Flexible Dynamic EUR (the "Sub-Fund") is a sub-fund of PWM Funds (the "Fund") Class I (the "Class") - ISIN: LU1099988260

The Fund has appointed FundPartner Solutions (Europe) S.A. as management company.

Objectives and investment policy

The objective of the Sub-Fund is to enable investors to benefit from the general investment expertise of the Pictet Group by offering the possibility to invest directly or indirectly in a global balanced portfolio.

The Sub-Fund is actively managed. The Sub-Fund has no benchmark index and is not managed in reference to a benchmark index.

The Sub-Fund will mainly offer exposure to the following two asset classes: -equities and equity related securities (such as depositary receipts (ADRs, GDRs), closed-ended REITs); and/or -all types of debt securities (including non-investment grade securities up to 40%), including Money Market Instruments.

The Sub-Fund will mainly invest:

- directly in the securities/asset classes mentioned in the previous paragraph;
- in undertakings for collective investment (UCIs), having as main objective to invest or grant an exposure to the above-mentioned securities/asset classes; and/or
- in any transferable securities (such as structured products) offering an exposure to the above-mentioned securities/asset classes.

The allocation between asset classes is not limited and will vary depending on market conditions and Investment Manager's choices. However, without being a hard limit, the Compartment should be exposed to a maximum of 75% of its net assets to either the equity asset class or debt securities asset class.

The choice of investments will neither be limited by geographical area (including emerging markets), economic sector, currencies in which investments will be denominated, nor in terms of credit rating of the debt securities. However, depending on financial market conditions, a particular focus can be placed in a single country (or some countries) and/or in a single currency and/or in a single economic sector.

Investment in closed-ended collective real estate investments, such as closed-ended REITs, closed ended real estate investment funds and closed-ended real estate investment companies can represent a maximum of 75%

of the net assets.

For hedging or any other purposes, the Sub-Fund may use all types of financial derivative instruments traded on a regulated market and/or over-the-counter.

If the investment manager considers this to be in the best interest of the shareholders, on a temporary basis and for defensive purposes, the Sub-Fund may also, hold, up to 100% of its net assets, in cash and cash equivalents (deposits, money market UCIs and money market instruments).

Dealing Frequency

You can buy or sell the equities from the administrative agent every Tuesday (the valuation day), or on the previous working day if that day is not a working day. Equities may be bought or sold provided the order is placed with the administrative agent before 16:00 on the working day preceding the valuation day.

Risk and reward profile

Risk Disclaimer

- This current risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category, which corresponds to Number 1, cannot be regarded as being risk-free.
- The Sub-Fund does not provide any capital guarantee or asset protection measures.

Why is this Sub-Fund in this category?

The objective of this Sub-Fund is to enable investors to take advantage of the appreciation potential of a balanced portfolio invested in the main asset classes, which are monetary instruments (cash and equivalent), bonds and equities, at the global level. Asset allocation between these classes is based on market conditions and the Manager's choices. This asset allocation allows the Sub-Fund to present a medium risk/return profile on the risk scale.

Are there any other particular Risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward rating include:

- **Liquidity risks:** The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.
- **Counterparty risks:** The Sub-Fund can conclude various transactions

with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.

- **Credit risks:** The Sub-Fund can invest a significant portion of its assets in debt securities. The issuers of these debt securities may become insolvent, which will mean that the securities will lose all or some of their value.
- **Risks from the use of derivatives:** The Sub-Fund may use financial derivatives instruments which may result in the Sub-Fund being leveraged and may result in material fluctuations in the value of the Sub-Fund. Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Sub-Fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Sub-Fund being exposed to a greater loss than the initial investment.

- **Operational risks:** The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the management company or by external third parties or may be damaged by external events, such as natural disasters.
