## What is this product?

### TYPE OF PRODUCT

The product is a sub-fund of Protea Fund, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

### TERM

The Sub-Fund is established for an unlimited duration. However, the board of directors may also propose to dissolve a sub-fund at a general meeting of that sub-fund.

### OBJECTIVES

#### Objectives and investment policy

The objective of the Sub-Fund is to achieve capital appreciation over the medium and long-term, offered through an exposure to the equities markets, while giving due consideration to environmental, social and governance ("ESG") criteria.

The Sub-Fund will invest at least 75% of its net assets in equities and equity-like securities issued by companies:

- With a suitable ESG profile, as determined by the Investment Manager; and
- Which are listed on the stock exchanges of European countries within the Organisation for Economic Cooperation and Development ("OECD");
- Which are domiciled, headquartered or exercise the predominant part of their economic activity within European countries (for the sake of clarity including the United Kingdom and Switzerland) which are part of the OECD, Japan and the United States.

Except the geographical restriction and the focus on the ESG criteria, the choice of investments will not be limited by an economic sector or by the currency in which investments will be denominated. However, depending on market conditions, a particular focus can be placed on a single country and/or on a single currency and/or on a single economic sector.

The remaining assets can be invested in the following financial assets (which will not follow necessarily the ESG criteria): money market instruments, cash and equivalents; undertakings for collective investment (UCIs); financial derivative instruments.

However the Sub-Fund will not invest more than 10% of its net assets in UCIs.

If the Investment Manager considers this to be in the best interest of the shareholders, the Sub-Fund may also hold, on a temporary basis and for defensive purposes, up to 100% of its net assets, in liquidities as among others cash deposits, money market UCIs (within the 10% limit above-mentioned) and money market instruments.

**Derivatives** For hedging and for any other purposes, the Sub-Fund may use all types of financial derivative instruments traded on a regulated market and/or over-the-counter. However, the Investment Manager intends to use principally options and/or futures on equities and currency financial derivatives.

**Benchmark** The Sub-Fund is actively managed. The benchmark index of the Sub-Fund is EUROSTOXX50 NET RETURN. It is mentioned only for information purposes and the Sub-Fund does not track the index. The Sub-Fund can deviate significantly from the benchmark index.

**ESG information** The Sub-Fund promotes certain environmental and social characteristics within the meaning of article 8 of SFDR but does not have a sustainable objective. ESG criteria assessed include, but are not limited to: air pollution, loss of biodiversity, climate change, waste management, water scarcity, health and safety of employees, gender equality, job creation, corruption.

**Dividend Policy** This Class is cumulative. Dividend distributions are not planned.

**Share Class Currency** The currency of the Class is EUR.

The recommended holding period of this product is determined to allow sufficient time for this product to reach its objectives and avoiding short term market fluctuations.

The return of the product is determined using the Net Asset Value (the "NAV") calculated by FundPartner Solutions (Europe) S.A. (the "Administrative Agent"). This return depends mainly on the market value fluctuations of the underlying investments.

### INTENDED RETAIL INVESTORS

The product is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 5 years.

### OTHER INFORMATION

**Depository** Bank Pictet & Cie (Europe) AG, succursale de Luxembourg (the "Depository").

For any subscription or redemption request received by the Fund, prior to 2 p.m. Luxembourg time, one business day before the Valuation Day, the NAV calculated based on the pricing of the Valuation Day will be applicable.

## What are the risks and what could I get in return?

### Risk indicator

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the investment fund lie in the possibility of depreciation of the securities in which the fund is invested.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

<b>Recommended holding period (RHP): Example investment</b>	<b>5 years EUR 10,000</b>

## What happens if FundPartner Solutions (Europe) S.A. is unable to pay out?

The Management Company is not making any payment to you in relation to the Sub-Fund and you would still be paid in case of a default from the Management Company.

The Sub-Fund's assets are held with a separate company, the Depositary, so the Sub-Fund's ability to pay out would not be affected by the insolvency of the Management Company. However, in the event of the Depositary's insolvency, or its delegates, the Sub-Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Sub-Fund. The Depositary will also be liable to the Sub-Fund or its investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfill its obligations (subject to certain limitations).

If the Sub-Fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment.

There is no compensation or guarantee scheme protecting you from a default of the Depositary.

## What are the costs?

**The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.**

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested

<b>Total costs</b>	EUR 244	EUR 1,562
