The Fund has appointed FundPartner Solutions (Europe) S.A. as management company.

Objectives and investment policy

The investment objective of the Sub-Fund is to achieve superior absolute returns as well as superior risk-adjusted returns.

The Sub-Fund is actively managed. The Sub-Fund uses the index MSCI World Hedged Net Total Return USD for performance comparison only. The Sub-Fund does not track the index and can deviate significantly or entirely from the index.

The Sub-Fund will mainly invest in, but not limited to, equities. It will also invest in depositary receipts (American (ADR), International (IDR) and Global Depositary Receipts (GDR)) for the purpose of gaining indirect exposure to equity and/or equity related securities.

The Sub-Fund may also invest, on an ancillary basis, in money market instruments, financial derivative instruments, bank deposits, undertakings for collective investment (UCIs), debt instruments and in other eligible investments.

However, the Sub-Fund will invest:

- in sovereign, supranational and corporate bond with a rating of not less than BB by Standard & Poor's, or its equivalent by Moody's or another rating agency. Investments in bonds are only anticipated to be made in circumstances when equity markets are not performing and in the best interests of the Sub-Fund.

- Up to 25% of its net assets in emerging markets

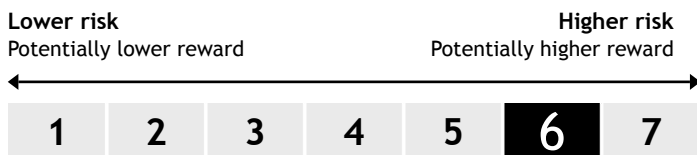

The Sub-Fund will not invest in contingent convertible bonds.

The Sub-Fund is authorised to invest in financial derivative instruments for currency hedging and/or for investment purposes.

The equity asset class exposure should represent between 30% and 125% of the Sub-Fund's net assets.

However, under exceptional market circumstances, the Sub-Fund's exposure to equities may fall below 30% and the Sub-Fund's exposure to cash and cash equivalents assets may exceed 40%.

Are there any other particular Risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward rating include:

- **Liquidity risks:** The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.

- **Counterparty risks:** The Sub-Fund can conclude various transactions

with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.

- **Credit risks:** The Sub-Fund may invest a portion of its assets in debt securities. The issuers of these debt securities may become insolvent, which will mean that the securities will lose all or some of their value.

- **Risks from the use of derivatives:** The Sub-Fund may use financial derivatives instruments which may result in the sub-fund being leveraged and may result in material fluctuations in the value of the Sub-Fund. Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the sub-fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the sub-fund being exposed to a greater loss than the initial investment.

- **Operational risks:** The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the management company or by external third parties or may be damaged by external events, such as natural disasters.
