, causing an uptick in all three clusters, reaching their peak in October 2023. The quality cluster was the best performing cluster in the second half of the year. However, all three clusters began to decline in early October, with quality and valuation holding better than the sentiment cluster. In terms of growth categorization, underweight in the mature cyclical growth category contributed positively to performance due to strong allocation and selection effects. The largest detractor to performance was the high cyclical growth category, largely due to negative selection effect. The fund's weight in the high cyclical growth category was in line with the benchmark. On a sector basis, the overweight in the communication services sector was the top contributor over the year, with positive allocation and selection effects. The underweight in the information technology sector was the largest detractor due to negative selection effect, largely due to an underweight in NVIDIA earlier in the year.

Portfolio Outlook

Our 2024 equity outlook will likely depend on the macro environment – with both inflation data and economic demand expected to soften. The US 10-year note yield is expected to drop over the next year, US dollar strength will be a source of strength. Corporate margins and wages are expected to lag due to disinflationary trends. Equity markets are expected to improve as bond yields are beginning to decline, while the market focuses on implementing interest rate cuts while avoiding a profit slump. High valuations and lower yields emphasize the need for profit growth in 2024. While equity market valuations were a key driver of returns in 2023, there is uncertain potential for valuation expansion going further. January typically sees higher risk-taking and a reversal effect. The expectation is for valuation pressure to persist, influenced by tightly coupled rate relationships. We maintain a positive outlook for our quality factor.

Investment Manager's Report (continued)

PINEBRIDGE US RESEARCH ENHANCED CORE EQUITY FUND

Portfolio Objective

The investment objective of PineBridge US Research Enhanced Core Equity Fund is to seek to attain long-term growth of capital by means of a diversified portfolio through investment in equity and equity-related securities of companies at least 90% of which have assets, products or operations based in the United States or are included in the Russell 1000 Index. Up to 10% of the value of the Sub-Fund may be invested in other companies which have a US Stock Exchange listing.

The Russell 1000 Index is constructed by the Russell Investment Group to provide a comprehensive and unbiased barometer for the large-cap segment of the US equity universe and is completely reconstituted annually to ensure new and growing equities are reflected.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge US Research Enhanced Core Equity Fund Class "A" and "Y" returned 23.07% and 24.25% respectively. Over the same period, the benchmark index, the Standard and Poor's 500 Total Return Net Index returned 25.67%.

Portfolio Overview

The year 2023 started off with relatively strong performance in the valuation cluster, only for all three clusters to decline starting in April, hitting their bottom in June and July. The market rallied from there, causing an uptick in all three clusters, reaching their peak in October 2023. The quality cluster was the best performing cluster in the second half of the year. However, all three clusters began to decline in early October, with quality and valuation holding better than the sentiment cluster. In terms of growth categorization, underweight in the mature cyclical growth category contributed positively to performance due to strong allocation and selection effects. The largest detractor to performance was the high cyclical growth category, largely due to negative selection effect. The fund's weight in the high cyclical growth category was in line with the benchmark. On a sector basis, the overweight in the communication services sector was the top contributor over the year, with positive allocation and selection effects. The underweight in the information technology sector was the largest detractor due to negative selection effect, largely due to an underweight in NVIDIA earlier in the year.

Portfolio Outlook

Our 2024 equity outlook will likely depend on the macro environment – with both inflation data and economic demand expected to soften. The US 10-year note yield is expected to drop over the next year, US dollar strength will be a source of strength. Corporate margins and wages are expected to lag due to disinflationary trends. Equity markets are expected to improve as bond yields are beginning to decline, while the market focuses on implementing interest rate cuts while avoiding a profit slump. High valuations and lower yields emphasize the need for profit growth in 2024. While equity market valuations were a key driver of returns in 2023, there is uncertain potential for valuation expansion going further. January typically sees higher risk-taking and a reversal effect. The expectation is for valuation pressure to persist, influenced by tightly coupled rate relationships. We maintain a positive outlook for our quality factor.

January 2024

Investment Manager's Report (continued)

PINEBRIDGE USD HIGH YIELD BOND FUND

Portfolio Objective

The investment objective of PineBridge USD High Yield Bond Fund is to aim to maximize total return consisting of current income and capital appreciation by primarily investing in USD-denominated high yield debt securities.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge USD High Yield Bond Fund Class "A5HD", "X", "X1", "X2", "X2D", "X2H", "X2HD" and "X7" returned 11.25%, 14.28%, 10.41%, 7.83%, 7.83%, 13.49%, 13.41% and 3.96% respectively. Over the same period, the benchmark index, the Bloomberg Barclays U.S. High Yield 2% Issuer Capped Index (USD), (EUR), (GBP Hedged), (GBP Unhedged), (SGD) and (CHF) returned 13.44%, 9.60%, 12.37%, 7.05%, 11.57% and 3.19% respectively.

Portfolio Overview

The first quarter of 2023 started off with strong performance from risk asset classes investors had been optimistic that inflation was moderating at a pace that would allow the Fed to think about pausing the interest-rate increases that roiled markets in 2022. However, hotter-than-expected core Personal Consumption Expenditures figures in February followed by fears of systematic instability in the banking sector after the failures of Silicon Valley Bank and Signature Bank shook investor confidence and led to an increase in volatility in risk markets. In response, the US Treasury and the Fed took significant steps to guarantee depositors at these failed banks would remain whole and would backstop deposits at other US banks that may experience a contagion effect, calming investor nerves and bringing stability back to markets. Coming out of a volatile March, concerns around regional banking stress eased in April and retail fund flows into high yield mutual funds and exchange traded funds turned positive. Nonetheless, uncertainty around the looming US debt ceiling kept spreads from tightening and treasury rates anchored for the first half of the quarter. Towards the end of May and throughout June, as it became apparent that an agreement to raise the US debt ceiling would be reached and employment and economic data remained resilient, treasury rates backed up sharply and spreads rallied materially.

The theme from the second quarter extended into the third quarter, as higher quality and longer duration asset classes experienced negative total returns as treasury rates traded higher across the curve and the curve steepened. Meanwhile, high yield bonds produced positive total returns as the benefit from high coupon income more than offset the detracting impact of higher treasury rates and marginally wider spreads. Light supply, better-than-expected earnings, economic data, and moderating inflation supported the asset class and investor sentiment through August. This picture began to reverse in September as high yield bond prices declined during the month amid a backdrop of modestly wider spreads, sharply higher treasury rates, and the highest volume of monthly issuance since January 2022. The move higher in longer-term treasury yields extended into the third month, bringing the cumulative increase to 100 bps for both the 10- and 30-year US treasury securities (USTs) relative to recent mid-July lows, with 10-year USTs ending the month at the highest level since 2007. Treasury rates continued to move higher to start the fourth quarter alongside higher than anticipated consumer prices. Investor sentiment in risk asset classes was also weighed down by growing concerns that the ongoing Israel-Hamas war could spill over and engulf the Middle East. However, markets reversed course in November and December with both treasury rates and credit spreads rallying. Bullish investor sentiment resulted from better-than-expected declines in inflation data, positive economic and issuer fundamentals, and a directionally dovish Fed narrative. The Fed strengthened its pivot language, with Chair Powell's press conference incorporating more reminders of its dual mandate. This unexpected pull forward in the Fed's assessment of inflation from sticky to mission accomplished, subject only to a couple more months of confirmation, alters the conditions under which rate cuts may occur. Previously, rate cut expectations appeared conditioned on economic weakening, with an unspoken condition that labor markets soften alongside a decline in inflation. Now, given recent disinflation, the new tone sounded like rate cuts no longer require job weakness as long as the disinflation trend continues. If the Fed is correct in its assessment that sticky core inflation has been broken, this opens the door for a more constructive 2024, with the possibility of a strong US economy alongside rate cuts.

Investment Manager's Report (continued)

PINEBRIDGE USD HIGH YIELD BOND FUND (continued)

Portfolio Overview (continued)

According to Bloomberg data, Ba-rated bonds returned 11.60%, while single-B rated bonds returned 13.78% and Caa-rated bonds returned 19.84%. Treasury rates traded were volatile during the year, rallying significantly in the first and fourth quarters, and trading sharply higher during the second and third quarters. Overall, for the year, 5- and 10-year treasury yields traded 16 bps lower and flat, respectively. The 10-year treasury yield traded as high as 4.99% and as low as 3.31% during the year, before ending the year at 3.88%. The option-adjusted spread on the Bloomberg Barclays U.S. High Yield 2% Issuer Capped Index traded 147 bps tighter during the year to end at 323 bps, trading as wide as 518 bps and as tight as 312 bps. Full year 2023 gross issuance totaled \$175.9 billion, roughly 65% higher than 2022 volumes. High yield mutual funds and ETFs reported outflows of \$7.9 billion driven by actively managed funds, as ETFs reported small inflows for the year. The par weighted US high yield default rate including distressed exchanges ended December at 2.84%, up from 1.65% at the start of the year.

The fund outperformed (gross and net of fees) its benchmark, Bloomberg Barclays U.S. High Yield 2% Issuer Capped Index, in 2023. Security was the most significant driver of relative outperformance during the year, with sector selection having a marginal detracting impact. Security selection had a contributing impact across most sectors during the year. Most notably, selection among consumer cyclical, communications, capital goods, energy and real estate investment trusts (REITs) credits contributed to fund performance during the year. These contributions more than offset the detracting impact from basic industrial and brokerage names. From a sector selection standpoint, the cash drag from a small cash position and an underweight allocation to consumer cyclicals detracted from fund performance. Meanwhile, overweight allocations to the finance companies and brokerage sectors and an underweight allocation to the communications sector contributed to performance.

Portfolio Outlook

The economic outlook in the United States appears more promising than most expected at the beginning of 2023. A resilient consumer, tight labor market and moderating inflation have bolstered economic conditions. Issuer fundamentals are still solid but with expectations for a deterioration as the lagged effects of restrictive monetary policy take hold. The Fed has signaled the end of its tightening cycle but will likely maintain higher rates during 2024. The picture outside of the US looks weaker. Despite the dovish stance taken by the Fed, the ECB maintained its commitment to data dependence and did not demonstrate a similar readiness to contemplate rate cuts. This stance persisted even as inflation declined more rapidly than anticipated and growth data indicated weakness. In China, concerns about weakness in the property sector persist, and the fundamental picture now looks weaker, with a rebound expected to come later than originally expected.

A key trend emerging as we head into 2024 is a pickup in tail risks. In the US, these include concerns that if the Fed keeps rates higher for longer than we think prudent, it may create an unexpected "break" in the economy or markets, and history has shown that easing cycles rarely follow a smooth downward glidepath. The US also faces the risk that a fiscal policy impasse or political gridlock will dial up uncertainty and volatility in markets. In other areas of the world, risks are emanating from the ongoing conflicts between Russia and Ukraine, as well as Israel and Hamas. Their potential for regional spillover and unforeseen fall-on effects adds considerable uncertainty to the global outlook.

While we view the probability of serious "black swan" market developments as low in the short term, we're seeing more of these tail risks starting to creep up, providing an argument for a slightly more defensive overall stance in portfolios. In addition, with current higher yield curves, investors are finally being well compensated within the defensive component of their portfolios. Despite these and less-severe downside risks, our view remains a deceleration rather than a classic cyclical recession in the US, with some other regions facing less positive but not dire baseline outlooks.

Investment Manager's Report (continued)

PINEBRIDGE USD HIGH YIELD BOND FUND (continued)

Portfolio Outlook (continued)

Against this backdrop, spread valuations are fair, but higher all-in yields remain attractive relative to history. Spreads are priced for our anticipated increase in default rates to 3%. We continue to expect moderate default rates in 2024, near historical averages; the default tsunami that many erroneously feared at the start of the year has not materialized, and we are simply shifting from a period of ultra-low defaults to a more normalized environment. But the total yield and price convexity across credit makes for an appealing value proposition. We view fixed income broadly as attractive in this higher-yielding environment. We believe we can strike a balance with attractive spread and yield while minimizing default risk by keeping the lower rating tier significantly underweight, leaving us with a slightly more defensive bias. We are not overly concerned about defaults and believe we can ameliorate most risk by staying away from many over leveraged and lower-rated issuers.

Investment Manager's Report (continued)

PINEBRIDGE USD INVESTMENT GRADE CREDIT FUND

Portfolio Objective

The investment objective of PineBridge USD Investment Grade Credit Fund is to aim to maximise total return and provide capital preservation through investment in the US Investment Grade credit universe.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge USD Investment Grade Credit Fund Class "A", "C", "X" and "Y" returned 6.96%, 5.79%, 8.09% and 7.22% respectively. Over the same period, the benchmark index, the Bloomberg Barclays US Credit Total Return Index returned 8.18%.

Portfolio Overview

Markets began the new year with a firm tone as investors sought risk in an environment that increasingly looked like the Fed was in the process of engineering a soft landing for the economy. Specifically, the US economy showed signs of slowing, while at the same time, inflation continued to trend lower. However, the regional bank's failures in the US drove risk-off sentiment within the financial sector across the globe. The strong economic data and inflation data during the beginning of the month were overshadowed by the failure of two large regional banks driving credit spreads wider. On March 12th the Federal Reserve and Federal Deposit Insurance Corporation announced a new bank term funding program to address liquidity concerns. The move instilled some confidence among investors as deposit flight slowed considerably, and credit spreads reversed half of the widening towards the end of the month.

A modicum of stability was restored within the credit markets as the first quarter results from regional banks were better than feared and there were no signs of widespread deposit outflows. However, markets remained concerned about the impending debt ceiling crisis, sticky inflation, and an economic slowdown. Strong US economic data in May, debt ceiling resolution, and the hopes of an upcoming Fed pause helped credit markets recover from the weakness in early May. The resilient US economy, strong second-quarter earnings, and cooling inflation data continued to support risk assets in June and July. Credit spreads moved tighter, and the treasury curve bear steepened against positive macro sentiment. Market volatility picked up in August following a string of upside economic data surprises driving treasury yields higher.

The month of September witnessed a tale of two halves in the markets, with the first half being relatively calm and the second half experiencing a surge in interest rate volatility. During the first half of the month, strong economic data and modest rise rates were viewed as benign, and credit spreads held steady. However, the second half of the month witnessed increased interest rate volatility and wider spreads as markets digested hawkish comments by the Federal Open Market Committee.

Credit markets came under pressure in October driven by a steep rise in interest rates and increasing geopolitical risks. The US 10-year treasury yields witnessed a steep rise during the month to briefly touch 4.99%, before closing the month at 4.93%. In November, the markets reversed the trend with a rally driven by material spread tightening and the market view that the Fed has reached the end of the hiking cycle. Risk assets continued their rally in December driven by slowing inflation, a dovish Fed, and solid economic numbers. The Fed held benchmark interest rates steady in the range of 5.25%-5.5% for the third meeting in a row during the FOMC meeting. Inflation data for November was in line with expectations and indicated a slowing yearly trend, while the Fed projected three rate cuts in the new year.

The fund gross return outperformed its benchmark, the Bloomberg Barclays US Credit Index, during the period due to positive contributions from security selection, primarily in the consumer non-cyclical, communication, and Energy sectors. However, selected securities within financials detracted performance. Asset allocation was also positively driven by the underweight government sector but overweight cash modestly detracted performance. The portfolio duration was modestly overweight benchmark which detracted performance during the period.

Investment Manager's Report (continued)

PINEBRIDGE USD INVESTMENT GRADE CREDIT FUND (continued)

Portfolio Outlook

The dovish pivot from the Fed propelled a year-end rally in the investment-grade credit market. Fundamentals remain strong with only a modest increase in default rates expected for 2024. From a technical perspective, strong domestic demand is likely to continue and interest from foreign buyers is likely to increase, given easier monetary signals from the Fed, while all-in yields remain near historical highs. Net supply is expected to be lower compared to 2023, which should also be supportive from a technical perspective. In credit, we expect spreads to be well-supported but largely range-bound, and total returns are likely to be primarily driven by rates moving lower.

Overall current market conditions point to a continuation of recent supportive trends, and we maintain our positive outlook for US dollar investment-grade credit in the near term.

PineBridge Investments LLC
January 2024

Investment Manager's Report (continued)

PINEBRIDGE ASIA DYNAMIC ASSET ALLOCATION FUND

Portfolio Objective

PineBridge Asia Dynamic Asset Allocation Fund seeks long-term capital appreciation by identifying new and changing economic and investment trends and investing primarily in the Asia Pacific Region by taking a forward view of fundamental economic and market conditions across the region.

Portfolio Performance

For the year 1st January to 31st December 2023, the PineBridge Asia Dynamic Asset Allocation Fund Class "L" returned 5.96%. Over the same period, the Fund's benchmark index, a blended index of 60% of the MSCI All Country Asia Pacific ex-Japan Daily Total Return Index and 40% of the JACI Composite Total Return Index returned 6.61%.

Portfolio Overview

2023 was a challenging year for global equities. Various factors, such as managing inflation, dealing with the US regional banking crisis, and the optimism around artificial intelligence, created a mix of challenges and opportunities, especially with the impact of increasing bond yields. Despite these global equities recorded a strong performance this year. Both developed market (DM) and emerging market (EM) equities rose with DM leading EM. US equities and Japanese equities rose the highest this year. In quarter 4, markets witnessed a significant market rally as investor optimism grew for a shift towards a more accommodative monetary policy. Signs of cooling economic and inflation data fueled speculation that the Federal Reserve might abandon its aggressive rate-hiking stance, with expectations of potential rate cuts in early 2024. In emerging markets, Chinese equities struggled due to geopolitical uncertainties, slower economic recovery, and issues in the property sector. Indian equities gained due to an increase in foreign investor flows and positive policy support from the government.

Bond markets experienced a volatile year. Yields experienced a decline in both quarter 1 and quarter 4 but saw a rapid increase in quarter 2 and notably in quarter 3. In March, US treasury (UST) yields plummeted as the market swiftly adjusted to the removal of rate hike expectations, instead factoring in potential cuts due to concerns about the banking system. However, as these concerns diminished, yields climbed in quarter 2, primarily influenced by more hawkish predictions from central banks. In quarter 3, 10-year UST yields rose significantly, as investors began to expect policy rates to stay higher for longer. However, the inflation data started to cool down in November keeping the major central banks across the globe on hold. Government bonds rebounded, driven by optimism surrounding anticipated rate cuts in the coming year. In credit, spreads tightened in both investment grade (IG) and high yield (HY) this year as the soft-landing optimism grew.

Forex (FX) performance was mixed for the USD in 2023 against G10 and Emerging market (EM) currencies. Over the past twelve months, the US Dollar Index (DXY) has witnessed a seven-month decline and a five-month ascent. Among G10 Forex (FX), the Switzerland Franc (CHF) ended the year as the top performer. Given its safe-haven status, geopolitical uncertainty may have supported the currency. Meanwhile, the Japan Yen (JPY) depreciated vs the USD driven by widening interest rate differentials. Bank of Japan (BoJ) tweaked its YCC policy in July but that did not help the JPY much. However, in the last two months, the currency picked up against the USD. In emerging markets, Latin America currencies performed well against USD helped by real rate buffers.

The Fund delivered a strong performance in 2023 but underperformed the benchmark by a small margin. Our equity segment detracted from performance whereas the fixed income segment contributed. In equities, the major drag in performance was due to our allocation in China. Chinese equities suffered this year due to sluggish economic recovery and issues in the real estate sector. Our allocation to India, Hong Kong, and Taiwan equities contributed to performance this year. Indian equities rallied due to the strong credit growth and positive policy support from the Modi Government. In fixed income, our allocation to Hong Kong, Malaysia, and Korea bonds contributed to performance.

Investment Manager's Report (continued)

PINEBRIDGE ASIA DYNAMIC ASSET ALLOCATION FUND (continued)

Portfolio Outlook

The last six months of supply-side-driven disinflation essentially ensure that developed market rate hikes are over. The Fed wishes not to appear as eager as it likely is to cut rates in the March-to-May timeframe. Merely hinting at this pull-forward of its pivot has already eased financial conditions quite substantially, which will diminish much of the remaining monetary lags percolating through the system, lowering recession odds. Rate cuts preceding a recession (an oddity), should a recession still unfold, could soften the downside to markets relative to the uncertainty they have typically faced when sudden recessions caught central banks behind the curve. With the Fed moving toward a "mission accomplished" stance on inflation (despite pro forma attempts to project the contrary), the primary remaining risk to markets is a reacceleration of inflation. We don't dismiss this risk yet given the progress in "supercore" inflation in recent months, we modestly increased our relative preference for risk in mid-December after Powell's press conference. This stepped-up risk budget is focused on the dispersion of opportunities created by 2023, instead of on a continued rising tide.

PineBridge Investments Asia Ltd.
January 2024

Statement of Manager's Responsibilities

The Manager is responsible for preparing the Annual Report and the Financial Statements in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law). In preparing these Financial Statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the Financial Statements have been prepared in accordance with applicable accounting standards and identify the standards in question subject to any material departure from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the Financial Statements on the going concern basis unless it is inappropriate to presume that each Sub-Fund will continue in operation.

The Manager is responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Fund and to enable it to ensure that the Financial Statements are prepared in accordance with FRS 102 and comply with the provisions of the Prospectus, Trust Deed and the UCITS Regulations. The Manager has appointed State Street Fund Services (Ireland) Limited (the "Administrator") to maintain the accounting records of the Fund at 78 Sir John Rogerson's Quay, Dublin 2, Ireland. The Manager is also responsible with respect to its duties under the UCITS Regulations to take reasonable steps for the prevention and detection of fraud, error and other irregularities.

Under the UCITS Regulations, the assets of the Fund are entrusted to the Depositary for safe-keeping.

The Manager is responsible for the maintenance and integrity of the corporate and financial information included on PineBridge's website (www.pinebridge.com). Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

During the course of the year, regulation around sustainability-related disclosures continued to evolve, through the Sustainable Finance Disclosure Regulation (Regulation EU/2019/2088) (the "SFDR") and the EU Taxonomy Regulation (Regulation (EU) 2020/852, and amending SFDR) (the "Taxonomy Regulation") and their associated regulatory technical standards and available guidance. Additional disclosure requirements under SFDR Level 2 are applicable to all annual reports published on or after 1 January 2023 and such disclosures as they relate to the Sub-Funds can be found in Appendix III of this report. Such disclosures have in part been prepared using data sourced from third party data providers which was available as at the date of which the disclosures were produced. Similarly, the activities reported in the disclosures may be an output of proprietary analysis, which in turn may utilise data published by underlying investee companies. It has been observed that the availability of data, both from third party data providers and underlying investee companies, continues to be challenging in some respects. Additionally, there may be further regulatory guidance of relevance to the content of the disclosures that is still to be issued. The disclosures included in Appendix III should consequently be read and understood in light of these continuing challenges. With the assistance of the Manager and the Investment Managers, the Board continues to monitor the ongoing development and evolution of sustainability-related regulation and associated guidance and the availability of relevant third party and investee companies' data in this regard.

Connected Persons

Regulation 43 of the Central Bank (Supervision And Enforcement) Act 2013 (Section 48(1)) (Undertakings For Collective Investment in Transferable Securities) Regulations 2019 (the "UCITS Regulations") "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the unitholders of the UCITS".

Statement of Manager's Responsibilities (continued)

Connected Persons (continued)

As required under UCITS Regulation 81 (4), the Directors, as responsible persons are satisfied that there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by UCITS Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

ON BEHALF OF THE BOARD OF THE MANAGER:

Director

Director

Date: 10 April 2024

Depository's Report to the Unitholders of PineBridge Global Funds

We have enquired into the conduct of the Manager in respect of PineBridge Global Funds (the "Trust") for the financial year ended 31 December 2023, in our capacity as Depository to the Trust.

This report including the opinion has been prepared for and solely for the unitholders in the Trust, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depository

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Manager in each annual accounting period and report thereon to the unitholders.

Our report shall state whether, in our opinion, the Trust has been managed in that period in accordance with the provisions of the Trust's Trust Deed and the UCITS Regulations. It is the overall responsibility of the Manager to comply with these provisions. If the Manager has not so complied, we as Depository must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depository Opinion

The Depository conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Trust has been managed.

(i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Trust Deed and the appropriate regulations and;

(ii) otherwise in accordance with the Trust's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Trust has been managed during the year, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager and the Depository by the Trust Deed, by the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 [Section 48(1)] (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ('the Central Bank UCITS Regulations'); and

(ii) otherwise in accordance with the provisions of the Trust Deed, the UCITS Regulations and the Central Bank UCITS Regulations.

State Street Custodial Services (Ireland) Limited
78 Sir John Rogerson's Quay
Dublin 2

Date: 10 April 2024

Independent auditors' report to the unitholders of the Sub-Funds of PineBridge Global Funds

Report on the audit of the financial statements

Opinion

In our opinion, PineBridge Global Funds' financial statements:

- give a true and fair view of the Sub-Funds' assets, liabilities and financial position as at 31 December 2023 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report & Audited Financial Statements, which comprise:

- the Statement of Financial Position as at 31 December 2023;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Changes in Net Assets Attributable to Redeemable Participating Unitholders for the year then ended;
- the Statement of Changes in Equity for the year then ended;
- the Schedule of Investments for each of the Sub-Funds as at 31 December 2023; and
- the notes to the financial statements for each of the Sub-Funds, which include a description of the accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Trust in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Emphasis of matter - financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 1 to the financial statements which describes the reasons why the financial statements of PineBridge Global Emerging Markets Bond Fund, PineBridge Global Emerging Markets SDG Corporate Bond Fund, PineBridge Emerging Europe Equity Fund, PineBridge Global Emerging Markets Local Currency Bond Fund and PineBridge Global Strategic Income Fund have been prepared on a basis other than going concern.

Conclusions relating to going concern

With the exception of PineBridge Global Emerging Markets Bond Fund, PineBridge Global Emerging Markets SDG Corporate Bond Fund, PineBridge Emerging Europe Equity Fund, PineBridge Global Emerging Markets Local Currency Bond Fund and PineBridge Global Strategic Income Fund where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above,

based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Sub-Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

With the exception of PineBridge Global Emerging Markets Bond Fund, PineBridge Global Emerging Markets SDG Corporate Bond Fund, PineBridge Emerging Europe Equity Fund, PineBridge Global Emerging Markets Local Currency Bond Fund and PineBridge Global Strategic Income Fund where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, in auditing the financial statements, we have concluded that the manager's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Sub-Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the manager with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report & Audited Financial Statements other than the financial statements and our auditors' report thereon. The manager is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Responsibilities for the financial statements and the audit

Responsibilities of the manager for the financial statements

As explained more fully in the Statement of Manager's Responsibilities set out on page 43, the manager is responsible for the preparation of the financial statements in accordance with the applicable framework giving a true and fair view.

The manager is also responsible for such internal control as the manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the manager is responsible for assessing the Sub-Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the manager intends to cease operations, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf

This description forms part of our auditors' report.

Use of this report

This report, including the opinion, has been prepared for and only for the unitholders of each of the Sub-Funds as a body in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Gains and losses arose solely from continuing operations, with the exception of PineBridge Global Emerging Markets SDG Corporate Bond Fund. There were no gains or losses other than those dealt with in the Statement of Comprehensive Income. There was no activity during the financial year for PineBridge Global Emerging Markets Bond Fund, PineBridge Global Emerging Markets Local Currency Bond Fund and PineBridge Global Strategic Income Fund, which terminated in prior financial year, therefore there is no Statement of Comprehensive Income presented for those funds.

The accompanying notes are an integral part of these Financial Statements.

** Incorporating PineBridge Investments GF Mauritius Limited.

Gains and losses arose solely from continuing operations, with the exception of PineBridge Global Emerging Markets SDG Corporate Bond Fund. There were no gains or losses other than those dealt with in the Statement of Comprehensive Income. There was no activity during the financial year for PineBridge Global Emerging Markets Bond Fund, PineBridge Global Emerging Markets Local Currency Bond Fund and PineBridge Global Strategic Income Fund, which terminated in prior financial year, therefore there is no Statement of Comprehensive Income presented for those funds.

The accompanying notes are an integral part of these Financial Statements.

Notes to the Financial Statements for the financial year ended 31 December 2023

1. ACCOUNTING POLICIES

The significant accounting policies and estimation techniques applied in the preparation of these Financial Statements are set out below. The accounting policies applied are consistent with all the periods presented unless otherwise stated.

BASIS OF PREPARATION AND PRESENTATION

a) Statement of compliance

The financial statements have been prepared in accordance with accounting standards generally accepted in Ireland ("Irish GAAP") including Financial Reporting Standard ("FRS") 102, the financial reporting standard applicable in the UK and Republic of Ireland and the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "UCITS Regulations"). The financial statements have been prepared on a going concern basis, with the exception of PineBridge Global Emerging Markets Bond Fund, PineBridge Global Emerging Markets SDG Corporate Bond Fund, PineBridge Emerging Europe Equity Fund, PineBridge Global Emerging Markets Local Currency Bond Fund and PineBridge Global Strategic Income Fund (all the "Sub-Funds") whose financial statements are prepared on a basis other than going concern as the Board of Directors of the Manager resolved to terminate these Sub-Funds during the financial year, during the prior financial year or in the near future. The Directors of the Manager approved the termination of these funds for strategic and commercial reasons.

The financial statements are prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss.

The Fund has continued to avail of the exemption available to open-ended investment funds under FRS 102 and is not presenting a cash flow statement.

All references to net assets throughout the document refer to Net Assets Attributable to Holders of Redeemable Participating Units unless otherwise stated, with the exception of the PineBridge Asia Dynamic Asset Allocation Fund which is prepared under Equity presentation and use the reference Net Assets.

b) Consolidation

FRS 102 sets out the conditions relating to parent undertakings and the preparation of consolidated financial statements for subsidiaries. FRS 102 typically defines controlling interest as ownership, directly or indirectly of over 50% of the outstanding voting shares of another entity. The results of the subsidiary undertakings are consolidated into the group Statement of Comprehensive Income from the date on which control over the operating and financial decision making is obtained. PineBridge India Equity Fund holds 100% of the aggregated shares of PineBridge Investments GF Mauritius Limited. Accordingly, the Financial Statements of PineBridge Investments GF Mauritius Limited are consolidated in the PineBridge India Equity Fund, and therefore include the assets and liabilities and the profit/loss of PineBridge Investments GF Mauritius Limited for the financial year ended 31 December 2023 and financial year ended 31 December 2022.

All significant inter-fund accounts and transactions have been eliminated in the Consolidated Financial Statements of PineBridge India Equity Fund.

c) New accounting pronouncements

There are no new standards, interpretations or amendments to existing standards that are effective that would be expected to have a significant impact on the Fund.

d) Financial Assets and Financial Liabilities at fair value through profit or loss

i) Classification

This category has two sub-categories: financial assets and liabilities held for trading and those designated by Directors at fair value through profit or loss at inception. Financial assets and financial liabilities are designated by the Manager at fair value through profit or loss at inception with the exception of financial derivative

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

1. ACCOUNTING POLICIES (continued)

d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

i) Classification (continued)

instruments which are held for trading. Financial assets and financial liabilities designated at fair value through profit or loss at inception are those that are managed and their performance evaluated on a fair value basis in accordance with the Sub-Funds' investment strategy.

ii) Recognition and Derecognition

Purchases and sales of investments are recognised on trade receipt basis as disclosed on page 4. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Sub-Fund has transferred substantially all risks and rewards of ownership.

iii) Measurement

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed in the Statement of Comprehensive Income. Subsequent to initial recognition, all financial assets or financial liabilities are measured at fair value through profit or loss. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Statement of Comprehensive Income in the financial period in which they arise.

iv) Fair Value

Transferable Securities

Equity securities listed on a recognised stock exchange or traded on any other regulated market are valued at the last traded price as at the Statement of Financial Position date on the stock exchange or market which constitutes the principal market for such securities. If for specific assets the last traded price does not, in the opinion of the Directors of the Manager, reflect their fair value or are not available, the price of the most recent transaction provides evidence of the current fair value as long as there has not been a significant change in economic circumstances since the time of the transaction. Fixed income securities listed on a recognised stock exchange or traded on any other regulated market are valued at evaluated bid price as at the Statement of Financial Position date on the stock exchange or market which constitutes the principal market for such securities.

In the case of any security not listed, quoted or dealt in on a regulated market or for which no quotation or value is available which would provide a fair valuation, or in respect of which the price is unrepresentative, the fair value of such security is determined on the basis of the probable realisation value and is determined by the Directors of the Manager or other competent person appointed by the Directors of the Manager and approved for the purpose by the Trustee, using valuation techniques.

Collateralised Mortgage Obligations ("CMOs")

Some Sub-Funds may invest in securities with contractual cash flows, such as collateralised mortgage obligations. CMOs, a type of mortgage-backed security, are bonds that represent claims to specific cash flows from large pools of home mortgages. The streams of principal and interest payments on the mortgages are distributed to the different classes of CMO interests, known as tranches, according to a complicated deal structure. Each tranche may have different principal balances, coupon rates, prepayment risks, and maturity dates (ranging from a few months to twenty years).

CMOs are often highly sensitive to changes in interest rates and any resulting change in the rate at which homeowners sell their properties, refinance, or otherwise pre-pay their loans. Investors in these securities may not only be subjected to this prepayment risk, but also exposed to significant market and liquidity risks.

The fair value of CMOs are based on quoted market prices and are valued at the evaluated bid price.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

1. ACCOUNTING POLICIES (continued)

d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

iv) Fair Value (continued)

Forward Foreign Currency Exchange Contracts

The fair value of open forward foreign currency exchange contracts and open foreign currency exchange spot contracts are calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. Changes in the value of open forward foreign currency exchange contracts and open foreign currency exchange spot contracts are recognised as unrealised gains or losses on forward foreign currency exchange contracts until the contracts are terminated, at which time realised gains and losses are recognised in the Statement of Comprehensive Income. For each relevant Sub-Fund, gains or losses on open forward foreign currency exchange contracts and open foreign currency exchange spot contracts are included in the unrealised gain/(loss) on financial derivative instruments on the Statement of Financial Position and are shown in the Schedule of Investments of each relevant Sub-Fund.

Investment Funds

Investments in open-ended investment funds are estimated at fair value at the latest available unaudited net asset value for the shares or units obtained from the relevant administrator. The changes in the net asset value of these units is recognised as net gain/(loss) on investment activities at fair value through profit or loss. The fair value of investments in exchange traded investment funds are based on quoted market prices and are valued at the last traded price.

Futures Contracts

The fair value of futures contracts is based upon their current quoted daily settlement prices on the relevant exchange as at the Statement of Financial Position date. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised in the Statement of Comprehensive Income. For each relevant Sub-Fund, gains or losses on open futures contracts are included in the unrealised gain/(loss) on financial derivative instruments on the Statement of Financial Position and are shown in the Schedule of Investments of each relevant Sub-Fund. Initial margin deposits are made upon entering into futures contracts and are generally included in cash or cash equivalents.

Total Return Swaps and Credit Default Swaps

A total return swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In total return swaps, the underlying asset, referred to as the reference asset, is usually an equity index, loan, or bond. The fair value of the swaps is determined based on the mark to market valuation, which makes assumptions that are based on market conditions existing on each Statement of Financial Position date. The difference between the stated terms of the swap contract and the prevailing market conditions are recorded as movement in net unrealised gains or losses on investments in the Statement of Comprehensive Income. Unrealised gains and losses on total return swaps are included in the unrealised gain or loss on financial derivative instruments in the Statement of Financial Position.

Credit default swaps involve, to varying degrees, elements of credit and counterparty risk in excess of the amount recognised in the Statement of Financial Position. Valuation of the credit default swap is an estimate of a credit default event happening at a particular point in time. Notional principal amounts are used to express the extent of involvement in these transactions, but the amounts potentially subject to credit risk are much smaller.

The fair values of credit default swaps are calculated using standard net present value methodologies whereby all future cashflows of the fixed side of the swap are discounted to their present value using the appropriate interest rate and whereby all future cashflows of the default side of the swap are discounted to their present value based on the cost of default to the default payer. This cost is determined by the recovery rate, notional amount of the contract, and default probability among other factors. The fair value calculations are completed daily and provided to the Administrator by a pre-approved independent valuation agent.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

1. ACCOUNTING POLICIES (continued)

d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

iv) Fair Value (continued)

To-Be-Announced ("TBA") Purchase/Sale Commitments

The Sub-Funds may enter into TBA commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price and par amount have been established, the actual securities have not been specified. However, it is anticipated that the amount of the commitments will not significantly differ from the principal amount. The Sub-Funds hold, and maintain until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the Sub-Funds may enter into offsetting contracts for the forward sale of other securities it owns. Income on the securities will not be earned until settlement date.

The Sub-Funds may also enter into TBA sale commitments to hedge its portfolio positions or to sell mortgage-backed securities it owns under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities, or an offsetting TBA purchase commitment deliverable on or before the sale commitment date, are held as "cover" for the transaction, or other liquid assets in an amount equal to the notional value of the TBA sale commitment are segregated. If the TBA sale commitment is closed through the acquisition of an offsetting TBA purchase commitment, the Sub-Funds realise a gain or loss. If the Sub-Funds deliver securities under the commitment, the Sub-Funds realise a gain or a loss from the sale of the securities based upon the unit price established at the date the commitment was entered into.

TBA commitments, which are accounted for as purchase and sale transactions, may be considered securities themselves, and involve a risk of loss due to changes in the value of the security prior to the settlement date as well as the risk that the counterparty to the transaction will not perform. Counterparty risk is mitigated by having a master agreement between the Sub-Funds and the counterparty. Unsettled TBA commitments are valued at their fair value. The contract is marked to market daily and the change in fair value is recorded by the Sub-Funds as an unrealised gain or loss. Based on market circumstances, the Manager will determine whether to take delivery of the underlying securities or to dispose of the TBA commitments prior to settlement. The Sub-Funds did not hold any TBA commitments as at 31 December 2023 and 31 December 2022.

Investment Gains/(Losses)

Unrealised gains and losses arising from changes in the fair value of financial assets and financial liabilities at fair value through profit or loss are included in the Statement of Comprehensive Income in the financial period in which they arise.

Realised gains and losses on investment transactions, excluding debt instruments, are calculated using the average cost method. Realised gains and losses on investments transactions in debt instruments are calculated as the difference between sales proceeds and the average cost of the instrument. Gains and losses realised on the sale of all financial assets and financial liabilities carried at fair value through profit or loss are recognised in the Statement of Comprehensive Income.

v) Critical Accounting Estimates and Assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities predominantly relate to the fair value of financial instruments.

Fair-value of financial instruments

The Sub-Funds may, from time to time, hold financial instruments that are not quoted in active markets, such as over-the-counter derivatives. Fair values of such instruments may be determined by using valuation techniques. Valuation techniques used include the use of comparable recent arm's length transactions, discounted cash flow analysis and other valuation techniques commonly used by market participants. Where valuation

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

1. ACCOUNTING POLICIES (continued)

d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

v) Critical Accounting Estimates and Assumptions (continued)

techniques are used to determine fair values, they are validated and periodically reviewed by experienced personnel at the Administrator, independent of the party that determined them and validated with the Investment Manager.

Capital gains tax

The Sub-Funds currently incur taxes imposed by certain countries on capital gains. Such gains are recorded gross of capital gains tax in the Statement of Comprehensive Income. Capital gains tax, where it occurs, is shown as a separate item in the Statement of Comprehensive Income.

vi) Cash at Broker/Amounts due to Broker/Cash held with Broker as Collateral

Cash at broker may comprise of margin cash held with brokers for futures contracts traded by the Sub-Funds, a portion of which may be restricted to cover initial margin requirements, and Cash held with broker as collateral may comprise of cash held by counterparties for collateral purposes for open over-the-counter ("OTC") financial derivative instruments held by the Sub-Funds. Such cash remains in the ownership of the relevant Sub-Fund and is recorded as an asset on the Statement of Financial Position.

Amounts due to broker may comprise of margin cash and cash collateral pledged by counterparties for OTC financial derivative instruments held by the Sub-Funds. Such cash remains in the ownership of the relevant counterparty and a related liability to repay the cash is recognised as "Amounts due to broker" on the relevant Sub-Fund's Statement of Financial Position.

vii) Cash at bank

Cash at bank comprises of cash balances held at State Street Bank & Trust Company or by the relevant appointed Sub-Custodian. Cash held in the functional currency of the relevant Sub-Fund is valued at cost, which approximates fair value. Cash held in currencies other than the functional currency of the Sub-Fund is initially recognised at cost using the relevant currency exchange rates on date of purchase and subsequently recognised at fair value using the relevant currency exchange rates as at the Statement of Financial Position date.

viii) Transaction Costs

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the Sub-Fund had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, the Sub-Fund shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of bonds, loans, investment funds, forwards, futures contracts and swaps are included in the purchase and sale price of the investment. They cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

Transaction costs on purchases and sales of equities are included in net gains/(losses) on investments in the Statement of Comprehensive Income for each Sub-Fund. Depository transactions costs are included in trustee and sub-custodian fees in the Statement of Comprehensive Income for each Sub-Fund. These costs are separately identifiable transaction costs. The total costs incurred by each Sub-Fund during the financial year are disclosed in Note 8.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

1. ACCOUNTING POLICIES (continued)

e) Income from Investments

i) Bond Income

Interest income is recognised in the Statement of Comprehensive Income for all debt instruments using the effective interest method. The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating the interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts throughout the expected life of the financial instrument, or a shorter period where appropriate, to the net carrying amount of the financial asset or financial liability.

ii) Dividend Income

Dividend income arising on the underlying investments of a Sub-Fund is recognised as income in the Statement of Comprehensive Income of the relevant Sub-Fund on the dates on which the relevant securities are listed as "ex-dividend". In accordance with FRS 102, dividend income is reported gross of any irrecoverable withholding tax, which is disclosed separately in the Statement of Comprehensive Income and net of any tax credits.

iii) Other Income

Other income is recognised in the Statement of Comprehensive Income on an accruals basis.

f) Expenses

Each Sub-Fund pays all of its expenses and such proportion of the Fund's expenses as is allocated to that Sub-Fund, other than those expressly assumed by the Manager. The costs and gains/(losses) of any hedging transactions will be attributable to the relevant unit Class. To the extent that expenses are attributable to a specific unit Class of a Sub-Fund, that unit Class bears such expenses. All expenses, as disclosed in the Statement of Comprehensive Income, are accrued on a daily basis.

Capital Gains Taxation

The Sub-Funds may be subject to taxes imposed by certain countries on capital gains on the sale of investments. Capital gains taxes are shown as a separate item under taxation in the Statement of Comprehensive Income.

g) Foreign Exchange

The functional currency of the Sub-Funds is US Dollar, the currency of the primary economic environment in which each Sub-Fund operates. US Dollar is also the presentational currency of the Sub-Funds.

The cost of investments and other transactions in currencies other than the functional currency of each Sub-Fund have been translated at the rates of exchange ruling at the time of the transaction. The fair value of the investments, other assets and other liabilities in currencies other than the functional currency of each Sub-Fund have been translated at the rates of exchange ruling as at financial year end. The resulting profits or losses are accounted for in the Statement of Comprehensive Income.

h) Distribution Policy

The Manager may declare a distribution once a year out of the net income (whether in the form of dividends, interest or otherwise) available for distribution by a Sub-Fund and the realised profits less realised losses and unrealised profits less unrealised losses (capital). The Manager may also declare interim distributions on the same basis. Distribution frequency varies between share classes and is outlined in the Prospectus. Some Sub-Funds may distribute on a more frequent basis, see details below.

PineBridge Global Funds

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

1. ACCOUNTING POLICIES (continued)

h) Distribution Policy (continued)

Sub-Fund Name	Frequency
PineBridge USD Investment Grade Credit Fund	Last day of February, May, August and November each financial year
Class YD Units USD	year

Unitholders may elect in an application for units either to receive distributions in cash or to reinvest the distribution amount in further units. For Sub-Funds whose units are classified as liability, the distributions to Unitholders are recognised as Finance Costs in the Statement of Comprehensive Income. Distributions reinvested are disclosed in the Statement of Changes in Net Assets Attributable to Redeemable Participating Unitholders.

i) Income Equalisation

Income equalisation arrangements are applied in the case of subscriptions to and redemptions from certain Sub-Funds. The NAV per redeemable participating unit as calculated on each Dealing Day has an income element and a capital element. In relation to any subscription or redemption, the monies received or paid are allocated proportionately to or from income and capital in a Sub-Fund. These arrangements are intended to ensure that the income per redeemable participating unit, which is distributed in respect of any distribution period for which a distribution is made, is not affected by changes in the number of redeemable participating units in issue during that period. The calculation of equalisation is based on net income. Income equalisation is in operation in PineBridge Asia ex Japan Small Cap Equity Fund, PineBridge Asia Pacific Investment Grade Bond Fund, PineBridge Asian High Yield Total Return Bond Fund, PineBridge Global Emerging Markets SDG Corporate Bond Fund, PineBridge Global Focus Equity Fund, PineBridge USD High Yield Bond Fund and PineBridge USD Investment Grade Credit Fund.

j) Unit Classes

i) Redeemable Participating Units

Redeemable participating units are redeemable at the unitholder's option and are classified as financial liabilities. The redeemable units can be repurchased by the Fund at any time for cash equal to a proportionate share of the Sub-Fund's NAV. The redeemable unit is carried at the redemption amount that is payable at the Statement of Financial Position date if a unitholder exercised his or her right to have the Fund repurchase his or her unit. In accordance with the Prospectus, for the relevant Sub-Funds, the Fund is contractually obliged to redeem units at dealing prices and the liability to redeemable participating unitholders reflects this. Monetary value unit transactions during the financial year are recognised in the Statement of Changes in Net Assets Attributable to Redeemable Participating Unitholders of the relevant Sub-Fund. The units of all Sub-Funds are classified as financial liabilities with the exception of PineBridge Asia Dynamic Asset Allocation Fund at 31 December 2023 and at 31 December 2022, which units are classified as equity. See details in (ii) below.

ii) Equity Units

Equity units are also redeemable at the Unitholder's option. Each equity unit can be repurchased by the Sub-Fund at any time for cash equal to a proportionate share of the Sub-Fund's NAV.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

2. DEALING NET ASSET VALUE

The Net Asset Values and Net Asset Values per Unit disclosed in this note are in the currency of the relevant Unit Class and not the functional currency of the relevant Sub-Fund.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

2. DEALING NET ASSET VALUE (continued)

Reconciliation of Net Asset Value per Financial Statements to Net Asset Value per dealing NAV

The NAV at which unitholders may subscribe or redeem (i.e. the "dealing NAV") may differ from the NAV disclosed in the financial statements due to a difference in the Valuation Date as per the prospectus and the financial year end date.

In line with the Prospectus, the final 2023 Valuation Date for PineBridge Latin America Equity Fund was 28 December 2023. As these financial statements were prepared to 31 December 2023, all transactions which occurred on the Sub-Fund between the respective final 2023 Valuation Date and 31 December 2023 have been accounted for in these Financial Statements and the Sub-Fund's investments have been fair valued using the last traded market prices available as at 31 December 2023. All assets and liabilities not denominated in USD were converted to USD using the relevant exchange rates as at 31 December 2023 as presented in Note 10. The dealing NAV and dealing NAV per unit as disclosed earlier in this note is that of the final 2023 Valuation Date for the Sub-Fund.

The following is the reconciliation between the NAV in the financial statements and the NAV as per dealing NAV for the Sub-Fund as at 31 December 2023.

	PineBridge Latin America Equity Fund USD
Net Asset Value per Financial Statements	79,636,228
Total transactions adjustment	<u>1,075,766</u>
Net Asset Value per dealing NAV	<u><u>80,711,994</u></u>

In line with the Prospectus, the final 2022 Valuation Date for PineBridge Latin America Equity Fund was 29 December 2022. As these financial statements were prepared to 31 December 2022, all transactions which occurred on the Sub-Fund between the respective final 2022 Valuation Date and 31 December 2022 have been accounted for in these Financial Statements and the Sub-Fund's investments have been fair valued using the last traded market prices available as at 31 December 2022. All assets and liabilities not denominated in USD were converted to USD using the relevant exchange rates as at 31 December 2022 as presented in Note 10. The dealing NAV and dealing NAV per unit as disclosed earlier in this note is that of the final 2022 Valuation Date for the Sub-Fund.

The following is the reconciliation between the NAV in the financial statements and the NAV as per dealing NAV for these Sub-Funds as at 31 December 2022.

	PineBridge Latin America Equity Fund USD
Net Asset Value per Financial Statements	74,410,435
Total transactions adjustment	<u>764,809</u>
Net Asset Value per dealing NAV	<u><u>75,175,244</u></u>

4. CASH AND COLLATERAL

(i) Cash at Bank

All cash holdings and bank overdrafts as at 31 December 2023 and 31 December 2022 are held at State Street Bank & Trust Company ("State Street"), the relevant appointed Sub-Custodian, or Bank of America, with the exception of cash at broker and cash held with brokers as collateral, which are held with the relevant counterparties for the financial derivative instruments. See the note below for further details of cash at broker and cash held with brokers as collateral.

(ii) Cash at Broker, Amounts due to Broker and Cash held with Broker as collateral

The following table outlines the Sub-Funds margin cash position for Futures Contracts as at 31 December 2023 and 31 December 2022:

Fund Name	Counterparty	Margin Cash	
		31 December 2023	31 December 2022
PineBridge Asia Pacific Investment Grade Bond Fund	Goldman Sachs	USD1,385,777	USD 4,970,264
PineBridge Global Bond Fund	Morgan Stanley	USD 158,014	USD 142,750
PineBridge Global Dynamic Asset Allocation Fund	Morgan Stanley	USD7,561,422	USD18,098,946
PineBridge Global Dynamic Preservation Plus Fund	Morgan Stanley	USD8,489,845	USD 7,377,164
PineBridge Asia Dynamic Asset Allocation Fund	Morgan Stanley	USD1,351,223	USD 1,712,989

As at 31 December 2023 and 31 December 2022, all of this margin cash is restricted due to initial margin requirements by the relevant brokers.

The following table outlines the Sub-Funds cash collateral held for forward foreign currency exchange contracts as at 31 December 2023 and 31 December 2022:

Fund Name	Counterparty	Cash Collateral	
		31 December 2023	31 December 2022
PineBridge Global Dynamic Asset Allocation Fund	JP Morgan Chase Bank	USD 500,000	USD-
PineBridge Global Dynamic Asset Allocation Fund	Morgan Stanley	USD 500,000	USD1,940,000
PineBridge Global Dynamic Preservation Plus Fund	Morgan Stanley	USD1,550,000	USD1,745,000
PineBridge Global Bond Fund	Standard Chartered Bank	USD 20,000	USD290,000

The following table outlines the Sub-Funds cash collateral held for Total Return Swaps Contracts as at 31 December 2023 and 31 December 2022:

Fund Name	Counterparty	Cash Collateral	
		31 December 2023	31 December 2022
PineBridge Global Dynamic Preservation Plus Fund	UBS	USD-	USD10,000

Cash may be set aside as collateral by the Trustee and held by the counterparties for OTC financial derivative instruments ("FDI") in accordance with the terms of the relevant counterparty agreements, which are based on the International Swaps and Derivatives Association ("ISDA") Master Agreement.

(iii) Collateral

When entering into an OTC derivative instrument and during the term of that transaction, the Sub-Funds and/or the counterparty may post or receive securities as collateral and/or margin related to changes in the market value of the derivative. Additionally, the counterparty may require additional collateral and/or margin that is unrelated to changes in the market value of the derivative. If the counterparty enters into insolvency proceedings or otherwise defaults on its obligations, the ability of the Sub-Funds to recover collateral posted to the counterparty may be delayed or limited. Investments pledged by the Sub-Funds as collateral are recognised at fair value in the relevant Sub-Fund's Schedule of Investments. The nominal value and market value of the underlying securities pledged as collateral and/or margin to the counterparties as at 31 December 2023 were: USD150,181 (nominal value of 200,000) as held on PineBridge Global Bond Fund, as at 31 December 2022: USD155,232 (nominal value of 200,000) as held on PineBridge Global Bond Fund. See the Sub-Fund's Schedule of Investments for the securities pledged as collateral.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

5. EFFICIENT PORTFOLIO MANAGEMENT

A Sub-Fund may employ FDI for the purposes of hedging and efficient portfolio management purposes and shall be understood to fulfil the following criteria as set out in the UCITS Regulations:

- (a) they are economically appropriate in that they are realised in a cost-effective way;
- (b) they are entered into for one or more of the following specific aims:
 - (i) reduction of risk;
 - (ii) reduction of cost;
 - (iii) generation of additional capital or income for the Sub-Fund with a level of risk which is consistent with the risk profile of the Sub-Fund and the risk diversification rules set out in the UCITS Regulations;
- (c) their risks are adequately captured by the risk management process of the Sub-Fund; and
- (d) they cannot result in a change to the Sub-Fund's declared investment objectives or add supplementary risks in comparison to the general risk policy as described in the sales documents.

For efficient portfolio management purposes, the Sub-Funds may enter into repurchase agreements, reverse repurchase agreements and/or stock lending agreements, subject to the conditions and limits set out in the UCITS Regulations, to generate additional income for the Fund. During the financial year the following Sub-Funds used derivatives for efficient portfolio management techniques; PineBridge Asia Dynamic Asset Allocation Fund, PineBridge Global Dynamic Asset Allocation Fund, PineBridge Global Bond Fund and PineBridge Global Dynamic Preservation Plus Fund. The remaining Sub-Funds did not utilise these efficient portfolio management techniques.

6. FINANCIAL RISK MANAGEMENT

(a) General Risk Management Process

Each Sub-Fund is exposed to market price risk, interest rate risk, credit risk, liquidity risk and currency risk arising from the financial instruments it holds. The Sub-Funds' overall risk management programme focuses on the volatility of financial markets and seeks to minimise potential adverse effects on financial performance.

The risk management policies (which have not changed in 2023) employed to manage these risks for the financial years ending 31 December 2023 and 31 December 2022 are outlined below.

PineBridge Investments (the "Firm") is a group of international companies that provides investment advice and markets asset management products and services to clients around the world. The Firm's approach to risk management and controls is a bottom-up led process with top-down controls imposed by the boards of directors of the Firm and the Manager as appropriate, for the establishment of firm-wide risk management and controls.

The Manager has established and maintains its own permanent risk management function in discharge of its obligations under the UCITS Regulations. The Manager has also established a risk committee which meets regularly to focus specifically on risk attached to the activities of the Fund (the "Risk Committee").

The board of directors of each individual company within the Firm has risk management responsibilities as defined by best practices and guidelines, and applicable laws and regulations. In this regard the Firm has established the Risk Management Department, the Global Risk and Compliance Committee ("GRCC") and Business Management to assist and report to the board of directors of the Firm.

The Risk Management Department is hierarchically and functionally independent from operating units of the Firm which allows for the independent performance of the risk management activities, having taken into account the nature, scale and complexity of its business and the funds it manages.

The GRCC is tasked with assisting the board of directors of the Firm in evaluating and assessing the different types of risk to which the organization is exposed. The members of the GRCC have direct access to, and receive regular reports from management. The GRCC is comprised of representatives from Executive Management, Compliance, Investment Management, Risk Management, Operations, Finance, Legal and IT. The GRCC consists of a number of risk sub-committees, with roles and responsibilities defined in the Committee Charters.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(a) General Risk Management Process (continued)

Business Management is responsible for executing the organisation's risk management process.

The Firm has a comprehensive risk management process to monitor, evaluate and manage the principal risks it assumes in conducting its activities.

The Sub-Funds are also required to adhere to investment and borrowing restrictions laid down by the UCITS Regulations.

Among other restrictions, the Sub-Funds are restricted to holding a maximum of 10% of the total NAV of the Sub-Fund in any one particular security, with certain exceptions allowed. Compliance with these restrictions is monitored by the Manager's Compliance Team as well as the relevant Investment Manager and the Trustee. In addition to the investment and borrowing restrictions, the investment objective and policy of each Sub-Fund contains specific investment parameters and these are set out in detail in the Prospectus.

(b) Market Risk

This is the risk where the fair value or future cash flows of a financial instrument can fluctuate because of changes in market prices relating to: changes in actual market prices, interest rate and currency movements.

i) Global Exposure

Per the UCITS Regulations, and as part of the risk management and reporting requirements, the Fund must be monitored and measured in accordance with the regulatory requirements. In accordance with the regulatory requirements, global exposure can be calculated in two ways, either:

- (i) the Commitment Approach that calculates the incremental exposure generated by the instruments held in the Sub-Funds.
- (ii) Value at Risk ("VaR"), where complex investment strategies are used. VaR measure estimates the potential loss of the portfolio over a pre-defined period of time given a specified confidence level. VaR methodology is a statistical measurement that produces a single aggregate result for the overall portfolio, taking into consideration the market volatilities of all the markets and assets as well as their correlations allowing for offsetting across different assets and markets.

The Commitment approach is used to calculate global exposure for all Sub-Funds, with the exception of the PineBridge Global Dynamic Preservation Plus Fund which uses the VaR analysis. The Commitment approach converts any Sub-Fund's derivative financial positions into an equivalent position of the underlying asset based on the market value of the underlying asset. The unrealised appreciation/(depreciation) value of any derivatives held is disclosed on the Statement of Financial Position for the applicable Sub-Funds.

In calculating the VaR, the following parameters are used:

- a confidence level of 99%;
- a holding period of 21 days;
- a historical observation period, where applicable, of at least 1 year.

The Sub-Fund applies a back-testing methodology to regularly assess the performance of the VaR model. We believe our VaR model remains a reasonable basis for assessing market risk within the Sub-Fund but we will continue to assess its performance and make adjustments when necessary.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(b) Market Risk (continued)

i) Global Exposure (continued)

The calculation of the VaR limit during the year for the PineBridge Global Dynamic Preservation Plus Fund are as follows:

Sub-Fund	Var limit at 31 December 2023	Maximum	Minimum	Average
PineBridge Global Dynamic Preservation Plus Fund	20.00%	2.83%	1.50%	2.06%

Sub-Fund	Var limit at 31 December 2022	Maximum	Minimum	Average
PineBridge Global Dynamic Preservation Plus Fund	20.00%	3.32%	1.04%	1.76%

ii) Market Price Risk

Market price risk arises from uncertainty about future prices of financial instruments held. It represents the potential loss the portfolios might suffer through price movements.

The Investment Managers consider the asset allocation of the Sub-Funds in order to manage the risk associated with exposure to currencies which are not in the base (or functional) currency of the Sub-Fund, countries, industry sectors and individual securities, whilst continuing to follow the Sub-Funds' investment objectives.

The Investment Managers are engaged in substantial research activity and engage in a wide variety of meetings to identify, communicate, analyse and mitigate market risks. These range from daily economics and Investment Manager conference calls to discuss macroeconomic trends and fixed income market risk, weekly and bi-weekly fixed income and equity market reviews, bi-weekly currency meetings and monthly global asset allocation meetings which cross investment teams, and ensure that Investment Managers have a current, well vetted view of the global financial markets.

Management of risk relative to benchmarks as discussed above is ultimately the responsibility of the Investment Manager of each Sub-Fund.

Senior Investment Managers provide oversight for the Sub-Funds and are accountable for ensuring application of the Firm's investment process. This is achieved through monthly reviews of both performance and application of investment strategy. In addition, the Compliance Department in the Firm provides real time monitoring of the consistency of application of the UCITS investment restrictions for all Sub-Funds.

Holdings in the equity and balanced Sub-Funds are constantly monitored to determine whether any of the evaluated factors have changed or if a stock has hit valuation targets. If valuation targets are achieved, the holdings are sold.

For fixed income Sub-Funds, the Investment Manager's focus on a pro-active risk control process. Risk measurement and monitoring is focused on the ex-ante investment decision process resulting from the manager's investment process as implemented in the Sub-Fund. Sub-Funds are well diversified without overly replicating the benchmark.

The Sub-Funds' exposure to market price risk at 31 December 2023 and 31 December 2022 is equivalent to the fair values of investments held, as detailed on the Statement of Financial Position.

Some limitations of sensitivity analysis are:

- this methodology is based on historical data and cannot take account of the fact that, future market price movements, correlations between markets and levels of market liquidity in conditions of market stress, may bear no relation to historical patterns;
- this methodology provides a sensitivity snapshot based on data available as at 31 December 2023 and 31 December 2022;
- the market price risk information is a relative estimate of risk rather than a precise number;
- the market price information represents a hypothetical outcome and is not intended to be predictive; and

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(b) Market Risk (continued)

ii) Market Price Risk (continued)

- future market conditions could vary significantly from those experienced in the past.

iii) Interest Rate Risk

This risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Sub-Funds which hold fixed interest rate debt securities are exposed to fair value interest rate risk where the value of these securities may fluctuate as a result of a change in market interest rates. Sub-Funds which also hold a number of floating/adjustable interest rate debt securities, which are re-priced periodically in line with market interest rate movements prior to maturity date are exposed to cash flow interest rate risks.

Floating rate bonds are structured with a floating rate payment structure, whereby a fixed basis point spread is paid over the prevailing reference rate, typically 3 month LIBOR or EURIBOR, and reset on a quarterly or semi-annual basis. However, the total interest earned on investments will vary from time to time with changes in the underlying reference rate.

Certain securities and instruments in which the Sub-Fund may invest, rely in some fashion upon the LIBOR. On March 5, 2021, the United Kingdom's Financial Conduct Authority ("FCA"), which regulates LIBOR, confirmed that all LIBOR settings will either cease to be provided by any administrator or no longer be representative following the Feedback Statements published by ICE Benchmark Administration Limited, the administrator of LIBOR on its intention of ceasing publication of all Sterling, Euro, Swiss Franc, Japanese Yen settings, the one-week and two-month U.S. dollar settings immediately after 31 December 2021 and ceasing publication of the remaining U.S. dollar settings immediately after end - September 2024. Certain of a Sub-Fund's securities and investments may involve individual contracts that have no existing fallback provision or language that contemplates the discontinuation of LIBOR, and those investments could experience increased volatility or reduced liquidity as a result of the transition process. The transition may also result in a reduction in the value of certain investments held by a Sub-Fund or a reduction in the effectiveness of related Sub-Fund transactions such as hedges. Furthermore, the transition process may also require changes to be made to a Sub-Fund's investment objectives and policies. Any such effects of the transition away from LIBOR, as well as other unforeseen effects, could result in losses to a Sub-Fund or in additional costs being borne by the Sub-Fund.

The Sub-Funds' exposure to interest rate risk is detailed in the relevant Schedule of Investments.

All other financial assets and financial liabilities, with the exception of equities, cash at bank balances and bank overdrafts, held by the Sub-Funds are not directly exposed to interest rate risk. The Sub-Funds are exposed to interest rate risk on the interest earned on its cash and bank balances and bank overdrafts. This exposure is not considered to be significant.

Interest rate (duration) risks are managed by the Investment Managers whose management of duration risk is monitored through regular performance reviews with senior managers, as well as through monthly peer reviews of positioning held with senior managers. Individual managers are authorised to initiate fixed income trades within pre-set limits.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(b) Market Risk (continued)

iii) Interest Rate Risk (continued)

Interest Rate Risk Sensitivity

Duration is a measure of the sensitivity of a bond price to interest rates. The percentage change in the price is equal to the change in interest rates multiplied by the modified duration. The monetary impact detailed in the following table shows the possible change in NAV resulting from a 1% change in interest rates.

Sub-Fund	Average Duration 31/12/23	Monetary impact on NAV (100bps) 31/12/23	Average Duration 31/12/22	Monetary impact on NAV (100bps) 31/12/22
PineBridge Asia Pacific Investment Grade Bond Fund	5.48	20,338,617	4.48	14,181,192
PineBridge Asian High Yield Total Return Bond Fund	2.06	3,053,043	2.02	965,777
PineBridge Global Bond Fund	6.67	2,810,345	7.71	2,756,780
PineBridge Global Dynamic Asset Allocation Fund	2.69	11,433,379	4.99	28,592,104
PineBridge Global Dynamic Preservation Plus Fund	2.65	4,116,174	2.92	4,158,935
PineBridge Global Emerging Markets SDG Corporate Bond Fund	3.66	1,209,366	3.98	1,282,812
PineBridge USD High Yield Bond Fund	3.15	1,803,936	3.87	2,182,329
PineBridge USD Investment Grade Credit Fund	7.01	16,647,618	6.79	13,279,495
PineBridge Asia Dynamic Asset Allocation Fund	4.42	1,855,044	4.22	1,749,111

Some limitations of sensitivity analysis are:

- this methodology is based on historical data and cannot take account of the fact that, future market price movements, correlations between markets and levels of market liquidity in conditions of market stress, may bear no relation to historical patterns; and
- this methodology provides a sensitivity snapshot based on data available as at 31 December 2023 and 31 December 2022.

iv) Currency Risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. This risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

Currency risks are managed by the individual Investment Managers. Their performance is monitored through regular performance reviews with senior managers, as well as through monthly peer reviews of positioning and compliance that are held with senior managers and the Compliance Department. Individual managers must be authorised to initiate FX trades within pre-set trade limits for individual transactions.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(b) Market Risk (continued)

iv) Currency Risk (continued)

PineBridge US Research Enhanced Core Equity Fund and PineBridge USD Investment Grade Credit Fund were not exposed to any significant foreign currency risk at 31 December 2023 or at 31 December 2022, as all of their assets and liabilities were denominated in their functional currency.

In certain cases, the Sub-Funds hold assets and liabilities denominated in currencies other than the functional currency and are therefore exposed to currency risk as the value of securities denominated in other currencies will fluctuate due to change in exchange rates. Certain Sub-Funds use derivatives to hedge currency risk.

All Sub-Funds have been authorised by the Central Bank to use certain FDI for hedging purposes and investment purposes.

As an authorised UCITS legal manager, the Manager is required to file a Risk Management Process document with the Central Bank. This document provides an overview of the Firm's policy on derivatives risk management including, but not limited to: an overview of FDI used, counterparty risk exposure, calculation of global exposure, leverage and cover requirements, expertise required and in place to invest in FDI, valuation rules, legal risk and reporting requirements. The Sub-Funds use only a limited number of simple FDI solely for non-complex investment, hedging and replication purposes.

The Sub-Funds hold both non-monetary assets, such as equities and investment funds and monetary assets and liabilities, such as debt instruments, futures contracts, forward foreign exchange contracts, swap contracts, cash at bank, cash at broker, debtors and creditors in currencies other than USD. FRS 102 considers the foreign exchange exposure relating to non-monetary assets and liabilities are a component of market price risk not foreign currency risk. However, management monitors the exposure on all foreign currency denominated assets and liabilities.

The following tables detail Sub-Funds with material currency exposures as at 31 December 2023 and 31 December 2022. Sub-Funds not listed below do not have material currency exposures as at the Statement of Financial Position date. Material currency exposure is where the total monetary amount is greater than 5% of the NAV of the Sub-Fund.

Forward Foreign Exchange Contracts

The Sub-Funds listed on page 233 may engage in forward foreign exchange contracts for investment purposes or for hedging purposes, to alter the currency exposure of the underlying assets, in accordance with the limits set out by the Central Bank. Forward foreign exchange contracts have the risk of currency exposure in the same way as a regular currency spot transaction. Forward foreign exchange contracts are OTC traded and therefore have counterparty risk. Forward foreign exchange contracts also carry roll risk, which is the risk that when a forward contract expires and a new forward to replace the expired one cannot be put into place at the same cost or on the same hedge basis. This may occur due to changes in market liquidity or interest rates, resulting in a potential slippage or loss in the hedge position due to the contract expiration and roll.

In relation to hedged classes listed below, it is the intention of the Manager or its delegate to hedge the currency exposure between the denominated currency of the hedged class and the base currency of the Sub-Fund. The Manager or its delegate will seek to achieve this hedging by using FDI, including but not limited to forward foreign exchange contracts as set out, and within the conditions and limits imposed, by the Central Bank. The details of hedged classes used by Sub-Funds as at 31 December 2023 and 31 December 2022 are outlined below:

31 December 2023 Sub-Fund	Class	Currency	Counterparty	Unrealised Gains on Forwards

c) Credit Risk

This is the risk that one party to a financial instrument or transaction will cause a financial loss for the other party by failing to discharge an obligation when it falls due. This includes counterparty risk and issuer (or investment) risk. In relation to the Sub-Funds, it can arise from receivables from another party, placing deposits with other entities, transacting in debt securities and entering into OTC FDI. For Sub-Funds investing in debt securities, the investment objectives and investment policies detailed in the supplements to the Prospectus provide details of the credit rating restrictions imposed on that Sub-Fund.

Leveraged loan obligations, if any, are subject to unique risks, including the possible invalidation of an investment as a fraudulent conveyance under relevant creditors' rights laws. In analysing each leveraged loan, the Manager compares the relative significance of the risks against the expected benefits of the investment.

Substantial research tools are available to the Investment Managers for use in the management of credit risk. These include extensive internally produced company and industry research, issue or industry specific 'brainpools', rating agency reports, purchased research databases, the Firm's online research library, internal R&D reports and other advanced credit risk management tools.

The Firm has a robust counterparty approval process. There are Regional Approval Committees (RACs) that are tasked with adding and removing counterparties as appropriate. The RACs approve and maintain lists of approved brokers. No transaction can take place with a broker until it has been approved and formally added to the Approved Broker List for the particular region. The lists are updated on a regular basis. The majority of the trades are executed on a Delivery Versus Payment basis. This ensures that the buyer's payment for securities is due at the time of delivery.

For OTC FDI such as total return swap contracts, the Investment Managers generally follow the standards set by the International Securities Dealers Association (ISDA) in its derivatives master agreements. ISDA swap confirmations are tracked and checked manually to confirm the terms of the trades are fully and correctly documented.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

c) Credit Risk (continued)

Collateral may be received from counterparties, as per the agreement with the counterparty to reduce counterparty risk.

Where the Sub-Fund provides collateral as a result of entering into total return swaps, it is exposed to the risk that the counterparty will be unable or unwilling to honour its obligations to return the collateral provided. The Sub-Fund may provide certain assets as collateral to counterparties in connection with total return swaps. If the Sub-Fund has over-collateralised (i.e., provided excess collateral to the counterparty) in respect of such transactions, it may be an unsecured creditor in respect of such excess collateral in the event of the counterparty's insolvency. If the Trustee or its subcustodian or a third party holds collateral on behalf of the Sub-Fund, the Sub-Fund may be an unsecured creditor in the event of the insolvency of such entity.

Listed below are the counterparties and banks used by the Sub-Funds and their respective long term credit ratings, as issued by Moody's rating agency, as at 31 December 2023 and 31 December 2022:

Counterparty	31 December 2023	31 December 2022
JPMorgan Chase	A1	A1
State Street Bank and Trust Company	Aa2	Aa2
Morgan Stanley	A1	A1
UBS	Aa2	Aa2
BNP Paribas SA	Aa3	Aa3
Brown Brothers Harriman & Co.	NR	NR
HSBC Bank Plc	Aa3	Aa3
Standard Chartered Bank	A1	A1

Trustee and Depositary

The Fund's trustee is State Street Custodial Services (Ireland) Limited (the "Trustee" and "Depositary"). All transferable securities (with the exception of Bank Loans, if any and investment fund investments), cash and bank balances and bank overdrafts are held by the Trustee and Depositary through its affiliate, State Street Bank and Trust Company ("State Street") or through a sub-custodian within the State Street custodial network.

All OTC FDI, investment funds, margin or other similar investments/monies deposited by or entered into on behalf of the Fund with a counterparty, clearing broker or other parties are not held within the State Street custodial network. The Trustee and Depositary is therefore not liable in any way for the default of any counterparty.

In accordance with the requirements of the Prospectus and the UCITS Regulations, the Sub-Funds' securities are maintained within the Trustee and Depositary's custodial network in segregated accounts. The Trustee and Depositary will ensure that any agents and sub-custodians it appoints to assist in safekeeping the assets of the Sub-Funds will segregate the assets of the Sub-Funds. Bankruptcy or insolvency of the Trustee and Depositary, a State Street affiliate company or sub-custodian may cause rights with respect to cash and securities held by State Street to be delayed or limited and the Sub-Funds will be treated as a general creditor of that entity in respect of its cash balances. Periodic monitoring and an annual credit review are performed on the Trustee and Depositary by the Manager. This review may include as appropriate an assessment of the Trustee and Depositary's liquidity position, income streams, asset quality and credit ratings. The long term credit rating of State Street as at 31 December 2023 was Aa2 (31 December 2022: Aa2), as rated by Moody's rating agency.

The Fund has granted a continuing security interest by way of a charge over its assets to the Trustee and Depositary and its affiliates, pursuant to the Trustee Agreement between the Fund, the Trustee, Depositary and State Street, as continuing security for the payment, discharge and performance of its obligations.

Credit risk can arise from receivables such as subscription and investment sale transactions awaiting settlement. Risk relating to these unsettled receivables is considered small due to the short settlement period involved and in

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

c) Credit Risk (continued)

relation to subscription transactions, the due diligence performed on the portfolio clients. All transactions in securities are settled and paid for on delivery using approved brokers. The maximum exposure related to unsettled transactions equals the receivable amounts shown on the Statement of Financial Position.

There were no past due or impaired assets as at 31 December 2023 or at 31 December 2022.

Credit risk relating to fixed income securities has been analysed for the below listed Sub-Funds with the industry acceptable classification basis:

d) Liquidity Risk

Liquidity risk is the risk that a Sub-Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

For the financial year ended 31 December 2023 and 31 December 2022, each Sub-Fund's assets comprise of mainly readily realisable securities. However, not all securities purchased by a Sub-Fund will be listed or rated and consequently liquidity may be lower. Liquidity risk is a factor that the Investment Managers must consider when investing in any financial instrument in order to remain compliant with the portfolio liquidity requirement to the extent required by Regulation 104 (1) of the UCITS Regulations. Moreover, the accumulation and disposal of holdings in some investments may be time consuming and may need to be conducted at unfavourable prices. Each Sub-Fund may also encounter difficulties in disposing of assets at their 'fair' market price due to adverse market conditions leading to limited liquidity.

Sub-Funds may invest in investments such as sovereign or corporate bond issues of fixed and/or floating rate which may be below investment grade, which as a result carry greater liquidity risk than investment grade sovereign or corporate bonds.

Some Sub-Funds may invest in securities with contractual cash flows, such as CMOs. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, including real estate values, delinquencies and/or defaults, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates. Investors in these securities may not only be subjected to this prepayment risk, but also exposed to significant market and liquidity risks.

Due to the unique and customised nature of loan agreements evidencing private debt assets and the private syndication thereof, these assets are not as easily purchased or sold as publicly traded securities. Although the range of investors in private debt has broadened, there can be no assurance that future levels of supply and demand in loan trading will provide the degree of liquidity in loan trading which currently exists in the market. In addition, the terms of these assets may restrict their transferability without borrower consent. The Manager will consider any restriction, along with all other factors, in determining whether or not to advise the Sub-Fund to acquire participation in each asset.

The main financial liabilities of each Sub-Fund are the redemption of units awaiting settlement, purchases of investments awaiting settlement, withholding tax, capital gains tax, amounts due to broker, bank overdraft and expenses payable. As an open-ended Fund, each Sub-Fund is required to sell units back to unitholders at a price equivalent to the NAV per unit, subject to settlement and dealing restrictions laid down in the Fund's Trust Deed and Prospectus.

In certain situations the Manager may, with the consent of the Trustee, temporarily suspend the determination of the Net Asset Value of any Sub-Fund. Any such suspension would result in the suspension of the issuing and redemption of the relevant Sub-Fund's Units to and from its Unitholders during such period of suspension.

The Investment Managers manage each Sub-Fund's liquidity position on a daily basis. Also the Manager is able, through the provisions in the Prospectus, to defer the processing of redemptions of significant size to facilitate an

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

d) Liquidity Risk (continued)

orderly disposition of securities in order to protect the interests of the remaining unitholders. The maximum value of redeemable participating units available for redemption on any given day can be restricted by the Fund to 10% of the total net asset value of that Sub-Fund in issue.

There are no financial liabilities as at 31 December 2023 and 31 December 2022 that fall due over 1 month except for the following Sub-Funds:

PineBridge Asia Dynamic Asset Allocation Fund USD 64,817 (1-3 months) (31 December 2022: USD 98,766 (1-3 months)).

PineBridge Global Dynamic Asset Allocation Fund USD 2,621,255 (1-3 months) (31 December 2022: USD 2,314,541 (1-3 months)).

PineBridge Global Bond Fund USD 109,869 (1-3 months) (31 December 2022: USD 255,564 (1-3 months)).

PineBridge Global Dynamic Preservation Plus Fund USD 2,560,859 (1-3 months) (31 December 2022: 1,076,387 (1-3 months)).

The Sub-Funds' financial liabilities due for payment within 1 month relate, in the most part, to security purchases awaiting settlement, redemptions of redeemable participating units, payment of expenses, withholding tax, bank overdraft interest and other open forward foreign currency exchange contracts that were not mentioned above. Details of these amounts, where relevant, can be found in the Statement of Financial Position.

The financial liabilities due for payment over 1 month relate to forward foreign exchange contracts on the PineBridge Asia Dynamic Asset Allocation Fund, PineBridge Global Dynamic Asset Allocation Fund, PineBridge Global Bond Fund and PineBridge Global Dynamic Preservation Plus Fund, futures contracts held on the PineBridge Global Dynamic Asset Allocation Fund, PineBridge Asia Dynamic Asset Allocation Fund, PineBridge Global Bond Fund and PineBridge Global Dynamic Preservation Plus Fund, cash at broker and capital gains tax payable which is considered an open ended liability.

e) Fair Value Hierarchy

The Fund is required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The Fund is required to provide a quantitative and qualitative analysis of those instruments recognised at fair value based on a three-level measurement hierarchy. The fair value hierarchy has the following levels:

- Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Manager, who considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The Global Valuation Committee meets quarterly, and additionally on an as needed basis to confirm and vote on all

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

e) Fair Value Hierarchy (continued)

current fair valuations held within the portfolios at PineBridge. Valuation procedures, controls, and documentation are also presented and verified, and any changes to methodologies are presented to the committee for discussion and approval.

All of the Sub-Funds' holdings are classified as Level 1 except for the Sub-Funds' holdings to the values noted in the table below:

Sub-Fund	Level	31 December 2023 USD	31 December 2022 USD

Investments whose values are based on quoted market prices in active markets, and therefore classified within Level 1, include active listed equities, futures contracts and investment funds, which are daily trading in an active market. The Fund does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include, investment-grade corporate bonds, US and non-US sovereign obligations and OTC FDI.

Fixed Income securities held in the Sub-Funds listed on the previous table are classified under Level 2 as they were valued based on evaluated prices.

As Level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include suspended or liquidated equity investments and corporate bonds. As at 31 December 2023 all Level 3 securities were carried at zero value except for 14 securities; British Airways Pass-Through Trust held on PineBridge USD Investment Grade Credit Fund, six China Government Bonds and four China Development Bank securities held on PineBridge Global Bond Fund, Ozon Holdings PLC held on PineBridge Global Dynamic Preservation Plus Fund, OAS SA held on PineBridge Global Emerging Markets SDG Corporate Bond Fund and Bollre SE held on PineBridge Europe Research Enhanced Equity Fund. As at 31 December 2022 all Level 3 securities were carried at zero value except for 9 securities; four China Development Bank securities held on PineBridge Global Bond Fund, Itau Unibanco Holding (Preference) held on PineBridge Global Dynamic Preservation

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

e) Fair Value Hierarchy (continued)

Plus Fund, Land O'Lakes Capital Trust I held on PineBridge USD High Yield Bond Fund, Ozon Holdings (ADR) held on PineBridge Global Dynamic Preservation Plus Fund, OAS Restructuring and OAS (Warrants) held on PineBridge Global Emerging Markets SDG Corporate Bond Fund.

During the financial year ended 31 December 2023 British Airways Pass-Through Trust held on PineBridge USD Investment Grade Credit Fund and Land O'Lakes Capital Trust I held on PineBridge USD High Yield Bond Fund transferred from Level 3 to Level 2. During the financial year ended 31 December 2022 Ozon Holdings (ADR) held on PineBridge Global Dynamic Preservation Plus Fund and Yandex held on PineBridge Global Emerging Markets Focus Equity Fund, PineBridge Global Dynamic Preservation Plus Fund and PineBridge Global Dynamic Asset Allocation Fund transferred from Level 1 to Level 3. Land O'Lakes Capital Trust I held on PineBridge USD High Yield Bond Fund transferred from Level 2 to Level 3. No Level 3 reconciliation and no sensitivity analysis of assumptions used in determining the fair value have been included for these positions as they have been separately identified on the Schedule of Investments and are immaterial to the Fund at the financial year ended 31 December 2023 and the financial year ended 31 December 2022.

7. TAXATION

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish taxes on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payment to unitholder or any encashment, redemption, cancellation or transfer of units and any deemed disposal of units for Irish tax purposes arising as a result of the holding of units at the end of each eight year period beginning with the acquisition of such units.

No Irish tax will arise on the Fund in respect of chargeable events in respect of:

- (i) a unitholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with Schedule 2B of the Taxes Consolidation Act, 1997, are held by the Fund or the Fund has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (ii) exempt Irish resident unitholders (as defined in Section 739D TCA) who have provided the Fund with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Fund may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Fund or its unitholders, depending on the relevant Double Taxation Treaty.

Positive capital gains tax amounts reflected in the Statement of Comprehensive income are not amounts due to the Sub-Funds, these are amounts resulting from the difference in accruals between the financial year and the prior financial year.

8. SOFT COMMISSION ARRANGEMENTS

a) Direct brokerage

There was no direct brokerage services utilised for the financial year ended 31 December 2023 (31 December 2022: USD Nil).

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

8. SOFT COMMISSION ARRANGEMENTS (continued)

b) Soft Commission Arrangements

The Manager and the Investment Managers may utilise brokers with whom soft commission arrangements are in place. Any such arrangements will provide for best execution and any goods or services received will be of a type which assists in the provision of investment services to the Fund. Neither the Manager, the Investment Managers nor any of their connected persons retain cash rebates.

During the financial years ended 31 December 2023 and 31 December 2022, PineBridge Investments Asia Limited and PineBridge Investments LLC have entered into soft commission arrangements with brokers and details are given below. PineBridge Investments Japan Co., Limited and PineBridge Investments Europe Limited did not engage in soft commission arrangements during the respective financial years.

PineBridge Investments Asia Limited (the “Investment Manager”)

The Investment Manager has entered into soft commission arrangements with selected brokers where it obtains services from third parties. These services relate essentially to research and price information, performance measurement and portfolio valuation, and analysis all of which are believed to be helpful in the overall discharge of the Investment Manager’s duties to clients. As such services generally benefit all of the Investment Manager’s clients in terms of input into the investment decision making process, the soft credits utilised are not allocated on a specific client basis. Under such arrangements, no direct payment is made for these services or benefits. The trades were executed by the Investment Manager on the best available terms and there was no churning of trades. During the financial year and prior financial year, the Investment Manager used soft commissions for the following Sub-Funds:

PineBridge Asia Dynamic Asset Allocation Fund
PineBridge Asia ex Japan Equity Fund
PineBridge Asia ex Japan Small Cap Equity Fund
PineBridge Greater China Equity Fund
PineBridge India Equity Fund

PineBridge Investments LLC (the “Investment Manager”)

The Investment Manager has entered into soft dollar commission arrangements with selected brokers where it obtains services from third parties. These services relate to research and are eligible under the safe harbor of Section 28(e) of the Securities and Exchange Act of 1934. These services generally benefit all of Investment Manager’s clients in terms of input into the investment decision making process. The soft dollar credits utilised are not allocated on a specific client basis. Under these arrangements direct payments can be made for these services and benefits. The Investment Manager seeks to obtain best execution on all transactions. During the financial year and prior financial year, the Investment Manager used soft commissions for the following Sub-Funds:

PineBridge US Research Enhanced Core Equity Fund
PineBridge Europe Research Enhanced Equity Fund
PineBridge Global Dynamic Asset Allocation Fund
PineBridge Global Emerging Markets Focus Equity Fund
PineBridge Global Focus Equity Fund
PineBridge Latin America Equity Fund
PineBridge US Large Cap Research Enhanced Fund

c) Transaction Costs

For the financial years ended 31 December 2023 and 31 December 2022, the Sub-Funds incurred transaction costs, as defined in Note 1 (d)(viii) as follows:

* Sub-Fund terminated on 7 December 2022.

** Sub-Fund terminated on 6 September 2022.

9. SIGNIFICANT AGREEMENTS AND TRANSACTIONS WITH RELATED PARTIES

(a) Significant Agreements

The Manager is entitled to receive an annual management fee and unitholder servicing and maintenance fee (as appropriate) accrued at each dealing day and payable monthly in arrears based on the average daily NAV of the Sub-Funds, as detailed in tables in the next pages. Certain unit classes have fee caps in place whereby the total expenses charged to the unit class may not exceed certain annual thresholds. Where these thresholds are exceeded the management fee is reduced accordingly. The fee cap thresholds are noted in tables in the next pages where applicable.

(b) Administration and Transfer Agent Fees

The Administrative Agent receives a fee from each Sub-Fund based on the relevant Sub-Fund's NAV subject to a maximum fee of 0.3% per annum and subject to an annual minimum fee to be agreed between the Manager and the Administrative Agent (plus value added tax, if any, in each case). The fee is accrued on each Dealing Day and is paid monthly in arrears.

All such fees, disbursements and out-of-pocket expenses will be paid by the Manager on behalf of the Fund or the relevant Sub-Fund. The Administrative Agent is also entitled to be reimbursed for all its disbursements and out-of-pocket expenses.

Transfer agent fees are disclosed within administration fees on the face of the Statement of Comprehensive Income for each Sub-Fund. Transfer agent fees amount to USD 10 per transaction.

(c) Trustee Fees

The annual remuneration of the Trustee, which is payable out of each Sub-Fund is based on the NAV of the relevant Sub-Fund and shall be subject to a maximum fee of 0.3% per annum, and an annual minimum fee to be agreed between the Manager and the Trustee (plus value added tax, if any), and will be retained by the Trustee out of the assets of the Sub-Fund. The fee is accrued on each Dealing Day and payable monthly in arrears.

In addition to such remuneration, the Trustee is entitled to be repaid all of its disbursements, including the fees and expenses of any sub-custodian (which shall be at normal commercial rates) and which will be retained by the Trustee out of the relevant Sub-Fund and transaction charges (which shall also be at normal commercial rates) levied by the Trustee. The amounts charged are shown in the Statement of Comprehensive Income.

(d) Related Party Transactions

A related party transaction is a transfer of resources, services or obligations between a reporting entity and a related party, regardless of whether a price is charged.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

9. SIGNIFICANT AGREEMENTS AND TRANSACTIONS WITH RELATED PARTIES (continued)

(d) Related Party Transactions (continued)

Transactions with parties who have significant influence

The Manager is a related party under FRS 102 "Related Party Disclosures". Please refer to the Statement of Comprehensive Income for details of management fees (net of fee cap as applicable) and unitholder servicing fees earned by the Manager during the financial year under review and prior financial year and to the Statement of Financial Position for the amounts payable to the Manager as at the respective financial year end dates in respect of these fees.

The Directors of the Manager are not aware of any transactions with other connected persons during the year, other than those disclosed in these Financial Statements. All transactions were entered into in the normal course of business.

Transactions with key management personnel

PineBridge India Equity Fund holds 100% of the aggregated shares of PineBridge Investments GF Mauritius Limited. Michael Karpik and Michael Sweeney are also Directors of PineBridge Investments GF Mauritius Limited. They did not receive any director fees for the year.

Transactions with other related parties

Unitholdings held by and transactions with related entities of the Manager as at 31 December 2023 were as follows:

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

11. SIGNIFICANT EVENTS DURING THE FINANCIAL YEAR (continued)

PineBridge Asia Pacific Investment Grade Bond Fund Class W5H USD and Class W5HDC USD launched on 3 November 2023.

PineBridge Global Dynamic Asset Allocation Fund Class Y1H launched on 12 December 2023.

The prospectus supplement for PineBridge Asian High Yield Total Return Bond Fund was updated on 16 January 2023 for the addition of

- VAG driven restrictions language (non IG exposure),
- PBI Singapore as a Sub Investment Manager,
- Indonesia and Macau added to the list of countries included in the "Asia Pacific Region" definition.

The prospectus supplement for PineBridge Asia ex Japan Small Cap Equity Fund was updated on 16 January 2023 for the addition of PBI Singapore as a Sub Investment Manager.

The main prospectus and supplements were updated on 25 April 2023 for the following changes:

- Director resignation;
- Change of Legal Advisors;
- Update of Taxonomy Regulation;
- Principal Adverse Impact;
- Investment Restrictions;
- Initial Offer Period;
- Change of Investment Managers;
- Taxation wording;
- Dealing Terms;
- Addition of new share classes.

Please refer to the investor notice letter that was made available at PineBridge Global Funds website on 26 April 2023.

Prospectus supplement for PineBridge Europe Small Cap Equity Fund was updated on 29 June 2023 for benchmark change with effective date of 1 July 2023.

On 7 November 2023, the investment policy of the PineBridge Global Bond Fund was amended to note that the Sub-Fund may invest less than 30% of its net asset value in debt securities that are issued in Mainland China directly via the China Interbank Bond Market access, Bond Connect and/or the qualified foreign investor(s) (QFI) scheme.

The continued Russian engagement in military actions across Ukraine may still affect the Sub-Funds over the coming period as it will continue to cause instability on the global and European markets. The Investment Manager is leveraging established risk frameworks as the crisis in Ukraine continues to evolve. To maintain the protection and security of client assets, the Investment Manager is closely monitoring for any emerging risks impacting portfolios and will continue to monitor this situation and take appropriate actions as needed.

There have been no other significant events affecting the Fund during the financial year.

12. SIGNIFICANT EVENTS SINCE THE FINANCIAL YEAR END

The Manager has resolved to terminate PineBridge Global Emerging Markets SDG Corporate Bond Fund with effect from 17 January 2024.

PineBridge USD Investment Grade Credit Fund Class YYDC USD launched on 9 February 2024.

Since the financial year-end, PineBridge Global Emerging Markets Focus Equity Fund has had redemptions amounting to 26.26% of the Net Asset Value.

There have been no other significant events affecting the Fund since the financial year end.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

13. APPROVAL OF THE FINANCIAL STATEMENTS

The Financial Statements were approved by the Board of Directors of the Manager on 10 April 2024.

PineBridge Global Funds

Schedule of Portfolio Changes for the financial year ended 31 December 2023 (Unaudited)

Listed below and overleaf are cumulative investment purchases and cumulative investment sales in excess of 1% of the total investment purchases or sales respectively during the financial year ended 31 December 2023. If there were fewer than 20 purchases that exceeded 1%, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there were fewer than 20 sales that exceeded 1%, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

Remuneration Disclosure (Unaudited)

The Directors of PineBridge Investments Ireland Limited (the "Company") have put in place a remuneration policy and a remuneration committee. The Directors introduced and approved the remuneration policy on 28 December 2016 and the remuneration policy became effective as of 30 December 2016.

The remuneration policy is designed to be consistent with the requirements of regulation 5 of the European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016 and the ESMA Remuneration Guidelines ESMA/2016/411 (the "Remuneration Rules"). The remuneration policy is reviewed by the Directors at least once per year. In reviewing the remuneration policy, the Directors will consider whether the overall remuneration system:

- Operates as intended (in particular, that all agreed plans/programmes are being covered),
- That the remuneration pay-outs are appropriate relative to the complexities of the operation of the Company, and
- That the risk profile, long-term objectives and goals of the Company are adequately reflected.

Details of the up-to-date remuneration policy, including, but not limited to, a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits, are available at www.pinebridge.com.

The remuneration committee applies the remuneration policy with the aim of protecting the interests of Fund investors by ensuring that the remuneration of risk takers working for the Fund are subject to appropriate remuneration structures and the interests of these risk takers are aligned with those of the Company and the Fund.

Identified Staff of Delegated Investment Managers

The Company has delegated certain investment management activities to group companies. These group companies are also subject to the requirements on remuneration under the Remuneration Rules. The aggregate fixed remuneration of identified staff of the delegates, this being the investment managers and risk takers during 2023 was USD 2,195,621 and the variable component of their remuneration was USD 4,349,352. This remuneration disclosure is provided on a prorated basis for the part of the Funds' assets which were managed by the identified staff within the delegates and covers 29 recipients of remuneration.

Identified Staff of the Company

In accordance with the Company's Remuneration Policy, the following persons are considered to be the "Identified Staff" of the Company for remuneration committee review purposes: (a) any member of the Board and (b) the Designated Persons (PCF 39). The board of directors of the Company includes 2 Independent, Non-Executive Directors.

These 2 Non-Executive Directors, each of whom is independent, receive a fixed fee only and do not receive variable remuneration.

Where applicable, these fees are considered to be consistent with the powers, tasks, expertise and responsibility of each Director. The remuneration figures for the 12 Designated Persons disclosed here are prorated to the time they spent working on Company activities. The fixed remuneration for the Designated Persons was USD 1,065,578 and the variable remuneration component was USD 671,492.

Appendix I - Securities Financing Transactions Regulation Disclosure (Unaudited)

Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 ("SFTR") introduces reporting requirements for securities financing transactions ("SFTs") and total return swaps.

A SFT is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction; or
- a margin lending transaction.

As at 31 December 2023, the following one Sub-Fund held total return swaps, as types of instruments under the scope of SFTR;

- PineBridge Global Dynamic Preservation Plus Fund.

PineBridge Global Dynamic Preservation Plus Fund

Global data

The amount of assets across total return swaps, if any, as at 31 December 2023 was as follows:

Type of Asset	Notional Amount	% of NAV
Total Return Swap	(7,631,552)	(0.95)

No securities of PineBridge Global Dynamic Preservation Plus Fund were on loan during the financial year ended 31 December 2023.

Data on reuse of collateral

There was no reuse of collateral during the financial year ended 31 December 2023.

Concentration data

PineBridge Global Dynamic Preservation Plus Fund's portfolio did not receive any securities as collateral for the total return swaps as at 31 December 2023.

The counterparty across all total return swaps, if any, as at 31 December 2023 was as follows:

Counterparty	Type of Asset	Notional Amount US\$
Morgan Stanley	Total Return Swap	(7,631,552)

Safekeeping of collateral received or granted

As at 31 December 2023 there was no collateral received or held with the Depository.

Aggregate transaction data

As at 31 December 2023, there was no collateral held for PineBridge Global Dynamic Preservation Plus Fund.

The settlement mechanism for all total return swaps positions, if any, as at 31 December 2023 was bilateral.

The maturity tenor of all total return swaps, if any, positions as at 31 December 2023 was as follows:

Maturity	Amount US\$
Total Return Swaps	
6 to 12 months	15,561
Greater than 1 year	(1,494,266)

PineBridge Global Funds

Appendix I - Securities Financing Transactions Regulation Disclosure (Unaudited) (continued)

PineBridge Global Dynamic Preservation Plus Fund (continued)

Returns and costs for total return swaps, if any, for the financial year ended 31 December 2023 were as follows:

	<u>Amount US\$</u>
Income received	-
Gains/Losses	(1,478,705)
Cost incurred	-

PineBridge Global Funds

Appendix II - Transactions with Connected Persons for the Funds distributed in Hong Kong (Unaudited)

Connected Persons of the Manager, the Investment Managers and/or Sub-Investment Managers, the Depositary and the Directors of the Fund are those as defined in the SFC Code. All transactions entered into during the financial year between the Funds authorised by the SFC and the Manager, the Investment Managers and/or Sub-Investment Managers, the Depositary and the Directors of the Fund and their respective Connected Persons were carried out in the normal course of business and on normal commercial terms.

Transactions executed through a broker who is a Connected Person of the Manager, the Investment Manager and/or Sub-Investment Manager, the Depositary and the Directors of the Fund were as follows for the financial year ended 31 December 2023:

Fund	Total Purchases and Sales through broker who is a Connected Person US\$	% of Total Purchases and Sales	Commissions	Average Rate of Commissions
PineBridge Asia Dynamic Asset Allocation Fund	24,152,597	12.36	-	-
PineBridge Asia ex Japan Equity Fund	241,633,761	33.60	-	-
PineBridge Asia ex Japan Small Cap Equity Fund	777,280,050	36.60	-	-
PineBridge Asia Pacific Investment Grade Bond Fund	53,960,590	8.00	-	-
PineBridge Asian High Yield Total Return Bond Fund	128,056,091	19.44	-	-
PineBridge Europe Small Cap Equity Fund	9,034,005	71.79	-	-
PineBridge Global Bond Fund	183,255,129	48.11	-	-
PineBridge Global Dynamic Asset Allocation Fund	380,898,414	7.76	-	-
PineBridge Global Emerging Markets Focus Equity Fund	234,556,850	44.25	-	-
PineBridge Global Focus Equity Fund	124,601,325	17.09	-	-
PineBridge Greater China Equity Fund	10,135,618	36.91	-	-
PineBridge Japan Equity Fund	68,036,927	42.81	-	-
PineBridge Latin America Equity Fund	28,632,855	35.96	-	-
PineBridge US Large Cap Research Enhanced Fund	31,250,754	9.49	-	-
PineBridge USD Investment Grade Credit Fund	3,390,590	0.83	-	-

There was no commission charged on the transactions in the above table for the financial year ended 31 December 2023

The Directors of the Fund did not hold shares in SFC-authorized Funds for the financial year 31 December 2023 as disclosed in Note 5. Details of fees paid to Directors of the Fund for the financial year ended 31 December 2023 are disclosed in Note 5.

Details of the value of the outstanding shares owned by Connected Persons of the Manager, the Investment Managers and/or Sub-Investment Managers over 20% of Net Assets of SFC-authorized Funds as at 31 December 2023 are disclosed in Note 5. Details of fees paid to the Manager, the Investment Managers and/or Sub-Investment Managers are disclosed in Note 5 and in the Statement of Comprehensive Income.

Directors and Officers of the Depositary did not hold shares in any of the SFC-authorized Funds for the financial year 31 December 2023. The fees of the Depositary are disclosed in the Statement of Comprehensive Income. All cash at bank balances of the SFC-authorized Funds are held either by State Street Bank and Trust Co., as agent for the Depositary, or directly with a sub-depositary. Interest may be earned or charged to the SFC-authorized Funds by the Depositary on these cash balances.

PineBridge Global Funds

Appendix II - Transactions with Connected Persons for the Funds distributed in Hong Kong (Unaudited) (continued)

Details of soft commission arrangements are disclosed in Note 8. Further details of transactions related to soft commissions are provided in the table below:

<u>Connected Person</u>	<u>Total transactions related to soft commissions</u>	<u>Total Commissions</u>

Appendix III - Sustainable Finance Disclosure Regulation (Unaudited)

SFDR Article 6 Disclosures for Annual Report

With respect to the below-listed Sub-Funds managed in line with Article 6 of SFDR (together the “Article 6 Sub-Funds”), each Sub-Fund does not promote environmental or social characteristics in a way that meets the specific criteria contained in Article 8 of SFDR or have sustainable investment as its objective in a way that meets the specific criteria contained in Article 9 of SFDR. Accordingly, each Sub-Fund managed in line with Article 6 of SFDR shall not be expected to pursue an investment approach that explicitly promotes environmental or social characteristics or to have sustainable investment as its objective. Notwithstanding this classification, the Investment Managers still consider that the Sub-Funds managed in line with Article 6 of SFDR are managed responsibly:

PineBridge Asia Dynamic Asset Allocation Fund
PineBridge China A Shares Quantitative Fund
PineBridge Europe Research Enhanced Equity Fund
PineBridge Europe Small Cap Equity Fund
PineBridge Global Bond Fund
PineBridge Global Dynamic Preservation Plus Fund
PineBridge Greater China Equity Fund
PineBridge US Large Cap Research Enhanced Fund
PineBridge US Research Enhanced Core Equity Fund

SFDR does not require the Investment Managers to provide any ongoing disclosures in the annual report for the Sub-Funds managed in line with Article 6 of SFDR. For the purpose of the Taxonomy Regulation, it should be noted that the investments underlying each Sub-Fund managed in line with Article 6 of SFDR did not take into account the EU criteria for environmentally sustainable economic activities.

SFDR Article 8 Disclosures for Annual Report

The following Sub-Funds of the Unit Trust promoted environmental and social characteristics pursuant to Article 8 of the Sustainable Finance Disclosures Regulation (Regulation EU/2019/2088) (“SFDR”) during the financial period by virtue of the incorporation of environmental, social or governance (“ESG”) and sustainability risk-related factors into their respective investment processes:

Equity Funds

PineBridge Asia ex Japan Equity Fund
PineBridge Asia ex Japan Small Cap Equity Fund
PineBridge Global Emerging Markets Focus Equity Fund
PineBridge Global Focus Equity Fund
PineBridge India Equity Fund
PineBridge Japan Equity Fund
PineBridge Japan Small Cap Equity Fund
PineBridge Latin America Equity Fund

Fixed Income Funds

PineBridge Asia Pacific Investment Grade Bond Fund
PineBridge Asian High Yield Total Return Bond Fund
PineBridge USD High Yield Bond Fund
PineBridge USD Investment Grade Credit Fund

Multi-Asset

PineBridge Global Dynamic Asset Allocation Fund

(together the “Article 8 Sub-Funds”)

Appendix III - Sustainable Finance Disclosure Regulation (Unaudited) (continued)

SFDR Article 9 Disclosures for Annual Report

The following Sub-Fund of the Unit Trust promoted environmental and social characteristics pursuant to Article 9 of the Sustainable Finance Disclosures Regulation (Regulation EU/2019/2088) ("SFDR") during the financial period by virtue of the incorporation of environmental, social or governance ("ESG") and sustainability risk-related factors into their respective investment processes:

Fixed Income Funds

PineBridge Global Emerging Markets SDG Corporate Bond Fund

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
PineBridge Asia ex Japan Equity Fund

Legal entity identifier:
549300SQHJZD245Y5351

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) ‘Impact of the issuer on the Environment’; with a focus on Net Zero alignment and actionable change on greenhouse gas (“GHG”) emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons (“Exclusions”)

During the period covered by the report, the Sub-Fund assessed the impact of the issuer on the environment when performing due diligence on stocks, and only invested in stocks that met a minimum threshold for environmental impact. In addition, the Sub-Fund has sought to engage with companies where it saw potential to improve a company's environmental impact if it was deemed material.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions, which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2023 was **258.1**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

- b) The Sub-Fund's Exclusions were maintained during the period covered by the report.

● **...and compared to previous periods?**

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2022 was **82.5**.

Rather than focus solely on historical/current emissions intensity, the Investment Manager's investment process is forward-looking and consequently

the Investment Manager is willing to own high emitting companies that have a clear plan for improvement in the future.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for*

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
 - Carbon footprint
 - GHG intensity
 - Exposure to companies active in the fossil fuel sector
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
 - Board gender diversity
 - Exposure to controversial weapons
-
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund excludes UNGC violators in its investment process.
 - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
 - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2023

The table above details the largest Investments in the Sub-Fund as at 31 December 2023. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● In which economic sectors were the investments made?

SECTOR BREAKDOWN (%)

	FUND
Information Technology	33.5
Consumer Discretionary	20.0
Industrials	14.7
Financials	8.4
Communication Services	5.8
Materials	3.9
Consumer Staples	3.1
Health Care	2.8
Other	2.6
Cash	5.0

The table above details the sector breakdown of the Sub-Fund as at 31 December 2023. The percentages stated are relative to the Sub-Fund's Net Asset Value.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

Yes: In fossil gas in nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?**

Not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

- **What was the share of socially sustainable investments?**

Not applicable

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Sub-Fund engaged with several of its portfolio companies on the subject of environmental impact during 2023.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through our exclusions which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through our exclusions which were maintained throughout the period.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

5493004BW9GWEFMGKX34

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions")

During the period covered by the report, the Sub-Fund assessed the impact of the issuer on the environment when performing due diligence on stocks, and only invested in stocks that met a minimum threshold for environmental impact. In addition, the Sub-Fund has sought to engage with companies where it saw potential to improve a company's environmental impact if it was deemed material.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions, which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period..

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2023 was **921.9**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity Is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

The table above details the largest Investments in the Sub-Fund as at 31 December 2023. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance companies.

● In which economic sectors were the investments made?

SECTOR BREAKDOWN (%)

	FUND
Information Technology	25.3
Industrials	22.8
Materials	11.5
Financials	9.6
Consumer Discretionary	7.3
Consumer Staples	5.5
Utilities	5.3
Real Estate	3.6
Other	3.9
Cash	5.2

The table above details the sector breakdown of the Sub-Fund as at 31 December 2023. The percentages stated are relative to the Sub-Fund's Net Asset Value.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● What was the share of investments made in transitional and enabling activities?

Not applicable

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund engaged with several of its portfolio companies on the subject of environmental impact during 2023.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through our exclusions which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through our exclusions which were maintained throughout the period.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
PineBridge Asia Pacific Investment Grade Bond Fund

Legal entity identifier:
54930006DEP8VW5BH038

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) ‘Impact of the issuer on the Environment’; with a focus on Net Zero alignment and actionable change on greenhouse gas (“GHG”) emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons (“Exclusions”).

In seeking to attain characteristic “a”, the Sub-Fund monitored issuers’ carbon emission policies and engaged with them on the issue if needed. Characteristics “b” and “c” were met through maintaining the Sub-Fund’s portfolio without any exposure to the Exclusions.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- a) The Sub-Fund’s Weighted Average Carbon Intensity as at 31 December 2023 was **49.9**.

Weighted Average Carbon Intensity measures a portfolio’s exposure to carbon intensive companies. The Weighted Average Carbon Intensity Is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

The Information may only be used for recipient’s internal use, may not be reproduced or re-disseminated in any form and may not be used as a basis for, or a component of, any financial instruments or products or indices. Furthermore, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

- b) The Sub-Fund’s Exclusions were maintained during the period covered by the report.

● **...and compared to previous periods?**

The Sub-Fund’s Weighted Average Carbon Intensity as at 31 December 2022 was **249.2**.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG Emissions scope 1&2
- GHG Intensity
- Carbon Footprint
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact sector
- Exposure to controversial weapons
- UNGC violators.

For each issuer under coverage, analysts denote within our internal research platform the relevant PAIs that inform their ESG recommendations.

In the course of their due diligence, analysts focus on key performance indicators (KPI) that align to PAIs that are of material risk to specific sectors and issuers. Those KPIs are sourced directly from the issuer – via sustainability or integrated annual reports or direct engagement with management – or from third party sources. An issuer’s performance in these KPIs relative to their industry peers forms the basis of our assignment of independent ESG Scores – which reflect the current state of sustainability risk – and ESG Trends – which are indicative of our outlook of sustainability risk over the next twelve months. The Sub-Fund incorporates these proprietary metrics (ESG Score and ESG Trend) along with other investment considerations to form a basis of issuer eligibility and position sizing.

In the course of our due diligence on sustainability risks, analysts may encounter areas of concern or uncertainty, which leads to issuer engagement. Engagement is formally tracked, which includes the consistent flagging of the principal adverse impacts which are under scope for each engagement.

For the following two PAIs - exposure to controversial weapons and UNGC violators – the Sub-Fund excludes UNGC violators and issuers with an industry tie to controversial weapons.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2023

The table above details the largest Investments in the Sub-Fund as at 31 December 2023. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● In which economic sectors were the investments made?

SECTOR BREAKDOWN (%)

	FUND
Financial	47.6
Quasi-Sov	18.1
Sovereign	13.8

The table above details the sector breakdown of the Sub-Fund as at 31 December 2023. The percentages stated are relative to the Sub-Fund's Net Asset Value.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

Yes: In fossil gas in nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?**

Not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

- **What was the share of socially sustainable investments?**

Not applicable

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The investment manager took several actions which contributed to meeting the stated environmental and social characteristics during the period. The most substantial contribution came from security selections within the Utilities and other relevant sectors, where investments were made in issuers which maintain a significantly lower carbon footprint than the issuers within the benchmark, where there are a number of thermal power generators dependent on coal fired power. Elsewhere, selections within the Metals & Mining, Transport, Industrial and Energy sectors also contributed to the Sub-Fund’s focus on issuers’ impact on the environment. Additionally, the Sub-Fund’s underweight positions in those higher

emitting sectors – Utilities, Industrial, Energy and Transport – in favor of an overweight position in the Financial sector further contributed to the Sub-Fund’s focus on net zero alignment. Throughout the course of the year engagement with issuers was undertaken when deemed necessary regarding concern or uncertainty regarding the principal adverse impacts on sustainability factors.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
PineBridge Asian High Yield Total Return Bond Fund

Legal entity identifier:
549300IRFY1RU8V8NH89

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions").

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In seeking to attain characteristic “a”, the Sub-Fund monitored issuers’ carbon emission policies and engaged with them on the issue if needed. Characteristics “b” and “c” were met through maintaining the Sub-Fund’s portfolio without any exposure to the Exclusions.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund’s Weighted Average Carbon Intensity as at 31 December 2023 was **261.9**.

Weighted Average Carbon Intensity measures a portfolio’s exposure to carbon intensive companies. The Weighted Average Carbon Intensity Is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

- b) The Sub-Fund’s Exclusions were maintained during the period covered by the report.

● **...and compared to previous periods?**

The Sub-Fund’s Weighted Average Carbon Intensity as at 31 December 2022 was **650.4**.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG Emissions scope 1&2
- GHG Intensity
- Carbon Footprint
- Exposure to companies active in the fossil fuel sector
- share of non-renewable energy consumption and production
- energy consumption intensity per high impact sector
- exposure to controversial weapons
- UNGC violators.

For each issuer under coverage, analysts denote within our internal research platform the relevant PAIs that inform their ESG recommendations.

In the course of their due diligence, analysts focus on key performance indicators (KPI) that align to principal adverse impacts that are of material risk to specific sectors and issuers. Those KPIs are sourced directly from the issuer – via sustainability or integrated annual reports or direct engagement with management – or from third party sources. An issuer’s performance in these KPIs relative to their industry peers forms the basis of our assignment of independent ESG Scores – which reflect the current state of sustainability risk – and ESG Trends – which are indicative of our outlook of sustainability risk over the next twelve months. The Sub-Fund incorporates these proprietary metrics (ESG Score and ESG Trend) along with other investment considerations to form a basis of issuer eligibility and position sizing.

In the course of our due diligence on sustainability risks, analysts may encounter areas of concern or uncertainty, which leads to issuer engagement. Engagement is formally tracked, which includes the consistent flagging of the principal adverse impacts which are under scope for each engagement.

For the following two PAIs - exposure to controversial weapons and UNGC violators – the Sub-Fund Excludes UNGC violators and issuers with an industry tie to controversial weapons.

The table above details the largest Investments in the Sub-Fund as at 31 December 2023. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

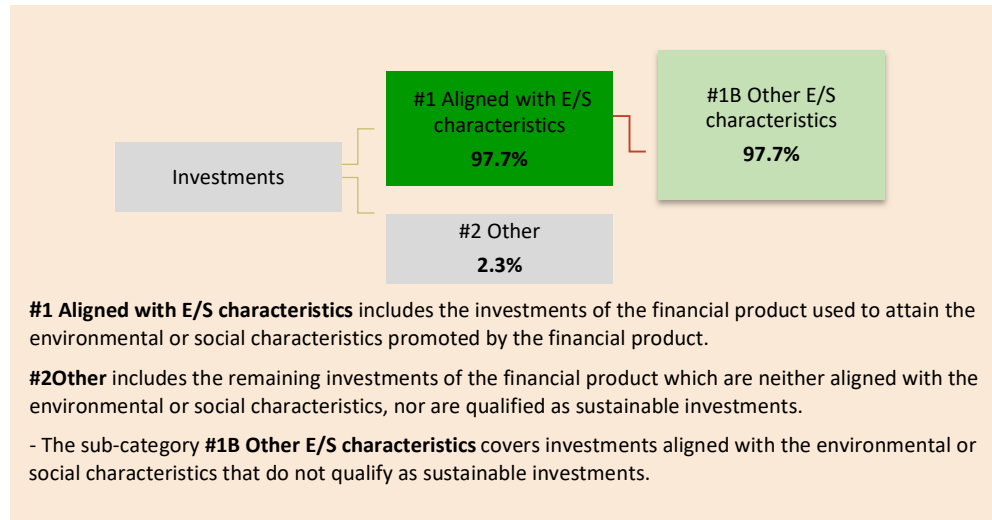

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● In which economic sectors were the investments made?

SECTOR BREAKDOWN (%)

	FUND
Consumer	19.9
Utilities	17.0
Real Estate	15.9
Financial	15.5
TMT	11.2
Diversified	5.3
Metals & Mining	4.8
Infrastructure	3.6
Other	4.6
Cash	2.3

The table above details the sector breakdown of the Sub-Fund as at 31 December 2023. The percentages stated are relative to the Sub-Fund's Net Asset Value.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

- *Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?*

Yes: In fossil gas in nuclear energy

No

- *What was the share of investments made in transitional and enabling activities?*

Not applicable

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

Not applicable

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The research and monitoring described above formed the basis of inclusion and sizing of issuers in the Sub-Fund. The Investment Manager took several actions which contributed to meeting the stated environmental and social characteristics during the period. The most substantial contribution came from security selections within the Utilities and other relevant sectors, where investments were made in issuers which maintain lower carbon footprint. Contributions to the Sub-Fund's lower carbon footprint also came from underweight position in the high-emitting issuers. Throughout the course of the reference period engagement with issuers was undertaken when deemed necessary regarding concern or uncertainty regarding the principal adverse impacts on sustainability factors.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristic promoted by the Sub-Fund is the ‘Impact of the issuer on the Environment’; with a focus on Net Zero alignment and actionable change on greenhouse gas (“GHG”) emissions.

The Sub-Fund endeavoured to meet this characteristic through the selection of active and passive strategies committed to emissions reduction and engagement with active managers and investee companies to drive improvement.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● *How did the sustainability indicators perform?*

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2023 was **118.3**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

Source: MSCI ESG Research LLC, as at 31 December 2023

Although PineBridge Investment's information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information (the "Information") from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. The Information may only be used for recipient's internal use, may not be reproduced or re-disseminated in any form and may not be used as a basis for, or a component of, any financial instruments or products or indices. Furthermore, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

● *...and compared to previous periods?*

The Sub-Fund's Weighted Average Carbon Intensity at 31 December 2022 was **108.6**. During the one-year period ending 31 December 2023, the Weighted Average Carbon Intensity increased slightly from 108.6 to 118.3. The increase is due primarily to the new allocation to Indian Equity, an actively managed strategy committed to emissions reduction and engagement with investee companies to drive improvement.

In accordance with the Sub-Fund's forward view approach to asset allocation, the Investment Manager is focused on forward improvement with regard to ESG factors. The Investment Manager expects the Sub-Fund's Weighted Average Carbon Intensity to fluctuate around an overall declining trend. The Investment Manager measures both the point-in-time Weighted Average Carbon Intensity at the Sub-Fund level and also the forward improvement in Carbon Intensity at the security level.

Supplemental to measuring Weighted Average Carbon Intensity at the Sub-Fund level, the Investment Manager also measures year over year improvement in Carbon Intensity for the investee companies held in the Sub-Fund at 1 January 2023. The Carbon Intensity was measured for the investee companies held in the Sub-Fund at 1 January 2023 through the period ending 31 December 2023. The ratio of companies that improved their Carbon Intensity to those that did not exceeded 2.0, measured by both count and market value, meaning that two companies improved for every one company that did not.

Source: MSCI ESG Research LLC, as at 31 December 2023

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG Emissions (Scope 1&2) – An external vendor provides company level GHG Emissions data, which is “rolled-up” to facilitate asset class level research and investment decisions. GHG Emissions data also is used: (1) to identify companies with improving emissions characteristics in constructing and managing passive strategies, and (2) to identify investee companies to drive actionable change through engagement.
- Carbon Footprint - An external vendor provides company level GHG Emissions data, which is “rolled-up” to facilitate asset class level research and investment decisions. The impact on the product’s Carbon Footprint is considered when asset allocation decisions are made. The product’s Carbon Footprint is measured quarterly.
- GHG Intensity of investee companies - An external vendor provides company level GHG Intensity data, which is “rolled-up” to facilitate asset class level research and investment decisions. GHG Intensity data also are used: (1) to identify companies with improving emissions characteristics in constructing and managing passive strategies, and (2) to identify investee companies to drive actionable change through engagement.
- Violations of UN Global Compact principles and OECD Guidelines for Multi-National Enterprises - An external vendor provides company level data, which is “rolled-up” to facilitate asset class level research and investment decisions. Violations data also is used to identify investee companies to drive actionable change through engagement.
- Board Gender Diversity - An external vendor provides company level data, which is “rolled-up” to facilitate asset class level research and investment decisions. Board Gender Diversity data also is used to identify investee companies to drive actionable change through engagement.
- GHG Intensity of investee countries - An external vendor provides country level data, which is included in the product’s Carbon Footprint. GHG Intensity data sourced from public data is in our proprietary Sovereign Scorecard, which informs country level research and investment decisions.

The table above details the largest Investments in the Sub-Fund as at 31 December 2023. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

Asset allocation describes the share of investments in specific assets.

● *In which economic sectors were the investments made?*

Sector	Fund %
Technology	21.0%
Government	14.0%
Funds	13.8%
Consumer, Non-cyclical	11.1%
Financial	9.2%
Communications	6.3%
Industrial	5.3%
Consumer, Cyclical	3.8%
Energy	2.8%
Utilities	2.6%
Basic Materials	0.5%
Cash, Receivables and Payables	9.7%

The table above details the sector breakdown of the Sub-Fund as at 31 December 2023. The percentages stated are relative to the Sub-Fund's Net Asset Value.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

- *Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?*

Yes: In fossil gas in nuclear energy

No

- *What was the share of investments made in transitional and enabling activities?*

Not applicable

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Team engaged directly with the top investee companies contributing to the Sub-Fund's GHG Intensity to assess Management's commitment to environmental improvement, drive improved GHG disclosures consistent with global best practice, review Net Zero alignment and drive continued progress towards GHG Emissions and GHG Intensity reduction. Several engagements were follow-ons from prior years, and escalated so that proxy votes reflected the engagement assessment. The Investment Manager also engaged with active managers regarding their underlying top holdings identified for GHG Emissions reduction and GHG Intensity improvement, to confirm the active manager is following their stated engagement process.

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) ‘Impact of the issuer on the Environment’; with a focus on Net Zero alignment and actionable change on greenhouse gas (“GHG”) emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons (“Exclusions”)

During the period covered by the report, the Sub-Fund assessed the impact of the issuer on the environment when performing due diligence on stocks, and only invested in stocks that met a minimum threshold for environmental impact. The Sub-Fund also only invested in stocks that met a minimum threshold for social factors including diversity considerations and corporate behaviors. In addition, the Sub-Fund has sought to engage with companies where it saw potential to improve a company's environmental or social impact if it was deemed material.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions, which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2023 was **59.4**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

- b) The Sub-Fund's Exclusions were maintained during the period covered by the report.

● ***...and compared to previous periods?***

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2022 was **62.9**.

Rather than focus solely on historical/current emissions intensity, the Investment Manager's investment process is forward-looking and consequently the Investment Manager is willing to own high emitting companies that have a clear plan for improvement in the future.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
 - Carbon footprint
 - GHG intensity
 - Exposure to companies active in the fossil fuel sector
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
 - Board gender diversity
 - Exposure to controversial weapons
-
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund excludes UNGC violators in its investment process.
 - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
 - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- GHG emissions (Scope 1 & 2)
 - Carbon footprint
 - GHG intensity
 - Exposure to companies active in the fossil fuel sector
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
 - Board gender diversity
 - Exposure to controversial weapons
-
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund excludes UNGC violators in its investment process.
 - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
 - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2023

The table above details the largest Investments in the Sub-Fund as at 31 December 2023. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **In which economic sectors were the investments made?**

SECTOR BREAKDOWN (%)	
	FUND
Industrials	26.7
Information Technology	26.5
Financials	13.7
Health Care	12.0
Communication Services	8.3
Consumer Discretionary	6.4
Consumer Staples	4.8
Energy	0.0
Other	0.0
Cash	1.7

The table above details the sector breakdown of the Sub-Fund as at 31 December 2023. The percentages stated are relative to the Sub-Fund’s Net Asset Value.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?**

- Yes: In fossil gas in nuclear energy
- No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund engaged with several of its portfolio companies on the subject of environmental impact during 2023.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

How did this financial product perform compared to the reference benchmark?

Not Applicable

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable

- ***How did this financial product perform compared with the broad market index?***

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
PineBridge India Equity Fund

Legal entity identifier:
549300RBDHENEORX2S72

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="radio"/> <input checked="" type="radio"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions")

During the period covered by the report, the Sub-Fund sought to engage with companies where it saw potential to improve a company's environmental impact if it is deemed material. The Sub-Fund computes portfolio company emissions on a quarterly basis and has seen emissions per unit revenue and per unit AUM declining in the past year. The Investment Manager will continue to seek to engage with investee companies to maintain the momentum of reducing carbon emissions in line with reaching net zero.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through maintaining the Sub-Fund's portfolio with no holdings in UNGC violators throughout the period to 31 December 2023. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through our exclusions which were maintained throughout the period.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2023 was **1,100.4**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

Source: MSCI ESG Research LLC, as at 31 December 2023

Although PineBridge Investment's information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information (the "Information") from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. The Information may only be used for recipient's internal use, may not be reproduced or re-disseminated in any form and may not be used as a basis for, or a component of, any financial instruments or products or indices. Furthermore, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

- b) The Sub-Fund's Exclusions were maintained during the period covered by the report.

● ***...and compared to previous periods?***

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2022 was **1,097.6**.

When calculating the Sub-Fund's Weighted Average Carbon Intensity at 31 December 2023, data related to the Sub-Fund's exposure to the underlying holdings of PineBridge Investments GF Mauritius Limited has been incorporated. This was not the case when the Sub-Fund's Weighted Average Carbon Intensity was calculated as at the 31 December 2022 and included in last year's report. This change in calculation approach is the primary reason for the year on year change in the Weighted Average Carbon Intensity. Because the Weighted Average Carbon Intensity as at 31 December 2022 had not incorporated the underlying holdings of PineBridge Investments GF Mauritius Limited in to the calculation, it was previously reported as **414.7** in the prior year's annual report.

Rather than focus solely on historical/current emissions intensity, the Investment Manager's investment process is forward-looking and consequently the Investment Manager is willing to own high emitting companies that have a clear plan for improvement in the future.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
 - Carbon footprint
 - GHG intensity
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
 - Board gender diversity
 - Exposure to controversial weapons
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, by reviewing recent trends, prospective plans, and performance versus peers. The Sub-Fund seeks to engage with companies to communicate the importance of reducing emissions.
- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund maintained a portfolio throughout the period to 31 December 2023 with no holdings in UNGC violators.
- Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
- Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

In addition to taking into consideration the PAIs detailed above, the Investment Manager has been engaging with investee companies to encourage them to publish data on all PAIs. The Sub-Fund takes into consideration the disclosed PAI data and engages with companies to ensure that their score on each parameter improves over time. The Sub-Fund encourages companies to disclose more PAI data so that they can be monitored. The Sub-Fund monitors PAI data on a regular, at least every quarter end, basis.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund engaged with several of its portfolio companies on the subject of environmental impact during 2023, including giving detailed presentations to high GHG emitting companies on the impact they are having on total emissions and the steps they need to take to get the emissions down. These would include switching to renewable sources of energy, use of electrified transport, invest in carbon capture and storage, etc. The Sub-Fund encourages companies to keep reducing pollutant discharge below the limits set by the local environmental laws.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through maintaining the Sub-Fund’s portfolio with no holdings in UNGC violators throughout the period to 31 December 2023. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through our exclusions which were maintained throughout the period.

The Sub-Fund uses shareholder meetings to sensitise the boards of the companies on SFDR requirements and conducting business sustainably.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) ‘Impact of the issuer on the Environment’; with a focus on Net Zero alignment and actionable change on greenhouse gas (“GHG”) emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons (“Exclusions”)

During the period covered by the report, the Sub-Fund assessed the impact of the issuer on the environment when performing due diligence on stocks, and only invested in stocks that met a minimum threshold for environmental impact. The Sub-Fund also only invested in stocks that met a minimum threshold for social factors including diversity considerations and corporate behaviors. In addition, the Sub-Fund has sought to engage with companies where it saw potential to improve a company's environmental or social impact if it was deemed material.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions, which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2023 was **49.5**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
 - Carbon footprint
 - GHG intensity
 - Exposure to companies active in the fossil fuel sector
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
 - Board gender diversity
 - Exposure to controversial weapons
-
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund excludes UNGC violators in its investment process.
 - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
 - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) ‘Impact of the issuer on the Environment’; with a focus on Net Zero alignment and actionable change on greenhouse gas (“GHG”) emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons (“Exclusions”)

During the period covered by the report, the Sub-Fund assessed the impact of the issuer on the environment when performing due diligence on stocks, and only invested in stocks that met a minimum threshold for environmental impact. The Sub-Fund also only invested in stocks that met a minimum threshold for social factors including diversity considerations and corporate behaviors. In addition, the Sub-Fund has sought to engage with companies where it saw potential to improve a company's environmental or social impact if it was deemed material.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions, which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2023 was **73.0**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
 - Carbon footprint
 - GHG intensity
 - Exposure to companies active in the fossil fuel sector
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
 - Board gender diversity
 - Exposure to controversial weapons
-
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
 - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund excludes UNGC violators in its investment process.
 - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
 - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

The table above details the largest Investments in the Sub-Fund as at 31 December 2023. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **In which economic sectors were the investments made?**

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund engaged with several of its portfolio companies on the subject of environmental impact during 2023.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristic promoted by the Sub-Fund is ‘Impact of the issuer on the Environment’ with a focus on Net Zero alignment and actionable change on greenhouse gas (“GHG”) emissions.

The promotion of this environmental characteristic is active and in progress. The Investment Manager utilized its own internal research as well as data from third party vendors to gain insight into portfolio companies ESG characteristics; this includes carbon intensity via scope 1 & 2 emissions. While this data set remains incomplete, most issuers in the investment universe have some level of coverage allowing significant visibility into ESG themes of the portfolio relative to the

investment universe. During 2023 the Investment Manager concluded its first round of engagement with issuers around a variety of ESG themes including carbon intensity & issuers plans to reduce emissions in the future. Continuation of the engagement process will shape the progress of the portfolio in meeting the promoted environmental characteristic.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2023 was **416.3**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

1. GHG Emissions (scope 1&2)
2. Carbon Footprint
3. GHG Intensity
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Exposure to controversial weapons
7. UNGC Violators

In consideration of points 1 to 5 above, the Sub-Fund conducted issuer specific due diligence and compared issuers relative to their industry peers. This environmental risk analysis is an important part of evaluating an issuer’s potential credit risks and highlighting opportunities to engage with management teams.

In consideration of points 6 and 7 above, the Sub-Fund utilized third party data to highlight exposure to controversial weapons & UNGC Violators. During the period covered by the report there has been no exposure in the Sub-Fund to issuers with exposure to controversial weapons and no exposure to UNGC violators.

The table above details the largest Investments in the Sub-Fund as at 31 December 2023. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● In which economic sectors were the investments made?

SECTOR BREAKDOWN (%)

	FUND
Consumer Cyclical	16.2
Energy	16.1
Communications	13.8
Consumer Non-Cyclical	8.6
Technology	8.0
Capital Goods	6.6
Basic Industry	5.9
Finance Companies	5.4
Other	17.1
Cash	2.2

The table above details the sector breakdown of the Sub-Fund as at 31 December 2023. The percentages stated are relative to the Sub-Fund's Net Asset Value.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

Yes: In fossil gas in nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

- **What was the share of investments made in transitional and enabling activities?**

Not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

- **What was the share of socially sustainable investments?**

Not applicable

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

All issuers purchased in the Sub-Fund must be approved by the Investment Manager’s Investment Committee, and because ESG factors are a key part of the assessment of issuer credit risk, the Investment Manager believes that its investment process aligns with the environmental characteristic promoted by the Sub-Fund, with issuers not selected for the Sub-Fund’s portfolio for ESG reasons. During 2023 the Investment Manager concluded its first round of engagement with issuers around a variety of ESG themes. Continuation of this process will help shape the progress of the portfolio in meeting the promoted environmental characteristic. Issuers that do not make progress on specific engagement issues over time may be removed from the issuer approved list which would require them to be divested from the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
PineBridge USD Investment Grade Credit Fund

Legal entity identifier:
5493003UCBU0C0JH7352

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristic promoted by the Sub-Fund is ‘Impact of the issuer on the Environment’; with a focus on Net Zero alignment and actionable change on greenhouse gas (“GHG”) emissions.

During the period covered by the report, the Sub-Fund looked to promote the environmental characteristic through detailed analysis and active engagement with the management of underlying issuers. The Investment Manager continued to engage with the issuers with a focus on Net Zero alignment and actionable change on greenhouse gas (“GHG”) emissions.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2023 was **273.9**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

● **...and compared to previous periods?**

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2022 was **314.7**.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI	Consideration
GHG Emissions	Analysts monitored Scope 1 & Scope 2 GHG issuer emissions
Carbon Footprint	Analysts monitored Carbon Footprint reduction commitments as well as an issuer’s strategy and progress toward achieving those commitments
GHG Intensity	GHG Intensity is a factor in consideration when assessing credit risks and data is deemed comparable. In many cases companies’ state of disclosure and reporting methodologies continue to vary considerably.
Energy Consumption Intensity	This metric is monitored. However, it is acknowledged that continued disclosure inconsistencies make intra-sector comparisons difficult.
Board Gender Diversity	Board, management, and employee diversity are considered as part of our analysis of governance. Our evaluation of diversity is not limited to gender, but includes ethnicity, age and experience as well.
Exposure to controversial weapons	It is addressed through review of relevant controversies at the sector and issuer level, not necessarily through a % revenue indicator of exposure.
Energy Performance (Share of non-renewable energy sources)	Issuer's plans to transition energy supply toward renewable sources over time are evaluated.
Lack of Human Rights Policy	The public disclosure of human rights policies, including criteria for remediation, are monitored.

The Investment Manager monitored the output of these PAIs in comparison with the peers/industry and engaged with the issuer, where deemed appropriate. The Investment Manager may choose to encourage improved disclosure, strategy or targets where appropriate. The Investment Manager also chose to monitor other PAIs based on the data availability of the PAI and its coverage of the investment universe in 2023.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 46.4%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 33.5%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The fund seeks to advance certain United Nations Sustainable Development Goals (“SDGs”), specifically:

- SDG 8, Decent Work and Economic Growth
- SDG 9, Industry, Innovation and Infrastructure
- SDG 12, Responsible Consumption and Production
- SDG 13, Climate Action.

As at the end of 2023, 100% of the fund's invested assets – excluding cash and cash equivalents – were invested in securities that we identify as sustainable investments on the basis of their contribution to the four SDGs in focus.

It was determined to close the fund in December 2023 due to anticipated outflows, which was communicated to investors on 18 December, with a termination date of 17 January 2024. Consequently as at the 31 December 2023, the wind up of the fund's portfolio had already commenced, which resulted in an increased exposure to cash and cash equivalent holdings as is reflected in this report. This activity was communicated in advance to investors in the notice issued on 18 December 2023.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **How did the sustainability indicators perform?**

The following table provides a breakdown of fund market value by SDG contribution as at year end 2023. Please note that as some issuers are deemed to make positive contributions to more than one SDG, these numbers will not sum to 100%.

SDG Contribution Year End 2023	% Assets
SDG 8, Decent Work and Economic Growth	53%
SDG 9, Industry, Innovation and Infrastructure	50%
SDG 12, Responsible Consumption and Production	49%
SDG 13, Climate Action	64%

● **...and compared to previous periods?**

The breakdown of fund market value by SDG contribution as at year end 2022 was as follows. Please note that as some issuers are deemed to make positive contributions to more than one SDG, these numbers will not sum to 100%.

SDG Contribution Year end 2022	% Assets
SDG 8, Decent Work and Economic Growth	59.9%
SDG 9, Industry, Innovation and Infrastructure	56.5%
SDG 12, Responsible Consumption and Production	46.7%
SDG 13, Climate Action	61.9%

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Sub-Fund's sustainable investments avoid causing significant harm to environmental or social sustainable investment objectives through taking into account principal adverse impact indicators.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Indicators for adverse impacts on sustainability factors were taken into account as appropriate through the following methods:
 - in accordance with the Sub-Fund's policies and procedures, through engagement with entities to advocate for change

- assessing available data to track improvement;
- specific metrics relative to the Sub-Fund's Benchmark
- excluding investments in certain sectors

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes – the Sub-Fund maintains an exclusion such that if any sustainable investment held by the Sub-Fund was deemed to be a violator of the UN Global Compact (UNGC), it would be divested.

How did this financial product consider principal adverse impacts on sustainability factors

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Fund considered the following principal adverse impacts on sustainability factors: GHG Emissions, Carbon Footprint, GHG intensity of investee companies, Exposure to companies active in the fossil fuels sector, Share of non-renewable energy consumption and production, Energy consumption intensity per applicable high impact climate sector, Investments in companies without carbon emission reduction initiatives, Activities negatively affecting biodiversity sensitive areas, Emissions to water, Hazardous waste ratio, Violation of UNGC and OECD guidelines, Lack of processes and compliance mechanisms to monitor compliance with UNGC and OECD guidelines, Operations and suppliers at significant risk of incidents of child labour, Board gender diversity, and Exposure to controversial weapons.

For each issuer under coverage, analysts denote within our internal research platform the PAIs that inform their ESG recommendations. Those risk factors and the company's exposure to and dealing with each are reflected in our independent ESG metrics and are also detailed in comments directly related to the PAIs within our internal research database.

In the course of their due diligence, analysts focus on key performance indicators (KPI) that align to principal adverse impacts that are of material risk to specific sectors and issuers. Those KPIs are sourced directly from the issuer – via sustainability or integrated annual reports or direct engagement with management – or from third party data vendors. An issuer's performance in these KPIs relative to their industry peers forms the basis of our assignment of independent ESG Scores – which reflect the current state of sustainability risk – and ESG Trends – which are indicative of our outlook of sustainability risk over the next twelve months.

The fund relies on these proprietary metrics – ESG Score and ESG Trend – to determine issuer eligibility and position sizing, to ensure that investments do no significant harm with respect to the principal adverse impacts.

In the course of our due diligence on sustainability risks analysts may encounter areas of concern or uncertainty, which leads to issuer engagement. We formally track our engagement, which includes the consistent flagging of the principal adverse impacts which are under scope for each engagement.

With respect to UNGC violations and controversial weapons, issuers that are deemed UNGC violators and those involved in controversial weapons have been excluded from investment.

What were the top investments of this financial product?

The table above details the largest Investments in the Sub-Fund as at 31 December 2023. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

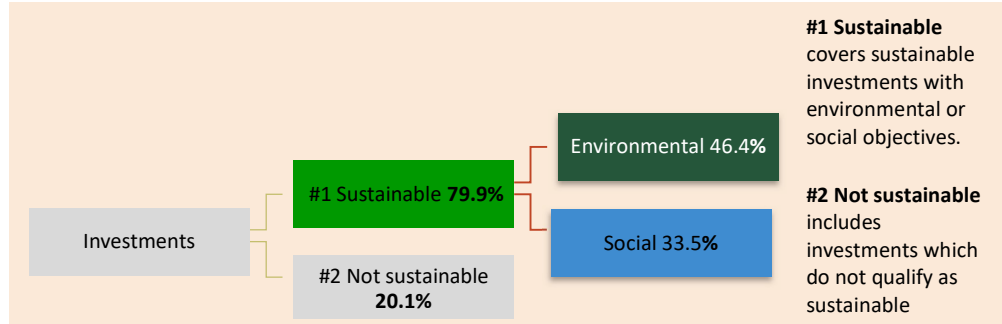

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

As noted above, the allocation across each of the four focus SDGs may sum to over 100%, as issuers often contribute to more than one goal. For the purposes of classifying a sustainable investment as either environmental or social, issuers that contribute to both have been classified based on the materiality of their respective contributions.

It was determined to close the fund in December 2023 due to anticipated outflows, which was communicated to investors on 18 December, with a termination date of 17 January 2024. Consequently as at the 31 December 2023, the wind up of the fund's portfolio had already commenced, which resulted in an increased exposure to cash and cash equivalent holdings as is reflected in this report. This activity was communicated in advance to investors in the notice issued on 18 December 2023.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● In which economic sectors were the investments made?

SECTOR BREAKDOWN (%)

	FUND

The table above details the sector breakdown in the Sub-Fund as at 31 December 2023. The percentages stated are relative to the Sub-Fund's Net Asset Value.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

- *Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?*

Yes: In fossil gas in nuclear energy

No

- *What was the share of investments made in transitional and enabling activities?*

Not applicable

- *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

Not applicable

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

46.4%

What was the share of socially sustainable investments?

33.5%

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Not sustainable” may consist of cash & cash equivalent holdings and derivatives used for efficient portfolio management purposes. The Sub-Fund has minimum environmental or social safeguards in place for these holdings, such that they are in line with, and do not affect, the delivery of the sustainable investment objective.

What actions have been taken to attain the sustainable investment objective during the reference period?

All Fund investments were deemed to have made a positive contribution to any of the following four SDGs – 8. decent work and economic growth, 9. industry innovation and infrastructure, 12. responsible consumption and production, 13. climate action. Positive contributions were defined as activities that advance the objective of each SDG. In order to determine whether a security meets this SDG standard and is therefore an eligible investment for the Fund, the impact of each issuer to each of the four SDGs was assessed by our team of analysts, who assign a score of +1 (Positive), 0 (Neutral), or -1 (Negative) to all issuers under coverage. Only investments assigned a Positive score were eligible for investment by the Fund.

The assessment of an issuer's contribution to each of these SDGs is an ongoing component of our analysis of sustainability risk and we consistently monitor this and all ESG metrics to ensure the Fund's portfolio remains in compliance with the investment objective.

In addition, the fund excluded from investment any issuer that: is not in compliance with United Nations Global Compact principles; has any ties to cluster munitions, landmines, biological/chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments; derives 10% or more of total revenues from thermal coal; derives any revenue from oil sands, shale oil, shale gas, coal seam gas or coal bed methane; manufactures tobacco products or grows or processes raw tobacco leaves; for which the production of alcoholic beverages represents the single largest source of revenue; and for which the operation of gambling establishments, manufacture of gambling equipment or servicing of such operations represents the single largest source of revenue.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

The Sub-Fund has in place the JP Morgan JESG CEMBI Broad Diversified Index as its benchmark, but the benchmark is not a specific designated index used for reference to meet the Sub-Fund's sustainable investment objective.

- ***How did the reference benchmark differ from a broad market index?***
